"Whereas, Florida is denied these markets due to the reciprocal trade agreement between the United States and Canada which will not permit Florida shipment to that country in violation of the secretary's import regulation and Mexico is not a member of the general agreement on tariffs and trade and refuses to open her markets to outside competition during the time her farmers are in production; and

"Whereas, the Florida tomato industry is the predominant domestic producer of fresh tomatoes during its seven-month season and the restrictions on the imports are the same as are on the Florida growers; and

"Whereas, Florida's hundred million dollar tomato industry will be taken over by foreign producers unless uniform policies are maintained. Now, Therefore, be it

"Resolved by the Legislature of the State of Florida:

"That we do hereby petition the members of the congress to defeat H.R. 5865 and do hereby urge the members to commend the U.S. department of agriculture for maintaining a fair and uniform policy in the tomato industry.

"Be it further resolved that copies of this memorial be dispatched to the president of the United States, to the president of the United States senate, to the speaker of the United States house of representatives, and to each member of the Florida delegation to the United States congress.

"Filed in Office Secretary of State May 9, 1969.

"TOM ADAMS,
"Secretary of State."

A Senate memorial, adopted by the Florida Legislature; to the Committee on Finance:

"SENATE MEMORIAL 173

"A memorial to the Congress of the United States to request amendment of the Sugar Act to allow the mainland cane sugar area to fill a portion of the unused Puerto Rican quota

"Whereas, Florida sugarcane farmers and processors face a drastic and disastrous cane acreage reduction unless they are granted the right to sell more sugar, and

"Whereas, prospects for these drastic restrictions on the Florida sugar industries come at a time when:

"(1) Foreign producers are allowed to increase their sugar sales to the United States, and

"(2) Other domestic sugar areas are producing and selling sugar without restriction, and

"Whereas, if the impending additional cane acreage cuts are imposed upon Florida, many cane farmers and some processors will be forced out of business since there are no substitute crops they can grow or process, and

"Whereas, for many years Puerto Rico has been unable to produce enough sugar to fill its annual sugar marketing quota, a logical solution to the Florida problem could be Congressional action to allow the Mainland Cane Sugar Area to fill a portion of the unused Puerto Rican quota, enough at least to prevent Florida farmers from having to take another drastic acreage cut, and

"Whereas, the Sugar Act now provides that the unused Puerto Rican quota must be allocated to the Philippines and Western Hemisphere and in 1967, the Philippines could not use its share of the Puerto Rican deficit, and it all went to Western Hemisphere countries, and

"Whereas, most of these Western Hemisphere countries had already been granted, by the 1965 Sugar Act Amendments, the right to greatly increase their sugar sales to the United States, and in all probability, with the size of the Puerto Rican deficit tending to become larger each year, these foreign countries would still receive additional quota each year even if a portion of the deficit went to help Florida, and

"Whereas, granting the Mainland Cane Sugar Area the right to fill part of the unused Puerto Rican deficit will not harm any domestic sugar producing area or the cane sugar refiners, and

"Whereas, increased marketing rights for Florida sugar would contribute to the national interest since the United States balance-of-payments position would be improved, as less dollars would be sent abroad to buy foreign sugar, and

"Whereas, increasing international tensions accentuate the need for larger, rather than less, production of sugar in the continental United States, and

"Whereas, a further speedup in the exodus of farm workers to cities would be avoided, and

"Whereas, any critical shortage of shipping would be alleviated, and

"Whereas, a reduction in taxes paid to local, state, and federal governments would be avoided and, if the increased marketing rights are not granted, the Florida sugarcane industry will be reduced in size, resulting in less income and less taxes paid by those in the sugar industry and those in the many allied businesses, and

"Whereas, the current sugarcane crisis is a vivid and specific example of an important United States agricultural industry being seriously crippled through quota restrictions when at the same time foreign production shipped to the United States is allowed to increase, Now, therefore, be it

"Resolved by the Legislature of the State of Florida, That the Congress of the United States is urged to amend the Sugar Act to allow the Mainland Cane Sugar Area to fill a portion of the Unused Puerto Rican quota, enough at least to prevent the Florida sugarcane growers from having to take another drastic cut; be it further

"Resolved, That copies of this Memorial be dispatched to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress.

"Filed in Office Secretary of State May 9, 1969.

"TOM ADAMS,
"Secretary of State."

A resolution adopted by the National Academy of Sciences, concerning the administration of Selective Service Regulations; to the Committee on Armed Services.

A resolution adopted at the 1969 meeting of the General Assembly of the Presbyterian Church in the United States on the subject

of "Alternative to Combat Service"; to the Committee on Armed Services.

A resolution adopted by the Oklahoma Library Association, praying for the enactment of legislation to create as a permanent Federal Commission the National Library Commission; to the Committee on Labor and Public Welfare.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DIRKSEN (for Mr. EASTLAND), from the Committee on the Judiciary, without amendment:

S. 620. A bill for the relief of Richard Vigil (Rept. No. 91-175);

H.R. 2948. An act for the relief of Maria Priscilla Caramanzana (Rept. No. 91-176); and

H.R. 3464. An act for the relief of Maria Balluado Frasca (Rept. No. 91-177).

By Mr. DIRKSEN (for Mr. EASTLAND), from the Committee on the Judiciary, with an amendment:

S. 564. A bill for the relief of Mrs. Irene G. Queja (Rept. No. 91-178); and

S. 797. A bill to fix the date of citizenship of Alfred Lorman for purposes of War Claims Act of 1948 (Rept. No. 91-179).

By Mr. DIRKSEN (for Mr. THURMOND), from the Committee on the Judiciary, without amendment:

S. 1002. A bill for the relief of Reddick B. Still, Jr., and Richard Carpenter (Rept. No. 91-180).

By Mr. JORDAN of North Carolina, from the Committee on Public Works, without amendment:

S. 1888. A bill to change the composition of the Commission for Extension of the U.S. Capitol (Rept. No. 91-173).

By Mr. SPARKMAN from the Committee on Banking and Currency, without amendment:

H.R. 8188. An act to provide for the striking of medals in commemoration of the 100th anniversary of the founding of the city of Wichita, Kans. (Rept. No. 91-174).

SENATE JOINT RESOLUTION 111— JOINT RESOLUTION TO AUTHORIZE TEMPORARY ADVANCES BY THE COMMODITY CREDIT COR- PORATION TO THE EMERGENCY CREDIT REVOLVING FUND—RE- PORT OF A COMMITTEE (REPT. NO. 91-181)

Mr. McGOVERN, from the Committee on Agriculture and Forestry, reported an original joint resolution (S.J. Res. 111) to authorize temporary advances by the Commodity Credit Corporation to the Emergency Credit Revolving Fund, which joint resolution was placed on the calendar, as follows:

S.J. Res. 111

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Commodity Credit Corporation is authorized to advance up to a total of \$25,000,000 to the Emergency Credit Revolving Fund (7 U.S.C. 1966) under the authority of this resolution. Such advances, together with interest at a rate which will compensate Commodity Credit Corporation for its cost of money during the periods in which the advances are outstanding, shall be repaid out of appropriations to the fund hereafter made.

BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unani-

mous consent, the second time, and referred as follows:

By Mr. BYRD of West Virginia:

S. 2174. A bill to amend title II of the Social Security Act to provide a more equitable standard in determining disability in the case of certain individuals who have attained age 55, and to reduce certain time requirements which are applicable in determining whether an individual qualifies for benefits based on disability or for the disability freeze; to the Committee on Finance.

By Mr. SPONG:

S. 2175. A bill to authorize the Secretary of the Navy to convey to the city of Portsmouth, State of Virginia, certain lands situated within the Crawford urban renewal project (Va-53) in the city of Portsmouth, in exchange for certain lands situated within the proposed Southside neighborhood development project; to the Committee on Armed Services.

By Mr. MAGNUSON (by request):

S. 2176. A bill to implement the Convention on Offenses and Certain Other Acts Committed on Board Aircraft, and for other purposes; and

S. 2177. A bill to amend the act of September 7, 1950 (relating to the construction of a public airport in or near the District of Columbia), to authorize arrests for offenses committed on Federal lands acquired to provide access to the airport, and for other purposes; to the Committee on Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bills, which appear under separate headings.)

By Mr. METCALF:

S. 2178. A bill for the relief of Tommaso Napoli;

S. 2179. A bill for the relief of Antonio Di Leonardo;

S. 2180. A bill for the relief of Domenico Di Leonardo; and

S. 2181. A bill for the relief of Giuseppe Di Leonardo; to the Committee on the Judiciary.

By Mr. YARBOROUGH (for himself, Mr. CRANSTON, Mr. EAGLETON, Mr. HUGHES, Mr. KENNEDY, Mr. MONDALE, Mr. NELSON, Mr. PELL, Mr. RANDOLPH, and Mr. WILLIAMS of Delaware):

S. 2182. A bill to amend the Public Health Service Act to revise, extend, and improve the program established by title VI of such act, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. YARBOROUGH when he introduced the above bill, which appear under a separate heading.)

By Mr. GURNEY:

S. 2183. A bill to authorize the Secretary of the Interior to convey certain reserved phosphate, mineral, and petroleum interests of the United States in certain lands located in the State of Florida to the record owner or owners of such lands; to the Committee on Interior and Insular Affairs.

By Mr. PROUTY (for himself, Mr. COTTON, and Mr. SCOTT):

S. 2184. A bill to amend part B of title XVIII of the Social Security Act to include prescribed drugs among the items and services covered under the supplementary medical insurance program for the aged; to the Committee on Finance.

(See the remarks of Mr. PROUTY when he introduced the above bill, which appear under a separate heading.)

By Mr. TYDINGS (for himself, Mr. BIBLE, Mr. SPONG, Mr. EAGLETON, Mr. PROUTY, Mr. GOODELL, and Mr. MATHIAS):

S. 2185. A bill to authorize a Federal contribution for the effectuation of a transit development program for the National Capital region, and to further the objectives of the National Capital Transportation Act of 1965 (79 Stat. 663) and Public Law 89-774 (80 Stat. 1324); to the Committee on the District of Columbia.

(See the remarks of Mr. TYDINGS, when he

introduced the above bill, which appear under a separate heading.)

By Mr. LONG:

S. 2186. A bill to amend chapter 19, United States Code, so as to provide dismemberment insurance coverage under the servicemen's group life insurance program; to the Committee on Finance.

(See the remarks of Mr. LONG when he introduced the above bill, which appear under a separate heading.)

By Mr. HART:

S. 2187. A bill for the relief of Bernardita M. Balagot; to the Committee on the Judiciary.

By Mr. EAGLETON:

S. 2188. A bill for the relief of Dr. Walter Ling (Wisalaya Luknakul); and

S. 2189. A bill for the relief of Leonidez Vinbollo Galang; to the Committee on the Judiciary.

By Mr. SPARKMAN (for himself, Mr. BIBLE, Mr. CANNON, Mr. HARRIS, Mr. HATFIELD, Mr. MCGEE, Mr. MCGOVERN, Mr. METCALF, Mr. MONTOYA, Mr. NELSON, Mr. PROUTY, Mr. TALMADGE, Mr. COOPER, Mr. ERVIN, Mr. MILLER, Mr. MONDALE, and Mr. TOWER):

S. 2190. A bill to require the Secretary of Agriculture to report to the Congress each year certain information relating to the import and export of agricultural commodities; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. KENNEDY:

(S. 2191. A bill to amend the provisions of chapter 5 of title 5, United States Code, relating to administrative procedure; to the Committee on the Judiciary.)

(See the remarks of Mr. KENNEDY when he introduced the above bill, which appear under a separate heading.)

By Mr. PERCY:

S. 2192. A bill to provide an incentive for private employers to employ and train unskilled individuals certified by the Secretary of Labor by allowing an income tax credit for wages paid to such individuals; to the Committee on Finance.

(See the remarks of Mr. PERCY when he introduced the above bill, which appear under a separate heading.)

By Mr. WILLIAMS of New Jersey (for himself, Mr. KENNEDY, Mr. MONDALE, and Mr. YARBOROUGH):

S. 2193. A bill to authorize the Secretary of Labor to set standards to assure safe and healthful working conditions for working men and women; to assist and encourage States to participate in efforts to assure such working conditions; to provide for research, information, education, and training in the field of occupational safety and health, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. WILLIAMS of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. WILLIAMS of New Jersey:

S. 2194. A bill for the relief of Po Fat Cheng;

S. 2195. A bill for the relief of Kwan Li; and

S. 2196. A bill for the relief of Ka Wai Lau; to the Committee on the Judiciary.

By Mr. BENNETT:

S. 2197. A bill to establish fee programs for entrance to and use of areas administered for outdoor recreation and related purposes by the Secretary of the Interior and the Secretary of Agriculture, and for other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. BENNETT when he introduced the above bill, which appear under a separate heading.)

By Mr. WILLIAMS of New Jersey:

S. 2198. A bill for the relief of Muck Sang Mok; to the Committee on the Judiciary.

By Mr. MCGOVERN:

S.J. Res. 111. A joint resolution to authorize temporary advances by the Commodity Credit Corporation to the emergency credit revolving fund; placed on the calendar.

(See reference to the above joint resolution when reported by Mr. MCGOVERN, which appears under a separate heading.)

S. 2176—INTRODUCTION OF A BILL TO IMPLEMENT THE CONVENTION ON OFFENSES AND CERTAIN OTHER ACTS COMMITTED ON BOARD AIRCRAFT, AND FOR OTHER PURPOSES

Mr. MAGNUSON. Mr. President, I introduce, by request of the Secretary of Transportation, a bill to amend the Federal Aviation Act of 1958, "to implement the Convention on Offenses and Certain Other Acts Committed on Board Aircraft, and for other purposes." This bill is designed to provide the domestic legislation necessary for U.S. implementation of the Convention signed at Tokyo on September 14, 1963. On May 12 the Senate voted to ratify the Tokyo Convention.

I ask unanimous consent that the provisions of the bill and the letter of transmittal to the Vice President from the Secretary of Transportation be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and the letter will be printed in the RECORD.

The bill (S. 2176) to implement the Convention on Offenses and Certain Other Acts Committed on Board Aircraft, and for other purposes, introduced by Mr. MAGNUSON (by request), was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 2176

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) A new subsection (32) be inserted in Section 101 of the Federal Aviation Act of 1958 (49 U.S.C. 1301) as follows:

"(32) The term 'special aircraft jurisdiction of the United States' includes the following aircraft while in flight—

"(a) civil aircraft of the United States;
"(b) aircraft of the National Defense Forces of the United States; and
"(c) any other aircraft—

"(i) within the United States, or
"(ii) outside the United States which has its next scheduled destination or last point of departure in the United States provided that in either case it next actually lands in the United States.

"For the purpose of this definition, an aircraft is considered to be in flight from the moment when power is applied for the purpose of take-off until the moment when the landing run ends."

(2) Existing subsection (32), (33), (34) and (35) are renumbered (33), (34), (35) and (36), respectively.

(3) Subsections 902(1), (j) and (k) of such Act [49 U.S.C. 1472(1), (j) and (k)] are amended by deleting the words "in flight in air commerce" wherever they appear in those subsections and substituting therefor the words "within the special aircraft jurisdiction of the United States."

The material, presented by Mr. MAGNUSON, follows:

THE SECRETARY OF TRANSPORTATION.

Washington, D.C., April 25, 1969.

HON. SPIRO T. AGNEW,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I have the honor to submit to the Senate a draft bill to amend the Federal Aviation Act of 1958, "To implement the Convention on Offenses and Certain Other Acts Committed on Board Aircraft, and for other purposes."

The principal purpose of this draft bill is to provide the legislation necessary for the United States to implement the provisions of the Convention on Offenses and Certain Other Acts Committed on Board Aircraft signed at Tokyo on September 14, 1963. For several years the United States has supported the development of a multilateral convention dealing with crimes, and other acts jeopardizing safety, committed on board aircraft engaged in international aviation. Since aircraft in international air transportation may traverse sovereign airspace at great speeds, and in some cases travel between national borders in a matter of a few minutes, continuity of jurisdiction with respect to crimes and offenses committed on such aircraft is particularly necessary. Presently, there is no widely accepted rule establishing such continuity of jurisdiction.

At its Sixth Session in June 1950, the Legal Committee of the International Civil Aviation Organization (ICAO) initiated a study regarding the possibility of negotiating a treaty which would establish jurisdictional rules in respect of treatment of crimes committed on board aircraft and related matters. During the ensuing 13 years the attendant problems were discussed fully and their resolutions negotiated. The United States of America was a major supporter of this Convention and when it was opened for signature in 1963, the United States Delegation was authorized to sign it. The Convention has been signed by 32 States and, to date, has been ratified by 8.

Several features make the Tokyo Convention a desirable international agreement. First, a positive rule of international law is established between contracting States which provides that the State in which an aircraft is registered is competent to exercise jurisdiction over offenses committed aboard that aircraft when it is in flight, or on the surface of the high seas or any other area outside the territory of any State. The Tokyo Convention does not establish a rule of exclusive jurisdiction; rather, it assures that at least the State of registration will have the competence to exercise its jurisdiction while permitting the exercise of concurrent jurisdiction by other countries, depending upon their respective interests in the offence and the applicability of the traditional rules of international law regarding assertion of jurisdiction.

Second, the Convention provides for an element of certainty in the powers and authority of the aircraft commander. Without the applicable provisions, the actions of the commander is apprehending or "off-loading" an offender are subject to the laws of the country in which he lands; the correctness of his decisions also may be judged in accordance with the national law of the country overflown. Additionally, any other member of the crew, any passenger, the owner or operator of the aircraft and the person on whose behalf the flight was performed, will be immunized legally if their actions are reasonable and in accordance with the provisions of the Convention. Such immunity will create attitudes and actions, where necessary, that will significantly contribute to maintain the safety of flight in international aviation.

Third, the Convention provides for rules and procedures for the disembarkation of an offender which may be utilized by the commander in the territory of any State in which the aircraft lands. Provision is also made in the Convention for the right

of the aircraft commander to deliver certain persons to the competent authorities of a contracting State in which he lands. Further, the receiving State is obliged to take delivery of an offender and, upon being satisfied that the circumstances so warrant, to take custody or other measures to ensure the presence of such a suspected offender. The Convention contains several provisions designed to protect the rights of an alleged offender and to ensure expeditious legal disposition of the case.

Fourth, the Convention contains an important provision relating to "hijacked" aircraft. This provision imposes a positive obligation on contracting States to take all appropriate measures to restore control of the aircraft to its lawful commander, or to preserve his control of the aircraft.

The enclosed draft bill would amend the Federal Aviation Act of 1958 to permit the United States to implement certain provisions of the Tokyo Convention. Section 101 of the Act is amended to create the "special aircraft jurisdiction of the United States" which would include, while in flight, all civil aircraft of the United States, aircraft of the National Defense Forces of the United States, and any other aircraft within the United States or, under specified circumstances, outside the United States. Subsections 902 (i), (j), and (k) of the Act (which provide criminal penalties for aircraft piracy, interference with flight crew members, and certain other acts) are then amended to substitute the "special aircraft jurisdiction" for the jurisdiction presently conferred by the term "in flight in air commerce". The effect of these amendments is to extend the criminal provisions to all aircraft within the special aircraft jurisdiction of the United States as defined by the amended section 101. While this redefinition of jurisdiction is necessary to conform with the purposes of the Tokyo Convention, it still falls wholly within the jurisdiction of the Federal Government under the Constitution.

Inclusion of aircraft of the National Defense Forces of the United States within the special aircraft jurisdiction is not essential to the legislative implementation of the Tokyo Convention. However, they are included at the request of the Department of Defense because such coverage is consistent with the spirit of that Convention and because it closes a jurisdictional gap. There would otherwise be serious doubt as to U.S. jurisdiction over crimes committed by individuals who are not subject to the uniform code of military justice (primarily U.S. military dependents and civilian employees of the Department of Defense in time of peace) while on board U.S. military aircraft flying over foreign territory.

The clause in the legislation referring to the period when the enumerated subsections are applicable is the statement usually employed internally for similar purposes; i.e., "from the moment when power is applied for the purpose of take-off until the moment when the landing run ends".

The Bureau of the Budget advises that there is no objection to the submission of the legislation for the consideration of the Congress from the standpoint of the Administration's program.

Sincerely,

JOHN A. VOLPE.

S. 2177—INTRODUCTION OF A BILL TO AUTHORIZE ARRESTS FOR OFFENSES COMMITTED ON FEDERAL LANDS ACQUIRED TO PROVIDE ACCESS TO THE AIRPORT, AND FOR OTHER PURPOSES

Mr. MAGNUSON. Mr. President, I introduce, by request of the Secretary of Transportation, a bill to amend the act

of September 7, 1950 (relating to the construction of a public airport in or near the District of Columbia), to authorize arrests for offenses committed on Federal lands acquired to provide access to the airport, and for other purposes.

I ask unanimous consent that the bill and the letter of transmittal to the Vice President from the Secretary of Transportation be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately received; and, without objection, the bill and letter will be printed in the RECORD.

The bill (S. 2177) to amend the act of September 7, 1950, relating to the construction of a public airport in or near the District of Columbia, to authorize arrests for offenses committed on Federal lands acquired to provide access to the airport, and for other purposes, introduced by Mr. MAGNUSON (by request), was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 2177

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 11 of the Act entitled "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770, Ch. 905), is amended to read as follows:

"SEC. 11. As used in sections 4, 5, 6, 7, 8, 9, and 12, the word "airport" includes rights of way or easements for roads, trails, pipe lines, power lines, railroad spurs, and other similar facilities acquired and retained under section 3. Unless the context otherwise requires, the definitions of other words or phrases used in this Act shall be the definitions assigned to such words and phrases by the Federal Aviation Act of 1958, as amended."

The material presented by Mr. MAGNUSON follows:

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., May 9, 1969.

Hon. SPIRO T. AGNEW,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of a bill "To amend the Act of September 7, 1950 (relating to the construction of a public airport in or near the District of Columbia), to authorize arrests for offenses committed on Federal lands acquired to provide access to the airport, and for other purposes."

It is recommended that the bill be enacted by the Congress.

The Act of September 7, 1950 (64 Stat. 770), authorized and directed the Administrator of the Federal Aviation Agency to construct and operate a public airport within or in the vicinity of the District of Columbia. Under that authority, a site for the airport (subsequently named Dulles International Airport) was chosen at Chantilly, Virginia, and the FAA acquired lands for construction of the airport and for construction of an access highway connecting the airport terminal and United States route number 66. Concurrent jurisdiction over the lands acquired for the airport and the access road was accepted by the Federal Aviation Agency on behalf of the United States, and the airport was opened on November 17, 1962. Under the Department of Transportation Act, the functions, powers, and duties of the FAA Administrator with respect to the administration of the airport were transferred to and vested in the Secretary of Transportation.

The Act of September 7, 1950, leaves to the

discretion of the Secretary of Transportation whether highways constructed to provide access to the airport from established streets and highways shall be retained by the Department or transferred to the State or political subdivision in which the highways are located. The Secretary, and the FAA Administrator before him, has retained control over the lands acquired for construction of the highway connecting the airport terminal and route number 66.

The Act provides that the Secretary shall have control over and responsibility for the care, operation, maintenance, improvement, and protection of the airport, together with the power to make and amend such rules and regulations as he may deem necessary for the proper exercise thereof. The Department considers the access road to be a part of the airport property and exercises the same degree of control over the care and protection of the highway as it does over the airfield itself. It maintains the highway, provides police protection along its course, and prescribes traffic and other regulations governing its use.

However, in a case decided in December 1965 by the United States District Court for the Eastern District of Virginia, the Court ruled that an arrest on the access highway by an FAA airport police officer was unlawful, and the Court set aside the conviction of a motorist who had exceeded the speed limit prescribed for the highway by FAA. (See enclosed copy of the Court's Order.) The arrest was made under section 8 of the Act. That section, in part, authorizes designated airport employees to arrest without warrant any person committing any offense against the laws of the United States, or against any rule or regulation prescribed under the Act, where the offense is committed within the limits of the airport and in the presence of the employee. For the purposes of making arrests under the Act, the Court concluded that the point on the highway where the offense was committed was not "within the limits of the airport."

We continue in the belief that Congress intended that the word "airport" in section 8 include federally-owned access roads, but due to the ruling of the Court in the above-mentioned case, we think that it is appropriate that Congress should reaffirm its original intent by amending the Act to clarify the definition of "airport" to preclude any future doubt as to its meaning. The proposed legislation would do that. It adds to section 11 of the Act a definition of the word "airport" providing that lands and interests in lands acquired and retained under section 3 of the Act for roads, pipe lines, power lines, railroad spurs and other similar facilities necessary or desirable for the construction or operation of the airport are considered to be a part of the airport. In addition to resolving the problem with respect to making arrests on access highways and similar facilities, this amendment clarifies the authority of the Secretary to issue regulations applicable to such facilities, and to exercise general control over their care and protection.

A perfecting amendment has also been made to section 11 to replace an out-of-date reference to the Civil Aeronautics Act of 1938 with a reference to the Federal Aviation Act of 1958.

The Bureau of the Budget has advised that there is no objection from the standpoint of the Administration's program to the submission of this proposed legislation to the Congress.

Sincerely,

JOHN A. VOLPE.

UNITED STATES OF AMERICA v. PIERRE J. LAFORE
ORDER

This is an appeal from a judgment of the United States Commissioner upholding

the authority of the airport police to make arrests of persons charged with violating the speed limits proscribed by the Administrator (Federal Aviation Agency) for the access road to the Dulles International Airport. The facts are not in dispute.

The defendant was arrested on the access road, some miles outside the airport proper, for an alleged violation of the speed limit. The arrest was made and a summons was issued by an airport police officer.

The Commissioner based his determination on the premise that the access road was a part of the airport, 14 C.F.R. § 159.35 (1964).

When read with the statutory grant creating the airport (Act of September 7, 1950, 64 Stat. 770), the Court does not so read the regulation.

Section 8(a) of the Act empowers designated employees—here the airport police—

"(1) to arrest under a warrant within the limits of the airport any person accused of having committed within the boundaries of the airport any offense against the laws of the United States, or against any rule or regulation prescribed pursuant to this Act; (2) to arrest without warrant any person committing any such offense within the limits of the airport, in his presence; or (3) to arrest without warrant within the limits of the airport any person whom he has reasonable grounds to believe has committed a felony within the limits of the airport."

Nothing therein authorizes the airport police to make arrests beyond the boundaries of the airport.

The land encompassed within the airport was acquired by condemnation proceedings instituted on January 29, 1958 in this court in Civil Action No. 1638-M.

The lands for building the access highway to the airport were acquired by condemnation proceedings instituted on March 31, 1959 in this court in Civil Action No. 1902-M.

Concurrent jurisdiction over the lands mentioned in both condemnation suits was accepted by the Federal Aviation Agency on behalf of the United States on November 14, 1961; acknowledged and received by the Governor of Virginia on November 15, 1961.

Regulations promulgated by the Administrator of the Federal Aviation Agency state that "the access road to Dulles International Airport from the terminal building to its terminus at United States route number 66 constitutes a part of the airport property."

In so doing the Administrator permitted private vehicles to enter upon the road only for the purpose of going to or leaving the airport. (14 C.F.R. § 159.35.)

This regulation refers to the ownership of and the right of the public to use the access road.

The Administrator's holding that the access road is a part of the airport property does not enlarge the power of the airport police to make arrests beyond the boundaries of the airport.

The Act creating the airport limits the authority of the airport police to make arrests within the airport. The arrest in this case, having been made some miles beyond the limits of the airport by an airport police officer, being unlawful, the conviction should be set aside, and it is so ordered.

The Clerk will forward a copy of this order to the United States Attorney for this District, the United States Commissioner, and to the defendant.

DECEMBER 22, 1965.

U.S. District Judge.

S. 2182—INTRODUCTION OF HOSPITAL AND MEDICAL FACILITIES CONSTRUCTION AND MODERNIZATION AMENDMENTS OF 1969

Mr. YARBOROUGH. Mr. President, hospitals are the major means of bring-

ing the benefits of modern medicine to the people of our country. Many hospitals are also centers for research and clinical testing, and for education and training of medical manpower—doctors, nurses, and numerous kinds of technicians and paramedical personnel.

In seeking to provide high quality patient care and to meet broader community responsibilities, many hospitals and hospital centers, in addition to providing general medical and surgical care, are expanding their services to encompass extended care, rehabilitation, psychiatric and social services, home care, prevention, diagnostic, ambulatory and emergency services, and health education. The establishment of specialized facilities for the treatment of a particular disease or disability, and the development of satellite hospitals, and neighborhood health centers as an extension of the hospital into the community are other attempts by hospitals to discover and demonstrate more effective, more efficient, and less costly ways of delivering health services. We should encourage these initiatives.

No single general hospital is likely to meet all the health needs of all the people in its area, and a special responsibility rests on hospitals to support and fulfill their essential role in comprehensive health planning to meet community needs. Recognizing this, the American Hospital Association in January of this year affirmed its advocacy of local and areawide planning focused on services, manpower, equipment, and facilities. This is surely a step in the right direction, toward the goal of optimum health services for all our people.

I congratulate the hospitals of America as they mark the 17th National Hospital Week, May 11-17.

Since this is National Hospital Week, it is most appropriate that I am introducing a bill today that will permit us to continue our progress in making modern hospitals and health care facilities accessible to all the people of this country. This legislation provides for a number of innovations to encourage a better utilization of our limited health resources, improve the delivery of health services and reduce the soaring costs of medical care.

The cost of medical care is a problem that concerns all of us. All of our citizens are entitled to adequate health services—not as a privilege, but as a basic right.

The cost of these health services is rising rapidly. In some hospitals across the country, the per diem rate exceeds \$100. The national average for 1968 was over \$65 a day, an increase of 12 percent over the preceding year.

Despite these rising charges, hospitals are badly in need of substantial financial assistance for construction and modernization. The States report urgent needs for the construction of new health facilities at an estimated cost of \$6 billion, and urgent needs for the modernization or replacement of obsolete health care facilities at an estimated cost of \$10.5 billion.

I have learned from the Department of Health, Education, and Welfare that in my own State of Texas the cost to construct needed health facilities is esti-

mated at \$469 million, and to modernize obsolete health facilities \$383 million. As opposed to the above figures, Texas received only about \$17 million per year for both modernization and construction for each of the last 3 years.

These costs cannot be met without assistance in the form of grants, guaranteed loans, and direct loans from the Federal Government. That is why the legislation that I am proposing provides increased financial assistance through grants, insured loans, and direct loans for the badly needed construction and modernization of health care facilities.

In summary, the Hospital and Medical Facilities Construction and Modernization Amendments of 1969, in title I, authorizes a 5-year program of grants to the States to pay for part of the cost of new construction and modernization of public and other nonprofit hospitals, extended care facilities, outpatient facilities, public health centers, and rehabilitation facilities. Total authorization is \$390 million for 1971, \$420 million for 1972, \$440 million for 1973, \$460 million for 1974, and \$480 million for 1975. The total authorization for 1970 under existing legislation is \$295 million.

There are separate authorizations for each of the categories of health facilities, but the liberal transfer provisions under existing law would be retained. The present appropriations allotment formula to the States is also retained.

There are several changes in existing law that will contribute to better health care. First of all, there is a provision under the existing law that prohibits financial assistance for the construction of outpatient facilities unless they are owned by a public agency or by a private, nonprofit hospital. This restriction would be relaxed to permit any private, nonprofit group to construct or modernize an outpatient facility. Priority would be given to projects where comprehensive health services are provided, particularly projects for prepaid group health practice. States may give priority to rural communities.

Priority would be given to construction or modernization projects of general hospitals where there is provision for the services of an extended care facility. This change would assist in reducing the costs of medical care since it can cost twice as much per day to care for a patient in a general hospital as compared to costs in an extended care facility. Another priority has been added in the case of projects for construction and modernization of facilities which provide training in health professions.

To prevent duplication in the construction of expensive health care facilities, the bill would require existing State agencies to consult with the appropriate areawide health planning agency prior to approval of a project for construction or modernization assistance.

To contribute to reducing the cost of health care, the legislation would give the States the option of increasing the Federal share of construction costs by up to 20 percent in the case of projects that offer potential for reducing health care costs through shared services, interfacility cooperation or dispersed ambulatory care centers.

This legislation also extends for 5 additional years section 304(d) of the Public Health Service Act, which authorizes health services research and demonstration programs. Major problems requiring solutions are rising costs, unequal utilization of services, and differences in availability and quality of service. The increased authorizations are \$80 million for 1971, \$85 million for 1972, \$90 million for 1973, \$95 million for 1974, and \$100 million for 1975. Present authorization for 1970 is \$60 million.

In title II, the bill would authorize a new program of loan guarantees to cover up to 90 percent of the cost of modernization and construction of private, non-profit hospitals and other health care facilities. A similar provision was passed by the Senate last year but was dropped in conference. The total amount of principal of loans which may be guaranteed would be divided between modernization and new construction by the Secretary and allocated among the States on the basis of each State's relative population, financial need, and need for modernization and construction, respectively. The Federal Government would pay one-half of the first 6 percent of interest charges plus one-third of the remainder. The cumulative total of principal of the guaranteed loans outstanding will be \$2 billion over 5 years, but not more than \$400 million per year.

Title III would also authorize a new program of direct Federal loans to cover up to 90 percent of the cost of construction and modernization of public hospitals and other health care facilities. The amounts available for loans would be allocated among the States on the basis of population, financial need, and the extent of need for new construction and modernization. There would be authorized to be appropriated not to exceed \$750 million over the 5 fiscal years beginning with the fiscal year ending June 30, 1971. The loans would be repaid over a maximum period of 25 years. The interest rate would be 3 percent.

Title IV would authorize a new program for grants for the modernization of emergency rooms of general hospitals. The authorization is for \$10 million each year for the next 5 years. These special project grants would be administered by the Secretary of Health, Education, and Welfare, after consultation with the existing State agency, for projects for which adequate assistance is not readily available from other sources to assist in providing modern, efficient, and effective emergency room services needed to care for victims of highway, industrial, agricultural or other accidents and to handle other medical emergencies, and to assist in providing such services in geographical areas which have special need.

In conclusion, this bill has \$5.4 billion in authorizations over the next 5 years, \$2.7 billion in grants, \$2 billion in loan guarantees, and \$750 million in direct loans. In no year are there less than \$1 billion in authorizations.

Mr. President, I introduce the Hospital and Medical Facilities Construction and Modernization Amendments of 1969 for myself and Senators RANDOLPH, WILLIAMS of New Jersey, PELL, KENNEDY, NELSON, MONDALE, EAGLETON, CRANSTON,

and HUGHES, and ask that it be appropriately referred.

I ask unanimous consent that the bill and a short explanation be printed at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and explanation will be printed in the RECORD.

The bill (S. 2182) to amend the Public Health Service Act to revise, extend, and improve the program established by title VI of such act, and for other purposes, introduced by Mr. YARBOROUGH, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 2182

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Hospital and Medical Facilities Construction and Modernization Amendments of 1969".

TITLE I—GRANTS FOR CONSTRUCTION AND MODERNIZATION OF HOSPITALS AND OTHER MEDICAL FACILITIES

PART A—EXTENSION OF GRANT PROGRAM AUTHORIZATION OF APPROPRIATIONS FOR CONSTRUCTION GRANTS

SEC. 101. (a) Section 601 of the Public Health Service Act (42 U.S.C. 291a) is amended—

(1) by striking out "next five" in paragraph (a) and inserting in lieu thereof "next ten";

(2) (A) by striking out "\$70,000,000" in subparagraph (1) of paragraph (a) and inserting in lieu thereof "\$100,000,000";

(B) by striking out "\$20,000,000" in subparagraph (2) of such paragraph and inserting in lieu thereof "\$40,000,000"; and

(C) by striking out "\$10,000,000" in subparagraph (3) of such paragraph and inserting in lieu thereof "\$15,000,000"; and

(3) by striking out in paragraph (b) "and \$195,000,000 for the fiscal year ending June 30, 1970." and inserting in lieu thereof "\$195,000,000 for the fiscal year ending June 30, 1970, \$180,000,000 for the fiscal year ending June 30, 1971, \$170,000,000 for the fiscal year ending June 30, 1972, \$180,000,000 for the fiscal year ending June 30, 1973, \$190,000,000 for the fiscal year ending June 30, 1974, and \$200,000,000 for the fiscal year ending June 30, 1975; and".

(b) The amendments made by subsection (a) shall take effect with respect to appropriations made under such section 601 for fiscal years beginning after June 30, 1970.

AUTHORIZATION OF APPROPRIATIONS FOR MODERNIZATION GRANTS

SEC. 102. (a) Effective with respect to appropriations made under section 601 of the Public Health Service Act for fiscal years beginning after June 30, 1970, such section is further amended—

(1) by striking out in paragraph (b) the following: "and for grants for modernization of such facilities and the facilities referred to in paragraph (a)";

(2) by adding after paragraph (b) the following new paragraph:

"(c) for grants for modernization of the facilities referred to in paragraphs (a) and (b), \$75,000,000 for the fiscal year ending June 30, 1971, \$95,000,000 for the fiscal year ending June 30, 1972, \$105,000,000 for the fiscal year ending June 30, 1973, \$115,000,000 for the fiscal year ending June 30, 1974, and \$125,000,000 for fiscal year ending June 30, 1975;"; and

(3) by inserting "AND MODERNIZATION" after "CONSTRUCTION" in the section heading.

(b) Effective with respect to allotments from appropriations made under such section 601 for fiscal years beginning after June 30, 1970, section 602(a) of such Act (42 U.S.C. 291b) is amended—

(1) by striking out "the new hospital portion of" the first time it appears in paragraph (1);

(2) by striking out the last sentence of paragraph (1), and

(3) by amending paragraph (2) to read as follows:

"(2) For each fiscal year beginning after June 30, 1970, the Secretary shall, in accordance with regulations, make allotments among the States for grants for modernization of the facilities referred to in section 601. Such allotments shall be made from the sums appropriated under paragraph (c) of section 601, and shall be made among the States on the basis of the population, the financial need, and the extent of the need for modernization of such facilities, of the respective States."

(c) Effective with respect to allotments from appropriations made under such section 601 for fiscal years beginning after June 30, 1970, paragraph (2) of section 602(e) of such Act is amended by striking out "except that" and all that follows in such paragraph and inserting in lieu thereof a period.

PART B—OPERATION OF GRANT PROGRAM PRIORITY OF PROJECTS

SEC. 110. Effective with respect to applications approved under title VI of the Public Health Service Act after June 30, 1970, section 603(a) of such Act (42 U.S.C. 291c) is amended—

(1) by striking out "rural communities and areas with relatively small financial resources" in clause (1), and inserting in lieu thereof "areas with relatively small financial resources and, at the option of the State, rural communities";

(2) by striking out "and" at the end of clause (2), and

(3) by adding after clause (3) the following new clauses:

"(4) in the case of projects for construction or modernization of general hospitals, to any general hospital with respect to which there is reasonable assurance that services of a long-term care facility will be available, either through a facility of the applicant for the project or a facility with which the applicant is affiliated (to the extent and in the manner determined in accordance with regulations), to patients of such hospital who no longer need care in such hospital but require the services of a long-term care facility;

"(5) in the case of projects for construction or modernization of outpatient facilities, to any outpatient facility that will be located in, and provide services for residents of, an area determined by the Secretary to be a metropolitan area with low per capita income;

"(6) to projects for facilities which, alone or in conjunction with other facilities, will provide comprehensive health care, including outpatient and preventive care as well as hospitalization, particularly projects for facilities which will serve a defined population; and

"(7) in the case of projects for construction or modernization of facilities, to facilities which provide training in health professions;";

AREAWIDE HEALTH PLANNING AGENCIES

SEC. 111. Effective with respect to applications approved under title VI of the Public Health Service Act after June 30, 1970, clause (4) of the first sentence of section 605(b) of such Act (42 U.S.C. 291e) is amended (1) by inserting after "the application has been approved and recommended by the State agency" the following: "opportunity has been provided, prior to such approval and

recommendation, for consideration of the project by the public or nonprofit private agency or organization (if any) which has developed the comprehensive regional, metropolitan area, or other local area plan or plans referred to in section 314(b) covering the area in which such project is to be located,"; and (2) by inserting "the application is for a project which" immediately before "is entitled".

PORTION OF ALLOTMENT AVAILABLE FOR STATE PLAN ADMINISTRATION

SEC. 112. Effective with respect to expenditures under a State plan approved under title VI of the Public Health Service Act which are made for administration of such plan during any fiscal year beginning after June 30, 1970—

(1) the first sentence of subsection (c) (1) of section 606 of such Act (42 U.S.C. 291f) is amended (A) by striking out "2 per centum" and inserting in lieu thereof "4 per centum" and (B) by striking out "\$50,000" and inserting in lieu thereof "\$100,000"; and

(2) paragraph (2) of subsection (c) of such section 606 is amended by striking out "June 30, 1964" and inserting in lieu thereof "June 30, 1970".

FEDERAL SHARE

SEC. 113. Effective with respect to applications approved under title VI of the Public Health Service Act after June 30, 1969, paragraph (b) of the section of such Act redesignated (by section 201 of this Act) as section 655 is amended by adding at the end thereof the following new sentence: "Notwithstanding the provisions of subparagraphs (1) and (2) of this paragraph, the Federal share shall at the option of the State agency, be equal to the per centum provided under such subparagraphs plus an incentive per centum (which shall not exceed 20 per centum) specified by the State agency in the case of projects that offer potential for reducing health care costs through shared services among health care facilities, interfacility cooperation, or dispersed ambulatory care centers."

DEFINITION OF HOSPITALS

SEC. 114 (a) Effective with respect to applications approved under title VI of the Public Health Service Act after June 30, 1970, paragraph (c) of the section of such Act redesignated (by section 201 of this Act) as section 655 is amended—

(1) by inserting after "nurses' home facilities," the following: "extended care facilities, facilities related to programs for home health services, self-care units,"; and

(2) by inserting a comma immediately before "operated" and inserting immediately before "but does not include" the following: "and also includes education or training facilities for health professions personnel operated as an integral part of a hospital,".

(b) Effective July 1, 1970, section 604(a) (3) of such Act is amended—

(1) by inserting "(A)" after "shall include", and

(2) by inserting after "rehabilitation services, and" the following: "representatives particularly concerned with education or training of health professions personnel, and (B)".

CHANGE IN NAME AND CLARIFICATION OF FUNCTIONS OF DIAGNOSTIC TREATMENT CENTER

SEC. 115. (a) Sections 601(a) (2) and 602 (b) (1) (B) of the Public Health Service Act (42 U.S.C. 291a, 291b) are each amended by striking out "diagnostic or treatment centers" and inserting in lieu thereof "outpatient facilities".

(b) Section 604(a) (4) (C) of such Act (42 U.S.C. 291d) is amended by striking out "diagnostic or treatment centers" and inserting in lieu thereof "outpatient facilities" and by striking out "such centers" and inserting in lieu thereof "such facilities".

(c) Section 604(a) (5) of such Act (42 U.S.C. 291d) is amended by striking out "diagnostic or treatment centers" and inserting in lieu thereof "outpatient facilities".

(d) Section 609(b) of such Act (42 U.S.C. 291i) is amended by striking out "diagnostic or treatment center" and inserting in lieu thereof "outpatient facility".

(e) Section 605(e) of such Act (42 U.S.C. 291e) is amended to read as follows: "In the case of public or other nonprofit outpatient facilities which are not a part of a general hospital, reasonable assurance that the services of a general hospital will be made available."

(f) Paragraph (f) of the section of the Public Health Service Act redesignated (by section 201 of this Act) as section 655 (42 U.S.C. 291o) is amended—

(1) by striking out "diagnostic or treatment center" and inserting in lieu thereof "outpatient facility",

(2) by inserting after "means a facility" the following: "(located in or apart from a hospital)", and

(3) by inserting after "ambulatory patients" the following: "(including ambulatory inpatients)".

(g) The amendment made by paragraphs (2) and (3) of subsection (f) of this section shall apply with respect to applications approved under title VI of such Act after June 30, 1970.

DEFINITION OF FACILITY FOR LONG-TERM CARE

SEC. 116. Effective with respect to applications approved under title VI of the Public Health Service Act after June 30, 1970, paragraph (h) of the section of such Act redesignated (by section 201 of this Act) as section 655 (42 U.S.C. 291o) is amended by inserting after "means a facility" the following: "(including an extended care facility)".

INCLUSION OF COST OF ACQUISITION OF LAND

SEC. 117. Effective with respect to projects approved under title VI of the Public Health Service Act after June 30, 1970, so much of paragraph (1) of the section of such Act redesignated (by section 201 of this Act) as section 655 (42 U.S.C. 291o) as follows the semicolon is amended to read: "including architect's fees and the cost of the acquisition of land, but excluding the cost of off-site improvements."

GRANTS FOR EQUIPMENT

SEC. 118. Effective with respect to projects approved under title VI of the Public Health Service Act after June 30, 1970, paragraph (1) of the section of such Act redesignated (by section 201 of this Act) as section 655 (42 U.S.C. 291o) is further amended by inserting before the semicolon "and, in any case in which it will help to provide a service not previously provided in the community, equipment of any buildings".

TITLE TO SITE

SEC. 119. Effective with respect to projects approved under title VI of the Public Health Service Act after June 30, 1970, paragraph (1) of the section of such Act redesignated (by section 201 of this Act) as section 655 (42 U.S.C. 291o) is further amended by striking out "for a period of not less than fifty years" and inserting in lieu thereof the following: "for not less than the period specified in section 609 (or, in the case of a loan guaranteed under part B or a loan made under part C which is for a longer period, for not less than that longer period)".

INCLUSION OF THE TRUST TERRITORY OF THE PACIFIC ISLANDS

SEC. 120. (a) (1) Subparagraphs (A), (B), and (C) of paragraph (1) of subsection (b) of section 602 of the Public Health Service Act (42 U.S.C. 291b) are each amended by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(2) Paragraph (2) of such subsection is

amended by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(b) Paragraph (1) of subsection (c) of such section is amended by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(c) Paragraphs (1) and (2) of subsection (d) of such section are each amended by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(d) The section of such Act redesignated by section 201 of this Act as section 655 (a) (42 U.S.C. 291o) is amended by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(e) The amendments made by this section shall apply with respect to allotments (and grants therefrom) under part A of title VI of the Public Health Service Act for fiscal years ending after June 30, 1970, and with respect to loan guarantees under part B and loans under part C of such title made after June 30, 1970.

PART C.—RESEARCH AND DEMONSTRATIONS; AND MISCELLANEOUS

RESEARCH AND DEMONSTRATIONS RELATING TO HEALTH FACILITIES AND SERVICE

SEC. 130. Section 304(d) of the Public Health Service Act (42 U.S.C. 242b) is amended by inserting after "June 30, 1970" the following: " , \$80,000,000 for the fiscal year ending June 30, 1971, \$85,000,000 for the fiscal year ending June 30, 1972, \$90,000,000 for the fiscal year ending June 30, 1973, \$95,000,000 for the fiscal year ending June 30, 1974, and \$100,000,000 for the fiscal year ending June 30, 1975."

WAIVING OF RIGHT OF RECOVERY

SEC. 131. Section (3) (b) of the Hospital and Medical Facilities Amendments of 1964 (Public Law 88-443) is amended by striking out the period at the end of paragraph (5) and inserting in lieu thereof a semicolon, and by adding after such paragraph the following new paragraph:

"(6) the provisions of clause (b) of section 609 of the Public Health Service Act, as amended by this Act, shall apply with respect to any project whether it was approved, and whether the event specified in such clause occurred, before, on, or after the date of enactment of this Act, except that it shall not apply in the case of any project with respect to which recovery under title VI of such Act has been made prior to the enactment of this paragraph."

TITLE II—LOAN GUARANTEES FOR CONSTRUCTION AND MODERNIZATION OF HOSPITALS AND OTHER MEDICAL FACILITIES

LOAN GUARANTEES FOR CONSTRUCTION AND MODERNIZATION OF HOSPITALS AND OTHER MEDICAL FACILITIES

SEC. 201. Title VI of the Public Health Service Act is amended by redesignating part B as part E; by redesignating sections 621 through 625 (42 U.S.C. 291k-291o), and all references thereto, as sections 651 through 655, respectively; and by inserting after section 610 (42 U.S.C. 291j) the following new part:

"PART B—LOAN GUARANTEES FOR MODERNIZATION AND CONSTRUCTION OF HOSPITALS AND OTHER MEDICAL FACILITIES

"AUTHORIZATION OF LOAN GUARANTEES

"SEC. 621. (a) In order to assist nonprofit private agencies to carry out needed projects for the modernization or construction of private nonprofit hospitals, facilities for long-term care, outpatient facilities, and rehabilitation facilities, the Secretary, during the period July 1, 1970, through June 30, 1975, may guarantee in accordance with this part to non-Federal lenders making loans to such agencies for such projects, payment when due of the principal of and interest on loans approved under this part.

"(b) No loan guarantee under this part with respect to any modernization or construction project may apply to so much of the principal amount thereof as, when added to the amount of any grant or loan under part A with respect to such project, exceeds 90 per centum of the cost of such project.

"(c) The Secretary, with the consent of the Secretary of Housing and Urban Development, shall obtain from the Department of Housing and Urban Development such assistance with respect to the administration of this part as will promote efficiency and economy thereof.

"LOAN GUARANTEE ALLOTMENTS

"SEC. 622. (a) For each fiscal year, the Secretary shall determine (1) the total amount of principal of loans which may be guaranteed under this part in such fiscal year, and (2) the portion of such total amount which shall be available for allotments with respect to loans for modernization of facilities referred to in section 621 and the portion thereof which shall be available for allotments with respect to loans for construction of such facilities. Each such portion shall then be allotted among the States, in accordance with regulations, on the basis of each State's relative population, financial need, and need for modernization and for construction, respectively, of facilities referred to in section 621.

"(b) Any amount allotted under subsection (a) to a State, other than the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands, for a fiscal year ending before July 1, 1975, and remaining unobligated at the end of such year shall remain available to such State, for the purpose for which made, for the next fiscal year (and for such year only), and any such amount shall be in addition to the amounts allotted to such State for such purpose for such next fiscal year; except that, with the consent of the State, any such amount remaining unobligated at the end of the first six months of such next fiscal year may be reallocated (on such basis as the Secretary deems equitable and consistent with the purposes of this title) to other States which have need therefor. Any amount so reallocated to a State shall be available for the purposes for which made until the close of such next fiscal year and shall be in addition to the amount allotted and available to such State for the same period. Any amount allotted under subsection (a) to the Virgin Islands, American Samoa, Guam, or the Trust Territory of the Pacific Islands for a fiscal year ending before July 1, 1975, and remaining unobligated at the end of such year shall remain available to it, for the purposes for which made, for the next two fiscal years (and for such years only), and any such amount shall be in addition to the amounts allotted to it for such purpose for each of such next two fiscal years; except that, with the consent of the Virgin Islands, American Samoa, Guam, or the Trust Territory of the Pacific Islands, as the case may be, any such amount remaining unobligated at the end of the first of such next two fiscal years may be reallocated (on such basis as the Secretary deems equitable and consistent with the purposes of this title) to any other of such four States which have need therefor. Any amount reallocated to a State under the preceding sentence shall be available for the purposes for which made until the close of the second of such next fiscal years and shall be in addition to the amounts allotted and available to such State for the same period.

"(c) Any amount allotted or reallocated to a State under this section for a fiscal year shall not, until the expiration of the period during which it is available for obligation, be considered as available for allotment for the next fiscal year.

"(d) (1) Transfers between the allotments of a State under this section shall be made

as follows: If any State agency (designated under section 604(a)) applies to the Secretary to have all or part of its construction loan allotment transferred to its modernization loan allotment or to have all or part of its modernization loan allotment transferred to its construction loan allotment, the Secretary shall adjust the allotments of such State in accordance with such application if such application is accompanied by a certification by such State agency that the need (determined in accordance with objective criteria established by regulation of the Secretary) for projects to be assisted by loans guaranteed under the allotment to which a transfer is requested is greater than the need for the projects to be assisted by loans guaranteed under the allotment from which a transfer is requested.

"APPLICATIONS AND CONDITIONS

"SEC. 623. (a) For each project for which a loan guarantee is sought under this part, there shall be submitted to the Secretary, through the State agency designated in accordance with section 604, an application by a nonprofit private agency. If two or more such agencies join in the project, the application may be filed by one or more such agencies. Such application shall (1) set forth all of the descriptions, plans, specifications, assurances, and information which are required by the third sentence of section 605 (a) (other than clause (6) thereof) with respect to applications submitted under that section, (2) contain such other information as the Secretary may require to carry out the purposes of this part, and (3) include a certification by the State agency of the total cost of the project and the amount of the loan for which a guarantee is sought under this part.

"(b) The Secretary may approve such application only if—

"(1) there remains sufficient balance in the allotment determined for such State pursuant to section 622 to cover the amount of the loan for which a guarantee is sought in such application,

"(2) he makes each of the findings which are required by clauses (1) through (4) of section 605(b) for the approval of applications for projects thereunder (except that, in the case of the finding required under such clause (4) of entitlement of a project to a priority established under section 603 (a), such finding shall be made without regard to the provisions of clauses (1) and (3) of such section),

"(3) he finds that there is compliance with section 605(e),

"(4) he obtains assurances that the applicant will keep such records, and afford such access thereto, and make such reports, in such form and containing such information, as the Secretary may reasonably require, and

"(5) he also determines that the terms, conditions, maturity, security (if any), and schedule and amounts of repayments with respect to the loan are sufficient to protect the financial interest of the United States and are otherwise reasonable and in accord with regulations, including a determination that the rate of interest does not exceed such per centum per annum on the principal obligation outstanding as the Secretary determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the United States.

"(c) No application under this section shall be disapproved until the Secretary has afforded the State agency an opportunity for a hearing.

"(d) Amendment of an approved application shall be subject to approval in the same manner as an original application.

"(e) (1) The United States shall be entitled to recover from the applicant the amount of any payments made pursuant to any guarantee under this part, unless the Secretary for a good cause waives its right of

recovery, and, upon making any such payment, the United States shall be subrogated to all of the rights of the recipient of the payments with respect to which the guarantee was made.

"(2) Guarantees under this part shall be subject to such further terms and conditions as the Secretary determines to be necessary to assure that the purposes of this part will be achieved, and, to the extent permitted by subsection (f), any of such terms and conditions may be modified by the Secretary to the extent he determines it to be consistent with the financial interest of the United States.

"(f) Any guarantee made by the Secretary pursuant to this part shall be incontestable in the hands of an applicant on whose behalf such guarantee is made, and as to any person who makes or contracts to make a loan to such applicant in reliance thereon, except for fraud or misrepresentation on the part of such applicant or such other persons.

"PAYMENT OF INTEREST ON GUARANTEED LOANS

"SEC. 624. The Secretary shall pay to each holder of a loan guaranteed under this part, for and on behalf of the hospital or other medical facility for which such loan was made, an amount equal to one-half of so much of the interest on the portion of the loan so guaranteed as does not exceed the amount of the interest payable on such portion at a rate of 6 per centum per annum, plus one-third of the remainder (if any) of interest payable on such portion.

"LIMITATION ON AMOUNT OF LOANS GUARANTEED

"SEC. 625. The cumulative total of the principal of the loans outstanding at any time with respect to which guarantees have been issued under this part may not exceed the lesser of—

"(1) such limitations as may be specified in appropriations Acts, or

"(2) in the case of loans covered by allotments for the fiscal year ending June 30, 1971, \$400,000,000; for the fiscal year ending June 30, 1972, \$800,000,000; for the fiscal year ending June 30, 1973, \$1,200,000,000; \$1,600,000,000 for the fiscal year ending June 30, 1974; and \$2,000,000,000 for the fiscal year ending June 30, 1975.

"LOAN GUARANTEE FUND

"SEC. 626. There is hereby established in the Treasury a loan guarantee fund (hereinafter in this section referred to as the 'fund') which shall be available to the Secretary without fiscal year limitation to enable him to discharge his responsibilities under any guarantee issued by him under this part and for payment of interest on the loans so guaranteed. There are authorized to be appropriated to the fund from time to time such amounts as may be necessary to provide capital for the fund."

TITLE III—LOANS FOR CONSTRUCTION AND MODERNIZATION OF PUBLIC HOSPITALS AND OTHER PUBLIC MEDICAL FACILITIES

LOANS FOR CONSTRUCTION AND MODERNIZATION OF PUBLIC HOSPITALS AND OTHER PUBLIC MEDICAL FACILITIES

SEC. 301. Title VI of the Public Health Service Act is further amended by adding after part B (added by section 201 of this Act) the following new part:

"PART C—LOANS FOR CONSTRUCTION AND MODERNIZATION OF PUBLIC HOSPITALS AND OTHER PUBLIC MEDICAL FACILITIES

"AUTHORIZATION OF LOANS

"SEC. 631. (a) In order to assist public agencies to carry out needed projects for the construction or modernization of facilities referred to in paragraphs (a) and (b) of section 601, the Secretary is authorized to loan funds, in accordance with this part, to such agencies for the purpose of carrying out such projects.

"(b) No loan under this part to carry out any project may, when added to the amount

of any grant or loan under part A with respect to such project, exceed 90 per centum of the cost of such project.

"ALLOCATION AMONG THE STATES

"Sec. 632. (a) The Secretary shall allot among the States the amounts available for each fiscal year for the making of loans under this part. The allotments under this part shall be made among the States on the basis of the population, the financial need, and the extent of the need for construction and modernization of the facilities referred to in paragraphs (a) and (b) of section 601, of the respective States.

"(b) Any sum allotted to a State for a fiscal year and remaining unobligated at the end of such year shall remain available to such State, for the purpose for which made, for the next fiscal year (and for such year only), and any such sum shall be in addition to the sums allotted to such State for such purpose for such next fiscal year. Any sum so allotted to a State for a fiscal year shall not (even though remaining unobligated at the close thereof) be considered as available for allotment among the States for the next fiscal year.

"APPLICATIONS

"Sec. 633. (a) For each project for which a loan is sought under this part, there shall be submitted to the Secretary, through the State agency designated in accordance with section 604, an application by the State or a political subdivision thereof or by any other public agency. If two or more such agencies join in the project, the application may be filed by one or more such agencies. Such application shall (1) set forth all of the descriptions, plans, specifications, assurances, and information which are required by clauses (1) through (5) of section 605(a) with respect to applications submitted under that section, (2) contain such other information as the Secretary may require to carry out the purposes of this part, and (3) include a certification by the State agency of the total cost of the project and the amount of the loan sought under this part.

"(b) The Secretary may approve such application only if—

"(1) there remains sufficient balance in the allotment determined for such State pursuant to section 632 to make the loan applied for,

"(2) he makes each of the findings which are required by clauses (1) through (4) of section 605(b) for the approval of applications for projects thereunder (except that, in the case of the finding required under such clause (4) of entitlement of a project to a priority established under section 603(a), such findings shall be made without regard to clauses (1) and (3) of such section),

"(3) he obtains assurances that the applicant will keep such records, and afford such access thereto, and make such reports, in such form and containing such information, as the Secretary may reasonably require, and

"(4) he also determines that the terms, conditions, maturity, security (if any), and schedule and amounts of repayments are reasonable and in accord with regulations.

"(c) No application shall be disapproved until the Secretary has afforded the State agency an opportunity for a hearing.

"(d) Amendment of an approved application shall be subject to approval in the same manner as an original application.

"RECOVERY

"Sec. 634. If any of the events specified in clause (a) or clause (b) of section 609 occurs with respect to any facility for which a loan has been made under this part, before the termination of the period during which a loan made by the Secretary under this part is outstanding, the balance of any loan made by the Secretary under this part shall become immediately due and payable, unless the Secretary for good cause determines to waive the provisions of this section.

"GENERAL PROVISIONS FOR LOAN PROGRAM

"Sec. 635. Loans made under this part shall—

"(1) be repayable in equal periodic installments over a period of not to exceed twenty-five years,

"(2) bear interest at the rate of 3 per centum per annum, and

"(3) be secured by such evidence of financial obligation as the Secretary shall determine to be necessary or desirable to protect the interests of the United States against failure on the part of the borrower to repay the principal and interest on such loan in accordance with the terms thereof.

"REVOLVING LOAN FUND

"Sec. 636. (a) There is hereby created within the Treasury a separate fund (hereafter in this section referred to as the 'fund') for loans for the construction and modernization of the facilities referred to in paragraphs (a) and (b) of section 601. The fund shall be available to the Secretary without fiscal year limitation as a revolving fund for the purposes of this part. The total of any loans made from the fund in any fiscal year shall not exceed such limitations as may be specified in appropriation Acts. A business-type budget for the fund shall be prepared, transmitted to the Congress, considered, and enacted in the manner prescribed by sections 102, 103, and 104 of the Government Corporation Control Act (31 U.S.C. 847-849) for wholly owned Government corporations.

"(b) (1) The Secretary, when authorized by an appropriation Act, may transfer to the fund available appropriations provided under section 637 to provide capital for the fund. Amounts received by the Secretary as interest payments or repayments of principal on loans, and any other moneys, property, or assets derived by him from his operations in connection with this part, including any moneys derived directly or indirectly from the sale of assets, or beneficial interests or participations in assets, of the fund, shall be deposited in the fund, in such amounts as may be authorized from time to time in appropriation Acts.

"(2) All loans, expenses, and payments pursuant to operations of the Secretary under this part shall be paid from the fund, including (but not limited to) expenses and payments of the Secretary in connection with sale, under section 302(c) of the Federal National Mortgage Association Charter Act, of participations in obligations acquired under this part. From time to time, and at least at the close of each fiscal year, the Secretary shall pay from the fund into the Treasury as miscellaneous receipts interest on the cumulative amount of appropriations paid out for loans under this part or available as capital to the fund, less the average undisbursed cash balance in the fund during the year. The rate of such interest shall be determined by the Secretary of the Treasury, taking into consideration the average market yield during the month preceding each fiscal year on outstanding Treasury obligations of maturity comparable to the average maturity of loans made from the fund. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest. If at any time the Secretary determines that moneys in the fund exceed the present and any reasonably prospective future requirements of the fund, such excess may be transferred to the general fund of the Treasury.

"APPROPRIATION AUTHORIZATION

"Sec. 637. There are authorized to be appropriated to the Secretary over a period of five fiscal years, beginning with the fiscal year ending June 30, 1971, such sums as may be necessary for transfers to the revolving fund established under section 636, but not to exceed in the aggregate \$750,000,000. Of the sums authorized to be appropriated un-

der this section not more than \$150,000,000 is authorized to be appropriated for the fiscal year ending June 30, 1971.

"DURATION OF LOAN PROGRAM

"Sec. 638. No loans shall be made under this part after June 30, 1975."

AMENDMENT TO FEDERAL NATIONAL MORTGAGE ASSOCIATION CHARTER ACT

Sec. 302. Section 302(c) (2) (B) of the Federal National Mortgage Association Charter Act is amended to read as follows:

"(B) The Department of Health, Education, and Welfare, but only with respect to loans (i) made by the Commissioner of Education for construction of academic facilities, and loans to help finance student loan programs, and (ii) made under part B of title VI of the Public Health Service Act for the modernization of hospitals and other health facilities."

TITLE IV—GRANTS FOR MODERNIZATION OF EMERGENCY ROOMS OF GENERAL HOSPITALS

Sec. 401. Title VI of the Public Health Service Act is further amended by adding after part C (added by section 301 of this Act) the following new part:

"PART D—MODERNIZATION OF EMERGENCY ROOMS

"AUTHORIZATION

"Sec. 641. In order to assist in the provision of adequate emergency room service in various communities of the Nation for treatment of accident victims and handling of other medical emergencies through special project grants for the modernization of emergency rooms of general hospitals, there are authorized to be appropriated \$10,000,000 each for the fiscal year ending June 30, 1971, and the next four fiscal years.

"ELIGIBILITY FOR GRANTS

"Sec. 642. Funds appropriated pursuant to section 641 shall be available for grants by the Secretary for not to exceed 50 per centum of the cost of modernization of emergency rooms of public or other nonprofit general hospitals. Such grants shall be made by the Secretary only after consultation with the State agency designated in accordance with section 604(a) (1) of the Public Health Service Act. In order to be eligible for a grant under this part, the project, and the applicant therefor, must meet such criteria as may be prescribed by regulations. Such regulations shall be so designed as to provide aid only with respect to projects for which adequate assistance is not readily available from other Federal, State, local, or other sources, and to assist in providing modern, efficient, and effective emergency room service needed to care for victims of highway, industrial, agricultural, or other accidents and to handle other medical emergencies, and to assist in providing such service in geographical areas which have special need therefor.

"PAYMENTS

"Sec. 643. Grants under this part shall be paid in advance or by way of reimbursement, in such installments and on such conditions, as in the judgment of the Secretary will best carry out the purposes of this part."

The material presented by Mr. YARBOROUGH follows:

SUMMARY: HOSPITAL AND MEDICAL FACILITIES CONSTRUCTION AND MODERNIZATION AMENDMENTS OF 1969

GRANT PROGRAMS

The existing categorical grant program, with affirmative changes, would be extended and expanded by Title I for a five year period, commencing in Fiscal Year 1971. Grants for the construction and modernization of hospitals and other medical facilities would have a total five-year authorization of \$2,190

million. Of this amount \$515 million would be available for the modernization of health facilities.

LOAN GUARANTEES WITH INTEREST SUBSIDIES

Title II would provide for, commencing in Fiscal Year 1971, a new five-year program of loan guarantees to aid in the construction and modernization of health facilities. The total authorization would permit \$400 million annually or a total of \$2 billion in guarantees. The amounts to be guaranteed would be allotted to the States on the basis of the relative financial need, relative population, and relative need for additional health facilities and the relative need for the modernization of existing health facilities. As in the grant program, the amount allotted to the given State would be available to be used as guarantees for a two fiscal year period.

In addition, the loan guarantee program provides for interest subsidies to be paid by the Federal government at a rate of $\frac{1}{2}$ of the interest up to 6% and $\frac{1}{4}$ of the interest thereafter. The loan guarantee program would be available to sponsors representing privately owned nonprofit health facilities.

FEDERAL LOANS

Title III of the bill would provide a five year authority, commencing in Fiscal Year 1971, to administer a new program of direct Federal loans for the construction and modernization of publicly owned health facilities. This loan program, which would be administered through the designated State agency as in the grant and loan guarantee programs, provides for a maximum five year authorization of \$750 million, not to exceed \$150 million in Fiscal Year 1971. The loans would bear an interest rate of 3% annually and would be available for a term not to exceed 25 years. The maximum Federal loan or combination of loan and grant could not exceed 90% of the cost of the project.

ADDITIONAL PROVISIONS

Title IV would provide a new five-year program of Federal project grants to assist in the modernization of needed emergency rooms of general hospitals. \$10 million annually would be authorized for the five-year period.

The existing grant category of assistance entitled diagnostic treatment centers would be retitled out-patient facilities and at the same time redefined to permit privately owned nonprofit facilities other than general hospitals to receive this assistance. The existing law limits grant assistance under the diagnostic treatment center category to public agencies and to sponsors representing privately owned nonprofit general hospitals.

The bill would also permit, at the option of the State agency, an increase in the Federal share by 20% in the case of any project which would assist in reducing the costs of delivering care or otherwise improve the capabilities to deliver health care. This incentive provision would be applicable to such circumstances as a hospital providing services on a shared basis with another hospital, special inter-facility agreements, etc.

The priority for considering projects to be approved under the program would be revised to make the rural area priority permissive, i.e., at the option of the State, as well as providing special priority consideration to hospitals making adequate provision for long-term care services. Special priority consideration would also be given to out-patient facilities which would provide services for residents of metropolitan low-income areas, as well as special priority consideration for projects which will provide comprehensive health services to a defined population group. Special priority consideration would also be given to facilities which provide training in the health professions.

Federal assistance would be available under the bill to assist in the purchase of a site upon which a health facility will be lo-

cated as well as assisting in the purchase of equipment for health facilities without necessitating construction or modernization within the same project.

The bill would also extend for a five-year period, commencing in Fiscal Year 1971, Section 304(d) of the Public Health Service Act by providing a total five-year authorization of \$450 million to assist in projects relating to research and demonstration to improve health facilities and services.

S. 2184—INTRODUCTION OF A BILL TO INCLUDE PRESCRIBED DRUGS AMONG THE ITEMS AND SERVICES COVERED UNDER THE SUPPLEMENTARY MEDICAL INSURANCE PROGRAM FOR THE AGED

Mr. PROUTY. Mr. President, in 1965 when medicare was enacted, 20 million older Americans felt that economic drain on their already minuscule pocketbooks would be curtailed. For a number of reasons, including unchecked inflation, this has not been the case. I am therefore convinced we must take a second look at the policies we in this country have followed and in particular the effect of those policies on our older citizens.

In this respect the first priority must be the effective curtailment of inflation because inflation continues to be the primary deterrent to economic security for older Americans on fixed incomes. For example, social security benefit increases which were enacted a little over a year ago have almost completely been eroded by inflation. In December 1967, Congress enacted a 13-percent increase in social security benefits. However, the consumer price index has increased from 118.2 at that time to 125.6 in March 1969 indicating that over 69 percent of the beneficial effect of the increase had already been eliminated.

Since January 20 I have seen hopeful signs that we are beginning to get control over inflation. President Nixon's budget cuts have been the most visible signs that our national leadership is now determined to fight against inflation. In addition, there are a number of less visible signs that the administration is determined to win its battle to gain control over inflation. Presently numerous studies which are designed to take an objective look at Federal program effectiveness on a program-by-program basis. I am convinced that through this comprehensive combination approach of responsible fiscal and monetary policies coupled with objective program evaluation to insure maximum benefits for taxpayer's dollars spent we will be able to end the adverse effects of overall inflation.

However, Mr. President, we must recognize that curing inflation will not be enough to sufficiently ease the economic hardships facing older Americans. If we ended inflation tomorrow, we would still need a substantial social security benefit increase in order to make up for the economic harm created by past inflation to citizens on fixed incomes. In addition, we must look to the structural deficiencies of our income distribution system so as to provide equity for retired Americans who, during their years of employment have provided the basis for our great affluence in this country.

In 1965, Mr. President, we recognized that Americans age 65 and over were more likely to have need for hospitalization and medical care than their fellow citizens.

We recognized, Mr. President, that this fact created an unconscionable burden on all older Americans and their families through no fault of their own.

However, Mr. President, we all recognize that medicare was not comprehensive enough to accomplish its avowed purpose—namely to assure medical attention for all older Americans irrespective of their ability to pay. Perhaps the greatest weakness of the medicare law is that there is no reimbursement for drugs which, by the way, have been credited by many as the greatest single contributor to the advances we have made in being able to preserve and protect man's good health. In many cases older Americans spend several hundred dollars a year on drugs which are essential to their continued life and well being.

As a matter of fact, Mr. President, unreimbursed drug expenses facing older Americans were one of the prime reasons former Senator George Smathers and I introduced an amendment to the Social Security Amendments of 1967 for the purpose of restoring the special medical expense tax deduction afforded taxpayers age 65 or over prior to the Medicare Act of 1965. The fact that our amendment easily passed the Senate indicates to me that most Senators share my concern that additional economic relief must be given to older Americans if they are to be able to get necessary medical attention without facing unconscionable economic hardship. Our amendment restoring the special tax deduction for those age 65 or over would have helped to ease the economic barriers now standing in the way of necessary medical care for older Americans. Unfortunately it was deleted from the social security amendments of 1967 during the conference with the House.

Today, Mr. President, I am introducing a bill with Senator SCOTT and Senator CORTON, a bill which squarely faces up to the basic deficiency of medicare by extending part B, title XVIII of the Social Security Act to cover prescription drugs.

I ask unanimous consent, Mr. President, that the text of our bill be printed in the RECORD immediately following my remarks.

Mr. President, I was disappointed when the House refused to accept our amendment to the social security bill of 1967 which would have restored the special medical expenses tax deduction for taxpayers age 65 or over. That bill would have afforded some relief to older Americans who continued to be faced with heavy out-of-the-pocket medical expenses. I must admit, however, that the special medical expense tax deduction did not go far enough toward solving the deficiencies in medicare coverage because not all citizens age 65 or over are currently taxpayers. This bill, on the other hand, would apply to each and every American enrolled in part B of medicare.

As you know, part B provides the plan by which our citizens over 65 years of

age may voluntarily contribute monthly payments matched by similar payments from the Government to cover the cost of specified medical services. This bill would simply include prescription drugs as a covered service under the same conditions as now applied to other covered professional services.

In addition, this bill would raise the present deduction of \$50 to \$75, but the covered patient would be allowed to commingle the charges for professional services and for prescription drugs in order to meet the minimum deduction. As with the present plan, covering professional services, 80 percent of the expenditure over the minimum would be reimbursed to the physician, the pharmacist, or the patient.

Those experienced in the administration of insured plans often refer to the fact that coverage of small claims adds materially to the costs of administering the plans. By raising the deductible to \$75, we are eliminating many of the small claims that would be made against the program at such a high administrative cost. By having the patient pay 20 percent of the costs over the minimum, we have a built-in incentive for the patient and the physician not to abuse the plan by overusage or by the purchase of high-priced drugs when one of lesser cost is suitable.

However, Mr. President, under our proposal, there is no restriction on the physician in prescribing for elderly patients. Our aged citizens will not be relegated to second-class health citizens where the attending physician is restricted to prescribing a drug which is not his first choice. The bill has incentive through its coinsurance feature for physician and patient to obtain the lowest cost drug available, consistent with the best health of the patient, but there is no mandate to prescribe a product which the physician may think is less suitable.

Moreover, this bill has the added advantage of not requiring a new system for receiving claims or for reimbursement of claims made. It is proposed that expenditures for drugs will be forwarded to the disbursement agent through the same channels that are now used for the forwarding of bills for professional services. Since claims for professional services and for prescription drugs can be commingled to meet the minimum deduction, there will be little necessity for separate handling. As a matter of fact, this commingling of claims should expedite and simplify the payment of claims by the agency since the minimum requirements will be satisfied at a faster pace.

Mr. President, we have for too long discussed the increasing needs of our aged population for relief from the burdens of health services. By bringing those prescription drugs which the attending physician feels are needed for the best health care of his patients, under part B of title XVIII, we are taking a tremendous step forward in meeting the needs of our senior citizens. Few pieces of legislation will be up for our consideration which should have higher priority. I hope that the appropriate committee will immediately hold hearings on this bill so that we may extend this benefit to our

senior citizens in this session of the Congress.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2184) to amend part B of title XVIII of the Social Security Act to include prescribed drugs among the items and services covered under the supplementary medical insurance program for the aged, introduced by Mr. PROUTY (for himself, Mr. COTTON, and Mr. SCOTT), was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

S. 2184

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1832(a) (1) of the Social Security Act is amended to read as follows:

"(1) entitlement to have payment made to him or on his behalf (subject to the provisions of this part) for—

"(A) medical and other health services; and

"(B) prescribed drugs, except those described in paragraph (2) (B); and"

(b) Section 1832(a) (2) (B) of such Act is amended by inserting immediately before "furnished by a provider" the following: ", and prescribed drugs,".

(c) Section 1832(a) of such Act is further amended by adding at the end thereof (after and below paragraph (2) (B)) the following new sentence: "As used in this part (and in part C to the extent that it relates to this part), the term 'services', unless the context otherwise indicates, includes prescribed drugs."

SEC. 2. Section 1833(b) of the Social Security Act is amended by striking out "\$50" and inserting in lieu thereof "\$75".

SEC. 3. (a) Section 1835(a) (2) (B) of the Social Security Act is amended by striking out ", such services" and inserting in lieu thereof "or prescribed drugs, the services".

(b) Section 1835(a) of such Act is further amended by adding at the end thereof the following new sentence: "In the case of prescribed drugs, the certification requirement of paragraph (2) (B) shall be satisfied by the physician's prescription."

SEC. 4. Section 1861(m) (5) of the Social Security Act is amended by striking out "(other than drugs and biologicals)" and inserting in lieu thereof "(including prescribed drugs, but not including any other drugs and biologicals)".

SEC. 5. Section 1861(s) (2) of the Social Security Act is amended by striking out "(including drugs and biologicals which cannot, as determined in accordance with regulations, be self-administered)" each place it appears and inserting in lieu thereof "(including drugs and biologicals)".

SEC. 6. (a) Section 1861(t) of the Social Security Act is amended by adding at the end thereof the following new sentence: "The term 'prescribed drugs' means drugs and biologicals which require a prescription of a physician for the use of an individual."

(b) The heading of such section 1861(t) is amended to read as follows: "DRUGS AND BIOLOGICALS; PRESCRIBED DRUGS".

S. 2185—INTRODUCTION OF A BILL TO PROVIDE FUNDS FOR CONSTRUCTION OF A RAPID RAIL TRANSIT SYSTEM FOR THE DISTRICT OF COLUMBIA AND THE WASHINGTON METROPOLITAN AREA

Mr. TYDINGS. Mr. President, I am introducing legislation today to provide

funds for construction of a rapid rail transit system for the District of Columbia and the Washington metropolitan area. I am joined in the introduction of this bill by the entire Senate Committee on the District of Columbia; the distinguished Senators from Nevada (Mr. BIBLE); Virginia (Mr. SPONG); Missouri (Mr. EAGLETON); Vermont (Mr. PROUTY); New York (Mr. GOODELL); and Maryland (Mr. MATHIAS).

This legislation has been submitted by the administration and carries the explicit endorsement of the President. In his message of April 28 on the District of Columbia the President said:

BALANCED TRANSPORTATION SYSTEM

The National Capital needs and deserves a mass transit system that is truly metropolitan, unifying the central city with the surrounding suburbs. As a part of its responsibility for the National Capital Region, the Federal Government should support deliberate action, based upon effective planning, to meet the future transportation needs of the Region. The surrounding areas in Maryland and Virginia, as Congress rightly recognized, include the most rapidly growing areas of population and job opportunities, potentially of rich benefits to the inner city.

The proposed legislation fulfills the Congressional mandate in a 1966 Act, which directed the Washington Metropolitan Area Transportation Authority to plan, develop, finance and provide for the operation of a full regional rapid rail system for the National Capital area.

The 97-mile system would relieve downtown congestion; increase employment; make educational, cultural and recreational facilities more accessible; reduce air pollution; stimulate business, industry, and tourism; broaden tax bases; and promote orderly urban development of the Nation's Capital.

I urge that Congress promptly appropriate the necessary authorizing legislation for the 97-mile system.

Enactment of the legislation I introduce today will fulfill the commitment Congress made in 1966 to help finance a modern and urgently needed new addition to the transportation system in Washington.

The need to start this rapid transit system now is desperate. Inflation increases the eventual cost of the system by the incredible sum of a quarter of a million dollars a day. Every year's delay adds \$90 million to the cost of the system. Meanwhile, the cost of alternative modes of transit also continues to skyrocket. Urban highways in Washington cost upward of \$18 million a mile just to construct, not taking into account upkeep and the damage these new roads do to neighborhoods, the city landscape, and the tax base.

Even at today's prices, this rapid transit system is the best possible transportation bargain our country could provide for its National Capital.

The legislation I am introducing today will fulfill Congress' decade-old commitment to create this rapid mass transit system. That commitment dates from 1960 with congressional creation of the National Capital Transportation Agency whose mission it was to plan this transit system. Then, in 1966, after the NCTA had completed its work, Congress authorized the Washington Metropolitan Area Transit Authority to plan and construct the 97-mile transit system, whose construction now can begin within weeks of

a congressional green light. The local money has been assured, the plans are drawn, the routes selected, and the necessary approvals have been obtained. Now Congress must grant the Federal share of the money.

The President's proposal I am introducing today provides for three-way financing of the Washington rapid transit system. Less than half of the cost of the system will be borne directly by the Federal Government. The transit funding has three parts:

First, the jurisdictions of the Washington metropolitan area, the District of Columbia and the Maryland and Virginia suburbs, will provide \$573,522,000 for construction. The citizens of these suburbs have overwhelmingly voted to authorize their governments to issue bonds for financing this local share of the subway and rapid transit system costs. This money is available as soon as Congress gives the final go-ahead.

The second source of funds will be the farebox. These transit revenues will be of sufficient magnitude to enable the authority to raise \$835 million through bonds.

Third, the remaining 46 percent of construction cost, amounting to \$1,147,044,000, will be provided by Federal grants. This includes the Federal grant of \$100 million authorized by the Congress in 1965 and the \$1,047,044,000 authorized by the bill I am introducing today.

Providing the Federal share through capital grants is the most economical method of funding the Federal share of the project cost. This method of funding is estimated to produce a saving of at least \$250 million in interest charges compared to the debt service grant approach recommended by the previous Administration.

Despite the setbacks and delays of the past, I am optimistic that now with the support of President Nixon we can at last get started with this long overdue and desperately needed element in the Washington transportation system.

It has taken nearly 17 years for the Congress to move within sight of the construction of the National Capital's rapid transit system. And now, as the construction crews and engineers stand ready to begin, the intricate system of regional compacts, public funding, community approval, route alignment and planning is threatened with collapse through the evasion of inflation.

The enormous efforts so far cannot be allowed to have been in vain. We can never recapture the time delayed, but we can and must prevent further delay. The transit system must begin this year.

I ask that the bill I have introduced plus the letter in its support submitted by the Administration to the President of the Senate be reprinted at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and letter will be printed in the RECORD.

The bill (S. 2185) to authorize a Federal contribution for the effectuation of a transit development program for the National Capital region, and to further

the objectives of the National Capital Transportation Act of 1965 (79 Stat. 663) and Public Law 89-774 (80 Stat. 1324) introduced by Mr. TYDINGS (for himself and other Senators), was received, read twice by its title, referred to the Committee on the District of Columbia, and ordered to be printed in the RECORD, as follows:

S. 2185

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. That this Act may be cited as the "National Capital Transportation Act of 1969".

DEFINITIONS

SEC. 2. For the purposes of this Act—

(a) "Transit Authority" means the Washington Metropolitan Area Transit Authority established by title III of the Washington Metropolitan Area Transit Regulation Compact (80 Stat. 1324).

(b) "Adopted Regional System" means that system described in the Transit Authority's report entitled "Adopted Regional Rapid Rail Transit Plan and Program, March 1, 1968 (revised February 7, 1969)", as the same may hereafter be altered, revised, or amended in accordance with Public Law 89-774 (80 Stat. 1324).

AUTHORIZATION FOR FEDERAL CONTRIBUTIONS

SEC. 3. (a) In order to provide for the Federal share of the cost of the Adopted Regional System, which System supersedes that heretofore authorized by the Congress in the National Capital Transportation Act of 1965, as amended, the Secretary of the Department of Transportation is authorized to make annual contributions to the Transit Authority under this Section in amounts sufficient to finance in part the construction of the Adopted Regional System by the Transit Authority; Provided, that the aggregate amount of such Federal contributions shall not exceed the lower amount of \$1,047,044,000 or two-thirds of the net project cost of the Adopted Regional System less the \$100,000,000 authorized to be appropriated in Section 5(a) (1) of the Act of September 8, 1965 (Public Law 89-173; 79 Stat. 663).

(b) Such Federal contributions shall be subject to the following limitations and conditions:

(1) The work for which appropriations are authorized herein shall be subject to the provisions of Public Law 89-774 and shall be carried out substantially in accordance with the plans and schedules for the Adopted Regional System.

(2) The aggregate amount of such Federal contributions on or prior to the last day of any given fiscal year shall be matched by the local participating governments by payment of the local share of capital contributions required for the period ending with the last day of such year in a total amount not less than 50 per centum of the amount of such Federal contributions.

SEC. 4. There is hereby authorized to be appropriated to the Department of Transportation, without fiscal year limitation, not to exceed \$1,047,044,000 to carry out the purposes of this Act; Provided, That the appropriations authorized herein shall be in addition to the appropriations authorized in section 5(a)(1) of the National Capital Transportation Act of 1965 (79 Stat. 665).

CONSTRUCTION APPROVALS

SEC. 5. (a) No portion of any rail rapid transit line or related facility authorized hereunder shall be constructed within the United States Capitol Grounds except upon approval of the Commission for Extension of the United States Capitol.

(b) All construction pursuant to this Act in, on, under or over public space in the District of Columbia under the jurisdiction of the Commissioner of the District of Columbia shall, in the interest of public convenience and safety, be performed in accordance with schedules agreed upon between the Transit Authority and the Commissioner of the District of Columbia, to the end that such construction work will be coordinated with other construction work in such public space, and the Commissioner shall so exercise his jurisdiction and control over such public space as to facilitate the Transit Authority's use and occupation thereof for the purposes of this Act.

REPAYMENT FROM EXCESS REVENUES

SEC. 6. To the extent that revenues or other receipts derived from or in connection with the ownership or operation of the Adopted Regional System other than Service Payments under Transit Service Agreements executed between the Transit Authority and local political subdivisions, the proceeds of bonds or other evidences of indebtedness; and capital contributions received by the Transit Authority), are excess to the amounts necessary to make all payments and deposits, including debt service, operating and maintenance expenses and deposits in reserves, required or permitted by the terms of any contract of the Transit Authority with or for the benefit of holders of its bonds, notes or other evidences of indebtedness issued for any purpose relating to the transit system, other than extensions thereof, two-thirds of such excess revenues shall, at the end of each fiscal year, beginning with the fiscal year in which the Adopted Regional System (exclusive of extensions) is first put into substantially full revenue service, be paid into the Treasury of the United States as miscellaneous receipts.

DISTRICT OF COLUMBIA AUTHORIZATIONS

SEC. 7. (a) To finance the District of Columbia share of the cost of the Adopted Regional System, the Commissioner of the District of Columbia is authorized to contract with the Transit Authority to make annual capital contributions under this Section aggregating not to exceed \$216,500,000, and there is hereby authorized to be appropriated out of the general fund of the District of Columbia such amounts necessary to carry out the purposes of this Section, and to remain available until expended.

(b) Section 9-220(b) (3) of the District of Columbia Code is amended by striking the first clause of the last sentence and inserting in lieu thereof the following: "\$216,500,000 of the principal amount of the loans authorized to be made to the Commissioner under this subsection shall be utilized to carry out the purposes of the National Capital Transportation Act of 1969; Provided, That the District of Columbia may exceed by an amount not more than \$166,500,000, the limitation on the aggregate indebtedness established pursuant to this Act;"

(c) The appropriations authorized in subsection (a) of this Section shall be in addition to the appropriations authorized on behalf of the District of Columbia in Section 5(a)(2) of the National Capital Transportation Act of 1965.

(d) The Commissioner of the District of Columbia is further authorized to contract with the Transit Authority for the service to be provided by the Adopted Regional System and to pay in accordance with the terms thereof the District of Columbia's share of any operating deficiency of the Adopted Regional System.

REPEAL AND AMENDMENT OF EXISTING LAWS

SEC. 8. (a) The following laws are repealed: (1) The Act of December 20, 1967 (Public Law 90-220; 81 Stat. 670).

(2) Sections 3, 4 and 5(b) of the Act of September 8, 1965 (Public Law 89-173; 79 Stat. 664-6-1).

(3) The Act of July 14, 1960 (Public Law 86-669, 74 Stat. 537).

(b) Section 5(a) of the Act of September 8, 1965 (Public Law 89-173; 79 Stat. 665) is amended by striking the phrase "authorized in Section 3 hereof" and inserting in lieu thereof the following: "of the Adopted Regional System".

The material presented by Mr. TYDINGS follows:

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., May 8, 1969.

HON. SPIRO T. AGNEW,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: On January 16, 1969, the District of Columbia Government and the Washington Metropolitan Area Transit Authority jointly transmitted to the President of the Senate for the consideration of the 91st Congress, a draft bill "To authorize a Federal Contribution for the effectuation of a transit development program for the National Capital region, and to further the objectives of the National Capital Transportation Act of 1965 (79 Stat. 663) and Public Law 89-774 (80 Stat. 1324)." This proposed legislation was thereafter referred to the Committee on the District of Columbia.

Subsequently, this legislation has been reviewed in terms of the objectives of the new Administration and in the light of the Authority's most recent engineering and financial studies. Accordingly, a revised draft is submitted for the consideration of the Congress. While the objectives of the revised draft remain the same, its primary difference is that the Federal share would be provided through Federal capital grants rather than through federally supported bonds as previously proposed. Authorization of regular capital grants, rather than debt service grants, is considered the most economical method of funding the two-thirds Federal share of the net project cost. Other changes reflect a decrease in the additional Federal share requirement from \$1,051,000,000 to \$1,047,044,000 and an increase in the District of Columbia share from \$208,700,000 to \$216,500,000. These latter changes represent the refinement of cost allocations resulting from more recent financial studies. The funds would be appropriated to the Department of Transportation which would disburse the Federal share to the Transit Authority.

This proposed legislation would support a 97 mile system which, as stated by the President, would "relieve downtown congestion; make educational, cultural and recreational facilities more accessible; reduce air pollution; stimulate business, industry, and tourism; broaden tax bases; and promote orderly urban development of the Nation's Capital."

A rapid transit system for the Washington Metropolitan Area will do much to improve the quality of urban life throughout the National Capital region. Enactment of this legislation would be a major step in achieving the President's objective of making the Capital City a "proud symbol of the quality of American life." Accordingly, the Bureau of the Budget has advised us that enactment of legislation as proposed in the attached draft bill would be in accord with the program of the President.

Sincerely,

JOHN A. VOLPE,
Secretary of Transportation.

THOMAS W. FLETCHER,
Assistant to the Commissioner.

(For Walter E. Washington, Commissioner)

FREDERICK A. BABSON,
Chairman, Board of Directors, Washington Metropolitan Area Transit Authority.

S. 2186—INTRODUCTION OF A BILL TO PROVIDE FOR DISMEMBERMENT INSURANCE FOR SERVICEMEN

Mr. LONG. Mr. President, my colleagues are aware of my longstanding interest in providing adequate insurance for servicemen and veterans. I have already introduced two bills on this subject this year, one to provide double indemnity servicemen's group life insurance for servicemen on active duty in combat areas, and another to provide GI insurance for Vietnam era veterans.

Today I am introducing a bill to include, as part of servicemen's group life insurance, lump sum payments to a serviceman who loses a hand, a foot, or an eye. Under my bill, a serviceman losing any one of these members would receive an indemnity payment equal to one-half of the face value of his servicemen's group life insurance. If the serviceman loses more than one of these members, he would receive an amount equal to the full face value of his servicemen's group life insurance.

Mr. President, I have purposely patterned this bill on the dismemberment insurance provided under present law to civil service employees under the Federal employees group life insurance program. I believe that our servicemen, who certainly face a much greater risk of dismemberment, deserve the same kind of protection as our Federal civilian employees.

As the bill is drafted, it does not cover the case of a permanently paralyzed serviceman. This is because I followed the provisions of the Federal employees group life insurance program. But as a matter of fact, I feel that the permanently paralyzed serviceman should be covered by servicemen's group life insurance on the same basis as a serviceman who suffers loss of limb. I intend to so change my bill in the Committee on Finance.

Though my bill would require the serviceman to pay for this additional cost based on the average civilian risk, the Veterans' Administration estimates that the cost to the veteran would be nominal, and that dismemberment insurance could be provided with no increase in the present premium of \$2 per month for \$10,000 of servicemen's group life insurance.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2186) to amend chapter 19, United States Code, so as to provide dismemberment insurance coverage under the Servicemen's Group Life Insurance program introduced by Mr. LONG, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD as follows:

S. 2186

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section

767 of title 38, United States Code, is amended by adding at the end thereof a new subsection as follows:

"(c) Each policy purchased under this subchapter shall, subject to such terms and conditions as the Administrator may approve, provide dismemberment insurance coverage as follows: (1) for the loss of one hand or of one foot or the loss of sight of one eye, the insured shall be paid an amount equal to one-half of the face value of the insurance; and (2) for the loss of two or more of such members, the insured shall be paid an amount equal to the full face value of the insurance. Dismemberment insurance shall be paid to an insured who suffers the loss of one or more limbs or the sight in one or both eyes if such loss occurs as the direct result of and within a period of 90 days after a bodily injury has been suffered by such insured. The total amount of insurance paid under any policy of Servicemen's Group Life Insurance on account of any one accident shall not exceed the face value of such policy. No payment shall be made under this subsection for the loss of a limb or loss of eyesight as the result of an intentionally self-inflicted injury."

SEC. 2. The second sentence of section 769(b) of title 28, United States Code, is amended to read as follows: "Such cost shall be determined by the Administrator on the basis of excess mortality and dismemberment suffered by members and former members of the uniformed services insured under this subchapter above that incurred by the male civilian population of the United States of the same age as the median age of members of the uniformed services (disregarding a fraction of a year) as shown by the records of the uniformed services, the primary insurer of insurers, and the Department of Health, Education, and Welfare, together with the most current estimates relating to mortality and dismemberment."

SEC. 3. This Act shall become effective on the first day of the second month following the month in which enacted.

S. 2190—INTRODUCTION OF THE AGRICULTURAL TRADE STATISTICS REPORTING ACT

Mr. SPARKMAN. Mr. President, on behalf of myself and other Senators, I am introducing a bill entitled "the Agricultural Trade Statistics Reporting Act." I ask that it be appropriately referred and that the text be reprinted in the RECORD following my remarks.

This legislation was first offered about 3 years ago, on June 16, 1966, being S. 3522 of the 89th Congress and S. 1940 in the 90th Congress.

The bill would have the Secretary of Agriculture deliver to the Congress an annual report in business-like form, containing a summary of the balance-of-payments impact on all U.S. agricultural trade. Included would be information along the following lines: The volume and dollar value of the Nation's foreign trade overall and in major agricultural commodities, the trends in imports and exports of these goods, and the net effect of trade and agricultural aid on our balance of payments position.

It was disappointing to me that no action was taken on this legislation during the past two Congresses. However, the passage of time and events have reinforced my belief that refinements in congressional consideration of agricultural trade statistics are needed more than ever in 1969.

AGRICULTURAL EXPORTS VITAL TO OUR FARMERS

The United States exports more agricultural products than any other nation, and is presently among the world's largest importers. Overseas sales have contributed significantly to the income of American farmers, food processors, and the general economy, as well as to U.S. balance-of-payments earnings.

For example, between 1961 and 1967, those sales of U.S. farm products in foreign markets totaled almost \$33 billion. During the same years, the country suffered an overall payments deficit of \$16.3 billion. Our agricultural exports for last year actually declined, to something like \$6 billion, but they still accounted for almost a billion-dollar addition to the balance of payments.

The Department of Agriculture has said that export sales amount to about one-fifth of the total sales made by U.S. farmers. For six major products—rice, cotton, wheat, tallow, hides, and soybeans—export markets exceeded 40 percent and sometimes 50 percent of total sales. For certain regions and States, such as Alabama where the natural advantages favor farming, our future economic progress is linked strongly to the intelligent development of agricultural trade policy.

RESPONSIBILITY FOR RECORDKEEPING

Within the Agriculture Department, the Foreign Agriculture Service is the organization which does the bookkeeping, so our policymakers can remain informed of the latest developments in the world's agricultural trade. In the year FAS was formed, 1954, our agricultural trade was \$3 billion. For the past 3 years, our farm exports ranged between \$6 and \$6.8 billion. With a further responsibility for collecting data in 96 foreign markets, the agricultural statistics effort is now considerable.

Despite dedicated efforts of the FAS, a January 1967 report by an outside consultant firm, Dunlap & Associates, stressed the need for FAS to revise its methods. It found the basic system established in 1954 unable to meet the greatly expanded demands.

A program was proposed by Secretary Freeman during 1967 to implement this report, including the installation of a modern computer-supported information management section. As described in the Department's Foreign Agriculture magazine, the proposed system would attempt to do the following:

First. Establish subsystems for the nine major types of information FAS deals with and centralize the processing of data by the use of ADP facilities;

Second. Consolidate in the Office of Reports and Statistics the responsibility for agricultural reporting; and

Third. Streamline the instructions for Agriculture attaché reporting.

When the new system is fully operative, it should allow more rapid and more effective use to be made of the agricultural trade data. It will undoubtedly be a step forward. I noted also that President Nixon instructed all Departments and Agencies to release the information they collect within 2 days of compilation.¹

¹ See "Agencies Directed to Make Statistics Available to Public Within 2 Days," by Ho-

SHORTCOMINGS IN THE PRESENT SYSTEM OF AGRICULTURAL REPORTING

However, in order to translate this increased capacity to process data into the realm of policy, it must be combined with further improvements in reporting it to Congress and the public. The statistics of world and U.S. agricultural trade are the foundation upon which the Congress must decide and debate issues of trade and agricultural policies. At this critical time for our trade accounts and balance of payments, it is essential that Members and committees of Congress who are responsible for these trade policies receive this material in a readily understandable format.

Unfortunately, the agricultural trade inquiries in which I have participated have been characterized by difficulty in obtaining such information in useful form. In 1964, the Select Committee on Small Business, under my chairmanship, undertook a study of this Nation's export potential in beef products. At that time, there was no publication which meaningfully explained world trends in the exporting, importing, and trading of this commodity. Thereafter, several Senators introduced S. 2226—reintroduced as S. 2079 on May 8, 1969—the Agricultural Trade Conference Act, which would formally call for such a report. Such a study was finally published for the first time in 1966. Although the Department of Agriculture undertook to republish this survey at 2-year intervals, it did not do so in 1967 or 1968.

In that instance, we were dealing with commodities with an export potential to Western Europe alone estimated at up to a million metric tons, or \$1 billion a year. Even so, it took the committee about 2 years to obtain a proper statistical analysis of this subject.

Similar inadequacies of data and presentation have shown up in trying to get an overall view of agricultural trade from year to year. The Agriculture Department publishes numerous and voluminous reports of agricultural trade, and many of these are of excellent quality.

But part of the difficulty is with the very multiplicity and detail of these statistical series. They appear at different times, in various forms, and in diffuse channels. The Department has pointed with pride to a 635-page volume on agricultural statistics which contains, among many other things, some excellent material on foreign trade. Yet it was not until August 1967 that the Small Business Committee, which had been actively concerned with these matters for 3 years, was made aware of this volume. Furthermore, I am not aware of where a similar report has been published before or since.

The major point is that Congress and the public, which can only spend limited amounts of time studying these matters, need a simple, uniform, periodic, and reliable guide which can inform them on the subject. Annual reports of businesses do this now, and provide a convenient model for what we would like to see. We, in the Senate, should be able to gain an understanding of the issues without

bart Rowen, *Washington Post*, Feb. 9, 1969, p. A17:1.

necessarily becoming experts in the statistical process.

This Statistics Reporting Act offers hope that it can become easier for all Members of Congress and the public to come to grips with both the specific commodity problems and the larger overall issues of agricultural trade.

There would be an additional emphasis in the bill on reconciling the accounting practices of the several Government agencies who are concerned with agricultural trade, aid, barter, and donations. There could also be a reconciliation of the figures from year to year.

Differences in statistical concepts and methods have created discrepancies among the many Government publications on this subject. The bill seeks to resolve this problem by providing the Government departments and agencies involved with the opportunity to develop common statistical procedures in the course of preparing a single comprehensive annual report.

The report would also serve as a vehicle for collecting the agricultural statistics now scattered among a number of Government offices.

STATISTICS AS A BASIS FOR POLICY DECISIONS

During the past several Congresses, there has been considerable attention to U.S. trade policies. The surge of imports into this country, and a relatively slow advance in our export trade to which our committees have been calling attention over the years, have also become a subject of public discussion and concern. The 1968 surplus on the so-called trade surplus was a razor-thin \$100. However, as one knowledgeable observer pointed out:

Excluding AID-financed exports, the United States suffered a commercial deficit of \$2.4 billion during the past calendar year.²

Restrictions abroad and the consequent halt in the growth of U.S. agricultural trade are a matter of serious concern. As one authority recently stated:

American agricultural exports, for years a buoyant factor in the trade balance, are falling off just when that balance needs a stimulus. . . . the Kennedy round of tariff reductions did little for American farmers. Their political representatives will insist that they should be better served in any new round of trade negotiations.³

In the course of congressional attempts to reevaluate our trade policies and programs, however, considerable doubt has thus arisen over the state of our basic statistical information.

Congress faces major decisions of trade policy in future years. Such judgments should not be taken in an atmosphere of uncertainty over the present and past. The foundation for decisions on programs involving U.S. farm resources in international trade should be an easy and full access to the current information.

The sponsors of this bill therefore feel that it would benefit our consideration of agricultural trade policy by closing part of the "information gap" that now

² "Perspective on World Business," World Business magazine published by the Chase National Bank, N.A., April 1969, p. 3.

³ "A row of beans," *The Economist*, Apr. 26, 1969, p. 50: 1-2.

exists between the Administration, the Congress, the experts, and the general public.

CONCLUSION

Those of us who have watched our trade surplus steadily disappearing have recognized the need for modernized export policies for some time. Yet any improvements must come only with the broadest participation of general farm, commodity, and rural community organizations, universities, transportation firms, and all others who share an interest in the advancement of our agricultural trade. It is therefore essential during the cooperation and consultation which goes into these efforts that we speak a common language and can rely upon common facts and figures as our starting point.

The statistics reporting bill proposed in the 89th Congress was put forward as a basis for discussion and consideration. We have since sought the advice of private individuals and organizations, as well as several agencies of the executive branch involved in the areas of trade and statistics, so that these groups could contribute to the writing of this legislation.

The bill has been reviewed and revised in the light of these comments which we have received or been able to elicit. We believe some improvements have been made. We will certainly welcome further suggestions.

Accordingly, I intend to work for the passage of an agricultural trade statistics bill along the lines of this bill. I hope it will become a product of the labors of all who are concerned with agricultural trade. We are urging that others join in this effort, in the belief that only on the basis of modernized reporting of the facts can the Congress approach the demanding work of evaluating existing trade policies and programs and devising new ones to respond to changing conditions.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2190) to require the Secretary of Agriculture to report to the Congress each year certain information relating to the import and export of agricultural commodities, introduced by Mr. SPARKMAN (for himself and other Senators), was received, read twice by its title, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

S. 2190

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Trade Statistics Reporting Act of 1969."

Sec. 2. In order that certain information pertaining to the import and export of agricultural commodities will be available to all Members of Congress, and especially to the congressional committees having responsibility for the trade and tariff policies of the United States, it is hereby declared to be in the public interest that the Secretary of Agriculture should compile and publish an annual standard reference work containing certain statistical information with respect to the volume and dollar value of this Nation's foreign trade in major agricultural commodities for the preceding calendar year,

the trends in United States imports and exports of such commodities, and the effect of such trade upon the balance-of-payments position of the United States.

Sec. 3. (a) The Secretary of Agriculture (hereinafter referred to as the "Secretary") shall, not later than February 15 of each calendar year, submit to the appropriate committees of the Congress a report containing the information described in subsection (b) of this section and cause such report to be readily available to all other committees and Members of Congress, to all trade publications, and, upon request, to any other interested party.

(b) The information to be contained in any such report shall specifically disclose with respect to the immediately preceding calendar year—

(1) the quantity and dollar value of imports into the United States and exports from the United States of each major agricultural commodity;

(2) the extent to which such dollar value reflects or fails to reflect, in the case of each major agricultural commodity, costs attributable to transportation, insurance, and other expenses incident to handling;

(3) the extent to which, in the case of each major agricultural commodity, exports were paid for in dollars, other freely convertible currency, local currency not convertible, funds of the United States Government on a cash or credit basis, or were donations valued without reference to payment;

(4) what effect imports and exports of all agricultural commodities had on the balance-of-payments position of the United States Government; and

(5) the percentage of our total domestic production in the case of each major agricultural commodity, which was exported, the percentage of the total exports, in the case of each such commodity, which was paid for by each of the methods of financing described in paragraph (3); and the percentage of our total production and consumption, in the case of each such commodity, which was imported.

(c) Such report shall also set forth statistics and other information covering a period of prior years in sufficient detail to show, with respect to each major agricultural commodity, the prevailing trends in the import and export of the different types or classifications of that particular commodity.

(d) The Secretary shall include in such report such other pertinent information as he deems appropriate.

(e) The Secretary shall include in such report the citation of any public laws relevant to the subject matter being discussed.

(f) As used in this Act, the term "major agricultural commodity" shall include, for example, cotton, beef, pork, veal, live cattle, nonfat dry milk, cheese, butter, and poultry; and in providing the information specified in subsection (b) (1) of this section, the Secretary shall give separate statistics for each of those commodities.

Sec. 4. The Secretary shall coordinate the administration of this Act with other departments and agencies of the Government concerned therewith and with interested private organizations; and such departments and agencies of the Government are authorized and directed to cooperate with the Secretary in the administration of this Act, including the coordination of all procedures, forms, and means necessary or appropriate for carrying out the provisions of this Act. The Secretary shall include in his annual report such recommendations for legislation and administrative actions as he determines would facilitate the administration of this Act.

Sec. 5. (a) The Secretary, before submitting to the Congress the report referred to in section 3 of this Act, shall submit such report to the General Accounting Office for examination. The Comptroller General shall

examine the report as he deems necessary, in order to determine:

(1) the extent to which such report is in conformity with or departs from generally accepted accounting principles;

(2) whether or not such report accurately reflects the effect of trade in agricultural commodities on the balance-of-payments position of the United States;

(3) except for the initial report, the extent to which such report was prepared on a basis comparable to that of the previous year;

(4) whether such report follows the reporting practices and procedures followed by major international trade organizations with which the United States is associated, including the General Agreement on Tariffs and Trade and the Organization for European Cooperation and Development.

(b) The opinion of the Comptroller General with respect to the matters referred to in subsection (a) of this section shall be included in the report.

Sec. 6. Notwithstanding the reporting date prescribed in section 3 of this Act, the Secretary is authorized, in the case of any of the first four annual reports, to postpone the date of submission to any date not later than June 1 if he determines that the report for such year cannot be submitted prior to that date and notifies the Senate and the House of Representatives by letter of the necessity of such postponement and the reasons therefor.

Sec. 7. The Secretary shall submit the first report under this Act in the calendar year 1970 covering imports and exports during the calendar year 1969.

Mr. MONTROYA. Mr. President, I am pleased to join as a cosponsor of Senator SPARKMAN's two bills to assist farmers, ranchers, and the U.S. beef industry in expanding its export markets.

One of the bills, S. 2079, which was introduced on May 8, 1969, would provide for an annual conference between representatives of the beef industry, the Secretary of Agriculture, and representatives of other departments and agencies of the Federal Government to consider problems relating to the export of beef and beef products from the United States and related international trade problems.

The second bill, S. 2190, which we are introducing today, would require the Secretary of Agriculture to report to the Congress each year certain information relating to the import and export of agricultural commodities.

It was my privilege to participate in the 3-year investigation which gave rise to this legislation, and to preside as chairman of certain of the hearings, including the session on May 18, 1966, which marked the end of administrative efforts to restrict exports of cattle hides and skins. The Senator from South Dakota (Mr. McGOVERN), who gave the key testimony on that occasion, will remember this well.

The Small Business Committee inquiry extended over 3 years, 5 days of public hearings, two reports, and considerable extra research throughout the country.

BENEFITS TO THE NATION

In my judgment, it has already accomplished significant results because, as the Senator from Alabama (Mr. SPARKMAN) has stated, U.S. quality beef products are now beginning to be exported commercially to Western Europe, Japan, and Scandinavia for the first time in 50 years. In nearby Mexico also, there

are indications that, "at present, demand for beef is rapidly outstripping supply and Mexico might increase purchases of U.S. choice beef for the hotel and restaurant trade."⁴

The Senator from Nevada (Mr. BIBLE) has correctly pointed out that there are 370 million consumers in Western Europe alone, and the standard of living is rising rapidly from year to year. I am glad that Senator BIBLE emphasized that consumers on the European continent traditionally buy meat that is a byproduct of dairy herds—veal and cow beef—supplemented mainly by Argentine imports which come from grass-fed cattle. Most Europeans, therefore, have had no experience, and only the dimmest idea of the delicious qualities of American table meats.

Our committee established that annual consumption of beef in the United States is now over 100 pounds per person. European statistics show about half of that level, but these figures are misleading because of the difference in the types of meat involved. The European housewife cannot broil or barbecue the meats on sale there because they are too dry.

That is why the Senators from Alabama and Nevada are right when they imply that there can be a bonanza for the balance of payments in the U.S. beef industry when the mass European, Japanese, and other markets, which amount to many times the population of this country, discover American quality beef products and start to use them regularly.

Our committee has attempted over the years, to spread the knowledge of these possibilities to small and family livestock producers and processors throughout the United States.

We feel that this information will best prepare them to gain a fair share of these profitable export markets. I, for one, am not in favor of leaving all these possibilities to the three or four giant meat-packing corporations, which also have production and facilities elsewhere in the world which can compete with American industry.

For these reasons, we on the committee have advocated the annual cattle conference proposed by S. 2079 in which every segment of our cattle and beef industry can take part. This conference would be preceded by a thorough study of the trends in world beef production and trade. At the conference there would be a detailed discussion of the implications of this trade for American industry, both the problems and potentials.

We envision, in the bill, that these conferences will be held each year at times and places which are convenient to those in the industry and that the leading economic authorities in the Government would attend in order to give our businessmen the benefit of their views. We have provided that there will be an equal industry cochairman for these conferences, so that the industry point of view will be represented at all stages, includ-

ing the planning, the subject matter to be taken up, and the action which would follow these meetings.

It has been disappointing to me that no action was taken on the cattle conference bill during the 90th Congress. As I recall, the Department of Agriculture waited 11 months before reporting unfavorably on this bill, and it did not report at all on the companion agricultural statistics bill. The Agricultural Statistics Reporting Act, which I was pleased to support when it was first introduced in June 1966, would be a valuable tool for Members of the Senate and the House of Representatives in understanding the trends in agricultural trade. I know that there are piles of agricultural statistics, but as the Senator from Alabama (Mr. SPARKMAN) has said, we need to have a single, simple report which will tell us the story of agricultural exports and imports without having to become experts in the statistical process.

It is difficult to understand how action on these two worthwhile pieces of legislation can be put aside at a time when the U.S. balance of payments has been deteriorating and agricultural trade itself declining as in 1968.

BENEFITS TO NEW MEXICO

Mr. President, I want to point out just what trade in agricultural products, particularly meat products, means to the people of my State.

New Mexico is located in the Southwestern rangeland, and nearly 60 percent of its 78 million acres are in pastureland. It has traditionally been an area for the grazing of livestock, primarily cattle.

Accordingly, livestock products constitute the predominant element in the cash income of our farmers. In 1967, for instance, all livestock products, including wool, contributed \$221 million, or 70 percent, to New Mexico farmers' income. Of this, cattle and calves alone amounted to 58 percent of total New Mexico farm cash receipts.

Over the past two decades, the cattle business in the Southwest has been characterized by three periods: First, in the early 1950's a severe drought brought cattle prices down to low levels; second, during the late 1950's there was a rapid growth of commercial feedlots, followed by the arrival of new packing plants in the Southwest and Colorado; and third, as a result, during the 1960's there have been new records for beef production each year.

What has been most encouraging to us in New Mexico is the movement toward an integrated beef industry with all of the operations taking place in our part of the country.

In the past, many thousands of feeder cattle were shipped to other parts of the Southwest and Midwest for feeding purposes. At the beginning of 1968, slightly more than half the cattle in New Mexico were more than 2 years old, indicating that the State's cattlemen were still largely cow-calf operators. However, during the 1960's cattle feeding has been developed, particularly in the Clovis-Amarillo area to a high degree, based on higher production of grain sorghum,

hay, and silage. Thus, in 1967, New Mexico marketed 238,000 fed cattle. To provide the standard of comparison, the increase for the 11 Western States between 1960 and 1967 was 44 percent. For New Mexico the increase was an astonishing 111 percent over 1960.

Thus, if markets for quality beef products expand, at home and abroad, these favorable trends will continue, and New Mexico farmers and ranchers will benefit accordingly.

It is therefore clear that both the interests of New Mexico and the Nation call for legislation such as we are proposing to fully acquaint the U.S. beef industry with the possibilities of growing world markets.

I for one feel that action is overdue. As a former member of the Senate Committee on Agriculture, I plan to call upon my colleagues on that committee for early hearings on this legislation. I hope that the executive branch is prepared to cooperate with the Congress in advancing these proposals. In any event, however, I will be doing all I can to bring about the enactment of these and other measures which will assist small independent and family farmers, ranchers, and meat processors in the Southwest and around the country.

Mr. TOWER. Mr. President, the distinguished Senator from Alabama (Mr. SPARKMAN) has today reintroduced a bill requiring the Secretary of Agriculture to submit an annual report providing information on the import and export of agricultural commodities to the Congress of the United States. I have joined Senator SPARKMAN as a cosponsor of this measure, and I now rise to urge my colleagues to lend their support to this legislation which will greatly benefit the farming and ranching industry.

We are all aware of the serious dilemma confronting the agricultural industry today. Costs have continued to climb, yet the farmer today receives less for his produce than he did before World War II. He is so bound by strict and rigid controls that he can no longer operate his business on a sound economic basis.

The farmer today must be able to sell more of his produce in order to make a reasonable return on his investment. Modern technology and advancements have overwhelmingly increased agricultural production. At the same time, however, domestic demand has not met this supply. Thus, we find the Government in the odd position of paying the farmer not to plant a particular commodity so that the marketplace will not become glutted with excess production. Mr. President, we all know that it is just not good commonsense business for a farmer to have to operate in such an unusual way. Instead, it is an Alice in Wonderland situation where the farmer must run faster and faster just to stay in the same place.

It is time that the farmer and rancher once again be allowed to operate on sound economic principles like other businessmen. If this is to occur, the farmer and rancher must find a way out of his dilemma; he must get off the treadmill. This, of course, means that

⁴ "Mexican Beef Feeders Battle Development Problems," *Foreign Agriculture Magazine*, May 12, 1969, p. 16.

a way must be found to improve the supply-demand situation the farmer faces. To do so, he must have an expanded market—the international market. In a world racked by hunger and fear of starvation, there must be a way to make full use of the great agricultural productive skills of the American farmer.

I think we would all agree that a good businessman is one who takes into account the many factors and conditions affecting both his specific business operation and his industry as a whole. He then reacts accordingly. A good businessman also plans ahead, basing his projections on indicative trends, various sets of statistical information, and recommendations. To do so, however, he must have access to data which is accurate, reliable, and detailed.

Mr. President, I believe that the farmer and rancher can expand into the international market, and I believe that they can be good businessmen. Senator SPARKMAN's bill will provide them with one of the most necessary tools to achieve this goal. This measure will make readily available that accurate, reliable, and detailed data so vital to adequate planning. This measure will allow a more realistic projection of present and future world supply and demand for all major agricultural commodities.

With this information at hand, the farmers and ranchers will be in a position to choose for themselves what and how much to produce. The only limitation upon him will be an economic one: the total world demand for food. His decisions will be made with adequate knowledge of what that demand is, where it is, and how he can supply it. Mr. President, the world market exists. I know that our agricultural industry can be a significant part of it.

In this country, we have created an artificial market of sorts because potential supply far outweighs actual demand. Thus we have had to regulate and restrict. The industry can, however, increase its operations by expanding to the competitive world trade level. Senator SPARKMAN's measure will allow it to do so on the basis of reasonable and realistic business information. The benefits, I believe, will not be limited to the agricultural industry.

If he is allowed to operate more as a businessman; if he is allowed to profit as a businessman, the farmer will inevitably become less and less dependent on government support and subsidy. Federal assistance can be greatly reduced. Within a reasonable amount of time, I think we will see a substantial reduction in Federal expenditures in the agricultural sphere. Mr. President, I believe that the farmer will not be the only man to find himself in a better position. I believe that, in the long run, the taxpayer will benefit as well.

Senator SPARKMAN's bill alone obviously cannot bring about the situation I have just discussed. However, it is an important step in the right direction; it is a necessary means to an end; it is a vital tool. Mr. President, I urge my colleagues to support the Agricultural Trade Statistics Reporting Act of 1969.

S. 2191—INTRODUCTION OF A BILL TO MAKE THE FREEDOM OF INFORMATION ACT APPLICABLE TO THE DISTRICT OF COLUMBIA GOVERNMENT

Mr. KENNEDY. Mr. President, I am introducing today a bill to amend the provisions of chapter 5 of title 5, United States Code, relating to the Freedom of Information Act. The bill has a single objective: application of the Freedom of Information Act to the District of Columbia government.

The Freedom of Information Act became effective almost 2 years ago. It placed the Federal Government under an affirmative obligation to disclose documents and information, unless they fall under one of the specific statutory exemptions. In short, the act provided disclosure as a rule, secrecy as an exception.

The bill I am introducing would apply the same principle to the government of the District of Columbia.

An unqualified openness in the conduct of government goes a long way to promote public confidence in government. And in the District of Columbia it is important that we have the maximum confidence in our local officials. Disclosure of information concerning the operation of the District government should never be subject solely to the unlimited discretion of its officials.

This does not imply that District officials have not been doing their best to promote the free flow of information; if anything, their hands may have been tied by the lack of any positive statutory authority providing for disclosure of information. This bill supports the District government in its efforts to provide an open administration.

A similar bill was introduced before the 90th Congress and was referred to the Subcommittee on Administrative Practice and Procedure. As chairman of that subcommittee, I am planning to hold hearings on the present bill at the earliest opportunity. Representative MOSS has introduced an identical bill and expects to expedite its progress in the House of Representatives.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2191) to amend the provisions of chapter 5 of title 5, United States Code, relating to administrative procedure, introduced by Mr. KENNEDY, was received, read twice by its title, and referred to the Committee on the Judiciary.

S. 2193—INTRODUCTION OF THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1969

Mr. WILLIAMS of New Jersey. Mr. President, on behalf of myself and other Senators, I am introducing a bill to mobilize the Federal and State Governments, labor, private industry, and the professions in a broad and vigorous attack upon the increasingly serious problem of occupational safety and health in this Nation.

The goal of this bill, the Occupational Safety and Health Act of 1969, is sig-

nificant reduction of the tremendous human and economic loss caused by fatalities, illnesses and injuries on the job. This loss is felt in the health and the very lives of workers, as well as in their earning capacity. It is also felt in the loss of production and mounting workmen's compensation costs to management.

Every year more than 14,000 workers are killed in occupational accidents. The fatality rate from occupational accidents has remained virtually unchanged since 1956, while the rate for all disabling injuries was actually higher in 1968 than it was in 1956. It should be of interest to those of my colleagues who have from time to time expressed concern over the effects of work stoppages from strikes on our economy and national security, that in 1967 a total of 42.1 million man-days were lost from strikes, while 245 million man-days were lost from occupational injuries, a ratio of nearly 6 to 1.

The time is far overdue to raise the quality of the workplace environment to safe and healthy levels, and to keep it there. What is needed is a worker's health and safety bill of rights for the nearly 80 million working men and women who comprise 40 percent of the population and pay 60 percent of the taxes. These men and women should never be called upon to risk their health or their lives as the price for holding their jobs.

Mr. President, the resources of the Federal and State Governments and of private industry have been inadequately and poorly deployed to meet the occupational hazards created by major changes in technology and industry in America over the past half century. These rapid changes have brought increasingly serious and complex threats to the safety and health of workers.

The Federal Government today offers only a patchwork of obsolete and ineffective laws. The major law—the Walsh-Healey Act—was passed more than three decades ago. Its coverage is limited, and it is often honored more in the breach than in practice. Comprehensive protection under other Federal laws is restricted to a few specialized fields.

Only a few States have modern laws to protect the worker's health and safety. Most have no coverage or laws that are weak and deficient—reflecting a wide variation in safety standards, administered by inadequate and underpaid staffs.

A 1966-67 study by the Department of Health, Education, and Welfare of 1,700 industrial plants in six metropolitan areas, employing 142,000 workers, revealed that 65 percent of these workers were judged to be potentially exposed to toxic materials, harmful physical agents, severe noise or vibration. Only 25 percent of these workers were protected by controls over such exposure. The remaining 75 percent were unprotected or working under conditions which needed immediate attention.

Aside from the individual human tragedies that are represented by industrial accidents, as well as such occupationally incurred illnesses as emphysema, silicosis, coal workers' pneumoconiosis, tuberculosis, and lung cancer, industry

itself is also adversely affected. Over the Nation, a recent 10-year study period revealed, according to the Department of Health, Education, and Welfare, that the number of workers covered by workmen's compensation increased from 41 to 51 million, or 24 percent. However, during the same period, benefits paid, rose from \$916 million to \$2.1 billion, or 130 percent. The increase in costs was five times greater than the increase in workers covered. It follows that every dollar wisely spent in accident and illness prevention means an increasingly greater saving in compensation per injury.

I, therefore, believe it imperative that a unified Federal focus of leadership, animated by a sound legislative policy and program, be created without further delay. It must be such as to generate full and affirmative cooperation of all levels of government involved, of private industry, labor, the health and medical professions, colleges and universities. We must mount an ever increasing attack on all the hazards of the occupational environment, at a scale commensurate with the magnitude and complexity of the problem. In my belief, the Occupational Safety and Health Act that I introduce today—which is identical to a bill which has been introduced in the House by Congressman O'HARA, of Michigan, and others—will take this Nation forward on this road and in the right direction.

The alternative is intolerable for a civilized nation. We must eliminate to the fullest extent possible both those major occupational disasters which from time to time shock the conscience of the Nation, as well as the little-noticed day-to-day toll of occupational deaths, accidents and illnesses that bring tragedy to thousands of American families each year.

Mr. President, I ask unanimous consent that the bill and an explanatory statement be printed in the RECORD at this point.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and statement will be printed in the RECORD.

The bill (S. 2193), to authorize the Secretary of Labor to set standards to assure safe and healthful working conditions for working men and women; to assist and encourage States to participate in efforts to assure such working conditions; to provide for research, information, education, and training in the field of occupational safety and health, and for other purposes, introduced by Mr. WILLIAMS of New Jersey (for himself and other Senators), was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 2193

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Occupational Safety and Health Act of 1969".

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that personal injuries and illnesses arising out of

work situations which result in death or disability impose a substantial burden upon, and are a hindrance to, interstate commerce in terms of lost production, wage loss, medical expenses, and disability compensation payments.

(b) The Congress declares it to be the purpose and policy, through the exercise by Congress of its powers to regulate commerce among the several States and with foreign nations and to provide for the general welfare, to assure so far as possible every working man and woman in the Nation safe and healthful working conditions—

(1) by establishing mandatory occupational safety and health standards applicable to businesses affecting commerce;

(2) by providing for the effective enforcement of such safety and health standards;

(3) by providing for research relating to occupational safety and health;

(4) by providing for training programs to increase and improve personnel engaged in the field of occupational safety and health;

(5) by more clearly delineating the responsibilities of the Federal Government and the States in their activities related to occupational safety and health;

(6) by providing grants to the States to assist them in identifying their needs and responsibilities in the area of occupational safety and health, to develop plans in accordance with the provisions of this Act, and to conduct experimental and demonstration projects in connection therewith; and

(7) by providing for appropriate accident and health reporting procedures which will help achieve the objectives of this Act.

STANDARDS

SEC. 3. (a) For purposes of this section:

(1) The term "occupational safety and health standard" means a standard which requires conditions, or the adoption or use of one or more practices, means, methods, operations, or processes, reasonably necessary to provide safe or healthful employment and places of employment.

(2) The term "national consensus standard" means any occupational safety or health standard adopted under a consensus method by a nationally recognized standards producing organization.

(3) The term "established Federal standard" means any occupational safety or health standard already established by any agency of the United States, or contained in any Act of Congress in force on the date of enactment of this Act, but before the exercise by the Secretary, with respect to the issues covered by such standards, of his authority under section 13.

(b) Except as provided in section 12(h) of this Act, each employer engaged in a business affecting commerce shall comply with occupational safety and health standards promulgated by the Secretary. Such standards shall be promulgated, modified or revoked by the Secretary by rule in accordance with subsection (c), (d), (e), or (f).

(c) The Secretary may by rule promulgate any occupational safety and health standard which is a national consensus standard. If the nationally recognized standards producing organization which adopted the national consensus standard upon which an occupational safety and health standard promulgated under this subsection was based modifies or revokes such national consensus standard under a consensus method, the Secretary may by rule modify or revoke the standard promulgated by him to the same extent. Section 553 of title 5, United States Code, shall not apply to any rule issued under this subsection.

(d) The Secretary may by rule promulgate any occupational safety and health standard which is an established Federal standard. Section 553 of title 5, United States Code, shall not apply to any rule issued under this

subsection. Subsection (f) shall apply to the modification or revocation of any standard promulgated under this subsection.

(e) The Secretary may by rule promulgate an interim occupational safety and health standard which is a standard proposed by a nationally recognized standards producing organization by other than a consensus method, whenever he finds (and incorporates the finding and a brief statement of the reasons therefor in the rule issued) that such rule making without the notice and procedures provided by subsection (f) of this section and by section 553 of title 5, United States Code, is necessary in the public interest. Such a standard may remain in effect for not more than six months from its effective date, except that the Secretary may extend such interim standard for an additional twelve months if at the time he originally promulgates such a standard he commences (by appointing an advisory committee) a proceeding under subsection (f) dealing with the same subject matter as the interim standard, and such additional occupational safety or health issues as he deems relevant. If an interim standard is promulgated under this subsection, no additional standard dealing with the same subject may be promulgated except in the manner required by subsection (c), (e), or (f) of this section.

(f) The Secretary may, by rule, promulgate, modify or revoke any occupational safety and health standard in the following manner:

(1) Whenever the Secretary is of the opinion such a rule should be prescribed, he shall appoint an advisory committee under section 4(b) of this Act, which shall submit to him within two hundred and seventy days from its appointment or within such longer period as may be prescribed by the Secretary, its recommendations regarding the rule to be prescribed, which recommendations shall be published by the Secretary in the Federal Register, either as part of a subsequent notice of hearing or separately.

(2) After the submission of such recommendations, the Secretary shall schedule and give notice of a hearing on the recommendations of the advisory committee and any other relevant subjects and issues. In the event that the advisory committee fails to submit recommendations within two hundred and seventy days from its appointment (or such longer period as the Secretary has prescribed) he may schedule and give notice of a hearing on any proposal relevant to the purpose for which the advisory committee was appointed. In either case, notice of the time and place of any such hearing shall be published in the Federal Register thirty days prior to the hearing and shall contain the recommendations of the advisory committee or the proposal made in absence of such recommendation. Prior to the hearing interested persons shall be afforded an opportunity to submit comments upon the recommendations of the advisory committee or other proposal. Only persons who have submitted such comments shall have a right at such hearing to submit oral or written evidence, data, views, or arguments.

(3) Upon the entire record before him, including the advisory committee recommendations and any evidence, data, views, and arguments submitted in connection with the hearing, the Secretary may issue a rule promulgating, modifying, or revoking an occupational safety and health standard. The rule shall not become effective for at least thirty days after publication in the Federal Register.

(g) This Act shall not apply with respect to employment performed in a workplace within a foreign country or within territory under the jurisdiction of the United States other than the following: a State; Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act; American

Samoa; Wake Island; Eniwetok Atoll; Kwajalein Atoll; Johnston Island; and the Canal Zone.

ADMINISTRATION; ADVISORY COMMITTEES

SEC. 4. (a) In carrying out his responsibilities under this Act, the Secretary is authorized to—

(1) use, with the consent of any Federal agency, the services, facilities, and employees of such agency with or without reimbursement, and with the consent of any State or political subdivision thereof, accept and use the services, facilities, and employees of the agencies of such State or subdivision with or without reimbursement; and

(2) employ experts and consultants or organizations thereof as authorized by section 3109 of title 5, United States Code, except that contracts for such employment may be renewed annually; compensate individuals so employed at rates not in excess of \$100 per diem, including traveltime; and allow them while away from their homes or regular places of business, travel expenses (including per diem in lieu of subsistence) as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently, while so employed.

(b) The Secretary shall appoint advisory committees to recommend occupational safety and health standards under section 3(f) (1) of this Act. Each such advisory committee shall include among its members an equal number of persons qualified by experience and affiliation to present the viewpoint of the employers involved, and of persons similarly qualified to present the viewpoint of the workers involved, as well as one or more representatives of health or safety agencies of the States, one or more representatives of professional organizations of technicians or professionals specializing in occupational safety or health, and one or more representatives of nationally recognized standards producing organizations. An advisory committee may also include such other persons as the Secretary may appoint who are qualified by knowledge and experience to make a useful contribution to the work of the committee, but the number of persons so appointed to any advisory committee shall not exceed the number appointed to such committee as representatives of State agencies, professional organizations, and standards producing organizations. Persons appointed to advisory committees from private life shall be compensated in the same manner as consultants or experts under subsection (a) (2) of this section. The Secretary shall pay to any State which is the employer of a member of the committee who is a representative of the health or safety agency of that State, reimbursement sufficient to cover the actual cost of the State resulting from such representative's membership on the committee.

(c) (1) The Secretary shall appoint a National Advisory Committee on Occupational Safety and Health (hereafter in this subsection referred to as "Committee") consisting of sixteen members appointed without regard to the civil service laws and composed equally of representatives of management, labor, occupational safety and health professions, and the public. The Secretary shall designate one of the public members as Chairman. The members shall be selected upon the basis of their experience and competence in the field of occupational safety and health.

(2) The Committee shall advise, consult with, and make recommendations to, the Secretaries of Labor and Health, Education, and Welfare on matters relating to the administration of this Act. The Committee shall hold no fewer than two meetings during each calendar year.

(3) The members of the Committee shall be compensated in accordance with the provisions of subsection (a) (2) of this section.

(4) The Secretary shall furnish to the Committee an executive secretary and such secretarial, clerical, and other services as are deemed necessary to the conduct of its business.

INSPECTIONS AND INVESTIGATIONS

SEC. 5. (a) In order to carry out the purposes of this Act, the Secretary, upon presenting appropriate credentials to the owner, operator, or agent in charge, is authorized—

(1) to enter upon at reasonable times any factory, plant, establishment, mine, construction site, or other area, workplace, or environment where work is performed by an employee of an employer or on a contract described in section 10(a); and

(2) to inspect and investigate during regular working hours and at other reasonable times, and within reasonable limits and in a reasonable manner, any such area, workplace, or environment, and all pertinent conditions, structures, machines, apparatus, devices, equipment, and materials therein, and to question any such employee.

(b) For the purpose of carrying out his duties under this Act, the Secretary may delegate his authority under this section to any agency of the Federal Government with or without reimbursement, and, with its consent and with or without reimbursement and under conditions the Secretary may prescribe, to any appropriate State agency or agencies designated by the Governor of the State.

SEC. 6. (a) (1) If, upon inspection or investigation, the Secretary determines that any employer has violated any standard promulgated under section 3 or that any person has violated any regulation prescribed under subsection (b) of this section or any contractual requirement of section 10(a), he shall hold a hearing (in accordance with section 554 of title 5, United States Code, but without regard to subsection (a) (3) of such section), and shall issue such orders, and make such decisions, based upon findings of fact, as are deemed to be necessary to enforce such standard, regulation, or requirement. The Secretary shall give such person the information required by section 554(b) of such title at least 15 days prior to hearing. The Secretary shall have the power to issue orders requiring the attendance and testimony of witnesses and the production of evidence under oath. Witnesses shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of contumacy, failure, or refusal of any person to obey such an order, any district court of the United States or the United States courts of any territory or possession, within the jurisdiction of which the inquiry is carried on, or within the jurisdiction of which such person is found, or resides or transacts business, upon the application by the Secretary, shall have jurisdiction to issue to such person an order requiring such person to appear to produce evidence if, as, and when so ordered, and to give testimony relating to the matter under investigation or in question; and any failure to obey such order of the court may be punished by said court as a contempt thereof.

(2) If an inspection or investigation discloses (A) that an employer has violated a standard promulgated under section 3 or that any person has violated a contractual requirement of section 10(a), and (B) that conditions or practices in such place of employment are such that a danger exists which could reasonably be expected to cause death or serious physical harm immediately or before the imminence of such danger can be eliminated, the Secretary may (notwithstanding the provisions of paragraph (1) of this subsection) issue an order providing for the immediate cessation of such violation and for the prohibition of the employment of any individuals in locations or under conditions where such violations exist, ex-

cept to correct or remove the violation. Such order may remain in effect during the pendency of any proceeding under paragraph (1) of this subsection.

(b) Each employer shall make, keep, and preserve, and make available to the Secretary such records concerning the requirements of section 3 of this Act, and shall make reports therefrom to the Secretary, as he may prescribe by regulation or order as necessary or appropriate for the enforcement of this Act.

JUDICIAL PROCEEDINGS

SEC. 7. (a) The district courts of the United States shall have jurisdiction to enforce (by restraining order, injunction, or otherwise) any order of the Secretary under section 6(a) of this Act. Any person aggrieved by an order issued under section 6(a) may obtain review thereof by such courts based upon the record before the Secretary.

(b) If the Secretary arbitrarily or capriciously issues an order under section 6(a) (2) and the person to whom the order is directed is injured in his business or property by reason of such order, such person may bring an action against the United States in the Court of Claims in which he may recover the damages he has sustained.

CONFIDENTIALITY OF TRADE SECRETS

SEC. 8. In connection with any proceeding under this Act no witness or any other person shall be required to divulge trade secrets or secret processes.

PENALTIES

SEC. 9. (a) Any employer who violates any standard promulgated under section 3 of this Act or any person who violates any regulation prescribed under section 6 or any contractual requirement of section 10(a), may be assessed by the Secretary, pursuant to an order issued under section 6(a) (1) of this Act, a civil penalty of not more than \$1,000 for each violation. Each violation shall be a separate offense. When the violation is of a continuing nature, each day during which it continues after a reasonable time specified in an order issued under section 6(a) (1) shall constitute a separate offense except during the time a review of the order under section 6(a) (1) may be taken, or such review is pending, and during the time allowed in the order under section 6(a) (1) for correction. The Secretary may compromise, mitigate, or settle any claim for civil penalties. In assessing the penalty, consideration shall be given to the appropriateness of the penalty to the size of the business of the person charged and the gravity of the violation.

(b) Any person who willfully violates or fails or refuses to comply with any order issued under section 6(a) of this Act shall be guilty of a misdemeanor, and upon conviction shall be punished by a fine of not more than \$5,000 or by imprisonment for not more than six months, or by both such fine and imprisonment; except that if the conviction is for a violation committed after a first conviction of such person, punishment shall be by a fine of not more than \$10,000 or by imprisonment for not more than one year, or by both such fine and imprisonment.

(c) Any person who forcibly assaults, resists, opposes, impedes, intimidates, or interferes with any person while engaged in or on account of the performance of inspections or investigatory duties under this Act shall be fined not more than \$5,000 or imprisoned not more than three years, or both. Whoever, in the commission of any such acts, uses a deadly or dangerous weapon, shall be fined not more than \$10,000 or imprisoned not more than ten years, or both. Whoever kills any person while engaged in or on account of the performance of inspecting or investigating duties under this Act shall be punished by imprisonment for any term of years or for life.

(d) Any person who gives advance notice

of any inspection to be conducted under this Act, without authority from the Secretary, or his designees, shall be fined not more than \$10,000 or imprisoned not more than five years, or both.

GOVERNMENT CONTRACTS

SEC. 10. (a) Each contract exceeding \$2,500 and requiring or involving the employment of any person (1) to which the United States or any agency or instrumentality thereof, or the District of Columbia is a party, (2) which is made for or on behalf of the United States, any agency or instrumentality thereof, or the District of Columbia, or (3) which is financed in whole or in part by loans or grants from, or loans insured or guaranteed by, the United States or any agency or instrumentality of the United States, shall include the requirement that no part of such contract (or any subcontract thereunder) will be performed in any place or under any conditions which do not meet the applicable occupational safety and health standards. The applicable occupational safety and health standards shall be the standards promulgated by the Secretary under section 3 of this Act, except that, to the extent that the contract will be performed in a State in which there is in effect a State plan approved under section 12(d) which provides for the development and enforcement of safety and health standards relating to one or more occupational safety or health issues, the applicable occupational safety and health standards relating to such issues shall be those developed and enforced under the State plan rather than those promulgated by the Secretary under section 3.

(b) In promulgating standards under section 3 of this Act, the Secretary shall to the extent feasible conform such standards to those occupational safety and health standards established under other laws administered by him.

(c) In addition to the remedies otherwise provided in this Act, the Secretary may declare ineligible to receive any contract described in subsection (a) of this section any person or firm, or any firm, corporation, partnership, or association in which such person or firm has a controlling interest, which is found to have disregarded its obligations under this section until such person or firm has satisfied the Secretary that it will comply with the requirements of this section.

(d) In addition to the remedies otherwise provided in this Act, the Secretary may recommend to the appropriate contracting agency that such agency cancel, terminate, suspend, or cause to be canceled, or suspended, any contract made by any contracting agency for the failure of the contractor to comply with an order of the Secretary issued under section 6(a)(1) of this Act for the breach or violation by such employer of the requirements under subsection (a) of this section.

VARIATIONS, TOLERANCES, AND EXEMPTIONS

SEC. 11. The Secretary may provide such reasonable limitations and may make such rules and regulations allowing reasonable variations, tolerances, and exemptions to and from any or all provisions of this Act as he may find necessary and proper in the public interest or to avoid serious impairment of the conduct of Government business. The Secretary shall keep an appropriately indexed record of all variations, tolerances, and exemptions granted under this section, which shall be open for public inspection.

EFFECTIVE DATE: FEDERAL-STATE RELATIONSHIP

SEC. 12. (a) (1) Except as otherwise provided in this section, this Act shall be effective on the first day of the first month after the date of its enactment.

(2) Sections 6, 7, 9, and standards promulgated under section 3 shall not take effect until July 1, 1970. Section 10 shall not apply to contracts entered into before July 1, 1970.

(b) Nothing in this Act shall be deemed to prevent any State agency or court from asserting jurisdiction over any occupational safety or health issue with respect to which no standard is in effect under section 3.

(c) Any State which, at any time, desires to assume responsibility for development and enforcement in such State of occupational safety or health standards relating to any occupational safety or health issue with respect to which a Federal standard has been promulgated under section 3 shall submit a State plan for the development of such standards and their enforcement.

(d) The Secretary shall approve the plan submitted by a State under subsection (c), or any modification thereof, if such plan in his judgment—

(1) designates a State agency or agencies as the agency or agencies responsible for administering the plan throughout the State,

(2) provides for the development and enforcement of safety and health standards relating to one or more safety or health issues, which standards (and the enforcement of which standards) are or will be substantially as effective in providing safe and healthful employment and places of employment as the standards promulgated under section 3 which relate to the same issues,

(3) provides for the effective right of entry and inspection of all workplaces subject to the Act,

(4) contains satisfactory assurances that such agency or agencies have or will have the legal authority and qualified personnel necessary for the enforcement of such standards,

(5) gives satisfactory assurances that such State will devote adequate funds to the administration and enforcement of such standards, and

(6) provides that the State agency will make such reports to the Secretary in such form and containing such information, as the Secretary shall from time to time require.

(e) If the Secretary rejects a plan submitted under subsection (d), he shall afford the State submitting the plan, due notice and opportunity for a hearing.

(f) After the Secretary approves a State plan submitted under subsection (b), he may, but shall not be required to, exercise his authority under sections 5, 6, 7, and 9, with respect to comparable standards promulgated under section 3, for the period specified in the next sentence. The Secretary may exercise the authority referred to above until he determines, on the basis of actual operations under the State plan, that it meets the criteria set forth in subsection (d), but he shall not make such determination for at least one year after the plan's approval under subsection (d). Upon making the determination referred to in the preceding sentence, the provisions of sections 5, 6, 7, and 9, and standards promulgated under section 3 of this Act, shall not apply with respect to any occupational safety or health issues covered under the plan.

(g) The Secretary shall, on the basis of reports submitted by the State agency and his own inspections make a continuing evaluation of the manner in which each State having a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for a hearing, that in the administration of the State plan there is a failure to comply substantially with any provision of the State plan (or any assurance contained therein), he shall notify the State agency of his withdrawal of approval of such plan and upon receipt of such notice such plan shall cease to be in effect.

RELATIONSHIP TO OTHER FEDERAL PROGRAMS

SEC. 13. When the Secretary promulgates a set of occupational safety and health standards applicable to an industry and he determines (and so certifies) that such standards will be substantially as effective in providing safe and healthful employment and places of

employment as other safety and health standards applicable to such industry which were promulgated under authority of other Federal laws, then such other standards shall be deemed repealed and rescinded on the effective date of the standards promulgated under this Act, except that proceedings already begun may be carried on to completion.

FEDERAL AGENCY SAFETY PROGRAMS AND RESPONSIBILITIES

SEC. 14. (a) It shall be the responsibility of the head of each Federal agency to establish and maintain an effective and comprehensive occupational safety and health program which is consistent with the standards promulgated by the Secretary under section 3. The head of each agency shall (after consultation with representatives of the employees thereof)—

(1) provide safe and healthful places and conditions of employment, consistent with the standards set under section 3;

(2) acquire, maintain, and require the use of safety equipment, personal protective equipment, and devices reasonably necessary to protect employees;

(3) keep adequate records of all occupational accidents and illnesses for proper evaluation and necessary corrective action; and

(4) make an annual report to the President with respect to occupational accidents and injuries and the agency's program under this section. Such report shall include any report submitted under section 7902(e)(2) of title 5, United States Code.

(b) The President shall transmit annually to the Senate and House of Representatives a report of the activities of each Federal agency under this section.

RESEARCH AND RELATED ACTIVITIES

SEC. 15. (a) (1) The Secretary of Health, Education, and Welfare, after consultation with the Secretary and with other appropriate Federal departments or agencies, shall conduct (directly or by grants or contracts) research, experiments, and demonstrations relating to occupational safety and health.

(2) The Secretary of Health, Education, and Welfare shall from time to time consult with the Secretary in order to develop specific plans for such research, demonstrations, and experiments as are necessary to produce criteria enabling the Secretary to meet his responsibility for the formulation of safety and health standards under this Act; and the Secretary of Health, Education, and Welfare, on the basis of such research, demonstrations, and experiments and any other information available to him, shall develop such criteria.

(b) The Secretary of Health, Education, and Welfare is authorized to make inspections as provided in section 5 of this Act in order to carry out his functions and responsibilities under this section.

(c) The Secretary of Labor is authorized to enter into contracts, agreements, or other arrangements with appropriate public agencies or private organizations for the purpose of conducting studies related to his responsibilities for establishing and applying occupational safety and health standards under section 3 of this Act. In carrying out his responsibilities under this subsection, the Secretary shall consult with the Secretary of Health, Education, and Welfare in order to avoid any duplication of efforts under this section.

(d) The Secretary, after consultation with the Secretary of Health, Education, and Welfare, and with the appropriate official in each State as duly designated by such State, shall establish such accident and health reporting systems for employers and for the States as he deems necessary to carry out his responsibilities under this Act.

TRAINING AND EMPLOYEE EDUCATION

SEC. 16. (a) The Secretary of Health, Education, and Welfare, after consultation with

the Secretary of Labor and with other appropriate Federal departments and agencies, shall conduct, directly or by grants or contracts (1) education programs to provide an adequate supply of qualified personnel to carry out the purposes of this Act, and (2) informational programs on the importance of and proper use of adequate safety equipment.

(b) The Secretary is also authorized to conduct (directly or by grants or contracts) short-term training of personnel engaged in work related to his responsibilities under this Act.

(c) The Secretary, in consultation with the Secretary of Health, Education, and Welfare, shall provide for the establishment and supervision of programs for the education and training of employers and employees in the recognition, avoidance, and prevention of unsafe or unhealthful working conditions in employments covered by this Act, and to consult with and advise employers as to effective means of preventing occupational injuries and illnesses.

GRANTS TO THE STATES

SEC. 17. (a) The Secretary is authorized, during the fiscal year ending June 30, 1969, and the two succeeding fiscal years, to make grants to the States to assist them (1) in identifying their needs and responsibilities in the area of occupational safety and health, (2) in developing State plans under section 12, or (3) in developing plans for—

(A) establishing systems for the collection of information concerning the nature and frequency of occupational injuries and diseases;

(B) increasing the expertise and enforcement capabilities of their personnel engaged in occupational safety and health programs; or

(C) otherwise improving the administration and enforcement of State occupational safety and health laws, including standards thereunder, consistent with the objectives of this Act.

(b) The Secretary is authorized, during the fiscal year ending June 30, 1969, and the two succeeding fiscal years, to make grants to the States for experimental and demonstration projects consistent with the objectives set forth in subsection (a) of this section.

(c) The Governor of the State shall designate the appropriate State agency, or agencies, for receipt of any grant made by the Secretary under this section.

(d) Any State agency, or agencies, designated by the Governor of the State, desiring a grant under this section shall submit an application therefor to the Secretary.

(e) The Secretary shall review the application, and shall, after consultation with the Secretary of Health, Education, and Welfare, approve or reject such application.

(f) The Federal share for each State grant under subsection (a) or (b) of this section may be up to 90 per centum of the State's total cost.

(g) The Secretary is authorized to make grants to the States to assist them in administering and enforcing programs for occupational safety and health contained in State plans approved by the Secretary pursuant to section 12 of this Act. The Federal share for each State grant under this subsection may be up to 50 per centum of the State's total cost.

(h) Prior to June 30, 1971, the Secretary shall, after consultation with the Secretary of Health, Education, and Welfare, transmit a report to the President and to Congress, describing the experience under the program and making any recommendations as he may deem appropriate.

EFFECT ON OTHER LAWS

SEC. 18. Nothing in this Act shall be construed or held to supersede or in any manner

affect any workmen's compensation law or to enlarge or diminish or affect in any other manner the common law or statutory rights, duties, or liabilities of employers and employees under any law with respect to injuries, occupational or other diseases, or death of employees arising out of, or in the course of employment.

AUDITS

SEC. 19. (a) Each recipient of a grant under this Act shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such grant, the total cost of the project or undertaking in connection with which such grant is made or used, and the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipients of any grant under this Act that are pertinent to any such grant.

REPORTS

SEC. 20. Within one hundred and twenty days following the convening of the first session of each Congress, the Secretary and the Secretary of Health, Education, and Welfare shall jointly prepare and submit to the President for transmittal to the Congress a biennial report upon the subject matter of this Act, the progress concerning the achievement of its purposes, the needs and requirements in the field of occupational safety and health, and any other relevant information, and including any recommendations they may deem appropriate.

APPROPRIATIONS

SEC. 21. There are authorized to be appropriated to carry out this Act not to exceed \$20,000,000 for the fiscal year ending June 30, 1969, not to exceed \$50,000,000 for the fiscal year ending June 30, 1970, and for each subsequent fiscal year such sums as the Congress shall deem necessary.

DEFINITIONS

SEC. 22. For the purposes of this Act:

(a) The term "Secretary" means the Secretary of Labor or his duly authorized representative.

(b) The term "commerce" means trade, traffic, commerce, transportation, or communication among the several States; or between a State and any place outside thereof; or within the District of Columbia, or a possession of the United States, or between points in the same State but through a point outside thereof.

(c) The term "person" means one or more individuals, partnerships, associations, corporations, business trusts, legal representatives, or any organized groups of persons.

(d) The term "employer" means a person engaged in a business affecting commerce who has employees, but does not include the United States or any state or political subdivision of a State.

(e) The term "State" includes a State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and American Samoa.

SEPARABILITY

SEC. 23. If any provision of this Act, or the application of such provision to any person or circumstances, shall be held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

The material presented by Mr. WILLIAMS of New Jersey follows:

EXPLANATORY STATEMENT OF THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1969

GENERAL

By establishing mandatory safety and health standards and providing for their effective enforcement, by providing for research and training programs, by more clearly delineating the responsibilities of the Federal Government and the States, by providing Planning and project grants to the States, and by providing for better reporting procedures, the bill seeks to assure, as far as possible, every working man and woman safe and healthful working conditions.

STANDARDS

The bill provides four methods for setting occupational safety and health standards:

First, the Secretary of Labor may promulgate forthwith standards which have been developed by nationally recognized standards-setting organizations through a "consensus" method. Second, the Secretary may, in the same way as he promulgates "consensus" standards, promulgate as his own any established Federal standards, already in effect under any other Federal law. Thirdly, the Secretary may promulgate, as interim standards, those standards developed by nationally recognized standards-producing organizations through other than a consensus method. Such standards shall be in effect for six months, except that the Secretary may keep them in force for a total of 18 months if, when he first promulgates them, he also sets in motion the ad hoc advisory committee procedure outlined below.

Finally, the Secretary may appoint ad hoc advisory committees, charged with the responsibility of developing standards for a given industry or with regard to a given hazard, which committees will have 9 months during which they may present such standards. Standards proposed through these advisory committees shall be promulgated after a full-scale APA hearing. In the event the ad hoc committees do not submit recommendations, the Secretary may, also with a full-scale hearing, promulgate standards dealing with this area on his own.

ENFORCEMENT

The bill provides for inspections of work-sites by the Secretary of Labor or his representatives for the purpose of carrying out the Act. The Secretary is authorized to delegate his authority to other Federal agencies or to State agencies, as designated by the Governor. Severe penalties are provided for anyone who, without the specific written authorization of the Secretary, shall give advance notice to any employer or employee of any inspection under this Act.

In the event of the violation of a standard, the Secretary may, after an expeditious hearing, issue such orders as are necessary to abate the violation. In the event of a violation which creates an imminent danger of death or serious physical harm, the Secretary may issue an abatement order without a prior hearing. The Secretary may seek an injunction in a Federal district court enforcing his order. An aggrieved person may also obtain review of such order in the district court. The bill also authorizes redress in the Court of Claims to any employer injured by an order issued arbitrarily or capriciously in an "imminent danger" situation.

PENALTIES

The bill provides civil penalties of up to \$1,000 for each violation of any standard, such penalties to be assessed by the Secretary. It would also be a misdemeanor to willfully violate any order of the Secretary, and a felony to use force against any person engaged in enforcement activities under the Act.

FEDERAL CONTRACTS AND ASSISTANCE PROGRAMS

The bill provides that all Government contracts and Federally-assisted contracts shall

require compliance with applicable standards, with liability for contract cancellation or ineligibility for further contracts in the event of violation.

TOLERANCES AND VARIATIONS

The Secretary is authorized to make reasonable variations, tolerances and exemptions to any of its provisions.

FEDERAL-STATE RELATIONSHIPS

State agencies and courts are assured of jurisdiction over any safety or health issue not covered by a standard promulgated under the Act.

States wishing to assert jurisdiction over areas, industries, or hazards covered by the Act may submit plans doing so, in whole or in part, and containing assurances their standards and enforcement will be substantially as effective as the Secretary's and that they in fact have the legal, financial and personnel capability to do so. State plans must also provide for adequate reporting to the Secretary. If the Secretary approves such a State plan, he and the State agency will have concurrent jurisdiction for a period not less than one year. If, after that one year, the Secretary determines that the State plan will serve the objectives set forth in the Act, and will meet the criteria required for approval, the State agency will become solely responsible for any occupational safety or health issues covered under the plan.

If the Secretary rejects a State plan, he must afford the State a hearing. If, on the basis of State reports or his own inspections, he determines that a previously approved State plan is not meeting the criteria set forth in the Act, or in the plan itself, he may, after notice and hearing, withdraw approval.

RELATIONSHIPS TO OTHER FEDERAL PROGRAMS

Whenever the Secretary promulgates safety and health standards applicable to an industry, and certifies that such standards will be as effective as existing standards promulgated under other Federal laws, such existing standards shall no longer be in effect.

FEDERAL AGENCY SAFETY PROGRAMS

The bill requires the head of every Federal agency to establish and maintain effective occupational safety and health standards, consistent with those promulgated by the Secretary for private industry, for the employees of such agency.

RESEARCH

The Secretaries of HEW and of Labor are authorized to conduct research, directly or by grants or contracts, dealing with their respective functions under this Act. HEW is authorized to develop criteria to aid the Secretary of Labor in the formulation of safety and health standards. Consultation between the two departments and with other government agencies is called for to avoid duplication of effort. The Secretary of Labor is authorized, after consultation with HEW and with the State agencies, to develop appropriate reporting forms.

TRAINING

The bill provides authority for the Secretary of HEW to conduct education programs directly, or through grants and contracts, for personnel to carry out the Act, and the Secretary of Labor is authorized to provide programs for training of personnel in this field.

GRANTS TO THE STATES

Grants to States are authorized to enable them to develop their own occupational safety and health programs and to develop State plans for submission to the Secretary. Grants to the States for carrying out approved plans are also authorized on a 50-50 matching basis.

MISCELLANEOUS

The Secretary of Labor is authorized to appoint ad hoc advisory committees to recom-

mend safety and health standards, such advisory committees to include representatives of employers, workers, State health or safety agencies, professional organizations of technicians or professionals specializing in occupational safety or health, and representatives of nationally recognized standards producing organizations. The Secretary of Labor shall also appoint a National Advisory Committee on Occupational Safety and Health, consisting of 16 members, to advise on the administration of the Act.

The Secretary of Labor and the Secretary of HEW are required to submit, once every two years, a joint report on the progress being made in the field of occupational safety and health and on the needs and requirements in that field.

S. 2197—INTRODUCTION OF A BILL TO ESTABLISH FEE PROGRAMS FOR ENTRANCE TO AND USE OF AREAS ADMINISTERED FOR OUTDOOR RECREATION

Mr. BENNETT. Mr. President, because of action in the 90th Congress, the Golden Eagle passport is due to expire on March 31, 1970. Therefore, I introduce today a bill "to establish fee programs for entrance to and use of areas administered for outdoor recreation and related purposes by the Secretary of the Interior and the Secretary of Agriculture, and for other purposes," which will extend the Golden Eagle passport indefinitely.

The Land and Water Conservation Act approved by Congress in 1965 provided for fees at recreation areas and the Golden Eagle passport as a means of raising money for purchase of more recreation lands. This legislation was approved in the Senate by a 92 to 1 vote. It recognized the growing need to raise money so that the States, and to a lesser degree the Federal agencies, could acquire and develop projects for use by the general public furnishing a broad range of outdoor recreation uses and experiences.

When the passport plan was first introduced, I, like many of my colleagues I am sure, received complaints about the imposition of fees at some previously free recreation areas. However, once the users became aware of the benefits that accrued from the yearly \$7 permit, the opposition ceased.

Since 1965 the Golden Eagle passport has allowed the bearer and everyone with him in a private vehicle to enter more than 3,000 national parks, forests, and refuges, as well as other federally operated recreation areas, without paying fees charged at any of the areas. The program expanded from 90,400 Golden Eagle passports issued in 1965 to 692,300 in 1968, and during the first half of fiscal 1969 alone, 403,100 had been sold.

At first, revenues were not as great as anticipated because the program got off to a slow start. However, from a low of \$633,600 in 1965 the fees collected grew to \$4,846,000 in 1968 and the Bureau of Outdoor Recreation estimated a total of \$5,200,000 for 1969. These figures would seem to prove the program is booming and should be expanded, not buried.

The land and water conservation fund derives revenue from admission and user fees at Federal recreation areas, net pro-

ceeds from the sale of Federal surplus real and related property, and existing Federal taxes on motorboat fuels. About 60 percent of annual appropriations from the fund are normally available to the States. In its first 3 years, \$160.5 million was allocated to match State funds to help finance such diverse projects as multipurpose metropolitan parks, snow ski areas, campgrounds, urban playgrounds, golf courses, swimming pools, and bicycling paths. The program extends to the 50 States, Puerto Rico, the District of Columbia, Guam, American Samoa, and the Virgin Islands. Money from the fund also supports Federal acquisition of authorized areas within the national park, national forest, and wildlife refuge systems.

Mr. President, my bill was prompted by the wishes of many of my constituents who have been using the passport at national parks, forests, and reservoirs. Many of them are retired and enjoy the opportunity to travel and visit our natural wonders. The annual fee permit has allowed them to visit our national parks and forests at a great reduction in cost. In Utah, where more than 70 percent of the land is federally owned, many of our citizens are ardent outdoorsmen, whose main recreation is obtained in federally operated recreation areas. The Golden Eagle permit was literally an annual passport to all of these areas. Many of my constituents have told me that even if the price had to be increased, it would still be a bargain. They feel and I agree its charge is reasonable and the funds are to be used for a good purpose.

Recognizing, however, the increases in costs and inflation I have recommended that the individual passport cost be increased from \$7 to \$10 a year. This is only a recommendation to the committee which may want to review the entire financial structure of the program when it gets to the hearing stage. I still think it would be a big bargain at double the cost.

I hope the Golden Eagle passport can be retained so that all our citizens may continue to enjoy the parks, the forests, and the deserts of our beautiful land.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2197), to establish fee programs for entrance to and use of areas administered for outdoor recreation and related purposes by the Secretary of the Interior and the Secretary of Agriculture, and for other purposes, introduced by Mr. BENNETT, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTION

Mr. SCHWEIKER. Mr. President, in behalf of the Senator from South Dakota (Mr. MUNDT), I ask unanimous consent that, at its next printing, the name of the Senator from Alaska (Mr. GRAVEL) be added as a cosponsor of the bill (S. 1826), to increase the domestic production of gold to meet the needs of national defense and preserve the gold

mining industry of the United States, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that, at their next printing, the names of the Senator from Nevada (Mr. CANNON) and the Senator from Florida (Mr. GURNEY) be added as cosponsors of the bill (S. 2073) to prohibit the use of interstate facilities, including the mails, for the transportation of certain materials to minors; and the bill (S. 2074) to prohibit the use of interstate facilities including the mails for the transportation of salacious advertising.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that, at its next printing, the names of the Senator from New Mexico (Mr. MONTROYA) and the Senator from Minnesota (Mr. MONDALE) be added as cosponsors of the bill (S. 2079) to provide for an annual conference between representatives of the beet industry, the Secretary of Agriculture, and representatives of other departments and agencies of the Federal Government to consider problems relating to the export of beef and beef products from the United States and related international trade problems, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I ask unanimous consent that, at its next printing, the name of the Senator from New Jersey (Mr. WILLIAMS) be added as a cosponsor of the bill (S. 2165), to enable citizens of the United States to change their residence to vote in presidential elections, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, in behalf of the Senator from Alaska (Mr. GRAVEL), I ask unanimous consent that, at its next printing, the name of the Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor of the joint resolution (S.J. Res. 108), to provide for a study and evaluation of the relationship between underground nuclear detonations and seismic disturbances.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE OF HEARING

Mr. HART. Mr. President, I wish to announce that the Subcommittee on Antitrust and Monopoly has scheduled hearings for June 12 and 13 on S. 1520, a bill to give certain newspaper arrangements exemptions from the antitrust laws.

Anyone interested in testifying should contact the subcommittee.

NOTICE OF HEARINGS ON MEASURES TO COMBAT ORGANIZED CRIME

Mr. McCLELLAN. Mr. President, I should like to announce that the Special Subcommittee on Criminal Laws and

Procedures will resume hearings on bills relating to the Federal effort against organized crime. In our first series of hearings in March we heard testimony on the bills S. 30, S. 974, S. 975, and S. 976. We will hear further testimony on these proposals and in addition will include the bills S. 1623, S. 1624, S. 1861, S. 2022, and S. 2122, all relating to organized crime activities, and S. 1929, making an offense under chapter 13 of title 18, United States Code, the intentional prevention, obstruction or interference with the administration of any federally assisted educational institution. The hearings will resume on June 3 and continue on June 4, beginning each day at 10 a.m. in room 2228, New Senate Office Building. Should anyone wish further information on the hearings, please contact the subcommittee staff on extension 3281 in room 2204, New Senate Office Building.

NOTICE OF HEARING ON S. 981

Mr. TYDINGS. Mr. President, as chairman of the Judiciary Committee's Subcommittee on Improvements in Judicial Machinery, I wish to announce a hearing for the consideration of S. 981, a bill to provide that the U.S. District Court for the District of Maryland shall sit at one additional place.

The hearing will be held at 10 a.m. on Wednesday, May 28, 1969, in the County Service Building in Hyattsville, Md.

Any person who wishes to testify or submit a statement for inclusion in the record should communicate as soon as possible with the Subcommittee on Improvements in Judicial Machinery, room 6306, New Senate Office Building.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

ORDER OF BUSINESS

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Pursuant to the previous order, the Chair now recognizes the Senator from Illinois (Mr. PERCY) for a period not to exceed 40 minutes.

S. 2192—INTRODUCTION OF A BILL TO PROVIDE AN INCENTIVE FOR PRIVATE EMPLOYERS TO EMPLOY AND TRAIN UNSKILLED INDIVIDUALS

Mr. PERCY. Mr. President, I am introducing today a bill proposing that this Nation take all necessary steps to guarantee a job for every American that is

able and wants to work, and that we do so as a matter of national policy and establish it as a national goal.

We have heard speech after speech about housing, education, health, and other cultural and economic problems that face the poor, so that we are all aware of the cycle of poverty which afflicts so many of our citizens today. But the cycle of poverty is so complex that we find it difficult to learn where the cycle begins, so that we can know how to begin to attack it. However, there are some things which we do know about poverty. We do know that the cause of poverty is more than economic; it is also psychological. You can give a man a minimum annual income, and he may no longer be economically poor, but psychologically he is probably poorer than ever before.

If we are waging a war on poverty, jobs must be a major weapon. A job represents an entry into the economic and social life of American society. Recognizing the importance of employment in our society today, I would like to state the case for a new Federal manpower policy for the seventies.

In the Employment Act of 1946, the Congress declared it to be our Nation's policy:

That it is the responsibility of the Federal Government to use all practicable means, with the assistance and cooperation of industry, agriculture, labor, and State and local governments to create conditions under which there will be afforded useful employment opportunities for those able, willing, and seeking work.

I believe that after 23 years it is time to stop paying lip service to this goal and begin to assure that full employment be made a reality. To guarantee a job for everyone who is willing and able to work seemed some years ago to be a radical position. However, as we have come to understand more about the nature of employment and unemployment, most Americans have changed their point of view on this subject. The Gallup poll in January of this year showed that 70 percent of all Americans agree that a plan should be adopted to guarantee work so that each family that has an employable wage earner would be guaranteed enough work to give him a wage of about \$60 a week—or \$3,200 a year. Now that public opinion is strongly in favor of a guaranteed annual work plan, it is up to the Congress to devise the mechanisms whereby such a program could work efficiently and effectively.

But, first, we must look to the labor market and understand the forces at work there. Last year there were 79 million people in our civilian labor force. It is anticipated that this figure will grow to 100 million by 1980. Although we still suffer from unemployment in this country, we all know that there are many hundreds of thousands of jobs which go unfilled each year, because people with the necessary skills are not available at the particular time and place where the jobs are.

With the total available knowledge doubling almost every decade, we may anticipate technological change in the

1970's which will demand vastly different skills than those required today. We see, therefore, that in the decade ahead we will not only have to upgrade the skills of several million unemployed and underemployed persons, provide responsive training for the 20 million new entrants into the job market, but also be prepared to meet the need for vastly changed skill requirements in our total population.

In other words, we have an immense job ahead of us, and we must plan now if we are to have any hope for success. Since 1962, our Federal expenditures for manpower programs have grown from less than \$500 million to an estimated \$3 billion for fiscal 1970. These efforts, although productive, are clearly inadequate to meet the needs of the decade ahead.

But, even more important than additional sums of money, is the need to revise the manpower program delivery system itself. In the past, manpower programs have been categorical in nature, with the Federal Government making a judgment as to how much money should be spent in each community on each kind of service. Not only have the decisions as to how much money is needed for each program been made in Washington, but, more importantly, the delivery of these services has, in most part, been carried out by Federal agencies. There is a great need for more flexibility in our manpower efforts than we have had in the past. Secretary Shultz is reorganizing the manpower programs of the Federal Government. I commend him for this effort, and I look forward to working with him in the attempt to make these programs more relevant to local problems and more responsive to local needs.

While it is easy to agree that additional sums of money and new organization are needed to improve our manpower programs, it is not so easy to devise the system whereby this can all come about. Government and business must together accept responsibility to provide all Americans with the opportunity to earn an adequate income. Private industry must increase its efforts to recruit, train, and hire the underemployed and unemployed. And when the private sector is unable to provide employment, I believe the Government must assume this responsibility. Too often in the past the Government has met this responsibility in the form of welfare payments instead of jobs. This has been the easy way out—a way for middle-class America to “buy off” its conscience. Instead of finding ways and means to draw the poor back into society, through useful employment, we have forced them to accept public charity. This has made them feel worthless and after a number of years many began to believe it themselves and were indeed “worthless” for having been outside society for so long.

The premise on which I base my proposals is that the Federal Government should accept as its primary responsibility the establishment of a manpower program which permits individual workers and individual businessmen the widest variety of alternatives to solve their mutual problems.

This can be done with a four-pronged approach which would contain the following elements:

First. Tax incentives to encourage the fullest participation of the private sector in employment, upgrading, and training of less skilled people.

By recommending a tax incentive program for the private sector, I do not mean to suggest that the current efforts of the National Alliance of Businessmen have not been productive. Indeed they have been. Well over 100,000 disadvantaged people have already been given job opportunities through this program. Through the JOBS program the private sector of our society has demonstrated in a most dramatic way its willingness to meet head on some of the most difficult social problems plaguing our society. The process of signing individual contracts with each corporation, to hire and train the disadvantaged, however, is of necessity a cumbersome one. And of great concern to me is the fact that many smaller companies, because of their size, are, as a practical matter, excluded.

It must be recognized that working out a fair tax incentive formula is not an easy one. A tax incentive program should not be a giveaway gimmick for industry, but rather one which makes it economically possible for American business to play an important role in our manpower program.

I am today introducing legislation which would provide a tax credit to employers for the difference between what a new employee is worth in productivity and the regular wage of comparable positions in the company. The advantages to a tax credit approach are numerous. The most important, however, is that the program can go into effect immediately upon enactment. Employment programs in the past have taken months and years to become operative. While I believe that the other existing training programs do have merit, I feel that we now need an emergency program which can immediately assist in finding jobs in the private sector for the hard-core unemployed. Employers who participate in the program will receive a tax credit of 75 percent of the wages paid to the employee for the first 4 months of employment, 50 percent for the next 4 months, and 25 percent for the balance of the individual's first year of employment. This is an uncomplicated program with the minimum of redtape. Any employer who hires a certified employee is eligible for the tax credit—it is as simple as that. This bill would require no Federal appropriations. The Department of Labor would be required to make its provisions known to the unemployed and potential employers in the business community. Small business is favored by placing a limitation on the total amount of tax credits any one employer can receive.

The public is protected in that the tax credit will not be available to the corporation unless the employee remains until the end of each 4-month period.

I understand the objections that are at times put forward to the use of the tax system for social purposes. However, I think it is time we realized that in order to encourage business to participate in programs of this nature, Government must be willing to meet business halfway. The most convenient form for subsidizing a businessman is through his income tax.

In order to meet the argument that a tax-credit approach is open-ended and therefore economically irresponsible, I have placed a limitation on the number of certificates which can be issued. The Employment Incentive Act is envisioned as a 3-year emergency experimental program. Under this bill 100,000 employee certificates would be issued during the first year, 200,000 more in the second year, and an additional 200,000 during the third year. The bill, therefore, provides for the hiring and training of 500,000 underemployed and unemployed persons over a 3-year period.

My communication with the business community has indicated that of the many problems facing businessmen today, one of the most serious is the shortage of skilled, dependable workers. This bill provides a simple, yet effective technique to provide new jobs and training for those whose need is the greatest. It enlists the job-creating potential of private enterprise by realistically recognizing the high initial costs involved in hiring, training, and providing supportive services for low-skilled individuals.

Second. A program of training credits should be considered which would allow individuals to obtain whatever training they need to obtain employment. This concept is similar to that contained in the GI bill of rights wherein eligible individuals can obtain, as a matter of right, education, and training they need to equip them for the world of work.

Fully developing the skills of our population is perhaps the most effective way to reduce unemployment without causing inflation. Expansive monetary and fiscal policies lead to inflation once the economy reaches its high employment potential. But upgrading the skills of the work force is a major governmental effort that we can take without pushing the cost of living to new highs.

In fiscal year 1968, 265,000 individuals were enrolled in institutional and on-the-job training programs financed under the Manpower Development and Training Act. An additional 53,000 individuals were enrolled in concentrated employment program projects during the year. Although these figures are impressive, it is clear that the number of unemployed and underemployed people enrolled in these training efforts is but a small fraction of the total. Also, in many instances those who did receive training were obliged to enroll in courses where there happened to be openings rather than choosing the course in which they had the greatest interest and aptitude. A training credit plan, patterned after the GI bill of rights, will permit low-skilled people who wish to upgrade themselves a chance to do so without waiting in line for a bureaucratic structure to find a training slot for them.

Third. We also need a Comprehensive Manpower Service Act which would permit a local community to provide services specifically geared to the employment needs of the population of the area. Matching people to jobs involves a vast array of considerations, such as relocation allowances, transportation, housing, and health services and child care. A program which recognizes that these serv-

ices are important components of an employment program is vital to success.

Fourth. However, even with all the existing programs and the new ones I have mentioned, we must realize that for some people and in some areas, even with training, there is no work available. With the emphasis we have placed on employment training programs in recent years, there has been a tendency to ignore the fact that lack of training is only one of the reasons why some individuals find it hard to locate a job.

Most frequently in the South and Appalachia there are not enough jobs in the private sector to provide work for all those in the labor market. Over the past several decades, as technology has eliminated jobs in agriculture, there has been a vast migration of people to urban centers. During the same time, much of the industrial expansion has taken place outside of these centers and has not been available as a source of work to the millions who moved in the hopes of finding employment.

However, in virtually every community in our Nation today—whether large or small—there is a great need for additional workers for various public service jobs. Millions of individuals could productively be employed in hospitals, schools, recreation facilities, and a host of other public-service endeavors.

I believe that we must guarantee a job for every American who is willing to work. And to assure such a guarantee we should provide the same opportunity to public and nonprofit service organizations that we are now currently providing in the NAB program. There are several ways such a program could operate. One might be to provide a wage subsidy to public and nonprofit groups so that they can afford to hire the individuals they so desperately need. We could also establish a public sector JOBS program. If the Federal Government is able to pay the additional expenses for Ford or GM when they hire the hard-core unemployed, there is no reason why they could not provide the same assistance for training of the unemployed in hospitals and schools. A tax credit approach might also be tried by providing a tax credit for salaries to people who work in the public sector. In other words, while a hospital worker or an education assistant might earn less than a comparable private sector employee, he would be eligible for a tax credit for a percentage of his salary which would make up the difference of his income.

I do not pretend to have all the answers as to how such a public sector program might best operate. A public sector program would enable us to guarantee a job to everyone who is willing to work, and I believe that the goal is important enough that we should direct all our energies toward finding the mechanism whereby this can be done. Public service jobs should have meaning, however, both to the individual employee and to society. The services of all our citizens in productive work are too badly needed for us to create vast numbers of publicly subsidized jobs just to give people something to do.

These, then, are my thoughts on the direction we should be moving in the

1970's to train our citizens for the jobs which must be done to keep our economy healthy and our society progressive. It is my hope that these suggestions, along with all others, will be part of a new national focus on the manpower needs of our Nation.

Mr. President, I ask unanimous consent to have the text of the bill printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the text of the bill will be printed in the RECORD.

The bill (S. 2192), to provide an incentive for private employers to employ and train unskilled individuals certified by the Secretary of Labor by allowing an income tax credit for wages paid to such individuals, introduced by Mr. PERCY, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

S. 2192

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Employment Incentive Act of 1969".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to increase employment opportunities for individuals whose lack of skills and education acts as a barrier to employment at or above the minimum wage.

TITLE I—CERTIFICATION OF EMPLOYEES AND EMPLOYERS

DEFINITIONS

SEC. 101. For purposes of this title—

(a) The term "Secretary" means the Secretary of Labor.

(b) The term "certified individual" means an individual who holds an unexpired and unrevoked certificate issued to him under section 102.

(c) The term "certified employer" means an employer who holds an unrevoked certificate issued to him under section 103.

(d) The term "minimum wage" means, with respect to any certified individual or certified employer, the higher of—

(1) the minimum wage prescribed by the Fair Labor Standards Act of 1938 (whether or not such minimum wage otherwise applies), or

(2) the wage customarily paid by the employer to his employees for the services performed, or to be performed by the individual.

(e) The term "subpart C" means subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (as added by title II of this Act).

CERTIFICATION OF INDIVIDUALS

SEC. 102. (a) In order to implement subpart C, the Secretary shall, during the three-year period beginning on the effective date of this title, issue certificates to individuals whose employment by a certified employer entitles such employer to a tax credit under such subpart with respect to wages paid to such individuals.

(b) An individual shall be eligible to be issued a certificate under this section if—

(1) his skill, training, education, or job experience is below that required for employment at or above the minimum wage;

(2) if unemployed, he has sought but has not been able to obtain employment at or above the minimum wage for a period of not less than five weeks; and

(3) he meets such other criteria as the Secretary may prescribe as necessary to carry out the purpose of this Act.

(c) Upon application made therefor, the Secretary shall issue a certificate to an indi-

vidual who is eligible therefor under subsection (b), except that the Secretary shall not issue more than—

(1) One hundred thousand certificates during the first twelve-month period after the effective date of this title;

(2) Two hundred thousand certificates during the second twelve-month period after such effective date; and

(3) Two hundred thousand certificates during the third twelve-month period after such effective date.

(d) Each certificate issued under this section shall expire at the end of three years after the date of issuance. For purposes of subpart C, the certificate issued to a certified individual shall, unless sooner revoked under subsection (e), be effective with respect to periods of employment not exceeding twelve months during such three-year period.

(e) The Secretary shall revoke a certificate issued under this section if he finds that the individual to whom such certificate was issued—

(1) was not, at the time of issuance, eligible under subsection (b); or

(2) accepted employment with a certified employer and voluntarily terminated such employment.

For purposes of subpart C, any such revocation shall be effective only for periods after the date on which the Secretary issues such revocation.

(f) An individual shall be eligible to be issued only one certificate under this section. If an individual's certificate is revoked under subsection (e), the Secretary may, in his discretion, reissue such certificate to such individual for the remainder of the period for which the certificate was originally issued.

CERTIFICATION OF EMPLOYERS

SEC. 103. (a) In order to implement subpart C, the Secretary shall issue certificates to employers who will be entitled to the tax credit under such subpart with respect to wages paid to certified individuals employed by him.

(b) Any employer shall be eligible to be issued a certificate under this section if he establishes to the satisfaction of the Secretary that—

(1) his employment of certified individuals will not have the effect of impairing or depressing the wages, working standards, or opportunities for full employment of his present employees;

(2) his business is not affected by any abnormal labor condition, such as a strike, lockout, or similar condition;

(3) he will afford each certified individual employed by him equal opportunity for full-time employment at or above the minimum wage, and will provide fringe benefits comparable to those provided for noncertified employees, not only during the effective period of such individual's certificate for purposes of subpart C but also after the expiration of such period;

(4) he has a formal or on-the-job training program which will upgrade the skills and enhance the productivity of certified individuals employed by him; and

(5) he will not discriminate on account of race, color, religion, or national origin in the employment of certified individuals.

(c) Upon application made therefor, the Secretary shall issue a certificate to an employer who is eligible therefor under subsection (b).

(d) Each certificate issued under this section shall be effective, for purposes of subpart C, for periods on and after the date on which application is made under subsection (c), or, if later, the date on which the Secretary determines that the employer first fulfills all the requirements for eligibility specified in subsection (b).

(e) The Secretary may revoke a certificate issued under this section to any employer if he finds that such employer no longer fulfills the requirements specified in subsection

(b). For purposes of subpart C, any such revocation shall be effective only for periods after the date on which the Secretary issues such revocation.

ADMINISTRATION

Sec. 104. (a) The Secretary shall administer the provisions of sections 102 and 103 through such offices and divisions of the Department of Labor as he determines desirable.

(b) The Secretary shall, from time to time, transmit to the Secretary of the Treasury or his delegate a list of certified individuals and certified employers and such other information as the Secretary of the Treasury or his delegate may request for purposes of administering subpart C.

(c) The Secretary may prescribe such rules and regulations as he determines necessary for the purposes of this title.

REPORT TO CONGRESS

Sec. 105. On or before October 1, 1970, October 1, 1971, and October 1, 1972, the Secretary shall submit a report to the Senate and the House of Representatives with respect to the performance of his functions and duties under this title. Each such report shall contain an evaluation of the effectiveness of the provisions of this Act in achieving the purpose set forth in section 2 and shall include data and information on (1) the number of individuals and employers to whom certificates have been issued under this title, (2) the number of certified individuals who have obtained employment with certified employers and the employment experience of such individuals both during and after the period of their certification, and (3) the response of employers under this title. Each such report may also contain such recommendations for further legislation as the Secretary deems advisable.

EFFECTIVE DATE

Sec. 106. The provisions of this title shall take effect on the first day of the first month which begins more than sixty days after the date of the enactment of this Act, except that the provisions of section 104 shall take effect on such date of enactment.

TITLE II—AMENDMENTS TO INTERNAL REVENUE CODE

ALLOWANCE OF TAX CREDIT

Sec. 201. (a) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by renumbering section 40 as section 41, and by inserting after section 39 the following new section:

"SEC. 40. WAGES OF CERTIFIED EMPLOYEES.

"(a) GENERAL RULE.—There shall be allowed to a certified employer, as a credit against the tax imposed by this chapter, the amount determined under subpart C of this part.

"(b) REGULATIONS.—The Secretary or his delegate shall prescribe such regulations as may be necessary to carry out the purposes of this section and subpart C."

(b) Part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by adding at the end thereof the following new subpart:

"Subpart C—Rules for Computing Credit for Wages of Certified Employees

"Sec. 51. Amount of credit.

"Sec. 52. Definitions; special rules.

"Sec. 51. AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—

"(1) GENERAL RULE.—The amount of the credit allowed to a certified employer by section 40 for the taxable year shall be equal to the sum of—

"(A) 75 percent of the qualified wages paid to, or with respect to, each certified employee for services performed during the first four months of employment of each such employee;

"(B) 50 percent of the qualified wages paid

to, or with respect to, each certified employee for services performed during the second four months of employment of each such employee; and

"(C) 25 percent of the qualified wages paid to, or with respect to, each certified employee for services performed during the balance of the individual's first year of employment of each such employee.

"(2) LIMITATION BASED ON AMOUNT OF TAX.—Notwithstanding paragraph (1), the credit allowed by section 40 for the taxable year shall not exceed—

"(A) so much of the liability for tax for the taxable year as does not exceed \$25,000, plus

"(B) 50 percent of so much of the liability for tax for the taxable year as exceeds \$25,000.

"(3) LIABILITY FOR TAX.—For purposes of paragraph (2), the liability for tax for the taxable year shall be the tax imposed by this chapter for such year, reduced by the sum of the credits allowable under—

"(A) section 33 (relating to foreign tax credit),

"(B) section 35 (relating to partially tax exempt interest),

"(C) section 37 (relating to retirement income), and

"(D) section 38 (relating to investment in certain depreciable property).

For purposes of this paragraph, any tax imposed for the taxable year by section 531 (relating to accumulated earnings tax), section 541 (relating to personal holding company tax), or section 1378 (relating to tax on certain capital gains of subchapter S corporations), and any additional tax imposed for the taxable year by section 1351(d)(1) (relating to recoveries of foreign expropriation losses), shall not be considered tax imposed by this chapter for such year.

"(4) MARRIED INDIVIDUALS.—In the case of a husband or wife who files a separate return, the amount specified under subparagraphs (A) and (B) of paragraph (2) shall be \$12,500 in lieu of \$25,000. This paragraph shall not apply if the spouse of the taxpayer has no paid qualified wages for, and has no unused credit carryback or carryover to, the taxable year of such spouse which ends within or with the taxpayer's taxable year.

"(5) AFFILIATED GROUPS.—In the case of an affiliated group, the \$25,000 amount specified under subparagraphs (A) and (B) of paragraph (2) shall be reduced for each member of the group by apportioning \$25,000 among the members of such group in such manner as the Secretary or his delegate shall by regulations prescribe. For purposes of the preceding sentence, the term 'affiliated group' has the meaning assigned to such term by section 1504(a), except that all corporations shall be treated as includible corporations (without any exclusion under section 1504(b)).

"(b) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(1) ALLOWANCE OF CREDIT.—If the amount of the credit determined under subsection (a) (1) for any taxable year exceeds the limitation provided by subsection (a) (2) for such taxable year (hereinafter in this subsection referred to as 'unused credit year'), such excess shall be—

"(A) a certified employee wage credit carryback to each of the three taxable years preceding the unused credit year, and

"(B) a certified employee wage credit carryover to each of the seven taxable years following the unused credit year.

and shall be added to the amount allowable as a credit by section 40 of such years, except that such excess may be a carryback only to a taxable year ending after the date of the enactment of the Private Enterprise Employment Incentive Act of 1968. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the ten taxable years to which (by reason of subparagraphs (A) and (B)) such credit may be carried, and then to each of

the other nine taxable years to the extent that, because of the limitation contained in paragraph (2), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(2) LIMITATION.—The amount of the unused credit which may be added under paragraph (1) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by subsection (a) (2) for such taxable year exceeds the sum of—

"(A) the credit allowable under subsection (a) (1) for such taxable year, and

"(B) the amounts which, by reason of this subsection, are added to the amount allowable for such taxable year and attributable to taxable years preceding the unused credit year.

"SEC. 52. DEFINITIONS; SPECIAL RULES.

"(a) CERTIFIED EMPLOYER.—For purposes of this subpart, the term 'certified employer' means an employer to whom a certificate has been issued by the Secretary of Labor under section 103 of the Private Enterprise Employment Incentive Act of 1968, but only with respect to periods for which such certificate is effective for purposes of this subpart as prescribed in such section.

"(b) CERTIFIED EMPLOYEE.—For purposes of this subpart, the term 'certified employee' means an individual to whom a certificate has been issued by the Secretary of Labor under section 102 of the Private Enterprise Employment Incentive Act of 1968, but only with respect to periods for which such certificate is effective for purposes of this subpart as prescribed in such section.

"(c) QUALIFIED WAGES.—For purposes of this subpart, the term 'qualified wages' means—

"(1) the compensation paid to an employee for services rendered by him while he is a certified employee, and

"(2) the cost of benefits provided for an employee while he is a certified employee which is paid or incurred by the employer by reason of the employment relationship,

but only if the compensation described in paragraph (1) equals or exceeds the minimum wage (as defined in section 102(d) of the Private Enterprise Employment Incentive Act of 1968) applicable to such employee. Upon request of the Secretary or his delegate, the Secretary of Labor shall determine whether the compensation paid to any certified employee for any period equals or exceeds the minimum wage applicable to such employee.

"(d) LIMITATION ON NUMBER OF CERTIFIED EMPLOYEES.—For purposes of this subpart, the number of certified employees of any certified employer which may be taken into account for any pay period shall not exceed—

"(1) in the case of an employer of ten or less employees, 50 percent of the total number of employees,

"(2) in the case of an employer of more than ten but less than one hundred and one employees, 25 percent of the total number of employees, and

"(3) in the case of an employer of one hundred and one or more employees, 15 percent of the total number of employees.

"(e) EARLY TERMINATION OF EMPLOYMENT.—For purposes of this subpart, the qualified wages paid to, or with respect to, a certified employee—

"(1) during the first four months of his employment, shall not be taken into account if he ceases to be an employee of the taxpayer before the end of such four-month period,

"(2) during the second four months of his employment, if he ceases to be an employee of the taxpayer before the end of such four-month period, and

"(3) during the third four months of his employment, if he ceases to be an employee of the taxpayer before the end of such four-month period.

The preceding sentence shall not apply with respect to a certified employee who ceases to be an employee of the taxpayer because of death or disability.

"(f) **SUBCHAPTER S CORPORATIONS.**—In case of an electing small business corporation (as defined in section 1371)—

"(1) the qualified wages for each taxable year shall be apportioned pro rata among the persons who are shareholders of such corporation on the last day of such taxable year, and

"(2) any person to whom any qualified wages have been apportioned under paragraph (1) shall be treated (for purposes of this subpart) as the taxpayer and the certified employer with respect to such wages.

"(g) **ESTATES AND TRUSTS.**—In the case of an estate or trust—

"(1) the qualified wages for any taxable year shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each,

"(2) any beneficiary to whom any qualified wages have been apportioned under paragraph (1) shall be treated (for purposes of this subpart) as the taxpayer and the qualified employer with respect to such wages, and

"(3) the \$25,000 amount specified under subparagraphs (A) and (B) of section 51(a) (2) applicable to such estate or trust shall be reduced to an amount which bears the same ratio to \$25,000 as the amount of the qualified wages allocated to the trust under paragraph (1) bears to the entire amount of the qualified wages.

"(h) **LIMITATIONS WITH RESPECT TO CERTAIN PERSONS.**—In the case of—

"(1) an organization to which section 593 applies,

"(2) a regulated investment company or a real estate investment trust subject to taxation under subchapter M (section 851 and following), and

"(3) a cooperative organization described in section 1381(a),

rules similar to the rules provided in section 46(d) shall apply under regulations prescribed by the Secretary or his delegate.

"(i) **REGULATIONS.**—The Secretary of the Treasury or his delegate shall prescribe such regulations as may be necessary to carry out the purposes of this subpart."

TECHNICAL AND CLERICAL AMENDMENTS

SEC. 202. (a) The table of sections for subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 40. Wages of certified employees.

"Sec. 41. Overpayments of tax."

(b) The table of subparts for part IV of subchapter A of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Subpart C—Rules for Computing Credit for Wages of Certified Employees

(c) Section 381(c) of such Code (relating to items taken into account in certain corporate acquisitions) is amended by adding at the end thereof the following new paragraph:

"(24) **CREDIT UNDER SECTION 40 FOR WAGES OF CERTIFIED EMPLOYEES.**—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 40, and under such regulations as may be prescribed by the Secretary or his delegate) the items required to be taken into account for purposes of section 40 in respect to the distributor or transferor corporation."

EFFECTIVE DATE

SEC. 203. The amendments made by this title shall apply to taxable years ending after the date of the enactment of this Act.

Mr. PERCY. Mr. President, I ask unanimous consent to have printed at

this point in the RECORD a statement by the Senator from New York (Mr. JAVITS), which he is unable to deliver because at this time he is in his home State.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR JAVITS

In stating so clearly the case for a new federal manpower policy for the 1970's Senator Percy has redirected our attention—and I hope our energies—from the important single questions concerning particular training programs to the necessary overview of our manpower policies.

We have promises to keep: The promise that employment provides a vehicle in which the nation's disadvantaged can drive away from poverty. And a promise that the way to deliver upon that pledge lies through involvement of the private sector, as well as additional commitments from the public sector. Programs such as JOBS (Jobs in the Business Sector) program have taken us successfully down one road that runs through the private sector, and the Administration's willingness to find a home for additional resources in that program is a welcome sign. However, as Senator Percy has pointed out, there are many other avenues running through the private sector that must be explored if we are to meet the nation's manpower needs. The legislation which he has introduced today to provide a tax credit to employers is a welcome initiative, adding to previous efforts undertaken by the Republican members of the Senate and House. Last year Senator Percy joined with Senator Prouty, myself and eight other Republican Senators in introducing the National Manpower Act of 1968, which combined a tax credit approach with a number of other provisions implementing the recommendations of the National Advisory Commission on Civil Disorders.

As we know, legislation for the purpose of expanding the opportunities in the public sector came within only five votes of passing the Senate in 1967. I am pleased that Senator Percy has called attention to this important aspect of our total manpower picture. A recent survey revealed that there are at least 140,000 public service job possibilities in 34 cities that could be filled by the hard-core unemployed or underemployed person. We need to do some new thinking—of the kind that Senator Percy has suggested—to formulate incentives for greater public sector opportunities.

The Administration has promised a comprehensive plan. As the President said in his message of February 19, 1969:

"One of the priority aims of the new Administration is the development by the Department of Labor of a comprehensive manpower program, designed to make centrally available to the unemployed and the underemployed a full range of Federal job training and placement services."

As that plan is presented and the approaches proposed by Senator Percy and others are reviewed, we must have firmly in mind the many questions that arise with respect to the relationship between new manpower programs and other state and federal efforts to combat poverty, as well as the relationship between components within the manpower program. We must view any new proposals in light of any reforms in our welfare system. And we must not forget that of our total manpower budget, only about one of every ten federal dollars is spent on programs operated by agencies of the federal government.

Almost a year ago, Dr. Ralph David Abernathy's poor people's campaign demanded the end of hunger in America. The Administration has made a substantial, if not complete, commitment of resources to that end. This year's poor people's campaign has re-

newed last year's request for a comprehensive jobs bill to provide three million new jobs in the private and public sectors. With the benefit of the President's implementation of his pledge and the initiatives such as those taken by Senator Percy and others, I trust that we will begin to translate the tenets of a free enterprise society into an opportunity for enterprise for all.

Mr. SCHWEIKER. Mr. President, will the Senator yield?

Mr. PERCY. I yield.

Mr. SCHWEIKER. Mr. President, I want to compliment the Senator from Illinois on his fine remarks. I should like to associate myself with his remarks and to compliment him for his fine work in this area. It is obviously a well-studied, well-reasoned, and logical approach, and I commend the Senator from Illinois for his fine talk.

Mr. PERCY. I thank the distinguished Senator from Pennsylvania.

Mr. President, I yield the floor.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider three nominations for the position of U.S. attorney, which were unanimously reported earlier today by the Committee on the Judiciary, and which have been cleared unanimously on both sides of the aisle.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeding to consider executive business.

U.S. ATTORNEYS

The bill clerk read the nomination of Richard K. Burke, of Arizona, to be U.S. attorney for the district of Arizona.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The bill clerk read the nomination of Richard L. Thornburgh, of Pennsylvania, to be U.S. attorney for the western district of Pennsylvania.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The bill clerk read the nomination of Stewart O. H. Jones, of Connecticut, to be U.S. attorney for the district of Connecticut.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. FANNIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENT'S VIETNAM ADDRESS

Mr. FANNIN. Mr. President, on Wednesday evening the President gave the Nation a realistic and comprehensive assessment of the picture in Southeast Asia. The speech is particularly significant because it is the first time a Chief Executive has summed up the options, the possible ramifications of future actions, and the candid possibilities for peace. This frank and genuine approach to the issue of Vietnam is totally refreshing.

The American people have had their hopes lifted so often before, only to be dashed upon the rocks of reality that I now think the President's speech of Wednesday evening will go a long way toward drawing the Nation back together again. We can move forward together in pursuit of an honorable and enduring peace for that troubled part of the world.

President Nixon made it inescapably plain in his calm and masterful presentation, that this war can be ended and shall be ended, but not by sacrificing honor upon the altar of expediency. I do not doubt that Communist military leaders all over the world understand that our President has a commitment to see that "American prestige" is no longer an empty phrase.

THE ABM SAFEGUARD SYSTEM

Mr. FANNIN. Mr. President, the paramount responsibility of the Federal Government is to provide for the common defense. Conscience demands that every Member of Congress, everyone who holds Federal office by election or by appointment, must share this awesome responsibility.

We, all of us, deplore war and desire peace. We long for a world in which all nations will have renounced forever the employment of military power against their neighbors.

We believe that all men were intended by their Creator to be free. Our hearts go out to the victims of aggression. War contradicts the humanity of man, brutalizes and disfigures society, violates the Commandments of God, and is indicted by history as the supreme author of misery and frustration.

Mr. President, I yield to no man in my desire for peace. There is no division in this House over that objective.

The American people long for an end to the conflict in Southeast Asia. The mothers and fathers of our sons who fight for us there endure the agony of uncertainty and pray for peace.

There is, Mr. President, in this body, indeed in the Nation, a wide division of opinion as to the propriety of our presence in Southeast Asia. That matter has been examined and debated in this body.

It is not my desire to contribute to that controversy. I mention that conflict only because I believe the passions aroused by Vietnam—our desire to bring an end to that conflict—may be responsible for our inability to unite in support of one aspect of our defense needs which I believe critical to the future of this Nation.

I refer to the proposal for the establishment and deployment of the antiballistic missile system the President of the United States has designated as Safeguard.

I have paid close attention to the opinions expressed by those who oppose and resist the effort to increase the defense capabilities of our Nation.

I have heard it said the ABM's will not work. Some say the ABM system is unnecessary. Others contend it will be too expensive. And finally, that somehow it is provocative.

Mr. President, the year before the Wright brothers successfully flew the first airplane a conference of the Nation's most distinguished scientists gathered in New York City declared solemnly that it would be impossible for a heavier-than-air machine ever to fly.

Reputable scientists opposed the development of the hydrogen bomb on the grounds that it would not work.

The achievements of our technological society in this century suggest that nothing is impossible. We have sent men to the moon and brought them home again.

No one can guarantee that every ABM installed will function precisely in the manner desired. But surely our experience of the past two decades supports the opinion of that segment of the scientific community which declares that the ABM will work.

The theoretical argument will continue, but can it stand in face of the fact that we have indisputable evidence that the Russians have already deployed such a protective system around some of their cities and some of their installations?

Mr. President, I hope and pray that the Safeguard system is unnecessary. I hope and pray that no nation will ever launch intercontinental ballistic missiles carrying atomic warheads against another nation. But considering the state of the world, can we declare there is no necessity to provide this instrument of defense for the American people?

Following World War I, we dismantled our defensive Military Establishment. We renounced war. We devoted all our energy and attention to peaceful pursuits. In December 1941, our fleet was attacked at Pearl Harbor.

Who can deny that the relative weakness of America's defense posture at that moment influenced the decision to attack us?

Until all men and all nations have renounced war, and accepted the rule of law, the defense capability of this Nation must never again be so weak as to permit another Pearl Harbor.

I agree with all of those critics who declare that our necessary expenditures for the national defense impose a great burden upon our economy.

I agree that the billions spent for armaments and armies might much better be employed to satisfy our social needs. We know that war is waste. There is a desperate need to devote more of

our resources to improving the life and the lot of our citizens at home.

But, Mr. President, I am compelled to ask: How long would a defenseless America remain a free America?

President Nixon's proposal calls for a much smaller expenditure than advocated by the previous administration. More than 2 years ago—on April 12, 1967—I spoke in this Chamber in support of President Johnson's proposal to employ an ABM defensive system. I believed then, as I believe now, that the first responsibility of a Member of this body is to make sure that America possesses the unquestioned ability to defend herself effectively against any attacker.

The Safeguard system is purely a defensive mechanism. The President intends to deploy it only in protection of those missile bases upon which we must depend for the power to retaliate against the surprise attack. The ABM's will never be fired unless another nation first attacks us.

Does any Member of this body believe that if the United States of America were to unilaterally abolish its Army and its Navy and destroy all the weapons we possess, world peace would automatically follow?

The lessons of history instruct us that when a nation is weak and incapable of responding to an attack the temptation becomes overwhelming to those men and nations committed to expanding their territory and their power.

The opponents of the ABM declare that to establish this defensive mechanism would provoke our enemies and inspire an escalation of the arms race. Does the installation of a burglar alarm provoke anyone other than a would-be burglar?

Mr. President, I am not one who believes that war is inevitable, or that this planet must ultimately destroy itself and its populations in an atomic holocaust. But commonsense compels me to resist the notion that the deployment of the ABM to enhance our defense capability will inspire some predatory nation to launch an attack against us.

Since the end of World War II the people of this Nation have given away more than \$100 billion as evidence of their earnest desire to build a peaceful world, and yet there has been no peace.

For almost 150 years the people of this Republic, protected by the vast oceans surrounding our continent, remained aloof from the quarrels of Europe and the rest of the world. We can no longer rely on the protection of those ocean barriers.

I renounce the notion that the conflicting ideologies which separate our world must inevitably identify certain nations as our enemies, or that there is no possibility of peaceful cooperation between the free world and the Communist world, or that we should not continue our effort to negotiate with the Communists and to achieve mutual understandings. But I say it is naive to ignore the realities.

Mao Tse-tung, the dictator ruler of Red China, believes that war between that nation and our Nation is inevitable. Should we refuse to listen to the words of his designated heir apparent, Lin Biao,

who has called upon the people of China to prepare themselves for an armed conflict with the capitalist free world?

We are reminded in the excellent report prepared for the National Strategy Committee of the American Security Council of the words of Leonid Brezhnev, first secretary of the Communist Party, who on March 29, 1966, told Congress of that party in the Soviet Union:

Ever harder times lie ahead for capitalism. The fact that it is doomed is becoming increasingly clear. But the capitalists will never surrender their rule voluntarily. The working classes and the laboring masses will achieve victory only in the course of stubborn class battles.

Mr. President, does anyone really believe that the shrimp have learned to whistle? Is there any evidence that the disciples of Marx and Lenin have renounced their ambition for world domination and are now willing to join us in our quest for world peace?

Are we to ignore the realities of North Korea and North Vietnam and the Middle East?

The newspaper headlines tell us, supported by a dispatch from the Associated Press on May 12, of the explosion of Soviet-built rockets in the slum districts of Saigon.

On March 16, 1969, there appeared an article in the official newspaper of the Soviet Armed Forces written by Major General Reznichenko, who said, and I quote:

With the appearance and introduction of nuclear weapons into the armed forces, a new stage began in the development of the theory of the military art. During the last ten to fifteen years our country has made a gigantic leap forward in this development. The armed forces have changed completely, thanks to the wise guidance of the CPSU and its central committee, and the successes of Soviet economics, science and technology. Our armed forces have been equipped with the necessary number of various kinds of nuclear weapons with first class delivery systems, and also with new kinds of weapons and equipment.

And the general continued:

Surprise is a very important principle in military art which determines whether victory is achieved during combat action. Surprise makes it possible to anticipate the enemy in delivery strikes, takes him unawares, paralyzes his will, sharply reduces his combat capability, disorganizes control, and creates favorable conditions for defeat of even superior forces.

There can be no question about one grim truth—the Soviets have passed us in the development and deployment of ICBM's.

The Soviets have developed and deployed an antiballistic missile system designed to defend their primary target areas from any attack.

The most authoritative information available to us suggests that although the gross national product of the United States runs almost twice that of the gross national product of the U.S.S.R., the Soviet is investing from two to three times as much in strategic military forces annually as we are.

On February 9 of this year, Secretary of Defense Melvin Laird told the American people, in an appearance on "Face the Nation," that the Soviets are presently spending \$3.70 on defensive nu-

clear weapons for every \$1 the United States is spending. And when this figure is converted in terms of gross national product it is apparent the Soviets are spending seven times more of their national product on defensive nuclear weapons than we are.

Let me recite another alarming statistic: the U.S.S.R. is investing from two to three times as much in strategic military forces annually as we are. And I would remind the Members of this body that strategic forces are dedicated to offense, not defense.

Mr. President, I have listened patiently to those who argue that the Russian people are no more anxious for war than are the people of the United States—that the people of Russia are supporting their military machine because they stand in deadly fear of an attack from the United States of America.

I truly believe the people of Russia share our desire for peace, but they are ruled by the hard-core Communist dictators who have deliberately spread the false propaganda that the United States intends to attack Russia. And I brand that charge and that claim as an outrageous falsehood.

I believe the Russian masters do have reason to fear the United States of America; not because of our military power; not because we would ever launch a military attack against the Soviet; not because we would ever try to impose our form of government on them; but rather because they recognize that their doctrine of slavery and domination is eternally threatened by the forces of freedom.

They know the United States of America will never initiate an atomic war, but they recognize that the superiority of the Western concept of man's place in creation denies the legitimacy of their military dictatorships.

Mr. President, confronted with the truth that the Communists inspired and supplied the armies of North Korea, that the Communists inspire and supply the armies of North Vietnam, that the Communists are contributing to the unrest in the Middle East, that the leaders of Red Russia and Red China have declared again and again and again that the capitalist world must be destroyed; how dare we hesitate to vote whatever is necessary in social and scientific resources to make the defense capability of the United States as nearly invulnerable as possible?

Mr. President, at the end of World War II we had the greatest military power ever assembled upon this earth. We were the sole possessors of the atomic secrets. Did we use that power to enforce our will upon the rest of the world? Did we extract tribute from our defeated enemies? Did we attempt to enlarge the dimensions of our territory?

Mr. President, who can deny that it was our rapidly reconstructed military strength, our possession of the atomic weapons, which has helped to prevent a third global conflict?

It is weakness that provokes aggression.

It is strength that restrains the aggressor.

It was the weakness of the people of Czechoslovakia, powerless to resist the

superior military might of Russia, which dictated the deplorable events of this year.

The junior Senator from the State of Washington reminds us it was the Soviets who acted first to develop long-range intercontinental surface-to-surface missiles.

The Soviets acted first to test fire an ABM against an incoming nuclear armed missile in 1962, and they are the only nation to have done this.

The Soviets acted first to develop and test a 60-megaton bomb, and they are the only nation to possess anything like that size bomb.

The Soviets acted first to develop and deploy a fractional orbital bombardment system—FOBS—a first-strike-oriented weapon, and they are the only nation to have developed or deployed such a system.

The Soviets acted first to deploy an ABM setup. They have been testing, improving, and updating that system ever since. Today there are over 60 antiballistic missiles deployed on launch pads.

When the Soviets invaded Czechoslovakia in August 1968, they violated 17 treaties—one of which was only 17 days old.

Mr. President, we cannot rely on treaties. We cannot put our trust in the belief that because war is wrong and wasteful, there will be no more wars.

Let us have done with wishful thinking.

Let us put aside the temptation to rationalize away the cruel realities of the world at this moment.

Let us hold forth the hand of friendship and help to all peoples of the world.

Let us continue to pursue the avenues of negotiation.

Let us attempt to persuade the other nations of the world that war is waste and war is folly.

When our nation was going through the agony of its birth, at a particular crucial moment in that conflict General Washington gave the order, "Put only Americans on guard tonight," he wanted to be sure of the loyalty of his watchmen.

Let us make certain that our capacity to defend these shores against any aggressor will be superior.

Let us make sure that our strength will stand as a positive deterrent to any reckless adventurer casting jealous eyes on this continent and its people.

Let us now take that positive action which will permit the historians of the future to declare that the Congress of the United States in the year 1969 so added to the defense capability of the United States of America as to preclude the possibility of any successful attack upon that nation—and thus, by taking the potential profit out of war, made peace more possible.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENT NIXON'S SPEECH ON VIETNAM

Mr. MANSFIELD. Mr. President, President Nixon's speech on Vietnam was comprehensive and flexible; it was candid but deliberate. It was a mixture of old conditions laid down by the previous administration with some new interpretations by the present administration and an infusion of the President's personal determination to try to bring the war to an end without a prolonged delay.

The two most significant items, I believe, were, first, its stress on self-determination for all the people of South Vietnam; and, second, the call for simultaneous withdrawal of all non-South Vietnamese military forces as soon as an agreement can be reached.

The latter point would appear to leave some room for practical maneuver. At the same time, the stress on self-determination, in my opinion, underscores the fact that a lasting settlement depends on all the people of South Vietnam, together, working out their future political structure.

The President indicated that the 10 points which were recently advanced by the National Liberation Front were already receiving the most serious and immediate attention of his administration. The outline of proposals in his speech is in the nature of a complement to these proposals. It may be that the two approaches, taken together, will form the basis for the beginning of serious negotiations. As I view them, both sets of proposals are open to a certain "give and take," and the combined initiatives, in my opinion, create an opening which could lead to a responsible solution.

It is late in the day, to be sure; the war has claimed too many lives and continues to claim them. The devastation of city and countryside remains unchecked. It is to be hoped, therefore, that the 10 points of the NLF and the eight points of President Nixon will now go before the Paris conferees without delay and receive the urgent and relentless attention of all concerned.

An aspect of the President's speech which seems to me highly significant was his personal determination to keep his pledge to end the war "in a way that would increase our chances to win true and lasting peace in Vietnam, in the Pacific, and in the world." After reaffirming that pledge the President made the following statement:

If I fail to do so, I expect the American people to hold me accountable for that failure.

There is no shirking the reality in that statement. There is no evasion of the grim burden of the Presidency. The President has his responsibilities; he has faced up to them, and has begun to act on them by counterposing his eight points to the 10-point proposal of the National Liberation Front.

The reaction, both from Hanoi and the NLF, has been negative, but only in a restricted sense. It has been focused primarily on the third point of the President's proposals; namely, the withdrawal of remaining U.S. and allied forces, as the remaining North Vietnamese forces return to the North.

The U.S. proposals bear President

Nixon's personal imprimatur. It is the first public statement of his administration which is of worldwide interest as well as of deep concern to the people of the United States. This statement raises a new hope for peace. On the basis of this approach, perhaps, some light may begin to show at the end of the tunnel. Perhaps, these two sets of proposals may lead to a responsible settlement and this barbaric, tragic, and brutal war can be brought to a close in a peace based on Vietnamese self-determination.

I ask unanimous consent to have printed in the RECORD, as a part of my remarks, a UPI news article setting forth the rival proposals of President Nixon and the Vietcong.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE RIVAL PROPOSALS

Here are the 10 points in the Vietcong peace proposal of May 8, and the 8 points offered by President Nixon last night:

NIXON

1. Withdrawal of all non-South Vietnamese forces from the South as soon as agreement can be reached.
2. Withdrawal of "major portions" of U.S. allied and other non-South Vietnamese forces over period of 12 months, after which the remaining troops would remain in non-combat base areas.
3. Withdrawal of remaining U.S. and allied forces as remaining North Vietnamese forces are returned to the North.
4. Creation of an international supervisory body by mutual agreement to oversee troop withdrawals.
5. The international body would arrange a supervised cease-fire in Vietnam.
6. The international body would hold elections.
7. Arrangements would be made as soon as possible for release of prisoners of war by both sides.
8. All parties would agree to observe the Geneva agreement of 1954 regarding South Vietnam and Cambodia, as well as the Laos accords of 1962.

VIETCONG

1. Respect for Vietnamese people's independence, sovereignty, unity and territorial integrity as recognized by Geneva agreement.
2. Unconditional withdrawal of all U.S. troops and bases from South Vietnam.
3. Self-determination by Vietnamese parties on nature of Vietnamese armed forces in South Vietnam.
4. Political self-determination for South Vietnam by South Vietnam, with free elections and a coalition government.
5. The interim coalition government would oversee withdrawal of allied troops, assure civil liberties and hold free elections.
6. South Vietnam will conduct its foreign policy based on peace and neutrality.
7. Reunification of Vietnam, North and South, without outside interference.
8. North and South Vietnam will join no military alliances, allow no foreign troops on their soil and refuse to recognize military protection from any military alliance or bloc.
9. Negotiated release of prisoners of war and agreement by the United States to bear responsibility for war destruction.
10. International supervision for the withdrawal of U.S. and allied troops.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll. Mr. BYRD of West Virginia. Mr. Pres-

ident, I ask unanimous consent that the order for the quorum call be rescinded. The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL TUESDAY, MAY 20, 1969

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order of Wednesday, May 14, 1969, that the Senate stand in adjournment until 12 o'clock noon on Tuesday next.

The motion was agreed to; and (at 2 o'clock and 40 minutes p.m.) the Senate adjourned until Tuesday, May 20, 1969, at 12 o'clock noon.

NOMINATIONS

Executive nominations received by the Senate May 16, 1969:

EXPORT-IMPORT BANK

John Conrad Clark, of North Carolina, to be a Member of the Board of Directors of the Export-Import Bank of the United States.

NATIONAL AERONAUTICS AND SPACE COUNCIL

William A. Anders, of California, to be Executive Secretary of the National Aeronautics and Space Council.

U.S. ATTORNEYS

John L. Bowers, Jr., of Tennessee, to be U.S. Attorney for the eastern district of Tennessee for the term of 4 years, vice John H. Reddy, retired.

William R. Burkett, of Oklahoma, to be U.S. Attorney for the western district of Oklahoma for the term of 4 years, vice B. Andrew Potter.

William L. Osteen, of North Carolina, to be U.S. Attorney for the middle district of North Carolina for the term of 4 years, vice William H. Murdock.

Otis L. Packwood, of Montana, to be U.S. attorney for the district of Montana for the term of 4 years, vice H. Moody Brickett, resigning.

George E. Woods, Jr., of Michigan, to be U.S. Attorney for the eastern district of Michigan for the term of 4 years, vice Lawrence Gubow, resigned.

Charles H. Anderson, of Tennessee, to be U.S. Attorney for the middle district of Tennessee for the term of 4 years, vice Gilbert S. Merritt, Jr., resigned.

U.S. MARSHALS

J. Pat Madrid, of Arizona, to be U.S. marshal for the district of Arizona for the term of 4 years, vice Roland S. Mosher.

John C. Meisner, of Illinois, to be U.S. marshal for the northern district of Illinois for the term of 4 years, vice Joseph N. Tierney, resigned.

Fred C. Sink, of North Carolina, to be U.S. marshal for the middle district of North Carolina for the term of 4 years, vice E. Herman Burrows.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 16, 1969:

DEPARTMENT OF JUSTICE

Ira De Ment, of Alabama to be U.S. attorney for the middle district of Alabama for the term of 4 years.

Stewart O. H. Jones, of Connecticut to be U.S. attorney for the district of Connecticut for the term of 4 years.

Richard K. Burke, of Arizona to be U.S. attorney for the district of Arizona for the term of 4 years.

Richard L. Thornburgh, of Pennsylvania to be U.S. attorney for the western district of Pennsylvania for the term of 4 years.

EXTENSIONS OF REMARKS

HIGH SCHOOL STUDENT POLL

HON. PAUL J. FANNIN

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

Friday, May 16, 1969

Mr. FANNIN. Mr. President, I was most interested recently in an opinion poll of high school students in the Tucson, Ariz., area conducted by the Tucson Daily Citizen.

Many say they are surprised by the actions of some of today's youth. I think that in reading this poll they will find some surprises and some definite reassurances that by and large today's students are a thoughtful majority who still believe in the principles upon which America was founded.

Mr. President, I ask unanimous consent that the poll be printed in the RECORD.

There being no objection, the poll was ordered to be printed in the RECORD, as follows:

TUCSON DAILY CITIZEN, HIGH SCHOOL OPINION POLL, SPRING 1969—FINAL SUMMARY

Ballots cast, 12,035.

1. Does Tucson offer the opportunity for you to live and work in the area after your schooling is completed?

	Number	Percent
Yes.....	5,128	43.15
No.....	5,423	45.63
No opinion.....	1,332	11.20

2. Do you feel that your parents—

	Number	Percent
Overdiscipline.....	2,179	18.35
Underdiscipline.....	843	7.10
Don't care.....	311	2.61
Are fair.....	8,540	71.92

3. In the Mideast crisis, the United States should support—

	Number	Percent
Arabs.....	263	2.21
Israel.....	2,640	22.18
Stay neutral.....	6,829	57.38
No opinion.....	2,168	18.21

4. For what would you rather have your tax money spent?

	Number	Percent
Education.....	4,425	37.46
Foreign aid.....	213	1.80
Military.....	964	8.16
Poverty.....	5,161	43.69
Space.....	1,048	8.87

5. For military forces the United States should rely on—

	Number	Percent
Lottery system.....	1,155	9.70
Present draft system.....	4,484	37.66
Volunteer system.....	4,744	39.84
No opinion.....	1,522	12.78

6. How should the president of the United States be elected?

	Number	Percent
Popular vote.....	7,634	64.14
Present electoral college.....	1,484	12.46
Revised electoral college.....	1,753	14.72
Don't know.....	1,031	8.66

7. Should we always defend our country even if its actions conflict with our own beliefs?

	Number	Percent
Yes.....	6,992	58.75
No.....	3,594	30.19
No opinion.....	1,315	11.04

8. At what school level should sex education begin?

	Number	Percent
Elementary.....	4,564	38.27
Junior high.....	5,019	42.09
High school.....	1,989	16.68
None.....	352	2.95

9. Are students justified in ditching school for mass protests or picketing?

	Number	Percent
Yes.....	3,464	29.04
No.....	7,090	59.43
No opinion.....	1,574	11.51

TUCSON DAILY CITIZEN, HIGH SCHOOL OPINION POLL, SPRING 1969—FINAL SUMMARY—Continued

* 10. Should Arizona school districts adopt a 12-month school year?

	Number	Percent
Yes.....	1,841	15.44
No.....	9,654	80.97
No opinion.....	427	3.58

11. Should black students be bused to predominantly white schools for the purpose of integration?

	Number	Percent
Yes.....	1,983	16.65
No.....	8,467	71.09
No opinion.....	1,459	12.25

12. Do you believe that riots, sit-ins, and picketing by college students have any positive results?

	Number	Percent
Yes.....	3,681	30.83
No.....	7,331	61.40
No opinion.....	926	7.75

13. Should capital punishment be abolished?

	Number	Percent
Yes.....	4,098	34.32
No.....	6,686	56.00
No opinion.....	1,154	9.66

14. Who should decide whether an abortion is justified?

	Number	Percent
Doctor.....	3,964	33.80
Clergy.....	408	3.47
Legislature.....	617	5.26
Persons concerned.....	6,736	57.44

15. Of five closest friends, how many have used illegal drugs or narcotics?

	Number	Percent
0.....	5,891	50.13
1.....	1,478	12.57
2.....	1,047	8.90
3.....	870	7.40
4.....	500	4.25
5.....	1,965	16.72

16. Where do you get most of your news of current affairs?

	Number	Percent
Newspapers.....	3,251	28.27
Radio.....	3,345	29.09
TV.....	3,859	33.56
Magazines.....	464	4.03
School current events.....	578	5.02

ECONOMIC INTERDEPENDENCE OF OREGON AND CALIFORNIA

HON. CRAIG HOSMER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HOSMER. Mr. Speaker, a member of the Oregon Water Resources Board was quoted recently as telling the Western Water Congress in Wenatchee, Wash., that Oregon will take a lot of convincing before agreeing to ship surplus Columbia River water to the Pacific Southwest. Well, I would advise the gentleman that he will find all the convincing material he needs in a report released last month by the Colorado River Association.

I am referring to the "Economic Interdependence of the Western States," otherwise known as the McCann report, and if that Oregon water official will take the time to read through its 43 pages of facts and data—compiled from official Federal and State agency records—he will quickly discover that his State enjoys an enormous trade in the seven Colorado River Basin States.

If he is suggesting that the Pacific Northwest hoard its surplus water at the risk of drying up a major market, then he is going to make an awful lot of

Oregon manufacturers, farmers, and businessmen very unhappy.

Perhaps only the water resource planners up there are not aware, as the news release accompanying the report points out:

The value of Oregon products shipped annually to the Pacific Southwest and the Rocky Mountain States tallies in many millions of dollars.

Aside from Washington, maybe, Oregon carries on the heaviest, most lucrative trade with the Colorado River Basin region than any of the Pacific Northwest States.

The extent of the southward stream of Oregon products—her lumber, her onions, her pears, her grains, her livestock—is really amazing. For instance, California alone buys some 2.1 billion board feet of Oregon lumber annually, or roughly one-fourth of the total shipments from Oregon mills.

But that generally is just the current picture and a pretty rosy one at that. However, think of what tomorrow could be like. Imagine for a moment the tremendous prosperity that would be visited upon the Oregon economy if her vast arid acres could be watered by the Northwest's surplus waters flowing south in an interbasin canal.

Blaine Shulz, of the Portland Oregonian, recognized north and south as one of the most objective water reporters in the West wrote only recently that—

Eastern Oregon could get cheap water for irrigation and a booming construction payroll if an overland canal were built to carry water from the Columbia River to the Pacific Southwest.

And as Philip Walsh, of the Los Angeles Chamber of Commerce, pointed out in his speech introducing the McCann report:

If an impartial, objective study established that a surplus of water exists in the Columbia River, exportation of some of that surplus to the arid Southwest might be the wisest economic investment the people of the Northwest ever made.

The text of the news release follows:

PORTLAND, OREG., March 24.—A comprehensive economic survey released here today shows that Oregon industry enjoys a heavy, lucrative trade with the seven-state Colorado River Basin area.

The value of Oregon products shipped annually to the Pacific Southwest and the Rocky Mountain states tallies in many millions of dollars, according to the report—"Economic Inter-Dependence of the Western States."

Wilbur McCann, an independent Los Angeles economic consultant, conducted the survey and it was published by the Colorado River Association of California.

One of the report's major findings discloses that the West is an especially important market for Oregon lumber; the Western states in toto got 45 per cent of the state's shipments in 1964 (the latest year for which official figures were available) and 26 per cent was sent to California. Applying the same ratio to production finds California the destination point of 2.1 billion board

feet from Oregon. That comes out to roughly one-quarter of the shipments from Oregon saw mills.

Another interesting fact uncovered by the McCann survey was that Los Angeles is the most important market in the nation for dry onions produced in Oregon. Of the 762,000 50-pound sacks shipped to four major Colorado River Basin cities in 1966, Los Angeles markets bought 439,200 sacks, or more than half the total. The regional share of onion exports represented more than 25 per cent of the total for 37 other U.S. cities, including Portland itself, Seattle, New York and Chicago.

Other pertinent findings of the report reveal that—

Four major cities in the Colorado River Basin region (Los Angeles, San Francisco, Denver and Salt Lake City) received 166.8 million pounds of Oregon potatoes in 1966, constituting over half of the total shipments to 41 nationwide cities.

Oregon processors sent almost 400 railroad carlots of her pears to the same four Southwest markets in 1966, the two California points getting 365 carlots. Truck shipments of Oregon apples to California totaled 592,000 bushels.

Of the 358,000 beef cattle and calves shipped to California in 1966 by the four Pacific Northwest states, Oregon farmers provided 223,000. In addition, the state's ranchers and processors also sent 162,000 sheep and lambs, and 624 dairy cattle.

Oregon was the source of 23,337 tons of barley, oats, wheat and other grains exported to California alone in 1966. That figure is for truck shipments alone.

The amount of air passenger traffic from the Portland Airport to and from points within the Colorado River Basin states exceeds by 15 per cent the traffic within the Pacific Northwest states. In 1966, the total for Southwest movement was 532,440 passengers, compared with 362,580 for intra-regional traffic.

The findings and conclusions of the study were discussed by Philip F. Walsh, vice president of the Los Angeles Chamber of Commerce, in a speech to Portland's like organization.

AMERICAN SEAPOWER

HON. JOHN G. TOWER

OF TEXAS

IN THE SENATE OF THE UNITED STATES

Friday, May 16, 1969

Mr. TOWER. Mr. President, I ask unanimous consent that a most thoughtful and timely address by Mr. Edwin M. Hood, president of the Shipbuilders Council of America, be printed in the Extensions of Remarks.

In the address, Mr. Hood gives his latest views on the problems of American seapower, both merchant and military. I commend his address to the attention of the Senate.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY EDWIN M. HOOD, PRESIDENT, SHIPBUILDERS COUNCIL OF AMERICA, BEFORE 23D CONVENTION, PACIFIC COAST METAL TRADES DISTRICT COUNCIL, KONOCTI HARBOR INN, CLEAR LAKE, CALIF., MONDAY, MAY 5, 1969

When one looks at a map or globe of the earth, it can be quickly seen that the world could easily be dominated from the seas.

Hundreds of years before the birth of Christ, a statesman of Athens, Themistocles, persuaded his countrymen to increase their naval strength with his philosophy that "he

who commands the sea, has command of everything."

The North American continent was discovered from the sea, and the American colonists quickly recognized the importance of the seas. Without trade and commerce, and access to the ocean trade routes, the early settlers of our nation sensed that freedom from oppression could never succeed.

So it has been, down through the ages, sea power—control of the seas—has played a decisive and important role in the development of the United States.

The late President Kennedy put it this way: "Control of the seas means security. Control of the seas can mean peace. Control of the seas means victory. The United States must control the seas if it is to protect our security."

President Nixon, during the political contest of last year, stressed another dimension. He said: "Sea power is the ability of a nation to project into the oceans, in times of peace, its economic strength; in times of emergency, its defensive mobility."

With nearly seventy percent of the earth's surface covered by water, and with the United States of America, for all practical purposes, surrounded by water—the quoted words of President Kennedy and President Nixon have a substantial meaning: our nation could not survive without naval ships and merchant shipping, and the capability to use the oceans in the national interest.

Every President of the United States has recognized the significance of sea power to security and survival. Sea power is an ingredient of national strength that enjoys bi-partisan political support. Yet, control of the seas, as defined by Presidents Nixon and Kennedy, needs much more public understanding.

Admiral Alfred Thayer Mahan, a distinguished U.S. naval officer and historian, was perhaps the first authority to trace the historical relationship between sea power and political power. Sea power, in his view encompasses both naval and merchant ships plus all of the productive resources of the nation—shipyards among them—that are necessary to sustain them. He, and others, have pointed out that control of the four narrow waterways—the Southeast Asia Strait of Malacca, the Panama Canal, the Suez Canal and the Straits of Gibraltar—could either frustrate or advance the political objectives of an aggressive or friendly power.

One of these—The Suez Canal—was closed during the Arab-Israeli War of 1967. Fourteen sunken merchant ships have subsequently rendered this waterway ineffective as a connecting link between the Mediterranean Sea and the Indian Ocean, and at this moment there appears to be no prospect of early reopening. As a consequence, the commercial trade patterns and ocean strategies of many nations have been essentially revised.

Almost coincidentally, the emergence of the Soviet Union as a sea power has come to general notice. To that point in time, the remainder of the world has not fully appreciated that the octopus of international communism, among other things, was a marine creature of substantial proportions. The relative balance between U.S. and U.S.S.R. strength at sea has, in fact, altered significantly since the end of World War II.

The Russian Navy is today second only to that of the United States, and the Soviet merchant marine will shortly be larger than the American maritime fleet in terms of both numbers and tonnage. Russian fishing and oceanographic ships are probably the most modern now afloat.

Soviet trawlers are equipped with electronic gear and have monitored U.S. and NATO naval maneuvers. In addition, they maintain a constant surveillance of U.S. Polar submarine bases, and there have been fre-

quent reports of the manner in which Russian fishing and oceanographic vessels have been employed as "lookouts" for the Russian Navy. All Soviet ships, from nuclear submarines to fishing trawlers, are believed to contribute to a total oceanographic effort, and every Soviet ship is said to gather data for future naval and commercial operations.

The geopolitical implications of this steadily growing communist armada to the national security of the United States and to the collective security of the entire Free World have been brought into sharp focus by the withdrawal of the British Navy from his-toric outposts, the aggressive solicitations of commercial cargoes by the Russian merchant marine, and the imposing presence of the Soviet naval fleet in the Mediterranean Sea.

In recent weeks, there have been numerous press accounts of accelerating Russian naval buildup in that sensitive area of the world. NATO officials have reported that Soviet ship activity in the Mediterranean has increased sevenfold over the last five years, and that today there are more than 50 Soviet naval vessels including 14 submarines—the largest fleet the Russians have ever assembled in that area.

This buildup, of course, conforms with usual Russian dogma; a careful measured show of strength for political and psychological reasons, in a region of strife and turmoil at a tender moment of history. The objective is not primarily military; more likely it is to harass the efforts of the United States and other Free World powers to encourage peace and calm in the Middle East.

Soviet ocean strategy, like international communism, has fixed goals, though those goals may often be confusing or contradictory and not always readily discernible. This strategy would seem to envision an eventual contest of naval blockade and/or commerce destruction between the two super powers of the world, and such a contest could well decide the future of freedom on the seas. Such a contest could quickly demonstrate the comparative strength of U.S. and Russian sea power.

In March of 1959, just 10 years ago, it was the judgment of a civilian survey team that the U.S. naval fleet "is not in an acceptable state of readiness." The Chief of Naval Operations, when then queried on this point, inferred that our fleet is not as good as it should be and went on to say "we'll do the best we can and that will be plenty good."

Under increasingly difficult circumstances of obsolescence, antiquity, material fatigue, and restrained logistical backup, the United States Navy has admirably proven the validity of that pledge. In time-honored naval tradition, the men and officers of the Navy have stretched American ingenuity and perseverance to the utmost limit.

The disturbing condition cited in 1959 was attributed to the everwidening gap between the expanding responsibilities assigned to the Navy and the financial resources allocated to it. It would seem the same condition has persisted.

In the Fall of 1962, the House Committee on Armed Services warned that "it is a statistical certainty that our fleet will be unable to perform its assigned role in the years to come" unless attention is given the serious problem of obsolescence. Obsolescence was defined as "a depreciation of existing ships, equipment, weapons systems due to the development of greater threats and advanced technology." The implied threat, of course, was that posed by the Soviet Union.

That same Committee—seven years ago—concluded that "a 7-year program to build or convert approximately 500 ships of various types is needed to produce naval forces of the quantity and quality required to perform effectively under the operational and strategic environment 10 years from now." Seven years later, in the year of 1969, nearly two thirds of the U.S. naval fleet is com-

posed of vessels 20 years of age or older, and the level of financial resources allocated to it in the interim has obviously been inadequate.

Only last month, the Special Subcommittee on Sea Power of the House Committee on Armed Services released what has been widely described as a "shocking" report on the status of our naval ships. It was today's judgment of that well-informed group that "in naval matters, the United States no longer enjoys clearcut military and technological superiority" over the Soviet Union. With charts and photographs, the qualitative and structural deterioration of U.S. Navy ships were dramatically shown.

Less than one percent of the Soviet Navy is 20 years of age, and with this statistical fact, the sensitive significance of the relative balance between U.S. and U.S.S.R. sea power, is graphically illustrated. But, there are other startling statistics:

Russia reportedly has 100 submarines capable of firing missiles compared to our 41.

The Soviets lead the U.S. in attack submarines by 2½ to 1.

All of the Soviet's 250 attack submarines are less than 20 years old; 60 of our 105 are more than 20 years of age.

Russia has less than half as many conventional destroyers as we (86 to our 177), but 163 of ours were built in World War II while all of the Russian ships of this class are much less than 20 years of age.

The Soviets have 150 missile patrol boats; we have none.

The Russian merchant marine, which in 1950 comprised only 432 ships aggregating 1.9 million deadweight tons, now numbers more than 1,500 ships and is expected to total 14 million tons by the end of 1970—a sevenfold increase—or a 700 percent increase—in tonnage.

In sharp contrast the American merchant fleet, which in 1950 comprised 1,900 ships totaling 22 million tons, at the beginning of this year consisted of only 1,033 active ships of 15.8 million tons—a 45 percent decrease in numbers of ships and a 28 percent drop in tonnage. Further contractions in the U.S. shipping fleet can be expected during the next 18 months.

Last November, the Soviets were constructing 458 merchant ships to our 62.

For the past several years, new ship deliveries to the Russian merchant fleet have outpaced U.S. deliveries by a ratio of nearly 6 to 1.

About 80 percent of the Soviet shipping fleet today is less than 10 years of age, while approximately 80 percent of the American merchant marine is 20 years of age or older.

And so we come full circle—our Navy and our Merchant Marine are both plagued with a high degree of obsolescence. But these comparisons tell only part of the story. The Russians remember all too well that which we are often quick to forget—the importance of control of the oceans. In the vacuum created by apparent American lethargy and the retreat of the British Navy on all fronts, the Kremlin obviously intends to use the oceans for exploitation of Soviet political, psychological and economic objectives.

That the Soviet Union has embarked on a carefully conceived plan pointed toward mastery of the seas there can be little question. The political and economic advantages are easily recognizable. Less obvious is the propaganda potential. As these modern ships, flying the ensign of the hammer and sickle, spread each day more expansively over the oceans, they suggest a posture and strength of frightening proportions to uncommitted or lesser developed countries. The severity of this symbolism is easily portrayed by the arithmetic of our own sea power inventory.

In sum, Soviet Russia is mounting at sea a new challenge that the United States will have to deal with long after the fighting in Southeast Asia is ended. This challenge ex-

tends across the full spectrum of sea power. If the United States is to continue as a pre-eminent world power, this challenge must be faced squarely. But, it will not be effectively met with old ships of questionable reliability. It will not be effectively met by the "lick and promise" that has been descriptive of our nation's attention to strength on the seas over the past many years.

What is needed is a fixed national determination such as the Russians have seen fit to adopt and pursue in their own national interest. What is needed is a forceful acknowledgement by the stewards of national policy that strengthening our nation's sea power resources, in all respects, will require a higher priority in the orchestration of essential national goals and fiscal plans than has heretofore been the case. What is needed is a realistic, well-conceived, orderly and stable program to assure that our vigor on the oceans is not deficient in any category—a program which does not ebb and flow with the changing tides of expediency, neglect, inertia, and wishful thinking.

GOVERNOR PETERSON'S LEADERSHIP

HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. WYMAN. Mr. Speaker, the way Dartmouth College officials acted promptly to avail themselves of civil process when faced with student insubordination and trespass at Hanover, N.H., illustrates how to deal with this continuing problem effectively. This is by application to the court for a court order called an injunction.

Once an injunction has been issued, student trespass, if continued, becomes a contempt of the court and assistance through law enforcement officials is available to back up the judicial order.

In the Granite State, this assistance was effected in exemplary fashion by New Hampshire's Governor Walter Peterson, who, acting on the request of college officials, authorized the State police to remove students who refused to leave college buildings.

The Governor also directed that the removal be accompanied with a minimum of physical force and without violence unless violence was first initiated by the offending students.

This was done—all within a few hours—and without violence, although some offenders had to be physically removed. Shortly thereafter the court sentenced the deliberately contemptuous student leaders to 30 days in jail, where they are now confined.

This is a good example for other institutions that may face similar willful trespass or worse. Congratulations are in order to all concerned and particularly to the Governor, himself a Dartmouth alumnus. In this connection the following account from the current issue of Newsweek is of interest.

BUST AT DARTMOUTH

At first the events at Dartmouth had a familiar ring. Like Harvard radicals a few weeks ago, Dartmouth radicals protested, among other things, the university's reluctance to abolish immediate ROTC programs

from the campus. The faculty had decided that ROTC should be abolished, but not until 334 students now enrolled in the program had graduated. For many students, radical and moderate, 1973 was too long to wait.

Rumors that radical students were preparing to take over a campus building spread around campus for several weeks. The administration announced its own plan: if students occupied a building, officials would seek an injunction from the local courts before police were called.

FORCE

Nevertheless, about 100 students last Wednesday swept into the main administration building and forced out administration officials. President John Sloan Dickey left of his own power, but the dean of freshmen was inelegantly rolled out in his desk chair. As the news spread, the crowd outside the building swelled to about 1,000 (out of a total enrollment of 3,596). Some were sympathetic with the radicals; others were not ("Dartmouth—Love It or Leave It" read one button some students wore).

The stage thus was set for a brutal round of bloodletting. But the administration first set in motion the previously published plan. "You are now in violation of the guideline of dissent," Thaddeus Seymour, dean of the college, told radicals entrenched in Parkhurst Hall. Then Dickey petitioned for an injunction hearing in court. This made the occupation a civil matter rather than a university matter. At this point, New Hampshire Gov. Walter R. Peterson (Dartmouth '47) took over from Dickey.

Once the court granted the requested injunction barring further occupation of the building, Peterson personally instructed some 100 state police—and a small contingent borrowed from the State of Vermont—assembled in the nearby Lebanon, N.H., armory that "minimum violence was a must." The Grafton County sheriff served the court order on the protesters, saying they had two hours to leave or be in contempt of court. At 3:30 a.m., the police moved in and minutes later the radicals were out. "No clubs, no Mace, no brutality," reported one eyewitness. "It was a perfect bust," says assistant dean Paul W. Rahmeyer.

But some student said that they had been Maced, and by the weekend it was clear that the local court, at least, was in no mood to be lenient. The county prosecutor requested fifteen-day jail sentences. Nevertheless, Judge Martin Loughlin sentenced 40 Dartmouth students to 30 days in jail.

A NOTABLE DISSENT IN ALABAMA

HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Friday, May 16, 1969

Mr. METCALF. Mr. President, last year the Alabama Public Service Commission denied a rate increase sought by Alabama Power Co. Last month, two of the commission members, President Eugene "Bull" Connor and C. C. "Jack" Owen, granted the company most of what it asked for, on the basis of the same record upon which the request had previously been denied. The third member of the commission, Miss Sibyl Pool, dissented.

Miss Pool does not believe that Alabama Power should collect \$3.7 million for fictitious "taxes." She does not believe that the company's rate base should be padded with \$35 million in bank deposits and land casually appraised far

above its cost. She does not believe that \$189,409 in "charitable contributions," for which the company takes the credit, should be collected from the customers.

She wonders why "the majority talks only of the high cost of obtaining new debt capital, while ignoring completely the much lower embedded cost of the company's debt and preferred stock."

She notes that "testimony from the company's financial expert shows that actual earnings in the test year were as high as the expert recommended the company should be permitted to earn."

She supports the witness for the Alabama Textile Manufacturers Association, who used statistics, compiled from electric utilities' own reports to the FPC, pointing out that "the FPC statistics have the outstanding advantage of being computed on an entirely uniform procedure with adjustments, where necessary to put the earnings of all utilities on a basis equivalent to using flow-through accounting."

Mr. President, it is heartening to me that members of utility commissions in various States, despite their workload, despite their staff shortage, despite the political pressures on them to grant what the utilities want, are trying to rid regulation of some of the costly and indefensible policies which utility companies have lobbied through. I ask unanimous consent that Commissioner Pool's dissent be printed in the RECORD.

There being no objection, the dissenting opinion was ordered to be printed in the RECORD, as follows:

DOCKET No. 16044: SEPARATE DISSENTING OPINION OF ASSOCIATE COMMISSIONER SIBYL POOL

Alabama Power Company, petitioner.
Petition: For approval of new schedule of rates for retail electric service.

The order approved by the other two commissioners on April 28, 1969 was issued in the name of "The Commission" without reflecting the fact that I voted against the order and stated my intent to file a dissenting opinion. To the extent that the form of that order conveys the impression that it was approved by the entire Commission, it is incorrect.

In our original order of June 24, 1968, all commissioners unanimously found the Company's existing rate schedule to be adequate and denied the proposed rate increase entirely. This new order approved by the majority gives Alabama Power Company all but a fraction of the rate increase it asked for and will result in an annual increase in electric bills to the people of Alabama of more than \$13 million. The majority's new order is based on the same test year, the same record and the same evidence as our original order. Considering this, I fail to understand how the other two commissioners can so completely reverse their positions in this case. Moreover, when a majority of this Commission so completely reverse its position without apparent reason, in a case of this importance, it can only make the Commission appear irresponsible in the eyes of the people of Alabama.

The new order of the majority was ostensibly issued in response to an order of the Circuit Court of Montgomery County, but it goes far beyond what this Commission was asked to do by the Circuit Court. The Circuit Court asked only for findings of fact and did not request or authorize any change in the result or effect of the Commission's original order. This case has been on appeal to the Circuit Court since July of 1968 and it is still under its control. In my view, this Com-

mission does not have jurisdiction to now change its original order so as to grant a rate increase it has already denied, or do anything else in this case except make the findings of fact requested by Circuit Court.

Quite apart from my belief that the Commission should not, and indeed cannot, reverse its position in this case while it is on appeal, I disagree with and dissent from the findings and conclusions of the majority. My reasons follow:

THE FAILURE TO SEPARATE FINANCIAL DATA

One of the most glaring deficiencies in Alabama Power's case as presented to the Commission was its failure to separate its investment, expenses and revenues attributable to sales subject to the jurisdiction of the Alabama Public Service Commission from the investment, expenses and revenues attributable to sales which are subject to the jurisdiction of the Federal Power Commission. A substantial portion (approximately 15.6%) of Alabama Power's total energy sales fall into the category referred to as "wholesale for resale." None of such wholesale sales are subject to the jurisdiction of this Commission. Rather, they are subject to the jurisdiction of the Federal Power Commission.

The financial data submitted by Alabama Power in this case does not purport to separate the investment, expenses and revenues attributable to the jurisdictional sales from that attributable to nonjurisdictional sales. This makes it impossible to reach a valid determination of the return actually being earned on the sales subject to the jurisdiction of this Commission. Evidence submitted by Alabama Power strongly suggests that the return being earned by the Company on the nonjurisdictional sales is far below the return being earned on the sales over which this Commission has jurisdiction. The Company's evidence does show that its return on wholesale sales in Alabama is far below the return earned on direct retail sales. However, the form in which this evidence was presented does not reflect the return, if any, earned on wholesale sales outside Alabama to affiliated companies in the Southern System Power Pool. It may well be that, if the evidence permitted a proper separation of financial data, it would disclose that the Company is being permitted to earn an excessive return on jurisdictional sales in order to make up for a deficiency in earnings from nonjurisdictional sales. This is contrary to sound regulatory principles and grossly unfair to the Alabama public whose interests this Commission is charged with protecting.

The principle of separation of jurisdictional from nonjurisdictional operations is, so far as I am aware, universally followed by regulatory agencies. It arises with respect to telephone companies and railroads, both of whom engage in intrastate and interstate operations, which are subject to the control of different regulatory authorities. A similar situation exists where electric utilities operate across state lines and render intrastate service in two or more states. Even in this case Alabama Power recognized the separation principle by eliminating the investment, revenue and expenses attributable to its steam heat operations which, though subject to the jurisdiction of this Commission, are entirely unrelated to the matter of electric rates and charges and also applied the principle with respect to its non-utility operations, such as merchandising and jobbing.

A regulatory authority cannot justify unreasonably low rates for intrastate, or jurisdictional, service on the grounds that the utility is earning large profits on its interstate, or nonjurisdictional, operations and likewise should not permit a utility to impose unreasonably high rates on intrastate, or jurisdictional, operations in order to meet losses or make up for very low returns earned on interstate, or nonjurisdictional, business.

Under the prevailing decisions, the State of Alabama, through this Commission, has

no authority to regulate any of the wholesale sales of Alabama Power Company. Therefore, the separation of investment, revenue and expenses is important not simply as a theoretical allocation to two branches of the business; it is essential to an appropriate recognition of the competent governmental authority in two fields of regulation.

In my previous concurring opinion in this case I took the financial data submitted by Alabama Power and used it to show that no rate increase is needed. That was sufficient to dispose of the case presented to the Commission by Alabama Power's petition. On the other hand, I consider it a grave error for the majority to use financial data which fails to make the appropriate separation of operations where the result is to change the existing rates, either upward or downward.

REASONABLE VALUE OF THE RATE BASE

In my previous concurring opinion I developed a reasonable value for the Company's electric properties devoted to the public service of \$801,188,838, which I considered generous under the circumstances. The majority of the Commission now finds that the reasonable value of the rate base is \$836,208,642. The difference of approximately \$35 million appears to be attributable to three factors: (1) The majority failed to eliminate \$4 million average daily bank balances from the required working capital. (2) The majority permitted land to be included in the reproduction cost study at so-called appraised values instead of at original cost. (3) The majority assigned one-third weighting to each of original cost, invested capital and reproduction cost, whereas I had assigned 35% weighting to original cost and invested capital, and only 30% to reproduction cost.

Alabama Power claimed as needed working capital an amount equal to 1/2 of its annual operating expenses. But an allowance is widely used by regulatory agencies, but the proposition which permits its use includes the limitation that this amount should cover the company's needs for working capital. Very few regulatory agencies permit the inclusion of even minimum bank balances in the rate base in addition to an allowance of 1/2 annual operating expenses. Those that do generally require a strong showing of special need. In this case the Company specifically declined to characterize the amount claimed as minimum balances. There is no evidence in this record that 1/2 annual operating expenses, plus other accruals available to the Company, are inadequate to provide whatever amounts might be required for minimum bank balances. Moreover, the Company failed to submit any study of the amount of funds made available to it through deferred payments for its various purchases. This is undoubtedly a significant amount and reduces the need for working capital.

I have already mentioned, in my previous concurring opinion, some of the reasons why I would not permit land to be valued, for rate making purposes, at more than its original cost. In addition to the reasons already stated, I would reject the claimed additional value in this case because of the lack of adequate evidence. This land was supposed to have been valued by appraisal. However, except for individual parcels located in cities, there was no appraisal in the usual sense of the word. The Company's appraisal witness merely took the "surviving dollars" in the Company's various land accounts and multiplied these amounts by trend index numbers taken from a U.S. Department of Agriculture Report entitled Farm Real Estate Market Developments. This land was acquired by eminent domain proceedings or under a program where such proceedings were available. It is common knowledge that condemnation awards, as well as negotiated prices in such circumstances, are ordinarily higher than prices prevailing in private sales and, where

there is a partial taking, such awards and prices include severance damages in addition to that paid or awarded for the land acquired. Moreover, under established accounting procedures the amounts recorded in the land accounts to which the trend index numbers were applied include all costs incurred in connection with land acquisition, including legal expenses. Such incidental costs add nothing to the present fair market value of the land. The Department of Agriculture bulletin used by the Company's appraisal witness was never intended to reflect trends or changes in values of utility property. It is obvious, therefore, that the evidence on this subject constitutes a complete misuse of the trending process and the end result is totally unrelated to the present fair market value of the property involved. Consequently, I would reject the additional values claimed for land on this basis alone.

The additional weighting assigned by the majority to the reproduction cost values above the weighting I assigned in my previous concurring opinion leads me to point out some additional weaknesses in the Company's reproduction cost study. As I understand the procedure, the trended values were first brought up to December 31, 1966 and the "net additions" to the electric plant in service made in 1967 were then added without trending. The "net additions" in 1967 is the excess of the cost of plant additions above the cost of plant retirements during the period. Such retirements would ordinarily be the oldest property in each class and presumably had been assigned trended values substantially in excess of their original cost as of December 31, 1966. The effect of the Company's procedure, therefore, is to include the property retired in 1967 at "reproduction values" and then to eliminate it at original cost with a resulting inflation of the claimed reproduction values unrelated to any property in service. A similar deficiency exists with respect to the elimination of the investment made with funds acquired through accelerated amortization, liberalized depreciation and unamortized investment tax credit. Company witnesses admitted at the hearing that the investment made with such funds should be assigned a "zero cost" and should not be used as a basis for further charges to the rate payers. Accordingly, the majority has excluded from each of the three rate base components a total of \$53,224,977 on account of such funds. But this exclusion with respect to the reproduction cost component of the rate base is inadequate. Such funds have been made available to and used by the Company in each year since 1954. The electric plant acquired with these funds was, therefore, assigned trended values in the reproduction cost study. The elimination of this investment at original cost results in an unwarranted inflation of the claimed reproduction cost. Of course, the \$4 million claimed for bank balances should be eliminated from the working capital portion of reproduction cost for the same reasons that it should be eliminated from the working capital portion of original cost.

INCOME UNDER PRESENT RATES

The only adjustment made by the majority to the Company's figures for adjusted net electric operating income is the addition of \$76,000 for the after-taxes effect of additional income to be derived from a change in the Interchange Contract effective June 1, 1967. This head-in-the-sand approach to the Company's true financial circumstances results in a serious understatement of its actual net earnings from electric operations.

The majority makes a careful statement of the theory upon which annualizing and normalizing adjustments are made to actual net income in the test year. I agree that such adjustments should be made, but they cannot be made on a piece-meal basis. A glaring omission in such adjustments shown by the record is the Company's failure to ad-

just the amount of interest charged construction to reflect the rate at which such interest was being charged at the end of the test year. During 1967 the Company increased the rate at which such interest was being charged to 6%. The same theory which permits the adjustment for increased wage rates, social security taxes and postal rates requires an adjustment for the increase in the rate at which interest on construction is charged. Application of the 6% rate to the amount of construction work in progress during 1967 would produce an addition to operating income of \$3,043,443, whereas the Company's booked figure was only \$2,783,852. This difference requires an adjustment of \$259,591 as an addition to test year net income.

I have already stated in my previous concurring opinion the reasons why I would not allow charitable contributions as an operating expense. The amount of such contributions in 1967 was \$189,409 and should be added to the Company's statement of test year net income.

The majority also permits the Company to reduce its stated net income by the fictitious expense labeled "deferred income taxes." The amount claimed for this "expense" is \$3.7 million, which also happens to be the after-taxes amount of additional net income the Company represented it would derive from the new rate schedules if approved as requested. All the Company's circular arguments in support of its right to recover this non-existent "expense" from the rate payers do not conceal the facts that the amounts claimed for this "expense" have not been paid, are not owed and will not be paid or owed at any foreseeable time in the future.

The majority apparently accepts the Company's argument that accelerated depreciation uses up the "asset" of tax deductions generated by depreciation in a manner which requires the reflection on its books of a current cost. The fallacy of this argument is that it assumes that the asset of tax deductibility belongs only to the Company. However, since the Company looks to its customers to pay its taxes through the rates, the asset of tax deductibility rightfully belongs to the ratepayers. Therefore, at least for rate making purposes, the amount the Company is permitted to claim as a current tax expense should be limited to the amount of taxes it actually pays.

The majority states four "assumptions" which it says must be made before the position that accelerated depreciation results in tax savings, rather than tax deferrals can be accepted: (1) The entire property of the taxpayer must be considered rather than just a single unit of property. (2) The corporate tax rates must remain unchanged. (3) The liberalized depreciation provisions must not be changed. (4) The taxpayer must experience continuous growth, with investments in depreciable property of the same or larger amounts in each subsequent year. I have no difficulty with any of these "assumptions" because they have all existed since the provisions for liberalized depreciations were put into the tax laws in 1954 and all exist at the present time. I disagree that these conditions must be assumed to continue "into perpetuity." Sound utility regulation can only be based on existing or definitely foreseeable conditions. Anyone can speculate about possible changes, but the record does not show when, if ever, any such change will occur. If any such change does occur and works a hardship on the Company, the Commission is fully capable of responding in an appropriate manner; and I consider it grossly unfair to the ratepayers of Alabama to make them pay rates based on possibilities which may never occur. The majority's reference to the Revenue and Expenditure Control Act of 1968 is misleading. Though hardly recognizable by the majority's description, the

tax rate change produced by this Act is the "surtax", for which separate provision is made in the Rate FT. So long as the Company is permitted the Rate FT, neither nor any other change in tax rates will prevent accelerated depreciation from producing tax savings.

The record also shows that the Company's representation of its adjusted net operating income is not complete. There was a second change in the Interchange Contract, effective June 1, 1968. This change involved raising the "August energy availability" attributed by the Southern System Power Pool to Alabama Power's hydro-electric facilities. As a result of this change, Alabama Power has to purchase less peak period capacity from the Power Pool. The record does not show the amount saved by this change, but does show that it has actually occurred as a result of a definite contract change that was in existence at the time of the hearings in this case. The principle which permits the Company to make its normalizing and annualizing adjustments increasing certain of its expenses due to changes taking effect during or shortly after the close of the test year and affecting future operations requires that a similar adjustment be made to increase net operating income resulting from this known change in an existing contract. Approving a rate increase without requiring disclosure of this additional income available to the Company under the present rate structure can only be characterized as knowingly permitting the Company to understate its income for purposes of these proceedings.

The amount of net income the Company will derive from the proposed rate schedules also appears to be understated. Although admitting that the rate increase will eventually affect its special contract customers, the Company has not disclosed any information about the amount of additional income to be received from such customers who, in 1967, purchased 18% of the total energy sold by Alabama Power. These customers are served under special contracts, usually of 5 years duration, which ordinarily incorporate the published rate schedule applicable to the particular class of service involved.

Although these contracts are not immediately affected by the proposed rate increase (unless the contract happens to expire at or about the time the new rates go into effect) it is clear that, as the contracts do expire, the special contract customers will either revert to non-contract service under published rate schedules or will be offered a renewal contract which incorporates the published rates. Thus, it is clear that within a reasonably short time Alabama Power can have the benefit of the new rates with respect to this entire block of sales. Until the additional revenue to be anticipated from the special contract customers as a result of the new rate schedules is disclosed, it is impossible to make a meaningful determination of the return the Company can actually be expected to earn under the proposed new rate schedules.

FAIR RETURN

I find the discussion of fair return to be the most unsatisfactory part of the majority order. The Company only asked for a rate of return of 5.54% on the reasonable value of its rate base, yet the majority asserts, without explanation, that a return of 5.867% on such reasonable value is "obviously" not sufficient.

The majority puts great emphasis on the Company's need to attract capital for the expansion of its plant to meet the demands of anticipated growth. However, the record shows that, under existing rates, the Company has been able to raise the capital it needs on a very competitive basis. This was true even in 1968. During the hearings in 1967 Mr. Rucker Agee, one of the Company's financial experts, solemnly predicted that the market would not permit Alabama Power to sell its 1968 bond issue or place its 1968 issue

of preferred stock at rates less than 7¼%. But 4 months later the bonds were sold at 7% and the preferred stock was placed at 6.88%.

In this connection the majority talks only of the high cost of obtaining new debt capital, while ignoring completely the much lower embedded cost of the Company's debt and preferred stock. In citing the cost of new capital the majority also ignores the fact that the Company receives each year a substantial part of its total capital requirements at no cost, through its reserve for deferred taxes. In 1968 the Company issued \$25 million of bonds at 7%, \$5 million of preferred stock at 6.88% and received \$4.3 million of capital at no cost through the accounting exercise involving deferred income taxes.

I deem it significant that no witness claimed Alabama Power Company has suffered any deterioration in its rate of earnings. The statistics compiled by Mr. Sanford Reis, the Company's leading financial witness, show that the rates of return earned by Alabama Power in each year since 1957, while varying slightly, have remained essentially stable. This may be seen on Schedules 29 and 30 of the Company's Exhibit 21. In addition, the Company's annual financial reports show that the dividends per share paid on common stock have steadily increased during this period, as has the Company's unappropriated earned surplus. Mr. Reis's comparison of the rate of earnings of Alabama Power to the earnings rate of 13 utility companies selected by Mr. Reis is not persuasive because 7 of these 13 companies use flow-through accounting. If Alabama Power used flow-through accounting its net income in 1967 would be increased by \$3.7 million. Thus, it is apparent that a comparison of Alabama Power's unadjusted earnings to those of companies using flow-through accounting is highly misleading. A more significant feature of Mr. Reis's testimony was his admission that the actual earnings of Alabama Power in 1967 equalled the earnings rate he had recommended. As the culmination of his prepared direct testimony, Mr. Reis testified that an overall rate of return of 7.0% would be appropriate for Alabama Power. On cross-examination he admitted that in 1967 the Company had actually earned his recommended return of 7%. Of course, as the majority pointed out, Mr. Reis's testimony referred to the overall return on invested capital and the 7% rate is not applicable to the increased values associated with the reasonable value rate base. Nevertheless, this testimony from the Company's financial expert shows that actual earnings in the test year were as high as the expert recommended the Company should be permitted to earn.

The majority criticizes the reference by Mr. Joseph Benson, a witness for Alabama Textile Manufacturers Association, to the rates of earnings stated in a publication of the Federal Power Commission. This criticism seems altogether unjustified. The FPC statistics have the outstanding advantage of being computed on an entirely uniform procedure with adjustments, where necessary, to put the earnings of all utilities on a basis equivalent to using flow-through accounting. This has an obvious advantage over the kind of comparison made by Mr. Reis with his 13 companies, where the financial information published by the companies is taken without adjustment. Moreover, Mr. Reis himself uses the rates of return published by the FPC. (See Mr. Reis's Schedule 29.)

There is a total absence of logic or reasoning to support the findings of the majority that a rate of return of 5.867% applied to the reasonable value rate base would be insufficient and that a rate of return of 6.257% would not be excessive. The majority also fails to point out the effect of the rate of return it approves on Alabama Power's sole common stockholder (The Southern Company). The majority has found that, in the form approved, the new rate schedules will

produce a net income of \$52,318,718, based on 1967 sales. Annual charges for "fixed cost capital" must be paid from this amount. Interest, on debt attributable to electric operations in 1967 was (\$393,763,491 × 4.34%) \$15,069,336. Dividends on preferred attributable to electric operations were (\$75,050,040 × 4.59%), \$3,444,797 and interest required on customer deposits was (\$1,617,439 × 6.0%) \$96,846. Thus, the total "fixed charges" attributable to electric operations in 1967 were \$18,610,979. Deducting these fixed charges from the net income of \$52,318,718 leaves \$34,163,540 available for dividends to common stockholders. On the common equity attributable to electric operations (\$243,236,182) this amounts to a return of 14%, which is greater than any Company witness claimed to be required. (Derivation of the amounts of the several classes of capital attributable to electric operations is detailed in my previous concurring opinion.)

POSITION OF ALABAMA POWER COMPANY IN THE SOUTHERN SYSTEM POWER POOL

The majority has gone out of its way to whitewash the effect on Alabama ratepayers of Alabama Power's position under the Interchange Contract which controls operation of the Southern System Power Pool. However, the record has not convinced me that Alabama Power is getting a just return for its contributions to the Power Pool. The most significant contribution Alabama Power makes to the Pool is through its hydro-electric resources. At the end of 1967 Alabama Power provided approximately 70% of the hydro-electric capacity on the entire Southern Company System.

There are important differences in the operating characteristics of steam and hydro-electric generating stations. Steam plants can be operated on a substantially continuous basis and generally are used to meet the demand of the system's base load. Hydro-electric plants ordinarily are not used to supply the base load because their operation depends on available water supply. The principal utility of hydro-electric plants is in providing system reserves and short duration capacity to meet peak loads. The evidence shows that the principal function of Alabama Power's hydro-electric facilities is to provide such peaking capacity for the entire Southern Company System. Company President Walter Bouldin testified that the hydro-electric plants of the Company are principally used to meet peak load requirements and that these plants normally generate only a few hours each day.

Since 1958 Alabama Power has invested approximately \$200 million in hydro-electric generating facilities, which have been installed for the benefit of the entire Southern Company System. The effect of this investment on its rate base and, consequently, on the Alabama ratepayers is obvious. This investment has been very costly to Alabama Power, both in terms of its total magnitude and in terms of its unit cost. For example, in 1967 the average net investment cost for hydro-electric generating capacity was \$278.40 per kilowatt, as compared to \$124.08 per kilowatt for base load capacity steam plants and only \$67.78 per kilowatt for a "stripped" steam plant built to supply peaking capacity which, as stated, is the principal operating function of Alabama Power's hydro-electric facilities.

Alabama Power sells this peaking capacity to the Southern System Power Pool at a price in 1967 of \$11.24 per kilowatt-year. At the same time, Alabama Power must purchase base load capacity which it lacks and pays for this capacity to the Pool at the rate of \$19.24 per kilowatt-year. The quantities bought and sold in these transactions run the total dollars involved into the millions.

Alabama Power also sells energy to the Southern System Pool, which it refers to as "economy energy." This energy is sold at a price only slightly above the incremental cost

of generation. This price does not purport to cover the full cost to Alabama Power of producing the energy because it does not include any allowance for fixed charges, relating to investment in the plant facilities used in generating the energy. The full amount of such fixed charges, being substantially more than half the total cost, must therefore be borne by the Alabama ratepayers.

Alabama Power attempts to justify such below-cost sales to the Pool on the false premise that the facilities used to generate the energy were not installed to serve the Pool and are, therefore, excess facilities. The record shows, however, that all generating facilities installed by any member of the Southern Company System are installed to meet and serve the anticipated needs of the System as a whole. In fact, the procedure followed by the Pool Operating Committee is to first determine the amount of additional generating capacity needed by the Southern System, and then to consider where on the System would be the most favorable place to locate the needed facilities.

It must be recognized that when the Pool Operating Committee decides to put a plant in one of the four states served by the Pool members, the plant becomes a part of the rate base of the Company operating in that state. Ratepayers in the state where the plant is located then must pay the full cost of the investment in the plant, even though the plant is installed to serve the entire System, while other members of the Pool enjoy its benefits by paying merely incremental costs of generation. This has worked substantially to the disadvantage of Alabama Power, because of the relatively high investment costs associated with hydro-electric facilities which are not reflected in the revenues it receives from the use of such facilities in the Pool.

All of Alabama Power's hydro-electric facilities have been built under licenses issued by the Federal Power Commission as well as under certificates of convenience and necessity issued by this Commission. The Federal Power Commission requires an economic justification for the proposed project before a license will be issued. The record in this case shows that Alabama Power's investment in hydro-electric facilities has been justified to the Federal Power Commission by assigning base load capacity values to the full rated capability of the hydro-electric plants, although it sells a substantial portion of its hydro-electric capacity at the much lower rates associated with peaking capacity. One exhibit in the record shows that the annual capacity values for Lock 3 (Neely Henry) and Logan Martin Dams were stated to the Federal Power Commission in connection with a license application at \$27.53 per kw-year. As stated above, the peaking capacity which the hydro-facilities provide is being sold to the Southern System Power Pool at the rate of \$11.24 per kw-year.

Some of the policies of Southern System Power Pool, effected through the Interchange Contract, appear designed to unfairly penalize or downgrade the value of Alabama Power's hydro plants, at the expense of Alabama ratepayers. For example, the Power Pool arbitrarily uses as the measure of the dependable (base load) capacity of Alabama Power's hydro plants a 310-hour period in August during which the assumed water supply must be capable of providing a continuous head of water sufficient for generation. This test is admittedly applied under assumed operating conditions that are more severe than actual operations. Moreover, in determining the available water supply, the Power Pool assumes the water flow of the driest year on record (1931) and also assumes a minimum reservoir depth which will permit continued use for recreational purposes. All these assumed limitations artificially reduce the values assigned to Alabama Power's facilities in the Pool.

All of the circumstances discussed above suggest to me that if Alabama Power ob-

tained from the Southern System Power Pool a proportionate part of its incurred costs for its hydro-electric peaking capacity and energy based on the amount of such capacity and energy supplied to the Pool, there might well be no occasion for the Company to seek additional revenue from its retail customers in Alabama.

CONCLUSION

What I have said here is not intended to change what I said in my first opinion in this case, issued on June 24, 1968, in which I stated my reasons for concurring in this Commission's unanimous denial of the requested rate increase. I reaffirm my original concurring opinion and add to it the foregoing additional grounds for dissenting from this latest action of a majority of the Commission.

Dated at Montgomery, Alabama, this 1st day of May, 1969.

SIBYL POOL,

Associate Commissioner, Alabama Public Service Commission.

THE POPULAR ELECTION OF FUTURE PRESIDENTS

HON. EUGENE J. McCARTHY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Friday, May 16, 1969

Mr. McCARTHY. Mr. President, I ask unanimous consent to have printed in the Extensions of Remarks of the RECORD an article entitled "The Popular Election of Future Presidents: Wait a Minute," written by Alexander M. Bickel.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE POPULAR ELECTION OF FUTURE PRESIDENTS: WAIT A MINUTE (By Alexander M. Bickel)

The House Judiciary Committee last week approved a proposal for a constitutional amendment abolishing the electoral college and substituting direct popular election of Presidents. While he had said initially that popular election was not his first preference, Mr. Nixon later told a press conference that if the Senate and House adopted the proposal, he would support it. And now the President is quoted as promising that he will, given Congressional approval of the amendment, "throw the full weight of his office behind the drive for ratification." The amendment would be effective one year after the 21st day of January following ratification by three-quarters (38) of the state legislatures. Thus, the chances that a President will be elected by direct popular vote in 1976 though probably not in 1972, look better than they ever have. But perhaps Congress and the country may still be induced to pause for a second thought.

One objection to the electoral college as it now operates is that it can put in office a minority President—not merely, like any other system being discussed, a plurality President, but a candidate who had fewer votes than his chief opponent. That is indeed theoretically possible, and it has happened once in normal circumstances, though not in this century. But it is at all likely to happen only when the election is a toss-up, as in 1888, when 100,000 votes divided Cleveland from Benjamin Harrison. In such circumstances, it is pretty doctrinaire to think of either man as the popular winner. If there were no other considerations in play, it might be as well not to run even this risk. But other considerations are in play, and they are very substantially more important.

Proponents of the popular election claim that the electoral college is malapportioned

in favor of the small states. And so it is, formally, because the electoral college assigns to each state as many electoral votes as the state has Congressmen and Senators, and each state has, of course, two Senators regardless of its population; and it gets one Congressman even if the state is a good bit smaller than any single Congressional district in, say, New York. If each state's electoral vote were divided—precisely or approximately—in proportion to the popular vote cast for each Presidential candidate, the malapportionment would be quite real, and might have considerable effect. (Mr. Nixon has said that proportional division of the electoral vote is what he would like to see done.) But as things now stand, we do not have a proportional system. The electoral votes of each state are cast by the unit rule—winner takes all. This is not constitutionally required, but it has been the uniformly followed practice for well over a century.

Owing to the operation of the unit rule, the malapportionment in the electoral college in favor of the small states is for the most part only apparent, not in practice real. The candidate who carries New York or Illinois by a 50,000 or even 5,000 plurality or majority gets a greater number of electoral votes than he can obtain by carrying several smaller states by larger popular majorities. For this reason, the system is malapportioned in favor of the big industrial states, in which party competition is vigorous, and which generally swing by relatively small percentages of the popular vote. Not only that; the system is in effect malapportioned in favor of cohesive interest, ethnic or racial groups within those big states, which often go very nearly en bloc for a candidate, and can swing the state's entire electoral vote.

Mr. John F. Banzhaf, III has expressed all this mathematically. Defining voting power as "the ability to affect decisions through the process of voting," he has concluded that voters in New York and California have over two and one-half times as much voting power (i.e., as much chance to affect the national result in a Presidential election) as voters in smaller states. Pennsylvania, Ohio, Michigan, Illinois, even Massachusetts are also substantially advantaged. This fact governs the strategy of modern Presidential campaigns and the decision of the nominating conventions, and has in our day resulted in the orientation of the Presidency, as a rule, toward an urban constituency. That orientation of the Presidency, countervailing a tendency in Congress toward more conservative, rural and small-town attitudes, would be less secure under a system of popular election. With popular elections, a hard campaign aimed at New York or California could get a candidate some few hundred thousand votes that he might not otherwise have obtained. So would a campaign designed to appeal to the Southern or the Mountain states, let us say. There is more paydirt now in large industrial states. If Presidents were elected by popular vote, there might be more to gain elsewhere.

On balance, therefore, the smaller states, especially those that are relatively homogeneous and nearly one-party, should prefer popular election over the present system. But that does not mean that some small-state Senators and Representatives may not also perceive possible advantages in the present system. There is first of all a symbolic value in play for the small states, since the electoral college, on its face, confirms the federal structure, and the equality, as in the Senate, of all states, large and small. Secondly, circumstances are conceivable in which tiny shifts of popular votes in a group of small states, combined with equally minor shifts in at least one big state, could swing the election, regardless of the total national popular vote. In 1960, small shifts of popular votes, totaling no more than some 11,000 in New Mexico, Hawaii and Nevada, as well as in Illinois and Missouri, could have put Nixon in office.

The possibility of such a decisive role falling to a group of small states is highly remote. Actually, it is small margins of the popular vote in the big states that have often been decisive, and in any event, this much greater likelihood exerts its powerful influence on the nominating process, and on the nature of Presidential campaigns. But some small-state Senators and Representatives may take comfort in the other possibility, however remote; they may think it worthwhile to retain the present system because circumstances are conceivable in which the apparent and generally ineffective malapportionment in favor of the small states may actually work out that way. This is a remote expectation, but it is not an irrational one, and those who entertain it are entitled to it. The fact that they may entertain it does not alter the realities that should control the judgment of Representatives from large states. It simply happens that the electoral college can satisfy, at once, the symbolic aspirations and remote hopes of the small states, and the present, practical needs of the large ones. Not many human institutions work out quite as artistically as that.

Whatever its other effects and consequences might be, a system of popular election would seriously endanger the two-party system, and hence the stability of our politics. The electoral college makes it impossible for a third-party candidacy to have any sort of an impact, to entertain any hopes of deadlocking the election and thus putting itself in a good bargaining position, unless it has a strong regional base. And even George Wallace, who did take five Southern states in '68 couldn't do it. For a third-party candidate can get up to 20 percent or more of the popular vote, and yet no or every few electoral votes. And so third-party candidates that have a general national appeal are effectively deterred. Popular election, on the other hand, would invite them; and it would do so without deterring the regional candidacies that are now possible. In order not to put plurality Presidents with weak mandates in office, the popular election amendment now before us provides for a run-off in the event that no candidate achieves 40 percent of the popular vote. One strong minor party candidate, or several weaker ones together, would stand an excellent chance of keeping anyone from getting 40 percent, and thus of putting themselves in a worthwhile bargaining position in the period between the first election and the run-off.

Candidates like Eugene McCarthy or Nelson Rockefeller gave little thought in 1968 to making an independent race after they lost the nomination, because a popular vote of even as much as 25 percent could well have left them with no electoral votes at all. But under a system of popular election, every consideration that brought forth issue-oriented candidates for the nomination would with equal or even greater force propel them into the general election. There is a strong possibility, if not probability, that under a system of popular election the run-off would be typical; the major party nomination would count for much less than it now does; there would be little inducement to unity in each party following the conventions; coalitions would be formed not at conventions but during the period between the general election and the run-off; and the dominant positions of the two major parties would not long be sustained. This sort of unstructured, volatile multi-party politics may look more open. So it would be—infinity more open to demagogues, to quick-cure medicine men, and to fascists of left and right. Where a multi-party system has been tried, it has been found costly in just this way, and it has scarcely yielded the ultimate in participatory democracy or good government.

Another benefit of the present system, as Professor Ernest J. Brown of the Harvard Law School has pointed out, is that it "isolates and insulates charges of voting

irregularities." Most frequently, a shift in popular votes, even if it should change the result in a state, will not affect the national outcome. Claims of voting irregularity are consequently not often pursued. But if everything depended on the total popular vote, we would very likely face in each close election, as Professor Brown has said, "re-examination of every ballot box and voting machine in the country, not to mention also the records of registration and qualification of voters." We could not possibly continue to let the states run the elections as they now do. Centralized federal control of qualifications for voting very probably, and centralized federal control of the counting process certainly, would be essential. There is no call, perhaps, to be unduly alarmed at this prospect. We are not quite a South American republic yet. But there is no use blinking the fact, either, that central control of vote counting opens up opportunities for national manipulation. Nobody is likely to seize these opportunities in the near future, but surely it is better that they not be available.

To approve of the present electoral college system as in essence more equitable and safer than any substitute that has been proposed is not to say that it is perfect. It needs prompt improvement in at least two respects. There is no good reason why an elector should be free—as in theory the electors are now free—to vote his own personal preference and thus break the unit rule. To make sure that this cannot happen, the electors should be abolished as such, and the electoral vote of each state should be cast automatically for the popular winner.

Another fault of the present system—although it has actually manifested itself only once since passage of the 12th amendment in 1804—is that in the event that no one has a clear majority of the electoral vote, a President is chosen by the House of Representatives. But members of the House on such an occasion do not vote individually, in the usual fashion. Rather each state's delegation polls itself, and a majority of each delegation then casts its state's vote, one vote per state, whether New York or Alaska. This method has nothing to commend it. Election by a majority of the individual votes of members of the House would be infinitely preferable, as would election by a joint session of Congress, each Senator and Representative casting one equal vote. Representative Bingham of New York has proposed a run-off within the electoral college system, and that is also a possible cure. Otherwise, however, the electoral college needs no fundamental change. And as John F. Kennedy said in 1956, quoting Falkland, "When it is not necessary to change, it is necessary not to change."

SPEECH OF PRESIDENT NIXON ON VIETNAM WAR

HON. SAM STEIGER

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

(Mr. STEIGER of Arizona asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEIGER of Arizona. Mr. Speaker, I would like to join the obviously large ranks of those who wish to express confidence in the President's speech last night. I think what makes it acceptable to Members on both sides of the aisle is the fact that the President requested nothing that was not achievable and expressed the firmness and resolve in the hearts of all Americans, and promised nothing which could not be delivered.

I pray that all of us maintain the support that we have expressed here today throughout the trying times that are sure to come in the immediate future.

DEPARTMENT OF PEACE

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. RYAN. Mr. Speaker, more and more Americans in and out of government realize that the spiralling arms race must be brought under control and international tensions lessened. More and more of these concerned Americans are coming to the conclusion that, if peace is to be achieved, there must be strong institutions devoted to the development of policies which are calculated to promote peace.

I have received numerous letters and telegrams calling for the establishment of a Department of Peace. I introduced legislation in the 90th Congress; and I am currently cosponsoring legislation, H.R. 6501, which has 24 other cosponsors, that would create the first Department of Peace.

A Secretary of Peace would be able to devote his energies to pressing the need for peace upon the executive and legislative branches of the Government and would institutionalize a perspective which is sorely needed in our Government at this time. The Department of Peace would sponsor programs which bring about conditions conducive to peace.

In an article published in the April 2 edition of the Los Angeles Times, Arthur Larson, the director of the Rule of Law Research Center at Duke University, examines the possible role of a Department of Peace. I recommend this interesting and informative article to my colleagues:

PLAN FOR A U.S. PEACE DEPARTMENT

(By Arthur Larson)

The argument about whether to create a new Department of Peace is in danger of getting off on the wrong foot. Too much of the discussion is about what the department would symbolize, rather than what it might do. And, of course, whether a new department would do the job more efficiently than existing agencies.

The symbolic line of argument adopted by some proponents runs like this: Surely peace is important enough to deserve a department of its own. We have an enormous War Department, which is no less a War Department because it goes by the euphemism of Defense Department. Why not then a Peace Department?

The symbolic counter-argument, voiced by President Nixon among others, is that to create a new department and call it the Peace Department would be to imply that the State Department and Defense Department were themselves not interested in peace.

If the debate stays on this level, there is little likelihood that a Department of Peace would get President Nixon's support. At that there is a different approach to the question that might well induce President Nixon to view the matter in a more favorable light.

The current bill, recently introduced in the House by Rep. Seymour Halpern (R-N.Y.) and 60 others, and in the Senate by Sen. Vance Hartke (D-Ind.) and 14 others, would transfer to the Department of Peace three

principal operating agencies: the Peace Corps, the Arms Control and Disarmament Agency (ACDA), and the Agency for International Development (AID). It would transfer to the new department the functions of the secretary of state relating to specialized agencies affiliated with the United Nations. It would create a Peace Institute to train citizens for public service in the cause of peace. And it would establish a "Joint Committee of Congress for Peace."

PLAN WIDE IN SCOPE

When one looks at the components that would form the core of the proposed department, it becomes apparent that they have one characteristic in common: They are all agencies that would carry on everyday operations with a bearing on world peace. They are not engaged in the making of foreign policy nor, for the most part, in the carrying on of traditional diplomacy.

This distinction was viewed as fundamental by the best-known Republican secretary of state of modern times, John Foster Dulles. I first became aware of this when I assumed the directorship of the U.S. Information Agency in 1956. This agency, which by that time had become independent, had earlier been a part of the State Department, and there was a continuing controversy over whether it ought to be returned to the State Department.

In my first conversation with Secretary Dulles on this point, he began by explaining why he thought there should be a sharp line between the making and execution of foreign policy, on the one hand, and the carrying on of special operating programs, such as foreign aid and information programs, on the other. He had a strong conviction that he could not do his primary policy job if he had to be saddled also with these operational jobs. He climaxed our discussion of this point by exclaiming: "If I have to take on all these operating agencies, I will end up as nothing but a glorified office manager, like (Secretary of Defense) Charlie Wilson."

AGENCIES NOT ORGANIC

A glance at the organization chart of the State Department will reveal that the three existing agencies to be transferred to the Department of Peace do not appear as an organic part of the State Department structure on the same basis as the rest of the department.

The Arms Control and Disarmament Agency is, strictly speaking, not a part of the State Department at all, and in the Government Organization Manual is listed among the independent agencies. Its director, however, is subject to the policy direction of the secretary of state. The Peace Corps and AID are technically part of the State Department, but report directly to the secretary. All three of these agencies could be detached from the Department of State without any wounding of the main body of the department.

There remains the question of where to put them. It is by now clear that the Nixon Administration shares the aversion felt by President Eisenhower to having bits and pieces of agencies floating all over Washington. Wherever possible, independent operating agencies, such as those making up the poverty program, are being subsumed under major departments. There is no major department in existence suitable to take on the operations of the Peace Corps, the ACDA, and the AID, and so by this process of reasoning we finally come to the desirability of grouping them into a new Department of Peace.

There need be no threat in all this to the State Department's preeminence in foreign policy. It has always been clear, for example, that the U.S. Information Agency, an independent agency, takes its foreign policy guidance from the State Department. Similarly, if the ACDA were in the Peace Department,

direction on foreign policy aspects of disarmament negotiations would have to come from the Secretary of State, and the director of ACDA when acting as disarmament negotiator would have to be subordinate to the secretary of state.

Once it is accepted that the predominantly operating programs should be placed in the Department of Peace, it would logically follow that one more large operation should be added to the three listed in the current bill: the entire complex of educational, cultural, and other overseas programs and exchanges.

There is something incongruous about the secretary of state presiding over the routine tasks of dispatching jazz bands to Africa and athletes to Asia. For many years the administration of these programs has been kicked around between the State Department, the U.S. Information Agency, and other departments, and they are now mostly in the State Department. I recall that at one point on the eve of the U.S. exhibit in Moscow (which, incidentally, was mainly handled by the Department of Commerce), President Eisenhower called me in and said, "I can't possibly keep track of who is responsible for all these exhibits and exchanges and traveling sopranos, and so I am going to hold you responsible for them no matter what department they're in."

The same distinction between policy and operations also justifies the assignment to the Peace Department of relations with the U.N. specialized agencies, such as the Food and Agricultural Organization (FAO), the World Health Organization (WHO), the U.N. International Children's Emergency Fund (UNICEF), the International Bank for Reconstruction and Development, and the International Monetary Fund. Overall political relations with the United Nations, however, would remain the responsibility of the secretary of state.

I suspect that the key question in the Peace Department debate will be the one that President Nixon instantly raised when the matter was put to him: Why do you need a Peace Department when you have a State Department? An answer frequently given is that the mission of the State Department is not to foster peace as such, but rather to promote the national interests of the United States in its international relations. It is not difficult to predict what the State Department will reply to this. It will say that the highest national interest of the United States is peace, and that peace is the all-pervading purpose of our foreign policy. Certainly this is what is always said in public speeches.

The cynic may say it is just rhetoric, especially in view of the State Department's performance on Vietnam. But, rhetoric or not, it is certain to form an insurmountable barrier to any Peace Department proposal that bases its division of function on a distinction between promoting peace and promoting American interests.

No such barrier, however, need exist when the line is drawn between operational programs that help build the long-range conditions for a peaceful world, and the formulation and application of high foreign policy. To keep this division of labor clear, I would personally delete from the present bills a paragraph calling on the Peace Department to make recommendations to the President (not to the secretary of state) for the "pacific settlement of current international controversies." This seems to me to trespass too deeply into the policy function of the secretary of state who already has plenty of trespassing to worry about from the direction of the Defense Department and the office of the President's Special Assistant on National Security.

PEACE INSTITUTE URGED

This is not to say that the Peace Department should be no more than a consortium of operating programs. The broad purposes of the Department, to which these components

would contribute, include developing plans and programs to foster peace, exercising leadership in coordinating governmental activities related to peace, and working with other governments and with private institutions in research and planning for the peaceful resolution of international conflict.

One of the most promising ideas in the current bills is the creation of a Peace Institute, which could afford plenty of scope for long-range activities not now adequately provided for elsewhere. As presently conceived, somewhat on the model of the military service academies, it would handle the training of personnel in the new skills and techniques needed by persons engaged in both public and private activities devoted to building peace.

But on the analogy of the U.N. Institute for Training and Research (UNITAR), the Peace Institute might also be made the focal point for the government's part in the fast-growing field called Peace Research. The ACDA has usually had a substantial budget for this type of work, and the placing of primary responsibility within the Peace Department for this kind of research could help to give this activity the prominence and support it deserves.

ACTIVITIES UNDER WAY

For example, for about a dozen years there has been growing throughout the world a movement among lawyers called World Peace Through Law. The World Peace Through Law Center, of which Charles Rhyne is president, has an elaborate blueprint for needed research in every aspect of international order and conflict where law might have any contribution to make.

Somewhat similar activities are on foot among other disciplines. The Peace Research Committee, under the co-chairmanship of Dr. Harold Taylor and myself, about 10 years ago published six "designs for research" in such fields as law, science, economics, and psychology, with about 550 specific projects described. The new Department of Peace could provide a much-needed point of contact within the government for this burgeoning effort on the part of private scholars and organizations.

In summary, the organization of a Department of Peace can be adequately justified on strict grounds of organizational efficiency. If, in addition to this, it is also a dramatic demonstration to the world of the importance we attach to building peace, that is a bonus, and a very fine one indeed.

THOUGH MANY, WE ARE ONE

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. ROYBAL. Mr. Speaker, I am indebted to Commissioner Vicente T. Ximenes, of the U.S. Equal Employment Opportunity Commission, for bringing to my attention the following expression of pride in the heritage of an American citizen of Mexican descent written by Robert U. Barela, of the El Rancho Unified School District, Pico Rivera, Calif.:

THE AMERICAN-MEXICAN CREED

(By Robert U. Barela)

It is with great pride and dignity to say I am proud of being an American of Mexican descent.

The past has shown our contribution to American History and culture. We have served our country in conflict and in peace with valor and distinction. We have done this to conserve that freedom and liberty that makes America my home. Through education we can all strive for a better home for us and for generations to come.

America has given me a treasure. Closed for a while, because of discrimination and oppression from a few, but now it is reopened with priceless gems including jewels of freedom that sparkle with the right to think, speak, worship, and learn. This is mine, and I pledge myself to protect it from all injustices both foreign and domestic. As a loyal citizen I will nurture this seed of freedom so that others can share these rights given to me by birth.

I promise to abide by the United States Constitution; to respect her flag; to respect the rights and opinions of others; to obey the laws and courts, and uphold all the beliefs of the American way of life.

My country has now given me more opportunity to help myself, and I promise to promote the ideals of a democratic government, to contribute again toward a better and greater America for all. Though many, we are one, dedicated to that task of preserving our cultural heritage and the principles that will keep America free.

LONG BEACH MUNICIPAL BAND: A 60-YEAR TRADITION

HON. CRAIG HOSMER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. HOSMER. Mr. Speaker, the city of Long Beach, Calif., will pay tribute to a most unique organization on Thursday, May 29, but I would like to get the jump on the city and pay my own tribute today.

The organization to which I refer is the Long Beach Municipal Band, an outstanding, 36-member musical contingent which holds at least two major distinctions. It is America's busiest band, plus it is the only full-time municipal band remaining in the United States.

Under the baton of Charles J. Payne since 1956, the Long Beach Municipal Band annually gives more than 600 performances, including 200 concerts a year in the Long Beach Unified School District. In addition, it holds a year-round series of free band concerts in the city parks.

The tradition of the municipal band is well honored by the city of Long Beach, which maintains the organization by providing sufficient municipal funds to make it possible for the musicians to make playing in the band a 12-month-per-year, full-time career.

Its first concert was given March 13, 1909, under the leadership of E. Harry Willey, then operator of a popular local ballroom. Willey so ardently advocated the formation of a civic band that the issue ultimately went on the ballot, where it was overwhelmingly approved. As recently as 1957, the issue of whether or not to continue support of the band again went on the ballot, and again the electorate approved expenditure of city funds for a full-time band.

Countless Navy and Coast Guard ships as well as military vessels from other nations have been musically greeted on arrival and departure from the port of Long Beach and the Long Beach Naval Base over the past six decades. The band likewise is a regular performer at civic functions.

The city and the Long Beach Regional

Arts Council will honor this great organization on May 29. And, as befits the organization's history, it will mark the occasion by performing in concert.

Mr. Speaker, the municipal band is a wonderful part of the city of Long Beach, and I am happy to pay tribute to its members on its 60th anniversary.

TAXICAB DRIVERS OPPOSED TO METERS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. CONYERS. Mr. Speaker, there has been consideration given to the possibility of installing meters in taxicabs in the District of Columbia. The question involves the repeal by Congress of the rider to the Appropriations Act which forbids the use of meters in cabs in the city.

It has been brought to my attention that many of the cabdrivers in the District of Columbia are unalterably opposed to the installation of meters. They feel that it will inevitably lead to controls and limitations inimical to the independent cabdriver-owner, and that it will pose a serious threat to taxi service available in the District.

Therefore, the taxi industry group is seriously concerned about and opposed to any effort to repeal the rider to the Appropriations Act. The group consists of 43 of the 62 associations and companies of taxi drivers in the District, thus it is broadly representative of approximately 80 percent of the industry. They have asked to testify before the Senate and House subcommittees on the District at the hearings on the subject.

For the benefit of my colleagues, I would like to share with you the following open letter from the taxicab industry group to the Honorable JOSEPH D. TYDINGS and JOHN L. McMILLAN. The letter appeared in the March 27 issue of the Washington Daily News and presents the views of those most directly affected by the decisions concerning the meters:

[From the Washington Daily News,
Mar. 27, 1969]

AN OPEN LETTER TO THE HONORABLE JOSEPH D. TYDINGS AND THE HONORABLE JOHN L. McMILLAN, CONCERNING THE TAXICAB INDUSTRY IN WASHINGTON

HON. JOSEPH D. TYDINGS,
Chairman, District of Columbia Committee,
U.S. Senate, Washington, D.C.

HON. JOHN L. McMILLAN,
Chairman, District of Columbia Committee,
House of Representatives, Washington, D.C.

DEAR SIRS: We, the undersigned, wish to go on record as unalterably opposed to the installation of meters in the taxicabs of the District of Columbia as well as to a limitation on the number of taxicabs. We also urge that the Appropriations Bill Rider regarding the installation of meters remain a part of the Bill.

In other cities, meters have either followed or preceded a limitation on the number of cabs. You don't have one without the other. Limitations on cabs will force the independent cab driver out of business. The taxi business is unique here in that 90 percent

of the cabs are owner-operated, therefore the passenger gets a better and safer ride because of the drivers' investment. This is not true in other big cities with meters and limitations. Because he is an independent business man, the owner-operator has better equipment and exercises greater care than one who is not an owner. It is the independent cab drivers in Washington, D.C., who have given our city the best taxi service of any city in the United States. This is a recognized fact, testified to by the many visitors who ride our cabs daily as well as the many Senators and Congressmen who travel worldwide and know first hand about good service.

Meters will drive thousands of passengers away from our cabs. Meters will bring higher fares. If we must judge from what other cities do, or have done, we will have poor service in the District of Columbia. Persons who now ride cabs and know the cost of a trip before telephoning or hailing a cab, will no longer know that cost. Nor will they be able to ascertain this information before the trip has been completed, for who knows what a meter trip will cost for one block or for one mile. The streets and traffic conditions play a major part in how long the shortest trip will take and the ultimate cost. So, the revenue from the passengers that the meters drive away will have to be made up by higher fares. The higher the fares, the more passengers the taxi industry will lose. Finally, only the rich will be able to afford to use a cab.

Let's set the record straight!

In the recent taxicab rate hearing, the Taxicab Industry Group, composed of 43 of the 62 associations and companies in the District of Columbia, representing approximately 80 percent of the cab drivers, petitioned for an increase in taxi fares.

The only available figures indicate that 42 percent of all the taxicab business is located in No. 1 Zone and we petitioned for a 33 percent increase there.

We further petitioned that straight fares would be paid by all passengers other than when two or more passengers enter at the same time and depart at the same destination. This would give us a substantial increase depending on the volume of additional pick-ups.

All petitioners for a fare increase endorsed the straight fare proposal made by The Taxicab Industry Group.

Contrary to the misinformation being circulated, of the 62 associations and companies in the District of Columbia, only 3 are in the insurance business and not more than 10 of that number are involved in selling cars.

At the recent taxicab hearing before the Public Service Commission, the representative of the Federation of Citizens Associations of the District of Columbia testified that the Federation was opposed to meters in taxicabs.

Recommendations to improve service:

We recommend that specially designated hack stands be established downtown during the evening rush hours for the convenience of the riding public and the taxi driver.

The adoption of our recommendation on straight fares would immediately improve service to the riding public because the drivers would have an added incentive to pick up additional fares.

In order to give further relief to the taxi industry, we take this opportunity to urge the Public Service Commission to hasten its conclusion on the additional fare increase. It is our desire that the rules and regulations governing the taxi industry remain such that we can all continue to make a living in this free enterprise system rather than turning the taxi industry over to a chosen few (monopolized by those few who have the financial resources to survive limitation).

Respectfully submitted.

PRESIDENT NIXON'S VIETNAM MESSAGE

HON. CHARLES E. CHAMBERLAIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 15, 1969

Mr. CHAMBERLAIN. Mr. Speaker, it is most encouraging that within the past few days, Hanoi has restated its position and that we have restated ours and that in doing so there appears to have been a faint, but still discernible, hint of movement by both sides. The new administration has taken a conciliatory position. We have recited again that we are not asking for bases—or military ties—and that we have no intention of imposing any form of government on the people of South Vietnam. We have indicated our willingness to accept self-determination by South Vietnam, the participation of all political groups, any government that is the result of the free choice of the people, and, reunification if that is what the people of the North and South both want.

It is my earnest hope that the President's plea that all of us, regardless of how we may feel about the war, will reunite behind this new quest for peace. There comes a time when we must have faith in something and this is a time when we must have faith in the President of the United States for this is just another way of saying that we must have faith in America, our citizens, and ourselves.

HOUSE OF REPRESENTATIVES—Monday, May 19, 1969

The House met at 12 o'clock noon.
The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

I urge that supplications, prayers, intercessions, and thanksgivings be made for all men.—I Timothy 2: 1.

Almighty God, our Heavenly Father, who art with our astronauts flying through space and who art with us walking on this planet, make us positive factors in the world's fields of endeavors as we seek to extend our knowledge of the universe, to cultivate justice among men, peace between nations, and good will in the hearts of all men.

Make plain Thy path, help us to see it clearly and then give us courage to walk in it knowing Thou art with us all the way.

In this troubled time save us from the hot fever of foolish action and from the cold fear which would make futile any activity on our part. May Thy spirit live in us and in so doing lead us to a life together where men may live with dignity, self respect, and understanding love.

Bless our astronauts, bless Thou the men and women in our Armed Forces; may their contribution and ours become a blessing to our Nation and to all mankind. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, May 15, 1969, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 6269. An act to provide for the striking of medals in commemoration of the 300th anniversary of the founding of South Carolina.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 995. An act to provide for the striking of medals in commemoration of the 150th anniversary of the founding of the State of Alabama.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 1011) entitled "An act to authorize appropriations for the saline water conversion program for fiscal year 1970, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JACKSON, Mr. ANDERSON, Mr. MOSS, Mr. ALLOTT, and Mr. JORDAN of Idaho to be the conferees on the part of the Senate.

THE LATE MRS. JOHN FOSTER DULLES

(Mr. McCORMACK asked and was given permission to address the House

for 1 minute and to revise and extend his remarks.)

Mr. McCORMACK. Mr. Speaker, one of the greatest men and one of the most outstanding Americans that I ever met in my journey through life was the late John Foster Dulles, who for a number of years was Secretary of State, and who rendered outstanding service in our country's behalf. I had the pleasure on several occasions of meeting Mrs. Dulles, a very sweet lady, a wonderful character, and one who by her love showed her dedication to the career of her great husband, making every sacrifice necessary to help him to perform the responsible and grave duties of his office during the most trying period of our Nation's and the world's history.

I was very sorry a few days ago to read in the newspapers of the death of Mrs. Dulles. I want to take this time to express my deep sorrow in the passing of this charming lady whose beautiful outlook on life inspired everyone who knew her or who knew of her.

During the life of her late distinguished husband she cooperated with him in a manner that inspired him and encouraged him to carry on the great work that he was called upon to perform in connection with the national interest of our country.

Mr. Speaker, I express my deep sorrow in the passing of Mrs. Dulles and I extend to her sons and her daughter and other loved ones the deep sympathy of both Mrs. McCormack and myself in their bereavement.

Mr. GERALD R. FORD. Mr. Speaker, will the distinguished Speaker yield?

Mr. McCORMACK. I yield to the distinguished minority leader.

Mr. GERALD R. FORD. Mr. Speaker, it is typical of the distinguished Speaker's wonderful attitude toward fine people, to take the well of the House on this occasion to take note of and make comment concerning the passing of Mrs. Dulles.

Mr. Speaker, the former Secretary of State served not only a Republican President but several Democratic Presidents in various capacities. He was a great public servant. Mrs. Dulles contributed significantly to his doing what he saw was right on behalf of our country.

I believe the country has lost a great lady in Mrs. Dulles, the wife of a great public servant.

Mr. McCORMACK. I appreciate very much the contribution of my friend, the distinguished minority leader.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I wish to commend the distinguished Speaker of the House the gentleman from Massachusetts, (Mr. McCORMACK), for making these remarks in tribute to Mrs. Dulles. As I am sure the Speaker is well aware, Mrs. Dulles was a native of Auburn, N.Y., the center of my congressional district and, in fact, she first met

the late Secretary of State Dulles when his father was serving as pastor of the Presbyterian Church in Auburn. I know the people of Auburn who knew her and the Secretary are saddened, as we all are, in her passing.

Mr. Speaker, I want to join with the distinguished Speaker in extending our deepest sympathy to the members of the family who remain.

Mr. McCORMACK. I appreciate the remarks of the gentleman from New York.

THE LATE HONORABLE CHARLES A. WOLVERTON

(Mr. HUNT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HUNT. Mr. Speaker, I regret to inform my colleagues of the death of our former and distinguished colleague, the Honorable Charles A. Wolverton, who served in the House of Representatives for 32 years, longer than any other New Jersey Member.

Prior to his election to the 70th Congress in 1926, Mr. Wolverton, a native of Camden, N.J. and a 1900 graduate of the University of Pennsylvania Law School, served as assistant prosecutor of Camden County, a special assistant attorney general of New Jersey in 1913-14, and a member of the New Jersey Assembly from 1915-18, being named speaker of that body in 1918. He then served as Camden County prosecutor until being elected to the U.S. House of Representatives.

During his 16 consecutive terms as Representative from New Jersey's First Congressional District, Charles Wolverton served with honor and distinction, rising to the chairmanship of the House Interstate and Foreign Commerce Committee. His interests were many and varied; always diligent in his tireless and selfless efforts to represent all the people, he was a man of high principle, a statesman, a man of impeccable integrity. We are indeed fortunate to have had the benefit of his wisdom and leadership in his prime years and it is with the deepest respect that I pay tribute to this true Christian gentleman and lifelong public servant.

Upon Congressman Wolverton's retirement from the House in 1958, the Honorable WILLIAM T. CAHILL was elected to the First District until in 1967, it became my honor and privilege to represent this District following redistricting. Mr. CAHILL is unavoidably absent today from the House on official business, and joins me in this tribute to our close friend and former colleague.

For the benefit of the Members of the House, Mr. Wolverton passed away at 6 p.m., May 16 at Our Lady of Lourdes Hospital, Camden, N.J. at the age of 88 years. I am informed that services and burial are to be private.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. HUNT. I am happy to yield to the

minority leader, the gentleman from Michigan.

Mr. GERALD R. FORD. It was my privilege to serve with Charlie Wolverton for 10 years. All who knew him loved him. He was kindly, friendly, and most solicitous of the newer and younger Members. All who knew Charlie Wolverton respected his great ability as a legislator, both on the floor and in committee. He was a great chairman of the Committee on Interstate and Foreign Commerce in the 83d Congress. He was the father of a great deal of progressive and substantial legislation. His leaving the House was a loss. Those who knew him and served with him have great memories of a great Member of the House of Representatives.

Mr. HUNT. I thank the gentleman for his fine statement.

Mr. PELLY. Mr. Speaker, will the gentleman yield?

Mr. HUNT. I yield to the gentleman from Washington.

Mr. PELLY. I join the gentleman from New Jersey in paying tribute to the life and service of Charlie Wolverton. He was my first chairman. I never knew a man who worked harder or actually worked the members of his committee harder. It was a great experience for me. He was very kind to me as a new Member, very helpful, and I feel although he lived a long and useful life, his death is a loss to the country. He was a great public servant and dedicated his efforts especially in trying to provide a low-cost health program for the American people.

Mr. HUNT. I thank the gentleman from Washington for his fine contribution.

GENERAL LEAVE TO EXTEND

Mr. HUNT. Mr. Speaker, I ask unanimous consent that all Members who may desire to do so may have 5 legislative days in which to extend their remarks on the life and service of the late Honorable Charles A. Wolverton.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PRAYER FOR THE ASTRONAUTS

(Mr. HECHLER of West Virginia asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HECHLER of West Virginia. Mr. Speaker, we were pleased to hear our esteemed Chaplain of the House of Representatives include in his prayer what is in all of our hearts as we follow the progress of our three brave astronauts. Yesterday as I attended Trinity Episcopal Church in Huntington, W. Va., Frederick H. Dennis, assistant to the rector of Trinity, offered the following prayer which was developed from the prayer for a person going to sea:

O, eternal God, who alone spreadest out the heavens, we commend to Thy almighty protection Thy servants for whose preservation in the outermost parts of the cosmos our prayers are desired. Guard them, we beseech Thee, from the dangers of the uni-

verse, from sickness and from every evil and destruction to which they may be exposed. Conduct them in safety to their destination, and bring them safely home, with a grateful sense of Thy mercies; through Jesus Christ our Lord. Amen.

I am certain that in churches throughout the land prayers were offered for the safety and success of these intrepid explorers of the heavens.

PERU'S SEIZURE OF ANOTHER FISHING BOAT SPARKS CONGRESSIONAL HEARING

(Mr. PELLY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. PELLY. Mr. Speaker, last Friday Peru seized another American fishing vessel which was drifting on the high seas, 25 miles off the Peruvian coast.

The issue has not changed, Mr. Speaker. Peru, the same as some of her Latin and South American neighbors, claims a jurisdiction of 200 miles off her shore which is not recognized by international law.

But, what makes this latest seizure so much more serious is that a delegation from Peru only a day or so before, had concluded a round of talks, labelled "cordial" by our State Department. The Washington, D.C., meetings had been held with the State Department looking toward better relations between our countries.

For 15 years these seizures have been taking place, and for this entire time the Peruvians have refused to take the issue of their claim of 200 miles jurisdiction to the conference table or to submit it to mediation, arbitration, or the International Court of Justice.

Now, Mr. Speaker, there is but one way to go, as I see it, and the chairman of the Fish and Wildlife Subcommittee of the House Merchant Marine and Fisheries Committee the gentleman from Michigan (Mr. DINGELL) at my request has scheduled a hearing shortly on my bill—H.R. 10607—to cut off imports of fish and fish products from any country illegally seizing U.S. fishing vessels.

This is a grave matter, Mr. Speaker, and I sincerely hope my colleagues will lend their support toward bringing this measure to the floor and seeing that it is enacted into law.

FAMILY PRESERVATION MONTH

(Mr. WILLIAMS of Pennsylvania asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WILLIAMS of Pennsylvania. Mr. Speaker, Raymond P. Shafer, Governor of the Commonwealth of Pennsylvania, has designated the month of June 1969 as Family Preservation Month, and his message reads as follows:

Marriage is a vital institution and a close family unit an integral part of an enlightened society.

Every child needs the love of both parents and in the case of broken homes, he is always the innocent bystander who faces the greatest hardship. Too often his affection is

torn between those he has learned to love and it is hard for him to understand a separation.

Therefore, as Governor of Pennsylvania, I am happy to designate the month of June 1969 as Family Preservation Month in the Commonwealth and ask every citizen to do what he can to curb the rising divorce rate in this State and every State in our Nation.

The type of education campaign that could be conducted during Family Preservation Month are:

First. Encourage couples to seek assistance as soon as marital problems start to develop.

Second. Advocate educational programs in the responsibilities and roles in marriage and family life.

Third. Encourage couples to seek marriage counseling and guidance when problems in the home cannot be resolved by the couple alone.

THE WAR IN VIETNAM

(Mr. ANDREWS of Alabama asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. ANDREWS of Alabama. Mr. Speaker, last week two fine young married men, from my district, were killed in Vietnam. This is happening all too frequently in a war that should have been won years ago. If the President has a secret plan to end this war, let me plead with him to come forward with it. If he does not, let me beg him again either to fight this war to win it or get out of Vietnam.

APPOINTMENT OF CONFEREES ON S. 1011, AUTHORIZING APPROPRIATIONS FOR SALINE WATER CONVERSION

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 1011, to authorize appropriations for the saline water conversion program for fiscal year 1970, and for other purposes, with the House amendment thereto, insist on the House amendment, and agree to the conference requested by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Colorado? The Chair hears none, and appoints the following conferees: Messrs. ASPINALL, JOHNSON of California, HALEY, SAYLOR, and HOSMER.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar Day. The Clerk will call the first bill on the Consent Calendar.

AUTHORIZING ROUNDTRIP TRANSPORTATION TO THE HOME PORT FOR A MEMBER OF NAVAL SERVICE ON PERMANENT DUTY ABOARD SHIP OVERHAULING AWAY FROM HOME PORT

The Clerk called the bill (H.R. 8020) to amend title 37, United States Code, to provide entitlement to roundtrip transportation to the home port for a member of the naval service on permanent duty aboard a ship overhauling away from

home port whose dependents are residing at the home port.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to ask a question or two concerning this bill.

What has been the procedure in the past? I assume we have had ships repaired in yards distant from home ports. Has there been no payment of any kind in the past?

Mr. NEDZI. Mr. Speaker, will the gentleman yield.

Mr. GROSS. Of course I yield to the gentleman from Michigan.

Mr. NEDZI. The procedure in the past has been not to make such payments with reference to a ship being repaired away from the home port and away from where the dependents or seamen and officers of the Navy lived. The individual has had to furnish his own transportation to go back to his home.

Mr. GROSS. I understand the committee considers this to be an injustice and I think that is probably true. But beyond that, are vessels now being repaired in larger numbers away from their home ports, or just what is the situation?

Mr. NEDZI. Mr. Speaker, if the gentleman will yield further, I do not believe there is any difference in the number of vessels being repaired away from their home port. I think this is just a recognition that this procedure represents an injustice and the effort is now being made to correct it.

Mr. GROSS. Then, the legislation is not prompted by a greater number of vessels being repaired away from their home ports? We are not talking about building vessels, are we? We are talking about repairing them for the most part, are we not?

Mr. NEDZI. If the gentleman will yield further, just repairing them.

Mr. GROSS. Yes. It would be my hope, and I wish the committee had inserted some language calling on the Department of the Navy to do everything within its power to hold down the cost of legislation of this type by seeing to it that ships which are normally berthed on the west coast are repaired on the west coast, and the same for the east coast, in the areas where the dependents of the crews that man them are located. They should make every effort to have them repaired on that particular coast, rather than transporting crew members perhaps across the continent.

Mr. NEDZI. The gentleman from Iowa expresses the concern of the committee fully. This is a matter that we discussed in the hearings which were held on this legislation. We were assured that wherever possible this is being done. Unfortunately, where there is low bidding and where some of the contracts are let out, then the Department of the Navy has no control over where the ship is going to be repaired.

Mr. GROSS. I can understand that. I am glad to have the assurance of the gentleman that the committee was concerned with the cost of this program and that it will be watching to see how it works out.

Mr. NEDZI. I think I can give the gentleman from Iowa that assurance.

Mr. GROSS. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

H.R. 8020

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 7 of title 37, United States Code, is amended as follows:

(1) The following new section is inserted after section 406a:

"§ 406b. Travel and transportation allowances: members of the naval service attached to a ship overhauling away from home port

"Under regulations prescribed by the Secretary of the Navy, a member of the naval service who is on permanent duty aboard a ship which is being overhauled away from its home port and whose dependents are residing at the home port of the ship is entitled to Government or Government-procured transportation including transportation procured with a United States of America transportation request for round trip travel from the port of overhaul to the home port on or after the thirty-first, ninety-first, one hundred and fifty-first, and two hundred and eleventh calendar day after the date on which the ship enters the overhaul port or after the date on which the member becomes permanently attached to the ship, whichever date is later."

(2) The following new item is inserted in the analysis:

"406b. Travel and transportation allowances: members of the naval service attached to a ship overhauling away from home port."

With the following committee amendment:

Strike the language on page 2 beginning at line 4 and ending with the quotation mark on line 16, and substitute the following:

"Under regulations prescribed by the Secretary of the Navy, a member of the naval service who is on permanent duty aboard a ship which is being overhauled away from its home port and whose dependents are residing at the home port of the ship is entitled to transportation, transportation in kind, reimbursement for personally procured transportation, or an allowance for transportation as provided in section 404(d)(3) of this chapter for round-trip travel from the home port of overhaul to the home port on or after the thirty-first, ninety-first, and one hundred and fifty-first calendar day after the date on which the ship enters the overhaul port or after the date on which the member becomes permanently attached to the ship, whichever date is later: *Provided, however,* that in no event shall the amount of reimbursement for personally procured transportation or allowance for transportation exceed the cost of Government-procured commercial round-trip air travel."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

INCREASING THE STATUTORY CEILING ON THE AUTHORIZED NUMBER OF MARINE CORPS RESERVE GENERAL OFFICERS

The Clerk called the bill (H.R. 6790) to authorize an increase in the number of Marine Corps Reserve officers who may

serve in an active status in the combined grades of brigadier and major general.

There being no objection, the Clerk read the bill, as follows:

H.R. 6790

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5458(a), title 10, United States Code, as amended be amended by deleting the number "ten" at the end of the subsection and substituting the number "fifteen" therefor.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING UNITED STATES CODE TO INCLUDE A FOSTER CHILD WITHIN THE DEFINITION OF "DEPENDENT"

The Clerk called the bill (H.R. 8018) to amend section 1072(2) of title 10, United States Code, to include a foster child within the definition of dependent. There being no objection, the Clerk read the bill, as follows:

H.R. 8018

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1072(2) of title 10, United States Code, is amended as follows:

(1) By inserting "a foster child," after "adopted child" in clause (E).

(2) By adding the following new flush sentences at the end:

"For the purpose of clause (E), a foster child is one who is, or was at the time of the member's or former member's death, in fact dependent on him for over one-half of his support, and residing in his household in a parent-child relationship. However, only that medical and dental care may be furnished to a foster child under this chapter which is not furnished by other non-Federal agencies."

With the following committee amendment:

On page 2, line 2, change the period to a comma and insert the following: "except a child who was placed in his household by a social service agency upon application of the member or former member, but without an agreement to adopt."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REVOLVING FUND OF U.S. CIVIL SERVICE COMMISSION

The Clerk called the bill (H.R. 9233) to amend title 5, United States Code, to promote the efficient and effective use of the revolving fund of the Civil Service Commission in connection with certain functions of the Commission, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

H.R. 9233

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1304(e) of title 5, United States Code, is amended to read as follows:

"(e)(1) A revolving fund of \$4,000,000 is

available, to the Commission without fiscal year limitation, for financing investigations, training, and such other functions as the Commission is authorized or required to perform on a reimbursable basis. However, the functions which may be financed in any fiscal year by the fund are restricted to those functions which are covered by the budget estimates submitted to the Congress for that fiscal year. To the maximum extent feasible, each individual activity shall be conducted generally on an actual cost basis over a reasonable period of time.

"(2) The capital of the fund consists of the aggregate of—

"(A) appropriations made to provide capital for the fund; and

"(B) the sum of the fair and reasonable value of such supplies, equipment, and other assets as the Commission from time to time transfers to the fund (including the amount of the unexpended balances of appropriations or funds relating to activities the financing of which is transferred to the fund) less the amount of related liabilities, the amount of unpaid obligations, and the value of accrued annual leave of employees, which are attributable to the activities the financing of which is transferred to the fund.

"(3) The fund shall be credited with—

"(A) advances and reimbursements from available funds of the Commission or other agencies, or from other sources, for those services and supplies provided at rates estimated by the Commission as adequate to recover expenses of operation (including provision for accrued annual leave of employees and depreciation of equipment); and

"(B) receipts from sales or exchanges of property and payments for loss of or damage to property, accounted for under the fund.

"(4) Any unobligated and unexpended balances in the fund which the Commission determines to be in excess of amounts needed for activities financed by the fund shall be deposited in the Treasury of the United States as miscellaneous receipts.

"(5) The Commission shall prepare a business-type budget providing full disclosure of the results of operations for each of the functions performed by the Commission and financed by the fund, and such budget shall be transmitted to the Congress and considered, in the manner prescribed by law for wholly owned Government corporations.

"(6) The Comptroller General of the United States shall, as a result of his periodic reviews of the activities financed by the fund, report and make such recommendations as he deems appropriate to the Committees on Post Office and Civil Service of the Senate and House of Representatives at least once every three years."

(b) Section 1304(f) of title 5, United States Code, is amended by striking out "investigations made" and inserting in lieu thereof "investigations, training, and functions performed".

The bill was ordered to be engrossed, and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING THE APPOINTMENT OF THE PRESENT CHAIRMAN OF THE JOINT CHIEFS OF STAFF FOR AN ADDITIONAL TERM OF 1 YEAR

The Clerk called the joint resolution (H.J. Res. 677) to authorize the President to reappointment as Chairman of the Joint Chiefs of Staff, for an additional term of 1 year, the officer serving in that position on April 1, 1969.

There being no objection, the Clerk read the joint resolution as follows:

H.J. RES. 677

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 142(a) of title 10, United States Code, the President may, by and with the advice and consent of the Senate, reappoint as Chairman of the Joint Chiefs of Staff, for an additional term of one year, the officer serving in that position on April 1, 1969.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. PRICE of Illinois. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of Senate Joint Resolution 104, a joint resolution identical to that which was just passed by the House, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore (Mr. McFALL). Is there objection to the request of the gentleman from Illinois.

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 104

Joint resolution to authorize the President to reappoint as Chairman of the Joint Chiefs of Staff, for an additional term of one year, the officer serving in that position on April 1, 1969.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 142(a) of title 10, United States Code, the President may, by and with the advice and consent of the Senate, reappoint as Chairman of the Joint Chiefs of Staff, for an additional term of one year, the officer serving in that position on April 1, 1969.

Mr. PRICE of Illinois. Mr. Speaker, this joint resolution would authorize the President, with the advice and consent of the Senate, to reappoint Gen. Earle G. Wheeler as Chairman of the Joint Chiefs of Staff for an additional term of 1 year.

Under existing law, section 142(a) of title 10, United States Code, the Chairman of the Joint Chiefs of Staff is appointed with the advice and consent of the Senate, serves at the pleasure of the President for a term of 2 years, and may be reappointed in the same manner for only one additional 2-year term, except in time of war declared by the Congress.

Gen. Earle G. Wheeler, U.S. Army, was initially appointed to the post of Chairman of the Joint Chiefs of Staff effective July 3, 1964. He was reappointed for a second consecutive 2-year term which began on July 3, 1966, and, following enactment of a joint resolution—Public Law 90-342, approved June 15, 1968—he was reappointed for an additional term of 1 year, beginning July 3, 1968.

The proposal being considered today is specifically limited to permitting the President to reappoint General Wheeler for an additional period of 1 year, beginning July 3, 1969. It would not affect any other provision of law.

The Secretary of Defense, Mr. Laird, in a letter to the Speaker of the House

of Representatives requesting early enactment of the proposed legislation, stated:

The President, as Commander in Chief of our Armed Forces, and the Secretary of Defense, believe that retaining General Wheeler in his present position would be in the best interest of the nation. General Wheeler's intimate knowledge of our over-all military posture and requirements, including operations in Southeast Asia, acquired during his tenure as Chairman of the Joint Chiefs of Staff, make it prudent and wise to retain his invaluable experience and counsel during the current and impending period of operations and negotiations affecting Southeast Asia.

In considering this resolution, the committee noted the truly outstanding qualifications of General Wheeler. His competency, integrity, and professional accomplishments are so remarkable and so widely known that they require no elaboration here today. But if further proof were needed, the fact that he has been chosen to serve under three Secretaries of Defense and two Presidents show the high, bipartisan regard and esteem in which he is held.

The committee also noted that this reappointment, if authorized would extend General Wheeler's tenure longer than would be considered appropriate, under normal circumstances. But the facts are that normal circumstances do not prevail today. As the Secretary of Defense has pointed out, military operations in Southeast Asia and the Paris peace negotiations are in a most critical and sensitive phase. Further, the President, who assumed that high office only a few months ago, has expressed his strong desire to retain the unique skills which General Wheeler has acquired during his tenure as Chairman of the Joint Chiefs, as he completes the transition in administrations.

The committee is of the opinion that the Commander in Chief should be given wide discretion in selecting his principal military advisers during periods of conflict such as those we face today. This is particularly true with respect to the highest ranking active duty member of the Armed Forces.

It is for all of these reasons that I urge the unanimous adoption of this joint resolution authorizing the reappointment by the President of Gen. Earle G. Wheeler as Chairman of the Joint Chiefs of Staff for an additional term of 1 year.

Mr. BRAY. Mr. Speaker, I concur in the remarks made by my distinguished colleague from Illinois. We have a Commander in Chief and Secretary of Defense who need and seek the advice and counsel of a man who can provide continuity during this most vital phase of operations and negotiations affecting Southeast Asia. I know of no situation created by legislative act which is not subject to exception—that is why our laws are being constantly amended, or repealed, or otherwise modified.

For example, I think the Congress was very wise when it proposed the limitation that it did with respect to a military man occupying the office of Secretary of Defense, but circumstances dictated that this limitation should be relaxed in order that General Marshall could occupy the

position of Secretary of Defense. This resolution is in the same tradition of "exception to fit circumstances."

After all, laws can be made only for "the long run," for the usual situation, for the normal set of events. Here we have an exception to the normal situation and one which requires remedial legislation. The basic law is not affected by this resolution. It represents merely an interpolated exception, the basic law is the law of the land.

It is my hope that this joint resolution will be unanimously adopted by the Congress today.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House joint resolution (H.J. Res. 677) was laid on the table.

TRIBUTE TO ALLIED WORLD WAR II VICTORY IN EUROPE AND TO GEN. OMAR N. BRADLEY, U.S. ARMY

The Clerk called the concurrent resolution (H. Con. Res. 207) in tribute to Allied World War II victory in Europe and to Gen. Omar N. Bradley, U.S. Army.

There being no objection, the Clerk read the concurrent resolution, as follows:

H. CON. RES. 207

Whereas May 8, 1970, marks the twenty-fifth anniversary of the victory of Allied forces and the termination of World War II in Europe; and

Whereas General of the Army Omar N. Bradley is acknowledged to have played a role of utmost importance in gaining that victory; and

Whereas General of the Army Omar N. Bradley is the last surviving officer of World War II having attained the rank of General of the Army; and

Whereas General of the Army Omar N. Bradley is donating his collection of personal papers; historical documents, and memorabilia to the Army military history research collection; and

Whereas the Bradley collection will be housed at Carlisle Barracks, Pennsylvania, and will be formally dedicated and opened to the public on May 8, 1970, the occasion of the twenty-fifth anniversary of V-E Day: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that one year from today on the occasion of the twenty-fifth anniversary of V-E Day, and the formal opening of the Omar N. Bradley historical collection, appropriate ceremonies be conducted at Carlisle Barracks under the direction of the Secretary of Defense in memorial tribute to the Allied victory in Europe and in memory of those who gave their lives to attain that victory, and expressing the gratitude of the American people to one of this country's greatest soldiers, General of the Army Omar N. Bradley.

With the following committee amendments:

On page 1, line 12, delete the words "Army military history research collection" and insert in lieu thereof "United States Army Military History Research Collection".

On page 2, lines 2 and 3, delete the words "one year from today".

The committee amendments were agreed to.

Mr. PRICE of Illinois. Mr. Speaker, this concurrent resolution expresses the

sense of Congress on the occasion of the 25th anniversary of V-E Day and the formal opening of the Omar N. Bradley collection, appropriate ceremonies will be conducted at Carlisle Barracks under the direction of the Secretary of Defense, in memorial tribute to the Allied victory in Europe and in memory of those who gave their lives to attain that victory, and expressing the gratitude of the American people to one of this country's greatest soldiers, General of the Army Omar N. Bradley.

Historical records will, I believe, reflect that General of the Army Omar Nelson Bradley is now and will be long remembered not only as an outstanding military commander, but also as a man of deep compassion and understanding, truly a soldier's general, loved and respected by all who served with him.

Like his West Point classmate, General Eisenhower, General Bradley's roots are in rural America. Born in Missouri on February 12, 1893, he entered the U.S. Military Academy at West Point in 1911 and was graduated in 1915.

General Bradley earned his wartime advancement on the battlefield. He commanded a corps in North Africa and later in Sicily. He led the U.S. 1st Army across the beaches of Normandy on June 6, 1944 and smashed through the German lines at Saint Lo, opening the way to the speedy liberation of France. In 1945, while in command of the 12th Army Group he broke the Siegfried Line and pushed onto the Rhine River and ultimate victory. The 12th Army Group numbered more than 1.3 million combat troops and was the largest body of American soldiers ever to serve under one field commander.

After V-E Day, President Truman selected General Bradley to become head of the Veterans' Administration during the critical postwar demobilization of our Armed Forces. He became the Army's Chief of Staff in 1948 and the first chairman of the military committee of NATO in October 1949. In 1949 General Bradley was appointed as the first Chairman of the Joint Chiefs of Staff. He became the fifth General of the Army with his promotion on September 22, 1950.

Throughout his 58 years of active duty, General Bradley has contributed greatly to our national heritage.

In order that scholars in every field of endeavor may have access to the records of his service, General Bradley is donating his collection of personal papers, battle maps, historical documents, and memorabilia to the U.S. Military History Collection at Carlisle Barracks, Pa.

The formal opening of the Omar Nelson Bradley Historical Display is scheduled for May 8, 1970, the 25th anniversary of World War II V-E Day. A ceremony will be held on that date in tribute to the Allied victory in Europe expressing the gratitude of the American people to General Bradley and the American soldiers who fought so gallantly for freedom.

I urge the adoption of this concurrent resolution.

Mr. BRAY. Mr. Speaker, I join with my distinguished colleague from Illinois in supporting this concurrent resolution,

which will further enhance the celebration of the significant historical event planned for May 8, 1970, the 25th anniversary of World War II victory by the Allied forces in the European theater. This occasion will serve to commemorate the Allied victory and to memorialize the gallant men who died to achieve that victory, and to honor General of the Army Omar Nelson Bradley.

Our Nation is, indeed, indebted to General Bradley, who has so generously donated his invaluable collection of materials gathered during his 58 years of active service to his Nation.

It is an honor to join with all Americans in expressing our deep gratitude to this great soldier and patriot.

I hope that this resolution will be unanimously adopted.

Mr. TEAGUE of Texas. Mr. Speaker, I am happy and honored today that the House has passed the resolution which I introduced on April 17, 1969, to give appropriate and due recognition to the great service of that patriot and dedicated soldier, Omar N. Bradley, at a ceremony to be held in 1970.

Mr. Speaker, it was my privilege to serve under General Bradley in World War II, and in my judgment no finer field commander has ever been produced by the American people than Gen. Omar N. Bradley. Truly he was a soldier's general. Uppermost in his mind at all times was the use of his equipment in such a way as to save the lives of the men who served under him. It was no accident that the enlisted men of the Army who served under General Bradley loved him for they knew and respected the type of officer which he was.

Following the end of World War II, President Truman called General Bradley to be head of the Veterans' Administration. He served with distinction in that post, and it was no small feat in directing this sprawling agency taxed to its utmost to meet the demands of 15 million new American veterans. He showed the same compassion and understanding for the returning American veteran that he did for the soldiers during the time of conflict. It was no accident that many dedicated physicians at General Bradley's request joined the Department of Medicine and Surgery and helped provide the fine quality of medical care which our Nation's veterans have enjoyed since that time. General Bradley also headed a commission to survey veterans' benefits which made a unique contribution in this field.

Mr. Speaker, again I reiterate my support of this proposal, and I hope that the Senate will see fit to act on it speedily, as I am sure it will, so that on the occasion of the 25th anniversary of V-E Day appropriate ceremonies may be conducted at Carlisle Barracks under the direction of the Secretary of Defense in a tribute to Allied victory in Europe in World War II; in memory to those who gave their lives to attain that victory; and to express the gratitude of the American people for General of the Army Omar N. Bradley.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

NEW HAMPSHIRE-VERMONT INTERSTATE SCHOOL COMPACT

The Clerk called the bill (H.R. 751) to consent to the New Hampshire-Vermont interstate school compact.

There being no objection, the Clerk read the bill, as follows:

H.R. 751

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress consents to the New Hampshire-Vermont Interstate School Compact which is substantially as follows:

"NEW HAMPSHIRE-VERMONT INTERSTATE SCHOOL COMPACT"

"ARTICLE I

"GENERAL PROVISIONS"

"A. STATEMENT OF POLICY.—It is the purpose of this compact to increase the educational opportunities within the states of New Hampshire and Vermont by encouraging the formation of interstate school districts which will each be a natural social and economic region with adequate financial resources and a number of pupils sufficient to permit the efficient use of school facilities within the interstate district and to provide improved instruction. The state boards of education of New Hampshire and Vermont may formulate and adopt additional standards consistent with this purpose and with these standards; and the formation of any interstate school district and the adoption of its articles of agreement shall be subject to the approval of both state boards as hereinafter set forth.

"B. REQUIREMENT OF CONGRESSIONAL APPROVAL.—This compact shall not become effective until approved by the United States Congress.

"C. DEFINITIONS.—The terms used in this compact shall be construed as follows, unless a different meaning is clearly apparent from the language or context:

"a. 'Interstate school district' and 'interstate district' shall mean a school district composed of one or more school districts located in the state of New Hampshire associated under this compact with one or more school districts located in the state of Vermont, and may include either the elementary schools, the secondary schools, or both.

"b. 'Member school district' and 'member district' shall mean a school district located either in New Hampshire or Vermont which is included within the boundaries of a proposed or established interstate school district. In the case of districts located in Vermont, it shall include city school districts, town school districts, union school districts and incorporated school districts. Where appropriate, the term 'member district clerk' shall refer to the clerk of the city in which a Vermont school district is located, the clerk of the town in which a Vermont town school district is located, or the clerk of an incorporated school district.

"c. 'Elementary school' shall mean a school which includes all grades from kindergarten or grade one through not less than grade six nor more than grade eight.

"d. 'Secondary school' shall mean a school which includes all grades beginning no lower than grade seven and no higher than grade twelve.

"e. 'Interstate board' shall refer to the board serving an interstate school district.

"f. 'New Hampshire board' shall refer to the New Hampshire state board of education.

"g. 'Vermont board' shall refer to the Vermont state board of education.

"h. 'Commissioner' shall refer to commissioner of education.

"i. Where joint action by both state boards is required, each state board shall deliberate and vote by its own majority, but shall separately reach the same result or take the same action as the other state board.

"j. The terms 'professional staff personnel' and 'instructional staff personnel' shall include superintendents, assistant superintendents, administrative assistants, principals, guidance counsellors, special education personnel, school nurses, therapists, teachers, and other certified personnel.

"k. The term 'warrant' or 'warning' to mean the same for both states.

"ARTICLE II

"PROCEDURES FOR FORMATION OF AN INTERSTATE SCHOOL DISTRICT"

"A. CREATION OF PLANNING COMMITTEE.—The New Hampshire and Vermont commissioners of education shall have the power, acting jointly to constitute and discharge one or more interstate school district planning committees. Each such planning committee shall consist of at least two voters from each of a group of two or more neighboring member districts. One of the representatives from each member district shall be a member of its school board, whose term on the planning committee shall be concurrent with his term as a school board member. The term of each member of a planning committee who is not also a school board member shall expire on June thirtieth of the third year following his appointment. The existence of any planning committee may be terminated either by vote of a majority of its members or by joint action of the commissioners. In forming and appointing members to an interstate school district planning board, the commissioners shall consider and take into account recommendations and nominations made by school boards of member districts. No member of a planning committee shall be disqualified because he is at the same time a member of another planning board or committee created under the provisions of this compact or under any other provisions of law. Any existing informal interstate school planning committee may be reconstituted as a formal planning committee in accordance with the provisions hereof, and its previous deliberations adopted and ratified by the reorganized formal planning committee. Vacancies on a planning committee shall be filled by the commissioners acting jointly.

"B. OPERATING PROCEDURES OF PLANNING COMMITTEE.—Each interstate school district planning committee shall meet in the first instance at the call of any member, and shall organize by the election of a chairman and clerk-treasurer, each of whom shall be a resident of a different state. Subsequent meetings may be called by either officer of the committee. The members of the committee shall serve without pay. The member districts shall appropriate money on an equal basis at each annual meeting to meet the expenses of the committee, including the cost of publication and distribution of reports and advertising. From time to time the commissioners may add additional members and additional member districts to the committee, and may remove members and member districts from the committee. An interstate school district planning committee shall act by majority vote of its membership present and voting.

"C. DUTIES OF INTERSTATE SCHOOL DISTRICT PLANNING COMMITTEE.—It shall be the duty of an interstate school district planning committee, in consultation with the commissioners and the state departments of education: to study the advisability of establishing an interstate school district in accordance with the standards set forth in paragraph A of Article I of this compact, its organization, operation and control, and the advisability of constructing, maintaining and operating a school or schools to serve the needs of such interstate district; to estimate the construction and operating costs thereof; to investigate the methods of financing such school or schools, and any other matters pertaining to the organization and operation of an interstate school district; and to submit a report or reports of

its findings and recommendations to the several member districts.

"D. RECOMMENDATIONS AND PREPARATION OF ARTICLES OF AGREEMENT.—An interstate school district planning committee may recommend that an interstate school district composed of all the member districts represented by its membership, or any specified combination of such member districts, be established. If the planning committee does recommend the establishment of an interstate school district, it shall include in its report such recommendation, and shall also prepare and include in its report proposed articles of agreement for the proposed interstate school district, which shall be signed by at least a majority of the membership of the planning committee, which set forth the following:

"a. The name of the interstate school district.

"b. The member districts which shall be combined to form the proposed interstate school district.

"c. The number, composition, method of selection and terms of office of the interstate school board, provided that:

"(1) The interstate school board shall consist of an odd number of members, not less than five nor more than fifteen;

"(2) The terms of office shall not exceed three years;

"(3) Each member district shall be entitled to elect at least one member of the interstate school board. Each member district shall either vote separately at the interstate school district meeting by the use of a distinctive ballot, or shall choose its member or members at any other election at which school officials may be chosen;

"(4) The method of election shall provide for the filing of candidacies in advance of election and for the use of a printed non-partisan ballot;

"(5) Subject to the foregoing, provision may be made for the election of one or more members at large.

"d. The grades for which the interstate school district shall be responsible.

"e. The specific properties of member districts to be acquired initially by the interstate school district and the general location of any proposed new schools to be initially established or constructed by the interstate school district.

"f. The method of apportioning the operating expenses of the interstate school district among the several member districts, and the time and manner of payments of such shares.

"g. The indebtedness or any member district which the interstate district is to assume.

"h. The method of apportioning the capital expenses of the interstate school district among the several member districts, which need not be the same as the method of apportioning operating expenses, and the time and manner of payment of such shares. Capital expenses shall include the cost of acquiring land and buildings for school purposes; the construction, furnishing and equipping of school buildings and facilities; and the payment of the principal and interest of any indebtedness which is incurred to pay for the same.

"i. The manner in which state aid, available under the laws of either New Hampshire or Vermont, shall be allocated unless otherwise expressly provided in this compact or by the laws making such aid available.

"j. The method by which the articles of agreement may be amended, which amendments may include the annexation of territory, or an increase or decrease in the number of grades for which the interstate district shall be responsible, provided that no amendment shall be effective until approved by both state boards in the same manner as required for approval of the original articles of agreement.

"k. The date of operating responsibility of

the proposed interstate school district and a proposed program for the assumption of operating responsibility for education by the proposed interstate school district, and any school construction; which the interstate school district shall have the power to vary by vote as circumstances may require.

"I. Any other matters, not incompatible with law, which the interstate school district planning committee may consider appropriate to include in the articles of agreement, including, without limitation:

"(1) The method of allocating the cost of transportation between the interstate district and member districts;

"(2) The nomination of individual school directors to serve until the first annual meeting of the interstate school district.

"E. HEARINGS.—If the planning committee recommends the formation of an interstate school district, it shall hold at least one public hearing on its report and the proposed articles of agreement within the proposed interstate school district in New Hampshire, and at least one public hearing thereon within the proposed interstate school district in Vermont. The planning committee shall give such notice thereof as it may determine to be reasonable, provided that such notice shall include at least one publication in a newspaper of general circulation within the proposed interstate school district not less than fifteen days (not counting the date of publication and not counting the date of the hearing) before the date of the first hearing. Such hearings may be adjourned from time to time and from place to place. The planning committee may revise the proposed articles of agreement after the date of the hearings. It shall not be required to hold further hearings on the revised articles of agreement but may hold one or more further hearings after notice similar to that required for the first hearings if the planning committee in its sole discretion determines that the revisions are so substantial in nature as to require further presentation to the public before submission to the state boards of education.

"F. APPROVAL OF STATE BOARDS.—After the hearings a copy of the proposed articles of agreement, as revised, signed by a majority of the planning committee, shall be submitted by it to each state board. The state boards may (a) if they find that the articles of agreement are in accord with the standards set forth in this compact and in accordance with the standards set forth in this compact and in accordance with sound educational policy, approve the same as submitted, or (b) refer them back to the planning committee for further study. The planning committee may make additional revisions to the proposed articles of agreement to conform to the recommendations of the state boards. Further hearings on the proposed articles of agreement shall not be required unless ordered by the state boards in their discretion. In exercising such discretion, the state boards shall take into account whether or not the additional revisions are so substantial in nature as to require further presentation to the public. If both state boards find that the articles of agreement as further revised are in accord with the standards set forth in this compact and in accordance with sound educational policy, they shall approve the same. After approval by both state boards, each state board shall cause the articles of agreement to be submitted to the school boards of the several member districts in each state for acceptance by the member districts as provided in the following paragraph. At the same time, each state board shall designate the form of warrant, date, time, place, and period of voting for the special meeting of the member districts to be held in accordance with the following paragraph.

"G. ADOPTION BY MEMBER DISTRICTS.—Upon receipt of written notice from the state board

in its state of the approval of the articles of agreement by both state boards, the school board of each member district shall cause the articles of agreement to be filed with the member district clerk. Within ten days after receipt of such notice, the school board shall issue its warrant for a special meeting of the member district, the warrant to be in the form, and the meeting to be held at the time and place and in the manner prescribed by the state board. No approval of the superior court shall be required for such special school district meeting in New Hampshire. Voting shall be with the use of the check list by a ballot substantially in the following form:

"'Shall the school district accept the provisions of the New Hampshire-Vermont Interstate School Compact providing for the establishment of an interstate school district, together with the school districts of ----- and -----, etc., in accordance with the provisions of the proposed articles of agreement filed with the school district (town, city or incorporated school district) clerk?"

"Yes () No ()"

"If the articles of agreement included the nomination of individual school directors, those nominated from each member district shall be included in the ballot and voted upon, such election to become effective upon the formation of an interstate school district.

"If a majority of the voters present and voting in a member district vote in the affirmative, the clerk for such member district shall forthwith send to the state board in its state a certified copy of the warrant, certificate of posting, and minutes of the meeting of the district. If the state boards of both states find that a majority of the voters present and voting in each member district have voted in favor of the establishment of the interstate school district, they shall issue a joint certificate to that effect; and such certificate shall be conclusive evidence of the lawful organization and formation of the interstate school district as of its date of issuance.

"H. RESUBMISSION.—If the proposed articles of agreement are adopted by one or more of the member districts but rejected by one or more of the member districts, the state boards may resubmit them, in the same form as previously submitted, to the rejecting member districts, in which case the school boards thereof shall resubmit them to the voters in accordance with paragraph G of this article. An affirmative vote in accordance therewith shall have the same effect as though the articles of agreement had been adopted in the first instance. In the alternative, the state boards may either (a) discharge the planning committee, or (b) refer the articles of agreement back for further consideration to the same or a reconstituted planning committee, which shall have all of the powers and duties as the planning committee as originally constituted.

"ARTICLE III

"POWERS OF INTERSTATE SCHOOL DISTRICTS

"A. POWER.—Each interstate school district shall be a body corporate and politic, with power to:

"a. To acquire, construct, extend, improve, staff, operate, manage and govern public schools within its boundaries;

"b. To sue and be sued, subject to the limitations of liability hereinafter set forth;

"c. To have a seal and alter the same at pleasure;

"d. To adopt, maintain and amend bylaws not inconsistent with this compact, and the laws of the two States;

"e. To acquire by purchase, condemnation, lease or otherwise, real and personal property for the use of its schools;

"f. To enter into contracts and incur debts;

"g. To borrow money for the purposes hereinafter set forth, and to issue its bonds or notes therefor;

"h. To make contracts with and accept grants and aid from the United States, the

State of New Hampshire, the State of Vermont, any agency or municipality thereof, and private corporations and individuals for the construction, maintenance, reconstruction, operation and financing of its schools; and to do any and all things necessary in order to avail itself of such aid and cooperation;

"I. To employ such assistants, agents, servants, and independent contractors as it shall deem necessary or desirable for its purposes; and

"J. To take any other action which is necessary or appropriate in order to exercise any of the foregoing powers.

"ARTICLE IV

"A. GENERAL.—Votes of the district shall be taken at a duly warned meeting held at any place in the district, at which all of the eligible legal voters of the member districts shall be entitled to vote, except as otherwise provided with respect to the election of directors.

"B. ELIGIBILITY OF VOTERS.—Any resident who would be eligible to vote at a meeting of a member district being held at the same time, shall be eligible to vote at a meeting of the interstate district. The board of civil authority in each Vermont member district and the supervisors of the check list of each New Hampshire district shall respectively prepare a check list of eligible voters for each meeting of the interstate district in the same manner, and they shall have all the same powers and duties with respect to eligibility of voters in their districts as for a meeting of a member district.

"C. WARNING OF MEETINGS.—A meeting shall be warned by a warrant addressed to the residents of the interstate school district qualified to vote in district affairs, stating the time and place of the meeting and the subject matter of the business to be acted upon. The warrant shall be signed by the clerk and by a majority of the directors. Upon written application of ten or more voters in the district, presented to the directors or to one of them, at least twenty-five days before the day prescribed for an annual meeting, the directors shall insert in their warrant for such meeting any subject matter specified in such application.

"D. POSTING AND PUBLICATION OF WARRANT.—The directors shall cause an attested copy of the warrant to be posted at the place of meeting, and a like copy at a public place in each member district at least twenty days (not counting the date of posting and the date of meeting) before the date of the meeting. In addition, the directors shall cause the warrant to be advertised in a newspaper of general circulation on at least one occasion, such publication to occur at least ten days (not counting the date of publication and not counting the date of the meeting) before the date of the meeting. Although no further notice shall be required, the directors may give such further notice of the meeting as they in their discretion deem appropriate under the circumstances.

"E. RETURN OF WARRANT.—The warrant with a certificate thereon, verified by oath, stating the time and place when and where copies of the warrant were posted and published, shall be given to the clerk of the interstate school district at or before the time of the meeting, and shall be recorded by him in the records of the interstate school district.

"F. ORGANIZATION MEETING.—The commissioners, acting jointly, shall fix a time and place for a special meeting of the qualified voters within the interstate school district for the purpose of organization, and shall prepare and issue the warrant for the meeting after consultation with the interstate school district planning board and the members-elect, if any, of the interstate school board of directors. Such meeting shall be

held within sixty days after the date of issuance of the certificate of formation, unless the time is further extended by the joint action of the state boards. At the organization meeting the commissioner of education of the state where the meeting is held, or his designate, shall preside in the first instance, and the following business shall be transacted:

"a. A temporary moderator and a temporary clerk shall be elected from among the qualified voters who shall serve until a moderator and clerk respectively have been elected and qualified.

"b. A moderator, a clerk, a treasurer, and three auditors shall be elected to serve until the next annual meeting and thereafter until their successors are elected and qualified. Unless previously elected, a board of school directors shall be elected to serve until their successors are elected and qualified.

"c. The date for the annual meeting shall be established.

"d. Provision shall be made for the payment of any organizational or other expense incurred on behalf of the district before the organization meeting, including the cost of architects, surveyors, contractors, attorneys, and educational or other consultants or experts.

"e. Any other business, the subject matter of which has been included in the warrant, and which the voters would have had power to transact at an annual meeting.

"G. ANNUAL MEETINGS.—An annual meeting of the district shall be held between January fifteenth and June first of each year at such time as the interstate district may by vote determine. Once determined, the date of the annual meeting shall remain fixed until changed by vote of the interstate district at a subsequent annual or special meeting. At each annual meeting the following business shall be transacted:

"a. Necessary officers shall be elected.

"b. Money shall be appropriated for the support of the interstate district schools for the fiscal year beginning the following July first.

"c. Such other business as may properly come before the meeting.

"H. SPECIAL MEETINGS.—A special meeting of the district shall be held whenever, in the opinion of the directors, there is occasion therefor, or whenever written application shall have been made by five per cent or more of the voters (based on the check lists as prepared for the last preceding meeting) setting forth the subject matter upon which such action is desired. A special meeting may appropriate money without compliance with RSA 33:8 or RSA 197:3 which would otherwise require the approval of the New Hampshire superior court.

"I. CERTIFICATION OF RECORDS.—The clerk of an interstate school district shall have the power to certify the record of the votes adopted at an interstate school district meeting to the respective commissioners and state boards and (where required) for filing with a secretary of state.

"J. METHOD OF VOTING AT SCHOOL DISTRICT MEETINGS.—Voting at meetings of interstate school districts shall take place as follows:

"a. SCHOOL DIRECTORS.—A separate ballot shall be prepared for each member district, listing the candidates for interstate school director to represent such member district; and any candidates for interstate school director at large; and the voters of each member district shall register on a separate ballot their choice for the office of school director or directors. In the alternative, the articles of agreement may provide for the election of school directors by one or more of the member districts at an election otherwise held for the choice of school or other municipal officers.

"b. OTHER VOTES.—Except as otherwise provided in the articles of agreement or this

this compact, with respect to all other votes (1) the voters of the interstate school district shall vote as one body irrespective of the member districts in which they are resident, and (2) a simple majority of those present and voting at any duly warned meeting shall carry the vote. Voting for officers to be elected at any meeting, other than school directors, shall be by ballot or voice, as the interstate district may determine, either in its articles of agreement or by a vote of the meeting.

"ARTICLE V

"OFFICERS

"A. OFFICERS: GENERAL.—The officers of an interstate school district shall be a board of school directors, a chairman of the board, a vice-chairman of the board, a secretary of the board, a moderator, a clerk, a treasurer and three auditors. Except as otherwise specifically provided, they shall be eligible to take office immediately following their election; they shall serve until the next annual meeting of the interstate district and until their successors are elected and qualified. Each shall take oath for the faithful performance of his duties before the moderator, or a notary public or a justice of the peace of the state in which the oath is administered. Their compensation shall be fixed by vote of the district. No person shall be eligible to any district office unless he is a voter in the district. A custodian, school teacher, principal, superintendent or other employee of an interstate district acting as such shall not be eligible to hold office as a school director.

"B. BOARD OF DIRECTORS.—

"a. HOW CHOSEN.—Each member district shall be represented by at least one resident on the board of school directors of an interstate school district. A member district shall be entitled to such further representation on the interstate board of school directors as provided in the articles of agreement as amended from time to time. The articles of agreement as amended from time to time may provide for school directors at large, as above set forth. No person shall be disqualified to serve as a member of an interstate board because he is at the same time a member of the school board of a member district.

"b. TERM.—Interstate school directors shall be elected for terms in accordance with the articles of agreement.

"c. DUTIES OF BOARD OF DIRECTORS.—The board of school directors of an interstate school district shall have and exercise all of the powers of the district not reserved herein to the voters of the district.

"d. ORGANIZATION.—The clerk of the district shall warn a meeting of the board of school directors to be held within ten days following the date of the annual meeting, for the purpose of organizing the board, including the election of its officers.

"C. CHAIRMAN OF THE BOARD.—The chairman of the board of interstate school directors shall be elected by the interstate board from among its members at its first meeting following the annual meeting. The chairman shall preside at the meetings of the board and shall perform such other duties as the board may assign to him.

"D. VICE-CHAIRMAN OF THE BOARD OF DIRECTORS.—The vice-chairman of the interstate board shall be elected in the same manner as the chairman. He shall represent a member district in a state other than that represented by the chairman. He shall preside in the absence of the chairman and shall perform such other duties as may be assigned to him by the interstate board.

"E. SECRETARY OF THE BOARD.—The Secretary of the interstate board shall be elected in the same manner as the chairman. Instead of electing one of its members, the interstate board may appoint the interstate district clerk to serve as secretary of the board in addition to his other duties. The secretary of the interstate board (or the interstate district clerk, if so appointed) shall

keep the minutes of its meetings, shall certify its records, and perform such other duties as may be assigned to him by the board.

"F. MODERATOR.—The moderator shall preside at the district meetings, regulate the business thereof, decide questions of order, and make a public declaration of every vote passed. He may prescribe rules of procedure; but such rules may be altered by the district. He may administer oaths to district officers in either state.

"G. CLERK.—The clerk shall keep a true record of all proceedings at each district meeting, shall certify its records, shall make an attested copy of any records of the district for any person upon request and tender of reasonable fees therefor, if so appointed, shall serve as secretary of the board of school directors, and shall perform such other duties as may be required by custom or law.

"H. TREASURER.—The treasurer shall have custody of all of the moneys belonging to the district and shall pay out the same only upon the order of the interstate board. He shall keep a fair and accurate account of all sums received into and paid from the interstate district treasury, and at the close of each fiscal year shall make a report to the interstate district, giving a particular account of all receipts and payments during the year. He shall furnish to the interstate directors, statements from his books and submit his books and vouchers to them and to the district auditors for examination whenever so requested. He shall make all returns called for by laws relating to school districts. Before entering on his duties, the treasurer shall give a bond with sufficient sureties and in such sum as the directors may require. The treasurer's term of office is from July 1 to the following June 30.

"I. AUDITORS.—At the organization meeting of the district, three auditors shall be chosen, one to serve for a term of one year, one to serve for a term of two years, and one to serve for a term of three years. After the expiration of each original term, the successor shall be chosen for a three year term. At least one auditor shall be a resident of New Hampshire, and one auditor shall be a resident of Vermont. An interstate district may vote to employ a certified public accountant to assist the auditors in the performance of their duties. The auditors shall carefully examine the accounts of the treasurer and the directors at the close of each fiscal year, and at such other times whenever necessary, and report to the district whether the same are correctly cast and properly vouched.

"J. SUPERINTENDENT.—The superintendent of schools shall be selected by a majority vote of the board of school directors of the interstate district with the approval of both commissioners.

"K. VACANCIES.—Any vacancy among the elected officers of the district shall be filled by the interstate board until the next annual meeting of the district or other election, when a successor shall be elected to serve out the remainder of the unexpired term, if any. Until all vacancies on the interstate board are filled, the remaining members shall have full power to act.

"ARTICLE VI

"APPROPRIATION AND APPORTIONMENT OF FUNDS

"A. BUDGET.—Before each annual meeting, the interstate board shall prepare a report of expenditures for the preceding fiscal year, an estimate of expenditures for the current fiscal year, and a budget for the succeeding fiscal year.

"B. APPROPRIATION.—The interstate board of directors shall present the budget report of the annual meeting. The interstate district shall appropriate a sum of money for the support of its schools and for the discharge of its obligations for the ensuing fiscal year.

"C. APPORTIONMENT OF APPROPRIATION.—

Subject to the provisions of article VIII hereof, the interstate board shall first apply against such appropriation any income to which the interstate district is entitled, and shall then apportion the balance among the member districts in accordance with one of the following formulas as determined by the articles of agreement as amended from time to time:

"a. All of such balance to be apportioned on the basis of the ratio that the fair market value of the taxable property in each member district bears to that of the entire interstate district; or

"b. All of such balance to be apportioned on the basis that the average daily resident membership for the preceding fiscal year of each member district bears to that of the average daily resident membership of the entire interstate school district; or

"c. A formula based on any combination of the foregoing factors. The term 'fair market value of taxable property' shall mean the last locally assessed valuation of a member district in New Hampshire, as last equalized by the New Hampshire state tax commission.

"The term 'fair market value of taxable property' shall mean the equalized grand list of a Vermont member district, as determined by the Vermont department of taxes.

"Such assessed valuation and grand list may be further adjusted (by elimination of certain types of taxable property from one or the other or otherwise) in accordance with the articles of agreement, in order that the fair market value of taxable property in each state shall be comparable.

"Average daily resident membership' of the interstate district in the first instance shall be the sum of the average daily resident membership of the member districts in the grades involved for the preceding fiscal year where no students were enrolled in the interstate district school for such preceding fiscal year.

"D. SHARE OF NEW HAMPSHIRE MEMBER DISTRICT.—The interstate board shall certify the share of a New Hampshire member district of the total appropriation to the school board of each member district which shall add such sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district. The interstate district shall not set up its own capital reserve funds; but a New Hampshire member district may set up a capital reserve fund in accordance with RSA 35, to be turned over to the interstate district in payment of the New Hampshire member district's share of any anticipated obligations.

"E. SHARE OF VERMONT MEMBER DISTRICT.—The interstate board shall certify the share of a Vermont member district of the total appropriation to the school board of each member district which shall add sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district.

"ARTICLE VIII

"BORROWING

"A. INTERSTATE DISTRICT INDEBTEDNESS.—Indebtedness of an interstate district shall be a general obligation of the district and shall also be a joint and several general obligation of each member district, except that such obligations of the district and its member districts shall not be deemed indebtedness of any member district for the purposes of determining its borrowing capacity under New Hampshire or Vermont law. A member district which withdraws from an interstate district shall remain liable for indebtedness of the interstate district which is outstanding at the time of withdrawal and shall be responsible for paying its share of such in-

debtedness to the same extent as though it had not been withdrawn.

"B. TEMPORARY BORROWING.—The interstate board may authorize the borrowing of money by the interstate district (1) in anticipation of payments of operating and capital expenses by the member districts to the interstate districts and (2) in anticipation of the issue of bonds or notes of the interstate district which have been authorized for the purpose of financing capital projects. Such temporary borrowing shall be evidenced by interest bearing or discounted notes of the interstate district. The amount of notes issued in any fiscal year in anticipation of expense payments shall not exceed the amount of such payments received by the interstate district in the preceding fiscal year. Notes issued under this paragraph shall be payable within one year in the case of notes under clause (1) and three years in the case of notes under clause (2) from their respective dates, but the principal of and interest on notes issued for a shorter period may be renewed or paid from time to time by the issue of other notes, provided that the period from the date of an original note to the maturity of any note issued to renew or pay the same debt shall not exceed the maximum period permitted for the original loan.

"C. BORROWING FOR CAPITAL PROJECTS.—An interstate district may incur debt and issue its bonds or notes to finance capital projects. Such projects may consist of the acquisition or improvement of land and buildings for school purposes, the construction, reconstruction, alteration, or enlargement of school buildings and related school facilities, the acquisition of equipment of a lasting character and the payment of judgments. No interstate district may authorize indebtedness in excess of ten percent of the total fair market value of taxable property in its member districts as defined in article VI of this compact. The primary obligation of the interstate district to pay indebtedness of member districts shall not be considered indebtedness of the interstate district for the purpose of determining its borrowing capacity under this paragraph. Bonds or notes issued under this paragraph shall mature in equal or diminishing installments of principal payable at least annually commencing no later than two years and ending not later than thirty years after their dates.

"D. AUTHORIZATION PROCEEDINGS.—An interstate district shall authorize the incurring of debts to finance capital projects by a majority vote of the district passed at an annual or special district meeting. Such vote shall be taken by secret ballot after full opportunity for debate, and any such vote shall be subject to reconsideration and further action by the district at the same meeting or at an adjourned session thereof.

"E. SALE OF BONDS AND NOTES.—Bonds and notes which have been authorized under this article may be issued from time to time and shall be sold at not less than par and accrued interest at public or private sale by the chairman of the school board and by the treasurer. Interstate district bonds and notes shall be signed by the said officers, except that either one of the two required signatures may be a facsimile. Subject to this compact and the authorizing vote, they shall be in such form, bear such rates of interest and mature at such times as the said officers may determine. Bonds shall, but notes need not, bear the seal of the interstate district, or a facsimile of such seal. Any bonds or notes of the interstate district which are properly executed by the said officers shall be valid and binding according to their terms notwithstanding that before the delivery thereof such officers may have ceased to be officers of the interstate district.

"F. PROCEEDS OF BONDS.—Any accrued interest received upon delivery of bonds or notes of an interstate district shall be applied

to the payment of the first interest which becomes due thereon. The other proceeds of the sale of such bonds or notes, other than temporary notes, including any premiums, may be temporarily invested by the interstate district pending their expenditure; and such proceeds, including any income derived from the temporary investments of such proceeds, shall be used to pay the costs of issuing and marketing the bonds or notes and to meet the operating expenses or capital expenses in accordance with the purposes for which the bonds or notes were issued or, by proceedings taken in the manner required for the authorization of such debt, for other purposes for which such debt could be incurred. No purchaser of any bonds or notes of an interstate district shall be responsible in any way to see to the application of the proceeds thereof.

"G. STATE AID PROGRAMS.—As used in this paragraph the term 'initial aid' shall include New Hampshire and Vermont financial assistance with respect to a capital project, or the means of financing a capital project, which is available in connection with construction costs of a capital project or which is available at the time indebtedness is incurred to finance the project. Without limiting the generality of the foregoing definition, initial aid shall specifically include a New Hampshire state guarantee under RSA 195-B with respect to bonds or notes and Vermont construction aid under chapter 123 of 16 V.S.A. As used in this paragraph the term 'long-term aid' shall include New Hampshire and Vermont financial assistance which is payable periodically in relation to capital costs incurred by an interstate district. Without limiting the generality of the foregoing definition, long-term aid shall specifically include New Hampshire school building aid under RSA 198 and Vermont school building aid under chapter 123 of Title 16 V.S.A. For the purpose of applying for, receiving and expending initial aid and long-term aid an interstate district shall be deemed a native school district by each state, subject to the following provisions. When an interstate district has appropriated money for a capital project, the amount appropriated shall be divided into a New Hampshire share and a Vermont share in accordance with the capital expense apportionment formula in the articles of agreement as though the total amount appropriated for the project was a capital expense requiring apportionment in the year the appropriation is made. New Hampshire initial aid shall be available with respect to the amount of the New Hampshire share as though it were authorized indebtedness of a New Hampshire cooperative school district. In the case of a state guarantee of interstate districts bonds or notes under RSA 196-B, the interstate district shall be eligible to apply for and receive an unconditional state guarantee with respect to an amount of its bonds or notes which does not exceed fifty per cent of the amount of the New Hampshire share as determined above. Vermont initial aid shall be available with respect to the amount of the Vermont share as though it were funds voted by a Vermont school district. Payments of Vermont initial aid shall be made to the interstate district, and the amount of any borrowing authorized to meet the appropriation for the capital project shall be reduced accordingly. New Hampshire and Vermont long-term aid shall be payable to the interstate district. The amounts of long-term aid in each year shall be based on the New Hampshire and Vermont shares of the amount of indebtedness of the interstate district which is payable in that year and which has been apportioned in accordance with the capital expense apportionment formula in the articles of agreement. The New Hampshire aid shall be payable at the rate of forty-five per cent, if there are three or less New Hampshire members in the interstate district, and otherwise it shall be payable as though

the New Hampshire members were a New Hampshire cooperative school district. New Hampshire and Vermont long-term aid shall be deducted from the total capital expenses for the fiscal year in which the long-term aid is payable, and the balance of such expenses shall be apportioned among the member districts. Notwithstanding the foregoing provisions, New Hampshire and Vermont may at any time change their state school aid programs that are in existence when this compact takes effect and may establish new programs, and any legislation for these purposes may specify how much programs shall be applied with respect to interstate districts.

"H. TAX EXEMPTION.—Bonds and notes of an interstate school district shall be exempt from local property taxes in both states, and the interest or discount thereon and any profit derived from the disposition thereof shall be exempt from personal income taxes in both states.

"ARTICLE VIII

"TAKING OVER OF EXISTING PROPERTY

"A. POWER TO ACQUIRE PROPERTY OF MEMBER DISTRICT.—The articles of agreement, or an amendment thereof, may provide for the acquisition by an interstate district from a member district of all or a part of its existing plant and equipment.

"B. VALUATION.—The articles of agreement, or the amendment, shall provide for the determination of the value of the property to be acquired in one or more of the following ways:

"a. A valuation set forth in the articles of agreement or the amendment.

"b. By appraisal, in which case, one appraiser shall be appointed by each commissioner, and a third appraiser appointed by the first two appraisers.

"C. REIMBURSEMENT TO MEMBER DISTRICT.—The articles of agreement shall specify the method by which the member district shall be reimbursed by the interstate district for the property taken over, in one or more of the following ways:

"a. By one lump sum, appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"b. In installments over a period of not more than twenty years, each of which is appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"c. By an agreement to assume or reimburse the member district for all principal and interest on any outstanding indebtedness originally incurred by the member district to finance the acquisition and improvement of the property, each such installment to be appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"The member district transferring the property shall have the same obligation to pay to the interstate district its share of the cost of such acquisition, but may offset its right to reimbursement.

"ARTICLE IX

"AMENDMENTS TO ARTICLES OF AGREEMENT

"A. Amendments to the articles of agreement may be adopted in the same manner provided for the adoption of the original articles of agreement, except that:

"a. Unless the amendment calls for the addition of a new member district, the functions of the planning committee shall be carried out by the interstate district board of directors.

"b. If the amendment proposes the addition of a new member district, the planning committee shall consist of all of the members of the interstate board and all of the members of the school board of the proposed new member district or districts. In such case the amendment shall be submitted to the voters at an interstate district meeting, at

which an affirmative vote of two-thirds of those present and voting shall be required. The articles of agreement together with the proposed amendment shall be submitted to the voters of the proposed new member district at a meeting thereof, at which a simple majority of those present and voting shall be required.

"c. In all cases an amendment may be adopted on the part of an interstate district upon the affirmative vote of voters thereof at a meeting voting as one body. Except where the amendment proposes the admission of a new member district, a simple majority of those present and voting shall be required for adoption.

"d. No amendment to the articles of agreement may impair the rights of bond or note holders or the power of the interstate district to procure the means for their payment.

"ARTICLE X

"APPLICABILITY OF NEW HAMPSHIRE LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in New Hampshire, the provisions of New Hampshire law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. NEW HAMPSHIRE STATE AID.—A New Hampshire school district shall be entitled to receive an amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the New Hampshire member district, and as though the New Hampshire member district pupils attending the interstate school were attending a New Hampshire cooperative school district's school. The state aid shall be paid to the New Hampshire member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF THE NEW HAMPSHIRE MEMBER SCHOOL DISTRICT.—A New Hampshire member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not herein delegated to the district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The New Hampshire member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor, unless the indebtedness is specifically assumed in accordance with the articles of agreement. Any trust funds or capital reserve funds and any property not taken over by the interstate district shall be retained by the New Hampshire member district and held or disposed of according to law. If all of the schools in a member district are incorporated into an interstate district, then no annual meeting of the member district shall be required unless the members of the interstate board from the member district shall determine that there is occasion for such an annual meeting.

"D. SUIT AND SERVICE OF PROCESS IN NEW HAMPSHIRE.—The courts of New Hampshire shall have the same jurisdiction over the

district as though a New Hampshire member district were a party instead of the interstate district. The service necessary to institute suit in New Hampshire shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who reside in New Hampshire, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in New Hampshire shall be considered an employee of a New Hampshire school district for the purpose of the New Hampshire teachers' retirement system, the New Hampshire state employees' retirement system, the New Hampshire workmen's compensation law and any other law relating to the regulation of employment or the provision of benefits for employees of New Hampshire school districts except as follows:

"1. A teacher in a New Hampshire member district may elect to remain a member of the New Hampshire teachers' retirement system, even though assigned to teach in an interstate school in Vermont.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of New Hampshire or the state of Vermont but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedure of the retirement systems; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XI

"APPLICABILITY OF VERMONT LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in Vermont, the provisions of Vermont law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. VERMONT STATE AID.—A Vermont school district shall be entitled to receive such amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the Vermont member district, and as though the Vermont member district pupils attending the interstate schools were attending a Vermont union school district's schools. Such state aid shall be paid to the Vermont member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF VERMONT MEMBER SCHOOL DISTRICT.—A Vermont member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not herein delegated to the

district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The Vermont member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor. Any trust funds and any property not taken over shall be retained by the Vermont member school district and held or disposed of according to law.

"D. SUIT AND SERVICE OF PROCESS IN VERMONT.—The courts of Vermont shall have the same jurisdiction over the districts as though a Vermont member district were a party instead of the interstate district. The service necessary to institute suit in Vermont shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who resides in Vermont, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in Vermont shall be considered an employee of a Vermont school district for the purpose of the state teachers' retirement system of Vermont, the state employees' retirement system, the Vermont workmen's compensation law, and any other law relating to the regulation of employment or the provision of benefits for employees of Vermont school districts except as follows:

"1. A teacher in a Vermont member district may elect to remain a member of the state teachers' retirement system of Vermont, even though assigned to teach in an interstate school in New Hampshire.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of Vermont or the state of New Hampshire but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedures of the retirement system; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XII

"ADOPTION OF COMPACT BY DRESDEN SCHOOL DISTRICT

"The Dresden School District, otherwise known as the Hanover-Norwich Interstate School District, authorized by New Hampshire laws of 1961, chapter 116, and by the laws of Vermont, is hereby authorized to adopt the provisions of this compact and to become an interstate school district within the meaning hereof, upon the following conditions and subject to the following limitations:

"a. Articles of agreement shall be prepared and signed by a majority of the directors of the interstate school district.

"b. The articles of agreement shall be submitted to an annual or special meeting of the Dresden district for adoption.

"c. An affirmative vote of two-thirds of those present and voting shall be required for adoption.

"d. Nothing contained therein, or in this compact, as it affects the Dresden School District shall affect adversely the rights of the holders of any bonds or other evidences of indebtedness then outstanding, or the rights of the district to procure the means for payment thereof previously authorized.

"e. The corporate existence of the Dresden School District shall not be terminated by such adoption of articles of amendment, but shall be deemed to be so amended that it shall thereafter be governed by the terms of this compact.

"ARTICLE XIII

"MISCELLANEOUS PROVISIONS

"A. STUDIES.—Insofar as practicable, the studies required by the laws of both states shall be offered in an interstate school district.

"B. TEXTBOOKS.—Textbooks and scholar's supplies shall be provided at the expense of the interstate district for pupils attending its schools.

"C. TRANSPORTATION.—The allocation of the cost of transportation in an interstate school district, as between the interstate district and the member districts, shall be determined by the articles of agreement.

"D. LOCATION OF SCHOOLHOUSES.—In any case where a new schoolhouse or other school facility is to be constructed or acquired, the interstate board shall first determine whether it shall be located in New Hampshire or in Vermont. If it is to be located in New Hampshire, RSA 199, relating to schoolhouses, shall apply. If it is to be located in Vermont, the Vermont law relating to schoolhouses shall apply.

"E. FISCAL YEAR.—The fiscal year of each interstate district shall begin on July first of each year and end on June thirtieth of the following year.

"F. IMMUNITY FROM TORT LIABILITY.—Notwithstanding the fact that an interstate district may derive income from operating profit, fees, rentals, and other services, it shall be immune from suit and from liability for injury to persons or property and for other torts caused by it or its agents, servants or independent contractors, except insofar as it may have undertaken such liability under RSA 281:7 relating to workmen's compensation, or RSA 412:3 relating to the procurement of liability insurance by a governmental agency and except insofar as it may have undertaken such liability under 21 V.S.A. Section 621 relating to workmen's compensation or 29 V.S.A. Section 1403 relating to the procurement of liability insurance by a governmental agency.

"G. ADMINISTRATIVE AGREEMENT BETWEEN COMMISSIONERS OF EDUCATION.—The commissioners of education of New Hampshire and Vermont may enter into one or more administrative agreements prescribing the relationship between the interstate districts, member districts, and each of the two state departments of education, in which any conflicts between the two states in procedure, regulations, and administrative practices may be resolved.

"H. AMENDMENT.—Neither state shall amend its legislation or any agreement authorized thereby without the consent of the other in such manner as to substantially adversely affect the rights of the other state or its people hereunder, or as to substantially impair the rights of the holders of any bonds or notes or other evidences of indebtedness then outstanding or the rights of an interstate school district to procure the means for payment thereof. Subject to the foregoing, any reference herein to other statutes of either state shall refer to such statute as it may be amended or revised from time to time.

"I. SEPARABILITY.—If any of the provisions of this compact, or legislation enabling the same, shall be held invalid or unconstitutional in relation to any of the applications

thereof, such invalidity or unconstitutionality shall not affect other applications thereof or other provisions thereof; and to this end the provisions of this compact are declared to be severable.

"J. INCONSISTENCY OF LANGUAGE.—The validity of this compact shall not be affected by any insubstantial differences in its form or language as adopted by the two states.

"ARTICLE XIV

"EFFECTIVE DATE

"This compact shall become effective when agreed to by the States of New Hampshire and Vermont and approved by the United States Congress."

"SEC. 2. The right is hereby reserved by the Congress or any of its standing committees to require the disclosure and the furnishing of such information and data by or concerning any school district created under the New Hampshire-Vermont Interstate School Compact as is deemed appropriate by the Congress or such committee."

Sec. 2. The right to alter, amend, or repeal this Act is expressly reserved.

With the following committee amendments:

On page 28, line 14, delete "Article VIII" and insert in lieu thereof "Article VII".

On page 49, after line 5, insert the following:

"Sec. 2. The right is hereby reserved by the Congress or any of its standing committees to require the disclosure and the furnishing of such information and data by or concerning any school district created under the New Hampshire-Vermont Interstate School Compact as is deemed appropriate by the Congress or such committee."

On page 49, line 6, strike out "Sec. 2." and insert in lieu thereof "Sec. 3."

The committee amendments were agreed to.

Mr. CLEVELAND. Mr. Speaker, the House takes a historic step in adopting H.R. 751. This bill, cosponsored by myself and my colleague, the distinguished gentleman from Vermont (Mr. STAFFORD), ratifies the New Hampshire-Vermont school compact. Under this legislation, communities along the borders of the two States are granted permission, under certain conditions, to form interstate school districts.

The bill is general in nature, modeled after a specific bill which was the true pioneer, which the gentleman from Vermont and I cosponsored in the 88th Congress. That law granted congressional approval to the establishment of a single school district involving Hanover, N.H., and Norwich, Vt. This experiment proved so successful that numerous other communities on either side of the Connecticut River, which is the boundary between the two States, have expressed the desire to do likewise. The purpose of H.R. 751 is to permit them to do so, their legislatures approving, without having to come to Congress in each instance. It is a worthy bill. I believe that other States may wish to examine it and apply this principle to similar circumstances facing them.

It is the considered judgment of the educational authorities in both States that this bi-State approach will reduce costs and make available better education through combining the resources in the affected areas.

In our case, the Connecticut River is both a boundary and a unifier. The communities which border the river are

similar in makeup of population and in their economies. It is only logical that Congress should not only consent but should encourage their mutual, interstate efforts to simplify and smooth the administration of their common affairs.

I am pleased to have helped and will watch with interest to see if others follow suit.

I wish to thank those who have made this possible and, in particular, to extend my appreciation to my good friend and neighbor, the gentleman from Vermont, for his cooperation and valuable assistance.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate bill (S. 278) to consent to the New Hampshire-Vermont interstate school compact.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There being no objection, the Clerk read the Senate bill, as follows:

S. 278

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress consents to the New Hampshire-Vermont Interstate School Compact which is substantially as follows:

"NEW HAMPSHIRE-VERMONT INTERSTATE SCHOOL COMPACT"

"ARTICLE I"

"GENERAL PROVISIONS"

"A. STATEMENT OF POLICY.—It is the purpose of this compact to increase the educational opportunities within the states of New Hampshire and Vermont by encouraging the formation of interstate school districts which will each be a natural social and economic region with adequate financial resources and a number of pupils sufficient to permit the efficient use of school facilities within the interstate district and to provide improved instruction. The state boards of education of New Hampshire and Vermont may formulate and adopt additional standards consistent with this purpose and with these standards; and the formation of any interstate school district and the adoption of its articles of agreement shall be subject to the approval of both state boards as hereinafter set forth.

"B. REQUIREMENT OF CONGRESSIONAL APPROVAL.—This compact shall not become effective until approved by the United States Congress.

"C. DEFINITIONS.—The terms used in this compact shall be construed as follows, unless a different meaning is clearly apparent from the language or context:

"a. 'Interstate school district' and 'interstate district' shall mean a school district composed of one or more school districts located in the state of New Hampshire associated under this compact with one or more school districts located in the state of Vermont, and may include either the elementary schools, the secondary schools, or both.

"b. 'Member school district' and 'member district' shall mean a school district located either in New Hampshire or Vermont which is included within the boundaries of a proposed or established interstate school district. In the case of districts located in Vermont, it shall include city school districts, town school districts, union school districts and incorporated school districts. Where appropriate, the term 'member district clerk'

shall refer to the clerk of the city in which a Vermont school district is located, the clerk of the town in which a Vermont town school district is located, or the clerk of an incorporated school district.

"c. 'Elementary school' shall mean a school which includes all grades from kindergarten or grade one through not less than grade six nor more than grade eight.

"d. 'Secondary school' shall mean a school which includes all grades beginning no lower than grade seven and no higher than grade twelve.

"e. 'Interstate board' shall refer to the board serving an interstate school district.

"f. 'New Hampshire board' shall refer to the New Hampshire state board of education.

"g. 'Vermont board' shall refer to the Vermont state board of education.

"h. 'Commissioner' shall refer to commissioner of education.

"i. Where joint action by both state boards is required, each state board shall deliberate and vote by its own majority, but shall separately reach the same result or take the same action as the other state board.

"j. The terms 'professional staff personnel' and 'instructional staff personnel' shall include superintendents, assistant superintendents, administrative assistants, principals, guidance counsellors, special education personnel, school nurses, therapists, teachers, and other certified personnel.

"k. The term 'warrant' or 'warning' to mean the same for both states.

"ARTICLE II"

"PROCEDURE FOR FORMATION OF AN INTERSTATE SCHOOL DISTRICT"

"A. CREATION OF PLANNING COMMITTEE.—The New Hampshire and Vermont commissioners of education shall have the power, acting jointly to constitute and discharge one or more interstate school district planning committees. Each such planning committee shall consist of at least two voters from each of a group of two or more neighboring member districts. One of the representatives from each member district shall be a member of its school board, whose term on the planning committee shall be concurrent with his term as a school board member. The term of each member of a planning committee who is not also a school board member shall expire on June thirtieth of the third year following his appointment. The existence of any planning committee may be terminated either by vote of a majority of its members or by joint action of the commissioners. In forming and appointing members to an interstate school district planning board, the commissioners shall consider and take into account recommendations and nominations made by school boards of member districts. No member of a planning committee shall be disqualified because he is at the same time a member of another planning board or committee created under the provisions of this compact or under any other provisions of law. Any existing informal interstate school planning committee may be reconstituted as a formal planning committee in accordance with the provisions hereof, and its previous deliberations adopted and ratified by the reorganized formal planning committee. Vacancies on a planning committee shall be filled by the commissioners acting jointly.

"B. OPERATING PROCEDURES OF PLANNING COMMITTEE.—Each interstate school district planning committee shall meet in the first instance at the call of any member, and shall organize by the election of a chairman and clerk-treasurer, each of whom shall be a resident of a different state. Subsequent meetings may be called by either officer of the committee. The members of the committee shall serve without pay. The member districts shall appropriate money on an equal basis at each annual meeting to meet the expenses of the committee, including the

cost of publication and distribution of reports and advertising. From time to time the commissioners may add additional members and additional member districts to the committee, and may remove members and member districts from the committee. An interstate school district planning committee shall act by majority vote of its membership present and voting.

"C. DUTIES OF INTERSTATE SCHOOL DISTRICT PLANNING COMMITTEE.—It shall be the duty of an interstate school district planning committee, in consultation with the commissions and the State departments of education: to study the advisability of establishing an interstate school district in accordance with the standards set forth in paragraph A of Article I of this compact, its organization, operation and control, and the advisability of constructing, maintaining and operating a school or schools to serve the needs of such interstate district; to estimate the construction and operating costs thereof; to investigate the methods of financing such school or schools, and any other matters pertaining to the organization and operation of an interstate school district; and to submit a report or reports of its findings and recommendations to the several member districts.

"D. RECOMMENDATIONS AND PREPARATION OF ARTICLES OF AGREEMENT.—An interstate school district planning committee may recommend that an interstate school district composed of all the member districts represented by its membership, or any specified combination of such member districts, be established. If the planning committee does recommend the establishment of an interstate school district, it shall include in its report such recommendations, and shall also prepare and include in its report proposed articles of agreement for the proposed interstate school district, which shall be signed by at least a majority of the membership of the planning committee, which set forth the following:

"a. The name of the interstate school district.

"b. The member districts which shall be combined to form the proposed interstate school district.

"c. The number, composition, method of section and terms of office of the interstate school board, provided that:

"(1) The interstate school board shall consist of an odd number of members, not less than five nor more than fifteen;

"(2) The terms of office shall not exceed three years;

"(3) Each member district shall be entitled to elect at least one member of the interstate school board. Each member district shall either vote separately at the interstate school district meeting by the use of a distinctive ballot, or shall choose its member or members at any other election at which school officials may be chosen;

"(4) The method of election shall provide for the filling of candidacies in advance of election and for the use of a printed non-partisan ballot;

"(5) Subject to the foregoing, provision may be made for the election of one or more members at large.

"d. The grades for which the interstate school district shall be responsible.

"e. The specific properties of member districts to be acquired initially by the interstate school district and the general location of any proposed new schools to be initially established or constructed by the interstate school district.

"f. The method of apportioning the operating expenses of the interstate school district among the several member districts, and the time and manner of payments of such shares.

"g. The indebtedness of any member district which the interstate district is to assume.

"h. The method of apportioning the capital expenses of the interstate school district among the several member districts, which need not be the same as the method of apportioning operating expenses, and the time and manner of payment of such shares. Capital expenses shall include the cost of acquiring land and buildings for school purposes; the construction, furnishing and equipping of school buildings and facilities; and the payment of the principal and interest of any indebtedness which is incurred to pay for the same.

"i. The manner in which state aid, available under the laws of either New Hampshire or Vermont, shall be allocated, unless otherwise expressly provided in this compact or by the laws making such aid available.

"j. The method by which the articles of agreement may be amended, which amendments may include the annexation of territory, or an increase or decrease in the number of grades for which the interstate district shall be responsible, provided that no amendment shall be effective until approved by both state board in the same manner as required for approval of the original articles of agreement.

"k. The date of operating responsibility of the proposed interstate school district and a proposed program for the assumption of operating responsibility for education by the proposed interstate school district, and any school construction; which the interstate school district shall have the power to vary by vote as circumstances may require.

"l. Any other matters, not incompatible with law, which the interstate school district planning committee may consider appropriate to include in the articles of agreement, including, without limitation:

"(1) The method of allocating the cost of transportation between the interstate district and member districts;

"(2) The nomination of individual school directors to serve until the first annual meeting of the interstate school district.

"E. HEARINGS.—If the planning committee recommends the formation of an interstate school district, it shall hold at least one public hearing on its report and the proposed articles of agreement within the proposed interstate school district in New Hampshire, and at least one public hearing thereon within the proposed interstate school district in Vermont. The planning committee shall give such notice thereof as it may determine to be reasonable, provided that such notice shall include at least one publication in a newspaper of general circulation within the proposed interstate school district not less than fifteen days (not counting the date of publication and not counting the date of the hearing) before the date of the first hearing. Such hearings may be adjourned from time to time and from place to place. The planning committee may revise the proposed articles of agreement after the date of the hearings. It shall not be required to hold further hearings on the revised articles of agreement but may hold one or more further hearings after notice similar to that required for the first hearings if the planning committee in its sole discretion determines that the revisions are so substantial in nature as to require further presentation to the public before submission to the state boards of education.

"F. APPROVAL BY STATE BOARDS.—After the hearings a copy of the proposed articles of agreement, as revised, signed by a majority of the planning committee, shall be submitted by it to each state board. The state boards may (a) if they find that the articles of agreement are in accord with the standards set forth in this compact and in accordance with sound educational policy, approve the same as submitted, or (b) refer them back to the planning committee for further study. The planning committee may make additional revisions to the proposed articles of agreement to conform to the rec-

ommendations of the state boards. Further hearings on the proposed articles of agreement shall not be required unless ordered by the state boards in their discretion. In exercising such discretion, the state boards shall take into account whether or not the additional revisions are so substantial in nature as to require further presentation to the public. If both state boards find that the articles of agreement as further revised are in accord with the standards set forth in this compact and in accordance with sound educational policy, they shall approve the same. After approval by both state boards, each state board shall cause the articles of agreement to be submitted to the school boards of the several member districts in each state for acceptance by the member districts as provided in the following paragraph. At the same time, each state board shall designate the form of warrant, date, time, place, and period of voting for the special meeting of the member district to be held in accordance with the following paragraph.

"G. ADOPTION BY MEMBER DISTRICTS.—Upon receipt of written notice from the state board in its state of the approval of the articles of agreement by both state boards, the school board of each member district shall cause the articles of agreement to be filed with the member district clerk. Within ten days after receipt of such notice, the school board shall issue its warrant for a special meeting of the member district, the warrant to be in the form, and the meeting to be held at the time and place and in the manner prescribed by the state board. No approval of the superior court shall be required for such special school district meeting in New Hampshire. Voting shall be with the use of the check list by a ballot substantially in the following form:

"Shall the school district accept the provisions of the New Hampshire-Vermont Interstate School Compact providing for the establishment of an interstate school district, together with the school districts of _____ and _____, etc., in accordance with the provisions of the proposed articles of agreement filed with the school district (town, city or incorporated school district) clerk?

"Yes ☐ No ☐

"If the articles of agreement included the nomination of individual school directors, those nominated from each member district shall be included in the ballot and voted upon, such election to become effective upon the formation of an interstate school district.

"If a majority of the voters present and voting in a member district vote in the affirmative, the clerk for such member district shall forthwith send to the state board in its state a certified copy of the warrant, certificate of posting, and minutes of the meeting of the district. If the state boards of both states find that a majority of the voters present and voting in each member district have voted in favor of the establishment of the interstate school district, they shall issue a joint certificate to that effect; and such certificate shall be conclusive evidence of the lawful organization and formation of the interstate school district as of its date of issuance.

"H. RESUBMISSION.—If the proposed articles of agreement are adopted by one or more of the member districts but rejected by one or more of the member districts, the state boards may resubmit them, in the same form as previously submitted, to the rejecting member districts, in which case the school boards thereof shall resubmit them to the voters in accordance with paragraph G of this article. An affirmative vote in accordance therewith shall have the same effect as though the articles of agreement had been adopted in the first instance. In the alternative, the state boards may either (a) dis-

charge the planning committee, or (b) refer the articles of agreement back for further consideration to the same or a reconstituted planning committee, which shall have all of the powers and duties as the planning committee as originally constituted.

"ARTICLE III

"POWERS OF INTERSTATE SCHOOL DISTRICTS

"A. POWERS.—Each interstate school district shall be a body corporate and politic, with power to:

"a. To acquire, construct, extend, improve, staff, operate, manage and govern public schools within its boundaries;

"b. To sue and be sued, subject to the limitations of liability hereinafter set forth;

"c. To have a seal and alter the same at pleasure;

"d. To adopt, maintain and amend bylaws not inconsistent with this compact, and the laws of the two states;

"e. To acquire by purchase, condemnation, lease or otherwise, real and personal property for the use of its schools;

"f. To enter into contracts and incur debts;

"g. To borrow money for the purposes hereinafter set forth, and to issue its bonds or notes therefor;

"h. To make contracts with and accept grants and aid from the United States, the state of New Hampshire, the state of Vermont, any agency or municipality thereof, and private corporations and individuals for the construction, maintenance, reconstruction, operation, and financing of its schools; and to do any and all things necessary in order to avail itself of such aid and cooperation;

"i. To employ such assistants, agents, servants, and independent contractors as it shall deem necessary or desirable for its purposes; and

"j. To take any other action which is necessary or appropriate in order to exercise any of the foregoing powers.

"ARTICLE IV

"DISTRICT MEETINGS

"A. GENERAL.—Votes of the district shall be taken at a duly warned meeting held at any place in the district, at which all of the eligible legal voters of the member districts shall be entitled to vote, except as otherwise provided with respect to the election of directors.

"B. ELIGIBILITY OF VOTERS.—Any resident who would be eligible to vote at a meeting of a member district being held at the same time, shall be eligible to vote at a meeting of the interstate district. The board of civil authority in each Vermont member district and the supervisors of the check list of each New Hampshire district shall respectively prepare a check list of eligible voters for each meeting of the interstate district in the same manner, and they shall have all the same powers and duties with respect to eligibility of voters in their districts as for a meeting of a member district.

"C. WARNING OF MEETINGS.—A meeting shall be warned by a warrant addressed to the residents of the interstate school district qualified to vote in district affairs, stating the time and place of the meeting and the subject matter of the business to be acted upon. The warrant shall be signed by the clerk and by a majority of the directors. Upon written application of ten or more voters in the district, presented to the directors or to one of them, at least twenty-five days before the day prescribed for an annual meeting, the directors shall insert in their warrant for such meeting any subject matter specified in such application.

"D. POSTING AND PUBLICATION OF WARRANT.—The directors shall cause an attested copy of the warrant to be posted at the place of meeting, and a like copy at a public place in each member district at least twenty days (not counting the date of posting and the

date of meeting) before the date of the meeting. In addition, the directors shall cause the warrant to be advertised in a newspaper of general circulation on at least one occasion, such publication to occur at least ten days (not counting the date of publication and not counting the date of the meeting) before the date of the meeting. Although no further notice shall be required, the directors may give such further notice of the meeting as they in their discretion deem appropriate under the circumstances.

"E. RETURN OF WARRANT.—The warrant with a certificate thereon, verified by oath, stating the time and place when and where copies of the warrant were posted and published, shall be given to the clerk of the interstate school district at or before the time of the meeting, and shall be recorded by him in the records of the interstate school district.

"F. ORGANIZATION MEETING.—The commissioners, acting jointly, shall fix a time and place for a special meeting of the qualified voters within the interstate school district for the purpose of organization, and shall prepare and issue the warrant for the meeting after consultation with the interstate school district planning board and the members-elect, if any, of the interstate school board of directors. Such meeting shall be held within sixty days after the date of issuance of the certificate of formation, unless the time is further extended by the joint action of the state boards. At the organization meeting the commissioner of education of the state where the meeting is held, or his designate, shall preside in the first instance, and the following business shall be transacted:

"a. A temporary moderator and a temporary clerk shall be elected from among the qualified voters who shall serve until a moderator and clerk respectively have been elected and qualified.

"b. A moderator, a clerk, a treasurer, and three auditors shall be elected to serve until the next annual meeting and thereafter until their successors are elected and qualified. Unless previously elected, a board of school directors shall be elected to serve until their successors are elected and qualified.

"c. The date for the annual meeting shall be established.

"d. Provision shall be made for the payment of any organizational or other expense incurred on behalf of the district before the organization meeting, including the cost of architects, surveyors, contractors, attorneys, and educational or other consultants or experts.

"e. Any other business, the subject matter of which has been included in the warrant, and which the voters would have had power to transact at an annual meeting.

"G. ANNUAL MEETINGS.—An annual meeting of the district shall be held between January fifteenth and June first of each year at such time as the interstate district may by vote determine. Once determined, the date of the annual meeting shall remain fixed until changed by vote of the interstate district at a subsequent annual or special meeting. At each annual meeting the following business shall be transacted:

"a. Necessary officers shall be elected.

"b. Money shall be appropriated for the support of the interstate district schools for the first year beginning the following July first.

"c. Such other business as may properly come before the meeting.

"H. SPECIAL MEETINGS.—A special meeting of the district shall be held whenever, in the opinion of the directors, there is occasion therefor, or whenever written application shall have been made by five per cent or more of the voters (based on the check lists as prepared for the last preceding meeting) setting forth the subject matter upon which such action is desired. A special meeting may

appropriate money without compliance with RSA 33:8 or RSA 197:3 which would otherwise require the approval of the New Hampshire superior court.

"I. CERTIFICATION OF RECORD.—The clerk of an interstate school district shall have the power to certify the record of the votes adopted at an interstate school district meeting to the respective commissioners and state boards and (where required) for filing with a secretary of state.

"J. METHOD OF VOTING AT SCHOOL DISTRICT MEETINGS.—Voting at meeting of interstate school districts shall take place as follows:

"a. SCHOOL DIRECTORS.—A separate ballot shall be prepared for each member district, listing the candidates for interstate school director to represent such member district; and any candidates for interstate school director at large; and the voters of each member district shall register on a separate ballot their choice for the office of school director or directors. In the alternative, the articles of agreement may provide for the election of school directors by one or more of the member districts at an election otherwise held for the choice of school or other municipal officers.

"b. OTHER VOTES.—Except as otherwise provided in the articles of agreement or this compact, with respect to all other votes (1) the voters of the interstate school district shall vote as one body irrespective of the member districts in which they are resident, and (2) a simple majority of those present and voting at any duly warned meeting shall carry the vote. Voting for officers to be elected at any meeting, other than school directors, shall be by ballot or voice, as the interstate district may determine, either in its articles of agreement or by a vote of the meeting.

"ARTICLE V

"OFFICERS

"A. OFFICERS: GENERAL.—The officers of an interstate school district shall be a board of school directors, a chairman of the board, a vice-chairman of the board, a secretary of the board, a moderator, a clerk, a treasurer and three auditors. Except as otherwise specifically provided, they shall be eligible to take office immediately following their election; they shall serve until the next annual meeting of the interstate district and until their successors are elected and qualified. Each shall take oath for the faithful performance of his duties before the moderator, or a notary public or a justice of the peace of the state in which the oath is administered. Their compensation shall be fixed by vote of the district. No person shall be eligible to any district office unless he is a voter in the district. A custodian, school teacher, principal, superintendent or other employee of an interstate district acting as such shall not be eligible to hold office as a school director.

"B. BOARD OF DIRECTORS.—

"a. HOW CHOSEN.—Each member district shall be represented by at least one resident on the board of school directors of an interstate school district. A member district shall be entitled to such further representation on the interstate board of school directors as provided in the articles of agreement as amended from time to time. The articles of agreement as amended from time to time may provide for school directors at large, as above set forth. No person shall be disqualified to serve as a member of an interstate board because he is at the same time a member of the school board of a member district.

"b. TERM.—Interstate school directors shall be elected for terms in accordance with the articles of agreement.

"c. DUTIES OF BOARD OF DIRECTORS.—The board of school directors of an interstate school district shall have and exercise all of the powers of the district not reserved herein to the voters of the district.

"d. ORGANIZATION.—The clerk of the dis-

trict shall warn a meeting of the board of school directors to be held within ten days following the date of the annual meeting, for the purpose of organizing the board, including the election of its officers.

"C. CHAIRMAN OF THE BOARD.—The chairman of the board of interstate school directors shall be elected by the interstate board from among its members at its first meeting following the annual meeting. The chairman shall preside at the meetings of the board and shall perform such other duties as the board may assign to him.

"D. VICE-CHAIRMAN OF THE BOARD OF DIRECTORS.—The vice-chairman of the interstate board shall be elected in the same manner as the chairman. He shall represent a member district in a state other than that represented by the chairman. He shall preside in the absence of the chairman and shall perform such other duties as may be assigned to him by the interstate board.

"E. SECRETARY OF THE BOARD.—The Secretary of the interstate board shall be elected in the same manner as the chairman. Instead of electing one of its members, the interstate board may appoint the interstate district clerk to serve as secretary of the board in addition to his other duties. The secretary of the interstate board (or the interstate district clerk, if so appointed) shall keep the minutes of its meetings, shall certify its records, and perform such other duties as may be assigned to him by the board.

"F. MODERATOR.—The moderator shall preside at the district meetings, regulate the business thereof, decide questions of order, and make a public declaration of every vote passed. He may prescribe rules of procedure; but such rules may be altered by the district. He may administer oaths to district officers in either state.

"G. CLERK.—The clerk shall keep a true record of all proceedings at each district meeting, shall certify its records, shall make an attested copy of any records of the district for any person upon request and tender of reasonable fees therefor, if so appointed, shall serve as secretary of the board of school directors, and shall perform such other duties as may be required by custom or law.

"H. TREASURER.—The treasurer shall have custody of all of the monies belonging to the district and shall pay out the same only upon the order of the interstate board. He shall keep a fair and accurate account of all sums received into and paid from the interstate district treasury, and at the close of each fiscal year he shall make a report to the interstate district, giving a particular account of all receipts and payments during the year. He shall furnish to the interstate directors, statements from his books and submit his books and vouchers to them and to the district auditors for examination whenever so requested. He shall make all returns called for by laws relating to school districts. Before entering on his duties, the treasurer shall give a bond with sufficient sureties and in such sum as the directors may require. The treasurer's term of office is from July 1 to the following June 30.

"I. AUDITORS.—At the organization meeting of the district, three auditors shall be chosen, one to serve for a term of one year, one to serve for a term of two years, and one to serve for a term of three years. After the expiration of each original term, the successor shall be chosen for a three year term. At least one auditor shall be a resident of New Hampshire, and one auditor shall be a resident of Vermont. An interstate district may vote to employ a certified public accountant to assist the auditors in the performance of their duties. The auditors shall carefully examine the accounts of the treasurer and the directors at the close of each fiscal year, and at such other times whenever necessary, and report to the district whether the same are correctly cast and properly vouched.

"J. SUPERINTENDENT.—The superintendent of schools shall be selected by a majority vote of the board of school directors of the interstate district with the approval of both commissioners.

"K. VACANCIES.—Any vacancy among the elected officers of the district shall be filled by the interstate board until the next annual meeting of the district or other election, when a successor shall be elected to serve out the remainder of the unexpired term, if any. Until all vacancies on the interstate board are filled, the remaining members shall have full power to act.

"ARTICLE VI

"APPROPRIATION AND APPORTIONMENT OF FUNDS

"A. BUDGET.—Before each annual meeting, the interstate board shall prepare a report of expenditures for the preceding fiscal year, an estimate of expenditures for the current fiscal year, and a budget for the succeeding fiscal year.

"B. APPROPRIATION.—The interstate board of directors shall present the budget report of the annual meeting. The interstate district shall appropriate a sum of money for the support of its schools and for the discharge of its obligations for the ensuing fiscal year.

"C. APPORTIONMENT OF APPROPRIATION.—Subject to the provisions of article VII hereof, the interstate board shall first apply against such appropriation any income to which the interstate district is entitled, and shall then apportion the balance among the member districts in accordance with one of the following formulas as determined by the articles of agreement as amended from time to time:

"a. All of such balance to be apportioned on the basis of the ratio that the fair market value of the taxable property in each member district bears to that of the entire interstate district; or

"b. All of such balance to be apportioned on the basis that the average daily resident membership for the preceding fiscal year of each member district bears to that of the average daily resident membership of the entire interstate school district; or

"c. A formula based on any combination of the foregoing factors. The term 'fair market value of taxable property' shall mean the last locally assessed valuation of a member district in New Hampshire, as last equalized by the New Hampshire state tax commission.

"The term 'fair market value of taxable property' shall mean the equalized grand list of a Vermont member district, as determined by the Vermont department of taxes.

"Such assessed valuation and grand list may be further adjusted (by elimination of certain types of taxable property from one or the other or otherwise) in accordance with the articles of agreement, in order that the fair market value of taxable property in each state shall be comparable.

"Average daily resident membership' of the interstate district in the first instance shall be the sum of the average daily resident membership of the member districts in the grades involved for the preceding fiscal year where no students were enrolled in the interstate district schools for such preceding fiscal year.

"D. SHARE OF NEW HAMPSHIRE MEMBER DISTRICT.—The interstate board shall certify the share of a New Hampshire member district of the total appropriation to the school board of each member district which shall add such sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district. The interstate district shall not set up its own capital reserve funds; but a New Hampshire member district may set up a capital reserve fund in accordance with RSA 35, to be turned over to the interstate dis-

trict in payment of the New Hampshire member district's share of any anticipated obligations.

"E. SHARE OF VERMONT MEMBER DISTRICT.—The interstate board shall certify the share of a Vermont member district of the total appropriation to the school board of each member district which shall add sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district.

"ARTICLE VIII

"BORROWING

"A. INTERSTATE DISTRICT INDEBTEDNESS.—Indebtedness of an interstate district shall be a general obligation of the district and shall also be a joint and several general obligation of each member district, except that such obligations of the district and its member districts shall not be deemed indebtedness of any member district for the purposes of determining its borrowing capacity under New Hampshire or Vermont law. A member district which withdraws from an interstate district shall remain liable for indebtedness of the interstate district which is outstanding at the time of withdrawal and shall be responsible for paying its share of such indebtedness to the same extent as though it had not been withdrawn.

"B. TEMPORARY BORROWING.—The interstate board may authorize the borrowing of money by the interstate district (1) in anticipation of payments of operating and capital expenses by the member districts to the interstate districts and (2) in anticipation of the issue of bonds or notes of the interstate district which have been authorized for the purpose of financing capital projects. Such temporary borrowing shall be evidenced by interest bearing or discounted notes of the interstate district. The amount of notes issued in any fiscal year in anticipation of expense payments shall not exceed the amount of such payments received by the interstate district in the preceding fiscal year. Notes issued under this paragraph shall be payable within one year in the case of notes under clause (1) and three years in the case of notes under clause (2) from their respective dates, but the principal of and interest on notes issued for a shorter period may be renewed or paid from time to time by the issue of other notes, provided that the period from the date of an original note to the maturity of any note issued to renew or pay the same debt shall not exceed the maximum period permitted for the original loan.

"C. BORROWING FOR CAPITAL PROJECTS.—An interstate district may incur debt and issue its bonds or notes to finance capital projects. Such projects may consist of the acquisition or improvement of land and buildings for school purposes, the construction, reconstruction, alteration, or enlargement of school buildings and related school facilities, the acquisition of equipment of a lasting character and the payment of judgments. No interstate district may authorize indebtedness in excess of ten percent of the total fair market value of taxable property in its member districts as defined in article VI of this compact. The primary obligation of the interstate district of pay indebtedness of member districts shall not be considered indebtedness of the interstate district for the purpose of determining its borrowing capacity under this paragraph. Bonds or notes issued under this paragraph shall mature in equal or diminishing installments of principal payable at least annually commencing no later than two years and ending not later than thirty years after their dates.

"D. AUTHORIZATION PROCEEDINGS.—An interstate district shall authorize the incurring of debts to finance capital projects by a majority vote of the district passed at an annual or special district meeting. Such vote shall be taken by secret ballot after full

opportunity for debate, and any such vote shall be subject to reconsideration and further action by the district at the same meeting or at an adjourned session thereof.

"E. SALE OF BONDS AND NOTES.—Bonds and notes which have been authorized under this article may be issued from time to time and shall be sold at not less than par and accrued interest at public or private sale by the chairman of the school board and by the treasurer. Interstate district bonds and notes shall be signed by the said officers, except that either one of the two required signatures may be a facsimile. Subject to this compact and the authorizing vote, they shall be in such form, bear such rates of interest and mature at such times as the said officers may determine. Bonds shall, but notes need not, bear the seal of the interstate district, or a facsimile of such seal. Any bonds or notes of the interstate district which are properly executed by the said officers shall be valid and binding according to their terms notwithstanding that before the delivery thereof such officers may have ceased to be officers of the interstate district.

"F. PROCEEDS OF BOND.—Any accrued interest received upon delivery of bonds or notes of an interstate district shall be applied to the payment of the first interest which becomes due thereon. The other proceeds of the sale of such bonds or notes, other than temporary notes, including any premiums, may be temporarily invested by the interstate district pending their expenditure; and such proceeds, including any income derived from the temporary investment of such proceeds, shall be used to pay the costs of issuing and marketing the bonds or notes and to meet the operating expenses of capital expenses in accordance with the purposes for which the bonds or notes were issued or, by proceedings taken in the manner required for the authorization of such debt, for other purposes for which such debt could be incurred. No purchaser of any bonds or notes of an interstate district shall be responsible in any way to see to the application of the proceeds thereof.

"G. STATE AID PROGRAMS.—As used in this paragraph the term 'initial aid' shall include New Hampshire and Vermont financial assistance with respect to a capital project, or the means of financing a capital project, which is available in connection with construction costs of a capital project or which is available at the time indebtedness is incurred to finance the project. Without limiting the generality of the foregoing definition, initial aid shall specifically include a New Hampshire state guarantee under RSA 195-B with respect to bonds or notes and Vermont construction aid under chapter 123 of 16 V.S.A. As used in this paragraph the term 'long-term aid' shall include New Hampshire and Vermont financial assistance which is payable periodically in relation to capital costs incurred by an interstate district. Without limiting the generality of the foregoing definition, long-term aid shall specifically include New Hampshire school building aid under RSA 198 and Vermont school building aid under chapter 123 of Title 16 V.S.A. For the purpose of applying for, receiving and expending initial aid and long-term aid an interstate district shall be deemed a native school district by each state, subject to the following provisions. When an interstate district has appropriated money for a capital project, the amount appropriated shall be divided into a New Hampshire share and a Vermont share in accordance with the capital expense apportionment formula in the articles of agreement as though the total amount appropriated for the project was a capital expense requiring apportionment in the year the appropriation is made. New Hampshire initial aid shall be available with respect to the amount of the New Hampshire share as though it were authorized indebtedness of a New Hampshire cooperative school

district. In the case of a state guarantee of interstate districts bonds or notes under RSA 195-B, the interstate district shall be eligible to apply for and receive an unconditional state guarantee with respect to an amount of its bonds or notes which does not exceed fifty per cent of the amount of the New Hampshire share as determined above. Vermont initial aid shall be available with respect to the amount of the Vermont share as though it were funds voted by a Vermont school district. Payments of Vermont initial aid shall be made to the interstate district, and the amount of any borrowing authorized to meet the appropriation for the capital project shall be reduced accordingly. New Hampshire and Vermont long-term aid shall be payable to the interstate district. The amounts of long-term aid in each year shall be based on the New Hampshire and Vermont shares of the amount of indebtedness of the interstate district which is payable in that year and which has been apportioned in accordance with the capital expense apportionment formula in the articles of agreement. The New Hampshire aid shall be payable at the rate of forty-five percent, if there are three or less New Hampshire members in the interstate district, and otherwise it shall be payable as though the New Hampshire members were a New Hampshire cooperative school district. New Hampshire and Vermont long-term aid shall be deducted from the total capital expenses for the fiscal year in which the long-term aid is payable, and the balance of such expenses shall be apportioned among the member districts. Notwithstanding the foregoing provisions, New Hampshire and Vermont may at any time change their state school aid programs that are in existence when this compact takes effect and may establish new programs, and any legislation for these purposes may specify how such programs shall be applied with respect to interstate districts.

"H. TAX EXEMPTION.—Bonds and notes of an interstate school district shall be exempt from local property taxes in both states, and the interest or discount thereon and any profit derived from the disposition thereof shall be exempt from personal income taxes in both states.

"ARTICLE VIII

"TAKING OVER OF EXISTING PROPERTY

"A. POWER TO ACQUIRE PROPERTY OF MEMBER DISTRICT.—The articles of agreement, or an amendment thereof, may provide for the acquisition by an interstate district from a member district of all or a part of its existing plant and equipment.

"B. VALUATION.—The articles of agreement, or the amendment, shall provide for the determination of the value of the property to be acquired in one or more of the following ways:

"a. A valuation set forth in the articles of agreement or the amendment.

"b. By appraisal, in which case, one appraiser shall be appointed by each commissioner, and a third appraiser appointed by the first two appraisers.

"C. REIMBURSEMENT TO MEMBER DISTRICT.—The articles of agreement shall specify the method by which the member district shall be reimbursed by the interstate district for the property taken over, in one or more of the following ways:

"a. By one lump sum, appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"b. In installments over a period of not more than twenty years, each of which is appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"c. By an agreement to assume or reimburse the member district for all principal and interest on any outstanding indebtedness originally incurred by the member district to finance the acquisition and improve-

ment of the property, each such installment to be appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"The member district transferring the property shall have the same obligation to pay to the interstate district its share of the cost of such acquisition, but may offset its right to reimbursement.

"ARTICLE IX

"AMENDMENTS TO ARTICLES OF AGREEMENT

"A. Amendments to the articles of agreement may be adopted in the same manner provided for the adoption of the original articles of agreement, except that:

"a. Unless the amendment calls for the addition of a new member district, the functions of the planning committee shall be carried out by the interstate district board of directors.

"b. If the amendment proposes the addition of a new member district, the planning committee shall consist of all of the members of the interstate board and all of the members of the school board of the proposed new member district or districts. In such case the amendment shall be submitted to the voters at an interstate district meeting, at which an affirmative vote of two-thirds of those present and voting shall be required. The articles of agreement together with the proposed amendment shall be submitted to the voters of the proposed new member district at a meeting thereof, at which a simple majority of those present and voting shall be required.

"c. In all cases an amendment may be adopted on the part of an interstate district upon the affirmative vote of voters thereof at a meeting voting as one body. Except where the amendment proposes the admission of a new member district, a simple majority of those present and voting shall be required for adoption.

"d. No amendment to the articles of agreement may impair the rights of bond or note holders or the power of the interstate district to procure the means for their payment.

"ARTICLE X

"APPLICABILITY OF NEW HAMPSHIRE LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in New Hampshire, the provisions of New Hampshire law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. NEW HAMPSHIRE STATE AID.—A New Hampshire school district shall be entitled to receive an amount of State aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the New Hampshire member district, and as though the New Hampshire member district pupils attending the interstate school were attending a New Hampshire cooperative school district's school. The state aid shall be paid to the New Hampshire member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF THE NEW HAMPSHIRE MEMBER SCHOOL DISTRICT.—A New Hampshire member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not

herein delegated to the district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The New Hampshire member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor, unless the indebtedness is specifically assumed in accordance with the articles of agreement. Any trust funds or capital reserve funds and any property not taken over by the interstate district shall be retained by the New Hampshire member district and held or disposed of according to law. If all of the schools in a member district are incorporated into an interstate district, then no annual meeting of the member district shall be required unless the members of the interstate board from the member district shall determine that there is occasion for such an annual meeting.

"D. SUIT AND SERVICE OF PROCESS IN NEW HAMPSHIRE.—The courts of New Hampshire shall have the same jurisdiction over the district as though a New Hampshire member district were a party instead of the interstate district. The service necessary to institute suit in New Hampshire shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who reside in New Hampshire, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in New Hampshire shall be considered an employee of a New Hampshire school district for the purpose of the New Hampshire teachers' retirement system, the New Hampshire state employees' retirement system, the New Hampshire workmen's compensation law and any other law relating to the regulation of employment or the provision of benefits for employees of New Hampshire school districts except as follows:

"1. A teacher in a New Hampshire member district may elect to remain a member of the New Hampshire teachers' retirement system, even though assigned to teach in an interstate school in Vermont.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of New Hampshire or the state of Vermont but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedure of the retirement systems; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XI

"APPLICABILITY OF VERMONT LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in Vermont, the provisions of Vermont law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged

by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. VERMONT STATE AID.—A Vermont school district shall be entitled to receive such amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the Vermont member district, and as though the Vermont member district pupils attending the interstate schools were attending a Vermont union school district's schools. Such a state aid shall be paid to the Vermont member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF VERMONT MEMBER SCHOOL DISTRICT.—A Vermont member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not herein delegated to the district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The Vermont member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor. Any trust funds and any property not taken over shall be retained by the Vermont member school district and held or disposed of according to law.

"D. SUIT AND SERVICE OF PROCESS IN VERMONT.—The courts of Vermont shall have the same jurisdiction over the districts as though a Vermont member district were a party instead of the interstate district. The service necessary to institute suit in Vermont shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who resides in Vermont, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in Vermont shall be considered an employee of a Vermont school district for the purpose of the state teachers' retirement system of Vermont, the state employees' retirement system, the Vermont workmen's compensation law, and any other law relating to the regulation of employment or the provision of benefits for employees of Vermont school districts except as follows:

"1. A teacher in a Vermont member district may elect to remain a member of the state teachers' retirement system of Vermont, even though assigned to teach in an interstate school in New Hampshire.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of Vermont or the state of New Hampshire but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedures of the retirement system; (b) see that each teacher or professional staff

employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XII

"ADOPTION OF COMPACT BY DRESDEN SCHOOL DISTRICT

"The Dresden School District, otherwise known as the Hanover-Norwich Interstate School district, authorized by New Hampshire laws of 1961, chapter 116, and by the laws of Vermont, is hereby authorized to adopt the provisions of this compact and to become an interstate school district within the meaning hereof, upon the following conditions and subject to the following limitations:

"a. Articles of agreement shall be prepared and signed by a majority of the directors of the interstate school district.

"b. The articles of agreement shall be submitted to an annual or special meeting of the Dresden district for adoption.

"c. An affirmative vote of two-thirds of those present and voting shall be required for adoption.

"d. Nothing contained therein, or in this compact, as it affects the Dresden School District shall affect adversely the rights of the holders of any bonds or other evidences of indebtedness then outstanding, or the rights of the district to procure the means for payment thereof previously authorized.

"e. The corporate existence of the Dresden School District shall not be terminated by such adoption of articles of amendment, but shall be deemed to be so amended that it shall thereafter be governed by the terms of this compact.

"ARTICLE XIII

"MISCELLANEOUS PROVISIONS

"A. STUDIES.—Insofar as practicable, the studies required by the laws of both states shall be offered in an interstate school district.

"B. TEXTBOOKS.—Textbooks and scholar's supplies shall be provided at the expense of the interstate district for pupils attending its schools.

"C. TRANSPORTATION.—The allocation of the cost of transportation in an interstate school district, as between the interstate district and the member districts, shall be determined by the articles of agreement.

"D. LOCATION OF SCHOOLHOUSES.—In any case where a new schoolhouse or other school facility is to be constructed or acquired, the interstate board shall first determine whether it shall be located in New Hampshire or in Vermont. If it is to be located in New Hampshire, RSA 199, relating to schoolhouses, shall apply. If it is to be located in Vermont, the Vermont law relating to schoolhouses shall apply.

"E. FISCAL YEAR.—The fiscal year of each interstate district shall begin on July first of each year and end on June thirtieth of the following year.

"F. IMMUNITY FROM TORT LIABILITY.—Notwithstanding the fact that an interstate district may derive income from operating profit, fees, rentals, and other services, it shall be immune from suit and from liability for injury to persons or property and for other torts caused by it or its agents, servants or independent contractors, except insofar as it may have undertaken such liability under RSA 281:7 relating to workmen's compensation, or RSA 412:3 relating to the procurement of liability insurance by a governmental agency and except insofar as it may have undertaken such liability under 21 V.S.A. Section 621 relating to workmen's compensation or 29 V.S.A. Section 1403 relating to the procurement of liability insurance by a governmental agency.

"G. ADMINISTRATIVE AGREEMENT BETWEEN COMMISSIONERS OF EDUCATION.—The commissioners of education of New Hampshire and Vermont may enter into one or more administrative agreements prescribing the relationship between the interstate districts, member districts, and each of the two state departments of education, in which any conflicts between the two states in procedure, regulations, and administrative practices may be resolved.

"H. AMENDMENT.—Neither state shall amend its legislation or any agreement authorized thereby without the consent of the other in such manner as to substantially adversely affect the rights of the other state or its people hereunder, or as to substantially impair the rights of the holders of any bonds or notes or other evidences of indebtedness then outstanding or the rights of an interstate school district to procure the means for payment thereof. Subject to the foregoing, any reference herein to other statutes of either state shall refer to such statute as it may be amended or revised from time to time.

"I. SEPARABILITY.—If any of the provisions of this compact, or legislation enabling the same, shall be held invalid or unconstitutional in relation to any of the applications thereof, such invalidity or unconstitutionality shall not affect other applications thereof or other provisions thereof; and to this end the provisions of this compact are declared to be severable.

"J. INCONSISTENCY OF LANGUAGE.—The validity of this compact shall not be affected by any insubstantial differences in its form or language as adopted by the two states.

"ARTICLE XIV

"EFFECTIVE DATE

"This compact shall become effective when agreed to by the States of New Hampshire and Vermont and approved by the United States Congress."

SEC. 2. The right to alter, amend, or repeal this Act is expressly reserved.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 751) was laid on the table.

DISCONTINUANCE OF THE ANNUAL REPORT TO CONGRESS AS TO THE ADMINISTRATIVE SETTLEMENT OF PERSONAL PROPERTY CLAIMS OF MILITARY PERSONNEL AND CIVILIAN EMPLOYEES

The Clerk called the bill (H.R. 4246) to discontinue the annual report to Congress as to the administrative settlement of personal property claims of military personnel and civilian employees.

There being no objection, the Clerk read the bill, as follows:

H.R. 4246

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3(e) of the Military Personnel and Civilian Employees' Claims Act of 1964, as amended (31 U.S.C. 241(e)), is repealed.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HALL. Mr. Speaker, reserving the right to object, it is my understanding that there is a subsequent bill to be considered on the Consent Calendar today which will increase administrative settlement of similar claims, and honestly these two bills are part of the same reparation process, the reports of which we

have long enjoyed, and based on which we have only in the past 2 or 3 years extended the limits of permissiveness for settlement of service personnel's claims of loss by the administrative or executive branch.

I believe these reports are valuable and have proved of value to Members of the Congress and of the House in particular, insofar as reviewing these settlements that are made; actually as a delegation of congressional authority to the executive branch.

Therefore, I would ask unanimous consent that this bill be put over without prejudice at this time pending further study.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

NEW HAMPSHIRE-VERMONT INTER-STATE SCHOOL COMPACT

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent that the proceedings by which the bill, S. 278, was passed be vacated.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent for the immediate consideration of S. 278, a bill similar to H.R. 751 just passed on the Consent Calendar.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. HALL. Mr. Speaker, reserving the right to object, are we being reassured that this is simply a technical confirmation procedure and that the bill, S. 278, which is stated to be similar is in fact technically the same bill that we previously considered and passed by unanimous consent?

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield?

Mr. HALL. I yield to the gentleman. Mr. KASTENMEIER. This is identical except for the amendment just adopted by the House.

Mr. HALL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There being no objection, the Clerk read the Senate bill, as follows:

S. 278

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress consents to the New Hampshire-Vermont Interstate School Compact which is substantially as follows:

"NEW HAMPSHIRE-VERMONT INTER-STATE SCHOOL COMPACT"

"ARTICLE I

"GENERAL PROVISIONS

"A. STATEMENT OF POLICY.—It is the purpose of this compact to increase the educational opportunities within the states of New Hampshire and Vermont by encouraging the formation of interstate school districts which will each be a natural social and economic region with adequate financial resources and a number of pupils sufficient to

permit the efficient use of school facilities within the interstate district and to provide improved instruction. The state boards of education of New Hampshire and Vermont may formulate and adopt additional standards consistent with this purpose and with these standards; and the formation of any interstate school district and the adoption of its articles of agreement shall be subject to the approval of both state boards as hereinafter set forth.

"B. REQUIREMENT OF CONGRESSIONAL APPROVAL.—This compact shall not become effective until approved by the United States Congress.

"C. DEFINITIONS.—The terms used in this compact shall be construed as follows, unless a different meaning is clearly apparent from the language or context:

"a. 'Interstate school district' and 'interstate district' shall mean a school district composed of one or more school districts located in the state of New Hampshire associated under this compact with one or more school districts located in the state of Vermont, and may include either the elementary schools, the secondary schools, or both.

"b. 'Member school district' and 'member district' shall mean a school district located either in New Hampshire or Vermont which is included within the boundaries of a proposed or established interstate school district. In the case of districts located in Vermont, it shall include city school districts, town school districts, union school districts and incorporated school districts. Where appropriate, the term 'member district clerk' shall refer to the clerk of the city in which a Vermont school district is located, the clerk of the town in which a Vermont town school district is located, or the clerk of an incorporated school district.

"c. 'Elementary school' shall mean a school which includes all grades from kindergarten or grade one through not less than grade six nor more than grade eight.

"d. 'Secondary school' shall mean a school which includes all grades beginning no lower than grade seven and no higher than grade twelve.

"e. 'Interstate board' shall refer to the board serving an intermediate school district.

"f. 'New Hampshire board' shall refer to the New Hampshire state board of education.

"g. 'Vermont board' shall refer to the Vermont state board of education.

"h. 'Commissioner' shall refer to commissioner of education.

"i. Where joint action by both state boards is required, each state board shall deliberate and vote by its own majority, but shall separately reach the same result or take the same action as the other state board.

"j. The terms 'professional staff personnel' and 'instructional staff personnel' shall include superintendents, assistant superintendents, administrative assistants, principals, guidance counsellors, special education personnel, school nurses, therapists, teachers, and other certified personnel.

"k. The term 'warrant' or 'warning' to mean the same for both states.

"ARTICLE II

"PROCEDURE FOR FORMATION OF AN INTERSTATE SCHOOL DISTRICT

"A. CREATION OF PLANNING COMMITTEE.—The New Hampshire and Vermont commissioners of education shall have the power, acting jointly to constitute and discharge one or more interstate school district planning committees. Each such planning committee shall consist of at least two voters from each of a group of two or more neighboring member districts. One of the representatives from each member district shall be a member of its school board, whose term on the planning committee shall be concurrent with his term as a school board member. The term of each member of a planning committee who is not also a school board member shall expire on June thirtieth of the third year following

his appointment. The existence of any planning committee may be terminated either by vote of a majority of its members or by joint action of the commissioners. In forming and appointing members to an interstate school district planning board, the commissioners shall consider and take into account recommendations and nominations made by school boards of member districts. No member of a planning committee shall be disqualified because he is at the same time a member of another planning board or committee created under the provisions of this compact or under any other provisions of law. Any existing informal interstate school planning committee may be reconstituted as a formal planning committee in accordance with the provisions hereof, and its previous deliberations adopted and ratified by the reorganized formal planning committee. Vacancies on a planning committee shall be filled by the commissioners acting jointly.

"B. OPERATING PROCEDURES OF PLANNING COMMITTEE.—Each interstate school district planning committee shall meet in the first instance at the call of any member, and shall organize by the election of a chairman and clerk-treasurer, each of whom shall be a resident of a different state. Subsequent meetings may be called by either officer of the committee. The members of the committee shall serve without pay. The member districts shall appropriate money on an equal basis at each annual meeting to meet the expenses of the committee, including the cost of publication and distribution of reports and advertising. From time to time the commissioners may add additional members and additional member districts to the committee, and may remove members and member districts from the committee. An interstate school district planning committee shall act by majority vote of its membership present and voting.

"C. DUTIES OF INTERSTATE SCHOOL DISTRICT PLANNING COMMITTEE.—It shall be the duty of an interstate school district planning committee, in consultation with the commissioners and the state departments of education: to study the advisability of establishing an interstate school district in accordance with the standards set forth in paragraph A of Article I of this compact, its organization, operation and control, and the advisability of constructing, maintaining and operating a school or schools to serve the needs of such interstate district; to estimate the construction and operating costs thereof; to investigate the methods of financing such school or schools, and any other matters pertaining to the organization and operation of an interstate school district; and to submit a report or reports of its findings and recommendations to the several member districts.

"D. RECOMMENDATIONS AND PREPARATION OF ARTICLES OF AGREEMENT.—An interstate school district planning committee may recommend that an interstate school district composed of all the member districts represented by its membership, or any specified combination of such member districts, be established. If the planning committee does recommend the establishment of an interstate school district, it shall include in its report such recommendations, and shall also prepare and include in its report proposed articles of agreement for the proposed interstate school district, which shall be signed by at least a majority of the membership of the planning committee, which set forth the following:

"a. The name of the interstate school district.

"b. The member districts which shall be combined to form the proposed interstate school district.

"c. The number, composition, method of section and terms of office of the interstate school board, provided that:

"(1) The interstate school board shall consist of an odd number of members, not less than five nor more than fifteen;

"(2) The terms of office shall not exceed three years;

"(3) Each member district shall be entitled to elect at least one member of the interstate school board. Each member district shall either vote separately at the interstate school district meeting by the use of a distinctive ballot, or shall choose its member or members at any other election at which school officials may be chosen;

"(4) The method of election shall provide for the filing of candidacies in advance of election and for the use of a printed non-partisan ballot;

"(5) Subject to the foregoing, provision may be made for the election of one or more members at large.

"d. The grades for which the interstate school district shall be responsible.

"e. The specific properties of member districts to be acquired initially by the interstate school district and the general location of any proposed new schools to be initially established or constructed by the interstate school district.

"f. The method of apportioning the operating expenses of the interstate school district among the several member districts, and the time and manner of payments of such shares.

"g. The indebtedness of any member district which the interstate district is to assume.

"h. The method of apportioning the capital expenses of the interstate school district among the several member districts, which need not be the same as the method of apportioning operating expenses, and the time and manner of payment of such shares. Capital expenses shall include the cost of acquiring land and buildings for school purposes; the construction, furnishing and equipping of school buildings and facilities; and the payment of the principal and interest of any indebtedness which is incurred to pay for the same.

"i. The manner in which state aid, available under the laws of either New Hampshire or Vermont, shall be allocated, unless otherwise expressly provided in this compact or by the laws making such aid available.

"j. The method by which the articles of agreement may be amended, which amendments may include the annexation of territory, or an increase or decrease in the number of grades for which the interstate district shall be responsible, provided that no amendment shall be effective until approved by both state boards in the same manner as required for approval of the original articles of agreement.

"k. The date of operating responsibility of the proposed interstate school district and a proposed program for the assumption of operating responsibility for education by the proposed interstate school district, and any school construction; which the interstate school district shall have the power to vary by vote as circumstances may require.

"l. Any other matters, not incompatible with law, which the interstate school district planning committee may consider appropriate to include in the articles of agreement, including, without limitation:

"(1) The method of allocating the cost of transportation between the interstate district and member districts;

"(2) The nomination of individual school directors to serve until the first annual meeting of the interstate school district.

"E. HEARINGS.—If the planning committee recommends the formation of an interstate school district, it shall hold at least one public hearing on its report and the proposed articles of agreement within the proposed interstate school district in New Hampshire, and at least one public hearing thereon within the proposed interstate school district in Vermont. The planning committee shall give such notice thereof as it may determine to be reasonable, provided that such notice

shall include at least one publication in a newspaper of general circulation within the proposed interstate school district not less than fifteen days (not counting the date of publication and not counting the date of the hearing) before the date of the first hearing. Such hearings may be adjourned from time to time and from place to place. The planning committee may revise the proposed articles of agreement after the date of the hearings. It shall not be required to hold further hearings on the revised articles of agreement but may hold one or more further hearings after notice similar to that required for the first hearings if the planning committee in its sole discretion determines that the revisions are so substantial in nature as to require further presentation to the public before submission to the state boards of education.

"F. APPROVAL BY STATE BOARDS.—After the hearings a copy of the proposed articles of agreement, as revised, signed by a majority of the planning committee, shall be submitted by it to each state board. The state boards may (a) if they find that the articles of agreement are in accord with the standards set forth in this compact and in accordance with sound educational policy, approve the same as submitted, or (b) refer them back to the planning committee for further study. The planning committee may make additional revisions to the proposed articles of agreement to conform to the recommendations of the state boards. Further hearings on the proposed articles of agreement shall not be required unless ordered by the state boards in their discretion. In exercising such discretion, the state boards shall take into account whether or not the additional revisions are so substantial in nature as to require further presentation to the public. If both state boards find that the articles of agreement as further revised are in accord with the standards set forth in this compact and in accordance with sound educational policy, they shall approve the same. After approval by both state boards, each state board shall cause the articles of agreement to be submitted to the school boards of the several member districts in each state for acceptance by the member districts as provided in the following paragraph. At the same time, each state board shall designate the form of warrant, date, time, place, and period of voting for the special meeting of the member district to be held in accordance with the following paragraph.

"G. ADOPTION BY MEMBER DISTRICTS.—Upon receipt of written notice from the state board in its state of the approval of the articles of agreement by both state boards, the school board of each member district shall cause the articles of agreement to be filed with the member district clerk. Within ten days after receipt of such notice, the school board shall issue its warrant for a special meeting of the member district, the warrant to be in the form, and the meeting to be held at the time and place and in the manner prescribed by the state board. No approval of the superior court shall be required for such special school district meeting in New Hampshire. Voting shall be with the use of the check list by a ballot substantially in the following form:

"Shall the school district accept the provisions of the New Hampshire-Vermont Interstate School Compact providing for the establishment of an interstate school district, together with the school districts of ---- and ----, etc., in accordance with the provisions of the proposed articles of agreement filed with the school district (town, city or incorporated school district) clerk?

"Yes (☐) No (☐)"

"If the articles of agreement included the nomination of individual school directors, those nominated from each member district shall be included in the ballot and voted upon, such election to become effective upon the formation of an interstate school district.

"If a majority of the voters present and voting in a member district vote in the affirmative, the clerk for such member district shall forthwith send to the state board in its state a certified copy of the warrant, certificate of posting, and minutes of the meeting of the district. If the state boards of both states find that a majority of the voters present and voting in each member district have voted in favor of the establishment of the interstate school district, they shall issue a joint certificate to that effect; and such certificate shall be conclusive evidence of the lawful organization and formation of the interstate school district as of its date of issuance.

"H. RESUBMISSION.—If the proposed articles of agreement are adopted by one or more of the member districts but rejected by one or more of the member districts, the state boards may resubmit them, in the same form as previously submitted, to the rejecting member districts, in which case the school boards thereof shall resubmit them to the voters in accordance with paragraph G of this article. An affirmative vote in accordance therewith shall have the same effect as though the articles of agreement had been adopted in the first instance. In the alternative, the state boards may either (a) discharge the planning committee, or (b) refer the articles of agreement back for further consideration to the same or a reconstituted planning committee, which shall have all of the powers and duties as the planning committee as originally constituted.

"ARTICLE III

"POWERS OF INTERSTATE SCHOOL DISTRICTS

"A. POWERS.—Each interstate school district shall be a body corporate and politic, with power to:

"a. To acquire, construct, extend, improve, staff, operate, manage and govern public schools within its boundaries;

"b. To sue and be sued, subject to the limitations of liability hereinafter set forth;

"c. To have a seal and alter the same at pleasure;

"d. To adopt, maintain and amend bylaws not inconsistent with this compact, and the laws of the two states;

"e. To acquire by purchase, condemnation, lease or otherwise, real and personal property for the use of its schools;

"f. To enter into contracts and incur debts;

"g. To borrow money for the purposes hereinafter set forth, and to issue its bonds or notes therefor;

"h. To make contracts with and accept grants and aid from the United States, the state of New Hampshire, the state of Vermont, any agency or municipality thereof, and private corporations and individuals for the construction, maintenance, reconstruction, operation, and financing of its schools; and to do any and all things necessary in order to avail itself of such aid and co-operation;

"i. To employ such assistants, agents, servants, and independent contractors as it shall deem necessary or desirable for its purposes; and

"j. To take any other action which is necessary or appropriate in order to exercise any of the foregoing powers.

"ARTICLE IV

"DISTRICT MEETINGS

"A. GENERAL.—Votes of the district shall be taken at a duly warned meeting held at any place in the district, at which all of the eligible legal voters of the member districts shall be entitled to vote, except as otherwise provided with respect to the election of directors.

"B. ELIGIBILITY OF VOTERS.—Any resident who would be eligible to vote at a meeting of a member district being held at the same time, shall be eligible to vote at a meeting of the interstate district. The board of civil

authority in each Vermont member district and the supervisors of the check list of each New Hampshire district shall respectively prepare a check list of eligible voters for each meeting of the interstate district in the same manner, and they shall have all the same powers and duties with respect to eligibility of voters in their districts as for a meeting of a member district.

"C. WARNING OF MEETINGS.—A meeting shall be warned by a warrant addressed to the residents of the interstate school district qualified to vote in district affairs, stating the time and place of the meeting and the subject matter of the business to be acted upon. The warrant shall be signed by the clerk and by a majority of the directors. Upon written application of ten or more voters in the district, presented to the directors or to one of them, at least twenty-five days before the day prescribed for an annual meeting, the directors shall insert in their warrant for such meeting any subject matter specified in such application.

"D. POSTING AND PUBLICATION OF WARRANT.—The directors shall cause an attested copy of the warrant to be posted at the place of meeting, and a like copy at a public place in each member district at least twenty days (not counting the date of posting and the date of meeting) before the date of the meeting. In addition, the directors shall cause the warrant to be advertised in a newspaper of general circulation on at least one occasion, such publication to occur at least ten days (not counting the date of publication and not counting the date of the meeting) before the date of the meeting. Although no further notice shall be required the directors may give such further notice of the meeting as they in their discretion deem appropriate under the circumstances.

"E. RETURN OF WARRANT.—The warrant with a certificate thereon, verified by oath, stating the time and place when and where copies of the warrant were posted and published, shall be given to the clerk of the interstate school district at or before the time of the meeting, and shall be recorded by him in the records of the interstate school district.

"F. ORGANIZATION MEETING.—The commissioners, acting jointly, shall fix a time and place for a special meeting of the qualified voters within the interstate school district for the purpose of organization, and shall prepare and issue the warrant for the meeting after consultation with the interstate school district planning board and the members-elect, if any, of the interstate school board of directors. Such meeting shall be held within sixty days after the date of issuance of the certificate of formation, unless the time is further extended by the joint action of the state boards. At the organization meeting the commissioner of education of the state where the meeting is held, or his designate, shall preside in the first instance, and the following business shall be transacted:

"a. A temporary moderator and a temporary clerk shall be elected from among the qualified voters who shall serve until a moderator and clerk respectively have been elected and qualified.

"b. A moderator, a clerk, a treasurer, and three auditors shall be elected to serve until the next annual meeting and thereafter until their successors are elected and qualified. Unless previously elected, a board of school directors shall be elected to serve until their successors are elected and qualified.

"c. The date for the annual meeting shall be established.

"d. Provision shall be made for the payment of any organizational or other expense incurred on behalf of the district before the organization meeting, including the cost of architects, surveyors, contractors, attorneys, and educational or other consultants or experts.

"e. Any other business, the subject matter

of which has been included in the warrant, and which the voters would have had power to transact at an annual meeting.

"G. ANNUAL MEETINGS.—An annual meeting of the district shall be held between January fifteenth and June first of each year at such time as the interstate district may by vote determine. Once determined, the date of the annual meeting shall remain fixed until changed by vote of the interstate district at a subsequent annual or special meeting. At each annual meeting the following business shall be transacted:

"a. Necessary officers shall be elected.

"b. Money shall be appropriated for the support of the interstate district schools for the first year beginning the following July first.

"c. Such other business as may properly come before the meeting.

"H. SPECIAL MEETINGS.—A special meeting of the district shall be held whenever, in the opinion of the directors, there is occasion therefor, or whenever written application shall have been made by five per cent or more of the voters (based on the check lists as prepared for the last preceding meeting) setting forth the subject matter upon which such action is desired. A special meeting may appropriate money without compliance with RSA 33:8 or RSA 197:3 which would otherwise require the approval of the New Hampshire superior court.

"I. CERTIFICATION OF RECORDS.—The clerk of an interstate school district shall have the power to certify the record of the votes adopted at an interstate school district meeting to the respective commissioners and state boards and (where required) for filing with a secretary of state.

"J. METHOD OF VOTING AT SCHOOL DISTRICT MEETINGS.—Voting at meetings of interstate school districts shall take place as follows:

"a. SCHOOL DIRECTORS.—A separate ballot shall be prepared for each member district, listing the candidates for interstate school director to represent such member district; and any candidates for interstate school director at large; and the voters of each member district shall register on a separate ballot their choice for the office of school director or directors. In the alternative, the articles of agreement may provide for the election of school directors by one or more of the member districts at an election otherwise held for the choice of school or other municipal officers.

"b. OTHER VOTES.—Except as otherwise provided in the articles of agreement of this compact, with respect to all other votes (1) the voters of the interstate school district shall vote as one body irrespective of the member districts in which they are resident, and (2) a simple majority of those present and voting at any duly warned meeting shall carry the vote. Voting for officers to be elected at any meeting, other than school directors, shall be by ballot or voice, as the interstate district may determine, either in its articles of agreement or by a vote of the meeting.

"ARTICLE V

"OFFICERS

"A. OFFICERS: GENERAL.—The officers of an interstate school district shall be a board of school directors, a chairman of the board, a vice-chairman of the board, a secretary of the board, a moderator, a clerk, a treasurer and three auditors. Except as otherwise specifically provided, they shall be eligible to take office immediately following their election; they shall serve until the next annual meeting of the interstate district and until their successors are elected and qualified. Each shall take oath for the faithful performance of his duties before the moderator, or a notary public or a justice of the peace of the state in which the oath is administered. Their compensation shall be fixed by vote of the district. No person shall be eligible to any office unless he is a voter in the

district. A custodian, school teacher, principal, superintendent, or other employee of an interstate district acting as such shall not be eligible to hold office as a school director.

"B. BOARD OF DIRECTORS.—

"a. HOW CHOSEN.—Each member district shall be represented by at least one resident on the board of school directors of an interstate school district. A member district shall be entitled to such further representation on the interstate board of school directors as provided in the articles of agreement as amended from time to time. The articles of agreement as amended from time to time may provide for school directors at large, as above set forth. No person shall be disqualified to serve as a member of an interstate board because he is at the same time a member of the school board of a member district.

"b. TERM.—Interstate school directors shall be elected for terms in accordance with the articles of agreement.

"c. DUTIES OF BOARD OF DIRECTORS.—The board of school directors of an interstate school district shall have and exercise all of the powers of the district not reserved herein to the voters of the district.

"d. ORGANIZATION.—The clerk of the district shall warn a meeting of the board of school directors to be held within ten days following the date of the annual meeting, for the purpose of organizing the board, including the election of its officers.

"C. CHAIRMAN OF THE BOARD.—The chairman of the board of interstate school directors shall be elected by the interstate board from among its members at its first meeting following the annual meeting. The chairman shall preside at the meetings of the board and shall perform such other duties as the board may assign to him.

"D. VICE-CHAIRMAN OF THE BOARD OF DIRECTORS.—The vice-chairman of the interstate board shall be elected in the same manner as the chairman. He shall represent a member district in a state other than that represented by the chairman. He shall preside in the absence of the chairman and shall perform such other duties as may be assigned to him by the interstate board.

"E. SECRETARY OF THE BOARD.—The Secretary of the interstate board shall be elected in the same manner as the chairman. Instead of electing one of its members, the interstate board may appoint the interstate district clerk to serve as secretary of the board in addition to his other duties. The secretary of the interstate board (or the interstate district clerk, if so appointed) shall keep the minutes of its meetings, shall certify its records, and perform such other duties as may be assigned to him by the board.

"F. MODERATOR.—The moderator shall preside at the district meetings, regulate the business thereof, decide questions of order, and make a public declaration of every vote passed. He may prescribe rules of procedure; but such rules may be altered by the district. He may administer oaths to district officers in either state.

"G. CLERK.—The clerk shall keep a true record of all proceedings at each district meeting, shall certify its records, shall make an attested copy of any records of the district for any person upon request and tender of reasonable fees therefor, if so appointed, shall serve as secretary of the board of school directors, and shall perform such other duties as may be required by custom or law.

"H. TREASURER.—The treasurer shall have custody of all of the monies belonging to the district and shall pay out the same only upon the order of the interstate board. He shall keep a fair and accurate account of all sums received into and paid from the interstate district treasury, and at the close of each fiscal year he shall make a report to the interstate district, giving a particular account of all receipts and payments during the year. He shall furnish to the interstate directors, statements from his books and

submit his books and vouchers to them and to the district auditors for examination whenever so requested. He shall make all returns called for by laws relating to school districts. Before entering on his duties, the treasurer shall give a bond with sufficient sureties and in such sum as the directors may require. The treasurer's term of office is from July 1 to the following June 30.

"I. AUDITORS.—At the organization meeting of the district, three auditors shall be chosen, one to serve for a term of 1 year, one to serve for a term of 2 years, and one to serve for a term of 3 years. After the expiration of each original term, the successor shall be chosen for a 3-year term. At least one auditor shall be a resident of New Hampshire, and one auditor shall be a resident of Vermont. An interstate district may vote to employ a certified public accountant to assist the auditors in the performance of their duties. The auditors shall carefully examine the accounts of the treasurer and the directors at the close of each fiscal year, and at such other times whenever necessary, and report to the district whether the same are correctly cast and properly vouched.

"J. SUPERINTENDENT.—The superintendent of schools shall be selected by a majority vote of the board of school directors of the interstate district with the approval of both commissioners.

"K. VACANCIES.—Any vacancy among the elected officers of the district shall be filled by the interstate board until the next annual meeting of the district or other election, when a successor shall be elected to serve out the remainder of the unexpired term, if any. Until all vacancies on the interstate board are filled, the remaining members shall have full power to act.

"ARTICLE VI

"APPROPRIATION AND APPORTIONMENT OF FUNDS

"A. BUDGET.—Before each annual meeting, the interstate board shall prepare a report of expenditures for the preceding fiscal year, an estimate of expenditures for the current fiscal year, and a budget for the succeeding fiscal year.

"B. APPROPRIATION.—The interstate board of directors shall present the budget report of the annual meeting. The interstate district shall appropriate a sum of money for the support of its schools and for the discharge of its obligations for the ensuing fiscal year.

"C. APPORTIONMENT OF APPROPRIATION.—Subject to the provisions of article VII hereof, the interstate board shall first apply against such appropriation any income to which the interstate district is entitled, and shall then apportion the balance among the member districts in accordance with one of the following formulas as determined by the articles of agreement as amended from time to time:

"a. All of such balance to be apportioned on the basis of the ratio that the fair market value of the taxable property in each member district bears to that of the entire interstate district; or

"b. All of such balance to be apportioned on the basis that the average daily resident membership for the preceding fiscal year of each member district bears to that of the average daily resident membership of the entire interstate school district; or

"c. A formula based on any combination of the foregoing factors. The term 'fair market value of taxable property' shall mean the last locally assessed valuation of a member district in New Hampshire, as last equalized by the New Hampshire state tax commission.

"The term 'fair market value of taxable property' shall mean the equalized grand list of a Vermont member district, as determined by the Vermont department of taxes.

"Such assessed valuation and grand list may be further adjusted (by elimination of certain types of taxable property from one or the other or otherwise) in accordance with

the articles of agreement, in order that the fair market value of taxable property in each state shall be comparable.

"Average daily resident membership' of the interstate district in the first instance shall be the sum of the average daily resident membership of the member districts in the grades involved for the preceding fiscal year where no students were enrolled in the interstate district schools for such preceding fiscal year.

"D. SHARE OF NEW HAMPSHIRE MEMBER DISTRICT.—The interstate board shall certify the share of a New Hampshire member district of the total appropriation to the school board of each member district which shall add such sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district. The interstate district shall not set up its own capital reserve funds; but a New Hampshire member district may set up a capital reserve fund in accordance with RSA 35, to be turned over to the interstate district in payment of the New Hampshire member district's share of any anticipated obligations.

"E. SHARE OF VERMONT MEMBER DISTRICT.—The interstate board shall certify the share of a Vermont member district of the total appropriation to the school board of each member district which shall add sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district.

"ARTICLE VIII

"BORROWING

"A. INTERSTATE DISTRICT INDEBTEDNESS.—Indebtedness of an interstate district shall be a general obligation of the district and shall also be a joint and several general obligation of each member district, except that such obligations of the district and its member districts shall not be deemed indebtedness of any member district for the purposes of determining its borrowing capacity under New Hampshire or Vermont law. A member district which withdraws from an interstate district shall remain liable for indebtedness of the interstate district which is outstanding at the time of withdrawal and shall be responsible for paying its share of such indebtedness to the same extent as though it had not been withdrawn.

"B. TEMPORARY BORROWING.—The interstate board may authorize the borrowing of money by the interstate district (1) in anticipation of payments of operating and capital expenses by the member districts to the interstate districts and (2) in anticipation of the issue of bonds or notes of the interstate district which have been authorized for the purpose of financing capital projects. Such temporary borrowing shall be evidenced by interest bearing or discounted notes of the interstate district. The amount of notes issued in any fiscal year in anticipation of expense payments shall not exceed the amount of such payments received by the interstate district in the preceding fiscal year. Notes issued under this paragraph shall be payable within one year in the case of notes under clause (1) and three years in the case of notes under clause (2) from their respective dates, but the principal of and interest on notes issued for a shorter period may be renewed or paid from time to time by the issue of other notes, provided that the period from the date of an original note to the maturity of any note issued to renew or pay the same debt shall not exceed the maximum period permitted for the original loan.

"C. BORROWING FOR CAPITAL PROJECTS.—An interstate district may incur debt and issue its bonds or notes to finance capital proj-

ects. Such projects may consist of the acquisition or improvement of land and buildings for school purposes, the construction, reconstruction, alteration, or enlargement of school buildings and related school facilities, the acquisition of equipment of a lasting character and the payment of judgments. No interstate district may authorize indebtedness in excess of ten percent of the total fair market value of taxable property in its member districts as defined in article VI of this compact. The primary obligation of the interstate district of pay indebtedness of member districts shall not be considered indebtedness of the interstate district for the purpose of determining its borrowing capacity under this paragraph. Bonds or notes issued under this paragraph shall mature in equal or diminishing installments of principal payable at least annually commencing no later than two years and ending not later than thirty years after their dates.

"D. AUTHORIZATION PROCEEDINGS.—An interstate district shall authorize the incurring of debts to finance capital projects by a majority vote of the district passed at an annual or special district meeting. Such vote shall be taken by secret ballot after full opportunity for debate, and any such vote shall be subject to reconsideration and further action by the district at the same meeting or at an adjourned session thereof.

"E. SALE OF BONDS AND NOTES.—Bonds and notes which have been authorized under this article may be issued from time to time and shall be sold at not less than par and accrued interest at public or private sale by the chairman of the school board and by the treasurer. Interstate district bonds and notes shall be signed by the said officers, except that either one of the two required signatures may be a facsimile. Subject to this compact and the authorizing vote, they shall be in such form, bear such rates of interest and mature at such times as the said officers may determine. Bonds shall, but notes need not, bear the seal of the interstate district, or a facsimile of such seal. Any bonds or notes of the interstate district which are properly executed by the said officers shall be valid and binding according to their terms notwithstanding that before the delivery thereof such officers may have ceased to be officers of the interstate district.

"F. PROCEEDS OF BONDS.—Any accrued interest received upon delivery of bonds or notes of an interstate district shall be applied to the payment of the first interest which becomes due thereon. The other proceeds of the sale of such bonds or notes, other than temporary notes, including any premiums, may be temporarily invested by the interstate district pending their expenditure; and such proceeds, including any income derived from the temporary investment of such proceeds, shall be used to pay the costs of issuing and marketing the bonds or notes and to meet the operating expenses or capital expenses in accordance with the purposes for which the bonds or notes were issued or, by proceedings taken in the manner required for the authorization of such debt, for other purposes for which such debt could be incurred. No purchaser of any bonds or notes of an interstate district shall be responsible in any way to see to the application of the proceeds thereof.

"G. STATE AID PROGRAMS.—As used in this paragraph the term 'initial aid' shall include New Hampshire and Vermont financial assistance with respect to a capital project, or the means of financing a capital project, which is available in connection with construction costs of a capital project or which is available at the time indebtedness is incurred to finance the project. Without limiting the generality of the foregoing definition, initial aid shall specifically include a New Hampshire state guarantee under RSA 195-B with respect to bonds or notes and Vermont construction aid under chapter 123 of 16 V.S.A. As used in this paragraph the

term 'long-term aid' shall include New Hampshire and Vermont financial assistance which is payable periodically in relation to capital costs incurred by an interstate district. Without limiting the generality of the foregoing definition, long-term aid shall specifically include New Hampshire school building aid under RSA 198 and Vermont school building aid under chapter 123 of Title 16 V.S.A. For the purpose of applying for, receiving and expending initial aid and long-term aid an interstate district shall be deemed a native school district by each state, subject to the following provisions. When an interstate district has appropriated money for a capital project, the amount appropriated shall be divided into a New Hampshire share and a Vermont share in accordance with the capital expense apportionment formula in the articles of agreement as though the total amount appropriated for the project was a capital expense requiring apportionment in the year the appropriation is made. New Hampshire initial aid shall be available with respect to the amount of the New Hampshire share as though it were authorized indebtedness of a New Hampshire cooperative school district. In the case of a state guarantee of interstate districts bonds or notes under RSA 195-B, the interstate district shall be eligible to apply for and receive an unconditional state guarantee with respect to an amount of its bonds or notes which does not exceed fifty per cent of the amount of the New Hampshire share as determined above. Vermont initial aid shall be available with respect to the amount of the Vermont share as though it were funds voted by a Vermont school district. Payments of Vermont initial aid shall be made to the interstate district, and the amount of any borrowing authorized to meet the appropriation for the capital project shall be reduced accordingly. New Hampshire and Vermont long-term aid shall be payable to the interstate district. The amounts of long-term aid in each year shall be based on the New Hampshire and Vermont shares of the amount of indebtedness of the interstate district which is payable in that year and which has been apportioned in accordance with the capital expense apportionment formula in the articles of agreement. The New Hampshire aid shall be payable at the rate of forty-five percent, if there are three or less New Hampshire members in the interstate district, and otherwise it shall be payable as though the New Hampshire members were a New Hampshire cooperative school district. New Hampshire and Vermont long-term aid shall be deducted from the total capital expenses for the fiscal year in which the long-term aid is payable, and the balance of such expenses shall be apportioned among the member districts. Notwithstanding the foregoing provisions, New Hampshire and Vermont may at any time change their state school aid programs that are in existence when this compact takes effect and may establish new programs, and any legislation for these purposes may specify how such programs shall be applied with respect to interstate districts.

"H. TAX EXEMPTION.—Bonds and notes of an interstate school district shall be exempt from local property taxes in both states, and the interest or discount thereon and any profit derived from the disposition thereof shall be exempt from personal income taxes in both states.

"ARTICLE VIII

"TAKING OVER OF EXISTING PROPERTY

"A. POWER TO ACQUIRE PROPERTY OF MEMBER DISTRICT.—The articles of agreement, or an amendment thereof, may provide for the acquisition by an interstate district from a member district of all or a part of its existing plant and equipment.

"B. VALUATION.—The articles of agreement, or the amendment, shall provide for the determination of the value of the property to

be acquired in one or more of the following ways:

"a. A valuation set forth in the articles of agreement or the amendment.

"b. By appraisal, in which case, one appraiser shall be appointed by each commissioner, and a third appraiser appointed by the first two appraisers.

"C. REIMBURSEMENT TO MEMBER DISTRICT.—The articles of agreement shall specify the method by which the member district shall be reimbursed by the interstate district for the property taken over, in one or more of the following ways:

"a. By one lump sum, appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"b. In installments over a period of not more than twenty years, each of which is appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"c. By an agreement to assume or reimburse the member district for all principal and interest on any outstanding indebtedness originally incurred by the member district to finance the acquisition and improvement of the property, each such installment to be appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"The member district transferring the property shall have the same obligation to pay to the interstate district its share of the cost of such acquisition, but may offset its right to reimbursement.

"ARTICLE IX

"AMENDMENTS TO ARTICLES OF AGREEMENT

"A. Amendments to the articles of agreement may be adopted in the same manner provided for the adoption of the original articles of agreement, except that:

"a. Unless the amendment calls for the addition of a new member district, the functions of the planning committee shall be carried out by the interstate district board of directors.

"b. If the enactment proposes the addition of a new member district, the planning committee shall consist of all of the members of the interstate board and all of the members of the school board of the proposed new member district or districts. In such case the amount shall be submitted to the voters at an interstate district meeting, at which an affirmative vote of two-thirds of those present and voting shall be required. The articles of agreement together with the proposed amendment shall be submitted to the voters of the proposed new member district at a meeting thereof, at which a simple majority of those present and voting shall be required.

"c. In all cases an amendment may be adopted on the part of an interstate district upon the affirmative vote of voters thereof at a meeting voting as one body. Except where the amendment proposes the admission of a new member district, a simple majority of those present and voting shall be required for adoption.

"d. No amendment to the articles of agreement may impair the rights of bond or note holders or the power of the interstate district to procure the means for their payment.

"ARTICLE X

"APPLICABILITY OF NEW HAMPSHIRE LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in New Hampshire, the provisions of New Hampshire law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. NEW HAMPSHIRE STATE AID.—A New Hampshire school district shall be entitled to receive an amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the New Hampshire member district, and as though the New Hampshire member district pupils attending the interstate school were attending a New Hampshire cooperative school district's school. The state aid shall be paid to the New Hampshire member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF THE NEW HAMPSHIRE MEMBER SCHOOL DISTRICT.—A New Hampshire member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not herein delegated to the district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The New Hampshire member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor, unless the indebtedness is specifically assumed in accordance with the articles of agreement. Any trust funds or capital reserve funds and any property not taken over by the interstate district shall be retained by the New Hampshire member district and held or disposed of according to law. If all of the schools in a member district are incorporated into an interstate district, then no annual meeting of the member district shall be required unless the members of the interstate board from the member district shall determine that there is occasion for such an annual meeting.

"D. SUIT AND SERVICE OF PROCESS IN NEW HAMPSHIRE.—The courts of New Hampshire shall have the same jurisdiction over the district as though a New Hampshire member district were a party instead of the interstate district. The service necessary to institute suit in New Hampshire shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who reside in New Hampshire, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in New Hampshire shall be considered an employee of a New Hampshire school district for the purpose of the New Hampshire teachers' retirement system, the New Hampshire state employees' retirement system, the New Hampshire workmen's compensation law and any other law relating to the regulation of employment or the provision of benefits for employees of New Hampshire school districts except as follows:

"1. A teacher in a New Hampshire member district may elect to remain a member of the New Hampshire teachers' retirement system, even though assigned to teach in an interstate school in Vermont.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of New

Hampshire or the state of Vermont but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedure of the retirement systems; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XI

"APPLICABILITY OF VERMONT LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in Vermont, the provisions of Vermont law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. VERMONT STATE AID.—A Vermont school district shall be entitled to receive such amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the Vermont member district, and as though the Vermont member district pupils attending the interstate schools were attending a Vermont union school district's schools. Such state aid shall be paid to the Vermont member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF VERMONT MEMBER SCHOOL DISTRICT.—A Vermont member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The Vermont member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor. Any trust funds and any property not taken over shall be retained by the Vermont member school district and held or disposed of according to law.

"D. SUIT AND SERVICE OF PROCESS IN VERMONT.—The courts of Vermont shall have the same jurisdiction over the districts as though a Vermont member district were a party instead of the interstate district. The service necessary to institute suit in Vermont shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who resides in Vermont, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in Vermont shall be considered an em-

ployee of a Vermont school district for the purpose of the state teachers' retirement system of Vermont, the state employees' retirement system, the Vermont workmen's compensation law, and any other law relating to the regulation of employment or the provision of benefits for employees of Vermont school districts except as follows:

"1. A teacher in a Vermont member district may elect to remain a member of the state teachers' retirement system of Vermont, even though assigned to teach in an interstate school in New Hampshire.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of Vermont or the state of New Hampshire but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedures of the retirement system; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XII

"ADOPTION OF COMPACT BY DRESDEN SCHOOL DISTRICT

"The Dresden School District, otherwise known as the Hanover-Norwich Interstate School District, authorized by New Hampshire laws of 1961, chapter 116, and by the laws of Vermont, is hereby authorized to adopt the provisions of this compact and to become an interstate school district within the meaning hereof, upon the following conditions and subject to the following limitations:

"a. Articles of agreement shall be prepared and signed by a majority of the directors of the interstate school district.

"b. The articles of agreement shall be submitted to an annual or special meeting of the Dresden district for adoption.

"c. An affirmative vote of two-thirds of those present and voting shall be required for adoption.

"d. Nothing contained therein, or in this compact, as it affects the Dresden School District shall affect adversely the rights of the holders of any bonds or other evidences of indebtedness then outstanding, or the rights of the district to procure the means for payment thereof previously authorized.

"e. The corporate existence of the Dresden School District shall not be terminated by such adoption of articles of amendment, but shall be deemed to be so amended that it shall thereafter be governed by the terms of this compact.

"ARTICLE XIII

"MISCELLANEOUS PROVISIONS

"A. STUDIES.—Insofar as practicable, the studies required by the laws of both states shall be offered in an interstate school district.

"B. TEXTBOOKS.—Textbooks and scholar's supplies shall be provided at the expense of the interstate district for pupils attending its schools.

"C. TRANSPORTATION.—The allocation of the cost of transportation in an interstate school district, as between the interstate district and the member districts, shall be determined by the articles of agreement.

"D. LOCATION OF SCHOOLS.—In any case where a new schoolhouse or other school facility is to be constructed or acquired, the interstate board shall first determine

whether it shall be located in New Hampshire or in Vermont. If it is to be located in New Hampshire, RSA 199, relating to schoolhouses, shall apply. If it is to be located in Vermont, the Vermont law relating to schoolhouses shall apply.

"E. FISCAL YEAR.—The fiscal year of each interstate district shall begin on July first of each year and end on June thirtieth of the following year.

"F. IMMUNITY FROM TORT LIABILITY.—Notwithstanding the fact that an interstate district may derive income from operating profit, fees, rentals, and other services, it shall be immune from suit and from liability for injury to persons or property and for other torts caused by it or its agents, servants or independent contractors, except insofar as it may have undertaken such liability under RSA 281:7 relating to workmen's compensation, or RSA 412:3 relating to the procurement of liability insurance by a governmental agency and except insofar as it may have undertaken such liability under 21 V.S.A. Section 621 relating to workmen's compensation or 29 V.S.A. Section 1403 relating to the procurement of liability insurance by a governmental agency.

"G. ADMINISTRATIVE AGREEMENT BETWEEN COMMISSIONERS OF EDUCATION.—The commissioners of education of New Hampshire and Vermont may enter into one or more administrative agreements prescribing the relationship between the interstate districts, member districts, and each of the two state departments of education, in which any conflicts between the two states in procedure, regulations, and administrative practices may be resolved.

"H. AMENDMENT.—Neither state shall amend its legislation or any agreement authorized thereby without the consent of the other in such manner as to substantially adversely affect the rights of the other state or its people hereunder, or as to substantially impair the rights of the holders of any bonds or notes or other evidences of indebtedness then outstanding or the rights of an interstate school district to procure the means for payment thereof. Subject to the foregoing, any reference herein to other statutes of either state shall refer to such statute as it may be amended or revised from time to time.

"I. SEPARABILITY.—If any of the provisions of this compact, or legislation enabling the same, shall be held invalid or unconstitutional in relation to any of the applications thereof, such invalidity or unconstitutionality shall not affect other applications thereof or other provisions thereof; and to this end the provisions of this compact are declared to be severable.

"J. INCONSISTENCY OF LANGUAGE.—The validity of this compact shall not be affected by any insubstantial differences in its form or language as adopted by the two states.

"ARTICLE XIV

"EFFECTIVE DATE

"This compact shall become effective when agreed to by the States of New Hampshire and Vermont and approved by the United States Congress."

Sec. 2. The right to alter, amend, or repeal this Act is expressly reserved.

Passed the Senate May 5, 1969.

Attest:

Secretary.

AMENDMENT OFFERED BY MR. KASTENMEIER

Mr. KASTENMEIER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KASTENMEIER: Strike out all after the enacting clause of S. 278 and insert in lieu thereof the provisions of H.R. 751, as passed, as follows:

"That the Congress consents to the New Hampshire-Vermont Interstate School Compact which is substantially as follows:

"NEW HAMPSHIRE-VERMONT INTER-STATE SCHOOL COMPACT"

"ARTICLE I"

"GENERAL PROVISIONS"

"A. STATEMENT OF POLICY.—It is the purpose of this compact to increase the educational opportunities within the states of New Hampshire and Vermont by encouraging the formation of interstate school districts which will each be a natural social and economic region with adequate financial resources and a number of pupils sufficient to permit the efficient use of school facilities within the interstate district and to provide improved instruction. The state boards of education of New Hampshire and Vermont may formulate and adopt additional standards consistent with this purpose and with these standards; and the formation of any interstate school district and the adoption of its articles of agreement shall be subject to the approval of both state boards as hereinafter set forth.

"B. REQUIREMENT OF CONGRESSIONAL APPROVAL.—This compact shall not become effective until approved by the United States Congress.

"DEFINITIONS.—The terms used in this compact shall be construed as follows, unless a different meaning is clearly apparent from the language or context:

"a. "Interstate school district" and "interstate district" shall mean a school district composed of one or more school districts located in the state of New Hampshire associated under this compact with one or more school districts located in the state of Vermont, and may include either the elementary schools, the secondary schools, or both.

"b. "Member school district" and "member district" shall mean a school district located either in New Hampshire or Vermont which is included within the boundaries of a proposed or established interstate school district. In the case of districts located in Vermont, it shall include city school districts, town school districts, union school districts and incorporated school districts. Where appropriate, the term "member district clerk" shall refer to the clerk of the city in which a Vermont school district is located, the clerk of the town in which a Vermont town school district is located, or the clerk of an incorporated school district.

"c. "Elementary school" shall mean a school which includes all grades from kindergarten or grade one through not less than grade six nor more than grade eight.

"d. "Secondary school" shall mean a school which includes all grades beginning no lower than grade seven and no higher than grade twelve.

"e. "Interstate board" shall refer to the board serving an interstate school district.

"f. "New Hampshire board" shall refer to the New Hampshire state board of education.

"g. "Vermont board" shall refer to the Vermont state board of education.

"h. "Commissioner" shall refer to commissioner of education.

"i. Where joint action by both state boards is required, each state board shall deliberate and vote by its own majority, but shall separately reach the same result or take the same action as the other state board.

"j. The terms "professional staff personnel" and "instructional staff personnel" shall include superintendents, assistant superintendents, administrative assistants, principals, guidance counselors, special education personnel, school nurses, therapists, teachers, and other certified personnel.

"k. The term "warrant" or "warning" to mean the same for both states.

"ARTICLE II"

"PROCEDURE FOR FORMATION OF AN INTERSTATE SCHOOL DISTRICT"

"A. CREATION OF PLANNING COMMITTEE.—The New Hampshire and Vermont commissioners of education shall have the power,

acting jointly to constitute and discharge one or more interstate school district planning committees. Each such planning committee shall consist of at least two voters from each of a group of two or more neighboring member districts. One of the representatives from each member district shall be a member of its school board, whose term on the planning committee shall be concurrent with his term as a school board member. The term of each member of a planning committee who is not also a school board member shall expire on June thirtieth of the third year following his appointment. The existence of any planning committee may be terminated either by vote of a majority of its members or by joint action of the commissioners. In forming and appointing members to an interstate school district planning board, the commissioners shall consider and take into account recommendations and nominations made by school boards of member districts. No member of a planning committee shall be disqualified because he is at the same time a member of another planning board or committee created under the provisions of this compact or under any other provisions of law. Any existing informal interstate school planning committee may be reconstituted as a formal planning committee in accordance with the provisions hereof, and its previous deliberations adopted and ratified by the reorganized formal planning committee. Vacancies on a planning committee shall be filled by the commissioners acting jointly.

"B. OPERATING PROCEDURES OF PLANNING COMMITTEE.—Each interstate school district planning committee shall meet in the first instance at the call of any member, and shall organize by the election of a chairman and clerk-treasurer, each of whom shall be a resident of a different state. Subsequent meetings may be called by either officer of the committee. The members of the committee shall serve without pay. The member districts shall appropriate money on an equal basis at each annual meeting to meet the expenses of the committee, including the cost of publication and distribution of reports and advertising. From time to time the commissioners may add additional members and additional member districts to the committee, and may remove members and member districts from the committee. An interstate school district planning committee shall act by majority vote of its membership present and voting.

"C. DUTIES OF INTERSTATE SCHOOL DISTRICT PLANNING COMMITTEE.—It shall be the duty of an interstate school district planning committee, in consultation with the commissioners and the state departments of education: to study the advisability of establishing an interstate school district in accordance with the standards set forth in paragraph A of Article I of this compact, its organization, operation and control, and the advisability of constructing, maintaining and operating a school or schools to serve the needs of such interstate district; to estimate the construction and operating costs thereof; to investigate the methods of financing such school or schools, and any other matters pertaining to the organization and operation of an interstate school district; and to submit a report or reports of its findings and recommendations to the several member districts.

"D. RECOMMENDATIONS AND PREPARATION OF ARTICLES OF AGREEMENT.—An interstate school district planning committee may recommend that an interstate school district composed of all the member districts represented by its membership, or any specified combination of such member districts, be established. If the planning committee does recommend the establishment of an interstate school district, it shall include in its report such recommendation, and shall also prepare and include in its report proposed articles of agreement for the proposed interstate school district, which shall be signed by at least a majority of the member-

ship of the planning committee, which set forth the following:

"a. The name of the interstate school district.

"b. The member districts which shall be combined to form the proposed interstate school district.

"c. The number, composition, method of selection and terms of office of the interstate school board, provided that:

"(1) The interstate school board shall consist of an odd number of members, not less than five nor more than fifteen;

"(2) The terms of office shall not exceed three years;

"(3) Each member district shall be entitled to elect at least one member of the interstate school board. Each member district shall either vote separately at the interstate school district meeting by the use of a distinctive ballot, or shall choose its member or members at any other election at which school officials may be chosen;

"(4) The method of election shall provide for the filing of candidacies in advance of election and for the use of a printed non-partisan ballot;

"(5) Subject to the foregoing, provision may be made for the election of one or more members at large.

"d. The grades for which the interstate school district shall be responsible.

"e. The specific properties of members districts to be acquired initially by the interstate school district and the general location of any proposed new schools to be initially established or constructed by the interstate school district.

"f. The method of apportioning the operating expenses of the interstate school district among the several member districts, and the time and manner of payments of such shares.

"g. The indebtedness of any member district which the interstate district is to assume.

"h. The method of apportioning the capital expenses of the interstate school district among the several member districts, which need not be the same as the method of apportioning operating expenses, and the time and manner of payment of such shares. Capital expenses shall include the cost of acquiring land and buildings for school purposes; the construction, furnishing and equipping of school buildings and facilities; and the payment of the principal and interest of any indebtedness which is incurred to pay for the same.

"i. The manner in which state aid, available under the laws of either New Hampshire or Vermont, shall be allocated, unless otherwise expressly provided in this compact or by the laws making such aid available.

"j. The method by which the articles of agreement may be amended, which amendments may include the annexation of territory, or an increase or decrease in the number of grades for which the interstate district shall be responsible, provided that no amendment shall be effective until approved by both state boards in the same manner as required for approval of the original articles of agreement.

"k. The date of operating responsibility of the proposed interstate school district and a proposed program for the assumption of operating responsibility for education by the proposed interstate school district, and any school construction; which the interstate school district shall have the power to vary by vote as circumstances may require.

"l. Any other matters, not incompatible with law, which the interstate school district planning committee may consider appropriate to include in the articles of agreement, including, without limitation:

"(1) The method of allocating the cost of transportation between the interstate district and member districts;

"(2) The nomination of individual school

directors to serve until the first annual meeting of the interstate school district.

"**E. HEARINGS.**—If the planning committee recommends the formation of an interstate school district, it shall hold at least one public hearing on its report and the proposed articles of agreement within the proposed interstate school district in New Hampshire, and at least one public hearing thereon within the proposed interstate school district in Vermont. The planning committee shall give such notice thereof as it may determine to be reasonable, provided that such notice shall include at least one publication in a newspaper of general circulation within the proposed interstate school district not less than fifteen days (not counting the date of publication and not counting the date of the hearing) before the date of the first hearing. Such hearings may be adjourned from time to time and from place to place. The planning committee may revise the proposed articles of agreement after the date of the hearings. It shall not be required to hold further hearings on the revised articles of agreement but may hold one or more further hearings after notice similar to that required for the first hearings if the planning committee in its sole discretion determines that the revisions are so substantial in nature as to require further presentation to the public before submission to the state boards of education.

"**F. APPROVAL BY STATE BOARDS.**—After the hearings a copy of the proposed articles of agreement, as revised, signed by a majority of the planning committee, shall be submitted by it to each state board. The state boards may (a) if they find that the articles of agreement are in accord with the standards set forth in this compact and in accordance with sound educational policy, approve the same as submitted, or (b) refer them back to the planning committee for further study. The planning committee may make additional revisions to the proposed articles of agreement to conform to the recommendations of the state boards. Further hearings on the proposed articles of agreement shall not be required unless ordered by the state boards in their discretion. In exercising such discretion, the state boards shall take into account whether or not the additional revisions are so substantial in nature as to require further presentation to the public. If both state boards find that the articles of agreement as further revised are in accord with the standards set forth in this compact and in accordance with sound educational policy, they shall approve the same. After approval by both state boards, each state board shall cause the articles of agreement to be submitted to the school boards of the several member districts in each state for acceptance by the member districts as provided in the following paragraph. At the same time, each state board shall designate the form of warrant, date, time, place, and period of voting for the special meeting of the member district to be held in accordance with the following paragraph.

"**G. ADOPTION BY MEMBER DISTRICTS.**—Upon receipt of written notice from the state board in its state of the approval of the articles of agreement by both state boards, the school board of each member district shall cause the articles of agreement to be filed with the member district clerk. Within ten days after receipt of such notice, the school board shall issue its warrant for a special meeting of the member district, the warrant to be in the form, and the meeting to be held at the time and place and in the manner prescribed by the state board. No approval of the superior court shall be required for such special school district meeting in New Hampshire. Voting shall be with the use of the check list by a ballot substantially in the following form:

" "Shall the school district accept the provisions of the New Hampshire-Vermont In-

terstate School Compact providing for the establishment of an interstate school district, together with the school districts of _____ and _____ etc., in accordance with the provisions of the proposed articles of agreement filed with the school district (town, city or incorporated school (district) clerk?

" "Yes () No ()"

"If the articles of agreement included the nomination of individual school directors, those nominated from each member shall be included in the ballot and voted upon, such election to become effective upon the formation of an interstate school district.

"If a majority of the voters present and voting in a member district vote in the affirmative, the clerk for such member district shall forthwith send to the state board in its state a certified copy of the warrant, certificate of posting, and minutes of the meeting of the district. If the state boards of both states find that a majority of the voters present and voting in each member district have voted in favor of the establishment of the interstate school district, they shall issue a joint certificate to that effect; and such certificate shall be conclusive evidence of the lawful organization and formation of the interstate school district as of its date of issuance.

"**H. RESUBMISSION.**—If the proposed articles of agreement are adopted by one or more of the member districts but rejected by one or more of the member districts, the state boards may resubmit them, in the same form as previously submitted, to the rejecting member districts, in which case the school boards thereof shall resubmit them to the voters in accordance with paragraph G of this article. An affirmative vote in accordance therewith shall have the same effect as though the articles of agreement had been adopted in the first instance. In the alternative, the state boards may either (a) discharge the planning committee, or (b) refer the articles of agreement back for further consideration to the same or a reconstituted planning committee, which shall have all the powers and duties as the planning committee as originally constituted.

"ARTICLE III

"POWERS OF INTERSTATE SCHOOL DISTRICTS

"**POWERS.**—Each interstate school district shall be a body corporate and politic, with power to:

- "a. To acquire, construct, extend, improve, staff, operate, manage and govern public schools within its boundaries;
- "b. To sue and be sued, subject to the limitations of liability hereinafter set forth;
- "c. To have a seal and alter the same at pleasure;
- "d. To adopt, maintain and amend bylaws not inconsistent with this compact, and the laws of the two states;
- "e. To acquire by purchase, condemnation, lease or otherwise, real and personal property for the use of its schools;
- "f. To enter into contracts and incur debts;
- "g. To borrow money for the purposes hereinafter set forth, and to issue its bonds or notes therefor;
- "h. To make contracts with and accept grants and aid from the United States, the state of New Hampshire, the state of Vermont, any agency or municipality thereof, and private corporations and individuals for the construction, maintenance, reconstruction, operation and financing of its schools; and to do any and all things necessary in order to avail itself of such aid and cooperation;
- "i. To employ such assistants, agents, servants, and independent contractors as it shall deem necessary or desirable for its purposes; and
- "j. To take any other action which is necessary or appropriate in order to exercise any of the foregoing powers.

"ARTICLE IV

"DISTRICT MEETINGS

"**A. GENERAL.**—Votes of the district shall be taken at a duly warned meeting held at any place in the district, at which all of the eligible voters of the member districts shall be entitled to vote, except as otherwise provided with respect to the election of directors.

"**B. ELIGIBILITY OF VOTERS.**—Any resident who would be eligible to vote at a meeting of a member district being held at the same time, shall be eligible to vote at a meeting of the interstate district. The board of civil authority in each Vermont member district and the supervisors of the checklist of each New Hampshire district shall respectively prepare a checklist of eligible voters for each meeting of the interstate district in the same manner, and they shall have all the same powers and duties with respect to eligibility of voters in their districts as for a meeting of a member district.

"**C. WARNING OF MEETINGS.**—A meeting shall be warned by a warrant addressed to the residents of the interstate school district qualified to vote in district affairs, stating the time and place of the meeting and the subject matter of the business to be acted upon. The warrant shall be signed by the clerk and by a majority of the directors. Upon written application of ten or more voters in the district, presented to the directors or to one of them, at least twenty-five days before the day prescribed for an annual meeting, the directors shall insert in their warrant for such meeting any subject matter specified in such application.

"**D. POSTING AND PUBLICATION OF WARRANT.**—The directors shall cause an attested copy of the warrant to be posted at the place of meeting, and a like copy at a public place in each member district at least twenty days (not counting the date of posting and the date of meeting) before the date of the meeting. In addition, the directors shall cause the warrant to be advertised in a newspaper of general circulation on at least one occasion, such publication to occur at least ten days (not counting the date of publication and not counting the date of the meeting) before the date of the meeting. Although no further notice shall be required, the directors may give such further notice of the meeting as they in their discretion deem appropriate under the circumstances.

"**E. RETURN OF WARRANT.**—The warrant with a certificate thereon, verified by oath, stating the time and place when and where copies of the warrant were posted and published, shall be given to the clerk of the interstate school district at or before the time of the meeting, and shall be recorded by him in the records of the interstate school district.

"**F. ORGANIZATION MEETING.**—The commissioners, acting jointly, shall fix a time and place for a special meeting of the qualified voters within the interstate school district for the purpose of organization, and shall prepare and issue the warrant for the meeting after consultation with the interstate school district planning board and the members-elect, if any, of the interstate school board of directors. Such meeting shall be held within sixty days after the date of issuance of the certificate of formation, unless the time is further extended by the joint action of the state boards. At the organization meeting the commissioner of education of the state where the meeting is held, or his designate, shall preside in the first instance, and the following business shall be transacted:

"a. A temporary moderator and a temporary clerk shall be elected from among the qualified voters who shall serve until a moderator and clerk respectively have been elected and qualified.

"b. A moderator, a clerk, a treasurer, and three auditors shall be elected to serve until the next annual meeting and thereafter until their successors are elected and qualified.

Unless previously elected, a board of school directors shall be elected to serve until their successors are elected and qualified.

"c. The date for the annual meeting shall be established.

"d. Provision shall be made for the payment of any organizational or other expense incurred on behalf of the district before the organization meeting, including the cost of architects, surveyors, contractors, attorneys, and educational or other consultants or experts.

"e. Any other business, the subject matter of which has been included in the warrant, and which the voters would have had power to transact at an annual meeting.

"G. ANNUAL MEETINGS.—An annual meeting of the district shall be held between January fifteenth and June first of each year at such time as the interstate district may by vote determine. Once determined, the date of the annual meeting shall remain fixed until changed by vote of the interstate district at a subsequent annual or special meeting. At each annual meeting the following business shall be transacted:

"a. Necessary officers shall be elected.

"b. Money shall be appropriated for the support of the interstate district schools for the fiscal year beginning the following July first.

"c. Such other business as may properly come before the meeting.

"H. SPECIAL MEETINGS.—A special meeting of the district shall be held whenever, in the opinion of the directors, there is occasion therefor, or whenever written application shall have been made by five per cent or more of the voters (based on the check lists as prepared for the last preceding meeting) setting forth the subject matter upon which such action is desired. A special meeting may appropriate money without compliance with RSA 33:8 or RSA 197:3 which would otherwise require the approval of the New Hampshire superior court.

"I. CERTIFICATION OF RECORDS.—The clerk of an interstate school district shall have the power to certify the record of the votes adopted at an interstate school district meeting to the respective commissioners and state boards and (where required) for filing with a secretary of state.

"J. METHOD OF VOTING AT SCHOOL DISTRICT MEETINGS.—Voting at meetings of interstate school districts shall take place as follows:

"a. SCHOOL DIRECTORS.—A separate ballot shall be prepared for each member district, listing the candidates for interstate school director to represent such member district; and any candidates for interstate school director at large; and the voters of each member district shall register on a separate ballot their choice for the office of school director or directors. In the alternative, the articles of agreement may provide for the election of school directors by one or more of the member districts at an election otherwise held for the choice of school or other municipal officers.

"b. OTHER VOTES.—Except as otherwise provided in the articles of agreement or this compact, with respect to all other votes (1) the voters of the interstate school district shall vote as one body irrespective of the member districts in which they are resident, and (2) a simple majority of those present and voting at any duly warned meeting shall carry the vote. Voting for officers to be elected at any meeting, other than school directors, shall be by ballot or voice, as the interstate district may determine, either in its articles of agreement or by a vote of the meeting.

"ARTICLE V

"OFFICERS

"A. OFFICERS: GENERAL.—The officers of an interstate school district shall be a board of school directors, a chairman of the board, a vice-chairman of the board, a secretary of

the board, a moderator, a clerk, a treasurer, and three auditors. Except as otherwise specifically provided, they shall be eligible to take office immediately following their election; they shall serve until the next annual meeting of the interstate district and until their successors are elected and qualified. Each shall take oath for the faithful performance of his duties before the moderator, or a notary public or a justice of the peace of the State in which the oath is administered. Their compensation shall be fixed by vote of the district. No person shall be eligible to any district office unless he is a voter in the district. A custodian, school teacher, principal, superintendent, or other employee of an interstate district acting as such shall not be eligible to hold office as a school director.

"B. BOARD OF DIRECTORS.—

"a. HOW CHOSEN.—Each member district shall be represented by at least one resident on the board of school directors of an interstate school district. A member district shall be entitled to such further representation on the interstate board of school directors as provided in the articles of agreement as amended from time to time. The articles of agreement as amended from time to time may provide for school directors at large, as above set forth. No person shall be disqualified to serve as a member of an interstate board because he is at the same time a member of the school board of a member district.

"b. TERMS.—Interstate school directors shall be elected for terms in accordance with the articles of agreement.

"c. DUTIES OF BOARD OF DIRECTORS.—The board of school directors of an interstate school district shall have and exercise all of the powers of the district not reserved herein to the voters of the district.

"d. ORGANIZATION.—The clerk of the district shall warn a meeting of the board of school directors to be held within ten days following the date of the annual meeting for the purpose of organizing the board, including the election of its officers.

"e. CHAIRMAN OF THE BOARD.—The chairman of the board of interstate school directors shall be elected by the interstate board from among its members at its first meeting following the annual meeting. The chairman shall preside at the meetings of the board and shall perform such other duties as the board may assign to him.

"f. VICE-CHAIRMAN OF THE BOARD OF DIRECTORS.—The vice-chairman of the interstate board shall be elected in the same manner as the chairman. He shall represent a member district in a state other than that represented by the chairman. He shall preside in the absence of the chairman and shall perform such other duties as may be assigned to him by the interstate board.

"g. SECRETARY OF THE BOARD.—The Secretary of the interstate board shall be elected in the same manner as the chairman. Instead of electing one of its members, the interstate board may appoint the interstate district clerk to serve as secretary of the board in addition to his other duties. The secretary of the interstate board (or the interstate district clerk, if so appointed) shall keep the minutes of its meetings, shall certify its records, and perform such other duties as may be assigned to him by the board.

"h. MODERATOR.—The moderator shall preside at the district meetings, regulate the business thereof decide questions of order, and make a public declaration of every vote passed. He may prescribe rules of procedure; but such rules may be altered by the district. He may administer oaths to district officers in either state.

"i. CLERK.—The clerk shall keep a true record of all proceedings at each district meeting, shall certify its records, shall make an attested copy of any records of the district for any person upon request and tender of reasonable fees therefor, if so appointed,

shall serve as secretary of the board of school directors, and shall perform such other duties as may be required by custom or law.

"j. TREASURER.—The treasurer shall have custody of all the monies belonging to the district and shall pay out the same only upon the order of the interstate board. He shall keep a fair and accurate account of all sums received into and paid from the interstate district treasury, and at the close of each fiscal year he shall make a report to the interstate district, giving a particular account of all receipts and payments during the year. He shall furnish to the interstate directors, statements from his books and submit his books and vouchers to them and to the district auditors for examination whenever so requested. He shall make all returns called for by laws relating to school districts. Before entering on his duties, the treasurer shall give a bond with sufficient sureties and in such sum as the directors may require. The treasurer's term of office is from July 1 to the following June 30.

"k. AUDITORS.—At the organization meeting of the district, three auditors shall be chosen, one to serve for a term of one year, one to serve for a term of two years, and one to serve for a term of three years. After the expiration of each original term, the successor shall be chosen for a three year term. At least one auditor shall be a resident of New Hampshire, and one auditor shall be a resident of Vermont. An interstate district may vote to employ a certified public accountant to assist the auditors in the performance of their duties. The auditors shall carefully examine the accounts of the treasurer and the directors at the close of each fiscal year, and at such other times whenever necessary, and report to the district whether the same are correctly cast and properly vouched.

"l. SUPERINTENDENT.—The superintendent of schools shall be selected by a majority vote of the board of school directors of the interstate district with the approval of both commissioners.

"m. VACANCIES.—Any vacancy among the elected officers of the district shall be filled by the interstate board until the next annual meeting of the district or other election, when a successor shall be elected to serve out the remainder of the unexpired term, if any. Until all vacancies on the interstate board are filled, the remaining members shall have full power to act.

"ARTICLE VI

"APPROPRIATION AND APPORTIONMENT OF FUNDS

"A. BUDGET.—Before each annual meeting, the interstate board shall prepare a report of expenditures for the preceding fiscal year, an estimate of expenditures for the current fiscal year, and a budget for the succeeding fiscal year.

"B. APPROPRIATION.—The interstate board of directors shall present the budget report of the annual meeting. The interstate district shall appropriate a sum of money for the support of its schools and for the discharge of its obligations for the ensuing fiscal year.

"C. APPORTIONMENT OF APPROPRIATION.—Subject to the provisions of article VII hereof, the interstate board shall first apply against such appropriation any income to which the interstate district is entitled, and shall then apportion the balance among the member districts in accordance with one of the following formulas as determined by the articles of agreement as amended from time to time:

"a. All of such balance to be apportioned on the basis of the ratio that the fair market value of the taxable property in each member district bears to that of the entire interstate district; or

"b. All of such balance to be apportioned on the basis that the average daily resident

membership for the preceding fiscal year of each member district bears to that of the average daily resident membership of the entire interstate school district; or

"c. A formula based on any combination of the foregoing factors. The term "fair market value of taxable property" shall mean the last locally assessed valuation of a member district in New Hampshire, as last equalized by the New Hampshire state tax commission.

"The term "fair market value of taxable property" shall mean the equalized grand list of a Vermont member district, as determined by the Vermont department of taxes.

"Such assessed valuation and grand list may be further adjusted (by elimination of certain types of taxable property from one or the other or otherwise) in accordance with the articles of agreement, in order that the fair market value of taxable property in each state shall be comparable.

"Average daily resident membership" of the interstate district in the first instance shall be the sum of the average daily resident membership of the member districts in the grades involved for the preceding fiscal year where no students were enrolled in the interstate district schools for such preceding fiscal year.

"D. SHARE OF NEW HAMPSHIRE MEMBER DISTRICT.—The interstate board shall certify the share of a New Hampshire member district of the total appropriation to the school board of each member district which shall add such sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district. The interstate district shall not set up its own capital reserve funds; but a New Hampshire member district may set up a capital reserve fund in accordance with RSA 35, to be turned over to the interstate district in payment of the New Hampshire member district's share of any anticipated obligations.

"E. SHARE OF VERMONT MEMBER DISTRICT.—The interstate board shall certify the share of a Vermont member district of the total appropriation to the school board of each member district which shall add sum to the amount appropriated by the member district itself for the ensuing year and raise such sum in the same manner as though the appropriation had been voted at a school district meeting of the member district.

"ARTICLE VII

"BORROWING

"A. INTERSTATE DISTRICT INDEBTEDNESS.—Indebtedness of an interstate district shall be a general obligation of the district and shall also be a joint and several general obligation of each member district, except that such obligations of the district and its member districts shall not be deemed indebtedness of any member district for the purposes of determining its borrowing capacity under New Hampshire or Vermont law. A member district which withdraws from an interstate district shall remain liable for indebtedness of the interstate district which is outstanding at the time of withdrawal and shall be responsible for paying its share of such indebtedness to the same extent as though it had not been withdrawn.

"B. TEMPORARY BORROWING.—The interstate board may authorize the borrowing of money by the interstate district (1) in anticipation of payments of operating and capital expenses by the member districts to the interstate districts and (2) in anticipation of the issue of bonds or notes of the interstate district which have been authorized for the purpose of financing capital projects. Such temporary borrowing shall be evidenced by interest bearing or discounted

notes of the interstate district. The amount of notes issued in any fiscal year in anticipation of expense payments shall not exceed the amount of such payments received by the interstate district in the preceding fiscal year. Notes issued under this paragraph shall be payable within one year in the case of notes under clause (1) and three years in the case of notes under clause (2) from their respective dates, but the principal of and interest on notes issued for a shorter period may be renewed or paid from time to time by the issue of other notes, provided that the period from the date of an original note to the maturity of any note issued to renew or pay the same debt shall not exceed the maximum period permitted for the original loan.

"C. BORROWING FOR CAPITAL PROJECTS.—An interstate district may incur debt and issue its bonds or notes to finance capital projects. Such projects may consist of the acquisition or improvement of land and buildings for school purposes, the construction, reconstruction, alteration, or enlargement of school buildings and related school facilities, the acquisition of equipment of a lasting character and the payment of judgments. No interstate district may authorize indebtedness in excess of ten percent of the total fair market value of taxable property in its member districts as defined in article VI of this compact. The primary obligation of the interstate district to pay indebtedness of member districts shall not be considered indebtedness of the interstate district for the purpose of determining its borrowing capacity under this paragraph. Bonds or notes issued under this paragraph shall mature in equal or diminishing installments of principal payable at least annually commencing no later than two years and ending not later than thirty years after their dates.

"D. AUTHORIZATION PROCEEDINGS.—An interstate district shall authorize the incurring of debts to finance capital projects by a majority vote of the district passed at an annual or special district meeting. Such vote shall be taken by secret ballot after full opportunity for debate, and any such vote shall be subject to reconsideration and further action by the district at the same meeting or at an adjourned session thereof.

"E. SALE OF BONDS AND NOTES.—Bonds and notes which have been authorized under this article may be issued from time to time and shall be sold at not less than par and accrued interest at public or private sale by the chairman of the school board and by the treasurer. Interstate district bonds and notes shall be signed by the said officers, except that either one of the two required signatures may be a facsimile. Subject to this compact and the authorizing vote, they shall be in such form, bear such rates of interest and mature at such times as the said officers may determine. Bonds shall, but notes need not, bear the seal of the interstate district, or a facsimile of such seal. Any bonds or notes of the interstate district which are properly executed by the said officers shall be valid and binding according to their terms notwithstanding that before the delivery thereof such officers may have ceased to be officers of the interstate district.

"F. PROCEEDS OF BONDS.—Any accrued interest received upon delivery of bonds or notes of an interstate district shall be applied to the payment of the first interest which becomes due thereon. The other proceeds of the sale of such bonds or notes, other than temporary notes, including any premiums, may be temporarily invested by the interstate district pending their expenditure; and such proceeds, including any income derived from the temporary investment of such proceeds, shall be used to pay the costs of issuing and marketing the bonds or notes and to meet the operating expenses or capital expenses in accordance with the purposes for which the bonds or notes were

issued or, by proceedings taken in the manner required for the authorization of such debt, for other purposes for which such debt could be incurred. No purchaser of any bonds or notes of an interstate district shall be responsible in any way to see to the application of the proceeds thereof.

"G. STATE AID PROGRAMS.—As used in this paragraph the term "initial aid" shall include New Hampshire and Vermont financial assistance with respect to a capital project, or the means of financing a capital project, which is available in connection with construction costs of a capital project or which is available at the time indebtedness is incurred to finance the project. Without limiting the generality of the foregoing definition, initial aid shall specifically include a New Hampshire state guarantee under RSA 195-B with respect to bonds or notes and Vermont construction aid under chapter 123 of 16 V.S.A. As used in this paragraph the term "long-term aid" shall include New Hampshire and Vermont financial assistance which is payable periodically in relation to capital costs incurred by an interstate district. Without limiting the generality of the foregoing definition, long-term aid shall specifically include New Hampshire school building aid under RSA 198 and Vermont school building aid under chapter 123 of Title 16 V.S.A. For the purpose of applying for, receiving and expending initial aid and long-term aid an interstate district shall be deemed a native school district by each state, subject to the following provisions. When an inter-state district has appropriated money for a capital project, the amount appropriated shall be divided into a New Hampshire share and a Vermont share in accordance with the capital expense apportionment formula in the articles of agreement as though the total amount appropriated for the project was a capital expense requiring apportionment in the year the appropriation is made. New Hampshire initial aid shall be available with respect to the amount of the New Hampshire share as though it were authorized indebtedness of a New Hampshire cooperative school district. In the case of a state guarantee of interstate districts bonds or notes under RSA 195-B, the interstate district shall be eligible to apply for and receive an unconditional state guarantee with respect to an amount of its bonds or notes which does not exceed fifty per cent of the amount of the New Hampshire share as determined above. Vermont initial aid shall be available with respect to the amount of the Vermont share as though it were funds voted by a Vermont school district. Payments of Vermont initial aid shall be made to the interstate district, and the amount of any borrowing authorized to meet the appropriation for the capital project shall be reduced accordingly. New Hampshire and Vermont long-term aid shall be payable to the interstate district. The amounts of long-term aid in each year shall be based on the New Hampshire and Vermont shares of the amount of indebtedness of the interstate district which is payable in that year and which has been apportioned in accordance with the capital expense apportionment formula in the articles of agreement. The New Hampshire aid shall be payable at the rate of forty-five per cent, if there are three or less New Hampshire members in the interstate district, and otherwise it shall be payable as though the New Hampshire members were a New Hampshire cooperative school district. New Hampshire and Vermont long-term aid shall be deducted from the total capital expenses for the fiscal year in which the long-term aid is payable, and the balance of such expenses shall be apportioned among the member districts. Notwithstanding the foregoing provisions, New Hampshire and Vermont may at any time change their state school aid programs that are in existence when this

compact takes effect and may establish new programs, and any legislation for these purposes may specify how such programs shall be applied with respect to interstate districts.

"H. TAX EXEMPTION.—Bonds and notes of an interstate school district shall be exempt from local property taxes in both states, and the interest or discount thereon and any profit derived from the disposition thereof shall be exempt from personal income taxes in both states.

"ARTICLE VIII

"TAKING OVER EXISTING PROPERTY

"A. POWER TO ACQUIRE PROPERTY OF MEMBER DISTRICT.—The articles of agreement, or an amendment thereof, may provide for the acquisition by an interstate district from a member district of all or a part of its existing plant and equipment.

"B. VALUATION.—The articles of agreement, or the amendment, shall provide for the determination of the value of the property to be acquired in one or more of the following ways:

"a. A valuation set forth in the articles of agreement or the amendment.

"b. By appraisal, in which case, one appraiser shall be appointed by each commissioner, and a third appraiser appointed by the first two appraisers.

"C. REIMBURSEMENT TO MEMBER DISTRICT.—The articles of agreement shall specify the method by which the member district shall be reimbursed by the interstate district for the property taken over, in one or more of the following ways:

"a. By one lump sum, appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"b. In installments over a period of not more than twenty years, each of which is appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"c. By an agreement to assume or reimburse the member district for all principal and interest on any outstanding indebtedness originally incurred by the member district to finance the acquisition and improvement of the property, each such installment to be appropriated, allocated, and raised by the interstate district in the same manner as an appropriation for operating expenses.

"The member district transferring the property shall have the same obligation to pay to the interstate district its share of the cost of such acquisition, but may offset its right to reimbursement.

"ARTICLE IX

"AMENDMENTS TO ARTICLES OF AGREEMENT

"A. Amendments to the articles of agreement may be adopted in the same manner provided for the adoption of the original articles of agreement, except that:

"a. Unless the amendment calls for the addition of a new member district, the functions of the planning committee shall be carried out by the interstate district board of directors.

"b. If the amendment proposes the addition of a new member district, the planning committee shall consist of all of the members of the interstate board and all of the members of the school board of the proposed new member district or districts. In such case the amendment shall be submitted to the voters at an interstate district meeting, at which an affirmative vote of two-thirds of those present and voting shall be required. The articles of agreement together with the proposed amendment shall be submitted to the voters of the proposed new member district at a meeting thereof, at which a simple majority of those present and voting shall be required.

"c. In all cases an amendment may be adopted on the part of an interstate district

upon the affirmative vote of voters thereof at a meeting voting as one body. Except where the amendment proposes the admission of a new member district, a simple majority of those present and voting shall be required for adoption.

"d. No amendment to the articles of agreement may impair the rights of bond or note holders or the power of the interstate district to procure the means for their payment.

"ARTICLE X

"APPLICABILITY OF NEW HAMPSHIRE LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in New Hampshire, the provisions of New Hampshire law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. NEW HAMPSHIRE STATE AID.—A New Hampshire school district shall be entitled to receive an amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the New Hampshire member district, and as though the New Hampshire member district pupils attending the interstate school were attending a New Hampshire cooperative school district's school. The state aid shall be paid to the New Hampshire member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF THE NEW HAMPSHIRE MEMBER SCHOOL DISTRICT.—A New Hampshire member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not herein delegated to the district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The New Hampshire member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor, unless the indebtedness is specifically assumed in accordance with the articles of agreement. Any trust funds or capital reserve funds and any property not taken over by the interstate district shall be retained by the New Hampshire member district and held or disposed of according to law. If all of the schools in a member district are incorporated into an interstate district, then no annual meeting of the member district shall be required unless the members of the interstate board from the member district shall determine that there is occasion for such an annual meeting.

"D. SUIT AND SERVICE OF PROCESS IN NEW HAMPSHIRE.—The courts of New Hampshire shall have the same jurisdiction over the district as though a New Hampshire member district were a party instead of the interstate district. The service necessary to institute suit in New Hampshire shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the

last and usual place of abode of one of the directors who reside in New Hampshire, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in New Hampshire shall be considered an employee of a New Hampshire school district for the purpose of the New Hampshire teachers' retirement system, the New Hampshire state employees' retirement system; the New Hampshire workmen's compensation law and any other law relating to the regulation of employment or the provision of benefits for employees of New Hampshire school districts except as follows:

"1. A teacher in a New Hampshire member district may elect to remain a member of the New Hampshire teachers' retirement system, even though assigned to teach in an interstate school in Vermont.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of New Hampshire or the state of Vermont but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedure of the retirement systems; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XI

"APPLICABILITY OF VERMONT LAWS

"A. GENERAL SCHOOL LAWS.—With respect to the operation and maintenance of any school of the district located in Vermont, the provisions of Vermont law shall apply except as otherwise provided in this compact and except that the powers and duties of the school board shall be exercised and discharged by the interstate board and the powers and duties of the union superintendent shall be exercised and discharged by the interstate district superintendent.

"B. VERMONT STATE AID.—A Vermont school district shall be entitled to receive such amount of state aid for operating expenditures as though its share of the interstate district's expenses were the expenses of the Vermont member district, and as though the Vermont member district pupils attending the interstate schools were attending a Vermont union school district's schools. Such state aid shall be paid to the Vermont member school district to reduce the sums which would otherwise be required to be raised by taxation within the member district.

"C. CONTINUED EXISTENCE OF VERMONT MEMBER SCHOOL DISTRICT.—A Vermont member school district shall continue in existence, and shall have all of the powers and be subject to all of the obligations imposed by law and not herein delegated to the interstate district. If the interstate district incorporates only a part of the schools in the member school district, then the school board of the member school district shall continue in existence and it shall have all of the powers and be subject to all of the obligations imposed by law on it and not herein delegated to the district. However, if all of the schools in the member school district are incorporated into the interstate school district, then the member or members of the interstate board representing the member district shall have all of the powers and be

subject to all of the obligations imposed by law on the members of a school board for the member district and not herein delegated to the interstate district. The Vermont member school district shall remain liable on its existing indebtedness; and the interstate school district shall not become liable therefor. Any trust funds and any property not taken over shall be retained by the Vermont member school district and held or disposed of according to law.

"D. SUIT AND SERVICE OF PROCESS IN VERMONT.—The Courts of Vermont shall have the same jurisdiction over the districts as though a Vermont member district were a party instead of the interstate district. The service necessary to institute suit in Vermont shall be made on the district by leaving a copy of the writ or other proceedings in hand or at the last and usual place of abode of one of the directors who resides in Vermont, and by mailing a like copy to the clerk and to one other director by certified mail with return receipt requested.

"E. EMPLOYMENT.—Each employee of an interstate district assigned to a school located in Vermont shall be considered an employee of a Vermont school district for the purpose of the state teachers' retirement system of Vermont, the state employees' retirement system, the Vermont workmen's compensation law, and any other law relating to the regulation of employment or the provision of benefits for employees of Vermont school districts except as follows:

"1. A teacher in a Vermont member district may elect to remain a member of the state teachers' retirement system of Vermont, even though assigned to teach in an interstate school in New Hampshire.

"2. Employees of interstate districts designated as professional or instructional staff members, as defined in article I hereof, may elect to participate in the teachers' retirement system of either the state of Vermont or the state of New Hampshire but in no case will they participate in both retirement systems simultaneously.

"3. It shall be the duty of the superintendent in an interstate district to: (a) advise teachers and other professional staff employees contracted for the district about the terms of the contract and the policies and procedures of the retirement system; (b) see that each teacher or professional staff employee selects the retirement system of his choice at the time his contract is signed; (c) provide the commissioners of education in New Hampshire and in Vermont with the names and other pertinent information regarding each staff member under his jurisdiction so that each may be enrolled in the retirement system of his preference.

"ARTICLE XII

"ADOPTION OF COMPACT BY DRESDEN SCHOOL DISTRICT

"The Dresden School District, otherwise known as the Hanover-Norwich Interstate School District, authorized by New Hampshire laws of 1961, chapter 116, and by the laws of Vermont, is hereby authorized to adopt the provisions of this compact and to become an interstate school district within the meaning hereof, upon the following conditions and subject to the following limitations:

"a. Articles of agreement shall be prepared and signed by a majority of the directors of the interstate school district.

"b. The articles of agreement shall be submitted to an annual or special meeting of the Dresden district for adoption.

"c. An affirmative vote of two-thirds of those present and voting shall be required for adoption.

"d. Nothing contained therein, or in this compact, as it affects the Dresden School District shall affect adversely the rights of the holders of any bonds or other evidences

of indebtedness then outstanding, or the rights of the district to procure the means for payment thereof previously authorized.

"e. The corporate existence of the Dresden School District shall not be terminated by such adoption of articles of amendment, but shall be deemed to be so amended that it shall thereafter be governed by the terms of this compact.

"ARTICLE XIII

"MISCELLANEOUS PROVISIONS

"A. STUDIES.—Insofar as practicable, the studies required by the laws of both states shall be offered in an interstate school district.

"B. TEXTBOOKS.—Textbooks and scholar's supplies shall be provided at the expense of the interstate district for pupils attending its schools.

"C. TRANSPORTATION.—The allocation of the cost of transportation in an interstate school district, as between the interstate district and the member districts, shall be determined by the articles of agreement.

"D. LOCATION OF SCHOOLHOUSES.—In any case where a new schoolhouse or other school facility is to be constructed or acquired, the interstate board shall first determine whether it shall be located in New Hampshire or in Vermont. If it is to be located in New Hampshire, RSA 199, relating to schoolhouses, shall apply. If it is to be located in Vermont, the Vermont law relating to schoolhouses shall apply.

"E. FISCAL YEAR.—The fiscal year of each interstate district shall begin on July first of each year and end on June thirtieth of the following year.

"F. IMMUNITY FROM TORT LIABILITY.—Notwithstanding the fact that an interstate district may derive income from operating profit, fees, rentals, and other services, it shall be immune from suit and from liability for injury to persons or property and for other torts caused by it or its agents, servants or independent contractors, except insofar as it may have undertaken such liability under RSA 281:7 relating to workmen's compensation, or RSA 412:3 relating to the procurement of liability insurance by a governmental agency and except insofar as it may have undertaken such liability under 21 V.S.A. Section 621 relating to workmen's compensation or 29 V.S.A. Section 1403 relating to the procurement of liability insurance by a governmental agency.

"G. ADMINISTRATIVE AGREEMENT BETWEEN COMMISSIONERS OF EDUCATION.—The commissioners of education of New Hampshire and Vermont may enter into one or more administrative agreements prescribing the relationship between the interstate districts, member districts, and each of the two state departments of education, in which any conflicts between the two states in procedure, regulations, and administrative practices may be resolved.

"H. AMENDMENT.—Neither state shall amend its legislation or any agreement authorized thereby without the consent of the other in such manner as to substantially adversely affect the rights of the other state or its people hereunder, or as to substantially impair the rights of the holders of any bond or notes or other evidences of indebtedness then outstanding or the rights of an interstate school district to procure the means for payment thereof. Subject to the foregoing, any reference herein to other statutes of either state shall refer to such statute as it may be amended or revised from time to time.

"I. SEPARABILITY.—If any of the provisions of this compact, or legislation enabling the same, shall be held invalid or unconstitutional in relation to any of the applications thereof, such invalidity or unconstitutionality shall not affect other applications thereof or other provisions thereof; and to this end the provisions of this compact are declared to be severable.

"J. INCONSISTENCY OF LANGUAGE.—The validity of this compact shall not be affected by any insubstantial differences in its form or language as adopted by the two states.

"ARTICLE XIV

"EFFECTIVE DATE

"This compact shall become effective when agreed to by the States of New Hampshire and Vermont and approved by the United States Congress."

"SEC. 2. The right is hereby reserved by the Congress or any of its standing committees to require the disclosure and the furnishing of such information and data by or concerning any school district created under the New Hampshire-Vermont Interstate School Compact as is deemed appropriate by the Congress or such committee.

"SEC. 3. The right to alter, amend, or repeal this Act is expressly reserved."

The amendment was agreed to.

The Senate bill, as amended, was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING SECTIONS 2734, 2733, AND 715 OF TITLE 10, UNITED STATES CODE, TO AUTHORIZE THE SECRETARY CONCERNED TO MAKE PARTIAL PAYMENTS ON CERTAIN CLAIMS WHICH ARE CERTIFIED TO CONGRESS

The Clerk called the bill (H.R. 4247) to amend section 2734 of title 10, United States Code, to authorize the Secretary concerned to make partial payments on certain claims which are certified to Congress.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HALL. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

AMENDING SECTION 336(c) OF THE IMMIGRATION AND NATIONALITY ACT

The Clerk called the bill (H.R. 3666) to amend section 336(c) of the Immigration and Nationality Act.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. PELLY. Mr. Speaker, reserving the right to object, and I do this not to indicate opposition to the legislation because I think it has merit, but on the other hand as I read it, it would change the policy under the rules and the criteria that have been established by the official objectors. It seems to me this is not the right type of calendar under which this legislation should be considered.

Therefore, Mr. Speaker, I withdraw my reservation of objection and ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

AMENDING SECTION 312 OF THE IMMIGRATION AND NATIONALITY ACT

The Clerk called the bill (H.R. 3667) to amend section 312 of the Immigration and Nationality Act.

There being no objection, the Clerk read the bill, as follows:

H.R. 3667

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first proviso contained in paragraph (1) of section 312 of the Immigration and Nationality Act (8 U.S.C. 1423) is amended by striking out "or to any person who, on the effective date of this Act, is over fifty years of age and has been living in the United States for periods totaling at least twenty years" and by inserting in lieu thereof the following: "or to any person who, on the date of the filing of his petition for naturalization as provided in section 334 of this Act, is over fifty years of age and has been living in the United States for periods totaling at least twenty years".

With the following committee amendments:

On page 1, at the end of the bill, add two new sections to read as follows:

"Sec. 2. Paragraphs (1) and (2) of section 320(a) of the Immigration and Nationality Act (8 U.S.C. 1431) are amended to delete the word 'sixteen' and substitute in lieu thereof the word 'eighteen'.

"Sec. 3. Paragraphs (4) and (5) of section 321(a) of the Immigration and Nationality Act (8 U.S.C. 1432) are amended to delete the word 'sixteen' and substitute in lieu thereof the word 'eighteen'."

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend sections 312, 320(a), and 321(a) of the Immigration and Nationality Act."

A motion to reconsider was laid on the table.

EXTENSION OF GREAT PLAINS CONSERVATION PROGRAM

Mr. POAGE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10595) to amend the act of August 7, 1956 (70 Stat. 1115), as amended, providing for a Great Plains conservation program, as amended.

The Clerk read as follows:

H.R. 10595

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of August 7, 1956 (70 Stat. 1115), as amended, is hereby further amended by striking subparagraph (b) (1) of said Act and inserting in lieu thereof the following:

"(1) The Secretary is authorized, within the amounts of such appropriations as may be provided therefor, to enter into contracts of not to exceed ten years with owners and operators of land in the Great Plains area having such control as the Secretary determines to be needed for the contract period of the farms, ranches, or other lands covered thereby. Such contracts shall be designed to assist farm, ranch, or other land owners or operators to make, in orderly progression over a period of years, changes in their cropping systems or land uses which are needed to conserve, develop, protect, and utilize the soil and water resources of their farms,

ranches, and other lands and to install the soil and water conservation measures and carry out the practices needed under such changed systems and uses. Such contracts may be entered into during the period ending not later than December 31, 1981, on farms, ranches, and other lands in counties in the Great Plains area of the States of Colorado, Kansas, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming, designated by the Secretary as susceptible to serious wind erosion by reason of their soil types, terrain, and climatic and other factors. The landowner or operator shall furnish to the Secretary a plan of farming operations or land use which incorporates such soil and water conservation practices and principles as may be determined by him to be practicable for maximum mitigation of climatic hazards of the area in which such land is located, and which outlines a schedule of proposed changes in cropping systems or land use and of the conservation measures which are to be carried out on the farm, ranch, or other land during the contract period to protect the farm, ranch, or other land from erosion and deterioration by natural causes. Such plan may also include practices and measures for (a) enhancing fish and wildlife and recreation resources, (b) promoting the economic use of land, and (c) reducing or controlling agricultural related pollution. Inclusion in the farm plan of these practices shall be the exclusive decision of the land owner or operator. Approved conservation plans of land owners and operators developed in cooperation with the soil and water conservation district in which their lands are situated shall form a basis for contracts. Under the contract the land owner or operator shall agree—

"(i) to effectuate the plan for his farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary pursuant to paragraph (3) of this subsection;

"(ii) to forfeit all rights to further payments or grants under the contract and refund to the United States all payments or grants received thereunder upon his violation of the contract at any stage during the time he has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the contract;

"(iii) upon transfer of his right and interest in the farm, ranch, or other land during the contract period to forfeit all rights to further payments or grants under the contract and refund to the United States all payments or grants received thereunder unless the transferee of any such land agrees with the Secretary to assume all obligations of the contract;

"(iv) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract;

"(v) to such additional provisions as the Secretary determines are desirable and includes in the contract to effectuate the purposes of the program or to facilitate the practical administration of the program. In return for such agreement by the land owner or operator the Secretary shall agree to share the cost of carrying out those conservation practices and measures set forth in the contract for which he determines that cost sharing is appropriate and in the public interest. The portion of such cost (including labor) to be shared shall be that part which the Secretary determines is necessary and appropriate to effectuate the physical instal-

lation of the conservation practices and measures under the contract;"

Sec. 2. Subparagraph (b) (2) is amended to read:

"(2) the Secretary may terminate any contract with a land owner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of contracts previously entered into as he may determine to be desirable to carry out the purposes of the program or facilitate the practical administration thereof or to accomplish equitable treatment with respect to other similar conservation, land use, or commodity programs administered by the Secretary."

Sec. 3. Subparagraph (b) (7) of said Act is amended to read:

"(7) there is hereby authorized to be appropriated without fiscal year limitations, such sums as may be necessary to carry out this subsection: *Provided*, That the total cost of the program (excluding administrative costs) shall not exceed \$300,000,000, and for any program year payments shall not exceed \$25,000,000. The funds made available for the program under this subsection may be expended without regard to the maximum payment limitation and small payment increases required under section 8(e) of this Act, and may be distributed among States without regard to distribution of funds formulas of section 15 of this Act. The program authorized under this subsection shall be in addition to, and not in substitution of, other programs in such area authorized by this or any other Act."

The SPEAKER pro tempore (Mr. McFALL). Is a second demanded?

Mr. KLEPPE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. POAGE. Mr. Speaker, I yield myself such time as I may consume.

This bill merely provides an extension of the existing Great Plains conservation program, which is, I believe, one of the best accepted of our conservation programs in the country. A Great Plains conservation program was authorized under Public Law 1021, 84th Congress, to provide farmers and ranchers in the critically erodible areas of the Great Plains, known in the 1930's as the "Dust Bowl", with long-range costsharing on conservation practices and technical assistance in their application. The program is designed to improve and conserve the resources of this vast agricultural area. The program supplements other soil and water conservation programs; it is also coordinated with the objectives of local conservation districts, State agencies, and community groups. It contemplates reorientation of the use of badly eroded lands, in the area formerly known as the Dust Bowl. It involves areas covering the major part of 10 Midwestern States. It rests on contracts of from 3 to 10 years with landowners, whereby they undertake to carry out certain practices with certain governmental assistance.

While drought, destructive winds and floods, and other natural disasters cannot be prevented, their damaging effects can be minimized. The Great Plains conservation program is an integral part in any reduction of their effect.

The bill pending would also define by law the role of soil and water conservation districts in the implementation of the program.

The bill would allow the Secretary to enter into contracts on land units not usually considered farms or ranches when erosion of those tracts was serious enough to threaten the surrounding area.

The bill would allow modification of contracts to make provisions of this program more complementary to other U.S. Department of Agriculture administered programs.

The Great Plains program is not a land retirement program, and the failure of one landowner to participate does not very often reduce the benefits to others. In this respect this program is definitely different from the land retirement and crop reductions of other Department of Agriculture programs. The program is directed at shifts and changes in land uses to better conserve the land resources. In order that as many farmers and ranchers as possible participate, a limit of \$25,000 over the entire contract period for any one unit, or \$2,500 in any 1 year, was established. This limit is continued by the pending bill. The average cooperating landowner has a program of about 5½ years' duration, during which time the Federal Government participates at the rate of \$630 per year. As of June 30, 1968, a total of 31,122 contracts involving more than 56 million acres had been executed.

Under the program, the Department furnishes a part of the cost for the installation of permanent-type conservation practices under long-term contracts.

Second, the Department provides the technical services of trained conservationists, engineers, and other agricultural specialists to plan and help install programs adapted to each farm or ranch. These include scheduling of treatment measures and the technical help in design, layout, and site selection, as well as actual technical supervision of construction.

In addition to conserving the lands, the program has had the side effect of improving marginal farms and ranches to the point that income has been substantially enhanced. Equally important has been the reduction in sediment pollution of streams and air.

The bill provides for a continuation of this work at the same rate of authorized expenditures as in the past, which is \$15 million per year, and which over a 20-year period would be \$300 million with a limitation of expenditure of \$25 million in any one year. Obviously, if \$25 million is spent in 1 year, less than \$15 million will have to be spent in some other years.

It was felt by some on the committee that this program should be extended to cover additional States. It was finally agreed, however, that while some extension of area was needed, that such extension should be within the States already included, and the Department agreed that it had the authority and under the pending bill would have authority to extend this program to additional counties within the 10 States now included as the needs in those areas indicated.

I know of no reason for objecting to a

continuation of this program, which has proven such a success, as is a program which is working and is relatively modest—quite modest as far as modern-day programs are concerned—and one which involves the protection of the soil over a very vast area. Actually it involves the people over all the United States, because those of you who are old enough to remember will recall that in the middle 1930's there were duststorms which actually blew dust into this Capitol in the District of Columbia, the dust originating in the Midwestern States—the very area which we are trying to protect now under this bill.

I reserve the balance of my time. I yield to the gentleman from South Dakota such time as he desires.

Mr. KLEPPE. Mr. Speaker, I commend the chairman of our committee for his explanation of the bill, and most assuredly I join in his remarks.

I would just like to point out for the RECORD, that of the 27 original sponsors of legislation to extend the Great Plains conservation program, all 27 are part and parcel of this legislation. H.R. 10595, which we have under consideration, contains 20 names. I would like the RECORD to show that in addition to those, the names of Mr. BELCHER, Mr. ASPINALL, Mr. MAHON, Mr. STEED, Mr. LUJAN, Mr. FOREMAN, and Mr. ROGERS of Colorado should be shown as cosponsors of this legislation also.

The only reason they were not originally shown on the bill was because, first of all, we could have only 25 names on the bill, and second, on the day when the bill was introduced, we just could not physically and personally contact all, so H.R. 10677 was introduced the following day with these additional names on it.

This is good legislation, Mr. Speaker, and I most assuredly commend it to the Members of the House and recommend its passage.

(Mr. BERRY (at the request of Mr. KLEPPE) was given permission to extend his remarks at this point in the RECORD.)

Mr. BERRY. Mr. Speaker, I rise in support of H.R. 10595, a bill to extend the Great Plains conservation program.

As a cosponsor of this legislation, extending the existing program for 10 years, I cannot stress too strongly that dependable agriculture in the Great Plains States is vital to all America. The 10 States which participate in the program contain over a third of our Nation's land area and two-fifths of our cropland.

H.R. 10595 will provide for the continuation of a program to assist farmers and ranchers in developing good conservation practices through utilization of water resources and prevention of soil erosion. In addition, the program provides opportunities for participants to stabilize their operations by insuring carryover feed for livestock to avoid untimely sales during drought or other emergencies.

Under the provisions of the bill, the amount of the appropriation will be increased from the present spending level of \$150 million to \$300 million, with not more than \$25 million to be expended in any 1 year.

The Secretary of Agriculture is author-

ized within the amounts of these appropriations to enter into contracts with farmers and ranchers for a period of up to 10 years. In order to allow as many farmers and ranchers as possible to participate, a limit of \$25,000 for any one unit has been established.

Statistics indicate that contracts average about \$3,500 in Federal cost sharing, spread over about 5½ years. This means about \$630 a year in Federal cost sharing is used by individuals on the average in carrying his conservation program to completion.

At this point, it might be well to give a brief history of how this program was started and what it has accomplished to date.

During the mid-1950's the Great Plains suffered from an extended drought which caused severe wind erosion, loss of crops, untimely sales of livestock and in some cases, loss of farms and ranches due to economic stress.

It was a repeat of the severe land damage in the 1930's which led to the origin of the term "Dust Bowl" for a large area of the Plains.

Consequently, in 1956 Congress passed legislation establishing the Great Plains conservation program. U.S. Department of Agriculture agency representatives at State levels, along with other interested groups of soil and water conservationists, worked together in setting out the boundaries and recommended to the Secretary of Agriculture the initial counties in each State to be eligible to participate in the program.

Today, that area embraces 427 counties in parts of the 10 States of Montana, South Dakota, North Dakota, Wyoming, Nebraska, Colorado, Kansas, Oklahoma, New Mexico, and Texas.

As of June 30, 1968, a total of 31,122 contracts covering 56,601,700 acres had been executed.

In the Second Congressional District of South Dakota, which I am privileged to represent, 39 of the district's 43 counties participate in the program. The farmers and ranchers in these counties have signed 1,509 contracts since the inception of the program, covering 4½ million acres. In addition, there are 348 applications pending in South Dakota and about 5,000 in the 10-State area.

In my judgment, this program has proven itself in providing technical and financial assistance through long-term contractual arrangements to help farmers and ranchers install complete conservation programs on their entire operating units.

There is much, however, that still needs to be accomplished. As I indicated earlier, over 5,000 applications are still pending. It is imperative that this program be continued if we are to keep the almost certain drought cycles from re-occurring in the Plains area.

We cannot afford to leave this area unprotected again.

Mr. BROTZMAN (at the request of Mr. KLEPPE) was given permission to extend his remarks at this point in the RECORD.)

Mr. BROTZMAN. Mr. Speaker, I was pleased to join with my distinguished colleague, Congressman KLEPPE and

others, as a sponsor of the Great Plains conservation program.

This program has provided a voluntary soil conservation program to protect farmers and ranchers in Colorado and the other Plains States from the hazards of drought for the last 13 years.

During that time more than 32,000 farmers and ranch operators have taken part in the program which emphasizes better utilization of land, and control of wind erosion and moisture.

As a supplement to the other Department of Agriculture programs in the Plains region, the program has been a great success. But the job is far from done. The 1971 expiration date will come long before the critical conservation needs for the Great Plains can be met.

Therefore, I urge my distinguished colleagues to act favorably on this bill, H.R. 10595, which would extend the program for another 10 years.

(Mr. SHRIVER (at the request of Mr. KLEPPE) was given permission to extend his remarks at this point in the RECORD.)

Mr. SHRIVER. Mr. Speaker, I rise in support of H.R. 10595, of which I am a cosponsor, with the distinguished Congressman from North Dakota (Mr. KLEPPE). This bill authorizes the Secretary to enter into contracts of not to exceed 10 years with owners and operators of land in the Great Plains area.

Without this action today this important conservation program would expire in 1971 leaving much undone.

This program was designed to assist farmers and ranchers in applying conservation programs throughout the vast Plains area. As I have stated, it has become apparent the critical conservation needs in the 10 Great Plains States, including Kansas, cannot be met by the end of 1971.

We are aware of the great strides which have been made in conservation work as a result of this partnership between the Federal Government, farmers and ranchers, and local and State governments.

However, we are constantly reminded by nature that the job is far from finished. The ability of the farmer to provide for the future food needs of our Nation may depend on our continuing investments in agricultural programs such as the Great Plains conservation program.

More than half of the crop, range, and pasture lands within the 423 counties participating in this program is still vulnerable to damage and still in need of conservation treatment.

The Committee on Agriculture has recognized the importance of extending the life of this program and authorizing adequate financing.

This legislation authorizes \$300 million for the total cost of the program and enables the Secretary to make payments of up to \$25 million in any program year.

With the extension of the Great Plains conservation program, we will see this region and the Nation move closer to the time when all of the lands will be protected from wind erosion problems and proper soil and water conservation measures will be implemented.

Mr. DENNEY. Mr. Speaker, in past years I have pointed with pride to the fine conservation record in Nebraska. Historically we have measured progress in miles of terraces, numbers of farm ponds, and other on-the-land conservation treatment.

The Great Plains conservation program—Public Law 1021—is being utilized in all of the 60 eligible counties in the western part of the State. Under this program, the Soil Conservation Service assists farmers and ranchers to develop a complete conservation plan for their farm or ranch. The Soil Conservation Service also provides technical and cost-sharing assistance for installing the needed and agreed-to measures over a reasonable period of years.

Strip cropping is one of the practices used in the Great Plains program. Across the western two-thirds of the State, grass seeding—converting cropland to permanent native grass—is the No. 1 practice.

Over 5,000,000 acres of land in the State have been placed under contract for complete conservation treatment. In contracts in Nebraska, an average of 25 percent of the original cropland is being seeded permanently to native grass. This means as of July 1968, over 200,000 acres of cropland were either planted or planned for retirement and without annual rental payments.

It is estimated that the present accomplishments under the Great Plains program are about one-fifth of the potential in the 60 eligible counties. A recent conservation needs inventory shows counties reporting 817,000 acres of submarginal cropland that should be planted permanently to grass.

The extension of the Great Plains conservation program for another 10 years and an increase in the program authorization would enable the Great Plains area to move much closer to the time when all the lands of this vital region will be protected.

It makes good sense to extend this program.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Texas that the House suspend the rules and pass the bill H.R. 10595, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. KLEPPE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the subject of the bill (H.R. 10595) just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

SPECIAL HOUSING FOR PARAPLEGICS

Mr. TEAGUE of Texas. Mr. Speaker, I move to suspend the rules and pass the

bill (S. 408) to modify eligibility requirements governing the grant of assistance in acquiring specially adapted housing to include loss or loss of use of a lower extremity and other service-connected neurological or orthopedic disability which impairs locomotion to the extent that a wheelchair is regularly required, as amended.

The Clerk read as follows:

S. 408

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 801 of title 38, United States Code, is amended by substituting a comma and the word "or" for the semicolon at the end of clause numbered (2) and adding "(3) due to the loss or loss of use of one lower extremity together with residuals of organic disease or injury which so affect the functions of balance or propulsion as to preclude locomotion without resort to a wheelchair,".

SEC. 2. Section 802 of title 38, United States Code, is amended by striking out "\$10,000" and inserting in lieu thereof "\$15,000".

SEC. 3. Section 1811(d) of title 38, United States Code, is amended (1) by striking out "\$17,500" each place where it appears therein and inserting in lieu thereof in each such place "\$25,000"; (2) by striking the second semicolon and all that follows in subsection (2) and inserting in lieu thereof a period; and (3) by striking out the semicolon where it appears in subsection (3) and all that follows and inserting a period.

SEC. 4. Section 1803(d)(3) of title 38, United States Code, be amended to read as follows:

"(3) Any real estate loan (other than for repairs, alterations, or improvements) shall be secured by a first lien on the realty. In determining whether a loan for the purchase or construction of a home is so secured, the Administrator may disregard a superior lien created by a duly recorded covenant running with the realty in favor of a private entity to secure an obligation to such entity for the homeowner's share of the costs of the management, operation, or maintenance of property, services or programs within and for the benefit of the development or community in which the veteran's realty is located, if he determines that the interests of the veteran borrower and of the Government will not be prejudiced by the operation of such covenant. In respect to any such superior lien to be created after the effective date of this amendment, the Administrator's determination must have been made prior to the recordation of the covenant. Any non-real-estate loan (other than for working or other capital, merchandise, good will, and other intangible assets) shall be secured by personalty to the extent legal and practicable."

The SPEAKER pro tempore. Is a second demanded?

Mr. TEAGUE of California. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. TEAGUE of Texas. Mr. Speaker, we have a new Congress. We have a new administration. The House Committee on Veterans' Affairs is doing a very careful study of our entire veterans' program. These two bills are two of a number we will be bringing up within the next few weeks. I think it quite interesting that one of these bills would save about \$5 million and the other would cost about \$2 million.

Mr. Speaker, these bills have been handled by our committee, which has done an excellent job.

In 1948 Public Law 80-702 was enacted, legislation which authorized the granting of \$10,000 for paraplegic and quadriplegic veterans whose disability is service-connected of a permanent and total quality resulting in the loss or loss of use of both lower extremities so as to preclude locomotion without the aid of crutches, canes, or a wheelchair. The original enactment covered all those individuals who served on or after April 20, 1918, and was subsequently amended to broaden its eligibility—Public Law 81-268—to include those veterans who had blindness in both eyes with loss or loss of use of one lower extremity.

Over the life of the program there have been 10,073 loans made for this type of disability with grants totaling \$96,567,134.

Section 1 of the bill, which passed the Senate by unanimous vote on March 17, 1969, would enlarge the eligibility classes to include those veterans who from service-connected causes have lost or lost use of one lower extremity together with a residual of a disease which so affected the functions of balance or propulsion as to preclude locomotion without resorting to a wheelchair.

Section 2 has been added to increase the amount of the paraplegic housing grant from \$10,000 to \$15,000. In 1948, when this program was first considered, the average cost of constructing a new single family residence was \$7,850. Today the average cost is \$26,800. The average purchase price in 1948 for a newly constructed single family residence under the GI loan program was \$9,208, as compared with \$20,490 today.

Section 3 of the bill increases the amount of the direct loan program for an individual home from \$17,500 to \$25,000. There have been 259,140 such loans over the life of the program with a total value of \$2,780 million. There has been excellent repayment record on these loans which are restricted to rural areas or areas where private financing is not available. The loss rate has been less than 1 percent.

Pertinent statistics on the direct loan program follow:

Number of direct loans made in fiscal years:	
1967	11,719
1968	11,903
1969	12,850
[In millions]	
Amount available for direct loans in fiscal years:	
1967	\$929.8
1968	762.4
1969	793.3
1970	615.7
Average loan amount in fiscal years:	
1967	12,190
1968	12,496
1969 (estimated)	12,700
1970 (estimated)	12,900

Section 4 of the reported bill is an effort to meet one of the latest developments in the housing field: namely, the development of satellite towns. Today, veterans are not eligible to obtain a loan guarantee in one of these towns, though FHA financing is available. These new-type "towns" generally finance their development of community facilities by

imposition of a monthly charge to be borne by individual purchasers. Such monthly charges closely resemble special assessments or taxes levied to defray the cost of similar type facilities when provided by a governmental entity. The basic financial agreements between the developer and his lender usually require, as in the case of taxes or assessments, that these charges against the purchaser be secured by a first lien against his home. Under the language of the bill, the "homeowner's share" of the cost of such community facilities may be determined in any of a variety of ways so long as the charge levied against him is fair and equitable.

The bill is a logical and extremely worthwhile extension of the housing program for veterans, generally and particularly those who are in the paraplegic and quadriplegic class.

The Veterans' Administration has reported that it favors the enactment of S. 408 as passed by the Senate and that the first-year cost can be expected to apply to 75 cases involving \$750,000. Section 2, increasing the amount of paraplegic grant, can be expected to involve 470 cases the first year and a like number for succeeding 4 years, at an annual cost of \$2,350,000. Section 3 would require a budget outlay for direct loans with a maximum potential increase of approximately \$2,900,000, but this would not be a cost to the Treasury, assuming, as seems warranted, that the same experience on repayment is experienced with this new group of loans as has been true of the program in the past. Section 4 of the bill would not involve any new expenditure of Government funds.

Mr. Speaker, during the unavoidable absence of the subcommittee chairman, the gentleman from Nevada (Mr. BARRING), the Honorable RAY ROBERTS acted as chairman of the Subcommittee on Housing and reported to the full committee the bill, S. 408. I am indebted to him and his colleagues for their help in reporting this measure. In addition to the gentleman from Texas, the members are MESSRS. DAVID E. SATTERFIELD III, HENRY HELSTOSKI, DON EDWARDS, EDWARD R. ROYBAL, WILLIAM H. AYRES, SEYMOUR HALPERN, JOHN J. DUNCAN, and Mrs. MARGARET M. HECKLER. I thank them all.

Mr. Speaker, I yield now to the gentleman from Texas (Mr. ROBERTS), who has done most of the work on this bill, so he may explain the bill.

Mr. ROBERTS. Mr. Speaker, the bill, S. 408, I am glad to say, was reported unanimously by the Subcommittee on Housing and also by the full Committee on Veterans' Affairs.

As presented to the House today it accomplishes four items:

First. It enlarges the class of eligibles for paraplegic housing to include those service-connected veterans who have lost or lost the use of one lower extremity together with a residual of a disease which affects their balance or propulsion so as to compel them to use a wheelchair.

Second. It increases from \$10,000 to \$15,000 the amount of the paraplegic grant. Housing costs have, of course, more than doubled since 1948.

Third. Section 3 increases the amount

of the direct loan for veterans residing in rural areas or areas where private financing is not available from the present \$17,500 to \$25,000. The loss rate on this type of loan has been less than 1 percent and an increase in the direct loan was passed by the House in the last Congress but failed of enactment in the Senate because of a committee jurisdiction dispute.

Fourth. Lastly, the bill makes eligible for the loan guaranty provision of the existing GI bill of rights those veterans who wish to live in the so-called satellite towns such as Columbia, Md., now under construction. FHA financing has been available in these satellite towns for some months and this is simply a logical extension to permit eligible veterans to enjoy this type of housing if it is their selection.

The actual cost of the measure would be somewhat in excess of \$3 million the first year.

Mr. TEAGUE of California. Mr. Speaker, this bill has the complete bipartisan unanimous support of the Committee on Veterans' Affairs. I recommend it be approved by the House.

Mr. Speaker, I rise in support of S. 408. This bill, if enacted into law, will liberalize the specially adapted housing program for certain service-connected disabled veterans, increase the maximum direct home loan for veterans, and permit veterans to obtain GI home loans for the purchase of homes in so-called satellite towns.

Existing law authorizes the grant of \$10,000 to veterans who have suffered the service-connected loss or loss of use of both lower extremities so as to preclude locomotion without the aid of crutches, canes, or a wheelchair to aid in purchasing specially adapted housing.

The bill as it passed the Senate would permit those veterans who have suffered the service-connected loss or loss of use of one lower extremity together with a residual of a disease which so affected the functions of balance or propulsion as to preclude locomotion without resorting to a wheelchair to also receive the special housing grant. The Committee on Veterans' Affairs agrees that this expanded eligibility is warranted and in keeping with the original philosophy of this benefit.

Additionally, the committee has amended the bill to increase the special housing grant from \$10,000 to \$15,000. The special housing grant was first authorized in 1948 at \$10,000. The average cost of constructing a new single-family residence has more than tripled since this program was first authorized. It is, therefore, fitting that the grant be increased to \$15,000.

The committee has also amended the bill to increase the maximum direct home loan from \$17,500 to \$25,000. If the direct loan program is to provide any benefit to veterans living in remote and rural areas, it is necessary that the maximum amount of a loan be increased to \$25,000, in keeping with today's home construction costs. Some 295,000 such loans have been made over the life of the program. The repayment record on these loans has been excellent.

Finally, the bill has been amended to

permit veterans to obtain a loan guaranty under the GI bill to purchase a home in a satellite town. Under existing law GI loan guaranty is not available to housing constructed in these new type towns which generally finance their development of community facilities by the imposition of a monthly charge to be borne by individual purchasers. Since FHA financing is available, it would appear to be a logical extension of the housing program for veterans to permit them to purchase homes under the GI bill in such satellite towns.

Mr. Speaker, this bill as amended is, in my judgment, necessary. I urge that it be passed.

(Mr. SAYLOR asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. SAYLOR. Mr. Speaker, I am happy to support S. 408 because the House committee amendments thereto authorize long overdue liberalizations of two important programs. I am referring, of course, to the paraplegic housing program and the veterans' direct home loan program.

Since 1948, certain seriously disabled veterans who have suffered the loss or loss of use of two lower extremities so as to prevent locomotion have been able to receive a \$10,000 grant to assist in acquiring specially adapted housing. Despite the fact that housing costs have skyrocketed in the intervening years, this grant has remained at \$10,000. S. 408, as amended, will increase the grant to \$15,000 and at the same time will make more liberal the eligibility criteria, thus permitting additional seriously disabled veterans to qualify for this benefit.

The bill also recognizes the increased costs of housing and construction of homes by increasing the maximum direct loan to individual veterans from its present \$17,500 to \$25,000. Under this program, veterans in remote and rural areas, when private capital is determined to be unavailable, may receive a direct loan from the Veterans' Administration for the purchase of a home under the GI bill. The increased cost of housing and the maximum of \$17,500 on such loans has severely handicapped veterans in obtaining the home of their choice. I believe the provisions of S. 408, as amended, will correct this situation.

Mr. Speaker, I urge that this bill be promptly passed.

Mr. DULSKI. Mr. Speaker, I support fully the bill, S. 408, which is before us today in amended form from the Committee on Veterans' Affairs.

The bill as approved by the Senate is an excellent bill, providing for a practical expansion of the eligibility rule covering special housing grants for veterans who are confined to wheelchairs because of loss of limbs or loss of use of the lower extremity of their bodies.

The expansion of the coverage applies to those whose use of a wheelchair is required because of the residual of a disease which so affected their functions of balance or propulsion.

Our committee added three other pertinent sections to the bill that would: First, increase the amount of the paraplegic grant from the present \$10,000 to \$15,000; second, increase the amount of

the direct loan for veterans residing in rural areas and other areas where financing is unavailable from \$17,500 to \$25,000, and, third, apply the loan guaranty provision to those veterans who elect to reside in so-called satellite towns.

Mr. Speaker, I believe that these changes in the veterans housing law are overdue and I urge their approval.

GENERAL LEAVE TO EXTEND

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to extend their remarks in the RECORD on this bill S. 408.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Texas that the House suspend the rules and pass the bill S. 408, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to liberalize the eligibility requirements governing the grant of assistance in acquiring specially adapted housing for certain service-connected disabled veterans, to increase the amount of such grant, to raise the limit on the amount of direct housing loans made by the Veterans' Administration, and for other purposes."

A motion to reconsider was laid on the table.

VETERANS EDUCATIONAL AMENDMENTS ACT OF 1969

Mr. TEAGUE of Texas. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6808) to amend section 1781 of title 38, United States Code, to eliminate the prohibition against receipt of certain Federal educational assistance benefits, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6808

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "Veterans Educational Amendments of 1969".

Sec. 2. Chapter 34 of title 38, United States Code, is amended—

(a) by amending section 1673(a) to read:

"(a) The Administrator shall not approve the enrollment of an eligible veteran in—

"(1) any (A) bartending course, or personality development course, or (B) any sales or sales management course which does not provide specialized training within a specific vocational field; or

"(2) any type of course which the Administrator finds to be avocational or recreational in character unless the veteran submits justification showing that the course will be of bona fide use in the pursuit of his present or contemplated business or occupation.";

(b) by inserting in section 1673 at the end thereof the following new subsection:

"(e) The Administrator shall not approve the enrollment of any eligible veteran in an apprentice or other on-the-job training program where he finds that by reason of prior training or experience such veteran is performing or is capable of performing the job

operations of his objective at the same performance level as the journeyman in the occupation.";

(c) by deleting in section 1677(a)(1) after the word "license" where it first appears the following: "or must have satisfactorily completed the number of hours of flight training instruction required for a private pilot's license,";

(d) by amending section 1681(d) to read as follows:

"(d) No educational assistance allowance shall be paid to an eligible veteran enrolled in a course in an educational institution which does not lead to a standard college degree for any period until the Administrator shall have received—

"(1) from the eligible veteran a certification as to his actual attendance during such period or where the program is pursued by correspondence a certificate as to the number of lessons actually completed by the veteran and serviced by the institution, and

"(2) from the educational institution, a certification, or an endorsement on the veteran's certificate, that such veteran was enrolled in and pursuing a course of education during such period and, in the case of an institution furnishing education to a veteran exclusively by correspondence, a certificate, or an endorsement on the veteran's certificate, as to the number of lessons completed by the veteran and serviced by the institution,

except that the Administrator may pay an educational assistance allowance representing the initial payment of an enrollment period, not exceeding one full month, upon receipt of a certificate of enrollment.";

(e) by amending section 1682 by adding at the end thereof the following new subsection:

"(e) If a program of education is pursued by an eligible veteran at an institution located in the Republic of the Philippines, the educational assistance allowance computed for such veteran under this section shall be paid at a rate in Philippine pesos equivalent to \$0.50 for each dollar."

Sec. 3. Chapter 35 of title 38, United States Code, is amended as follows:

(a) Section 1712(a)(3) is amended by deleting the words "first occurs" immediately preceding "(A)" and inserting in lieu thereof "last occurs";

(b) Section 1712 is amended by inserting at the end thereof the following new subsection:

"(e) The term 'first finds' as used in this section means the effective date of the rating or date of notification to the veteran from whom eligibility is derived establishing a service-connected total disability permanent in nature, whichever is more advantageous to the eligible person.";

(c) Section 1723(a) is amended to read as follows:

"(a) The Administrator shall not approve the enrollment of an eligible person in—

"(1) any (A) bartending course, or personality development course, or (B) any sales or sales management course which does not provide specialized training within a specific vocational field; or

"(2) any type of course which the Administrator finds to be avocational or recreational in character unless the eligible person submits justification showing that the course will be of bona fide use in the pursuit of his present or contemplated business or occupation.";

(d) Section 1732 is amended by adding at the end thereof the following new subsection:

"(d) If a program of education is pursued by an eligible person at an institution located in the Republic of the Philippines, the educational assistance allowance computed for such person under this section shall be paid at a rate in Philippine pesos equivalent to \$0.50 for each dollar."

SEC. 4. Chapter 36 of title 38, United States Code, is amended by inserting at the end of section 1772 thereof the following new subsection (c):

"(c) In the case of programs of apprenticeship where—

"(1) the standards have been approved by the Secretary of Labor pursuant to section 50a of title 29 as a national apprenticeship program for operation in more than one State, and

"(2) the training establishment is a carrier directly engaged in interstate commerce which provides such training in more than one State,

the Administrator shall act as a 'State approving agency' as such term is used in section 1683(a)(1) of this title and shall be responsible for the approval of all such programs."

SEC. 5. Chapter 36 of title 38, United States Code, is amended as follows:

(a) by deleting section 1781 of subchapter II in its entirety and inserting in lieu thereof the following:

"§ 1781. Limitations on educational assistance

"No educational allowance or special training allowance granted under chapter 34 or 35 of this title shall be paid to any eligible person (1) who is on active duty and is pursuing a course of education which is being paid for by the Armed Forces (or by the Department of Health, Education, and Welfare in the case of the Public Health Service); or (2) who is attending a course of education or training paid for under the Government Employees' Training Act and whose full salary is being paid to him while so training;" and

(b) by deleting in the table of sections at the beginning of such chapter the following: "1781. Nonduplication of benefits."

and inserting in lieu thereof the following: "1781. Limitations on educational assistance."

SEC. 6. Section 504 of the Act of October 15, 1968, entitled "An Act to amend the Public Health Service Act so as to extend and improve the provisions relating to regional medical programs, to extend the authorization of grants for health of migratory agricultural workers, to provide for specialized facilities for alcoholics and narcotic addicts, and for other purposes" is hereby repealed.

SEC. 7. Section 506 of the Act of October 16, 1968, entitled "An Act to amend the Higher Education Act of 1965, the National Defense Education Act of 1958, the National Vocational Student Loan Insurance Act of 1965, the Higher Education Facilities Act of 1963, and related Acts" is hereby repealed.

SEC. 8. The amendments made by section 2(e) and 3(d) of this Act shall apply with respect to monthly education assistance allowances paid under chapter 34 or 35 of title 38, United States Code, for months beginning the first day of the third month after the date of enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. TEAGUE of California. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. TEAGUE) will be recognized for 20 minutes, and the gentleman from California (Mr. TEAGUE) will be recognized for 20 minutes. The Chair recognizes the gentleman from Texas.

Mr. TEAGUE of Texas. Mr. Speaker, the bill as reported directs the Administrator not to approve any bartending

or personality development courses, or any sales or sales management courses which do not provide specialized training within a specific vocational field. This is in line with existing authority which bars any type of course which the Administrator finds to be basically avocational or recreational in character unless justification is submitted showing that such courses will be bona fide within the pursuit of his present or contemplated business occupation.

Special attention was given by the subcommittee in developing the restrictions on sales management courses to make certain that all legitimate and bona fide courses of this type would be continued and that the Administrator would entertain submissions by any schools adversely affected which demonstrated that the majority of the enrollees in fact found employment upon the completion of this type of course and that the vocational objectives were and are being met. The committee recognizes the value of sales courses and recognizes the necessity of an individual selling commercial insurance to have a knowledge of sales and sales management techniques while at the same time needing a basic knowledge of insurance and the type of policies best suited to meet the needs of a prospective policyholder. The language included in section 2 of the reported bill in no way would interfere with any such legitimate operation.

The Administrator is also prevented from approving the enrollment of any eligible veteran in an apprenticeship or on-the-job training program where he finds that by reason of prior training or experience such veteran is performing or is capable of performing the job operations of his objective at the same performance level as the journeyman in the occupation.

The bill also amends section 1677(a) (i) by providing as a requirement for eligibility to take flight training, the possession of a valid private pilot's license and removing the alternative of satisfactory completion of the required number of hours of flight training required for a private pilot's license. This is believed to be a step forward in furthering the education and training of any individual who has a legitimate interest in taking valid training leading toward a commercial pilot's license.

For educational institutions below the college level, the Administrator is authorized to pay the educational assistance allowance representing the initial payment of a normal period not exceeding 1 full month upon receipt of the certificate of enrollment thus making the provision uniform with the provision which applies to individuals taking training at the college level.

In the case of individuals pursuing a course of education, both veterans and beneficiaries of veterans, in the Republic of the Philippines, veterans of the Commonwealth Army and the new Scouts, now receive the education assistance allowance computed at the rate of a Philippine peso equivalent to 50 cents for each dollar. The bill extends this provision to cover all other beneficiaries taking training in the Philippines, American veterans,

Philippine veterans, with service in the American forces and beneficiaries for the latter group, in order to establish a uniform policy.

Section 3 provides a slight liberalization of chapter 35 by substituting the phrase "last occurs" for "first occurs" for the period which ends 5 years after the Administrator finds that the parent from whom eligibility is derived has a service-connected disability permanent in nature, or the date of the death of such parent. A further liberalization is found in the new definition of the term "first finds" as being the effective date of the rating, or the date of notification of the veteran establishing service-connected total disability, whichever is more advantageous to the veteran.

Section 4 was suggested by the Department of Labor and provides that in the case of programs of apprenticeship where the standards have been approved by the Secretary of Labor pursuant to section 50a of title 29, United States Code, as a national apprenticeship program for operation in more than one State, and the training establishment is a carrier directly engaged in interstate commerce which provides such training in more than one State, the Administrator would act as a State approving agency for the approval of all such programs, for example, a railroad line has an apprenticeship program for machinists. The line operates between Chicago and San Francisco. The terms and conditions of apprenticeship are identical in each of the States through which the railroad line runs. It is possible that an apprentice will pursue his program in more than one State. Under the proposed amendment, the Administrator would act as a State approving agency for such an apprenticeship program for the entire line.

In the 90th Congress, section 504 of Public Law 90-574, which provided that an individual having a public health service grant and also being eligible for educational assistance provided by the Veterans' Administration, could enjoy both such grants. Similar provisions were included in section 506 of Public Law 90-575 which contained amendments to the Higher Education Act of 1965, section 5 provides a liberalization of the limitations role on receiving educational assistance by providing that an eligible veteran may receive educational assistance under chapters 34 and 35 of title 38, and in addition receive any other grants for which he may be eligible under other programs operated by the Federal Government except in two instances:

First, when he is on active duty pursuing a course of education which is paid for by the Armed Forces or by the Department of Health, Education, and Welfare, in the case of Public Health Service, or

Second, who is attending a course of education or training paid for under the Government Employees' Training Act and whose full salary is being paid to him while so training.

The Subcommittee on Education and Training held hearings on a number of bills seeking to make technical changes and improvements in the veterans and dependents education programs as set

forth in chapters 34 and 35 of title 38, United States Code. These hearings were held on March 25, 26, and 27, 1969. Testimony was received from representatives of the veterans organizations, the Veterans' Administration, and various educational groups representing trade, technical, and business schools. A representative of the National Association of State Approval Agencies also appeared.

Mr. Speaker, I want to express my appreciation for the activities and hearings which the Subcommittee on Education and Training, headed by the gentleman from California, the Honorable GEORGE BROWN, conducted in connection with the reporting of H.R. 6808. I also want to express my appreciation to all the members of this subcommittee who have contributed to the favorable action on this bill. In addition to the gentleman from California, the members are Messrs. THADDEUS J. DULSKI, WALTER S. BARING, W. J. BRYAN DORN, HENRY HELSTOSKI, ROMAN C. PUCINSKI, DON EDWARDS, EDWARD R. ROYBAL, Mrs. SHIRLEY CHISHOLM, Messrs. SEYMOUR HALPERN, JOHN J. DUNCAN, WILLIAM H. AYRES, WILLIAM LLOYD SCOTT, JOHN M. ZWACH, and ROBERT V. DENNEY. My thanks to each of them.

Mr. Speaker, I yield such time as he may consume to the chairman of the Subcommittee on Education, the gentleman from California (Mr. BROWN).

Mr. BROWN of California. I thank the chairman.

Mr. Speaker, this bill makes only one change of major significance in title 38 relating to veterans benefits. This has to do with the provision concerning duplication of benefits.

The major purpose of the bill is to permit a veteran to receive his educational assistance allowance from the Veterans' Administration and also any other grant or scholarship for which he may be eligible under another program. The only exception will be Federal employees and members of the armed services who are under full salary and have their tuition paid by their departments.

There are a number of other minor aspects which merely clarify, explain, or simplify existing provisions of law. These are fully set forth in the report. I do not believe I need to go through them in this explanation.

The main provision, as I have indicated, has to do with the duplication of Federal educational assistance benefits.

Mr. TEAGUE of California. Mr. Speaker, like the bill previously considered, this bill had the unanimous bipartisan and nonpartisan support of the Committee on Veterans' Affairs. Again I recommend that the House adopt it.

Mr. Speaker, I rise in support of H.R. 6808. This bill will eliminate the prohibition against the dual receipt of educational benefits under the GI bill and certain other Federal educational grants.

Under the language of the bill, the duplication bar would be limited to cases of persons on active duty with the Armed Forces or the Public Health Service whose education or training costs are being paid by the Federal Government, and cases of civilian Federal employees receiving education or training under

the Government Employees Training Act and being paid their full salary during that period.

In all other cases, the educational assistance allowance would be paid by the Veterans' Administration to an eligible veteran, whether or not he was a recipient of any other Federal educational grant.

Since many Federal grants are based upon financial need, the amount of the Veterans' Administration training allowance would be considered in determining the amount of the grant. Dual receipt of GI bill benefits and other Federal educational programs are currently permitted in some cases. This bill will permit all Federal educational programs to be treated in the same manner.

This bill, Mr. Speaker, also purposes to pay eligible persons pursuing education or training under the GI bill or the war orphans program at institutions located in the Republic of the Philippines, an allowance in Philippine pesos equivalent to 50 cents for each dollar. This will permit educational allowances to be paid at the same rate as compensation and pension payments.

Additionally, the bill will clarify the Administrator's authority to disapprove training in certain courses. It will require a private pilot's license as a condition to enrollment in flight training. It contains provisions that will facilitate the issuance of a veteran's initial monthly payment upon enrollment in a program of training under the GI bill.

Mr. Speaker, these amendments will strengthen the GI bill. I urge that the bill be passed.

Mr. HALPERN. Mr. Speaker, I rise to express my complete support for H.R. 6808. This bill will make a number of significant changes in the programs which provide educational assistance for our veterans and their dependents. In brief, the bill will have two primary results. It will tighten those provisions of law which have it as their objective to make certain that the money spent on educational allowances goes into that type of schooling or training which will really help the veteran pursue a serious educational or vocational goal. And, it will replace the present sweeping restriction which prevents a veteran from getting educational assistance from the Veterans' Administration and from any other Federal agency at the same time, with a more finely drawn limitation. This new limitation will continue to prevent the type of windfall which could discredit the program, but it will no longer blindly prohibit any sort of duplication of benefits.

I wish to commend the author of the bill, the distinguished chairman of the Committee on Veterans' Affairs, Mr. TEAGUE, and also its cosponsor, the chairman of the Subcommittee on Education and Training, for seeking, as they always do, to make a good piece of legislation better.

There have been few Federal undertakings which can even approach the reputation for success which our veterans' educational assistance programs enjoy. Yet, year after year, we have enacted legislation to strengthen and improve

these programs still more. And that is exactly what H.R. 6808 will do.

When the first GI bill was enacted in 1944, it did not contain any real restrictions on the type of training which would be covered. As a result, a number of abuses sprang up with some institutions providing courses that could only be described as frivolous. Over the years, Congress has enacted a number of laws to curb this sort of thing, and at least in general, we have been reasonably successful in doing so. Up to now, however, there has been some difficulty in drawing the restrictions in such a way that the Veterans' Administration will be able to disapprove courses which make no significant contribution to a veteran's vocational objectives without also proscribing courses which may be truly important to a veteran's career. H.R. 6808 attempts to overcome this problem by spelling out in some detail the types of courses which will not be approved while at the same time leaving room for certain exceptions if they can be justified. The bill also brings a greater degree of uniformity to the course disapproval provisions of the program for veterans and the program for war orphans and widows.

The other major provision of H.R. 6808 concerns a limitation which applies to both the veterans' and the war orphans and widows' programs. Under this provision an individual who is getting educational assistance under any other Federal program cannot receive the veterans' educational benefits to which he would otherwise be entitled. On the surface this seems like a good idea: indeed, that is undoubtedly why it is now in the law. However, this effectively excludes a number of veterans from federally funded fellowships or manpower training programs unless they are willing to forgo VA benefits. Thus, instead of having Federal programs working to complement each other we have them working at cross purposes. H.R. 6808 repeals this broad restriction against receiving veterans' educational benefits simultaneously with payments, however insignificant, under another Federal program. However, H.R. 6808 also recognizes that it would be wasteful and uncalled for to provide veterans' allowances to people drawing a salary as full-time Federal employees—either in the military or in the civil service—when the Federal agency employing them is also paying the full cost of their education. As a result, this type of duplication of Federal payments is specifically forbidden by the bill.

There are a number of other provisions in H.R. 6808 dealing with such varied matters as the rate of educational allowances in the Philippines and the approval of apprenticeship programs which cross the State lines. While I do not intend to discuss these in detail, I do want to point out that each and every section of H.R. 6808 represents an improvement in the GI bill, and should be favorably acted upon by this Congress.

Mr. SAYLOR. Mr. Speaker, I rise in support of H.R. 6808, principally because it liberalizes certain provisions of the

educational program for veterans, widows and war orphans.

First, the bill proposes to eliminate the prohibition against a so-called duplication of benefits. Existing law states that no educational assistance allowance under the GI bill shall be paid for any period during which a veteran is enrolled in and pursuing a program of education or course paid for by the United States under any other provision of law. Because of this language of the law, an Atomic Energy Commission fellowship, a National Science Foundation fellowship, participation in the U.S. Maritime Commission training program, and educational assistance under the Manpower Development and Training Act would serve to deny a veteran the benefits of the GI bill that he has earned by virtue of his military service. Inasmuch as qualifying criteria for these Federal programs differs considerably from the eligibility criteria for entitlement to the GI bill, it is unjust and inequitable to deprive a veteran who is fortunate enough to receive a fellowship in addition to earning entitlement under the GI bill from receiving the benefits of both programs. I believe the correction of this inequity is long overdue.

The bill would also authorize the release of the first month's educational allowance to veterans who are following an educational program below college level for the initial period of enrollment upon receipt of the certificate of enrollment. A veteran embarking on a program of education is usually uncertain as to how he will meet his expense when his initial payment of educational allowance is held up. Because of Government red-tape, it presents a financial hardship. This provision of H.R. 6808 will simplify the existing procedures and permit the prompt payment of the first month's educational allowance.

Finally, under the language of existing law, war orphans and widows, in certain instances, are denied the full period of entitlement to educational benefits for which they are eligible. This bill contains amendatory language which will assure all widows and all war orphans of the full period of entitlement intended by the law.

Mr. Speaker, I support this bill and urge that it be passed.

Mr. DULSKI. Mr. Speaker, I rise in support of H.R. 6808, which makes important and overdue revisions in the educational program for veterans, widows, and war orphans.

This program has proved its worth many thousands of times over the years and has been fundamentally a sound program. In the light of experience our committee has recommended some changes, with which I concur in full.

Many are the veterans in our Nation today who can thank their current station in life—their current vocation—for their assistance which they received through the GI bill in its changing versions over the years.

Today, we are proposing to tighten the law as it applies to certain courses of training in order to avoid abuses which have come to the committee's attention.

The bill also clarifies and defines more

specifically the ban on a veteran receiving educational assistance from another Federal agency at the same time he is receiving assistance from the Veterans' Administration.

Chairman TEAGUE of Texas has explained carefully in his outline of the bill the necessity for redefining this restriction.

Mr. Speaker, this is a timely bill which is the result of careful study and recommendation by our committee. I urge its approval.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Texas (Mr. TEAGUE) that the House suspend the rules and pass the bill H.R. 6808, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to extend their remarks on this bill, H.R. 6808.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas (Mr. TEAGUE)?

There was no objection.

DANGERS OF CENSORSHIP

(Mr. SIKES asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, all of my life I have been told of the dangers of censorship. It is prohibited by the Constitution of the United States under freedom of speech guarantees. It supposedly is anathema to every newspaperman and to every commentator. Yet we have in our country a tight censorship about which newsmen do not complain—indeed which some help to maintain and others tolerate. It is a censorship imposed by liberal elements of the press against conservatives in Government. This arbitrary and open denial by the liberal press of space in its columns to conservatives in Government applies, however, only to their constructive contributions. These are the things that almost never are mentioned.

On the other hand the liberal press claims the right to dredge up, manipulate, and edit for its own purposes any action by a conservative which might serve to place him in the unfavorable light, particularly with his constituents or his colleagues.

One of the worst example of this censorship can be seen in today's Washington Post where half of the editorial page is devoted to degrading the record of our distinguished colleague, the gentleman from South Carolina, the chairman of the Committee on Armed Services (Mr. RIVERS). In this entire half-page, there is not one word of mention of Mr. RIVERS' contributions to Government or his efforts in behalf of those who wear the uniform and their depend-

ents, efforts which were solidly backed by the overwhelming majority of his great committee. Nowhere is there reference to the fact that he displayed the initiative necessary to secure a more adequate pay scale for those in uniform, and that it was his leadership which insured for them the same pay increases that has been proposed for civilian workers; this despite the reluctance of both the administration and the Pentagon to concur—again, with the solid backing of his committee. There is no mention of the fact that it was Mr. RIVERS whose determination has helped to provide better living quarters and better working conditions for military personnel. It is not an inconsiderable item that he also took the lead in obtaining a substantial reduction in charter flight costs for overseas travel by servicemen and their dependents.

The greatly improved airlift capability which our Nation enjoys today stems directly from work which Mr. RIVERS initiated a number of years ago.

This is but a partial list of his contributions. As a result of the dedicated leadership of this one individual, morale in the armed services is incalculably higher than it would have been had his recommendations not been followed by the Congress, but the censorship of the liberal press is such that no one would realize it from reading their columns. This is a most unfortunate situation, an ill-conceived and unfair situation, and one which in time could result in an imposition of the very censorship which they love to protest.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from New York.

Mr. STRATTON. I want to commend the gentleman from Florida for his remarks. This appears to be a time when many individuals have expressed an interest in close and critical analyses of Government spending, particularly in the military field. The article that the gentleman in the well refers to this morning contained a completely inaccurate statement to the effect that the chairman of our distinguished Committee on Armed Services, the gentleman from South Carolina (Mr. RIVERS) had instructed me as chairman of the subcommittee presently investigating the Government Sheridan tank program to say nothing at all about that program. Not only is this report completely inaccurate, but the fact of the matter is that the chairman of the committee (Mr. RIVERS) himself directed our subcommittee to look into this costly billion-dollar program involving a tank that yet has to demonstrate its capabilities. Not only did he not suppress any report, he started the investigation and it has been a very complete one. I can assure the gentleman from Florida that in carrying through on the original directions of the gentleman from South Carolina (Mr. RIVERS), our subcommittee is certainly going to make a report, and I know it will be of great interest to the taxpayers of our Nation and to the Members of the House. Our investigative reports have never pulled their punches.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I yield to the distinguished gentleman from Missouri.

Mr. HALL. Mr. Speaker, I appreciate the gentleman yielding to me. I want to associate myself with his remarks. I doubt that such articles should be dignified by remark on defense. Certainly Chairman RIVERS needs none of the latter. I want to further state that the Committee on Armed Services is more fairly conducted and the most bipartisan committee dealing with the primary mission of defending our Nation, of any committee the other 40 Members and I have ever served upon. If our Nation fails to defend against aggressors there is little left for the liberal ideologist and internationalist.

To defend our chairman's participation in his efforts directed toward the defense of our Nation, I would much rather see our chairman tried in a court of merit, his peers on the military on any transgression he might make, if any; than in a court of public opinion written by those who traffic in yellow scandalism and dip their pens in gall.

Mr. HAGAN. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Florida.

I would like to say this—any man who has served on the Committee on Armed Services with Chairman L. MENDEL RIVERS knows beyond a shadow of a doubt that there has never been a man in the Congress of the United States who works harder for the preservation of this great Nation of ours than L. MENDEL RIVERS.

Mr. Speaker, I cannot find words to describe the shame that the author of such an article as appeared in this liberal Post this morning must feel.

There is no way to describe how ashamed they should be and I say that the editor and those associated with that paper who ascribe to that sort of thing should be ashamed of themselves and of this morning's Washington Post.

The SPEAKER. The time of the gentleman from Florida has expired.

CHAIRMAN L. MENDEL RIVERS

(Mr. PRICE of Illinois asked and was given permission to address the House for 1 minute.)

Mr. PRICE of Illinois. Mr. Speaker, I would like to state in connection with the remarks of the gentleman from Florida that the rules of the House Committee on Armed Services are almost exactly identical to the rules of every other committee of the House, and I know they are administered in our committee on a fair basis.

In the years that I have served on the committee, I have never known of anyone complaining that he was ignored on the committee.

There was some reference to a 5-minute rule on questioning. Of course, there is a 5-minute rule on questioning just as they have the same rule in almost every other committee of the House. That does not mean that a member is limited in questioning to 5 minutes. That means on his first time around he has 5 minutes. Then there is a second round

and perhaps a third. After this procedure, when the number of interrogators are reduced, members usually have full opportunity to ask any question that comes to their mind.

Members usually have unlimited time as long as no other Member has questions to ask.

I would like to bring this out—that the chairman has administered the rules of the committee with a high degree of fairness and, as the gentleman from Missouri stated, the Armed Services is a committee where we have little partisan friction and on which the rights of each member is fully recognized by the chairman.

Mr. DANIEL of Virginia. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I yield to the gentleman.

Mr. DANIEL of Virginia. Mr. Speaker, as a new member of the Committee on Armed Services, I should like to associate myself with the remarks of the gentleman from Florida.

It has been my experience to have served under many able chairmen as a member of the Virginia General Assembly—five in number—and I know of no man who presides with more fairness than the Honorable MENDEL RIVERS. It is a pleasure to serve under his leadership and I should like to say that the article which appeared this morning, so far as it pertains to new members, is completely and entirely inaccurate.

Mr. BENNETT. Mr. Speaker, the article about Chairman RIVERS in this morning's Washington Post gives the strong impression that the writer is not an enthusiastic supporter of the chairman; and I presume that since it is an editorial type piece, that it is not required to be factually accurate. However, for those who may read it for its factual content, it should not be accepted as speaking authoritatively.

For instance, consider how the article criticizes RIVERS for not appointing Congressman PIKE chairman of the investigating subcommittee, after Chairman Hardy retired. It is my understanding that chairmanships of subcommittees are allotted on the basis of seniority on the full committee, not on seniority on a subcommittee. If it were otherwise, I would have been chairman of the CIA subcommittee ever since 1962; and I have not yet become its chairman. Actually, there are three Congressmen senior to PIKE on the full committee after the retirement of Hardy and under the rules each of them would normally have become the subcommittee chairman prior to PIKE.

More important than the factual inaccuracies of the article is the total thrust of the piece to indicate that the writer feels that Chairman RIVERS puts parochial and personal advantage ahead of the interests of his country. I have served under Mr. RIVERS for many years and it is my opinion that this attack is thoroughly unjustified and not in accordance with the facts. I think he has done a magnificently good job for his country and deserves praise, not slurs. This same observation is valid for Mr. Blandford, also unfairly attacked by the article.

THE NEW ADMINISTRATION: SOFT ON SAFETY STANDARDS AND BALONEY

(Mr. KOCH asked and was given permission to address the House for 1 minute.)

Mr. KOCH. Mr. Speaker, the attitude of the Republican administration in the areas of consumer and worker protection are finally surfacing. I was shocked to read two items in the New York Times on May 17. One of them discloses that Secretary of Labor George P. Shultz has ordered a reduction in the proposed industrial health and safety standards which were designed by the prior administration to protect 6 to 8 million workers from noise hazards and lung damage caused by dust. The apparent reason for reducing the protection is that to comply with those recommended by former Secretary Willard Wirtz, of the prior administration, will cost the industries involved more moneys than they would like to pay. On the other hand, the U.S. Public Health Service has stated, that the reduction of these health and safety standards as proposed by the Nixon administration will result in a 50 percent increase in the incidence of pneumoconiosis—black lung—among miners exposed to coal dust.

Another illustration of the same indifference by the new administration to the health of the American public was the announcement on the same day by the Agriculture Department proposing that the hot dogs and cooked sausages which are sold by the billions in this country now be permitted to contain 33-percent fat instead of the 30-percent limit proposed last summer by the outgoing Johnson administration. Again, we must assume this was done to save the industries money.

I, too, am concerned about costs, particularly costs incurred by the Federal Government. But, I am more concerned about the health and safety of our citizens. Fortunately, in these matters there are no costs to the Federal Government. True, there would be costs to the industries but if we reduce the standards then it is the consumers and the workers of this country who suffer in their health and safety. Can there be any question but that this Congress should support the health and safety of our fellow citizens? We are witnessing what we expected but hoped would not occur: a greater concern by the new administration for the protection of property and business profits than for the health and safety of the people.

As I read the item in the New York Times which indicated the propensity of the new administration to add fat to the hot dog, it convinced me that our job to get the administration to get the fat out of the defense budget will be even harder.

NEW SAFETY AND HEALTH REGULATION

(Mr. HECHLER of West Virginia asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. HECHLER of West Virginia. Mr. Speaker, I share the concern of the gen-

tleman from New York about the dangerous effect of the order announced May 16 by Secretary of Labor George P. Shultz, promulgating new safety and health regulations under the Walsh-Healey Public Contracts Act. I am particularly disturbed at the establishment of the standard for respirable coal dust at 4.5 milligrams per cubic meter of air. In his statement accompanying the order, Secretary Shultz very cautiously proclaimed:

Overexposure to excessive coal dust is apparently a cause of pneumoconiosis, or "black lung."

I wonder why it was necessary for Secretary Shultz to employ that qualifying adverb, "apparently"?

I feel that Secretary's Shultz' decision is a victory for the big coal operators. This means that every coal miner will breathe 50 percent more coal dust than the standard of 3 milligrams per cubic meter recommended by the Surgeon General and the Public Health Service. It means also that there will be 50 percent more cases of pneumoconiosis, according to the Surgeon General's testimony this year, than the 3-milligram standard which the preceding Secretary of Labor promulgated in January of this year.

I think, Mr. Speaker, that it is about time we started setting these regulations to protect the health of human beings instead of the profits of the coal industry.

FLORIDA WORLD TRADE CONFERENCE

(Mr. ROGERS of Florida asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROGERS of Florida. Mr. Speaker, I recently had the pleasure of participating in the Eighth Annual Florida World Trade Conference, held this year in Palm Beach. Many distinguished State and National leaders attended and took part in the discussions which are so important to the American balance of trade as well as to our domestic market situation.

Two speeches in particular recalled the important part the State of Florida has played in opening up new markets for American goods abroad, and the ties of friendship which have also developed between the people of Florida and their neighbors in foreign countries.

I include the remarks prepared by Mr. John Lombardi, marketing services manager for Pan American Airlines, and the remarks by the distinguished Secretary-General of the Organization of American States, the Honorable Galo Plaza, at this point in the RECORD:

HOW AIRLINES CAN HELP EXPORTERS MARKET PRODUCTS OVERSEAS

(By John V. Lombardi)

Pan American Airways, being an international airline, is often invited to participate in programs related to world trade. Under normal circumstances my opening comment would be, "I am delighted to be part of The Eighth Florida World Trade Conference, representing Pan American Air-

ways". In all honesty I must admit that the genuine pleasure of our participation is the fact that we are in Florida. As many of you probably know, Pan Am was born in Florida some 40 years ago, when our first flight operated between Key West and Havana.

I hope the theme, of your conference "Florida Grows As World Trade Grows," is not misinterpreted by the Florida business community. Business growth does not come about by osmosis. I am sure this theme is not intended as an assumption that the growth of world trade will automatically benefit Florida. A true analysis of success in any endeavor will show a high degree of input in the areas of research, creativity, talent, initiative, and above all relentless effort.

There are some obvious ways in which the airlines help companies market products overseas. The availability of transportation facilities in itself is a catalyst that encourages businessmen to investigate, sell and ship to foreign markets. But there are a number of other areas where the airlines can and do help to stimulate successful international marketing, and I hope, as we discuss them, you will be able to relate them to your own areas of interest.

With your permission, I will limit my discussion to Pan Am in order to deal with specific rather than general areas.

Back in January 1961, in response to the concern of our government in relation to the United States balance of payments situation, Pan American initiated a trade development program called "Worldwide Marketing Service". In the implementation of this program, we offered the American business community the opportunity to investigate the possibility of selling their wares overseas. There are two ways in which the service is rendered.

The first and most direct method is where a company has a specific market area in mind. As an example let's take a United States manufacturer of widgets used in the building trade. The marketing executive has heard that there is a considerable amount of construction in the planning stage in Thailand. He'd like to sell his widgets through a distributor in the area, but how does he find a distributor calling on this trade who has the capability to service the product after it is sold? When he contacts Pan Am's Worldwide Marketing Service in his area, we take his product catalogues and send them together with his description of the type firm he is seeking, to our office in Bangkok. In our day to day airline operation in Bangkok, as in the rest of the world served by Pan Am, we accumulate a substantial amount of commercial intelligence in the area. In most cases, our local office not only knows a number of firms who may qualify as distributors, but knows the executives of the firms. The brochures and information are shown to the prospects and their degree of interest is relayed back to the Pan Am office which originated the request. At this point it is suggested that the United States manufacturer correspond or negotiate directly with the firms that have expressed interest, and Pan Am steps out of the picture. We also make it quite clear to all companies involved that our arrangement of introduction does not constitute endorsement of a firm or a product and credit and reliability investigations are not Pan Am's responsibilities. This same procedure would be applied in the instance where a firm was seeking a source of supply rather than a market area.

The second method of assistance is through a monthly magazine published by Pan Am called, "Worldwide Marketing Horizons". One section of this magazine called Worldwide Marketing Opportunities, lists products being offered or sought throughout the world. When a firm is relatively new in export and they are seeking representation in many areas of the world, we offer them a complimentary listing in "Worldwide

Marketing Horizons". This little magazine is published in seven languages and distributed at no charge to some 193,000 businessmen throughout the world. (I've brought a small supply of them with me for anyone interested).

As an extension of our Marketing Service, we will arrange international business trips to include appointments and contacts in desired cities and countries.

Our office is also involved in other activities which offer direct support to the potential exporter. These include trade workshops and seminars; trade missions to foreign countries and various trade information publications.

One of our recent guides is entitled "The Kennedy Round And You". In order to inform the business world of the significant results of the recent GATT negotiations, and how the scheduled reductions affect their specific products, Pan American, in cooperation with the United States Department of Commerce, published this booklet.

The "Kennedy Round And You" signifies a substantial step forward to the day when businessmen will enjoy free trade. With our enormous GNP and inexhaustible variety of manufactured goods, a non-tariff system worldwide would be an automatic windfall for the American businessman.

Two recent aviation developments give promise that Florida's airborne trade with other parts of the world will increase appreciably in the next few years.

One is the new 747 airliner. Pan Am will be the first airline in the world to put this 362-Passenger giant into service late this year. Eleven years ago the jet revolutionized marketing and distribution techniques. People used to consider geography as being measured in distance. Today air shippers regard geography as representing time. The 747 brings this concept closer to home. The 747 has an amazing capacity for transportation of cargo in addition to passengers and mail. With a full load of passengers and their baggage, this airplane, additionally, can haul some 20 tons of cargo. With this kind of fast-delivery, mass capability, I am confident that Florida manufacturing firms and growers will find their horizons widened in terms of new markets in Europe and Africa in addition to their traditional Latin American and Caribbean markets.

One question that shippers quite properly always ask is, "What will the 747 do to cargo rates?" Our studies indicate the 747 will be more economical than today's jets in direct operating costs. When we first began considering the 747, we were hopeful the operating economies would permit lower passenger fares and cargo rates.

Now we are not so sure, however, with inflation rampant, if we can keep cargo tariffs at their present levels, we have in effect provided shippers with reduced rates. To put it another way, you can be sure that cargo rates in the future will be lower than if the 747 hadn't come along.

The second aviation development is the direct Florida-London air route which will be inaugurated on or after January 1, next year and for which Pan Am has been recommended by a Civil Aeronautics Board Examiner. This single-carrier direct service will open vast new vistas for Florida shippers, particularly for high-value, perishable commodities such as your winter crops. It will mean, for example, gladioli can be cut in a field at Fort Myers today and be on the market in London tomorrow. This would also apply to other produce items and the many manufactured products such as wearing apparel, appliances, cosmetics, etc., which also can be considered perishable because they are modified and improved so often as a result of research and development. In fact, advanced technology is one of the reasons that approximately fifty percent of what we carry

as air freight today wasn't even invented five years ago.

Florida shippers are among the most air-minded in the nation, probably because of the state's long history as the air gateway to Latin America. Florida has already made significant penetration of the European market. Surveys indicate that today there are some 75 to 80 firms in Florida engaged in business in the United Kingdom alone. Studies made by the Florida Commissioner of Agriculture, Mr. Doyle Conner, show that in 1967 products worth more than \$1,200,000 were exported by air from Florida to Europe. It is Commissioner Conner's opinion, (and one in which I heartily concur), that Florida commodities will be moving to Europe in much greater quantities with the opening of the direct Florida-Europe flights.

At this point I would like to share a remarkable statistic with you. In 1967, 18,000 additional jobs were created in the state of Ohio as a result of an additional 100 million dollars worth of export sales. This is three times the national average when compared with employment created from increasing domestic production. So, exporting benefits the businessman, and the state vis-a-vis the generation of new jobs and tax monies for school and community use.

We, in Pan Am, of course, hope that the Civil Aeronautics Board and the White House will concur in the examiner's choice of Pan Am over eight other airlines to fly the Florida-London route. I am prejudiced, naturally, but I am confident that Pan Am will be an ideal partner in progress with Florida in enhancing the state's trade and tourism. Pan Am alone can funnel into Florida trade and tourism from both London and all of Europe, and from Latin America en route to Europe.

Year after year, Pan Am has spent more to encourage inbound United States travel than any other organization, government or private. Last year that amount was \$24,500,000. Needless to say, we would look forward to the promotion of "Visit Florida" in connection with this new direct service.

In conclusion, each of these items that I've mentioned really add up to the fact that internationally, things are changing. Advances in economics, communications, and transportation are rapidly leading us to a "one market world." A favorite expression goes: If you have been doing something the same way for two years, it must be re-examined. But if you have been doing something the same way for five years, it is undoubtedly wrong. The real challenge to the Florida businessman is, will he capitalize on these new opportunities, or will he wait five years to find he is doing something wrong?

THE POSITIVE SIDE OF ECONOMIC NATIONALISM IN LATIN AMERICA (By Galo Plaza)

I want to congratulate the organizers of the Florida World Trade Conference for their astuteness and timing in having suggested that I speak on "Economic Nationalism in Latin America." There are few topics of such vital interest to each and every one of us . . . and few topics so delicate for an international official.

To be truthful, I welcome the opportunity to talk with you about economic nationalism, which is perhaps the most dynamic force at work in Latin America today. I believe it is a force which is much misunderstood in the United States. And I further believe that unless the people of the United States clearly see exactly what is involved, we run the risk of doing serious damage to the inter-American relations.

In recent months, the United States press has reported quite extensively on the rise of economic nationalism in Latin America. Most

of the reporting—understandably—has been somewhat alarming to American businessmen, dealing as it does with the possibility of expropriation of U.S. interests, and with a day-to-day rise of American and Latin American tempers over some serious differences. In short, the United States press—again let me say, understandably so—has largely presented economic nationalism as a negative force that threatens to undermine inter-American solidarity.

The truth of the matter is that as a general rule, Latin American governments are deeply aware of the need for foreign investment. They know that the development of the region is hastened or retarded to some degree by the rate of flow of such investment. Under appropriate controls, and with the proper mix between local and external capital, they are quite happy to see the foreign investors step off the plane.

Foreign investment is a prime source of risk capital for Latin America. This is a type of financing not available from public sector sources, either foreign or domestic. Foreign investment brings with it a generous measure of management know-how and advanced technology—the accumulated techniques and skills of modern industry. Another advantage is the foreign investors' ready access to markets outside the country.

On the other hand, Latin American governments are also well aware of the inherent shortcomings of private foreign investment. It is sometimes an expensive source of financing. It usually flows into the sectors or the particular countries where profit opportunities are best, often creating an uneven "bunching" of foreign investments. Moreover, private foreign investment is not likely to move into basic infrastructure projects.

It is also true that the foreign investor may not always identify his own interests with those of the country in which he operates. In the case of balance of payments problems back home, for example, he may have to repatriate profits in large doses, without reference to the balance of payments problems of the country in which he is located. He may be loath to compete with other foreign firms, or more specifically, with branches of his own firm in other countries.

Understandably, the foreign investor thinks first of profit potential and, secondarily of development potential. But for many Latin Americans, the measure of worth of foreign investment is precisely what it does for the economic and social development of their country. Under the new nationalism, only the foreign firm that is able to contribute to economic progress and help promote healthy social change is wanted. This means primarily the market-oriented enterprise. The firm that exploits a nation's resources without reference to the objectives of the country and the will of the people is unwelcome, not for being foreign, but for being insensitive to the local desire for reform and development.

Latin Americans feel the direct and indirect influence of U.S. business at every turn. An American reporter (John M. Goshko in *The Washington Post*, March 9, 1969) recently observed that "In some countries if a man is of the upper middle class . . . he is apt to drive to work in a car manufactured or assembled in an American-owned plant . . . In the evening, he will probably relax in front of an American-made television set or go to see an American film released by an American distributor. . . . Whatever the worker grows or refines, at some stage it will pass through a machine or process invented by American technology and brought in by American business. If the product is exportable, chances are that its ultimate sale will take place in the American market."

Some time ago, Thomas J. Watson, Chairman of the Board of the International Busi-

ness Machine Corporation, noted that the "United States is the largest off-shore investor in world history." If American branches and subsidiaries overseas were to form a nation, he said, "its gross national product would rank third in the world, following the United States and the Soviet Union."

District private investment by American business in Latin America comes to slightly more than \$10 billion. It is estimated that U.S. firms now produce one-third of all Latin American exports, contribute some 20% of total fiscal revenues, and account for nearly one-tenth of the \$100 billion gross product of the region. And the rate of American investment in the region is rising steadily.

Present day economic nationalism in Latin America, with its concern for national development and for social reform, is a far cry from xenophobic isolationism. Indeed, the new nationalism is distinguished by its regional spirit. For another of its goals is the establishment of a viable, regional Latin American economy, managed by Latin Americans, for the benefit of Latin Americans.

Unfortunately, it is all true that many Latin Americans look upon all foreign business, and on American business in particular, as allied with the entrenched status quo. They see a panacea for most of their ills in the end of economic domination by corporate giants. The best antidote for this type of resentment is effective cooperation by the foreign investor with Latin American nationalists who are working for development and reform.

There are a number of models on which effective cooperation by U.S. business in Latin America can be patterned. There is no single answer to the meshing of a score of countries and literally hundreds of separate business firms.

More than 20 years ago, my good friend Nelson Rockefeller created the International Basic Economy Corporation as a means of pioneering new ideas in Latin American investment. IBEC's main purpose was to stimulate private enterprise in certain areas deemed critical to national development. Many of these areas have been incorporated into national development plans, proving the essential far-sightedness of the Rockefeller approach.

Today, IBEC operates in such widely diverse areas as the development of supermarkets, banking, and the production of machinery for the chemical processing industry. Its branches can be found from Brazil to Puerto Rico. It has never been a big money-maker, but it has always been long on social awareness. It makes less than one per cent profit on its total assets and pays three times as much taxes in Latin America as in the United States.

If the low-profit example of IBEC doesn't commend itself to all American businessmen, there are countless firms that have made excellent profits while establishing solid economic and social ties in their host country. They buy all the goods they possibly can from local sources, hire local personnel and promote them to high executive positions.

Another model, perhaps even more pertinent to Latin America's mood today, is the ADELA Investment Company. The brainchild of Senator Jacob K. Javits of New York, ADELA is a multinational private investment company, founded on the principle that when capital comes from many countries, it loses its national identity. ADELA attracts investment not only from the United States, but from Latin American and European countries as well. And it channels its investments into projects that have a distinct multinational potential. In the past three-and-a-half years, ADELA has funneled \$800 million worth of multinational capital to Latin America.

This is of crucial importance, for the fu-

ture of Latin America lies in the economic integration movement and in the development of the private sector along multinational lines.

For the foreign investor, the message should be clear: the brightest opportunities lie in multinational joint ventures with Latin American participation.

It is no accident that a best-selling book in Latin America is *The American Challenge* by the French author, Jean-Jacques Servan-Schreiber. The Frenchman is an unabashed admirer of the giant American corporation which operates in Europe. He is impressed by its size, its efficiency, its managerial talent and its technology. But he is also worried. For he sees such American firms far outstripping European firms and eventually eliminating them from any hope of competition.

European business must make a determined effort, says Servan-Schreiber, to create its own corporate giants, even if it must do so through political union. The main beneficiaries of the European Common Market so far have been the American corporations which have seen the potential offered by economic integration and have seized on its vastly expanded markets.

Latin America is now engaged in an all-out effort to create its own economic integration movement. At the Summit Conference in Punta del Este two years ago, the Presidents of the American nations pledged to have a common market in substantial operation by 1985. That target date is overly enthusiastic, but I for one believe that the movement toward regional economic union is inexorable. And I further believe that for Latin America to assure that the vastly expanded market serves the true economic and social interests of the people of the region, it is necessary to create efficient multinational business corporations, jointly owned and jointly controlled by Latin American and foreign capital.

Without such multinational corporations, it will be exceedingly difficult to achieve integration . . . or development . . . or social justice for our people. For if mighty Europe cannot compete with you Americans, except on the basis of the multinational corporation, how can we Latin Americans hope to do so with our still less developed industrial base?

Economic nationalism, if properly channelled, can drive this hemisphere to still greater heights of self-discipline and self-help. It challenges the foreign investor and the national government to seek new means of accommodation and understanding.

It would be a tragic error to permit this force to degenerate into hatred of all things foreign. It would be equally tragic to try to understand it in terms of an "image problem" for U.S. business.

So long as there are vast areas of poverty in this hemisphere, there will continue to be discontent, frustration and anger. The greater the gap between the United States and Latin America in affluence, the greater will be the gap in understanding. So long as a foreign corporation, by its huge size and awesome economic power, raises the fear of domination in the Latin American mind, it will be seen as a threat to national interests, and it will come under suspicion and open attack.

Latin America is marching boldly and confidently along the road of economic and social progress so that a hundred million of men, women, and children, now victims of poverty, ignorance, and disease, may enjoy the abundant and satisfying life that is their God-given right. The road is long, and not without hazards, but it is also wide—wide enough for men of good will in business and government throughout the Americas to walk shoulder to shoulder, resolving their differences and working together for the common good.

THE GREAT PLAINS CONSERVATION PROGRAM

(Mr. MIZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MIZE. Mr. Speaker, today's Consent Calendar includes H.R. 10595, a bill extending and expanding the Great Plains conservation program.

This legislation is extremely important to the 10 States in the Great Plains region, for it provides an opportunity for farmers and ranchers to enter into long-range conservation projects through contracts for cost-sharing with the Federal Government.

In the 10-State area, only 43 million acres of cropland and 91 million acres of rangeland have treatment adequate to protect the land from the ravages of wind and water erosion. There are still 67.5 million acres of cropland and 124 million acres of rangeland which must be protected.

Farmers and ranchers have a public responsibility to all Americans to insure the future productivity of our richest resource: our bounteous and generous soil. But farmers and ranchers simply cannot afford the high cost of proper conservation measures—without the assistance provided by the Great Plains conservation program, millions of acres of valuable land will be lost to marginal productivity, increased erosion, and destruction.

Mr. Speaker, I am particularly pleased with the legislation before us. As cosponsor of H.R. 10595, I am pleased to report that the legislative history of this bill, through exchanges between Chairman POAGE of the Agricultural Committee and representatives of the U.S. Department of Agriculture, clearly provides for expansion of the Great Plains conservation program to additional counties not now permitted to participate in its benefits.

Let me make my position very clear: The administrators of the Great Plains conservation program at the Department of Agriculture will, upon passage of H.R. 10595, be permitted to review the need of each and every county in the 10-State region. Should counties now excluded from participation demonstrate positive need for conservation assistance, the Department will have complete freedom, subject to budget limitations, to extend the benefits of the program to new counties, new farms, and rangeland.

As the immediate needs of the participating counties are met over time, funds and administrative talent will become available in increasing amounts to attack the problems of counties heretofore ineligible for participation.

Our experience with Great Plains conservation program since the 1950's has shown us that there is no better investment for the Government than soil and water conservation. Billions of dollars of future production potential has been protected with a Federal expenditure of less than \$120 million. Such economics reflect great credit upon the Department of Agriculture and the Congress.

Mr. Speaker, I urge all Members to

support H.R. 10595, for this legislation represents some of the finest work that the Congress can perform, for the benefit of all Americans.

FEDERAL JUDGES SHOULD BE RE-CONFIRMED EACH 6 YEARS

(Mr. DICKINSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKINSON. Mr. Speaker, I am today introducing legislation which I sponsored in both the 89th and 90th Congresses. This proposed constitutional amendment would require that Federal judges be reconfirmed by the U.S. Senate every 6 years. Any Federal judge not reconfirmed by the Senate would be required to vacate the office and retire, if eligible.

In order for one to be a U.S. district judge, a circuit court judge, or a Justice on the U.S. Supreme Court, he is nominated by the President and confirmed by the Senate. Although extensive investigations are conducted, once a Federal judge is confirmed, the job is his for life and he is answerable to no one. Even though a Federal judge may become incompetent or senile or may behave immorally, unless he decides to retire, there is no machinery available for his removal unless he has committed a crime for which he can be impeached.

I believe Members of the House of Representatives are familiar with the difficulties involved in the impeachment process. It is so cumbersome and impractical that only four Federal judges have been removed from office by impeachment in our Nation's history.

Mr. Speaker, the unfortunate chain of events surrounding a U.S. Supreme Court Justice in recent months convinces me that the constitutional amendment I am proposing is needed. Had former Supreme Court Justice Abe Fortas not resigned his office, the only recourse available to the people of the Nation would have been the demand that the Congress initiate impeachment proceedings.

I am not charging Mr. Fortas with the commission of a crime, for the complete information about his business dealings is not available to me. As a matter of fact, his explanation of his actions—if facts support his contentions—indicates that no criminal action took place. In my opinion, however, his actions were injudicious, to say the very least, and violated canons of accepted activities of Federal judges.

Therefore, Mr. Speaker, it appears unlikely, from my point of view—based on information given to the public—that sufficient support could have been mustered to successfully push through an impeachment resolution in the House and obtain the necessary two-thirds vote in the Senate to remove Mr. Fortas from office, even though his private dealings indicate to me that he did not conduct himself in accordance with accepted standards for Supreme Court Justices.

The constitutional amendment I am proposing would provide us with some measure of control over the activities of

the members of the Federal judiciary. Everyone should be answerable to someone else, Mr. Speaker, and I believe that Federal judges should not be excluded.

THE LATE DR. ABRAHAM VEREIDE

(Mr. TALCOTT asked and was given permission to address the House for 1 minute.)

Mr. TALCOTT. Mr. Speaker, as President of the House Prayer Breakfast Group, it is my sad responsibility to inform the House of the death of Dr. Abraham Vereide.

I say sad only because Dr. Vereide died much too soon, even though he was 82 and lived a wonderful, complete, and productive life.

Dr. Abraham Vereide, who was a Methodist minister and a founder of International Christian Leadership, to promote prayer breakfasts, died Friday at Montgomery General Hospital after a heart attack. He lived at 3360 Chiswick Court, Silver Spring.

Born in Norway, Dr. Vereide came to the United States in 1905 with 10 cents in his pocket. He worked for railroads and mines in Montana before gaining admission to Northwestern University's Garrett Theological Seminary.

He was ordained a minister in 1908 and was a pastor between 1910 and 1935 in Kenosha, Wis., Spokane and Seattle, Wash., Portland, Oreg., and Boston, Mass. He became an American citizen in 1913.

Between 1921 and 1924 he was superintendent of the Pacific Northwest District of the Norwegian-Danish-Methodist-Episcopalian Church. He established a Goodwill Industries branch in Seattle during the 1920's and was associate general superintendent for Goodwill in Boston from 1931 to 1934.

With a group of 19 business executives, Dr. Vereide in 1935 founded the prayer breakfast group in Seattle—a movement aimed at cultivating Christian leadership in government, business, education, and other professions.

In 1941, Dr. Vereide came to Washington and met with Members of Congress at the Willard Hotel. The result was the formation of separate Senate and House breakfast groups which meet once a week while Congress is in session.

The meeting also led to International Christian Leadership presidential breakfasts, held at the opening of Congress each year. The group also holds breakfast meetings for Governors, mayors, and professional groups around the world. Dr. Vereide was executive director emeritus of the organization at the time of his death.

His wife, Mattie B., died January 30. Friends may call at Fellowship House, 2817 Woodland Drive NW., from 2 to 8 p.m. today. Burial will be private.

A memorial service will be held at 11 a.m. Tuesday at the Fourth Presbyterian Church, 5500 River Road, Bethesda.

Mrs. Talcott and I join many others in extending our condolences to Dr. Vereide's family and also in expressing our gratitude for his great leadership while living.

HEARINGS ON STUDENTS FOR A DEMOCRATIC SOCIETY

(Mr. ICHORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ICHORD. Mr. Speaker, the House Committee on Internal Security will very shortly begin public hearings on activities of the Students for a Democratic Society.

A full-scale field investigation of the organization was launched by the committee staff on March 6, when committee members met and authorized such an investigation as the first step in an in-depth study of revolutionary violence in the United States. No public announcement of the specific object of the committee's interest was made at that time, however, in order that the inquiry could go forward in an orderly and expeditious manner.

Last week, the members of the committee unanimously approved the holding of public hearings at an early date. It is my intention to schedule the initial public hearings the first week in June.

Most of the violence being reported from college and university campuses is being attributed to the Students for a Democratic Society. And we apparently are not going to have any surcease, if SDS leaders have their way.

Even graduation ceremonies in our Nation's universities and colleges represent opportunities for violence and disruption, according to a national officer of SDS.

At a recent news conference Bernadine Dohrn, national interorganizational secretary of SDS, reportedly declared that the SDS "presence will be known at graduation ceremonies where the big people will come as speakers." "It will be more than just a walkout from the ceremonies," she threatened.

As for SDS' summer vacation plans, Miss Dohrn offers the chaotic prospect of SDS members working in the neighborhoods and fighting "police invaders if we have to."

Miss Dohrn's news conference was reported in the New York Times of May 14, 1969, and I ask permission to insert the article at this point in my remarks.

[From the New York Times, May 14, 1969]

SDS PLANS DISRUPTIONS AT GRADUATION CEREMONIES

CHICAGO, May 13.—The Students for a Democratic Society plans disruptions at university and college graduation ceremonies. Bernadine Dohrn, national interorganizational secretary, said today.

"Our presence will be known at graduation ceremonies where the big people will come as speakers," she said at a news conference. "It will be more than just a walkout from the ceremonies."

Miss Dohrn said S.D.S. "will work with kids in the neighborhood that fight the police invaders when we have to" this summer.

"We will go around the country wherever the rich people go—like Rockefeller, Nixon, and Kennedy," she said.

WEST HIGH SCHOOL PUPILS EXPRESS ANXIETY OVER POLLUTED LAKE ERIE

(Mr. FEIGHAN asked and was given permission to address the House for 1

minute, to revise and extend his remarks and include extraneous matter.)

Mr. FEIGHAN. Mr. Speaker, the House of Representatives recently passed the Water Quality Improvement Act of 1969, designed to protect public waters from pollution by oil, sewage, and other matter, and authorizing grants for water-quality research and education.

The quality of our waterways is a matter of deep concern to me and I have continually supported legislation to improve our antipollution efforts.

Clevelanders are equally enthusiastic over steps to upgrade our water quality as their recreational pursuits are directly affected by the quality of Lake Erie. The citizens of Cleveland recently approved a \$100 million bond issue to improve the water quality of Lake Erie and their interest has succeeded in influencing their youngsters to express a similar concern for the appallingly polluted condition of the lake.

Mr. Speaker, 41 ninth-grade pupils from West High School have written to express their anxiety over the polluted conditions of Lake Erie. These teenagers are worried that the level of pollution content in Lake Erie will continue to increase with no immediate remedial measures emanating from the Federal Government. They are disturbed by the offensive aromas rising from the contaminated waters. Finally, Mr. Speaker, they are angry that they are prohibited from enjoying the benefits of a once popular lakefront beach for swimming, boating, and other pleasurable water sports.

These alert young people are anxious to know why additional Federal moneys cannot be expended to solve the pollution problem. "Why," they ask, "cannot taxpayers' money be utilized to clean up the lake?" And, "Why," they continue, "cannot the taxpayers' money be used to provide more beaches?"

These high school students are distressed that more action on the part of the Federal Government has not been taken in solving the serious national pollution problems. They have thoughtfully outlined their grievances, made some astute observations, and asked some very pertinent questions. In these difficult times of student unrest and discontent, these young people have taken the initiative to become involved in a cause of deep concern to them. They have prudently expressed their views on a vital local and national issue and, hopefully, their judicious attention to this problem will generate similar expressions of concern from other citizens, young and old alike.

I have advised the students from West High School of my cosponsorship of an amendment to the Water Quality Improvement Act, providing for a Great Lakes water-control demonstration project to develop techniques to remove polluted matter and abate new pollution. This amendment was adopted by the House and will be considered by the Senate along with the Water Quality Act. It is my sincere hope that the amendment receives Senate approval, as the Great Lakes are in desperate need of revitalization. Antipollution efforts will be severely handicapped if this amendment is not

enacted. A genuine commitment to clean water is badly needed if we are going to accomplish the goals desired by the students from West High School and concerned citizens across the Nation. Now is the time for all people to become involved in the massive attempts at pollution prevention so necessary for the future of our national waterways.

Mr. Speaker, I would like to mention the names of these young students from West High School who have been so diligent in carrying out their civic responsibilities.

The names of the 41 students from West High School follow in alphabetical order:

Donna Beukema, Dave Bodzioney, Kathleen Casey, Nancy Conroy, John Costanzo, Karan Casto, Terry Cox, Roger Cozort, Ray Early, Richard Gregg.

Debbie Harowski, Jerry Hessler, Tom Hiltaychuck, Edward Homan, Mathie Hunley, Wayne Hunt, Loretta Hylton, Danny Jones, Elanora Kiss, Richard Kopchick.

Lilly Laich, Oscar Lee, Pat Maglionice, Margaret Martin, Monajean Miller, Ira Moore, Greg Osborne, Doug Paus, Janet Penttila, Dwight Peto, Kathy Puskas.

Gary Rittbuger, Barbara Robinson, Jerry Shanis, Nancy Spelic, Susan Springer, Marion Tate, Betty Taylor, Lynn Terry, Faye Thompson, David Tainer.

ARMS CONTROL TALKS WITH SOVIET UNION SHOULD HAVE HIGHEST POSSIBLE PRIORITY

(Mr. BINGHAM asked and was given permission to address the House for 1 minute, to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, early last week I announced my intention of introducing a resolution urging that the President accord the matter of arms control talks with the Soviet Union the highest possible priority, and urging that the further testing of the very unsettling new weapons system known as MIRV be deferred until every effort has been made in the arms control negotiations to achieve a mutual freeze of the further development of such weapons systems.

I am happy to say I have now been joined by 25 cosponsors and am introducing the resolution today on a bipartisan basis.

MIRV is a new concept in nuclear weapons systems. Not only will a single MIRV missile be able to carry a number of nuclear warheads, multiplying the total number of warheads that might be delivered upon an enemy. But, in addition, each of the warheads of a MIRV missile will be capable of hitting a different target—each target many miles from the other targets hit by other warheads from the same MIRV missile. Perfection of such a system would produce a quantum jump in our ability to deal destruction, as well as in the destructive capacity of any potential enemy who might develop a similar system.

According to the Secretary of Defense, both the United States and the Soviet

Union are developing MIRV systems. Neither side has operational MIRV's at this time. But the Russian SS-9 and our own Minuteman III and Poseidon missiles are explicitly designed to deliver MIRV's.

To my mind, testing the MIRV constitutes the prelude to a dangerous escalation of the arms race—an escalation that has virtually escaped careful congressional attention. We have been rightly attentive to the implications of the proposed ABM system, but in our concern we have ignored a weapons concept that promises to have perhaps even more unsettling effects on our current rough world strategic balance and on hopes for effective arms control.

President Nixon has announced his intention to work for United States-Soviet arms control talks beginning this summer. I firmly support those projected efforts, but I fear that our MIRV testing puts the talks in jeopardy before they even begin.

Our current MIRV testing program promises to bring this advanced system to the operational stage in the relatively short-term future. Whether or not that occurs before or at about the time we propose to get arms control talks underway with the Soviets, there is the undesirable possibility that the Soviets might come to believe that our MIRV system has reached the operational stage. Therefore, by pressing for a major breakthrough in offensive weaponry, as we are by our MIRV testing program, we will erect a new stumbling block to the convening of arms control talks and a new and more difficult item for the agenda should such talks get underway.

Should the Soviets conclude, on the basis of their monitoring of our MIRV tests, that our system is operational, they could easily use that conclusion to justify refusing to negotiate until their own MIRV system is operational. By continuing MIRV testing, we might indirectly force the Soviets and ourselves to escalate, rather than to suspend, the arms race.

In addition to strangling projected arms control talks, perfection of MIRV's will make future arms control agreements much more difficult—if not practically impossible—to hammer out. We have developed satellite surveillance and inspection techniques which can take reliable inventories of missile sites and ICBM capacities. But satellite pictures cannot reveal the numbers of warheads clustered on a single booster, or the scattering of targets toward which those warheads might be directed. If we and the Soviets introduce MIRV's into the international strategic equation, arms control agreements will simply have to include on-site inspection.

Mr. Speaker, I need not remind the Members of the House of the effect the question of on-site inspection has had on earlier arms control talks. The question of on-site inspection ruined prospects for arms control in the fifties. Our hopes for the upcoming negotiations are founded on the fact that unobtrusive inspection by satellite is now both a possible and potentially adequate means of insuring

compliance with arms control agreements. Any development that necessitates on-site inspection will set arms control talks back severely, if not irredeemably.

We can afford to suspend testing for 2 or 3 months, until the talks get underway, as I sincerely hope they will. The evidence indicates that we are already ahead of the Soviets in MIRV development. According to Secretary Laird, we are now testing our Poseidon and Minuteman III systems. The Soviet multiple warhead test reported by Secretary Rogers on April 21, 1969, was not a MIRV, but a MRV—multiple warheads not independently targeted.

I wish to emphasize that I am not suggesting in this resolution that we scrap the MIRV, or that we abandon our MIRV development efforts and leave that field to the Soviets.

Any halt to our testing should be temporary unless and until the Soviet Union would agree to a mutual halt to MIRV testing, which should, I feel, be the first item on any arms talks agenda and should not wait for broader arms control agreement. But if the Soviets press ahead with their own development, or if arms control talks fail to produce a mutual freeze on MIRV's, we can and should resume testing.

The resolution, which I am now submitting, urges the administration immediately to suspend MIRV testing until a total effort to stop arms escalation through negotiations has been made. Such a move is vital if we are to give negotiations the full chance they merit to succeed.

A copy of my resolution, and a list of House Members who have cosponsored it, follows:

HOUSE CONCURRENT RESOLUTION 259—RE URGENCY OF ARMS CONTROL TALKS (By Mr. BINGHAM)

Whereas, the present is an especially propitious time for Soviet-American arms control negotiations because of (1) the approximate state of balance that exists through mutual deterrence, (2) the existing techniques of surveillance by satellite that make it possible for each side to keep track of the other's missile capabilities without on-site inspection, and (3) the present nonbelligerent attitude of the Soviets as evidenced by their unprecedented cancellation of the traditional display of military power in their May Day parade; and

Whereas, the successful development of a Multiple, Independently-targeted Reentry Vehicle (MIRV) weapons system by either the United States or the Soviet Union would not only threaten the present balance, but make much more difficult the achievement of a missile arms control agreement by making it impossible to check on warhead deployment without on-site inspection; and

Whereas, both the United States and the Soviet Union are currently pressing ahead with efforts to develop a MIRV system, and the United States is reportedly more advanced with its development program; and

Whereas, effective nuclear arms control offers the best, if not the only, hope of preventing a continuing arms race between the U.S. and the Soviet Union at disastrous cost to both sides and with no security for either; therefore be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress

(1) that the President should proceed with efforts to convene nuclear arms control negotiations with the Soviet Union with utmost urgency; and

(2) that the United States should defer further MIRV testing until every effort has been made to achieve a mutual freeze on MIRV development; and

(3) that such a mutual freeze should be a part of more comprehensive arms control agreements respecting both offensive and defensive missiles; but should not be delayed pending the working out of all aspects of such comprehensive agreements.

DEFER TESTING OF MIRV

(Mr. ASHLEY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ASHLEY. Mr. Speaker, today I am joining our colleague from New York, the Honorable JONATHAN B. BINGHAM, and other Members of the House in the introduction of a resolution calling for immediate deferment of further development and testing of multiple independently targeted reentry vehicles by the United States until every effort has been exhausted to reach a mutual MIRV freeze agreement with the Soviet Union.

The administration is reportedly planning to commence nuclear arms control

talks with Russia this summer. I applaud this decision; however, I am taking this opportunity to express my sincere belief that the success of these talks is dependent upon a freeze of our MIRV program.

The singular opportunity now presented for prompt talks lies in the confluence of several decisive factors: First, the approximate state of arms parity that exists through mutual deterrence; second, the existing techniques of surveillance that enable each side to verify the strength of the other side without on-site inspection; and, third, the present nonbelligerent attitude of the Soviets as evidenced by their unprecedented cancellation of the traditional display of military power in their May Day parade.

Further development of the MIRV by the United States at this time could very easily upset this delicate balance of elements necessary for successful arms control. If we continue development of MIRV, we risk the very real possibility that the Soviets will conclude before talks get underway that the United States already has an operational MIRV system—with such a system, Russia could not know how many weapons we have without on-site inspection, because a counted silo might contain one warhead, or three, or 10. Such a mistake on the part of Soviet leaders would make it inevitable that they would proceed with their own MIRV development, thereby producing another vicious cycle of escalating arms and costs. An immediate freeze on U.S. development of MIRV's, on the other hand, would eliminate the possibility that potential United States-Soviet arms talks could be subverted in this way and would make our stated desire to reach mutual arms control accord more credible.

Mr. Speaker, the opportunity for arms control is ripe and we must seize it. But if we are to succeed, we must recognize that the essence of any stable United States-Soviet agreement to limit nuclear arms will be the certainty and visibility of assured destruction power on both sides. We cannot afford to destroy this requisite condition of mutual deterrence by continuing with the MIRV, unless we are convinced that Russia does not want arms control.

At this vital juncture in the history of mankind, I call upon the President to proceed with efforts to convene nuclear arms control negotiations with the Soviet Union with utmost urgency; to defer further MIRV development and testing until every effort has been made to achieve a mutual freeze on MIRV development; and to make such a mutual freeze a part of more comprehensive arms control agreements respecting both offensive and defensive missiles.

SUPREME COURT DISTORTION BY ONE VOTE

(Mr. RARICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RARICK. Mr. Speaker, following the resignation of Abe Fortas, the U.S.

Supreme Court announced that the vote of Abe Fortas would be purged on cases he had deliberated in and voted on, and the Court's decision would be reached by the votes of the eight remaining judges. The ruling would be limited to cases decided after Fortas' resignation not yet rendered public in open court.

This would mean that in any of the pending cases, if the vote minus the Fortas vote were 4-to-4, the lower court judgment would stand unmolested.

However, the reason for Fortas' resignation permeates every decision that he voted on since his original confirmation in 1966.

Hundreds of acts of Congress have been stricken down or their intent warped, State laws and State constitutions have been declared unconstitutional, and thousands of criminal convictions have been overturned, pornography and sexual perversion laws have been voided as well as subversive statutes—and many of these by a 5-to-4 decision wherein the vote of Justice Abe Fortas was the deciding vote.

If the unanimous Supreme Court—in its noble efforts to atone for the guilty influence of the one vote held by Abe Fortas—seeks to cleanse its record, it raises the question: How does the Court propose to rectify the many injustices inflicted upon the American people by the 5-to-4 decisions reached with Fortas' vote prior to his resignation—from 1965 to date?

Can his overriding vote before his resignation inspire any greater public confidence than his suspect vote following his departure?

Mr. Speaker, I include a list of the 5-to-4 Supreme Court decisions in which Justice Fortas voted with the majority—each critical to the structure of our society, as follows:

THE 5-TO-4 SUPREME COURT DECISIONS IN WHICH JUSTICE FORTAS VOTED WITH THE MAJORITY

Harris v. United States, 382 U.S. 162 (1965).

Brown v. Louisiana, 383 U.S. 131 (1966).

Ginzburg v. United States, 383 U.S. 463 (1966).

Kent v. United States, 383 U.S. 541 (1966).

Elfrandt v. Russell, 384 U.S. 11 (1966).

Riggin v. Virginia, 384 U.S. 152 (1966).

Miranda v. United States, 384 U.S. 436 (1966).

Garrity v. New Jersey, 385 U.S. 493 (1967).

Spevack v. Klein, 385 U.S. 511 (1967).

Keyishian v. Board of Regents, 385 U.S. 589 (1967).

Zuckerman v. Greason, 386 U.S. 15 (1967).

Kaye v. Co-Ordinating Committee on Discipline of the New York Bar, 386 U.S. 17 (1967).

Giles v. Maryland, 386 U.S. 66 (1967).

Woodward Manufactures v. National Labor Relations Board, 386 U.S. 612 (1967).

Houston Contractors Association v. National Labor Relations Board, 386 U.S. 664 (1967).

Waldron v. Moore-McCormack Lines, Inc., 386 U.S. 724 (1967).

Afroyim v. Rusk, 387 U.S. 253 (1967).

Reitman v. Mulkey, 387 U.S. 369 (1967).

National Labor Relations Board v. Allis-Chalmers Manufacturing Company 388 U.S. 175 (1967).

Hanner v. DeMarcus, 390 U.S. 736 (1968).

Miller v. California, 392 U.S. 616 (1968).

Harris v. Nelson, 37 L.W. 4219 (1969).

THE 50TH ANNIVERSARY OF STEUBEN SOCIETY OF AMERICA

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio (Mr. FEIGHAN) is recognized for 30 minutes.

Mr. FEIGHAN. Mr. Speaker, the Steuben Society of America and its members have every reason to be proud of their organization and its record of solid accomplishment over the past 50 years.

During that span of a half a century they have given life and meaning to the lofty principles which moved and guided Gen. Frederick von Steuben in his role as one of the most inspiring leaders in our war for national independence.

Those principles—duty, justice, tolerance, and charity—are as basic to the survival of American democracy today as they were to the winning of our Revolutionary War nearly 2 centuries ago.

The fidelity of the members of the Steuben Society to those principles, and their maintenance in the life of our Nation, has won respect, admiration, and distinction for the Steuben Society.

The founders of their society were men and women deeply rooted in the spirit of America. They were motivated by the most enduring characteristic of German-American life—a constant concern for the welfare, the happiness, the growth, and the safety of our Nation.

Over the course of almost 3 centuries German immigrants and their descendants have woven this characteristic into the fabric of our Nation.

Their founders were mindful of the pioneer role played by German settlers in pushing the frontiers of civilization across this vast continent to the Pacific Ocean. Those early settlers moved on from Pennsylvania, along the mountain range southward, colonizing Maryland, Virginia, and Kentucky. Following the Indian wars, my home State of Ohio was opened up to the most hearty of these settlers. The imprint of German talents in the fields of industry, agriculture, commerce, the arts and sciences, education, religion, the professions, and civic achievement forms an indelible part of contemporary life in the State of Ohio. And so it is in many States of our Union.

The society's founders were certainly aware of the industrial history of the 19th century in which Germans were preeminent in all those pursuits that required technical training. Their love of exact science and technology and their unique ability to apply such talents for the benefit of their fellow men strengthened beyond measure this relatively new land. Many immigrants from Germany brought with them the advantages of training in the technical schools of the homeland at a time when the need for similar institutions in America had not yet been satisfied.

Perhaps above all else, German-Americans led the way in the vital field of engineering. It was John A. Roebling who built the first great suspension bridge over the Niagara River and then went on to build the Brooklyn Bridge—considered for many years as one of the wonders of the age.

German names, too numerous to cite, are engraved in the archives of our industrial development as pioneers in the chemical industry, electrical engineering, mining engineering, wagon and automobile manufacture, the iron and steel industries, and in the production of prepared food products from flour to chocolate.

The society's founders were surely proud of the fact that from the birth of our Nation German names stand high on the honored roll of fighters in behalf of our free way of life. They have given their sons for the defense of our Nation just as they have given their talents and labors to the building of our Nation.

Bancroft, historian of the American Revolution, and Gould, statistician of the Civil War, have testified that German volunteers in both those wars exceeded in proportion those of the natives of all other foreign stock.

And they must have been equally proud of the fact that German-Americans were in the forefront of the fight for human rights during the testing decades of the 19th century.

Carl Schurz of Wisconsin was a dedicated champion of the antislavery cause and Gov. John P. Altgeld of Illinois was an able champion of the rights of organized labor.

The long record of German participation in the American march of progress renders many German traditions part and parcel of American traditions existing today. The great results of American ingenuity are in many instances also the results of German ingenuity, incorporated into the mainstream of American knowledge.

These are but some of the causes which moved their founders to action. They acted in harmony with the oldest and the highest ideals of our Nation. They were bound together in a common resolve that this citadel of human liberty would henceforth and forever remain a beacon of hope for mankind the world over.

To strengthen their resolve they dedicated their purposes to upholding the patriotic ideals of the revered hero of the war which gave birth to our Nation—Gen. Frederick von Steuben.

To reaffirm their devotion, to assure an unbroken attachment to the great American dream, they adopted the credo "One country, one flag, one language."

This is the rich legacy of their founders, passed on to all those who have held and now hold membership in the Steuben Society of America.

This is the measure of added responsibility assumed by all who have held or now hold positions of leadership in the society.

During the past 20-odd years I have been privileged to know and to work with the leaders of this society at the national level, at the State level of Ohio and in my home city of Cleveland. That has been one of the most memorable and pleasant experiences of my public life. For that experience demonstrated for me that the society lives by its principles of "duty, justice, tolerance, and charity."

All members of the Steuben Society can

be proud of the constructive role played by its national officers in congressional reform of our immigration laws. It was my responsibility, as chairman of the House Subcommittee on Immigration and Nationality, to establish the facts, bring reason to bear and win majority support for a system of immigrant admissions that was humane and in the national interest. In the emotionally charged atmosphere which attended the public hearings during two sessions of the Congress this was not an easy task.

After 40 years of heated public controversy over immigration policy, the climax of change was reached.

It became evident that the national origins quota system no longer governed immigrant admissions into our country. Contrary to popular belief the quota system accounted for no more than one third of our annual immigrant admissions. For the previous 10 years we had been admitting close to 300,000 immigrants per year in contrast to the 156,000 authorized by the quota system and which most people believed was a fixed numerical ceiling on admissions.

The real problem grew out of the long waiting lists in many countries, made up of close relatives of U.S. citizens. Under then existing law persons with no relatives in the United States and with no skills needed here were being admitted from some countries while close relatives of our citizens in other countries or persons with needed skills had to wait in line for years.

In our search for a new formula of immigrant admissions our subcommittee was confronted with sharply conflicting opinions; on the number we should admit each year; whether Congress should maintain control of policy through a clear-cut, self-executing law or whether some of the congressional authority in this field should be delegated to a new Immigration Board; retention of the privileged status of natives of the Western Hemisphere for whom there had never been quota controls or numerical limits on their admission; the relationship of immigration to our labor market and the need to protect the rights and hard-won gains of American labor—just to mention some of the major issues in controversy.

These problems confronting the Congress together with the remedies proposed were discussed at length with the national officers of the Steuben Society. This was a part of the process of working out a new system that would be fair to all and consistent with the needs of our country at this point in our national development. The position taken by the officers on all issues was clear and consistent. That position was: What is best for the United States?

It was that same spirit which governed the decisions of the House Subcommittee on Immigration and Nationality. That spirit is clearly reflected in our new selective immigration system signed into law October 3, 1965, by President Johnson.

Legislation is never perfect. Experience with the act reveals that changes are necessary.

Each and every person, by virtue of membership in the Steuben Society has assumed responsibility for nurturing the good seeds of dedicated and staunch citizenship planted by past generations.

To succeeding generations falls the duty for maintaining that concern for the welfare, the happiness, the growth, and the safety of our Nation which motivated the founders of the society.

Knowing loyal Steubenites as I do, I am confident that they welcome the duties and responsibilities which have been passed on to them by their founders. I am equally confident that their future endeavors will be crowned with the same success which has distinguished the work of the Steuben Society over the past 50 years.

I am including in my remarks the golden jubilee message of the Steuben Society and a proclamation issued by Gov. Nelson A. Rockefeller pursuant to the resolution of the General Assembly and the Senate of the State of New York, which follow:

**THE GOLDEN JUBILEE MESSAGE: 50 YEARS
STEUBEN SOCIETY OF AMERICA—46 YEARS
U.S. IMMIGRATION LAWS**

(By the National Council, Steuben Society of America; Ward Lange, national chairman; George Stotz, chairman, public affairs)

On May 19, 1919 The Steuben Society of America was formally founded, just six months after the end of a war against the kin of the founders of this new American National Organization of American Citizens of Germanic Origin.

The dissolution of the "German-American National Alliance" with America's entry into World War I still fresh in their minds, the founders vowed not to repeat any of the errors which may have helped to make the dissolution of their "Alliance" possible.

They were determined to build an entirely different society on an enduring foundation, deeply rooted in the U.S. Constitution. The principles of Unity, Tolerance, Charity and Justice were adopted as the "Constitutional Tap Roots" which would sustain their new structure against all attacks for "as long as the Constitution of the United States of America will stand," which was to the Dean of the founders, the late Dr. Franz Koempel "forever and forever." His home is to this day called the "Cradle of the Steuben Society of America."

This new and different society concentrated its energies immediately on the healing of the wounds of war and on the reestablishment of good relations with the new government and the people of defeated Germany.

An objective program called for, among other issues, an early and just peace treaty to avoid a future world holocaust; the return of alien property; the return of the teaching of the German language to our Nation's classrooms, then barred in nearly all schools; to give aid to their kin across the sea and to end the blockade.

A LAW TO CONTROL IMMIGRATION

As the passions of war were subsiding and Congress was considering the creation of a law to control immigration, the society set out to create what had been most sorely missing before and during World War I: "A voice of Americans of German origin in the Halls of Government."

While many voices called for restrictive immigration measures for German immigration, the Society's voice of reason found many supporters and the first immigration law, passed in 1923 gave a generous quota, 26,000, to German immigrants. (The Steuben Society of

America has been actively involved in every revision of the law since then and in the passage of the special Emergency Relief Act of 1953.)

THE FIRE TEST

When in the late 1930's the war clouds gathered once more over Europe and World War 2 broke out on September 1, 1939, the Society instituted a vigorous campaign to expose all foreign propaganda and influence in order to oppose all efforts to involve America in that war.

After the Constitutional Declaration of war against Japan, Germany and Italy by the Congress of the United States of America, triggered by the vicious Pearl Harbor attack on December 7, 1941, the Society pledged its unqualified support to our Nation's Commander in Chief of the Armed Forces, the late President Franklin Delano Roosevelt in the following declaration:

DECEMBER 11, 1941.

The President,
The White House,
Washington, D.C.

SIR: The National Council of the Steuben Society of America wishes to convey to you the following Declaration adopted by its Executive Committee at a special meeting:

"DECLARATION

"The Steuben Society of America has consistently maintained that the power to declare war rests solely in the Congress of the United States.

"Congress now having declared war against Japan, Italy and Germany, it becomes the duty of every American to loyally support our government in prosecuting that war to a successful conclusion.

"We are again a united people.

"Our Country, First, Last and All the Time."

We desire further to pledge to you, our President and Commander-in-Chief, the wholehearted support of our entire organization and membership in this national emergency, and offer our services in whatever capacity we, collectively and/or individually, may best be fitted for.

With these assurances of our loyalty and support, believe us to be,

Respectfully,

THEO H. HOFFMANN,
National Chairman.

F. W. MAYER,
National Secretary.

The Founders of the "entirely different" society were now to witness whether their creation, the Steuben Society of America could endure even through a war against their own kin. Little did they realize in 1919 that 26 years later their Society would be called upon to repeat substantially their efforts to "heal the wounds of war"—only under much more complex and difficult circumstances. Instead of having to labor to end a blockade it had to engage itself in the opening of the mails to defeated Germany so the sending of packages for the aid to their starving kin was possible.

The Society had stood the fire test. It is especially noteworthy after 50 years, that this is the first instance in American History that a National Society of Americans of German origin, actively involved in American political affairs, has endured for a half century.

IMMIGRATION AGAIN, AFTER 50 YEARS

Ironically, on the eve of its 50th Anniversary date the Steuben Society of America finds itself once again engaged in a nationwide effort to secure fair treatment under the new 1965 Immigration and Nationality Act, for German immigrants who have historically been a prominent segment of the formative element of the American people.

The new law is by no means restrictive only to German immigrants, but to all

Northern European countries, 14 in all. The efforts 46 years ago by the founders of the Steuben Society of America must now be repeated during our Golden Jubilee Year.

**PROCLAMATION FROM THE STATE OF NEW YORK,
EXECUTIVE CHAMBER**

The Senate and Assembly of New York State have adopted a joint resolution requesting that I issue a proclamation in behalf of the Steuben Society of America. I am happy to comply.

The Steuben Society of America is a national patriotic society of persons wholly or partly of German descent, founded on May 19, 1919. The Society this year is celebrating its 50th anniversary.

In the words of the Legislature's Joint Resolution:

"The prosperity and growth of such citizens' organizations such as the Steuben Society of America are essential and vital to the preservation and success of our American way of life.

"It is important to recognize and to encourage the participation of private citizens of our Nation and of the State of New York in the affairs of government and of the community.

"The celebration of the Fiftieth Anniversary of the Steuben Society of America is an outstanding achievement deserving of official recognition by the Government."

Now, therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim May 19-25, 1969, as Steuben Society of America Golden Jubilee Memorial Week in New York State.

Given under my hand and the Privy Seal of the State at the Capitol in the City of Albany this thirtieth day of April in the year of our Lord one thousand nine hundred and sixty-nine.

By the Governor:

NELSON A. ROCKEFELLER,
ALTON G. MARSHALL, Secretary to the
Governor.

Mr. BARING. Mr. Speaker, I wish to take this time to join my colleagues in honoring the 50th anniversary of the Steuben Society. I deem it a great honor myself to be a member of this society which is so dedicated to upholding the American Constitution and all for which it stands. It is a tremendous achievement for the Steuben Society today as it celebrates its golden jubilee as an organization of people deeply involved in the American way of life while their kinship is Germanic in nature.

However, this society goes even further than that as it strives continuously for a better way of life for all Americans, no matter what nationality.

The Steuben Society's national standing and long record of endurance must be witnessed today as one of the great hallmarks in the march of freedom for all people of the United States and great tribute should be paid to the society's efforts in aiding people elsewhere in the world.

The stalwart determination of the Steuben Society of America will preserve this society as one of the best supporters of the American Constitution as the society perseveres in spreading its adopted principles of unity, tolerance, charity, and justice throughout the life of the United States.

Mr. WYDLER. Mr. Speaker, the golden jubilee anniversary of the Steuben Society of America is being celebrated this

spring. As a member of that splendid organization, I am extremely proud of the principles espoused by the Steuben Society, and of the record of patriotic achievement of the man for whom it was named.

General von Steuben was the German-born military adviser to George Washington who is credited with the successful training of the Continental Army. Joining Washington at Valley Forge in 1778, Von Steuben formed a model company of 100 men and personally undertook to drill it. The rapid progress of this company under his instruction has been said to have been the most remarkable achievement in rapid training for combat in the military history. General von Steuben, who became an American citizen 11 years before his death in 1794, has been called the maker of the American Army.

The Steuben Society is an organization of Americans of German origin and descent who are dedicated to "one country, a country so fair, tolerant, and just that all who live in it may love it; one flag, an American flag for American purposes only; and one language, the language of truth." It is an organization dedicated to patriotic ideals. I should like to pay tribute today to this great organization for its steadfast devotion to these American ideals.

Mrs. DWYER. Mr. Speaker, the 50th anniversary of the founding of the Steuben Society of America, which we commemorate today, is an occasion which is most worthy of recognition by the Congress of the United States, and so I am most pleased to join with other colleagues in extending to the officers and members of the society my congratulations upon the completion of a half century of service to our country and to Americans of German descent.

The role of voluntary citizens' organizations, Mr. Speaker, is an important one in our free society. The accomplishments of organizations such as the Steuben Society has contributed memorably to the growth and development of this "nation of immigrants" and have helped to assure that our people will continue to be blessed by the strengths which flow from diversity within unity.

The Steuben Society was founded by Americans determined to build an enduring organization, one which was based on principles as lasting as the U.S. Constitution. They chose these: unity, tolerance, charity, and justice. Today, 50 years later, these principles were never more contemporary, never more vital to a free and peaceful America, never more needed in the hearts and minds of all our countrymen.

The Steuben Society of America, Mr. Speaker, chose its guiding principles wisely. And the history of this distinguished patriotic society during the past five decades has amply demonstrated the commitment of its members to these purposes. On this notable occasion, therefore, I am proud to join in wishing them continued success and prosperity.

Mr. HORTON. Mr. Speaker, 50 years

ago today, the Steuben Society of America was founded to build a new and lasting understanding between the people of the United States and the people of German origin.

The founders of this society were determined to build a new society, deeply rooted in the U.S. Constitution and dedicated to the principles of unity, tolerance, charity, and justice.

The Steuben Society, under the direction of the late Dr. Franz Koempel, the dean of the founders, concentrated its energies on the healing of wounds opened during World War I. The society worked hard for a just immigration quota in 1923 and has been actively involved with every revision of the law since.

The George Ellwanger unit of the Steuben Society in Rochester, N.Y., has been active over the years. Its membership includes many civic and community leaders.

One of the most energetic programs developed in recent years has been the Steuben Society scholarship program which recognizes outstanding students in Rochester area high school German language programs.

It is my pleasure today, Mr. Speaker, to join in recognizing the efforts of the National Steuben Society to preserve and strengthen our American way of life.

I was pleased to note that the distinguished Governor of the State of New York, Hon. Nelson A. Rockefeller, has singled out the Steuben Society for generous praise and recognition. His proclamation is worthy of the attention of all our colleagues:

PROCLAMATION BY STATE OF NEW YORK

The Senate and Assembly of New York State have adopted a joint resolution requesting that I issue a proclamation in behalf of the Steuben Society of America. I am happy to comply.

The Steuben Society of America is a national patriotic society of persons wholly or partly of German descent, founded on May 19, 1919. The Society this year is celebrating its 50th anniversary.

In the words of the Legislature's Joint Resolution:

"The prosperity and growth of such citizens' organizations such as the Steuben Society of America are essential and vital to the preservation and success of our American way of life.

"It is important to recognize and to encourage the participation of private citizens of our Nation and of the State of New York in the affairs of government and of the community.

"The celebration of the Fiftieth Anniversary of the Steuben Society of America is an outstanding achievement deserving of official recognition by the Government."

Now, therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim May 19-25, 1969, as Steuben Society of America Golden Jubilee Memorial Week in New York State.

Given under my hand and the Privy Seal of the State at the Capitol in the City of Albany this thirtieth day of April in the year of our Lord one thousand nine hundred and sixty-nine.

By the Governor:

NELSON A. ROCKEFELLER,
ALTON G. MARSHALL,
Secretary to the Governor.

GENERAL LEAVE TO EXTEND

Mr. FEIGHAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on this subject.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

SURTAX AND INVESTMENT TAX CREDIT

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 30 minutes.

Mr. WHALEN. Mr. Speaker—

I. BACKGROUND

A. THE PROBLEM

In our view, the number one problem facing our domestic economy in 1969 is the threat of continuing strong inflation and the deepening of the inflationary psychology that has spread widely through the economy in recent months.

This statement, submitted on March 1, 1969, to the Joint Economic Committee of the Congress by the American Life Convention and the Life Insurance Association of America, echoes the concern of economists throughout the Nation.

At the end of 1965 the consumer price index stood at 109.9 percent of the 1957-59 price level. On March 31, 1969, prices had risen to 125.4 percent. This represents a 14.1 percent cost-of-living increase in 39 months. In 1968, alone, saw a 4.2 percent consumer price increase. An 0.8 percent rise occurred in March 1969, the greatest advance in any single month since February 1951.

B. "INFLATION"—DEFINITION

As I indicated in a speech delivered on the House floor on December 4, 1967, in an economy where supply and demand operate unimpeded—"perfect competition"—economists describe inflation as an "increase in prices, employment, and production." However, in a society, such as ours, where supply and demand do not function perfectly, factors other than price may determine the total level of demand—and thereby production and employment. Thus, in 1958 we had the anomaly of rising prices and a concurrent decline in production and employment. For the purposes of this analysis, therefore, the use of the term "inflation" shall be restricted to the element of "price" only.

C. INFLATION—ITS CAUSES

In the context of the foregoing definition, economists attribute inflation to two sources.

First is "demand-pull" inflation. This occurs when the market demands more than the economy can produce. Like a lid which pops when a stove generates too much steam, prices, too, "explode" when the economy becomes overheated.

The second type is termed "cost-push" inflation. This exists when increased production costs—labor, materials, and so forth—are not matched by productiv-

ity gains. If a firm produces a commodity whose demand is "elastic," that is, responsive to changes in price, it may have to absorb per unit cost increase—or close its doors due to declining profits. However, many large companies process non-substitutable products, such as food, steel, and so forth, whose demand, therefore, is not predicated solely upon price. In the case of these "inelastic" items, cost increases can, and are, passed on to the buyer in the form of higher prices.

D. CURRENT PRICE SPIRAL—THE CAUSES

Economists generally agree that the inflationary phase of the current business cycle, which commenced in earnest in late 1965, stems both from demand and cost influences. "Demand-pull" was the culprit in 1966. The sudden upsurge in Federal spending, caused by the acceleration of our Vietnam involvement, exerted great pressure upon an economy which was operating at near-optimum capacity—90.8 percent plant utilization in the second quarter of 1966, according to the Federal Reserve system.

Since mid-1967 we have faced a combination of "demand-pull" and "cost-push" forces. While our plant utilization, by March 1969, had declined to 84.1 percent, acute shortages still exist among certain professional and skilled labor categories. However, an unfavorable cost-productivity ratio during the past 2 years has had an even greater impact upon prices. In 1967, according to the Department of Labor's Output Per Man-Hour Index, total cost per unit of output rose 1.6 percent. Last year per unit costs advanced 3.3 percent.

E. COUNTER-CYCICAL MEASURES

Having identified inflation's two principal causes, let us next consider its cures. Price stabilization is attainable through the operation—individually and in concert—of three forces.

First. Most significant, and yet most often overlooked, is the long-run reaction of the marketplace to price changes. It has been noted that there are impediments to a "perfect" supply-demand response to price movements. Yet the law of supply and demand has not been entirely "repealed"! For example, as prices climb, some citizens, especially those living on fixed income, suffer a reduction in purchasing power. As the rise becomes steeper, other markets decline. These include foreign purchasers, who can buy more competitively elsewhere, and certain domestic customers—such as Government workers and employees of small firms—whose wages do not respond rapidly to economic changes. Consequently, in the long-run "price" still serves the economy as an adjusting mechanism.

Second. Since the mid-1930's fiscal policy—"Government programs with respect to spending, taxing, and borrowing"—has been employed in our country as a stabilizing device. In periods of declining prices, production, and employment, "compensatory" fiscal policy requires that the Government stimulate the economy by "pumping" into it through spending programs more than

it withdraws through tax collections. This calls for increased expenditures and/or reduction of tax rates.

Conversely, when inflation is rampant, Government programs should act as a depressant. Spending is restricted, although not necessarily reduced from the previous fiscal year, and/or tax rates are increased.

From the preceding it is apparent that fiscal policy's role is to influence aggregate demand. For this reason fiscal policy traditionally is more effective in dealing with demand-inspired inflation than countering price rises spurred by swollen production costs.

Third. Finally, central banks throughout the world utilize monetary policy as a counter-cyclical weapon. In times of depression, central banks will encourage economic expansion by making large quantities of money available at comparatively low rates of interest. The Federal Reserve system—our version of a central bank—accomplishes this by lowering discount rates, reducing member bank cash reserve requirements, and buying bonds in the open market, thus providing more reserves to member banks.

On the other hand, the Federal Reserve system attempts to combat rising prices by making less money available with which to buy. This is accomplished by employing such measures as increased discount rates, higher member bank cash reserve requirements, and open-market bond sales—thus causing the bond buyers' cash to flow from commercial banks to the Federal Reserve.

Unfortunately, Federal Reserve policy, in its application, is uneven in its effects throughout our economy. For instance, when a tight money program is invoked, its impact is felt initially and most heavily by the construction industry. Today, a decline in new housing starts, while helping to cool the economy, also may have unfortunate social implications at a time when a national housing shortage is beginning to emerge.

II. THE SURCHARGE

A. HISTORY—RECENT TAX LEGISLATION

As previously noted, tax programs, as a component of fiscal policy, are designed to achieve economic stabilization. In January 1963, President John Kennedy proposed reductions in personal and corporate tax rates. He argued that this would give the consumer and the businessman more disposable income—"income available for spending and/or savings after taxes." Since there is a human tendency to spend at least a portion of any additional income received—"marginal propensity to consume"—the economy would benefit from greater aggregate demand, the President reasoned, by the increased production and employment it would generate.

Upon his death President Kennedy's tax program was adopted by his successor, Lyndon Johnson. President Johnson shepherded it through the Congress and in 1964 achieved an \$11.5 billion tax-reduction package.

As Sylvia Porter concluded in her June 13, 1968, column:

With the income tax cuts of 1964, we came close to eliminating the gap between performance and potential. But the Vietnam war escalation in mid-1965 pushed the economy from balanced to unbalanced prosperity and added problems of price-wage inflation, domestic and balance of payments deficits, higher interest rates, skilled labor shortages.

Recognizing this growing threat of inflation, President Johnson, in his January 10, 1967 state of the Union message to the newly convened 90th Congress, recommended: "a surcharge of 6 percent on both corporate and individual income taxes—to last for 2 years or for so long as the unusual expenditures associated with our efforts in Vietnam continue." No action was taken by the Committee on Ways and Means to implement this proposal.

Seven months later, on August 3, 1967, President Johnson submitted a new tax program to Congress. The principal feature of the new plan was a temporary 10-percent surtax which "should be placed on corporate income tax liabilities, effective July 1, 1967" and "on individual income tax liabilities, effective October 1, 1967."

Commencing August 14, 1967, 11 public hearings were held by the Committee on Ways and Means. Testimony was presented by 54 witnesses. Once again no surtax bill emerged from this committee for House consideration.

On February 29, 1968, however, the House of Representatives did pass H.R. 15414, which, in response to the President's recommendations, extended telephone and automobile excise taxes and accelerated corporate income tax payments. In considering this measure several months later, the Senate amended it by including a 10-percent surtax on corporate and personal incomes, effective January 1, 1968, and April 1, 1968, respectively. Further, the Senate provided that Federal outlays be reduced \$5 billion from the \$186.1 billion budget estimate submitted to Congress by the administration.

On June 10, 1968, House and Senate conferees reached agreement on H.R. 15414, substantially adopting the Senate version. The conference report was approved by the House of Representatives on June 20, 1968 by a 268 to 150 vote and by the Senate on June 21, 1968, by a 64 to 16 margin. The President affixed his signature to this legislation—designated as the Revenue and Expenditure Control Act of 1968—on June 28, 1968, Public Law 90-364.

B. MY VOTE ON THE REVENUE AND EXPENDITURE CONTROL ACT OF 1968

I was among those 150 House Members who voted against the H.R. 15414 conference report. Several factors prompted this decision. Foremost was the fear of an "economic overkill" which could result as a consequence of combining a \$25 billion fiscal "about face" with tightened monetary policy and the \$2.8 billion social security tax increase scheduled for January 1, 1969. This view, which was shared by many other economists, perhaps was best expressed by columnist Joseph Slevin in the May 31, 1968, issue of the Washington Post:

They (top government economists) see the threat of a slow-down when they look ahead . . . The prime culprit will be the anti-inflationary tax boost and spending cut package the Congress is debating. . . . "That's a pretty grim package", an official warned. "It's going to be a case of delayed overkill. You have to worry about it".

There now are signs that the economy is beginning to "cool" slightly in response to passage of the Revenue and Expenditure Control Act of 1968. For example, at the end of the first quarter, 1969, six "leading" indicators were pointing downward. However, as I will indicate statistically in a subsequent paragraph, it is obvious that the fears of any serious economic slowdown have not materialized.

The 1969 recession projections were not borne out for two reasons.

First, monetary authorities, too, believed a downturn would result from the 1968 tax-hike-spending cut. Therefore, the Federal Reserve Board of Governors, in the last half of 1968, pursued an "easy money" policy which controverted Congress' tightened fiscal controls. While the Nation's money stock—currency and demand deposits—increased by an average of only 2.9 percent yearly between 1957 and 1968, money stock during the last 6 months of 1968 grew at an annual rate of 7.0 percent.

Second, consumers "did not get Congress' message." Whereas saving as a percentage of disposable income was 7.1 percent and 7.5 percent, respectively, in the first two quarters of 1968, the savings ratio dipped to 6.3 percent and 6.8 percent in the third and fourth quarters, respectively, of last year, and to 5.8 percent in the first 3 months of 1969. Thus, buying habits did not adjust to the reduced take-home pay occasioned by the 1968 tax increase. Instead, the consumer simply saved less.

C. PRESIDENT NIXON AND THE SURTAX

The Revenue and Expenditure Control Act of 1968, with its 10-percent surcharge, expires on June 30, 1969. On March 26, 1969, President Richard Nixon in a message to the Congress, advocated the retention of the surtax. He stated:

I am convinced that the path of responsibility requires that the income tax surcharge, which is expected to yield \$9.5 billion, be extended for another year.

The President also asked that the scheduled reduction in the telephone and passenger car excise taxes be postponed, and user charges equal in revenue yield to those now in the budget be enacted.

On April 21, 1969, the President modified his March 26, 1969, statement by proposing that the surcharge be reduced from 10 percent to 5 percent during the last 6 months of fiscal year 1970—January 1, 1970, to June 30, 1970. The resultant revenue loss, according to the President, would be recovered by the proposed elimination of the 7 percent investment tax credit—see section III for discussion of this issue.

D. THE ISSUE

Congress must decide prior to June 30, 1969, what to do about the surtax. The issue, as usually stated, is: "Should the

10 percent surcharge be extended?" However, a more appropriate delineation of the issue is: "Should Federal corporate and personal income taxes be reduced by 10 percent?" This, in effect, is what will occur if Congress fails to extend the surtax. Thus, the following analysis will be predicated on the effects of a tax reduction.

E. DOES THE ECONOMY NEED A STIMULANT?

As mentioned in section 1(e) (2), a reduction in tax rates is considered when the economy requires a stimulant. Thus, whether Congress should maintain present rates, by continuing the surtax, or lower them, by allowing it to expire, can only be decided after examining economic indices. Key current indicators for the month ending April 30, 1969, show the following:

First, total civilian employment in April was 77,605,000, an alltime high, 2,462,000 greater than the same month in 1968.

Second, the unemployment rate, as a percentage of the total civilian labor force, was 3.5 percent at the end of last month. This is the same level that existed in April 1968, although 0.2 percent higher than February 1969.

Third, average hours worked per week by non-agricultural employees in April was 37.8, the same as in the previous month and 0.5 hours more than in April 1968.

Fourth, average hourly earnings—adjusted to current prices—for non-agricultural workers was \$2.99 last month. This is 1 cent more than March 1969, and a 19-cent jump since April 1968.

Fifth, total personal income in April 1969, moved to a \$730.5 billion annual rate, an increase of \$2.8 billion over the preceding month.

Sixth, total industrial production continued to climb in April. Last month's index stood at 171.5 percent of the 1957-59 average, seasonally adjusted, whereas in March it was 171.0 percent. A year earlier—April 1968—the industrial production index registered 162.5 percent of the 1957-59 base.

Seventh, March 1969—latest statistics available—saw continued expansion in new construction totals when expenditures reached an annual rate of \$91.1 billion, compared to \$90.9 billion in February and \$85.3 billion in April 1968.

Eighth, the sales-to-inventory relationship remained favorable in March 1969. At that time the sales-inventory ratio was 1.54, the same as it was 12 months earlier.

From the foregoing, it is evident that the economy is in many respects more buoyant than it was in April 1968. A stimulant, therefore, in the form of a tax rate decrease most certainly would not be fiscally prudent at this time.

F. OTHER CONSIDERATIONS

There are three other factors which argue against a tax decrease now.

First, surtax removal, and thus a tax rate decrease, can be a productive countercyclical weapon when the economy shows softness, either as a result of cessation of Vietnam hostilities or from

other causes. Thus, a tax cut should be saved until such time when it can be utilized more effectively.

Second, when there is a clear evidence supporting the need for an economic "hypodermic," the surtax can be quickly repealed. The present surcharge is designated as a "temporary" tax and, therefore, Congress can, and will, respond expeditiously to a call by the President for its elimination. The speed with which Congress can act in response to a tax cut request, as contrasted with a tax increase proposal, was demonstrated in March 1967, when only 7 days elapsed between the time President Johnson asked for a restoration of the investment tax credit and the time it took the House to pass enabling legislation.

Third, removal of the surtax at the end of next month would entail a deficit of \$3.7 billion for fiscal year 1970. This amount then would have to be borrowed by the Federal Government at a time when the money market is severely overstrained—with the 7½ percent prime interest rate the highest since 1929. Continuation of the surtax, consequently, would relieve further pressure on monetary policy.

F. CONCLUSION

In the 12 months since the Revenue and Expenditure Control Act of 1968, the economic boon has showed few signs of abating. Thus, discontinuance of the surcharge at this time would not only provide an unneeded shot-in-the-arm to the economy but also would waste an antidepressant weapon which could be launched more effectively at some later date.

III. THE 7 PERCENT INVESTMENT TAX CREDIT

A. BACKGROUND

1. ORIGINAL PASSAGE 1962

In 1962 Congress, upon the recommendation of President Kennedy, enacted a measure designed to encourage business firms to modernize and expand their production facilities by investing in new machinery and equipment. The new law provided that a businessman could subtract from his annual tax bill 7 percent of eligible investment up to a maximum subtraction of \$25,000 plus 25 percent of tax liabilities above \$25,000. Any unclaimed credit in a given year could be used over the following 5 years.

According to President Nixon in his April 21, 1969, message:

Since that time America has invested close to \$400 billion in new plant and equipment, bringing the American economy to new levels of productivity and efficiency.

2. REPEAL, 1966

On November 8, 1966, President Johnson signed into law H.R. 17607, Public Law 89-800. He had proposed this measure on September 8, 1966, as an essential element in his antiinflationary program. At that time it became apparent to the President that, despite the Federal Reserve's restrictive monetary policy, 1966 business investment would increase by approximately 17 percent over 1965.

H.R. 17607 suspended for a 15-month

period—October 10, 1966 through December 31, 1967—both the 7 percent tax credit on the purchase of machinery and equipment and certain allowable accelerated depreciation of industrial and commercial buildings.

3. RESTORATION, 1967

During the first quarter of 1967 there occurred in our country what economists now term a "mini-recession" during which real gross national product actually declined. Apparently in response to this economic downturn, President Johnson, on March 9, 1967, asked Congress, effective that date, to reinstate the 7 percent investment tax credit and the accelerated depreciation of certain industrial and commercial buildings. The President's stated reason, however, was:

Although the demand for capital goods continues to be strong and at record levels, my Council of Economic Advisers informs me that it no longer threatens to strain our growing ability to produce.

H.R. 6950, which embodied Mr. Johnson's recommendations, passed the House of Representatives on March 16, 1967 by a 386 to 2 margin. After a 5-week non-germane discussion—on campaign contributions—the Senate, on May 9, 1967, approved H.R. 6950 by a vote of 93 to 1. Both Chambers, by voice votes, adopted a conference report on May 25, 1967, and the bill was signed into law—Public Law 90-26—19 days later by President Johnson.

4. PROPOSED REPEAL, 1969

In his aforementioned April 21, 1969, message to Congress, President Nixon urged repeal of the 7 percent investment tax credit. The President stated in his message of March 26, 1969:

While a vigorous pace of capital formation will certainly continue to be needed, national priorities now require that we give attention to the need for general tax relief. Repeal of the investment tax credit will permit relief to every taxpayer through relaxation of the surcharge earlier than I had contemplated.

B. THE ISSUE

Congress now must make two fiscal decisions: First, the feasibility of extending, or allowing to expire, a revenue-yielding statute—the surtax; second, the desirability of repealing, or continuing, a revenue-loser—the 7-percent investment tax credit.

The primary surtax consideration is the probable economic effect of its termination. The investment credit presents two relevant issues: the economic impact of its removal and national priority considerations in the form of tax relief.

C. ANALYSIS OF ARGUMENTS

The case for repeal of the 7-percent investment tax credit is somewhat less persuasive than that for the surtax extension. In fact, there existed considerable division among administration economists prior to the President's April 21, 1969, investment tax credit decision.

Two principal arguments have been advanced in opposition to termination of the 7-percent investment credit.

First, there is the question of timing. Rescinding Public Law 90-26 will have no immediate effect upon inflation. After

their receipt by the producer, capital goods orders require anywhere from 6 to 24 months to process. Consequently, any purchases placed within the last year are now "in the mill," with their resultant impact upon the economy. Obviously, production of these items will not cease merely with the repeal of the investment tax credit. Only future investment plans will be affected.

Furthermore, this delayed result ultimately may be felt at a time when the economy needs a fiscal stimulant rather than a depressant. As noted previously, this, in fact, occurred in March 1967, only 4 months following congressional revocation of the 1962 investment tax credit law.

Second, an important tool in the fight against inflation is increased worker productivity. As John O'Riley recently stated in the Wall Street Journal:

Over the long pull, no force on earth has done more to hold down the prices of things people buy than has capital spending.

It is contended, therefore, that in the long run repeal of the investment tax credit will further, rather than diminish, inflationary pressures.

Those urging rescission of the 7 percent investment tax credit offer the following reasons.

First, aggregate demand has expanded, in large part, as a consequence of unexpected capital expenditure increases. In a letter to me dated March 6, 1969, Ralph D. Creasman, president, Lionel D. Edie & Co., states:

You will note that the present survey ("Industrial Developments", February 28, 1969 issue) calls for an increase in manufacturing spending of 12 percent in 1969 over 1968. Our survey last September showed an intended increase of 8 percent.

Rinfret Boston Associates, Inc. in a bulletin dated February 25, 1969, point out that their "resurvey indicates that private industry now intends to spend about 13.6 percent more for plant and equipment in 1969 than it spent in 1968."

An increase in investment expenditures creates what economists call a "multiplier effect." This means that every dollar spent for capital equipment will be respent several times for consumer items. In order to dampen total demand, therefore, corrective measures should be directed toward the primary "agitator"—in this instance, capital spending.

Second, as mentioned earlier, only 84.1 percent of total plant capacity was being used by business firms at the end of March 1969. This strongly suggests that a portion of the 12-14 percent advance in investment spending is speculative, stemming from an inflationary psychosis—"if we don't buy it now, it will cost us more later." Curbing this speculative fever through revocation of the investment tax credit may, in the long run, rescue many businessmen from their own excesses.

Third, last year all taxpayers, corporations and individuals alike, were required to add 10 percent to their total tax bill. Yet for the last 6 years business firms have received relief in the form of a tax credit on their capital goods pur-

chases. According to Congressional Quarterly, April 25, 1969, issue this subsidy "has cost the Treasury an estimated \$14 billion in revenue from 1962, when it went into effect, through calendar 1968."

It is difficult to justify to many Americans, especially those in low and middle income brackets, why they now must accept a greater tax burden while, at the same time, businesses are accorded special tax treatment. Equity, consequently, would seem to dictate the removal, at least until the surtax can be eliminated, of the investment tax credit.

D. CONCLUSION—INVESTMENT TAX CREDIT

The weight of the evidence, in my opinion, calls for elimination of the 7 percent investment tax credit. Aggregate demand, and thus, inflationary pressures, will not diminish immediately upon termination of Public Law 90-26. Nevertheless, speculative investment, borne of a "buy it now" philosophy, should subside, thus avoiding needless, and perhaps damaging, plant expansion. More significant, however, is the greater fairness which repeal of the investment credit would bring to our tax structure.

IV. OTHER ISSUES

The foregoing analysis has been concerned solely with the economic consequences of actions involving the surcharge and the investment tax credit. However, when these two issues are discussed, two other topics—Vietnam and tax reform—often are interjected. Thus, I shall address myself briefly to these two questions as they relate to the surtax and the investment tax credit.

1. THE VIETNAM WAR

Some argue that voting for the surtax in 1968, and its extension in 1969, is an endorsement of our military involvement in Vietnam. True, the need for additional revenues stems, in part, from the expansion of the Vietnam conflict. While voting against the surtax may have some value as a "protest", two facts must be remembered. First, a negative vote will not end the war. Second, failure to extend the surtax will stimulate an already over-heated economy. Therefore, one problem, the war, would still exist and another, inflation, would be further aggravated.

2. TAX REFORM

In 1968 some of my colleagues stated that institution of tax reform would produce enough additional funds to make enactment of a 10-percent surtax unnecessary. The objective of tax reform, however, is not additional revenues. Rather, its goal is a more equitable distribution of the tax burden. It is probable, therefore, that the extra money derived from sealing "loopholes" will be more than offset by the extension of tax relief to low and middle-income families. Thus, true "tax reform" may result in fewer, rather than more, dollars to the Treasury.

Still others claim, with considerable validity, that it is inappropriate to mount a new tax on an already inequitable foundation. These persons conclude, therefore, that the surcharge should not be continued until meaningful reforms have been adopted.

Hopefully, the forthcoming surtax-investment-tax-credit package will include some structural adjustments. However, time militates against formulation of a complete reform program prior to the June 30, 1969, surcharge deadline.

Those, such as myself, who are interested in a major overhaul of our tax statutes, then will be confronted with a dilemma. Should we support the extension of the surtax, hoping that later in the summer a more extensive reform measure will emerge from the Committee on Ways and Means? Or, should we allow the surtax to expire as our price for Congressional failure to bring meaningful reform legislation to the floor?

I prefer the former course for two reasons.

First, tax reduction, by failure to act on the surtax, would kindle the fires of inflation. Thus, those who we wish to help through tax reform actually would be damaged more by continued erosion of the dollar.

Second, based on its conscientious efforts of the past 3 months, I am convinced that the Committee on Ways and Means is serious in its stated intentions to bring a substantive tax reform bill to the House floor later this year. Since changes in tax statutes, as opposed to tax rates, will be permanent, the committee should be given sufficient time to complete its reform study.

V. SUMMARY

One might reasonably ask: "How can you justify your recommendation that the surcharge be extended in the light of your vote against it last year?"

If one accepts the principle of compensatory fiscal policy, as I do, timing becomes a decisive factor in the decision-making process. The fiscal issue confronting Congress now differs substantially from that with which we were concerned last summer. In 1968 we had to decide whether to increase taxes. This involved not only a consideration of the then existent economic conditions but, more important, required long-range projections into which a tax increase was programed.

In 1969 the question is whether to reduce taxes. In this instance, the immediate effects are of more concern than the long-run implications.

It is on this premise, therefore, that I base the following conclusions.

First, the tax reduction occasioned by a failure to extend the surtax would escalate inflationary pressures. The 10-percent surcharge should be renewed, therefore.

Second, while not contributing significantly to the current struggle against inflation, removal of the 7-percent investment tax credit will reduce speculative capital goods purchases and, concurrently, attain a more favorable balance between business and individual tax burdens.

Third, as indicated above, this position statement contains no long-range economic predictions. However, signs of a "slowdown" are emerging. It is probable that the massive fiscal and monetary retaliatory efforts against inflation,

not to mention the reaction of the marketplace, in time will achieve a perceptible economic downturn. Such signals are easily and promptly discerned. At that time, not only could a tax cut be quickly produced, it also would be more beneficial in its implementation.

Fourth, the Committee on Ways and Means should continue to assign first priority to tax reform. It is inadvisable, however, to incorporate ill-considered statutory changes in surtax-extension legislation merely for the appearance of "tax reform." By the same token, allowing the surcharge to lapse until a comprehensive reform measure is forthcoming would impose on low- and middle-income families an economic hardship greater than the benefits accruing from statutory revision.

Fifth, the administration must intensify its efforts to bring an early end to our Vietnam involvement. When this is accomplished, tax cuts not only will be feasible but economically desirable. Too, funds then can be redirected to programs designed to cope with our more pressing domestic needs.

Mr. GUDE. Mr. Speaker, will the gentleman yield?

Mr. WHALEN. I am happy to yield to the gentleman from Maryland.

Mr. GUDE. Mr. Speaker, I would certainly like to commend the gentleman from Ohio for his excellent statement on the surtax and the investment tax credit.

In regard to the extension of the surtax, I was wondering if the gentleman from Ohio could comment on the question of whether this extension would yield the best results if it were linked with certain cuts in spending by Congress? I know this had been a subject of considerable comment and might well be something to be debated on the House floor in the near future.

Mr. WHALEN. I thank the gentleman for that question. I think it is a very pertinent one. As you know, in 1968 we did not only increase taxes by 10 percent but we also limited expenditures. Certainly, expenditures are a component of fiscal policy. Therefore, I would hope that we do place some kind of limitation on expenditures.

However, what concerned me last year was the fact that we did not list these limitations specifically but rather allowing the Bureau of the Budget and thus the President himself to make the final determination. I would hope, therefore, that if we have any expenditure limitation for the fiscal year 1970 that the Congress will specifically state what areas should be cut. I think to do otherwise would be a derogation of our responsibility.

Mr. GUDE. I assume, then, that the gentleman would prefer specific areas as possibilities for cuts in the budget, rather than the more problematic across-the-board cuts.

Mr. WHALEN. I would prefer to see specific cuts rather than across-the-board cuts, as I indicated.

At this time, however, I do not have any specific cuts to recommend. I certainly would make a very strong attempt to accommodate the gentleman, however,

later on when I get in this specific area with more detailed study.

Mr. GUDE. I thank the gentleman.

Mr. SCHWENGEL. Mr. Speaker, will the gentleman yield?

Mr. WHALEN. I yield to the gentleman from Iowa.

Mr. SCHWENGEL. Mr. Speaker, I join in the accolade that has already been extended to the gentleman for talking to us on this very important question that is before the Congress. I have some ideas on this myself, and from time to time I have been speaking on them.

I am particularly interested in doing something about plugging loopholes which I think can do much to control the forces that cause inflation.

I commend the gentleman for his very fine statement, and I hope many of our colleagues will read his statement in the RECORD and hopefully respond to it.

JOHN CARDINAL WRIGHT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania, Mr. SAYLOR, is recognized for 5 minutes.

Mr. SAYLOR. Mr. Speaker, not long ago, I talked with a youngster whose father had just come home on leave after more than a year in Vietnam. "Is it not great to have your dad back home?" I asked. "Yes," the youngster said, "but he will have to leave next month and I do not know when I will see him again."

Today, the people of the Diocese of Pittsburgh are suffering a similar conflict of sentiment. John Cardinal Wright came home again after his elevation to the Sacred College of Cardinals in Rome, but next month he must leave to take up his new duties in the Vatican curia.

From the time that he was installed as bishop of Pittsburgh, there was no doubt that he was destined for an even more important mission, and the area has been fortunate to have enjoyed, for more than a decade, the presence of this man of brilliance, humility, piety, and of concern for his fellow human beings.

It was my own pleasure to have been associated with Bishop Wright, if only briefly, when we were recipients of honorary doctorates at St. Francis College in Loretto, Pa. I cherish this experience and consider it a double honor to have shared the occasion with Bishop Wright.

The Pittsburgh Catholic of May 9 devoted a large portion of its pages to the accomplishments of John Cardinal Wright. The RECORD should at least include this paragraph from a biographical sketch of the new cardinal.

What everyone does not know is that there is also a private, unpublicized involvement—one that makes Bishop Wright available almost any hour of any day for any type of good work. He concerns himself about abandoned babies, unwed mothers, the disturbed and the distressed; he frequently visits the wake of strangers beset by tragedy, and his pocketbook opens generously to people in need.

Another column, "A Protestant View," in Sunday's Pittsburgh Catholic, is a report by the Rev. W. Lee Hicks, executive

director, Council of Churches of the Greater Pittsburgh Area. This portion, too, must be preserved in the Record, for it comes from one of the ecumenical guests on Cardinal Wright's consistory trip to Rome:

"We are here to witness one of the most significant moments in the life of a sister Church. In it all, we have come to recognize and appreciate meanings that are foreign to us, yet so real to Catholic brethren. We sense a spirit, an attitude and an openness that makes us wonder 'why all the misunderstanding over the years?' We can see plainly the differences, but we can also see in the ceremony and the quiet moving of the Spirit of God the real unity that is ours in the deeper things of importance. We do serve the same Lord. We call all men to the same Christ. We look to the same Holy Spirit to lead us. And we see in the Church the movement and working of God. And we see in one another Christian brethren serving the same God in a little different way.

Mr. Speaker, the Pittsburgh Diocese and far beyond will deeply miss John Cardinal Wright, but all the world will benefit from his elevation to a position of universal influence. May God continue to guide him and care for him.

SCANDAL AT SBA—VI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 10 minutes.

Mr. GONZALEZ. Mr. Speaker, if you had spent more than 2 years seeking a loan from the Small Business Administration, and if at last that loan came through, would you fail to pick up your check? You might if you had never needed the loan in the first place, but then if you had never needed the money you would not have campaigned for it so long and hard. You might fail to pick up your check if you thought that you might get more money by waiting.

If you had just received a study showing that you could have a much bigger company, would you complain? You might if you wanted nothing more, and had all you needed. You might also complain if you thought somebody was trying to steal you blind.

Mr. Speaker, a loan applicant at SBA did campaign for a loan for better than 2 years before he got it, and he did fail to collect his loan, not because he did not need the money, but because he thought he could get more by waiting. This applicant also complained when he received an SBA study showing that he could do great things, for the plain and simple reason that he believed his supposed benefactors were trying to steal him blind. Mr. Speaker, the special assistant to the Administrator of the Small Business Administration has publicly called me a liar. I am not in the habit of lying, and his scandalous conduct is beneath contempt; and if he can disprove what I am about to say to the House, then let him do it. I am ready to hear the facts.

Let him answer the questions, if he can. Let him produce the results of investigations. But let us have done with threats and bluster; let us have done

with smokescreens and eyewash; let us have answers.

This functionary knows that I can be challenged in court, if he likes, because I have made my charges in public, not on the floor of the House; I made my charges in a press conference before I presented them on the floor of this House, precisely because I do not hide behind my immunity, and precisely because I am confident in my facts, and in my case. Let him sue, but let him answer the case I now offer.

Let us see who is lying. This factotum says that the Civil Service Commission investigated his background thoroughly before he took his job as special assistant to the Administrator. The fact is that no investigation on this man was even requested for a month after he was on the job, and indeed no investigation report was available until well after he was under a cloud of suspicion. It is not possible that this man was investigated before he took his job, unless the record submitted by the Civil Service Commission is false, and I do not think it is. If I am a liar with regard to this point, then the fault lies not on my shoulders, but on those of the Chairman of the Civil Service Commission, who wrote me as follows:

U.S. CIVIL SERVICE COMMISSION,
Washington, D.C., May 9, 1969.

Hon. HENRY B. GONZALEZ,
House of Representatives,
Washington, D.C.

DEAR Mr. GONZALEZ: Reference is made to your letter of April 30, 1969, requesting information concerning Mr. Albert Fuentes, Special Assistant to the Director, Small Business Administration.

On March 3, 1969, the Small Business Administration gave Mr. Fuentes a temporary appointment for 30 days. On April 3, 1969, this appointment was converted to a Schedule C appointment, GS-15, Step 1, under the authority of Sec. 213.3332(b) of the Commission's regulations. An appointment of this type does not require prior approval of the Civil Service Commission.

The Small Business Administration requested the Civil Service Commission to conduct a full field investigation on April 4, 1969. The results of our investigation were forwarded to Small Business Administration on May 7, 1969 noting that there is a current investigation being conducted by the FBI.

Sincerely yours,

ROBERT E. HAMPTON,
Chairman.

Fuentes accuses me of embarrassing the President, the SBA and Congress, he even accuses me of embarrassing the chairman of the Banking and Currency Committee, the distinguished WRIGHT PATMAN. I am not the man causing embarrassment; it is Fuentes, because it is he, not I, who is entangled in a web of intrigue. If the Administrator of the SBA is embarrassed, it may be that it is because he was asked on April 26 to investigate the Fuentes matter, and although Fuentes claims the investigation is complete, I have never talked to any investigator. More curiously still the Administrator says that his files have all been turned over to the Department of Justice—not to the committee chairman who requested the study in the first place. If Fuentes is innocent, why should

this information be denied to the chairman of the Committee on Banking and Currency? It is not I, and not the distinguished chairman, who is playing cat and mouse or hide and seek—it is the SBA. And if such games are embarrassing, let the players be embarrassed—not those who like myself are seeking only the facts.

These facts are not in dispute:

First, that Albert Fuentes set up two corporate names on February 28, 1969, and that 3 days later he assumed his post as assistant to the Administrator of the Small Business Administration.

Second, that Emmanuel Salaiz had an approved SBA loan in the amount of \$10,000, which he did not collect and has not to this day collected.

Third, that Albert Fuentes caused a special study to be made of Salaiz' company, the E. & S. Sales Co. This study was performed by W. J. Garvin, a high ranking professional at SBA. Such a study as this—a complete economic outlook survey—has never to my knowledge ever been performed for a single loan applicant. What is more extraordinary is that a study would be made of a company whose loan was already approved and ready for disbursement.

Fourth, that the Garvin study was transmitted to Albert Fuentes on March 20.

Fifth, that Albert Fuentes and others met in the offices that Fuentes uses for a business address, and then and there demanded 49 percent of the applicant's business in return for a larger loan.

Sixth, that the applicant related all of this to the Federal Bureau of Investigation on April 22, and again to a notary public on April 24.

Seventh, that Albert Fuentes was seen frequently in the company of one Eddie Montez, who admits to having what he deems to be influence to sell—for a price.

Eighth, that Albert Fuentes beyond any shadow of a doubt was in the meeting, and that it was in an office address he claims for himself, with people he is known to associate with, with extraordinary documents he claimed to have by sheer coincidence, and witnessed the loan applicant being asked for 49 percent of his company in exchange for an SBA loan. Is it not strange that the special assistant to the Administrator of SBA can calmly witness one man brutally shaking another down, and then flying off with him into the blue later that night, never asking a question or having a second thought. How could he have done this unless he were amoral, insensitive, or expected to gain personally from it, or all three? But this is no more unusual than the fact that this man can gratuitously insult me, and then claim that he must refrain from politics because he is covered by the Hatch Act. Nor is it any more unusual than the fact that Fuentes claims to have filed four statements in his defense with the Committee on Banking and Currency—statements which the chief counsel of the committee informs me have not reached him as yet, if indeed they exist at all. Neither is it any more unusual

than the game of cat and mouse being played with the facts discovered by various investigations into this affair.

Fuentes claims that he was trying to help develop minority business enterprise. It has long been said that the last refuge of a scoundrel is patriotism. This man is now defending his actions on the ground that he was helping what he calls "la raza"; he is appealing to his loyalty to "la raza." Mr. Speaker, that is his right and his privilege, but it is no defense; one does not help people by taking their livelihood away from them. One does not help a friend by delivering him to vultures, or by being a vulture.

Mr. Speaker, this entire affair is rife with scandal. I believe that every effort must be exerted at once to clear the air and determine the truth. And in the meanwhile I think that this man Fuentes should be suspended from the further conduct of his duty. Let the Administrator show his concern for the good name of his agency by acting at once, and let Fuentes show his good faith by producing more facts and less fiction, more integrity and less bluster, and more forthrightness and less malevolence.

OMNIBUS SOCIAL SECURITY LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. TUNNEY), is recognized for 10 minutes.

Mr. TUNNEY. Mr. Speaker, I have introduced legislation to amend the social security act to bring the program more in line with the immediate needs of our senior citizens.

My bill would do the following:

First. Increase social security benefits immediately by 15 percent and raise the minimum monthly benefit to \$75.

Second. Provide automatic increases in social security benefits in order to reflect cost of living increases.

Third. Increase benefits for certain individuals age 72.

Fourth. Increase from \$1,680 to \$3,600, the amount of annual outside earnings permitted without loss of social security benefits.

Fifth. Extend medicare benefits to individuals aged 62 and to the disabled.

Sixth. Provide medicare coverage for prescribed drugs.

Seventh. Allow all medical expenses for the elderly to be tax deductible.

It is important that the social security program be continually updated. Increasing numbers of our population join the ranks of the senior citizens each year. An American born in 1900 could expect to reach his 40th birthday, while an American born today can expect to reach his 70th. There are now about 22 million Americans who are 65 or over, comprising 10 percent of our population, and exceeding the combined population of 20 States.

By the year 2000 the United States will have over 28 million senior citizens, a 40 percent increase. The State of California alone will have over 2½ million senior citizens by 1985—an increase of 1 million.

Yet, too many older Americans are forced to live at or below the level of poverty because of inadequate social security. Eighty-five percent of the elderly have annual incomes of less than \$2,500 and 66 percent receive less than \$1,500 a year. More than 5 million senior citizens live below the poverty level and 10 percent or over 2 million, are teetering on the brink of poverty.

It is estimated that an immediate 15 percent increase in social security benefits along with a \$75 monthly minimum would help to move 1 million senior citizens out of poverty.

The time for putting social security benefits on a more realistic basis is long past due. The cost of living has increased 25 percent since 1954, and those on fixed incomes have taken the hardest pounding from this increase.

I believe that automatic social security increases tied to the rising cost of living will help to insure that senior citizens can maintain their living standards commensurate with the rest of the Nation. However, I want to make it clear that this provision should not preclude necessary periodic increases in benefits.

The increase in the amount of allowable outside earnings would help senior citizens continue to remain active. This provision would make meaningful current efforts to utilize senior citizens in community activities. I have introduced legislation to establish under the Older Americans Act of 1965, a national senior service corps to assist in such efforts. From experience I know that many senior citizens can and want to make meaningful contributions to their local communities.

Although medicare has provided considerable protection, senior citizens still suffer from ever spiralling health and drug costs. The elderly spend three times more for drugs than those under 65. Those 65 and older spend over \$600 million for prescribed drugs and millions more for nonprescribed drugs. Over 4 million elderly each spend more than \$100 a year for medicine, while 600,000 elderly spend in excess of \$250 annually. An estimated 80 percent suffer from an illness or disability of some kind. Modern medical care can alleviate or control most of their illnesses but only at a heavy price. For those age 65 or older, per capita expenditure for personal health care rose 15 percent, from \$423 in fiscal year 1966 to \$486 in fiscal year 1967. Since World War II, prices for medical services have risen 129 percent.

I, therefore, feel that it is necessary to bring all costs of prescription drugs under medicare, and allow all medical expenses to be tax deductible for our senior citizens.

Medicare coverage would also be extended to the disabled. Since their earning power is greatly diminished they must be provided proper medical care. My bill also lowers the eligibility age for medicare to 62.

The enactment of an omnibus social security bill is vital. Our senior citizens have made great contributions to our Nation's progress, yet many are now re-

ceiving little thanks and even less benefit for their efforts.

We must rededicate ourselves to make it possible for them to enjoy more fully the results of their most productive years. It is estimated that fiscal year 1969 will show a gross national product of \$921 billion compared to \$789.7 billion in 1967. This omnibus social security bill must be promptly enacted to enable our Nation's elderly to benefit from our growing economy.

TUFTS PROFESSOR WHO SAW RED TAKEOVER IN CUBA HAS WARNING FOR AMERICANS

(Mr. McCORMACK (at the request of Mr. ALBERT) was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. McCORMACK. Mr. Speaker, in my extension of remarks I inclose a letter written by Ernesto E. Blanco, associate professor, Department of Engineering and Graphics and Design, Tufts University, Medford, Mass., which appeared in the Boston Herald-Traveler of May 5, 1969.

Professor Blanco pointedly states in his letter the type of conditions that happened in Germany and Cuba. I include the informative letter of Professor Blanco in my remarks because what he stated therein is so applicable to some of the conditions of today and in relation to organized minority actions in some colleges and universities:

THE HERALD TRAVELER'S READER: TUFTS PROFESSOR WHO SAW RED TAKEOVER IN CUBA HAS A WARNING FOR AMERICANS

To the HERALD TRAVELER EDITOR:

I have been at that distinguished university frequently and had several friends on its faculty, but that day's visit produced an unforgettable impression in my mind. The once quiet intellectual atmosphere was gone. The austere buildings had been desecrated, covered with signs and slogans. The large crowds milling around the main yard, shouting Marxist slogans, threats, and demands, were quite different from those of previous times. They were an unkempt rabble, boisterous, filthy, and foul-mouthed. Their group leaders wore red armbands and continuously issued orders. At intervals they coached their followers to shout demands, and chant clichés, sometimes working them up to a frenzy. A group was busy tearing up a flag brought down from one of the buildings to fashion armbands. All around rioters frequently raised their clenched fists in the familiar Marxist sign of victory.

I made my way toward a dazzled, frightened gentleman whom I recognized as a professor of social science who also taught at our institution nearby. He was half-leaning against a column holding his right arm. Looking at me without seeing me he kept mumbling, why, why, why? He was bewildered and obviously injured. After a while, he recognized me and advised me to get out. He explained that moments before a crowd had evicted him from his office, physically beaten him, and shoved him down the entrance steps where he had tripped and fallen. He said that in the group that attacked him were many that were not students.

By that time the revolutionaries had seized some buildings and were shouting through loudspeakers the familiar Marxist rhetoric: "Freedom now"; "Let the fascist

pigs come out, we will take care of them"; "Lenin won, Mao won, Castro won and we shall overcome." The clenched fists were again raised and more similar slogan shouted. Berkeley? Columbia? Harvard? No. The place was Havana University in mid-February 1959.

Rioting had erupted several days before, caused by students' demands of dismissal against members of the faculty and administration known for anti-Communist views. Public trials for treason were demanded and obtained. Several professors were imprisoned under accusations of treason followed by kangaroo trials. Others like my friend had found it impossible to believe the magnitude of the perversion.

Most of the top revolutionary leaders were faculty members of long standing Marxist-Leninist militancy who, protected by their academic immunity, had always operated freely within the university and were tolerated as nothing but "odd balls." Others had carefully concealed their real views until the takeover took place. Personal vendettas and abuses followed in an orgy of purges, vilification, and frequent physical attacks. Through such "cultural revolution" the complete "restructuring of the university" was accomplished along Marxist-Leninist lines. The essential first step in the establishment of totalitarianism had been successfully taken and academic freedom ruthlessly stamped out. The situation was identical to the elimination of the Jewish intellectual class in Nazi Germany.

In the meantime, our University of Villanova was militarily occupied and closed down. All degrees issued were invalidated as "punishment" for having remained open during Batista's regime.

With the elimination of anti-Communist faculty members through underhanded tactics, intimidation, terrorism, and overt persecution the country was deprived of intellectual balance and democratic leadership. The way was thus opened for the destruction of the productive middle classes and the subjugation of the masses.

Looking back to that nightmare I shudder to see the ominous similarities with events occurring at American universities today. The red clenched fists in posters displayed at Harvard, the same vicious Marxist rhetoric and slogans; the red armbands worn by many who do not fathom their hidden original meaning; the cries of "We shall overcome," initially heard in Spanish as "Venceremos" in the Havana of 1959; the extensive use of loaded words like "power elite," "fascist pigs," "establishment," "American imperialism," "the movement," "class struggle," most of which have now become staple words used by many ignorants who do not know Marxist-Leninist standard semantics. All are symptoms which when taken in isolation mean very little but when put together reveal clearly the Marxist syndrome.

Tufts has been so far spared the violence suffered by other institutions, but the ferment is all too visible. SDS is the vanguard of the "movement." Its close ties with the Progressive Labor Party, a Maoist organization, have been abundantly exposed. Recently Gus Hall, secretary general of the Communist Party of the United States, was quoted as having said that his campus goals were being achieved through SDS. Every goal of SDS coincides with the orientation laid down for the party in its paper, the "Daily World," which can be purchased at Harvard Square for a few cents.

I will be vilified beyond recognition by some of my colleagues for writing this, but I'll be damned if I am going to sit idle and silent while all this is going on around me. I have seen too many ignorant or cowardly people receive a bullet in the neck with their

hands tied at the back because they did not want to "get involved" at the right time.

It is absolutely shameful that a foreigner has to take up the defense of this country's integrity and ideals while so many well qualified Americans feel neutralized into impotence by the fear of becoming unpopular while their nation so clearly goes down the road to chaos, destruction, and eventual totalitarianism.

ERNESTO E. BLANCO,

Associate Professor, Department of Engineering Graphics and Design, Tufts University.

MEDFORD.

HELPFUL POLICEMAN

To the HERALD TRAVELER EDITOR:

In these days when very few people have a good word for the police, I was agreeably surprised to meet Patrolman Whalen of the State Police, Norwell Barracks.

I had a breakdown on the Southeast Expressway at Weymouth at night, and without his assistance I would have been lost. With the help he gave me I was back on the road again in one-half hour.

He got me out of a very dangerous situation in a very short time; and, less important, saved me a great deal of expense. He was extremely courteous and helpful to me, and I think his actions reflect the attitude of most of the State Police that I have met.

JOHN J. BROUGHTON.

MARSHFIELD.

EXEMPTION FROM LIMITATION

(Mr. DANIELS of New Jersey asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DANIELS of New Jersey. Mr. Speaker, I rise in support of a bill I have introduced today to exempt the Railroad Retirement Board from the limitations imposed by Public Law 90-364.

The railroad retirement system is fully funded by the taxes paid by the employees and the carriers in the railroad industry. No part of the administrative cost of the system, including staff salaries, is borne by the Federal Treasury.

The Railroad Retirement Board, along with all other executive branch agencies of the Federal Government, is subject to the provisions of the Revenue and Expenditure Control Act of 1968, Public Law 90-364. Under this statute, the Director of the Bureau of the Budget is authorized to reassign vacancies among the agencies to achieve an overall reduction of Government positions in an amount equal to the appointment of not more than 75 percent of the permanent positions becoming vacant after June 30, 1968. This restriction is to apply until the employment total is reduced to the level of June 1966.

Since September 1968, the Railroad Retirement Board has been instructed to fill not more than 70 percent of the positions becoming vacant. By September 1969, unless this restriction is lifted, the Railroad Retirement Board staff will reach the June 1966 level of 1,661 employees.

This restriction in hiring works a special hardship on the Railroad Retirement Board and necessitates a most inefficient and costly operation of a system which is financed completely by private funds.

First. The June 1966 employment by the Railroad Retirement Board represents the low point in the Board's employment history. After a long series of staff contractions, permanent employees were reduced from 2,397 as of June 30, 1958, to 1,661 as of June 30, 1966.

Second. Following this voluntary reduction in staff, the Board has been required to handle substantial new work loads arising from the passage of a series of amendments to the Social Security and Railroad Retirement Acts.

Compliance with the recruitment restrictions applied by Public Law 90-364 has forced the Railroad Retirement Board into highly inefficient practices aside from the diseconomies of the present operation. The Board is falling further and further behind in processing the claims for benefits to which the employees and members of their families are entitled by law. Despite continuing and regular overtime employment, which has long since reached the point of diminishing returns in productive work, the backlog of unprocessed claims continues to grow and the dissatisfaction of those entitled to receive prompt attention on their claims becomes greater.

The Railroad Retirement Board, closely watched by railroad management and railroad labor in its enviable administrative performance, now experiences a 400-percent increase in the delay of handling initial retirement and survival claims pending more than 60 days from filing. There is a 1,100-percent increase in the number of claims pending more than 120 days. Unless the restrictions of Public Law 90-364 are lifted, this situation will continue to worsen.

Mr. Speaker, for the reasons which I have outlined I urge early consideration of this vitally needed piece of legislation which will cost the taxpayers nothing. I hope all of my colleagues will join me in supporting this badly needed exemption.

CONGRESSMAN FRANK ANNUNZIO SUPPORTS H.R. 6808 AND S. 408—BILLS TO IMPROVE THE VETERANS' BENEFIT LAWS

(Mr. ANNUNZIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ANNUNZIO. Mr. Speaker, over the years this country has established a system of veterans' benefits which is both comprehensive and well-designed. The two veterans' bills before the House today, H.R. 6808 and S. 408, do not make dramatic innovations in that system; they do, however, make a number of highly significant changes in present programs.

One of the reasons why our veterans' benefit system has been so successful is the continuing attention which the Committee on Veterans Affairs under the able leadership of its distinguished chairman, Hon. OLIN E. TEAGUE, of Texas, has paid to each of our veterans' programs so as constantly to improve and update them. H.R. 6808 and S. 408 are good examples of that continuing

attention; I am very pleased to support both of these bills.

H.R. 6808 amends some of the provisions relating to the educational assistance available to veterans under the GI bill. One of the main sections of H.R. 6808 is concerned with the prohibition in the law against duplicate Federal payments. Under present law, an individual is not permitted to get an educational allowance from the Veterans' Administration at the same time he is receiving similar assistance under any other Federal program. In view of the increasing Federal role in this area, the restriction as it now stands has proved to be too broadly drawn. For example, it means that a veteran who wants to participate in a retraining program under the Manpower Development and Training Act must do so without getting the veterans' benefits to which he would otherwise be entitled even though the total allowances from both sources can hardly be called lavish. H.R. 6808 would correct this type of situation by removing the general restriction against any sort of dual benefits and replacing it with a limitation aimed only at certain clearly unwarranted duplications of payment involving veterans who are also full-time employees of the Federal Government.

H.R. 6808 also makes a number of other changes in the law governing educational assistance for veterans and their dependents. Without going into the fine details of all the provisions, it can be said in general that they are designed to make the GI bill a sharper and better law. For example, some of these provisions clarify and establish a greater degree of uniformity in those sections of the law which attempt to make sure that a valid educational or vocational objective is served by the allowances paid.

The other veterans' bill before the House today is S. 408. This bill deals with a number of the provisions designed to assist veterans and obtaining adequate housing.

One of these provisions authorizes the Veterans' Administration to make grants to certain severely disabled veterans who require specially adapted housing. Since this program was started in 1948, about 10,000 veterans have received such grants. At present, however, the maximum amount that may be paid under this provision is \$10,000. S. 408 would raise this limit by 50 percent to \$15,000. In addition, the bill would expand the coverage of the program to permit these grants to be made to certain veterans who are presently ineligible even though their disabilities are so severe as to make it impossible to get around without resorting to a wheelchair.

Other sections of S. 408 update the direct loan and loan guaranty provisions of the law. At present, there is a general limit of \$17,500 on the amount that the Veterans' Administration may loan a veteran who is unable to obtain a VA loan from a private lending institution. S. 408 increases this limit to the more realistic figure of \$25,000. The bill also revises part of the law governing VA loan insurance so as to make it possible for veterans to purchase homes in some

of the new types of housing developments.

Veterans' programs, like many other things, are affected by the passage of time in two ways. In one respect, time sees the circumstances surrounding the programs change; prices, for example, tend to go up and in so doing may make unrealistic the dollar limitations originally enacted. The passage of time also gives increased experience in the operation of programs and brings to light areas that require change even apart from any consideration of new circumstances. Both of these factors have operated to disclose problem areas where improvement is needed in our programs of educational assistance and housing assistance for veterans.

H.R. 6808 and S. 408 represent prompt and effective answers to those problems, and deserve the bipartisan support of the Congress. I, therefore, urge the early enactment of this legislation.

CHARLES SIRAGUSA DEVOTES LIFETIME OF SERVICE TO THE PUBLIC INTEREST

(Mr. ANNUNZIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ANNUNZIO. Mr. Speaker, it gives me great pleasure today to call to the attention of my colleagues a speech given by Mr. Charles Siragusa on his retirement as executive director of the Illinois Crime Commission, in which capacity he served for over 4 years.

Prior to his service with the Illinois Crime Commission, Charles Siragusa was Deputy Commissioner of the U.S. Bureau of Narcotics. He served for 28 years with that Bureau and with the Immigration and Naturalization Service.

He is a recipient of the U.S. Treasury Department's highest award, the Exceptional Civilian Service Honor Gold Medal, and also the Secretary of the Treasury's Special Award for Distinguished Service Against Organized Crime, the Colombo Award of 1960 as the Italian-American of the year, and he has been knighted by the Italian Government and included in "Who's Who" since 1963.

Mr. Siragusa also was a charter member of Governor of Illinois Otto Kerner's Committee on Criminal Justice, was a member of Governor of Illinois Richard Ogilvie's Illinois Law Enforcement Commission, and from May to August 1951 served as chief investigator of the Senate Subcommittee to Investigate Crime in Interstate Commerce.

Mr. Siragusa holds a bachelor of science degree in education from New York University, and during his many years of public service, has dedicated himself completely to the cause of law enforcement.

On February 29, 1969, Mr. Siragusa left his position as executive director of the Illinois Crime Commission. He has now taken on a new assignment, as vice president in charge of customer relations with the Gunthorp-Warren Printing Co., located at 123 North Wacker Drive,

Chicago, Ill., in my own 7th Congressional District.

I would like to extend my best wishes to Mr. Siragusa for abundant good health and continuing success in his career, and to include at this point in the CONGRESSIONAL RECORD the text of the speech he gave on the occasion of his retirement from the Illinois Crime Commission. The speech appeared in the April 1969 issue of the "Illinois Police Association Official Journal," and appears here in its entirety, as follows:

SIRAGUSA BIDS FAREWELL: "I RELISHED EVERY MINUTE"

(By Charles Siragusa)

(EDITOR'S NOTE.—The following farewell address was delivered by Charles Siragusa at a dinner honoring him for his exceptional work as the Executive Director of the Illinois Crime Commission. Present were the various leaders of the Legislature, State Officials, and civic leaders of the City of Chicago, as well as representatives of the law enforcement field.)

Mr. chairman, reverend clergy, honored guests, distinguished ladies and gentlemen, friends.

Thanks very much for the beautiful plaque and for this memorable occasion.

Tonight I come to the end of one road and the beginning of another. The old road was bumpy in spots. I still have a few lumps to show for it, but I relished every minute of it.

I can only hope my new association with the Gunthorp-Warren Printing Company will be just as rewarding.

I commend the members of the program committee, my Commission co-chairman Senator Ev Laughlin and Jack Cassidy; my dear friends Mrs. Niehoff, Al Gallo, Bob Walker and Ed McElroy.

I wish to express my appreciation to the members, past and present, of the Illinois Crime Investigating Commission for their splendid support these past five years, and to voice my highest esteem and admiration for those gentlemen.

I am especially indebted to the loyal, dedicated and courageous efforts of our staff. My sincerest best wishes to my successor Bob Walker.

For the outstanding cooperation of the Chicago Police Department and the Illinois Department of Public Safety—who assigned some of their finest police officers to work full time for the Commission—I shall always be grateful.

I also wish to acknowledge my thanks for the support of Governor Richard B. Ogilvie, former Governors Samuel H. Shapiro and Otto Kerner—my gratitude for the assistance of Attorney General Scott and former Attorney General Clark—for the support of the Illinois legislature, and to the majority and minority leaders of both houses.

To all the public officials and employees in city, county governments within the State of Illinois, with whom we enjoyed excellent relations, I also extend warm thanks.

To the news media I express appreciation for their fair and accurate reporting of our activities. I would particularly salute the dynamic Chicago news media for their penetrating coverage of organized crime, and their investigative reporting, which in my judgment reflect public service of inestimable value.

Finally, but perhaps of greatest importance to me, my warm thanks to the people of this great state. They have been most generous in their encouragement of our activities.

My views concerning organized crime are rather well known. Consequently, I will not dwell on that topic.

When I was approached by Commissioner Dave Bradshaw in the fall of 1963 to consider the position of Executive Director, I

received all kinds of gratuitous advice. I was told that I would not last more than six months.

I was told by my eastern friends that the Hollywood image of Al Capone still prevailed—Chicago was still the land of the St. Valentine's Day Massacre.

Once again the "image makers" ran true to form. They were dead wrong. What I found in Chicago was a home. I found my kind of people, the squares.

The squares who do not fit neatly into groups of angle players and corner cutters. People with old fashioned ideas of honesty, loyalty, courage and thrift.

I found people who gave overwhelming support to the Mayor for his courage and resolve during the Democratic National Convention. I would like to talk to that point, if I may.

Our cities, universities and our nation are at this very moment, engaged in a war for survival. A struggle for men's minds and souls. A war more definite and terminal than any war ever fought with guns, bullets and bombs.

The penalty for defeat is the destruction of the American way of life.

The disorders that plague our college campuses and our cities must be stopped.

This was the stand taken in August 1968 by the city administration under the courageous leadership of Mayor Richard J. Daley, with the overwhelming support of the citizens of Chicago, and the State of Illinois.

We all know what followed. The shotgun blasts of snide criticism from all over the country compounded the false image.

The national wave of editorials, written and oral, calculated to create and foster that unjust image. All so incredibly untrue.

We were bombarded about the virtues of the new left—the so-called activist groups—the Students for a Democratic Society. What a travesty upon semantics! A Democratic society, my foot. Their members are political, social, economic and patriotic dropouts.

The problem in the universities too often lies in the absence of leadership within the school administrations. What in the world is wrong with them?

It is the primary duty and responsibility of leadership to provide and maintain order, not to be intimidated by militants who conspire to disintegrate respect for law and to deny equal justice for all.

A growing number of university administrators and public officials understand these elementary truths, as evidenced by the recent notice issued at Notre Dame by Father Theodore M. Hesburgh: "Any student or professor who seizes a building will be given 15 minutes of meditation to cease and desist. Those who pursue their criminal course will then be suspended, expelled or arrested. Thereafter, the law will deal with them."

President Nixon's recent endorsement of Father Hesburgh's forthright ultimatum reflects the gravity of the problem and the country's demand to put a stop to this nonsense on the street and campuses alike. The country is fed up with it.

The laws are already on the books. Enforcement is the key. Eldridge Cleaver is in self-imposed exile. Tom Hayden was convicted. Jerry Rubin was convicted. Huey Newton is in prison. The list is growing. The squares are winning, slowly but surely.

It now becomes crystal clear. Too many months already have been wasted in trying to reason with unreason. Nothing more can be gained by excess of demands which parallel extortion and blackmail.

The line is clear. Everyone comprehends the difference between peaceable protest and lawless anarchy. One is the antithesis of the other. It is as simple as that.

Today Chicago is the most progressive city in America, and indeed the world. It has earned, and will retain, that distinction be-

cause of its great leadership, but more particularly because of its people. Political partisanship has not divided our unanimity against those who would rip up our streets and our campuses, in abject disregard for the rights of the majority.

We are people who are for participation and against sitting life out. For simplicity and against the sophistication which would excuse, condone and legitimize unlawful conduct—for laughter and against snickering and obscenity—for the direct and against the devious.

We favor education and are against the pretense of learning—for building up and against tearing down—for peaceful change—for America and against her enemies.

JUSTICE DEMANDED OF SUPREME COURT

(Mr. RARICK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RARICK. Mr. Speaker, if the whitewashers think that disposing of Abe Fortas will suffice to appease the American people, they are mistaken. Financial involvement and influence spheres continue to unfold implicating additional Federal judges. Justice Abe Fortas was but the king-bolt to the judicial marketplace.

Chief Justice Earl Warren, this Sunday, May 18th, accepted a stone appreciation plaque from a special interest group here in Washington. For what and when earned? Warren, deeply ridden with feelings of guilt, exposed his awareness of impropriety when he commented:

When I agreed to come here I thought I would be in retirement and not need to be so strict about such things.

The question immediately arises: Just what did the Chief Justice do, and who did he show partiality to in order to gain such special recognition? As Chief Justice of the Court he and his work belonged to all the people, that is, if he followed the law with solemn impartiality. It is, of course, merely coincidental that May 17 marked the 15th anniversary of the infamous Brown against Topeka Board of Education case—but it suggests reward for biased judicial decisions on prejudged facts—unmitigated whether retired or not.

Justice Douglas is now revealed as the recipient of \$72,000 for services or prestige rendered the Parvin Foundation which is linked to gambling dens in Las Vegas.

The Fortas case is not yet swept under the carpet. Even the Washington Post carried a Sunday lead editorial entitled, "The Fortas Case Cannot be Closed."

The confidence of the American people in the Federal judiciary cannot be restored until Abe Fortas' resignation is followed by a like departure of Earl Warren, William Douglas, and William Brennan.

Mr. Speaker, various news clippings follow my remarks:

[From the Washington (D.C.), Daily News, May 19, 1969]

DOUGLAS PAID \$72,000 BY PARVIN FOUNDATION
Between 1962 and 1968, Supreme Court Justice William O. Douglas was paid \$72,000

for his advice on how to spend about \$450,000 in charitable contributions made by the Parvin Foundation, a tax-exempt institution partially financed by an interest in a Las Vegas gambling hotel.

Justice Douglas' association with the foundation, which ignited a flurry of controversy when first revealed two years ago, has come under renewed public and congressional attack in the wake of the resignation from the Supreme Court of his fellow associate Justice and protege, Abe Fortas.

In Congress the question is being asked whether Mr. Fortas' acceptance, but later return, of a \$20,000 fee from the family foundation of jailed financier Louis E. Wolfson is much different from the \$12,000 a year Justice Douglas earns as president of another foundation created by a man once named by the government as an alleged co-conspirator with Wolfson in a stock manipulation case.

That man is Albert Parvin, former president of the Parvin-Dohrmann Co., a firm that originally supplied equipment for hospitals and other businesses but later acquired interests on the Las Vegas gambling strip. Mr. Parvin set up the foundation—principally supported by an interest in the Flamingo Hotel in Las Vegas—in 1960 after reading a book by Justice Douglas.

NAMED PRESIDENT

He asked Justice Douglas to serve as president and director and Justice Douglas, according to another director, ex-newspaper editor Harry S. Ashmore, named a board to guide the foundation's activities.

Most of the activity over the last six years has centered on Justice Douglas' own pet project of stimulating the understanding of Western culture in Latin America's underdeveloped nations thru granting fellowships to promising young scholars from "emerging nations."

Besides the original Flamingo Hotel interest, the foundation owns shares in Parvin-Dohrmann which, in turn, owns the Aladdin, Fremont and Stardust hotels' casinos in Las Vegas.

BAKER LINKS

In 1965 when the Fremont casino was purchased by Parvin-Dohrmann the agreement stipulated that Edward Levinson, then an officer of the Fremont casino, was to be paid \$100,000-a-year for five years. Mr. Levinson invoked the Fifth Amendment against possible self-incrimination when called before a Senate Committee investigating the dealings of Robert G. (Bobby) Baker, former secretary of the Senate who later was convicted on several criminal counts.

Mr. Levinson was a co-stockholder with Baker in the Serv-U Corp., a vending machine firm from which some of Baker's troubles stemmed. The firm's counsel during part of the Serv-U case was Mr. Fortas.

The Parvin Foundation, it was learned, also hired Mr. Fortas' wife, attorney Carolyn Agger, in 1966 to look at its tax situation at a time when the IRS had begun an investigation of the foundation.

Mr. Ashmore said Mrs. Fortas employed the services of an independent auditing firm which proved nothing was wrong in the foundation's tax returns. Mr. Ashmore said he believes the IRS was satisfied because no action against the foundation ever was taken.

He said the difficulties with IRS apparently stemmed from the foundation's stock portfolio, which was being managed by a finance committee headed by Mr. Parvin. It was about this time that the foundation, in its 1966 returns, finally reported to IRS a transaction which took place in 1961.

In the 1961 deal, Mr. Parvin sold the foundation 95,000 shares of Webb and Knapp, Inc., a real estate and construction firm now in receivership, at market value.

Mr. Ashmore said he believes this transaction and the general management of the

portfolio had caused IRS concern. Since then the foundation's stock inventory has been managed by an independent brokerage firm, he said.

Mr. Parvin himself was named by a Federal grand jury in a bill of particulars as an alleged co-conspirator with Wolfson in the Merritt-Chapman Scott stock manipulation case. Mr. Parvin never was indicted.

[From the Washington (D.C.) Post, May 19, 1969]

**TWO TRIBUTES: WARREN, MEMORY OF
MASADA HONORED**
(By Louise Durbin)

Chief Justice of the United States Earl Warren broke a long-standing precedent of his own making Saturday night when he accepted an award from the Jewish Community Foundation at ceremonies marking the opening of the Masada exhibit in the Smithsonian Institution's Museum of Natural History. It was the first award that the Chief Justice has accepted during the 15 years he has led the Court.

"When I agreed to come here I thought I would be in retirement and not need to be so strict about such things," the Chief Justice told the crowd clustered in the rotunda after the award was presented to him by Charles E. Smith, president of the Jewish Community Foundation.

The award, a stone plaque, bears the inscription: "In appreciation of his enormous contributions to the cause of human freedom, human rights and human opportunities, particularly during his term as Chief Justice of the United States, the Jewish Community Foundation presents this award to Earl Warren of California, at the opening of an exhibit depicting a struggle for freedom in 73 CE when heroic Jews at the fortress Masada died by their own hands to escape enslavement."

"I want to accept it for the Court and not myself alone because I've always felt a Justice needs no reward except a satisfied conscience—and that he must have," because, Warren said, "every time you make a decision you help someone, and you hurt someone."

Speaking of the heritage left by the defenders at Masada, Chief Justice Warren added: "I know that as I see this exhibit I will be more grateful than ever that I live in a free country." He then viewed the exhibit with Dr. Gus Van Beek, the Smithsonian's curator of Old World anthropology, as his tour guide.

Displays ranged from fragments of scrolls in special glass cases where the humidity is controlled to preserve the precious documents to a display of excavating equipment: a wheelbarrow, yellow hard tin hat, rope ladder and pick axes.

The Warrens arrived at the Museum of Natural History on a chartered sightseeing bus that whisked the guests from a black tie buffet supper honoring the Warrens at the Robert H. Smith home in Bethesda to the gala Smithsonian opening.

The wife of the Israeli ambassador, Mrs. Yitzhak Rabin, recalled her first trip to Masada more than 20 years ago. By foot they crossed the desert, camping for two nights, then scaled the cliff to the top of the unexcavated rock. The fortress of Masada, built by King Herod in 40 B.C. to be his winter palace, was still completely buried.

"There was nothing—nothing but the rock," Mrs. Rabin said, adding that their imaginations filled in the details of the story. Here 960 men, women and children held out against 10,000 Romans for three years after Jerusalem was sacked in 70 A.D. and her people taken to Rome and paraded through the streets in slaves' chains.

To escape the same fate, the defenders of

Masada elected to kill one another when resistance was no longer possible. Only a few women and children hid and lived to tell the Roman conquerors of their empty victory.

Sheldon Cohen was chairman of the Masada exhibit, which is co-sponsored in Washington by the Jewish Community Foundation and the Smithsonian Institution. The exhibition is the first of a trio of dedicatory events for the Foundation's \$8 million, 22-acre complex on Montrose road in Rockville, which will be the new headquarters for the Jewish Community Center, the Hebrew Home for the Aged and the Jewish Social Service Agency.

Official dedication ceremonies will be held on June 15 preceded the evening before by a ball at the Washington Hilton Hotel, David Lloyd Kreeger is chairman of the dedication ceremonies. Mrs. Joseph B. Gildenhorn is chairman of the dedication ball.

[From the Washington (D.C.) Post, May 18, 1969]

THE FORTAS CASE CANNOT BE CLOSED

The reputation of the Supreme Court has suffered grievously in the last two weeks and its recovery would proceed more rapidly, no doubt, if the story of Mr. Fortas were quickly forgotten. Unfortunately, there are too many unanswered questions, too many public doubts for the books yet to be closed.

The public has been presented with two versions which conflict to such an extent that one or the other must be wrong. Mr. Fortas says simply that he agreed to work with the Wolfson Foundation in its charitable undertakings in exchange for \$20,000 a year for life, that he canceled the contract when he saw he would not have enough time to do the job and when Mr. Wolfson's case took a serious turn, and that he returned the first \$20,000 payment after Mr. Wolfson was indicted. This is the only on-the-record account of the facts now available. Conflicting with this, are the implications to be drawn from two public statements by the Department of Justice and from some of the information provided to newsmen by officials of that Department on a background basis during the past week.

The Justice Department has said formally that Mr. Wolfson told his side of the story after he was subpoenaed to appear before a grand jury and warned he would be compelled to testify through a grant of immunity from prosecution.

This must mean that prior to Mr. Wolfson's conversation with the FBI, the Department of Justice had sufficient information to merit a criminal investigation into the affairs of Mr. Fortas. How else could it justify the use of a grand jury and a grant of immunity, particularly when such grants are not given frivolously? Is not this implication reinforced by the report that the day before Mr. Wolfson talked on May 8, Attorney General Mitchell laid "certain information" about the Fortas case before Chief Justice Warren?

Two other ingredients have to be added to this mixture. One is the insistence by officials of the Justice Department, to this newspaper and presumably to others, that the information it had would seriously damage the Court if it were made public and that the Attorney General should be praised, not criticized, for keeping it secret. The other is the report in the *Los Angeles Times* Thursday morning that Government officials (presumably in the Department of Justice) were interpreting Mr. Wolfson's statements and documents in their hands to mean that Mr. Fortas had agreed to intercede on Mr. Wolfson's behalf before the Securities and Exchange Commission.

So what are we to conclude? If Mr. Fortas' version is accurate and complete, he committed no crime or impeachable offense, only

a gross impropriety, and he has been viciously maligned in the whispers that have run through Washington this week. But if the implications that can be drawn reasonably from the statements and actions of the Justice Department are correct, far more than a gross impropriety was involved. An intercession by Mr. Fortas before the SEC would have been a crime. Information that would seriously increase the damage to the Court, if made public, would have to consist of much more devastating material than has surfaced so far.

If the Justice Department has evidence sufficient to justify a presentation before a grand jury, it ought to get on with it and seek an indictment. If it does not, it ought to explain what happened to its case and what led it to use the criminal process in the first place.

If the implications that are being drawn from what the Justice Department has said are unfair, Mr. Fortas and the Supreme Court are suffering the worst kind of damage—that which arises from rumors that can never be successfully denied. If the implications have some merit, however, it would be far better for the integrity of the Court in the long run to have the matter faced fully and honestly now.

This, of course, is at the heart of the criticism being made of the way in which the Department of Justice has handled this entire affair. That criticism has not been directed at the actions of the Attorney General in seeking to get to the bottom of the matter or in taking his findings to the Chief Justice. Rather, it has been directed at cryptic innuendoes or unsubstantial generalities, made in public or private, by him or his associates, which have fed the rumor factories. The manner in which leaks from governmental sources at vital times fed the investigation into Mr. Fortas' affairs—an investigation that was primarily a journalistic one—heightened the suspicion that partisan politics, as well as a desire for judicial purity, had something to do with the way the Justice Department behaved. The danger of course, is that a precedent has now been established for raising questions about a Justice's actions without answering or documenting them, a technique that can be used by unscrupulous officials as well as by scrupulous ones.

This danger cannot be erased nor can the murkiness that surrounds the entire situation be lifted by closing the Fortas case now.

[From the Chicago (Ill.) Daily Calumet, May 17, 1969]

FIND FORTAS AFFAIR IS ONLY THE OPENER
(By Bob Seltzer)

Ever hear of the Albert Parvin Foundation? It's been in the news lately as a side-light to the Abe Fortas affair. Carolyn Agger, the wife of just-resigned Associate Justice Fortas, is an attorney for the foundation.

The Albert Parvin Foundation is the brainchild of millionaire Albert Parvin, the former Chicagoan who broadened his fortune in the hotel and night club furnishings business. The foundation was set up to provide scholarships to young people from underdeveloped countries to Princeton and UCLA.

The United States Internal Revenue Service has indicated it no longer believes this to be the foundation's purpose; that in fact the Albert Parvin Foundation might possibly be a screen for vast money-manipulation and influence-peddling in the high places.

The Albert Parvin Foundation, it has been learned, derives its primary income through a first mortgage in trust with the Bank of America, holding the Flamingo Hotel and gambling casino in Las Vegas. Another income source is the Fremont Hotel, also in Vegas.

Though Parvin now lives in Beverly Hills,

California, and the Fortas family in the East, there are strong connections in Chicago. Chicago city treasurer Marshall Korshak (also Democratic Party committeeman of the 5th Ward), and his attorney brother, Sidney R. Korshak, own a total of 11,000 shares in Parvin-Dohrmann Company, one of the three Parvin hotel and night club furnishings firms. Chief Judge William J. Campbell, of the U.S. District Court for northern Illinois, has been a director of the Parvin Foundation since its formation in 1960—though he recently claimed that he has resigned. There has been no official announcement by the foundation of this resignation.

Also involved with the Parvin Foundation is Associate Supreme Court Justice William O. Douglas, who has served as the foundation's President, receiving \$12,000 annually.

Tied in with the Albert Parvin Foundation, are the following firms in addition to the Parvin Dohrmann Company: The Dohrmann Company, which supplies restaurants, hotels, motels, and institutions with commercial food-serving and preparation equipment, headquarters at Brisbane, Calif.; and Albert Parvin and Company (Illinois), of Chicago. The Parvin Dohrmann Company operates the Fremont Hotel and gambling casino, acquired June 30, 1966.

In a suit filed with the U.S. Supreme Court yesterday by a student of the law in Chicago, Sherman Skolnick, it is alleged that one man in particular—in addition to the Parvin family—ties all the Parvin operations together. He is alleged to be Harry A. Goldman of Los Angeles, described in the suit as a "gangster." Goldman is president of the Albert Parvin and Company (Illinois), was executive vice president of the Parvin Dohrmann Company and is now chairman, and is a director of the Dohrmann Company.

Skolnick, a paraplegic invalid who lives with his family on Chicago's southeast side, is Chicago and Illinois' layman petitioner of the courts, seeking to correct malapportioned political districts. They range from congressional and general assembly districts to city wards and county government. In recent years he has repeatedly confronted Judge Campbell in the federal court over these and other taxpayer suits. In January of 1967, long before Abe Fortas gained national prominence, Skolnick demanded Judge Campbell's removal from his cases because of the Judge's Parvin connections.

In his suit Skolnick declared, "It is unconscionable for respondent Campbell to proceed any further in (this) case. His connection with the Albert Parvin Foundation has brought, and is bringing, the judicial proceedings in said case into suspicion and disrepute."

When Judge Campbell said he was no longer connected with the foundation, Skolnick retorted in his suit: "Campbell's published and circulated disclaimers and denials about himself and his relation to the Albert Parvin Foundation exceed the credibility gap. On the one hand, he says that he did not consider himself a director of the Parvin Foundation after the initial meeting. On the other hand, he says he resigned as a director purportedly in October, 1966. If he was not a director, why did he resign?"

Skolnick continued: "... Campbell, as chief judge of the Northern District of Illinois, knows, or should know, that a director of a corporation remains liable for his wrongful acts, up to the statute of limitations..."

One must consider that the date of this particular suit is two and one-half years ago. Skolnick received some local press for his efforts, but when it was over Judge Campbell was successful in quashing the matter, both in the press and in the courts. After all, he was both the chief judge and presiding judge in his own case. How far ahead of the national scene Skolnick was, is well illustrated in the following excerpt from the January 1967 suit: "According to the published

figures, Campbell as a director (of Parvin) has allowed, permitted, and condoned that a fellow judge, Justice William O. Douglas, as president of the Parvin Foundation, be paid \$12,000 per year, which appears to be an exorbitant amount in comparison to the charitable disbursements of the Parvin Foundation. Approximately \$80,000 per year is disbursed for charitable purposes, leaving what appears to be overhead expenses, or an unexplained gap, of approximately \$57,000. Gross income of the foundation in 1963 (while Judge Campbell was still a director) was reported to total \$137,257 (See U.S. News & World Report, Oct. 31, 1966)."

Skolnick in the suit then spotlighted the current Fortas scandal, noting: "Whether federal judges can also be 'moonlighters' such as corporation officers or bank officers, is a grave national question."

While Judge Campbell was explaining through "press releases" to Chicago newspapers that he had attended only one meeting of the Parvin Foundation, and had never even seen a foundation statement through the seven years he was a director, Skolnick in his suit charged, "Campbell had a duty as a director to be informed, and his published and circulated statements that he has not seen a financial sheet or investment sheet for the Parvin Foundation, and did not know what they own, exceeds credibility. Notices of directors' meetings and other data are sent out as a matter of course."

Skolnick in his suit demanded: "Did director-Judge Campbell ever communicate with Foundation President Justice Douglas? It would appear logical to suppose that they would have been in touch with one another."

Skolnick in his suit described Albert Parvin as an "unsavory" character, who had what Skolnick described as a "criminal record" in Chicago. He documented four cases involving Parvin and members of the Parvin family ranging from 1925 through 1959, in which Albert, Jack and Bernard Parvin were charged with being receivers of stolen property—Albert Parvin on two occasions. They were never convicted.

Skolnick alleged and detailed that Judge Campbell in 1959, "rendered... a questionable judgment to the benefit of a relative of Albert Parvin."

Skolnick in his suit filed yesterday alleged of the Albert Parvin Foundation, that "It is further a matter of undisputed court record that the said Albert Parvin Foundation is a hoodlum front organization."

He listed "among the hoodlums connected with the... foundation":

(1) Marcus Lipsky, a "gangster and specialist in multiple murders. He masterminded the Capone mob's post-war invasion of the \$18 million dollar-a-year Dallas, Texas rackets."

(2) Edward Levinson, "who has a contract with Parvin Dohrmann Company, interlocked company connected with Parvin Foundation, and who is connected with (3) John (Jack) Pullman, crime syndicate 'banker'."

And, (4) Harry A. Goldman, noted earlier.

The extent of Korshak's involvement with Parvin was revealed in the New York Times of May 9. The information was part of a Times report of the Securities and Exchange Commission permitting trading to resume in the shares of the Parvin Dohrmann Company on the American Stock Exchange. Trading had been halted for the second time within a few months because "of what they (the SEC) called inadequate information concerning a change in control of the company last October, the company's acquisition program and other factors."

The Times' story said, "Parvin Dohrmann operates three casinos in Las Vegas and is headed by Delbert W. Coleman, former president of the Seeburg Corporation. He purchased control of Parvin Dohrmann last October and now is the concern's chairman."

Then yesterday, in the midst of steadily

increasing publicity concerning all aspects of the Parvin operations, the Times reported that National General Corporation was discussing "the feasibility" of acquiring Parvin Dohrmann.

The Times reported: "The company's stock (Parvin-Dohrmann) has been one of the most spectacular performers on the American Stock Exchange in that period, moving from a 1968 low of 14 and one-quarter to a close yesterday at 119, down a point."

Korshak, regarded as probably the second most powerful Democratic Party official in Chicago behind Mayor Daley, was a state senator from Hyde Park before appointment by then Governor Otto Kerner as state revenue director. In 1966 Korshak was slated by the Democrats to run for Cook County treasurer, a race in which he was opposed by Edmund Kucharski, the undersheriff under then sheriff Richard Ogilvie—now the governor, succeeding Kerner.

A week before the election in November, Kucharski, after two attempts to get Korshak on areawide television to debate, issued a statement in which he alleged that Korshak was the "fixer" in the New York liquor license bribery scandal involving a new Playboy Club there.

Not only did Korshak refuse to confront Kucharski on television in the closing days of the campaign, but following The (Chicago) Daily Calumet's exclusive reporting on the Kucharski charges on Nov. 4, 1966, Korshak (The Daily Calumet, Nov. 7, 1966) would reply only that the Kucharski charges were "mischievous, irresponsible libel." That brief statement was issued through Korshak's office.

Kucharski charged, "Is it not a fact that it was Marshall Korshak who was contacted initially by Playboy to arrange for taking care of the New York liquor license?"

He continued: "Did he (Korshak) or did he not list as an employee a top syndicate gangster when this hoodlum made application for rental of an exclusive Lake Shore Drive apartment?"

Kucharski based his charges on a May 6, 1966 by-lined story by reporter Charles Grutzner in the New York Times, which declared: "In testifying about his own dealings with the Playboy group, Berger (Ralph Berger, 66, of Chicago, sentenced to prison for conspiracy to bribe) said they first agreed to pay him \$5,000 for making the contact with (Martin) Epstein (New York state liquor authority chairman). After they delayed giving him any money, he said, he went to see a friend, Marshall Korshak, who called someone in the Playboy organization, and he soon received \$5,000."

The Playboy club in New York finally opened, however and it has since been learned that one of Parvin's hotel and night club furnishings companies received the lucrative contract to furnish the establishment.

In Chicago, Korshak's control of top city patronage jobs is regarded as absolute. The stories of his influence in a broad range of matters, from banking and investments, to land development and real estate, are legend.

The city-wide group of plain, every-day citizens which works with Skolnick in his seemingly never-ending drive to call attention to what he believes are the questionable activities of, particularly, federal-level judges, has given no indication it is running out of gas. Skolnick began his project a half dozen years ago, and has centered on his drive for apportionment of Illinois Congressional and General Assembly districts and Chicago ward boundaries, among others. It has become the man's life's work, and he seldom deviates from it through 80-hour weeks.

He had researched and opened up on the Parvin Foundation long before it and the Louis Wolfson Foundation became common household words. He said yesterday that he is "astounded" to think that judges in two of

the three most powerful courts in the United States—U.S. Supreme Court, and the federal court for Northern Illinois, second only in importance to the federal court for southern New York—are deeply involved and linked together with outside interests through questionable operations such as the Parvin Foundation and the Wolfson Foundation.

And, Skolnick observed, "From what we have learned by our studies and investigations all these years, we have only scratched the surface of judicial influence-peddling and special interest decisions."

Skolnick has been one of many, including *The Daily Calumet*, which has continued to urge publication of the Johnson Administration-banned Blakey Report, the document which its author C. Robert Blakey, under hire of the government, has acknowledged cites at least six high ranking judges in Chicago for extreme conflict of interest involvements, and in several cases crime syndicate ties.

To these people, the Fortas scandal is not shocking, but only the first public indication of a situation which they call a national tragedy of unmatched proportions.

[From the Washington (D.C.) Post,
May 18, 1969]

"THOU SHALT NOTS" FOR THE COURT
(By Alan Barth)

When Abe Fortas delivered a lecture this month at Northeastern University at Boston, his office let it be known that he would accept no remuneration, although a \$2000 fee had been arranged; he would receive only \$625 to cover the costs of his trip and the normal commission of his booking agent.

What was an Associate Justice of the Supreme Court doing with a "booking agent?" Should a Justice be in the lecture business? Should he be doing enough lecturing, in any case, to make it worth while for a booking agent to "handle" him?

It ought to be said at once that lecturing by a Justice involves no violation of law and no violation of judicial canon. Neither is there anything novel about it. Other Justices have given lectures and received fees for doing so; and some, perhaps, have had booking agents to spare them the grubby business of arranging terms.

The American Bar Association's Canon of Judicial Ethics declare that a judge "may properly act as arbitrator or lecture upon or instruct in law, or write upon the subject, and accept compensation therefor, if such course does not interfere with the due performance of his judicial duties, and is not forbidden by some positive provision of law."

This leaves a great deal of leeway for individual judgment. It would be impossible to say what practice has been pursued by all the Justices of the Supreme Court and perhaps invidious to cite individual instances. It is well known, however, that Chief Justice Charles Evans Hughes, for example, never accepted any remuneration for a speech while he was on the bench or off it; and Chief Justice Earl Warren acknowledged with pride just recently that he, too, had always forgone fees for public appearances of any kind.

The standards governing the conduct of judges have grown more lax in recent years, however. And this has come about, it seems, more through the acceptance of extrajudicial assignments than through the acceptance of money for the discharge of those assignments. Very early in the history of the United States, the issue arose through the appointments of Justice John Jay and Justice Oliver Ellsworth as foreign ministers. John Marshall's brother-in-law, Joseph Hamilton Davess, said of the Jay appointment in the Senate: "You ought to insulate and cut off a judge from all extraneous inducements and expectations; . . . for no influence is more powerful in the human mind than hope—it will in time cause some judges to lay them-

selves out for presidential favor, and when questions of state occur, this will greatly affect the public confidence in them, and sometimes deservedly."

In recent years, Presidents have not hesitated to raid the Supreme Court for judicial talent in the handling of special tasks.

President Franklin D. Roosevelt persuaded Justice Owen Roberts to take on the chairmanship of a commission created to investigate the disaster at Pearl Harbor. He tapped Justice James Brynes to help him with the excessive burdens of executive leadership in wartime.

President Truman designated Justice Robert H. Jackson to take on the extremely unjudicial role of American prosecutor of the Nuremberg Trials.

President Kennedy turned to Justice Arthur Goldberg for aid in dealing with some troublesome labor-management disputes. And President Johnson subsequently induced Justice Goldberg to leave the Court entirely for the relatively trivial post of Ambassador to the United Nations.

Even Chief Justice Earl Warren, at a time of national emergency, yielded to the importunities of President Johnson and rendered service as head of a commission that reported on the assassination of President Kennedy.

A few Justices from time to time have evinced political ambitions while on the bench, the most notable among them, of course, being Justice Charles Evans Hughes, who left the Court to run for the Presidency and subsequently returned to the Court as Chief Justice.

Chief Justice Harlan Stone felt very strongly that "it is highly undesirable for a judge to engage actively in public or private undertakings other than the performance of his judicial functions." And when, in 1942, President Franklin Roosevelt asked him to head up a commission to study rubber production—then a touchy political problem—he took the occasion to turn the opportunity down with a resounding explanation:

"A judge, and especially the Chief Justice, cannot engage in political debate or make public defense of his acts. When his action is judicial, he may always rely upon the support of the defined record upon which his action is based and of the opinion in which he and his associates unite as stating the ground of decision. But when he participates in the action of the executive or legislative departments of government, he is without those supports. He exposes himself to attack and indeed invites it, which, because of his peculiar situation, inevitably impairs his value as a judge and the appropriate influence of his office."

And Stone summed up his feeling in more homely terms later on when he said bluntly that "the integrity of the Supreme Court is in serious danger when it is turned into a 'fishing pond' for political appointments."

SELF-IMPOSED RESTRAINTS

There is another consideration arguing even more cogently against using Supreme Court Justices for political troubleshooting: it demeans the Court and diminishes its dignity.

When a Justice relinquishes life tenure on the Court to become an ambassador at the pleasure of the President, he says, in effect, that the work of the Court is not really of very great importance. When he takes time off from judicial duties to sit on a commission, he conveys an impression that Justices are not really very busy and have time hanging on their hands.

It may be that the current scandal revolving around the Court will lead its members to develop for themselves a new canon of ethics applicable peculiarly to their own unique office. Such self-imposed restraints would be far preferable to congressional action of the sort that has been threatened,

aimed at requiring Justices to disclose their finances. And it would be timely now for two reasons.

First is the consideration that Congress has recently raised the salaries of Justices to \$60,000 a year. An astute man may make more, to be sure, in the private practice of the law or in manufacturing airplane parts; nevertheless, it is an appreciable salary, allowing those who earn it to enjoy the amenities of life. Clergymen, scholars, scientists often make less—and manage to lead rich lives.

It seems probable that Congress fixed this sum for the salary of Supreme Court Justices with the thought that it would satisfy men to whom honor, public service and the pursuit of a high calling mean more than money. The work of a Justice is exacting and consuming. It can never be done quite well enough; it can never be completed. Endless research and reflection are its ingredients; and these leave no time for outside and extraneous pursuits save, of course for relaxation and recreation.

The second consideration which makes imperative an acceptance by the Justices of new standards is the desperate need today to preserve the Court's prestige. For the Court has an uncomfortable function to fulfill. Its function is to check popular impetuosity. And so it must tell the American people from time to time that the Constitution forbids them to do things which they deem desirable and expedient and in the national interest. This obligation of the Court to thwart the public on occasion is an obligation that can be discharged only by a Court whose members command complete respect in terms of devotion and detachment.

TWO COMMANDMENTS

Is it not time, then for the Justices of the Supreme Court to lay down for themselves a new canon of conduct—a hard and uniform and unequivocal canon recognizing the extraordinary caliber and character of their office? Should it not embody two commandments?

One commandment might be: Thou shalt receive no remuneration from any other employer than the United States.

It may be desirable from time to time for Justices to speak in public, at appropriate places, or to write for publication, in appropriate media, about matters which are not covered in their official opinions. They may very validly promote understanding of the Court's work in this way, or in other respects serve public interests. But let them do it without compensation—for the simple satisfaction of doing it. Nobody should be able to hire a Supreme Court Justice save the American people, who have recruited him for life in their service.

And the second commandment might be: Thou shalt not be eligible for election or appointment to any office under the United States once thou hast taken the oath of office of an Associate Justice of the Supreme Court.

When a Justice chooses to leave the court, he should be free, of course, to engage in any professional or scholarly or other private activity he likes. But he should be out of politics. Only by such self-denial can he wholly free himself and his judicial work from the imputation of self-interest.

Is all this too much to ask of Supreme Court Justices? Theirs is the highest office of a noble calling. Theirs is a role so vital to a self-governing society that it demands a kind of commitment close to priesthood. Only men so committed are genuinely qualified.

And perhaps some such men will say with Mr. Justice Holmes: "If a man has the soul of Sancho Panza, the world to him will be Sancho Panza's world; but if he has the soul of an idealist, he will make—I do not say find—his world ideal. Of course, the law is not the place for the artist or the poet. The

law is the calling of thinkers. But to those who believe with me that not the least godlike of men's activities is the large survey of causes, that to know is not less than to feel, I say—and I say no longer with any doubt—that a man may live greatly in the law as well as elsewhere; that there as well as elsewhere his thought may find its unity in an infinite perspective; that there as well as elsewhere he may wreak himself upon life, may drink the bitter cup of heroism, may wear his heart out after the unattainable."

WORLD TRADE WEEK

(Mr. MIZE asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIZE. Mr. Speaker, President Nixon has proclaimed this week of May 18 as World Trade Week. In issuing this proclamation he calls upon business, labor, agricultural, educational, and civic groups, as well as all of our people generally, to observe this week in appropriate ways to promote the importance of world trade to our economy and our relations with other nations.

As the President has pointed out, additional markets are needed for the products of our industrial and agricultural might. The value of increasing trade with the other nations is spelled out in this paragraph from his proclamation:

Enlarged markets for our goods and services speed the pace of our economic progress and advance the well-being of all our people. New markets abroad create new jobs at home; new avenues of world trade run parallel to new roads to world peace.

Mr. Speaker, I have the honor to serve as chairman of the task force on international trade for the House Republican conference. On this task force with me are 14 of my colleagues, all of whom have the background and knowledge to make a significant contribution to the development of a program of increased world trade.

We are examining all aspects of our trade policy and practices and expect to come up with some recommendations to the administration and Congress in the months ahead. We will be conducting in-depth analysis of East-West trade, protectionism at home and abroad, the balance of payments, the gold flow and the elimination of trade barriers.

We see the observance of World Trade Week as an appropriate kickoff to our own work on the task force. We commend the President on the substance of his proclamation and we will coordinate our effort with the administration's in the development of effective trade policies.

IDAHO POWER CO. MOVES TO PROTECT SALMON AND STEELHEADS

(Mr. SAYLOR asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SAYLOR. Mr. Speaker, the problem of preserving the salmon and steelhead runs in the great rivers of the Pacific Northwest has been of concern to conservationists for some time. In fact, 2 years ago this problem was cited as one of the major reasons for the U.S. Supreme Court returning the proposed

High Mountain Sheep hydro-electric power project to the FPC for further study.

In this Supreme Court decision, prepared by Mr. Justice William O. Douglas, it was stated:

The importance of salmon and steelheads in our outdoor life as well as in commerce is so important that there certainly comes a time when their destruction might necessitate a halt in so-called "improvement" or "development" of waterways. The destruction of anadromous fish in our western waters is so notorious that we cannot believe that Congress through the present Act authorized their ultimate demise.

One of the major electric power companies in the Pacific Northwest—Idaho Power Co.—is doing a truly marvelous job of perpetuating, and even increasing, the runs of salmon and steelhead in connection with their three dam developments at Oxbow, Brownlee, and Hells Canyon.

This program of fish protection has been experimental from the start. There were no guidelines by which the State and Federal fish agencies could assure completely successful results. Some of the company's early experiments proved costly and unworkable, but the company persisted in its efforts.

Idaho Power Co. has now completed its ambitious program to establish new fish habitats to increase propagation. This undertaking—which represents a capital investment of approximately \$15 million and annual overall operating costs of close to \$2.5 million—is probably unique from the standpoint of distances involved in transporting the eggs to hatchery facilities and the small fish to the point of release on a different watershed.

These are important developments because of the role which fish and fishing play in our recreation lives. I think Izaak Walton realized this fact when he wrote:

I have laid aside business, and gone a'fishing. . . . Doubt not but angling will prove to be so pleasant that it will prove to be, like virtue, a reward to itself. You will find angling to be like the virtue of humility, which has a calmness of spirit and a world of other blessings attending upon it.

The report of Idaho Power Co.'s contribution in this area is so significant I think my colleagues will be interested in reading about it. Therefore, without objection, I will insert at this point in my remarks an article from the Idaho Power Co. bulletin for January 1969, on this subject:

IDAHO POWER HAS BUILT HATCHERIES AND OTHER FACILITIES TOWARD BETTER FISHING—THIS AS PART OF ITS LICENSE TO GENERATE POWER IN HELLS CANYON

Fishing for the excitement it provides has become a multi-million dollar pastime in the state, and Idaho Power Company is contributing substantially toward augmenting the runs of salmon and steelhead, the big scrappy migrants that prompt successful fishermen to recount the joys of working a stream. Company developments also contribute to the enjoyment of fishermen who go for trout, crappie and bass, all of this as a part of Idaho Power's performance as a service utility.

The Idaho Fish and Game department estimates that hunting and fishing in Idaho enhances the state's economy by \$60 million or more annually. The estimate does not in-

clude income from licenses totaling nearly \$3 million. In a year's time, more than 663,000 hunting and fishing licenses are issued, including 158,000 licenses to fishermen from out of state.

Idaho Power's largest contribution to the growth of fishing has come with its three large dams and power plants in upper Hells Canyon, a development which since completion has been dedicated to T. E. Roach, chairman of the board and chief executive officer.

The Federal Power Commission's license to the Company to develop the hydroelectric sites on this 100-mile stretch of river requires a conservation program for the relatively small salmon and steelhead runs which continue up the Snake River beyond its confluence with the Salmon River. The latter takes most of the migrating adult salmon and steelhead that have made the long swim from the Pacific Ocean up the Columbia River, thence up part of the Snake River and its tributaries to spawning areas. The program has been experimental from the start. There were no guidelines by which the state and federal fish agencies could assure successful results.

The initial experiment involved trapping the anadromous fish at Brownlee, first of the Company's developments in Hells Canyon, and transporting them in tank trucks above the dam. A huge net was spread across the reservoir, and barges with pumps to create directional water current were built to attract the offspring. It was soon determined, however, that the young chinook salmon and steelhead trout were unable or unwilling to migrate seaward through the nearly motionless reservoir water to reach the devices designed to collect them for transport down river, so the project was abandoned.

THE COMPANY HAS FOUR HATCHERIES

Since then the Company has built a hatchery at Oxbow, another one on Rapid River, one at Niagara Springs, and finally holding, egg-taking and juvenile-release facilities on the Pahsimeroi River. It is an ambitious program to establish new fish habitats to increase propagation. The undertaking is probably unique from the standpoint of distances involved in transporting eyed eggs to the hatchery facilities and juveniles to the point of release on a different watershed.

While experienced personnel from the Idaho Fish and Game department operate these new facilities, they are completely financed by Idaho Power Company as part of the license agreement with the Federal Power Commission. They represent a capital investment of approximately \$15,000,000 and annual over-all operating costs of close to \$2,500,000.

The starting point for this extensive propagation program is the Hells Canyon dam, where the salmon and steelhead trout moving up stream to spawn are collected. By road, it is 150 miles from the Hells Canyon dam to the Circle C hatchery on Rapid River, which flows into the Little Salmon River near Riggins. It is about 250 miles from the Oxbow hatchery to the Niagara Springs hatchery in Hagerman Valley, and it is about 225 miles from Niagara Springs to the facilities on the Pahsimeroi, a tributary of the Salmon River.

Environmental factors have determined the location of the hatcheries. Idaho Power's fish biologist Wendell Smith explains that there are three races of migrants taken at the Hells Canyon dam. Fall run chinook salmon arrive in September and October. These fish have always spawned in the Snake River. Spring run chinook salmon arrive in May and June, and they were in the habit of seeking the cool headwaters of tributaries to spawn. Steelhead trout arrive both in the fall and the spring of the year, but all of them reach sexual maturity in April and May, during which they too moved into the cooler tributaries to spawn.

OXBOW SUPPLIES OTHER HATCHERIES

Idaho Power's Oxbow dam and power plant is between Brownlee, up river, and the Hells Canyon dam. The hatchery here, first of the four of these facilities, supplies the other hatcheries, and it provides capacity for raising five million juvenile fall chinook each year; but because of the small number of the fall chinooks coming up river to spawn, less than half of this potential has been attained.

The Oxbow hatchery, utilizing water pumped from the Snake River, has four concrete holding ponds, a hatchery building where the egg incubation process is completed, and raceways for the small fish, the offspring of the adult fall chinooks, which are fed and held until they are ready to be released for their swim down river to the ocean.

The spring chinooks taken from the trap at the Hells Canyon dam are held in the Oxbow ponds until they can be transported, a full tank load at a time, to the complete hatchery facilities on Rapid River. The tanks are equipped with aerating and water-circulating equipment to assure the fish safe passage.

Adult steelhead trout are held in the ponds at Oxbow until the eggs are taken and fertilized. When the eggs have been incubated to the eyed stage they are transported to the hatchery at Niagara Springs.

THE HATCHERY ON RAPID RIVER

The cool, clear water of Rapid River flowing from the snow packs of the towering Seven Devils mountains is ideal for the propagation of the spring chinooks, which must have cool water to survive. The first hatch from the eggs of 360 adult salmon, taken in 1964, became the fingerlings in the raceways of the Rapid River hatchery that were ready to start their long swim to the ocean in 1966. The return of many of these migrants last year indicates the wisdom of a hatchery at this location.

More than 3,400 hefty spring chinooks that had picked up 12 to 15 pounds in weight during their sojourn in salt water had by an amazing instinct made it back over a new route to a new home base. Not included in this total were about 1,000 precocious male "jack" salmon collected the previous year and the substantial number of salmon caught by fishermen. The fish biologists were jubilant. The hazards of the long journey, going and coming, are many, and no one had dared to predict the outcome.

"The returns to the hatchery so far are nearly 10 percent of the total spring chinook count over Ice Harbor dam, the lowermost structure on the Snake River, and this is truly astonishing," Biologist Wendell Smith exclaimed as the count at the hatchery mounted. Even so, he cautions that the success of the first run is not conclusive. More time, more runs are needed to determine the true extent of accomplishment.

THE HATCHERY AT NIAGARA SPRINGS

For those not familiar with Idaho's geography, Hells Canyon is on the western border of the state, and Hagerman Valley is in the southcentral part of the state. It is in this valley that the "Thousand Springs" flow from a tremendous underground lake. Niagara Springs is one of them. A hatchery and raceways were built here because of the dependable flow of spring water at a constant temperature of 58 degrees, a factor which promotes faster growth of young steelhead than water of the Salmon River drainage.

The automated hatchery facilities are said to be among the most advanced in existence. There are 14 raceways at this hatchery, each of them 300 feet long, for the rearing of an estimated 1,600,000 steelhead trout until they are about eight inches in length. The ideal temperature of the spring water shaves a

year from the growing time of the fish, which therefore head to sea a year sooner than they would under natural conditions.

Eggs taken from adult steelhead at Oxbow are transferred to the Niagara Springs facility about 10 days before they hatch in May or June. The young are fed at the hatchery until the following March and April when they are ready to be hauled in the Company-built 5,000-gallon, trailer-mounted tank to the Pahsimeroi release ponds. During this period, some 40,000 steelhead fingerlings make the trip every day until the task is finished. The truck with its tanker completes the trip from Niagara to Pahsimeroi and return, a distance of 450 miles, in about 12 hours.

THE PAHSIMEROI FACILITIES

The release ponds on the Pahsimeroi River give the fingerlings time to become acclimated to a change in environment before starting their swim to the ocean.

The effectiveness of the Oxbow-Niagara Springs-Pahsimeroi undertaking should become evident in the near future. In fact, the initial batch of 1.6 million juveniles released in the Pahsimeroi in 1967 should start showing up as returnees in the spring months of this year. To accommodate them, the company is completing hatchery facilities on the Pahsimeroi for the collection of eggs from the returning adults. Thus the eggs for Niagara Springs will in future years come from the Pahsimeroi instead of from Oxbow.

CONCLUSION

Time will tell how well the biologists have been able to plan to overcome the problems.

"We haven't been in the hatchery business long enough to know whether artificial propagation will solve them," Smith has said. "It should be well understood that these hatchery fish are subject to the same survival hurdles that naturally born salmon and steelhead from Idaho waters face. Man's advancing civilization has altered the original free-flowing stream to a series of slow-moving reservoirs, each of which increases the summer water temperature, increases production of predators, retards dissipation of pollutants, and most seriously, jeopardizes the timing of both the downstream and upstream movement of fish. (There are four dams on the Columbia River, one dam in operation and three more in various stages of completion on the lower end of the Snake River below Lewiston.) Added to this list of adversities, the fish are subjected to both a regulated commercial and ever-increasing sport fishery."

While the Company's biggest efforts have been toward perpetuating, even increasing, the runs of salmon and steelhead, it has meanwhile built facilities appealing to fishermen who seek the smaller species of trout, crappie, bass and catfish. Company-built docks and ramps enable the launching and servicing of boats on the reservoirs. There are attractive parks with modern conveniences—rest rooms, shower bath facilities, electrical outlets, picnic benches, places for campers and travel trailers.

In a six-year period, the Company has planted an estimated 300,000 rainbow trout in the reservoirs and in tributary streams in upper Hells Canyon.

The popularity of these recreational attractions has been immediate. The parks are utilized from early spring through late fall, and the letters of appreciation from families who use them reflect the public acceptance.

THE U.S. CAPITOL BUILDING—WEST FRONT RESTORATION AND EXTENSION

(Mr. SCHWENGEL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. SCHWENGEL. Mr. Speaker, last Thursday, May 15, 1969, it was my privilege and honor to address a meeting in Montgomery County in the State of Maryland. Because of their understandable interest in the U.S. Capitol Building they asked me to talk on the west front, its condition, and the need for repairs and preservation. As president of the U.S. Historical Society my interest on this question is more than casual.

Since there have been many requests for copies of my paper, and because of great interest in this body and because of the urgency of the problem I am availing myself of this opportunity of sharing my findings and conclusions with my colleagues:

ON THE WEST FRONT RESTORATION AND EXTENSION

(By FRED SCHWENGEL)

The United States Capitol, gleaming under blue skies by day or brilliantly illuminated against the dark of night with its great white dome towering over the rest of monumental Washington, is the landmark of our democracy. It is, as Hawthorne wrote, "the center and heart of America," and "certainly, in its outer aspect, the world has not many statelier or more beautiful edifices."

It is also, as historian Allan Nevins has added, the "best loved and most revered building in America."

Unfortunately, however, the stately, best loved and most revered building in America, whose crumbling East front was rehabilitated with marble in 1961, is now sagging on its West front. This is the side of the Capitol that looms majestically over one end of the mall and is so familiar to us, from a slightly different approach, as the scenic backdrop of parades on Pennsylvania Avenue.

Built like most of the rest of the original structure, with sandstone blocks quarried near George Washington's home at Mount Vernon, the 148-year-old central portion of the West front is literally in danger of collapse. Great cracks crawling upward from the ground and extending to the full height of the building have been poorly concealed by having been spackled with cement and painted over many times. Large heavy stones have been forced outward from the vertical alignment of the building. There is a conspicuous bulge in one place a few feet above the ground.

Keystones in the arches above the basement floor have dropped so far in some instances that the wood frames of the windows have had to be cut out to accommodate them. A section of the cornice on the west front did fall out in the summer of 1966 and could have killed a passerby as it landed 15 feet from the base of the wall.

At that time Vice President Humphrey said: "I have gone outside and looked all over the west front. I am very worried. We need some decision immediately or otherwise there is going to be a tragedy."

Everyone who knows the situation shares the Vice President's concern. But a dispute has developed over the unanimous recommendation of a Congressional commission. That recommendation was to not only make the necessary permanent repairs but also to expand the building in order to obtain more space and facilities for Congress and the increasing visitors to the Capitol each year. This was the solution to the similar problem of the collapsing east front several years ago, but once again the "traditionalists" who were in opposition then have joined forces to obstruct the proposed rehabilitation of the west front.

Congress meanwhile has resorted to makeshift efforts to secure the Capitol's west wall. Three years ago it appropriated \$30,000 for wooden braces and other emergency meas-

ures. Last December, as the situation worsened, it appropriated another \$135,000 for additional timber supports. Now unsightly wooden props stand incongruously alongside the classic sandstone columns holding up the west portico.

They recall a proposal by Thomas Jefferson who, impatient with delays, suggested that the great columns planned for the House of Representatives be made of wood instead of marble in order to save time and money. Whereupon Benjamin Latrobe, the Capitol architect, retorted angrily: "The wooden column idea is one with which I never will have anything to do. I will give up my office sooner than build a temple of disgrace to myself and Mr. Jefferson."

What would Latrobe have said of the wooden props that "decorate" the west front today? For if these emergency repairs continue, the stately edifice that commands the landscape and gladdens every panoramic view of our nation's capital will indeed be a temple of disgrace laced with wooden braces.

Let us consider the problem, what is proposed, what the critics say and why those of us who are active in fostering the Capitol not only as an historical monument but as a living political forum fervently believe it must keep pace physically with the changing and growing requirements of its users and visitors.

The starting point is the fact that the West wall is crumbling. That is not surprising. It has been alleged that William Thornton, the Capitol's original architect, had wanted to use marble but President Washington turned him down. The marble would have had to be imported, and the young Government was as short of cash as it was long on ambition. So blocks of brown sandstone were quarried from an island on the Potomac, hauled by barge up the river and used for the first wing, on the Senate side. The sandstone was painted white. Thus started, the remainder of the original structure was built with sandstone.

Sandstone is porous and subject to corrosion, however, and there is some evidence that the talents of the workmen in the initial construction left much to be desired. Skilled building craftsmen and stonecutters were hard to find. By the time of Thomas Jefferson's Administration the floor beams were beginning to rot and the roof leaked badly.

The site on the highest point of the Federal city was ideal—"a pedestal waiting for a monument," Pierre l'Enfant had said—but the soil was soft. The area on its western fringe that became the mall was a marshland known as "the great Serbonian bog," after the mythical Egyptian swamp that swallowed entire armies. A few years ago, during the building of a new subway for the House wing, pile drivers went down 60 feet before reaching solid substance.

The Capitol, therefore, was built on foundations with a complex series of masonry arches—ingenious, yet subject to constant shifting. On a hot summer day, the Capitol's West walls expand from exposure to the afternoon sun. The sandstone facing on the West front expands 30 Per Cent more with the heat than the granite backup wall behind it. Water gets into the cracks and freezes in winter, causing bulges and spalls.

The huge 9-million-pound cast iron dome, the crowning glory of the Capitol, also contributes to this problem. The outer metal shell of the dome makes it extremely susceptible to the sun and its center rotates sways as a result of temperature variances. Vibrating experiments have shown it oscillates as much as three to four inches. The motion is south, southwest, then west, and as the setting sun declines and finally disappears, north, northeast and east, returning thus to original position.

The burning of the Capitol by the British in 1814, the fire in the west central wing in 1851, and a gas explosion in 1881 left perma-

nent structural damages that must finally be taken into account. The necessity of cutting through the numerous walls and arches for modern conveniences such as electric lighting, air conditioning, heating and plumbing have further weakened the structural supports.

No one disputes these facts. There is general agreement that something should be done. The proponents of extension feel that instead of merely repairing the wall again, rather than replacing it with a new, sturdier wall of marble, we should extend the facade as was done on the East front so successfully several years ago. (This would bolster the existing walls permanently.)

This would provide about 160,000 square feet of additional space—a little more than one-quarter as much space as the Capitol affords today. The West front would be brought out 44 feet in the center, 88 feet in the westerly courts and 56 feet at the connecting wings. The existing outer wall would remain as an inner wall. The new space would provide room for additional committee rooms, especially for the joint committees, offices, restaurants and sorely needed tourist facilities. The estimated cost is \$34 million.

Among the tourist facilities would be one or two auditoriums where visitors could view documentary and other educational films, obtain reading materials and be briefed by lecturers on the work and history of the Capitol. At least one of the public restaurants would open on the terrace overlooking the mall to the west. Visitors would enjoy there one of the most inspiring vistas in the capital city, with the Washington Monument and Lincoln Memorial in full view, and Arlington National Cemetery as a distant backdrop.

Incidentally, the outside steps of the new facade would hide a new service roadway. Trucks hauling in supplies and hauling out refuse would be out of view, thus eliminating an unseemly daily scene on the East front.

In opposition to this plan critics appeal to our sentiment and sense of history. They argue that the Capital West front should simply be repaired and preserved, regardless of the expense, because of tradition and aesthetics. They point out that the West wall is the last remaining outer wall of the original building. They feel that the Capitol is now architecturally complete, an untouchable masterpiece. They also have raised side issues with allegations that the selection of the architects was somehow unethical or undemocratic, or both. There has been a great deal written about a favored "club" of architects.

Let's take the side issues first, chiefly because the allegations are irrelevant and untrue. Among those who have given currency to them is The Times' architectural critic, Ada Louise Huxtable, who claimed in an article August 1, 1966, that the issue over the West front was "more than an aesthetic or patriotic matter" but "a question of the Congressional machinery." Mrs. Huxtable also complained that few of the Congressmen involved in the hearings were "expert in planning, architecture or structural matters."

The insinuation of hanky-panky in architectural assignments is irrelevant because it begs the question whether the West front extension would have the critics' approval if carried out by architects of their own choice. One must favor or oppose the proposal on its merits and not on the identity of the architects.

Nevertheless, for the record, it should be emphasized that the architects for the extension of the West front are men of distinction who were invited to do the West front precisely because of their earlier success with the East front. And the men ultimately responsible for the invitation are the members of a bipartisan Commission for the

Extension of the Capitol composed of Vice President Humphrey, House Speaker John W. McCormack, Senate Minority Leader Everett M. Dirksen, House Minority Leader Gerald R. Ford and the Capitol Architect, J. George Stewart.

The architects were originally selected in 1956 in the following manner: Mr. Stewart submitted to a panel of three architects, then members of the Fine Arts Commission, a list of architects who had expressed a desire to be considered for the assignment. The panel returned the list to Mr. Stewart with suggestions and recommendations and he, in turn, placed these before the commission for the Extension. The commission chose a group of three architectural firms headed by Roscoe DeWitt of Dallas, Jesse M. Shelton of Atlanta and Alfred Easton Poor of New York. These architects are all distinguished professionals with a laudable capacity for combining classic precedents with modern functional requirements.

The legislative history of the extension plan makes plain it was not rushed through Congress. In fact an architectural plan was submitted to Congress by a Joint commission in 1905, shortly after Congress had authorized a new bronze door for installation in a remodeled West front. The design of the transom was entitled "The Apotheosis of America," and the ensemble of doors, frame and transport until recently has been in storage at the Smithsonian Institution ever since, awaiting the extension of the West front for which it was prepared.

In 1964, a House-Senate conference report specifically authorized engineering surveys for the West front. A five-volume survey, specially prepared by an engineering company, was made available to the Commission for the Extension of the Capitol early in 1965. A transcript of the subsequent public hearings in June of that year was printed and furnished to every member of Congress. The engineering company's report was furnished to the Senate and House Appropriations Committees and other committees and members requesting it. It was also made available to the press.

After Congress, despite some opposition in the Senate, appropriated \$300,000 for the preparation of preliminary plans, the Commission directed Mr. Stewart to engage the architects who had done such an excellent job on the East front. One of their three alternative proposals was unanimously approved by the Commission. Speaker McCormack and Senator Dirksen then held a press conference to explain and advocate the Commission's decision.

Does the foregoing sound as though someone sneaked this project past unwitting legislators?

The Congressional members of the Commission are not architectural and engineering "experts," but they are not supposed to be. Professional expertise in any particular field is not and should not be a qualification for political office. The Commission members did become, however, by the time they were through with their studies and hearings, satisfactorily well-versed in their responsibility.

That is the way the Congressional machinery operates and while it may not always work to everyone's satisfaction, it does a pretty good job by and large in our democracy. It also permits a flexibility of attitude that would not be likely among "experts." It permits members of Congress not only to get facts but to change their minds, if necessary.

I cite my own case. The extension of the East front several years ago was opposed by many persons, including press critics and architects, who proclaimed their dismay over an alleged depredation of aesthetics and history. I was among the original critics, too, because of my deep feeling for the traditions

and history of the Capitol, feelings that led me to found the United States Capitol Historical Society. Instinctively opposing the East front extension project, I introduced a bill in 1956 to thwart it.

But I then studied the records of the Capitol Architects over the decades. I donned overalls and explored the old sections of the building from top to bottom and I can report that the passageways in those dank and gloomy arched basements look like something out of an Emile Zola novel. I reviewed the proposals for the extension and saw that they harmonized with the building, while providing additional space. Now, at long last, marble could be substituted for sandstone, just as Latrobe had wanted at the outset. I learned that Thomas U. Walter, the distinguished Capitol architect during Lincoln's time, had wanted to extend the East front in the same way that was being so rabidly opposed by modern traditionalists.

I went back to the House floor in 1958, two years after submitting my opposition bill, and announced that I had changed my mind. I not only supported the extension of the East front but that of the West front as well, and I have been proudly in the forefront of the effort to expand the majestic building in accordance with its aesthetic and functional requirements.

Now let us consider the arguments based on traditionalism and aesthetics. The traditionalists, incidentally, are not unanimous. Some are willing to accept marble as a substitute for sandstone. Others insist that even though the sandstone is crumbling and marble may be more suitable, "Washington's sandstone is part of our history, too." As Wolf Von Eckardt said in the Washington Post, "Who would dream of extending St. Peter's in Rome, Monticello, Mount Vernon or even the Houses of Parliament?" he added.

The American Institute of Architects, similarly, has expressed its outrage. "The AIA believes it would be a mistake to cover up the last remaining exterior portion of the original Capitol," its president, Charles M. Nes, said in a preface to a report calling for restoration of the wall.

But those who scream shrilly their demand to preserve the Capitol ignore the real history of the Capitol, its growth in increments over more than a century, and the many changes that were made partly for aesthetic reasons but also to cope with the increased needs for space as Congress grew in size and responsibility.

The tradition of our Capitol is change, not fixation. The building has grown as our nation has grown through the vicissitudes of incompleteness, when the wings were connected by a wooden passageway; changing architectural concepts and rivalries; burning and crowding. In fact, the growth of the Capitol has been considered symbolic of the growth of the nation.

The words of Abraham Lincoln, during the Civil War, when proposals were made to put off completion of the new Capitol dome, still have meaning for us today. "If people see the Capitol going on," he said, "it will be a sign to them that we intend the union shall go on."

This theme was set at the very beginning by George Washington. "It may be relied upon," Washington said, "it is the progress of that building that is to inspire or depress public confidence."

The Capitol was not built as an unchanging artistic monument, although a monument it became, but as a living parliament of democracy. The original design of the Capitol by William Thornton had a small dome, a modest eight-columned portico and a flush, ground-level portico entrance. Modesty and understatement were demanded by Washington and Jefferson, both of whom took a keen interest in the architecture of

the "Congress House." A design that featured a tall dome was rejected.

Under Benjamin Latrobe, the Capitol architect in 1800-1811, a number of minor changes were made in the Thornton design. Even after the British burned the Capitol in 1814, reconstruction still followed the existing design. But when Bulfinch undertook the central portico, he virtually abandoned Thornton. By 1840 the Capitol was somewhat different from Thornton's original.

The portico, for example, was doubled in size and given 16 columns. The central dome was changed somewhat, although it was kept simple and octagonal, made of wood and covered with copper; small domes were added to each side. Dramatic steps, not planned by Thornton, were added to give the building a monumental effect.

The most important change, however, came in the period preceding and including the Civil War. Thomas U. Walter, Capitol architect from 1851 to 1865, added the House and Senate wings to meet increasing space demands. These, however, completely overpowered the central dome. So the dome was replaced with the massive cast iron dome that gives the Capitol its present appearance.

Now, just as Walter saw that the old dome was incongruously small for the extended Capitol, he pointed out that the new soaring dome seemed too gigantic for the building. In fact, until the East front was improved in 1961, its iron "skirt" actually extended out over the portico roof, an architectural imbalance that was frequently noted. Some "traditionalists" sought to make a virtue of that flaw. But Walter himself did not regard it as such and recommended extension both of the East and West fronts, in 1874.

A critic of the extension plan claimed recently that Frederick Law Olmsted, designer of New York's Central Park, who designed the terraces on the West front, would be "horrified" by our proposal. This claim ignores the fact that Olmsted himself had proposed a similar extension of the building. His drawings not only are strikingly similar to the plans currently proposed, but one of them includes a pediment on the Western portico of the Capitol similar to the latest proposal. This pediment would give direction to the placement of the Walter dome as the central element of the Capitol.

"On the west," Olmsted wrote, "it is assumed that . . . the present facade of the old Capitol will eventually be replaced by a wall of marble corresponding in dimension and architectural character to those of the wings . . ."

Both Latrobe and Bulfinch, incidentally, also prepared drawings that contemplated a pediment for the West central front.

A crucial inconsistency on the part of some architects is also worth pointing out. When the American Institute of Architects opposed the extension on the East front, it advocated instead "developing a proposed scheme for expansion on the west front of the building." Architect Ralph Walker argued in the AIA Journal that "everything that would be obtained . . . by moving the East front and also extending the wings could be accomplished much more pleasantly, aesthetically and efficiently by reconstruction of the West front which has no great historic significance." (Italics mine).

Similarly, testifying before a Senate subcommittee on Public Works, Douglas Haskell, editor of Architectural Forum, said that the claimed benefits of the controversial East front extension could be "better carried out on the western or terrace side, and with no architectural damage." (Italics mine).

Thus these critics have shown themselves to be oppositionists first and traditionalists and aesthetes only in support of that opposition.

As for Von Eckardt's challenge, "who would dream of extending St. Peter's in Rome, Monticello, Mount Vernon or even the Houses of Parliament," the answer is easy. Only one of these buildings houses a legislature. And the Select Committee on the House of Commons (Services) on July 28, 1967 proposed the construction of a new office building stretching out from the base of Big Ben, in order to provide space for members. The Houses of Parliament and the Capitol both must change with the times. (Actually, the east front of St. Peter's was extended 275 feet about 100 years after it was built.)

Along with the changes in its architecture, many other changes have altered the appearance of the Capitol over the years. There used to be an iron fence completely around it. It has been removed. Also removed have been the hitching posts that were no longer needed as the automotive era came on. Once the flag flew from the top of the Statue of Freedom on the dome. It created certain hazards, and it too was removed.

The Capitol has never been a static monument, a relic of history. It not only has served Congress (and the Library of Congress and the Supreme Court, before these were moved to their own quarters) but it has been put to unusual—"untraditional"—emergency use. During the early part of the Civil War, part of the Capitol was given over for security cells as a prison to hold war criminals, especially spies. Great sections were used as an arsenal to store ammunition. With inadequate hospital facilities in the Washington area, 1,500 beds were placed in the Capitol. A complete military kitchen was set up in the old House section. Huge ovens were installed and thousands of loaves of bread baked to feed the soldiers.

The debate in Congress over the change from gas to electricity makes droll reading today but it was fervent at the time. It took a serious explosion to rout the traditionalists. There has been a complete change in the heating system from that of heating by fireplaces, so loved by the traditionalists, to the present heating from a central plant. (We still, of course, have our snuff boxes.)

We all know that beauty is in the eye of the beholder. But I think it is important to emphasize that the proposed extension will not significantly alter the general appearance of the West front. The average citizen will hardly notice the difference. As evidence I recall that Senator Dirksen, who has served in the Capitol for 34 years, was impelled on the day of the press conference announcing the extension plan, to ask which of the two models before him incorporated the change.

Instead of preserving the Capitol as an historical artifact we should do all we can to enhance its appeal and utility to the public. Lecture halls, exhibition rooms and dining terraces would provide increased access for the public which has a right to expect a welcome from those who do the people's business. In addition, these facilities could also be used evenings and holidays, thus adding new life and vigor to the building during those off hours when the Capitol serves as little more than a "noble pile of masonry and marble." The concept of providing increased public usage of institutional buildings has received endorsements of modern sociologists not only on simple economic grounds but as a means of "relating" people to those institutions. The Capitol, of all buildings, should be foremost in that endeavor.

I cannot refrain from referring again to the battle that ensued in the late Fifties over the extension of the East front of the Capitol. Then, as now, there was an outcry against the expansion despite the recommendations of successive Capitol architects in whose name the protestors were demanding that no stone be touched in our treasured Capitol. Thank-

fully, the work on the East front was approved and completed in time for President Kennedy's inauguration. And many of its severest critics agree that the new facade has added beauty as well as much-needed working space.

Now those of us who favor the extension of the West front, in order to further enhance the beauty of the Capitol while improving its facilities, have another dream. We look to the day—hopefully in time for the Inauguration of 1972—when the President of the United States will take his oath of office, not in front of a parking lot on the East front, as is now the case, but facing westward toward the nation's capital, westward, toward all America.

If at least one citizen during Jefferson's Administration had had his way, Congress would not now be meeting in the Capitol—indeed, the building might not exist in its present form. Congress would be meeting in the White House. The President would have been transferred to more modest quarters.

A 162-year-old, eight-page anonymously published booklet in the rare books collection of the Library of Congress contains the proposal to move Congress from the uncompleted Capitol, consisting then of the unconnected House and Senate wings. The booklet, titled "For Consideration of Congress" and signed "a Citizen," was issued in Washington in 1806.

The author argued that the proposed shift would result in economies. But his main assertion was that the Capitol site was too remote. He said it was "out of the way of commercial pursuits" and that it was "impossible to find a single motive, unconnected with the residence of Government, to induce private families to locate themselves" in the vicinity of the Capitol.

The city of Washington would inevitably develop in the area near Georgetown, the author predicted with a fair degree of accuracy. Georgetown has since been enveloped by the capital city.

The writer proposed that the structure intended for Congress be used as a national institute of arts. Other possible uses he cited were as a home for the mint or as a site for the United States Military Academy.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. TIERNAN (at the request of Mr. ASPINALL), for today, on account of official business.

To Mr. KEE (at the request of Mr. SLACK), for today and Tuesday, May 20, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

The following Members (at the request of Mr. BEALL of Maryland) and to revise and extend their remarks and include extraneous matter:

Mr. BUSH, for 1 hour, on May 22.

Mr. WHALEN, for 30 minutes, today.

Mr. SAYLOR, for 5 minutes, today.

Mr. HALPERN, for 5 minutes, today.

The following Members (at the request of Mr. MIKVA) and to revise and extend their remarks and include extraneous matter:

Mr. GONZALEZ, for 10 minutes, today.

Mr. TUNNEY, for 10 minutes, today.

Mr. POBELL, for 60 minutes, on May 20.

Mr. MARSH, for 30 minutes, on May 20.

EXTENSIONS OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. JONES of Alabama (at the request of Mr. ALBERT) in two instances.

Mr. PRICE of Illinois, during consideration of the Consent Calendar today.

Mr. BRAY, during consideration of the Consent Calendar today.

Mr. TEAGUE of Texas (at the request of Mr. PRICE of Illinois) prior to the passage of House Concurrent Resolution 207.

Mr. CLEVELAND, during consideration of the Consent Calendar today, on the bill H.R. 751.

Mr. STAFFORD, during consideration of the Consent Calendar today, on the bill H.R. 751.

Mr. THOMPSON of Georgia and to include extraneous matter.

(The following Members (at the request of Mr. BEALL of Maryland) and to include extraneous matter:)

Mr. QUIE in two instances.

Mr. CONTE in two instances.

Mr. FINDLEY.

Mr. DERWINSKI in two instances.

Mr. QUILLLEN in four instances.

Mr. PELLY in two instances.

Mr. TEAGUE of California.

Mr. ZWACH.

Mr. BURKE of Florida.

Mr. HALL.

Mr. ASHBROOK.

Mr. BLACKBURN.

Mr. WYDLER.

Mrs. HECKLER of Massachusetts.

Mr. STEIGER of Arizona.

Mr. WYMAN in two instances.

Mr. SAYLOR.

(The following Members (at the request of Mr. MIKVA) and to include extraneous matter:)

Mr. BIAGGI in three instances.

Mr. CAREY.

Mr. JONES of Alabama in two instances.

Mr. THOMPSON of New Jersey in two instances.

Mr. ASHLEY in three instances.

Mr. EDWARDS of California.

Mr. RARICK in four instances.

Mr. BOLAND in two instances.

Mr. ANDERSON of California in two instances.

Mr. BRASCO in two instances.

Mr. HAMILTON in two instances.

Mr. BROWN of California in two instances.

Mr. GILBERT in two instances.

Mr. EVINS of Tennessee in three instances.

Mr. MIKVA in two instances.

Mr. GONZALEZ in two instances.

Mr. DONOHUE in three instances.

Mr. TUNNEY.

Mr. VANIK in three instances.

Mr. JOHNSON of California.

Mr. BINGHAM in two instances.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1995. An act to provide for the striking of medals in commemoration of the 150th anniversary of the founding of the State of Alabama; to the Committee on Banking and Currency.

BILLS PRESENTED TO THE PRESIDENT

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee did on May 16, 1969, present to the President, for his approval, bills of the House of the following titles:

H.R. 33. An act to provide for increased participation by the United States in the International Development Association, and for other purposes.

H.R. 8794. An act to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development, and for other purposes.

ADJOURNMENT

Mr. MIKVA, Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 40 minutes p.m.), the House adjourned until tomorrow, Tuesday, May 20, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

778. A letter from the Director, Office of Emergency Preparedness, Executive Office of the President, transmitting the semiannual report on the strategic and critical materials stockpiling program for the period July 1 to December 31, 1968, pursuant to the provisions of section 4 of the Strategic and Critical Materials Stock Piling Act; to the Committee on Armed Services.

779. A letter from the Deputy Assistant Secretary of Defense (Properties and Installations), transmitting notification of the location, nature, and estimated cost of an additional facilities project proposed to be undertaken for the Army Reserve, pursuant to the provisions of 10 U.S.C. 2233a(1); to the Committee on Armed Services.

780. A letter from the Deputy Director, U.S. Information Agency, transmitting the 31st semiannual report of the Agency, covering the period July 1 to December 31, 1968, pursuant to the provisions of section 1008 of Public Law 402 (80th Cong.); to the Committee on Foreign Affairs.

781. A letter from the Assistant Secretary of the Interior, transmitting a copy of a proposed concession contract for the provision of accommodations, facilities, and services for the public in Grand Teton National Park for the period January 1, 1969, through December 31, 1973, pursuant to the provisions of the act of July 31, 1953 (67 Stat. 271), as amended; to the Committee on Interior and Insular Affairs.

782. A letter from the Chairman, Federal Power Commission, transmitting copies of the publications, "All-Electric Homes, Annual Bills, 1968," and "Statistics of Publicly Owned Electric Utilities, 1967"; to the Committee on Interstate and Foreign Commerce.

783. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third- and sixth-preference classification, pursuant to the provisions of section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

784. A letter from the Secretary of the Treasury, transmitting a draft of proposed

legislation to authorize an adequate White House Police force, and for other purposes; to the Committee on Public Works.

785. A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38 of the United States Code to authorize the Administrator of Veterans' Affairs to enter into agreements with hospitals, medical schools, or medical installations for the central administration of a program of training for interns or residents; to the Committee on Veterans' Affairs.

786. A letter from the Secretary of Health, Education, and Welfare, transmitting a report of grants approved by his Office, for the period January 1 to March 31, 1969, pursuant to the provisions of section 1120b of the Social Security Act; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of May 14, 1969, the following House joint resolution was reported on May 16, 1969:

Mr. CELLER: Committee on the Judiciary. House Joint Resolution 681. Joint Resolution proposing an amendment to the Constitution of the United States relating to the election of the President and Vice President, without amendment (Rept. No. 91-253). Referred to the House Calendar.

[Submitted May 19, 1969]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DAWSON: Committee on Government Operations. Search and rescue operations for U.S. citizens and craft in Foreign areas (sixth report) (Rept. No. 91-254). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of California: Committee on Science and Astronautics. H.R. 11271. A bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes (Rept. No. 91-255). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. Report on trafficking in broadcast station licenses and construction permits (Rept. No. 91-256). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. Report on the fairness doctrine and related issues (Rept. No. 91-257). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASHLEY:

H.R. 11401. A bill to authorize the Secretary of Commerce to conduct research and development programs to increase knowledge of tornadoes, squall lines, and other severe local storms, to develop methods for detecting storms for prediction and advance warning, and to provide for the establishment of a National Severe Storms Service; to the Committee on Interstate and Foreign Commerce.

By Mr. BLACKBURN:

H.R. 11402. A bill to amend title 10 of the United States Code to prohibit the assign-

ment of a member of an armed force to combat area duty if certain relatives of such member died while serving in the Armed Forces in Vietnam; to the Committee on Armed Services.

By Mr. BROYHILL of Virginia:

H.R. 11403. A bill to amend the Federal Hazardous Substances Act to protect children from toys or other articles intended for use by children which present any electrical, mechanical, or thermal hazard; to the Committee on Interstate and Foreign Commerce.

By Mr. CONTE:

H.R. 11404. A bill to authorize the minting of coins in the denomination of \$1 bearing the likeness of Dwight David Eisenhower; to the Committee on Banking and Currency.

H.R. 11405. A bill to establish a national policy and program with respect to wild predatory mammals, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. CORBETT:

H.R. 11406. A bill to provide additional benefits for optometry officers of the uniformed services; to the Committee on Armed Services.

By Mr. CORMAN:

H.R. 11407. A bill to reclassify certain key positions in the postal field service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. DANIELS of New Jersey:

H.R. 11408. A bill to amend title XVIII of the Social Security Act to provide payment for chiropractors' services under the program of supplementary medical insurance benefits for the aged; to the Committee on Ways and Means.

H.R. 11409. A bill to exempt employees of the Railroad Retirement Board from section 201 of the Revenue and Expenditure Control Act of 1968; to the Committee on Ways and Means.

By Mr. DELLENBACK:

H.R. 11410. A bill to amend title 13, United States Code, to increase the penalties for wrongful disclosure of information by employees of the Bureau of the Census; to the Committee on Post Office and Civil Service.

By Mr. DULSKI (for himself and Mr. CORBETT):

H.R. 11411. A bill to amend title 5, United States Code, to repeal the reporting requirement contained in subsection (b) of section 1308; to the Committee on Post Office and Civil Service.

By Mr. FOLEY:

H.R. 11412. A bill to establish in the Departments of the Interior and Agriculture Youth Conservation Corps, and for other purposes; to the Committee on Education and Labor.

By Mr. FOLEY (for himself, Mr. FLYNT, Mrs. HANSEN of Washington, Mr. MCKNEALLY, Mr. McMILLAN, Mr. STUBBLEFIELD, Mr. ULLMAN, Mrs. MAY, Mr. REIFEL, Mr. TEAGUE of California, and Mr. O'NEAL of Georgia):

H.R. 11413. A bill to authorize the Secretary of Agriculture to cooperate with and furnish financial and other assistance to States and other public bodies and organizations in establishing a system for the prevention, control, and suppression of fires in rural areas, and for other purposes; to the Committee on Agriculture.

By Mr. FRASER:

H.R. 11414. A bill to improve the care of homeless children in the District of Columbia; to the Committee on the District of Columbia.

By Mr. HAMILTON:

H.R. 11415. A bill to provide that certain expenses incurred in the construction of a school in Jeffersonville, Ind., shall be eligible as local grants-in-aid for purposes of title I of the Housing Act of 1949; to the Committee on Banking and Currency.

By Mr. HORTON:

H.R. 11416. A bill, Federal-State Educa-

tion Act of 1969; to the Committee on Education and Labor.

By Mr. JOHNSON of California (for himself and Mr. DON H. CLAUSEN):

H.R. 11417. A bill to authorize the Secretary of Agriculture to cooperate with and furnish financial and other assistance to States and other public bodies and organizations in establishing a system for the prevention, control, and suppression of fires in rural areas, and for other purposes; to the Committee on Agriculture.

By Mr. MINISH:

H.R. 11418. A bill to promote higher standards of quality control in the manufacture of motor vehicles; to provide for the establishment by the Secretary of Commerce of standards for new motor vehicle warranties and for motor vehicle dealer franchise agreements; to prescribe effective remedies for breach of such warranties and agreements; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PODELL:

H.R. 11419. A bill relating to withholding for purposes of the income tax imposed by certain cities, on the compensation of Federal employees; to the Committee on Ways and Means.

By Mr. POWELL:

H.R. 11420. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. REIFEL:

H.R. 11421. A bill to amend the Tariff Schedules of the United States with respect to the rate of duty on whole skins of mink; to the Committee on Ways and Means.

By Mr. ST. ONGE:

H.R. 11422. A bill to preserve and promote the resources of the Connecticut River Valley, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SAYLOR:

H.R. 11423. A bill to establish the Gates of the Arctic National Park in the State of Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 11424. A bill to provide for the addition of certain lands to the Mount McKinley National Park in the State of Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 11425. A bill to establish a national policy and program with respect to wild predatory mammals, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. SCHERLE (for himself, Mr. LUKENS, Mr. NICHOLS, Mr. HUNT, Mr. WHALLEY, Mr. POWELL, Mr. BUSH, Mr. BINGHAM, Mr. CAMP, Mr. SCHWENGER, and Mr. PRINE):

H.R. 11426. A bill to amend section 204(a) of the Coinage Act of 1965 in order to authorize minting of all new quarter dollar pieces with a likeness of the late President Dwight David Eisenhower on one side; to the Committee on Banking and Currency.

By Mr. TEAGUE of Texas (by request):

H.R. 11427. A bill to amend title 38 of the United States Code to authorize the Administrator of Veterans' Affairs to enter into agreements with hospitals, medical schools, or medical installations for the central administration of a program of training for interns or residents; to the Committee on Veterans' Affairs.

H.R. 11428. A bill to amend section 401(c) of the Internal Revenue Code of 1954 with respect to certain service performed by physicians employed by the Veterans' Administration; to the Committee on Ways and Means.

By Mr. TUNNEY:

H.R. 11429. A bill to amend title II of the Social Security Act to increase the amount of the monthly benefits payable thereunder, to provide for cost-of-living increases in benefits, to increase the outside earnings

limitation, to extend medicare benefits to individuals aged 62 and to the disabled, to provide medicare coverage for prescribed drugs, to make medical expenses of aged persons fully deductible, and for other purposes; to the Committee on Ways and Means.

By Mr. WEICKER:

H.R. 11430. A bill to amend the Immigration and Nationality Act to make additional immigrant visas available for immigrants from certain foreign countries, and for other purposes; to the Committee on the Judiciary.

By Mr. WILLIAMS:

H.R. 11431. A bill to amend title 28, United States Code, to limit the appellate jurisdiction of the Supreme Court in certain cases relating to the apportionment of population among districts from which Members of Congress are elected; to the Committee on the Judiciary.

By Mr. DICKINSON:

H.J. Res. 723. Joint resolution proposing an amendment to the Constitution requiring that Federal judges be reconfirmed by the Senate every 6 years; to the Committee on the Judiciary.

H.J. Res. 724. Joint resolution proposing an amendment to the Constitution of the United States requiring the advice and consent of the House of Representatives in the making of treaties; to the Committee on the Judiciary.

By Mr. MIKVA:

H.J. Res. 725. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. SAYLOR:

H.J. Res. 726. Joint resolution proposing an amendment to the Constitution of the United States requiring the advice and consent of the House of Representatives in the making of treaties; to the Committee on the Judiciary.

By Mr. WYMAN:

H.J. Res. 727. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. ZWACH:

H.J. Res. 728. Joint resolution proposing an amendment to the Constitution of the United States relative to the equal rights for men and women; to the Committee on the Judiciary.

By Mr. BINGHAM (for himself, Mr. ASHLEY, Mr. BRADEMAN, Mr. BROWN of California, Mr. BURTON of California, Mrs. CHISHOLM, Mr. ECKHARDT, Mr. EDWARDS of California, Mr. FRASER, Mr. FARBSTEIN, Mr. HALPERN, Mr. HELSTOSKI, Mr. KOCH, Mr. MATSUNAGA, Mr. MIKVA, Mr. MOOREHEAD, Mr. PODELL, Mr. REES, Mr. REID of New York, Mr. REUSS, Mr. ROSENTHAL, Mr. ROYBAL, Mr. RYAN, Mr. SCHEUER, and Mr. TIERNAN):

H. Con. Res. 259. Concurrent resolution on urgency of arms control negotiations; to the Committee on Foreign Affairs.

By Mr. MORSE:

H. Con. Res. 260. Concurrent resolution on urgency of arms control negotiations; to the Committee on Foreign Affairs.

By Mr. GARMATZ (for himself, Mr. PELLY, Mr. CLARK, Mr. SCHADEBERG, Mr. DINGELL, Mr. POLLOCK, Mr. LENNON, Mr. DOWNING, Mr. BRAY, Mr. ROGERS of Florida, Mr. STUBBLEFIELD, Mr. MURPHY of New York, Mr. LEGGETT, Mr. FEIGHAN, Mr. ANNUNZIO, Mr. BIAGGI, Mr. GOODLING, Mr. ST. ONGE, and Mr. BUTTON):

H. Con. Res. 261. Concurrent resolution expressing the sense of Congress that certain leases of vessels and equipment to Peru should be revoked; to the Committee on Armed Services.

By Mr. BRASCO (for himself, Mr. BLANTON, Mr. CELLER, Mr. FRIEDEL, Mr. MURPHY of New York, Mr. PATTEN, Mr. PODELL, Mr. STUCKEY, Mr. TIERNAN, and Mr. WOLFF):

H. Con. Res. 262. Concurrent resolution expressing the sense of the Congress with respect to the production and distribution in interstate and foreign commerce of motion pictures and television programs which degrade or demean racial, religious, or ethnic groups; to the Committee on Interstate and Foreign Commerce.

By Mr. ANNUNZIO (for himself, Mr. MURPHY of Illinois, Mr. MIKVA, Mr. KLUCZYNSKI, Mr. SHIPLEY, Mr. RONAN, Mr. PUCINSKI, and Mr. PRICE of Illinois):

H. Con. Res. 263. Concurrent resolution expressing the sense of the Congress with respect to the production and distribution in interstate and foreign commerce of motion pictures and television programs which degrade or demean racial, religious, or ethnic groups; to the Committee on Interstate and Foreign Commerce.

By Mr. FASCELL:

H. Con. Res. 264. Concurrent resolution expressing the sense of the Congress with respect to the production and distribution in interstate and foreign commerce of motion pictures and television programs which degrade or demean racial, religious, or ethnic groups; to the Committee on Interstate and Foreign Commerce.

By Mr. GIAIMO:

H. Con. Res. 265. Concurrent resolution expressing the sense of the Congress with respect to the production and distribution in interstate and foreign commerce of motion pictures and television programs which degrade or demean racial, religious, or ethnic groups; to the Committee on Interstate and Foreign Commerce.

By Mr. LEGGETT:

H. Con. Res. 266. Concurrent resolution expressing the sense of the Congress with respect to the production and distribution in interstate and foreign commerce of motion pictures and television programs which degrade or demean racial, religious, or ethnic groups; to the Committee on Interstate and Foreign Commerce.

By Mr. JOELSON:

H. Res. 412. Resolution creating a select committee to study the need for benefit increases under the old-age, survivors, and disability insurance program and for other revisions in such program and the program of health insurance for the aged, and to report to the House a bill incorporating its recommendations; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

172. By the SPEAKER: Memorial of the Legislature of the State of Alaska, relative to restoration of funds proposed to be cut from the Federal aid to schools in federally impacted areas program; to the Committee on Education and Labor.

173. Also, memorial of the Legislature of the State of Washington, relative to vocational youth organizations; to the Committee on Education and Labor.

174. Also, memorial of the Legislature of the Commonwealth of Massachusetts, relative to repeal of the Hatch Act; to the Committee on House Administration.

175. Also, memorial of the Legislature of the Commonwealth of Massachusetts, relative to direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

176. Also, memorial of the Legislature of the State of Washington, relative to taxation of personal incomes of persons employed

by interstate carriers; to the Committee on the Judiciary.

177. Also, memorial of the Legislature of the State of Alaska, relative to the protection of fish and shellfish resources in waters over the Continental Shelf of the United States; to the Committee on Merchant Marine and Fisheries.

178. Also, memorial of the Legislature of the State of Washington, relative to the issuance of a postage stamp of series commemorating the 50th anniversary of airmail service; to the Committee on Post Office and Civil Service.

179. Also, memorial of the House of Representatives of the State of Washington, relative to flood control and protection facilities for the Vancouver Lake, Wash., area; to the Committee on Public Works.

180. Also, memorial of the Legislature of the Commonwealth of Massachusetts, relative to providing a Veterans' Administration hospital in the north shore area of Essex County, Mass.; to the Committee on Veterans' Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ABBITT:

H.R. 11432. A bill conferring jurisdiction upon the U.S. Court of Claims to hear, determine, and render judgment upon the claim of Charles Bernstein, of Washington, D.C.; to the Committee on the Judiciary.

By Mr. BLACKBURN:

H.R. 11433. A bill to authorize Benjamin S. Persons to accept appointment as vice consul (honorary) of the Republic of El Salvador in Atlanta, Ga.; to the Committee on Foreign Affairs.

By Mr. BROWN of California:

H.R. 11434. A bill for the relief of Miss Vita Maria Narici; to the Committee on the Judiciary.

By Mr. HAWKINS:

H.R. 11435. A bill for the relief of Gloria Dela Cruz; to the Committee on the Judiciary.

By Mr. MINISH:

H.R. 11436. A bill for the relief of Domenica Alampo; to the Committee on the Judiciary.

By Mr. PODELL:

H.R. 11437. A bill for the relief of Francisca Ignacio; to the Committee on the Judiciary.

By Mr. STEIGER of Arizona:

H.R. 11438. A bill for the relief of Alice Faye King, Robert King, and Michael King; to the Committee on the Judiciary.

By Mr. STOKES:

H.R. 11439. A bill for the relief of Dr. Crenea S. Verghese and her husband, Daniel Verghese; to the Committee on the Judiciary.

By Mr. FEIGHAN:

H. Con. Res. 267. Concurrent resolution favoring the suspension of deportation of certain aliens; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

112. By the SPEAKER: Petition of Anthony J. Ribeiro, Jr., and others, Fort Devens, Mass., relative to pay television; to the Committee on Interstate and Foreign Commerce.

113. Also, petition of Gordon L. Dollar, Los Angeles, Calif., relative to redress of grievances; to the Committee on the Judiciary.

114. Also, petition of the Morris Township Committee, New Jersey, relative to the tax-exempt status of municipal bonds; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

ARNOLD ENGINEERING DEVELOPMENT CENTER AT TULLAHOMA, TENN., RECEIVES NATIONAL ACCLAIM FOR ITS ROLE IN SPACE EXPLORATION

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. EVINS of Tennessee. Mr. Speaker, Mr. Henry J. Taylor, the nationally syndicated columnist, recently outlined in an article the role of the fantastic Arnold Engineering Development Center in Tullahoma, Tenn., in space exploration. The giant AEDC research and wind tunnel testing facility is located in the district which I am honored to represent in the Congress.

This facility includes the largest hypersonic wind tunnel in the free world. Mr. Taylor dramatically details the AEDC testing in connection with the exploration probes which are expected to soon touch down on the moon.

As the Apollo 10 streaks toward the moon on the last preliminary flight prior to an actual landing, I place in the Record herewith Mr. Taylor's column in the Nashville Banner because of its interest to my colleagues and the American people.

The column follows:

[From the Nashville (Tenn.) Banner,
May 13, 1969]

TULLAHOMA CENTER PLAYS VITAL ROLE IN CONQUEST OF SPACE

(By Henry J. Taylor)

CAPE KENNEDY, FLA.—The blast off of Apollo 10 will draw the great drama of the moon-shot to this famous place. But I have just reached here from a lovely spot in the Tennessee hills—a miracle place, really, that seems hardly known to our country in the whole incredible project.

The basic problem of space-engineering is that the environment changes but the landing vehicle does not. What happens to it on the moon where the surface temperature falls from the boiling point of water to 240 degrees below zero in 170 hours? What is the effect of the shadows of the peak called Epsilon, nearly a mile higher than Mt. Everest, the highest mountain on earth, if the module lands thereabouts? These are some of the questions involved in research at Tullahoma, Tennessee.

There the U.S. Air Force's unobtrusive Arnold Engineering Development Center has brought much of the universe down to pocket-size for the handiwork of the testing scientists for this moon-shot.

The name Arnold honors the late five-star General H. H. ("Hap") Arnold, World War II commander of the U.S. Air Force, a matchless man in many, many ways. It was he who coined the famous Air Force phrase: "What's difficult we do right away. The impossible takes a little longer." No better monument could be built to "Hap" Arnold than this miracle-source nestling in a forest in north central Tennessee.

The nearest star, our sun, is 93 million miles away. We know it burns at some 20 million degrees centigrade. It is nearly 3,000 times hotter inside than on its surface. This is fortunate, because if the sun's surface were as hot as its center the heat on us

would vaporize the earth in a few minutes, alas.

It gives off energy in changing hydrogen to helium at the incredible rate of 564 million tons per second. This is about seven million times the energy output of all electric power stations in our nation. What will happen to the landing module and our men in this environment? For it is one thing for Apollo 10 to fly around the moon, miraculously enough, but quite another to stand stationary on it. Tullahoma found the answer.

The wind tunnel ("C") at Tullahoma is the largest hypersonic wind tunnel in the free world. Motors totalling 216,000 horsepower drive compressors that produce a wind of 8,000 miles an hour. I saw a model of this Apollo 10 glow cherry-red from the air's friction—standing still while air passed it at this speed.

In the section known as the Von Karman Gas Dynamics Facility, which has eight wind tunnels of its own, nitrogen gas is being heated to 10,000 degrees Fahrenheit and then expanded through a nozzle to test speeds beyond anything dreamed about until this moon-shot. These structures were developed for it that withstand forces working against them that are equal to 200,000 times their own weight.

Many of the buildings in this little known development center are as heavily constructed as a battleship. Some are enormous grey monsters billowing skyward from their rustic setting in the trees and shaped unlike anything previously designed by man. Some have a definite sober majesty. Others are low and rambling and you enter them as if into the yawning mouth of a giant snake. Several others consist of row after row of aluminium-colored tubes, trellises, retorts, and tanks, thrown up bare, without walls, for the fumes from the Saturn-Apollo rocket engines on the test blocks make the ventilation problem enormous.

The electric power need is so enormous that it affects the civilian supply throughout north central Tennessee. Therefore, the large-scale Apollo tests were run after 10 o'clock at night when the outside power load was less and the drain not so disturbing.

Most of this electric power is needed to move water—the fantastic millions of gallons of cooling-water for propulsion-system test cells and the wind tunnels. However, conservation be praised, little water is diverted or consumed. An artificial lake was built at Tullahoma. It has a 75-mile, man-made shoreline. The water is circulated back into this lake—a recreation paradise in the lovely trees, a beautiful by-product of the moon-shot here.

RADIO STATION WHN, NEW YORK CITY, HAS DISCOVERED BRILLIANT AND CREATIVE NEWSMAN IN JOSEPH BRAGG

HON. FRANK J. BRASCO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BRASCO. Mr. Speaker, many of the radio and television stations throughout our Nation have opened the doors of opportunity to minority members. They have devised training programs. They have given a chance for advancement to literally hundreds of young men and

women in the communications industry. I would like to call attention to the superb efforts of radio station WHN in New York City.

The station offered an opportunity to Joseph Bragg, a brilliant and creative individual. Mr. Bragg rose rapidly through the ranks at the station and today is one of the city's most outstanding newsmen. His incisive questioning and perceptive reporting have added much to the New York scene.

I want to compliment Mr. Bragg for his objective efforts and the station for providing the opportunity for men such as he in one of our most important industries.

THE WORK OF UNESCO

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. THOMPSON of New Jersey. Mr. Speaker, perhaps the most effective organ of the United Nations in terms of its outreach to people is the United Nations Educational, Scientific, and Cultural Organization—UNESCO. The activities of UNESCO touch upon virtually every interest relating to the economic and social needs of mankind. As such, UNESCO has been above the turmoil of the world political arena. In all truth, its appeal is to the universal aspects of our daily lives. An editorial depicting the work of UNESCO was recently published in the publication of the Modern Language Association. It was written by George Winchester Stone, Jr., the distinguished dean of New York University's Graduate School of Arts and Science. I am pleased to bring Dean Stone's editorial to the attention of the House as follows:

The U.S. National Commission for UNESCO is charged by Congress to act in an advisory capacity to the United States government and to serve as liaison with the American people in matters pertaining to UNESCO. The challenges of our time are too vast and acute to be met successfully by any one organization; they require the cooperative efforts of nations, of organizations, and of individuals. UNESCO, an organization which was regarded frankly as an experiment when founded in 1946, now evokes the frequent exclamation: "If UNESCO did not exist, it would have to be created!" Two decades of growth and experience have turned it into a dynamic organization closely attuned to the educational, scientific, and cultural interests of the world's nations. What was once a limited instrument of 42 nations—mostly those of Western Europe and the Americas—now consists of 122 independent member states. The minuscule budgets of the early years have been replaced with more substantial funding which, though not yet adequate to all the tasks at hand, enables UNESCO to work productively on some of them. Most recently, a new dimension has been added to UNESCO's work, injecting a greater sense of immediacy and purposefulness. UNESCO has now moved extensively into the field of educational, scientific, and cultural development to the benefit of the less developed nations of Asia,

Africa, and Latin America. The U.S. National Commission has welcomed and encouraged this extension of UNESCO activities. U.S. interests, both immediate and long-term have repeatedly been enhanced in recent years by UNESCO's significant contribution to a long list of international undertakings: oceanographic research, educational planning, teacher training, preservation of cultural heritages, and the free flow of information.

The main purpose of UNESCO is to help to create in all parts of the world the conditions for peace—conditions which will be crushed by rising tides of illiteracy, poverty, disease, and alienation of man from his fellow man. The gap in economic and social development continues to widen between the advanced and the developing nations, constantly eroding the opportunities for productive cooperation. The accelerated pace of urbanization is outstripping man's efforts to attain a tolerable quality of life and contributes unceasingly to the growth of the phenomenon of alienation. Proportionately, the rapid pace of scientific discovery, the development of modern communications media and their possible application to educational and social development, and other advances in man's knowledge of man now make it possible for the first time in history actually to set as a meaningful and obtainable goal the satisfaction of basic human needs for food and shelter, for education, and for good health. Given these facts, UNESCO's role must be that of a catalyst, innovator, communicator, and energizer. The responsibility for action continues to rest squarely on the member states of UNESCO.

The Modern Language Association has long been a member among the sixty national nongovernmental organizations active in the U.S. National Commission. It has received from and given aid to UNESCO and the U.S. National Commission by emphasizing the national interest and foreign languages, not only in the publication and various revisions of Professor William Riley Parker's book, but by the whole scope of the Foreign Language Program, which has been actively in progress in the MLA since 1952. The MLA has provided in the past kits of information for Citizens Consultation Groups on the matter of the spread of the teaching of modern foreign languages in the elementary schools, insistence upon a continuing escalator of these studies throughout the secondary schools, and the validity of new approaches toward the teaching of language. It has also, through a contract with the former Associate Secretary and Treasurer, George Anderson, produced a valuable booklet, *Great Literature East and West*, which examines and annotates the significant books in the UNESCO translation series dealing with matter in the MLA field. It has also contributed six full-page statements in *PMLA*, "UNESCO MUSTS," reviewing many of the significant publications which UNESCO has put forth pertinent to the MLA field.

The National Commission, however, in its recent assessment of its usefulness toward interpreting UNESCO to the U.S., has encountered great vacuums of information regarding UNESCO, tempered only by understanding of the closer relationship which ought to be created to convert general good will into specific action programs. The Commission intends to intensify its liaison not only with the 140 national organizations which are now or have been represented on the Commission, but to extend this liaison to all interested organizations. To do so will require substantial strengthening of the staff and resources of the Commission.

A key to productive participation, however, by all organizations in UNESCO affairs, is effective communication between the organizations and the National Commission—hence, this editorial comment on the nature of the Commission and its plea for each member's interpreting to his colleagues and

communities the usefulness not only of the Commission, but of UNESCO in general.

UNESCO's constitution stresses among other things the rule of law as a basic goal, but UNESCO's present program scarcely reflects that purpose. In a special effort to fill the gap, the National Commission convened a meeting of twenty distinguished Americans concerned with international law. Altogether the substance and proceedings of international law are work for highly trained professionals outside the scope of UNESCO programs, the seminar participants recommended that UNESCO should use its influence to increase awareness among all peoples of the principles of international law and the value of widespread application of its process.

Should any member feel disposed to promulgate the idea of UNESCO, a 30-minute film, "The Minds of Men", was completed early in 1966, and is available. It portrays UNESCO's main purposes and activities. Two hundred prints are deposited in film libraries across the nation, where they are available on free loan to any interested group.

It seems to some of us that the next major productive phase of education must be international education, with a stepping up of international exchanges not only of scholars but of qualified students. We must keep alive, despite the apparent contemporary setbacks of national turmoils, the goals of free flow of ideas, materials, and people—qualified people. As Beowulf said to Hrothgar so many ages ago: "feorcyppa beop selran gesohte paem pe him selfa deah." The accomplishments of UNESCO's and of the U.S. National Commission, as well as other national commissions in this field, have been great, and should be made known to all groups with which individual MLA members come in touch. Pass the word in your community. Information on any items can be obtained by request to the U.S. National Commission for UNESCO, The Department of State, Washington, D.C. 20520 (Geo. Winchester Stone, Jr., New York Univ.).

DR. JOHN S. FOSTER, JR., ON THE
ABM

HON. DURWARD G. HALL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. HALL. Mr. Speaker, many statements have been made, by many people about the Safeguard anti-ballistic-missile system.

Many of this country's scientists have spoken out against the ABM, but even distinguished and learned scientists can do a disservice to the Nation when discussing a subject of this nature, when they do not have or allow a knowledgeable intelligence briefing to back them up.

A recent speech by Dr. John S. Foster, Jr., Director of Defense Research and Engineering, before the Aviation/Space Writers' Association, presents the views of a man not only of the scientific community, but deeply involved with the defense of this Nation as well. He is basically and technically well informed as well as thoroughly advised by highest intelligence sources.

In an effort to add more information and knowledge to this vital subject, I include this speech in the RECORD for all to read:

ADDRESS BY DR. JOHN S. FOSTER, JR., DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING, BEFORE THE AVIATION/SPACE WRITERS' ASSOCIATION, SHERATON-DAYTON HOTEL, DAYTON, OHIO, MONDAY, MAY 12, 1969, 8 P.M. (E.D.T.)

This evening I would like to discuss the Safeguard Ballistic Missile Defense System. My purpose is to describe briefly why we need it; the issue before Congress and what it turns on; and then to attempt to set the record straight on some of the technical questions that have tended to dominate public debate. I'm certain you have not failed to note the great number of writers that are now experts in your business.

First the "whys" of Safeguard. During the last four years we have observed a rapid growth in the Soviet Union's strategic forces. This growth has resulted in an improvement and expansion of their already massive anti-aircraft defenses, the deployment of a small ABM system, the start of more than 1000 ICBM launchers, and the rapid deployment of more advanced nuclear submarines—both attack and ballistic missile launching. The expansion is continuing.

As we have watched this expansion during the last few years, most of us assumed that the Soviet Union was attempting, logically, to gain strategic parity with the U.S. We, ourselves, have not significantly expanded our forces during this period.

However, more recently the character and number of Soviet offensive weapons have tended in directions which cause us now to doubt most seriously our previous less disturbing assumptions. A continuation of these trends could constitute a threat to our strategic forces—to our land-based ICBM's and to our strategic bombers. The phased deployment of Safeguard is intended to give us a minimum necessary "hedge" to protect against these contingencies.

Phase I of this deployment is limited to the location of Safeguard components at two Minuteman wings. Deployment of these two sites provides an opportunity to "shake-down" such a system—to find and remove those technical and operational bugs which are not likely to show up in research and development efforts. We will be prepared to move to Phase II should the threat continue to increase. We could move in the direction of giving greater coverage to the ICBM force, or to protect our alert B-52's against an SLBM attack, or to protect the National Command Authority or to protect our population against a Communist Chinese ICBM attack, or some combination of these options.

It is extremely important that we understand clearly the issue before the Congress, and the consequences of its decision one way or other.

The question of Phase I deployment rests on three key points. First, is the matter of incremental funds associated with deployment. We are requesting just under \$900 million in FY 1970 to continue development, test, and deployment. Of this, about half of the money is for development, test, and the necessary supervision; and the remainder for deployment. So the deployment decision involves the authorization and appropriation of an incremental, \$450 to \$500 million, less than 1% of the DoD's budget request. In fact, expenditures for FY 1970 would be reduced by only about \$250 million, but the ultimate over-all DoD cost for the completed Phase I would increase some \$250 million.

Second, it is important to maintain continuity of this hedge against the still evolving threats. You should realize that ever since the approval by Congress, and Secretary McNamara's decision in 1967, we have been building up our capability to produce and deploy these components. If authorization to continue deployment were delayed until next year, the current capability would decay, and we would lose not just one year but two or more years. Without authority for

production and deployment, we would have to close our developmental production lines, discharge our production personnel and cease our engineering on sites. Later, when authority was granted to reinstitute production, site acquisition, and on-site engineering and construction, we would re-engage the necessary personnel and train them before productive work could be accomplished. This means that the first two sites could not be in operation until 1976 at the earliest, instead of 1974. If at the same time, the Soviets continue on their present course, they could have another hundred SS-9 missiles making a total perhaps of 600, with up to 1800 warheads to attack our 1000 Minuteman. We would then be defending with too little too late.

The third and final key point on which the ABM issue rests is our desire to negotiate with the Soviet Union and end the strategic nuclear arms race. President Nixon has been quite clear on this point. He said—"I have taken cognizance of the view that beginning construction of a U.S. ballistic missile defense would complicate an agreement on strategic arms with the Soviet Union."

"I do not believe that the evidence of the recent past bears out this contention. The Soviet interest in strategic talks was not deterred by the decision of the previous administration to deploy the Sentinel ABM system—in fact, it was formally announced shortly afterwards. I believe that the modifications we have made in the previous program will give the Soviet Union even less reason to view our defense effort as an obstacle to talks. Moreover, I wish to emphasize that in any arms limitation talks with the Soviet Union, the United States will be fully prepared to discuss limitations on defensive as well as offensive weapons systems."

In summary, then, the President has decided that we should take this minimum step consistent with preserving our security and enhancing the chances for meaningful negotiation with the Soviet Union. Failure to take the step could not only endanger our security in the mid-seventies, but also weaken our negotiation position in the immediate future.

The Safeguard issue is complicated by genuine uncertainties over Soviet intentions, and unnecessary confusion over technical and tactical problems. What is most remarkable in the public debate is the high level of confusion and misunderstanding which exists in the minds of some professionals as well as some non-professionals. For example, regarding the Soviet threat, the following quotation is from the recent book "ABM" edited by Professors Chayes and Wiesner.

"It is important to understand that these assertions by Secretary Laird are not based on any intelligence about new Soviet weapons systems. They represent his interpretation of facts that have, in the main, been known for some time, but have not been viewed heretofore by the responsible officials as signaling a Soviet attempt to attain a first-strike capability."

Secretary Clifford concluded in his January 1969 Posture Statement:

"It is quite apparent from the foregoing review of the threat that the Soviet Union is moving vigorously to catch up with the United States at least in numbers of strategic missiles—both land-based and sea-based."

Implicit in Secretary Clifford's conclusion is that the Soviets would level off when they "catch up." The subsequent evaluation of intelligence obtained earlier than his statement and intelligence received subsequently reveals both that the Soviets are moving even faster than anticipated and that, having passed the assumed leveling off point, their expansion programs are continuing unabated.

Mr. Laird's statements are based upon agreed intelligence data. I know of no disagreement on the approximate number of

SS-9's being built by the Soviet Union, nor of any significant issue in size of its payload. We all agree upon the existence of new submarines and upon their approximate rate of deployment. No person who has seen the data objects to the conclusion that the SS-9 has been tested with multiples and the community agrees upon an approximate weight of the RV's.

We do not know just how effectively these RV's could attack Minuteman silos since we do not know precisely their accuracy. Indeed, their testing is continuing.

Further we do not know how many SS-9's the Soviets will finally build. Perhaps the Soviets themselves haven't decided. But, we do have a good idea of the number they could build in any given time at the recent rate, and we do have a good idea of the accuracy they might achieve.

President Johnson and Secretary McNamara saw only the beginning of the SS-9 buildup when the Sentinel system was started 2 years ago, but even at that time the option to defend Minuteman was designed into that deployment. To quote Mr. McNamara in September 1967:

"Further, the Chinese-oriented ABM deployment would enable us to add—as a concurrent benefit—a further defense of our Minuteman sites against Soviet attack."

Mr. Clifford requested, and the Congress granted, funds to maintain that option.

Other statements in the ABM book seem to play a strange numbers game. At one point the book states:

"With our Minuteman in hardened silos, it would take at least two attacking ICBM's to be reasonably sure of destroying one Minuteman."

An ICBM with three independently aimed warheads can attack three silos. The U.S. has designed, but not deployed, a system which allows a missile to signal the launch-control point if it has launched its re-entry vehicle properly. With this system, the control point could reprogram another missile to make up for failures. For example, a missile system having a 20% failure rate and carrying 3 re-entry vehicles per missile, would require only 420 missiles to attack 1000 silos. If the yield of each re-entry vehicle was a reasonable 5 MT and the accuracy a reasonable 1/4 of a mile, about 95% of the silos could be destroyed. This would mean 50 of the 1000 Minutemen survive. It would be foolish to attack half of the silos twice as the book advised, rather than all of them once.

The same strange numbers game is played relative to defense. To quote again,

"It would take three missiles with 30 percent failure probability to destroy an incoming warhead with 97 percent certainty. Some such requirement must be incorporated into the firing doctrine for any ABM defense of cities, radars or bomber bases, and this uses up the defensive missiles at a fearsome rate."

Professor Weinberg indicates in his contribution to this book that sequential firing of the interceptors would eliminate this problem. He considers this very difficult. However, this is just the tactic which we will use and we have planned to use for many years. It is feasible. Furthermore, we expect missile failure rate considerably less than his assumed 30%, and results of firings to date support our expectation. Of those missiles that fail, almost all occur early in flight. Should one fail, we would fire another. Sufficient time is available.

We also find the statement:

"But that system (Sentinel) was designed for a wholly different purpose..."

This quotation is part of a much longer charge implying that the Safeguard components were not designed to defend Minuteman. This is just not true. The NIKE-X R&D program upon which both Sentinel and Safeguard were based, always had a Sprint missile for point defense of targets, spe-

cifically Minutemen and cities. We have, from time to time, examined specialized systems, designed only to hard point defense, with the hope that we could find something much cheaper or much better. But we haven't found it.

Another statement reads:

"It has been authoritatively suggested that it just may be impossible during the next years to write a computer program for dealing with the various forms of attack that can be anticipated."

Programming of large computer-controlled systems is difficult. We have had considerable relevant experience, and our experience shows us that it can be done. The systems cited as horrible examples were pioneering new ground, but they eventually worked quite well. A recent example is the Air Force Space Track radar recently completed. It is very similar to the PAR radar in its operation; it has one of the largest real time computer programs ever written and contains almost a million instructions. It was built on schedule and within cost estimates—including the computer programming. The radar and its computer program are now operational, and the system is being operated and maintained by Air Force crews. In the case of Safeguard, we are allowing a year for shake down of the Phase I installations.

The book in many spots also claims that the defense can be easily countered by simple penetration devices or by "blackout" attacks.

These "simple" devices simply are not simple. We know that the United States has attempted to field operational penetration aids for the last decade, and we are only now beginning to have workable ones in our forces. We use them to force the Soviets to install a complicated and more expensive defense—we do not depend on them to assure our penetration capability. The devices—and the tactics—will require more resources than the Communist Chinese will have available for a considerable time.

With regard to the Soviets, the penetration tactics are not very useful for an attack upon the Minuteman force, and for that reason the Soviets would be wasting their time with them. Light penetration aids and the extensive high altitude blackout do not have much effect on a Sprint defense which takes place in the atmosphere.

With regard to the Chinese, they have yet to achieve their first generation ICBM. They don't know and don't yet have what it takes to develop and deploy penetration aids and tactics against the Safeguard system.

Professor Panofsky has asked recently how many Minutemen could be saved by Phase I of Safeguard.

There are attacks for which Phase I will save a respectable number of missiles. The maximum number is associated with the number of interceptors—a number which is classified for obvious reasons. However, I think it is a mistake to consider Phase I in just such terms. Phase I has two basic functions. It is first a step which will prepare us to react rapidly to a further development of the threat. It prepares sites and production facilities for increasing the number of interceptors and possibly radars, if a threat continues to develop.

Secondly, it provides a checkout, a shake-down of an integrated ABM system. Our first opportunity for such experience. What we learn here will affect future improvements of the system.

Professor Panofsky recently inquired whether the Safeguard system forms an economically feasible defense against a heavy threat to the Minuteman force. Various estimates of the cost of an interceptor including its assigned fraction of the radar and other systems cost have varied between \$2.5M and \$7M. The present cost to the U.S. and probably the Soviet Union for an offensive R/V is in excess of \$10M. The advances which we

expect in our forces over the next few years may reduce these to about \$3M. There is little hope they will ever get as low as \$2M. In other words, the cost to attack and to defend in the 1970 time frame are roughly one to one. Whether or not it turns out in, say 1975, to favor the offense or the defense depends on just what improvements the Soviets achieve as well as our own experience with the actual production and operation of our defensive system.

The Safeguard system has been designed by competent people, and the best that are available. Its design has been reviewed by outside experts. Those who do, in fact, study the aspects of the system that are within their area of technical expertise are convinced it will do what it is designed to do. There are some eminent scientists who, for one reason or other claim it won't work. On that, I'd like to say, first, that they have offered no problem which we have not long since addressed and resolved. Second, I want to point out that one does not obtain a meaningful technical judgment by taking a vote of the scientific community or even of Nobel Laureates. This would go to the second warning against misplaced power mentioned by President Eisenhower in his often quoted Farewell message—

"Yet, in holding scientific research and discovery in respect as we should, we must also be alert to the equal and opposite danger that public policy could itself become the captive of a scientific-technological elite."

I have attempted to treat some technical objections which have been raised; I have not treated all of them. Perhaps you have found or read objections which you consider more serious. If so, I would welcome an opportunity to answer them here and now.

CHICAGO CITY COUNCIL DEMANDS END TO U.S. INVOLVEMENT IN VIETNAM

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. MIKVA. Mr. Speaker, 1 week ago the Chicago City Council took an action which I believe is significant both for the people of Chicago and for the Nation. In an unusual venture into the realm of foreign affairs, the council unanimously called on President Nixon "to take all extraordinary measures to deescalate and to quickly and drastically reduce American involvement in the war." In taking this action, the Chicago City Council has given voice to what millions of Americans—in Chicago and throughout the Nation—have begun to feel: that they were misled both as to the nature of our goals and our ability to accomplish them in Vietnam, that the overwhelming investment of American lives and material resources in the 4 years since American combat forces have been in Vietnam has simply been not worth the cost, that—in short—it is time for us to leave the military and political problems to be solved by the Vietnamese themselves.

I believe it is significant, Mr. Speaker, that the Chicago City Council's action was both unanimous and bipartisan. I think this fact should have special significance in light of the assumption of responsibility by a new administration—a Republican administration. The alder-

man who introduced this Vietnam withdrawal resolution was a Republican. In introducing it he certainly spoke for many members of his own party who are weary of this war. I commend the Chicago City Council's action, and the following article describing it, to the attention of my colleagues, and to the attention of those whose responsibility it is to make the crucial decisions on continued U.S. involvement in Vietnam.

The article referred to follows:

[From the Chicago Daily News, May 12, 1969]
GET OUT OF VIETNAM, CITY COUNCIL DEMANDS—UNANIMOUS VOTE FOR RESOLUTION
(By Jay McMullen)

The City Council Monday, in a rare display of nonpartisan agreement, unanimously called on President Richard M. Nixon "to drastically reduce American involvement in the war in Vietnam."

The Council Finance Committee, comprising all 50 aldermen, approved a resolution offered by Ald. Jack I. Sperling (50th), a Republican.

The resolution asked the President "to take all extraordinary measures to de-escalate and to quickly and drastically reduce American involvement in the war . . ."

The resolution also asks that Mr. Nixon "order an immediate, orderly and sizable withdrawal of major American forces in Vietnam."

It also requests that "Congress provide through "legislative and budgetary powers that President Nixon begin to extricate the United States from its disastrous and crushing involvement in Vietnam."

Sperling's resolution prompted a long debate, but only over whether the wording was strong enough.

"This resolution says we want out," Sperling said.

"It has been demonstrated very clearly by many people that the war is not winnable."

Ald. Seymour Simon (40th), an independent Democrat, joined Sperling in speaking for the resolution.

"The terrible things that are happening on the nation's campuses today wouldn't be happening but for Vietnam," Simon said.

"The war shows our young people we regard human life as having a cheap value. This was wrong from the beginning and in this resolution we say, 'Let's take our men out of Vietnam,'" Simon added.

Ald. A. A. (Sammy) Rayner Jr. (6th) complained that the resolution doesn't go far enough.

Rayner said he favors "total, unilateral withdrawal. We should bring our boys home as soon as possible."

The resolution said "there is a rising clamor throughout the nation by a cessation of hostilities in Vietnam, or at the very least the cessation of American military involvement there."

Since the aldermen approved the resolution while sitting as the Finance Committee, they will vote on it again at Wednesday's Council meeting.

A BILL TO PREVENT THE LOSS OF MORE THAN ONE FAMILY MEM- BER IN VIETNAM

HON. BENJAMIN B. BLACKBURN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BLACKBURN. Mr. Speaker, it is my privilege today to reintroduce a bill to prohibit the assignment of a mem-

ber of the Armed Forces to combat area duty if certain relatives died while serving in Vietnam.

Over 34,000 American families have been touched by the loss of a member due to the conflict in Vietnam. From all indications the war in Vietnam will be continuing at essentially the present scale for many months to come. During the period of continued operations the tragedy of the loss of loved ones from families remains an ever-present concern to all Americans. The bill which I am reintroducing today would prevent the loss of more than one family member by permitting any serviceman to be assigned to another theater of operations if his family has suffered a loss of a daughter, son, or father in Vietnam. I think it would be completely reprehensible, considering the manpower pool that is available, to force another son, daughter, or father in the position of possibly losing his or her life in Vietnam. Since this bill would affect only a very few families, I do not see how it could affect the manpower needs. I hope that the Committee on Armed Services will give this matter their immediate attention and report the bill to the House floor within the near future.

ALABAMA CONGRESSMAN PRAISED BY NEWSPAPER

HON. ROBERT E. JONES

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. JONES of Alabama. Mr. Speaker, one of our distinguished colleagues, Hon. GEORGE W. ANDREWS, has been singled out for congratulations in a newspaper editorial because of his great and important work for water resources development in all of Alabama and throughout the Nation.

As the editorial comments, Congressman ANDREWS has taken on additional duties as a member of the House Appropriations Committee's Subcommittee on Public Works and will be in an even better position to advance this vital work for the improvement of our country.

I want to add my personal congratulations to our colleague from Alabama, and I include the editorial from the Decatur, Ala., Daily at this point as a part of my remarks so that all of my colleagues will know of this exceptional commendation:

[From the Decatur (Ala.) Daily,
May 12, 1969]

CONGRESSMAN ANDREWS BIG AID FOR TVA,
ALABAMA

For Alabama, one of the most fortunate arrangements to occur in the Congress this year is the placement of Rep. George Andrews of Union Springs on the Appropriations Subcommittee which deals with funding for public works projects.

Throughout his entire tenure in the House of Representatives, Congressman Andrews has worked faithfully and purposefully for water resources development. Add to this his great knowledge of fiscal affairs and the value of proper investment in our country's natural resources, and our state can take

pride in the record he will establish in his important new assignment.

As Congressman Andrews is an experienced legislator in the field of water resources development, lodging him on the Subcommittee for Public Works of the Appropriations Committee will bear the entire nation well for he will be in a position to be productive and influential.

No one outside our area is more familiar with TVA nor has anyone been a more constant and ardent supporter of its aims and welfare than George Andrews.

We of the Tennessee Valley are proud of this distinguished Alabama Congressman and are afforded comfort in knowing that he is equally as interested in North Alabama as in his own area.

He has proven time and time again that water resource developments such as the TVA are adding to the value of our nation and providing strength for our people.

Congressman Andrews is now in a position to do even more as a member of the Committee which passes on the funding for public works and capital improvements vitally necessary for our country.

SUCSESSES IN KOREAN AID PROGRAM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. HAMILTON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article pointing up some of the successes of the U.S. aid program in Korea.

The projects covered by the article represent only a small portion of the nationwide food-for-work program initiated by the Korean Government in 1964.

Since then, the total program has benefited some 600,000 Korean families whose members earned much-needed foodstuffs for their children and elders while working on community and agricultural improvement projects. There are 150,000 of these families now tilling land newly reclaimed by virtue of such projects. Each year, the Korean Government has assumed a greater share of the total cost of the food-for-work program, advancing from 24 percent in 1964 to 50 percent in 1968, with the ultimate goal of financing this program entirely as soon as its own resources are adequate to do so.

The article, in the March 31 edition of the Washington Daily News reads as follows:

U.S. AID: KOREA

(By Ray Cromley)

SEOUL, KOREA (NEA).—If President Nixon's men are weary-eyed from probing into the shortcomings of our domestic welfare programs, let them come to Korea.

Here they'll see a new twist in attacking poverty. Workers are enthused, the poor happy. The projects have been so successful, in fact, Washington is now using the plan in 75 countries—but not at home in the United States.

The aid is American food. It's given in payment to the poor for work. But the secret of success is that it is a particular kind of work—designed to help eliminate the poverty.

Back in 1958 and 1959, in return for American aid food, thousands of South Korean farmers began working 15 days a month at

building dams and dikes to reclaim thousands of acres of land along South Korea's long western seacoast, and bench terracing marginal lands in the highlands.

There were hundreds of such projects in the years that followed. As each was completed, the South Korean "poor" settled down on the land, producing rice, dry crops, salt.

Usually, not long after, the aid volunteer offices would begin receiving letters which read something like this: "As of next month, when our first crop comes in we will no longer need the gift food. Thank you."

Over the years other poverty-stricken South Koreans have built reservoirs, wells, public comfort stations, farm roads, co-operative pig sties, chicken and rabbit houses, facilities for raising silk worms, irrigation dams and canals, school playgrounds, sewage ditches, flood-prevention embankments.

Large numbers of the men and women who have worked on these projects are now self supporting.

At present, 30,000 people are working on 266 projects in programs supervised by religious groups working jointly in co-operation with the U.S. aid program and the South Korean government.

Only one member from each family is permitted to work. He may labor under this program only 15 days a month (as it is not intended to develop into a permanent way of life). For this 15 days he receives a month's basic food for himself and his family.

It was not always thus. At the start, the use of American gift food for work was against U.S. law. But the religious volunteer agencies working in the program found the Koreans were unhappy at receiving handouts. They kept asking for something to do. Thus, the work program.

The Agency for International Development in 1964 asked Congress to change the law so that aid to needy persons should where possible aim at community and other self help actions designed to lessen the need for assistance.

That set the ball rolling. A five-year conversion program was begun that year. The majority of food-for-aid projects in 75 countries were to come under the new concept by some time in 1969.

As one volunteer in the South Korean program puts it:

"The people show they like the program . . . They are doing things that are of their own choosing for which they feel the need . . . Their confidence has been built up for them to try themselves to do things they have wanted to do . . . Doing the work themselves and being paid for it takes away the feeling of dependency upon outside help and assistance."

It's pretty difficult to ask for more in a poverty program.

JOB CORPS THOUGHTS BEFORE IT PASSES ON

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. CLAY. Mr. Speaker, if the Nixon administration seeks an epitaph for the life it has drummed out of 59 Job Corps centers and from 17,000 youth, I respectfully submit the following tribute which appeared in the Washington Post Sunday edition, May 18, 1969. It is doubtful that the administration will agree with this portrayal of the life and death of the Job Corps—but those of us who can and

will support the account expressed by Colman McCarthy will surely agree we have rarely seen the case so well stated.

The article follows:

JOB CORPS THOUGHTS BEFORE IT PASSES ON (By Colman McCarthy)

When he was still running OEO, Sargent Shriver, a user of metaphors, often referred to the Job Corps as "the Nation's dumping ground." Occasionally, the term would throw off or offend someone. "Go to a Job Corps center," Shriver would say, "and see for yourself. It'll be filled with kids this country has literally dumped."

Most were content to take Shriver's word for it. Besides, statistics soon began coming back on the dumppees, grim enough to convince anyone. Fifty per cent of the kids had never seen a dentist or doctor, 24 per cent had eye trouble, they averaged 9 years of schooling but only read at 5th grade level, 33 per cent had behavioral problems, 29 per cent of the Negro enrollees left school because they were bored, as did 56 per cent of the white enrollees.

In addition, there were curious little stories the statistics didn't tell. For example, a girl from Appalachia was being shown her room in the dormitory of an urban women's center. When showing her the bathroom, her guide flushed the toilet to be sure it worked. The Appalachian girl jumped back in horror. It was the first one she had ever seen and her comment was, "But I could fall into it."

Early reports also came back from many centers that homosexuality was going to be a problem. The judgment was based on the habits of enrollees who, during the middle of the night, would slip out of bed and into that of a companion. Psychiatrists discovered later that it was not homosexuality at all, but loneliness. The youths in question had never slept alone in a bed by themselves before, being forced by poverty to share a bed with one or more brothers and sisters.

Occasionally, outside observers complained that Job Corps officials often did not give out permanent clothing when new recruits arrived. What appeared as cruelty was really practicality; most of the enrollees had lived on such poor diets that it was better to hold off fitting them for clothes until they gained 10 or 20 pounds, usually a matter of weeks.

It was little wonder the country had no use for kids like this. They didn't even qualify for the dirty-work jobs that every well-run society, if it's going to be neat and clean, needs done.

Early in 1965, when Job Corps began, two things became immediately clear about the program. First, it was not going to be just another job-training program. Many of the youths were so physically, socially and psychologically shattered that training them for jobs right off was impossible. It accomplished little to take a young man into a mechanic shop and say, "Here, I'm going to make a mechanic out of you," when everything about the youth shouted back, "Please, make a human being out of me first."

Thus, Job Corps was basically a human reclamation program, reclaiming exactly the youths society made worthless and then damned because they were worthless. The situation was similar to Shaw's comment in the preface to *Man and Superman*: "The haughty American nation . . . makes the Negro clean its boots and then proves the moral and physical inferiority of the Negro by the fact that he is a bootblack."

The second fact immediately clear about Job Corps in its early days was that of all the poverty programs, it was destined to become the most picked on. Spending tax money on dropouts, punks, welfare cases and the hopeless was probably the subconscious reason why so many righteous Americans were re-

vulsed by the idea of Job Corps. Essentially, the same thing was being done in a program like Head Start, but here the kids were small and cute and cuddly and who but maybe Strom Thurmond would dare speak out against children?

A further reason to wax vehement against Job Corps was "the Harvard argument." Critics pulled out figures saying it cost \$10,000 a year to train a Job Corps enrollee—or about three times the cost of a year at Harvard. Few bothered to get the accurate cost of Job Corps—\$6,725 in 1968—or to consider that the program did a lot more than educate, or that Harvard, through alumni gifts, endowments and other contributions, subsidizes each student for \$7,570, which means a year at Harvard comes out to more than \$10,000. Ironically, the Harvard argument boomerangs in another, more topical way—no Job Corps enrollees, no matter how "disadvantaged," have yet rioted and shut down their center.

When Richard Nixon resurfaced on the national scene, he also picked on Job Corps. The night before he was elected president, he said on national television that the program was a failure, that it costs \$12,000 a year to train an enrollee (Mr. Nixon had been using the figure \$10,000, but on election eve it escalated to \$12,000) and that he planned to eliminate it.

Evidently candidate Nixon didn't know that many large corporations were running Job Corps centers: IBM, Litton, Westinghouse, Philco-Ford, Packard-Bell, Burroughs, IT&T. Nor did he know that about 123,000 of the 177,000 youth who enrolled since 1965 are either working, back in school or in military service. As president, Nixon has apparently heard from his businessmen friends that Job Corps isn't all bad: slander Job Corps and you slander us, their reasoning went. So instead of trying to eliminate Job Corps, the President is now merely going to emasculate it.

What it means is that for many of the dumped, they will get dumped again: into programs too narrow for them, or back into a society too uncaring. Either way the dumped feeling is nothing new.

RESOLUTION URGING CONSTRUCTION OF A VETERANS' ADMINISTRATION HOSPITAL IN THE NORTH SHORE AREA OF ESSEX COUNTY, MASS. BY THE MASSACHUSETTS LEGISLATURE

HON. HAROLD D. DONOHUE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. DONOHUE. Mr. Speaker, I am pleased to include the resolution recently adopted by the Massachusetts Legislature urging the Congress to enact legislation for a Veterans' Administration hospital in the North Shore area of the county of Essex, Mass. In response to the increasing need for Veterans' Administration hospital facilities, I most earnestly urge and hope that my colleagues and the administration will heed and act in the language and the spirit of the resolution which follows:

RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION PROVIDING FOR A VETERANS' ADMINISTRATION HOSPITAL IN THE NORTH SHORE AREA OF THE COUNTY OF ESSEX

Whereas, There is an urgent need for the establishment of a two thousand bed Veterans' Administration hospital in the north

shore area of Essex county; now, therefore be it

Resolved, That the General Court of Massachusetts hereby respectfully urges the Congress of the United States to enact legislation providing for the establishment of a two thousand bed Veterans' Administration hospital in the north shore area of Essex county; and be it further

Resolved, That a copy of these resolutions be transmitted forthwith by the State Secretary to the President of the United States, to the presiding officer of each branch of the Congress, to the members thereof from the Commonwealth and to the Administrator of Veterans' Affairs.

Senate, adopted, April 28, 1969.

NORMAN L. PIDGEON,

Clerk.

House of Representatives, adopted in concurrence, April 30, 1969.

WALLACE C. MILLS,

Clerk.

Attest:

JOHN F. X. DAVOREN,

Secretary of the Commonwealth.

NORWEGIAN-AMERICAN RELATIONS

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. QUIE. Mr. Speaker, the 17th of May provides a welcome opportunity to comment on some aspects of our current and always exemplary relations with Norway. It is Constitution Day, Norway's 155-year-old national holiday. It is a pleasure to pay respectful tribute.

For three historical reasons, I think it is particularly appropriate that we recognize this occasion here in the House of Representatives.

First, it marks the beginning of the Norwegian Legislature.

Second, it commemorates the world's second oldest Constitution still effective today. Only our own is older.

Third, that Constitution has a special kinship to our own.

The Norwegian "founding fathers" studied very closely the work of the men of Philadelphia. It is not just coincidental that the three central concepts agreed upon in Norway in 1814 were government by the people, separation of powers, and the guaranteeing of inalienable human rights. In an early draft they incorporated article XXX of the constitution of Massachusetts with its familiar conclusion that government "should be a government of laws and not of men."

It is in large part because we have stood on common constitutional ground that our relations with Norway have always been excellent. I do not want to examine the details of this very satisfactory history, but I do want to comment on our current cultural and economic relations.

Our cultural relations remain very good. Nearly 800 students from Norway were studying in the United States last year, bringing the total since World War II to approximately 10,000. If one includes those enrolled in the summer school in Oslo, students from the United States are the largest group of foreign students in Norway. Last year Norway

was visited by more than 120,000 Americans.

It is impressive that in 1968 Norway imported \$37 per capita of U.S. exports. Almost astounding is the extent to which Norway's merchant marine has contributed to U.S. trade with the rest of the world. Norwegian ships are second only to our own in visits to American ports. Approximately 17 to 18 percent of all ocean transport to and from the United States is by Norway's ships.

That fleet has helped us not only commercially, but also strategically. During World War II, Norwegian vessels served in all major theaters; half of all the Allied tankers carrying supplies across the Atlantic were Norwegian. Today's new 19-million-ton fleet is a major asset of NATO, in which Norway is a steadfast partner.

The excellent relations between the United States and Norway became firmly established in the last century, when Norwegians migrated to this country in proportions exceeded only by the Irish.

In the many American communities in which the 17th of May is celebrated, this day has come to symbolize the feelings of good will between the United States and Norway. These well-founded feelings have long been at the heart of this occasion in Minnesota, where so many of the sons and daughters of Norway established their homes and contributed so diversely to the progress of our State.

I wish to join in honoring this day by recording my own good wishes before the Congress.

RURAL DEVELOPMENT OUTLOOK

HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. ZWACH. Mr. Speaker, it has long been my belief that sometime our national leaders will finally be forced to place first things first in our unending, profitless pursuit of coping with urban problems. Each new urban program to rebuild, revitalize, and restore our blighted city area is equivalent to putting a most expensive bandaid on the symptom of our basic troubles.

Eventually, and hopefully, before our cities are all impoverished or become strangled in their own morass, we will decide to use the great resources of our Nation to balance population and economic opportunity.

I naturally am referring to the countryside—that part of America not included in metropolitan areas. This spacious area has 98 percent of our total acreage and about 30 percent of our people. It is this great area that I believe should be properly used as the balance once more for our great country. I have introduced a bill, H.R. 8041, to effectuate this move.

Recently, a new publication was released presenting vital information about the countryside. I am reproducing the preface of this study as I believe it most succinctly points out the possibilities of developing the countryside.

PREFACE

The second third of this century has been marked by extraordinary technological advances, industrial concentration, and massive influx of people into big cities. The social and economic impact on the lives of millions of people created some of the most serious problems the nation has ever faced—the urban problems and their side-effects.

Community structures that generations had built were shattered. In thousands of country towns, jobs and opportunities to make a living dried up. Millions of these people, black and white alike, headed for the big cities. Utterly unprepared by training or background to cope with these new conditions, they gravitated to the bottoms of poverty and despair. The cities became the breeding grounds for rebellion, murder, and rampant crime.

Countless programs have been launched to provide food and shelter for the poor, but little has been done to help a vast part of the American population to attain a more normal way of life. There should be no less concern about human ecology or congenial living conditions for people than for the environment of livestock, fish, and wild creatures. This must become our goal as we get into the last third of the century.

Technology and industrial enterprise can be reoriented to serve the largest number of people and the entire country. This is a great challenge for engineering.

There are now 130 million people living in big cities whose total area covers hardly more than one per cent of the United States. The rest of the country, with its vast natural resources, remains relatively underpopulated and under-developed; and some of it has become poverty ridden from constant attrition.

This report outlines the need and the approach to bringing about a better balance between the big city and countryside economies. The countryside, with its 16,000 towns and small cities, is entirely different from what it was even a few years ago. Today it has modern highways, power, better educational and health facilities; and science has expanded its resources. There are thousands of small cities almost ideally situated to accommodate industry, business development and more people.

We need not spend untold billions of dollars to bring new life to America. What is needed is more information and a new kind of motivation. Only by taking into account the full potential of the countryside, which is 98 percent of the United States in area and natural resources, can we hope to bring better living conditions to the greatest number of people.

G. B. GUNLOGSON,

Life Member American Society of Agricultural Engineering, Life Fellow American Association for the Advancement of Science.

EXPRESSING THE SENSE OF THE CONGRESS WITH RESPECT TO THE PRODUCTION AND DISTRIBUTION IN INTERSTATE AND FOREIGN COMMERCE OF MOTION PICTURES AND TELEVISION PROGRAMS WHICH DEGRADE OR DEMEAN RACIAL, RELIGIOUS, OR ETHNIC GROUPS

HON. FRANK J. BRASCO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BRASCO. Mr. Speaker, in behalf of the Americans of Italian Descent, Inc.,

I was pleased today to submit a concurrent resolution expressing the sense of Congress with respect to the production and distribution in interstate and foreign commerce of motion pictures and television programs which degrade or demean racial, religious, or ethnic groups.

AID has for one of its purposes the combatting of defamation of Americans of Italian descent, as well as other ethnic groups, and it is felt that the adoption of the concurrent resolution will greatly help in its efforts to achieve its purpose.

OUR INVOLVEMENT IN VIETNAM

HON. CHARLES M. TEAGUE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. TEAGUE of California. Mr. Speaker, all of my colleagues realize that a heavy majority of our educators appear to oppose our involvement in Vietnam. I call your attention to a particularly impressive letter from a California educator pointing out the reason for our involvement:

CAMBRIDGE, CALIF.,

May 13, 1969.

CHARLES M. TEAGUE,
Member of Congress.

DEAR SIR: Division of American opinion as to a firm stand in Vietnam has surely weakened us, both in the field and at the peace-table.

It is horrible to see the Vietnamese people ground between the millstones of conflicting ideologies. But a Communist take-over would soon follow U.S. withdrawal; and the ruthless tactics of such take-over have again and again been announced by Marxist spokesmen, and illustrated by mass-murder and cruel punishment of "political unrelatables". We must count among the latter the millions who fled North Vietnam when the Geneva agreement for free elections was flouted, along with millions of others who have resisted Communism.

This confrontation, short of nuclear war, is between the bed-rock millstone of dictatorship and the unstable, revolving millstone of elective government. The old and thoroughly proven system of dictatorship is at great advantage in the newly-invented undeclared wars. Without declaration of war, a democracy is like a fighter with one hand tied. Communist spokesmen have urged frequent use of such wars. Should the Vietnam violence be settled, on any basis, Marxist policy forecasts new outbreaks elsewhere.

There is no evidence whatever that the American people or government has territorial aims in Asia. Loud popular protest may, I hope, assure the world that our nation has no imperialist aims. But our original assumption of a protective role has forced upon us a responsibility toward the millions of Vietnamese who favor elective government. Should we withdraw, we must provide asylum for the "political unreliable". This would be a massive and perhaps impossible task.

Our system of elective government is on trial for its life. In an important sense, we are the radicals who are fomenting dissent against dictatorship, which is the well-tried structure of society. We shall greatly weaken our relatively new experiment in elective government, if we back away from paying the high price of freedom in Vietnam.

Unfortunately, our academic communities seems to follow patterns of the nineteen twenties and thirties, when ruthless aims of

two or more dictators were brushed aside as idle threats, and reports of mass-murders and "liquidations" were dismissed as unlikely propaganda. Many teachers, in the comfort and safety of Christian democracy, discourage in their students any concern with loss of life and liberty in far-away Asia or Europe, much as they did thirty-five years ago, with appalling results. Many teachers equate our role in Vietnam with that of the French. Many point out that land-reform and honesty in government are badly needed; but they coolly suggest that Marxists can best carry out those reforms—no matter how frightful the cost in life and liberty.

Democracy is on trial to prove whether it can, by thoughtful dissemination of facts and by compassionate understanding of both friend and adversary, match the driving forces of dictatorship. If there are any valid thoughts in this letter, I beg you use them to fortify our own rather new and very hopeful experiment in free elections and free thought.

With all good wishes,

PAUL SQUIBB.

DISMAY AND DISCONTENT OVER THE CONDUCT OF OUR AFFAIRS IN VIETNAM

HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. THOMPSON of Georgia. Mr. Speaker, each Member of this body has, I am confident, received numerous letters from families of servicemen and from servicemen themselves expressing their dismay and discontent over the conduct of our affairs in Vietnam.

The fact that these servicemen and their relatives have expressed their feelings forthrightly about how our Nation has fumbled its foreign policy should not take away from the sense of loyalty and duty that they have toward their country. Instead of demonstrating, refusing to serve, protesting, or growing beards and long hair, they are fulfilling their obligations as loyal Americans even though they have serious doubts about how our country is carrying on both its military campaign and its foreign diplomacy.

With the permission of the House, I am inserting in the Record today the complete text of one such letter I have received, having obtained the personal permission of the serviceman who wrote the letter. Some of the materials in his letter have already been checked into by me. The answers we received were perfunctory; the military appears to have explanations for almost every conceivable situation which many of our citizens are unable to understand.

I commend this letter to your attention because I conscientiously believe there are many Americans who share the feelings expressed in this letter, but who have not had the courage to speak out about it. I believe the author of the letter is to be commended for doing his duty and, at the same time, maintaining his American rights to disagree with the war in which he and other servicemen are being required to carry out their duties.

Mr. Speaker, his letter is submitted below:

ATLANTA, Ga.,
January 3, 1969.

DEAR SIR: For the past two years I have served my country patriotically and honorably as both an enlisted man and as an officer in the United States Army Corps of Engineers. I am, and have for the past eighteen years, have been, a resident of Atlanta, Georgia. I strongly supported Barry Goldwater and worked many hours during his campaign to help him win the election. I also supported Richard Nixon in the past election. Needless to say, I very strongly supported you in both elections and was very happy that you were reelected. Because I have thoroughly enjoyed your periodic newsletters to the voters you represent, I feel rather easy about writing you this letter.

My chief reason for writing you is simple: You are my representative and I would like to express my opinion whether it means anything or not.

I am presently serving with the 36th Engineers Battalion located in Vinh Long in the Mekong Delta. My responsibilities are those of a platoon leader in an engineer construction company. I have been here in Viet Nam over five weeks and have visited many cities and areas north and south of Saigon. I am very disappointed and disgusted with the entire war effort and our government's positions and policies. Americans are dying over here while many politicians are very unconcerned or so it seems. This limited type of war is frustrating and somewhat demoralizing to the GI's here. When a GI works Christmas Eve and Day and also New Year's Eve and Day, he wonders what the U.S. Government is doing in Paris and the States. I can assure you, sir, that I support all government decisions although I may not agree with them. The facts are simple: we should either pull out of Viet Nam or end this Communist aggression with whatever force is necessary. This country is actually one of the poorest countries in the world, with the exception of American spending. There are no natural resources here and the only industry is fish, which is poor. The black market is, however, powerful and it seems the U.S. Government has let it get out of hand. It's ridiculous to see American products downtown, yet a soldier can't find them in the PX's. Vietnamese work in all PX's, snack bars, and in most units here. The Australian PX is well stocked and for good reason: Australians allow no Vietnamese to work in their facilities. Every city is full of bars and houses where GI's spend most of their money on women and booze (stolen from us) at prices exceeding those in many American cities.

Jeeps and 2½ ton trucks are issued to the Vietnamese soldiers before American soldiers. They have a priority. Why? I do not have a jeep for this reason and have to ride in a ¼ ton truck. There are many units still using the M14 rifle, but the Vietnamese soldiers are rapidly being issued M16's. Why? The entire supply system in Viet Nam is poor. Food in our mess halls is poor.

Sir, do you really think we can stay here forever?

As far as I'm concerned, these people are not worth American lives. But as I said earlier, I am a soldier and follow orders regardless of whether or not I agree.

It's time the U.S. took some definite steps in one direction or the other. Paris I hope and pray.

I am truly a disgusted soldier and citizen. Hope that my letter does not go unnoticed. Some politicians (especially you know who) would probably get down to business if they strapped on a pack and an M16 and came over here to help these people.

Thank you, sir, for your time and your past record as a fine representative for me and my family.

RONALD G. FINCH.

JOB CORPS FAREWELL

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. JOHNSON of California. Mr. Speaker, on the day that the Nixon administration's economy ax fell on our Nation's conservation centers, I was in Redding, Calif., the location of one of the 59 Job Corps centers ordered closed in the name of economy.

My shock was shared by not only the trainees and their instructors at the Toyon Job Corps Center, but also by the people of all the community of Redding. As I have said on many occasions, this is a fine center, with solid community support, a minimum of problems, and doing a tremendous job in the field of natural and human resource conservation.

As soon as word of the impending closing reached Redding, the aggressive daily newspaper published there by Paul Bodenhamer, embarked upon a vigorous campaign to retain the Center as a vital part of our community.

Staff Reporter Dick Young has followed the Job Corps situation from that fateful day, and has done an excellent job of recording the fight to preserve the center.

With the decision of the U.S. Senate against the resolution which is sponsored by many of us in the House of Representatives, I fear that the story has become an obituary.

Mr. Speaker, the Department of Labor has assured us that none of the boys who are in training will be abandoned. Dick Young has recorded what this means to three young Job Corpsmen and what the alternative is. His story speaks for itself. At this point I would like to share his story with my colleagues.

BARBED WIRE DASHED THEIR LAST HOPES FOR THE JOB CORPS

(By Dick Young)

Three teenage boys hitchhiked over 800 miles last week. They made the journey to regain hope that had been given to them at Toyon Job Corps Center.

Today they camp out under the stars in the back acres of a sympathetic Central Valley family's land.

With no money they are trying to find work.

They are part of a yet uncounted mass of displaced Job Corpsmen across the nation who must now find their way in a world that once offered them a plan for self-improvement only to jerk it away as political winds changed in Washington, D.C.

Mark Kent, Steve Berg and Charles Stewart were among the lucky ones. When Toyon began closing down along with 58 other conservation centers they were given a chance to transfer to another center in Clearfield, Utah.

Optimistically, they boarded the bus and left Shasta County. At Clearfield, they found their "second chance" was a hoax.

"It's like a big juvenile hall," says Steve, age 16, of San Francisco.

"It is. It's just like a reform school," adds Mark, also 16, of Reno.

Clearfield is a far cry from Toyon. Bigger—1,375 corpsmen compared to Toyon's 165—Clearfield is surrounded by a 10-foot high

chain link fence that is topped in some places by barbed wire. A staff of over 20 paid security officers patrol the camp with night sticks in addition to a 40-man "Corpsman Patrol."

Each gate is manned by two security men who monitor all persons entering or leaving the center.

Clearfield is one of three urban centers that have been maintained in the Nixon administration Job Corps cutback proposal now almost certain to be put in effect. It is absorbing corpsmen from camps slated for closure, including 20 who were transferred from Toyon.

"The other guys are waiting to see if we made it. They want to get out too," Steve says.

The trio did make it. They were stopped four times by police officers but were never detained. With \$5 between them they scaled the 10-foot fence and hit the road. Along the way a motorist gave them a ride and \$7. The driver of a potato chip truck threw them a large bag of chips at another point on the trek.

They arrived back in Central Valley a week ago today and then contacted friends who gave them something to eat and a place to spread their sleeping bags and blankets.

The boys have no shelter. During a rain one night, they took cover in an abandoned auto body.

They now are classified as AWOL from the Job Corps. In about 10 days they will be officially dropped from the Corps unless they report in at Toyon to formally resign.

Steve Berg and Mark Kent talked with the Record-Searchlight Wednesday. Charles Stewart could not be contacted at that time.

"It was kind of a raw deal," says Steve of the transfer.

They don't want to return home. They see no future in that.

Steve comes from a broken home and wants to be a burden on his mother no longer. He entered the Job Corps with her reluctant cooperation and with the understanding that after his Job Corps stint he "was on his own."

Mark's father was recently released from a hospital and Mark also shies away from going home. His father had told him to get out or he would have him sent to a reform school, he said. He chose the Job Corps and is now looking for some job to tide him over until he turns 17 and can join the Marines.

Steve wants to find work and attend night school in Central Valley or, if possible, find a lucrative enough job to allow him to work weekends and attend school full-time in this area.

Both Steve and Mark agreed that Clearfield was in no way similar to Toyon. The strict security coupled with racial tensions unknown at Toyon made the new center almost completely alien.

Toyon had no security police, no walls, and virtually no racial strife.

"At Toyon we had colored friends. Down there you couldn't even look at a black. 'White boys can't sit here' they would say."

Steve was hit in the face by a black corpsman just hours after arriving at Clearfield, for no apparent reason, he claims.

"I didn't hit him back because if I did I'd have to fight 1,000 of them. They run in packs. It just wasn't like that at Toyon."

Steve and Mark's allegations were confirmed by Walter Schwaar, deputy director of the Clearfield Center.

In a telephone interview, he told the Record-Searchlight of the fences, gates and security police. He also indicated there was tension between black and white students.

Schwaar said there might indeed be some barbed wire but not in all places.

"If I could have stayed at Toyon I would have finished two courses, auto mechanics and welding," Mark said wistfully.

"I came back because I know people here and I think I can get a job.

"We know we can make it in Central Valley," Steve said as he pattered about the small camp clearing in the brush-covered back lot.

"It probably won't rain much anymore," he said to Mark.

Mr. Speaker, on that same day, Publisher Paul Bodenhamer had this comment in the editorial section of the Redding Record Searchlight, which I would also like to share with you.

JOB CORPS FAREWELL

There was a graduation ceremony at Toyon Job Corps Center last night, and what is ordinarily a happy event was a bit sad because it was the final one. The center is soon to be closed, an unfortunate victim of "economy."

The Nixon administration has ordered 59 centers closed. Very likely when history weighs the good and bad of the administration's record, this will be one of the minuses.

The Job Corps program is expensive in dollars per youth or in personnel per youth. But it is a positive program to overcome the handicaps resulting from centuries of discrimination and neglect.

Boys come to the Job Corps with bad teeth, bad health, poor nutrition, little schooling and no work experience or work habits. They come from homes and surroundings in which there is little hope. At the center they get medical and dental care, good food, wholesome hours, useful work—and hope. They get formal classroom training in the three R's and other subjects. Then they get practical training in useful skills. They learn to weld, or drive trucks or do mechanical work. And most of them graduate to jobs—jobs they'd never have had a chance at without the Job Corps.

Well, what's the price of a life? What's it worth to turn one from hopelessness to hope and self-respect and a sense of security? It's worth something.

The young men at Toyon have done this area lots of good by their work on public projects. There are picnic and camping areas, trails, clean roadsides, etc. because of Job Corps projects. And the young men have proved to be good citizens and neighbors.

We're proud of them, grateful to them and sorry to see them leaving.

PRESIDENT NIXON LAUNCHES NEW INITIATIVE IN EFFORT TO END VIETNAM CONFLICT

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. EVINS of Tennessee. Mr. Speaker, President Nixon's recent nationally televised address on the Vietnam conflict represented a new initiative for an honorable peace by a new President.

The President laid it on the line to the Communists—if North Vietnam really wants peace, the United States stands ready to begin phased troop withdrawals.

The address was not new in substance but represented a reaffirmation of the policy of the United States—a policy keyed to mutual deescalation of the conflict and continued firmness and strength—and no surrender.

Because of the interest of my colleagues and the American people in this

vital subject, I place in the RECORD herewith my newsletter, "Capitol Comments."

The newsletter follows:

PRESIDENT NIXON LAUNCHES NEW INITIATIVES TO END VIETNAM WAR

President Nixon in his report to the American people on the Vietnam War provided a helpful summary and analysis of the American policy and objectives in Vietnam. The general consensus in the Congress is that while the President's address did not contain any basically new proposals the speech represented a new initiative by a new President.

In other words the new President was laying it on the line to the Communists. He made it clear that there will be no pullout or surrender but that the United States stands ready to begin withdrawing its troops when the North Vietnamese begin withdrawing their forces. In one hand he tendered the olive branch of peace—in the other he grasped firmly the sword of strength and firmness.

The President outlined a timetable of withdrawal based on phased pullouts of troops on both sides over a 12-month period. At the end of that time the remaining troops on both sides would move into designated base areas and refrain from combat operations. The President emphasized the importance of assuring the South Vietnamese the right to govern themselves without outside interference. He explained that for the United States to pull out and surrender South Vietnam and permit the Communists to move in would result in a massacre of the South Vietnamese and damage our prestige, honor and power around the world.

"If we simply abandoned our effort in Vietnam," he said, "the cause of peace might not survive the damage that would be done to other nations' confidence in our reliability." This was not a new policy—but it was an eloquent and precise reaffirmation of our determination to achieve an honorable settlement without surrender. President Nixon was also following his policy of advising the American people on developments—in effect he was making a progress report, a summary of events, sharing his ideas, principles, plans, and hopes for ending the war.

The President was speaking at the bar of public opinion, attempting to make clear to the peace-loving nations and peoples of the world that the United States stands ready to negotiate realistically to end the conflict on an honorable basis for both sides. "We have ruled out attempting to impose a purely military solution on the battlefield," he said, thus emphasizing his determination to achieve an honorable and peaceful settlement of the war in Vietnam at the earliest time possible.

WATER NEEDS OF THE COLORADO RIVER BASIN

HON. JOHN V. TUNNEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. TUNNEY. Mr. Speaker, Raymond R. Rummonds, chairman of the Colorado River Board of California, presented a paper at the Western Water Congress in Wenatchee, Wash., on April 7, 1969, which outlines the water needs of the Colorado River Basin.

The problems are of interest to Members of many Western States and I submit the speech for inclusion in the CON-

GRESSIONAL RECORD so that it would be available to interested Congressmen:

THE COLORADO RIVER BASIN NEEDS WATER (By Raymond R. Rummonds, chairman, Colorado River Board of California*)

It is a pleasure to be here today and renew my acquaintance with many of the water leaders of the Pacific Northwest. All of you who made the "Survey '68" trip to Canada and Alaska remember the enjoyment we had in getting acquainted with each other.

As chairman of the Colorado River Board of California, I am pleased to appear before you and present to you some of the needs and goals of Colorado River water users. First, I would like to briefly describe the Colorado River Board which is an agency of the State of California. Its basic objective is to protect the rights and interests of the State to the waters of the Colorado River System. The Board's members are appointed by the Governor from those public agencies of the state that have contracts for Colorado River Water: Imperial Irrigation District, Palo Verde Irrigation District, Coachella Valley County Water District, The Metropolitan Water District of Southern California, City of Los Angeles, and San Diego County Water Authority. The former three districts distribute water primarily for irrigation purposes in the Colorado Desert Region of Southern California, while the latter three agencies are located on the south coastal plain of California and distribute water primarily for municipal and industrial purposes.

The waters of the Colorado River represent a significant contribution to the welfare of California. California applies about 35 million acre-feet of water a year for all purposes within the state, and consumptively uses about 70 percent of the applied water. Of the quantity consumptively used, roughly 20 percent of its originates from the Colorado River. This water is delivered both to a predominantly urban area of 10,000,000 people in the Southern California coastal plain and to 700,000 acres of highly developed irrigated acreage, mostly located in the fertile valleys of the Colorado desert.

As is well known, six states in addition to California and the Republic of Mexico are dependent upon the waters of the Colorado River and its tributaries for all or a portion of their water supplies.

Mexico's share of the water was established by the United States' Treaty of 1944 as 1.5 million acre-feet per year; however, each of the states' share is not so easily established. The major effort to divide the Colorado's water was culminated in the Colorado River Compact of 1922, which apportioned the river's flows between the Upper Basin States and the Lower Basin States. The Compact set the stage for the construction of Hoover Dam and the All-American Canal Project. It is the first document of many comprising what is called the "Law of the River". But, even though 47 years old, it has not yet been fully interpreted. Significant progress has been made in resolving some major issues, but others are still unresolved.

Depending upon which period is used, the long-time average annual virgin flow of the Colorado River at Lee Ferry (the Compact division point) has been estimated to be between 13 and 15 maf/yr, with the three Lower Basin States of California, Arizona, and Nevada agreeing in testimony to Congress that the latter figure represents only a 50 percent probability of occurrence, and that the dependable yield is between 13.7 and 14.0 maf/yr. Below Lee Ferry, tributaries contribute approximately 800,000 af/yr, which is about equal to the estimated long-time annual evaporation loss from Lake

*Presented at the Western Water Congress, Wenatchee, Washington, April 7, 1969.

Mead. At the current time, the total river depletions including net diversions, reservoir evaporation, river losses and deliveries to Mexico, are approximately 11.4 maf/yr. Since 1961 only insignificant amounts of highly saline water have reached the Gulf of California from the Colorado River.

Presently authorized projects in the Upper and Lower Basin, when constructed and in full operation, will increase demands on the river system to approximately 15.4 maf/yr. It is important to note that this figure includes a reduction in California uses from present levels of approximately 5 maf/yr to a ceiling of 4.4 maf/yr, and limits Arizona to 2.8 maf/yr, which quantities are less than the capacity of existing California and Arizona projects plus the authorized Central Arizona Project. Thus, the supply available from the river is inadequate to fully meet present uses plus future uses from authorized projects, to say nothing of water requirements from other projects required to meet additional needs of this growing area of the nation.

The basic questions facing the Colorado River Basin concerning augmentation of its water supply are when and how much.

Another problem related to water supply in the Colorado River is that of the increasing salinity of the river's water. At present, a major effort of the irrigators in California and Arizona has been to remove harmful salts from the soils irrigated by Colorado River water in order to maintain the soil fertility. At the present, average annual salinity levels of the river, in the vicinity of 800 to 900 parts per million, farmers are experiencing many crop problems due to this quantity of salt in the irrigation water. During some months of recent years, the average monthly salinity has exceeded 1000 parts per million. In addition, we know that with the continuing development of water-using projects in the upper reaches of the river system, the river's salinity will increase. Projections by the Federal Water Pollution Control Administration are that the river's salinity will be nearly 1300 ppm shortly after the turn of the century at Imperial Dam, the point on the river where most water is diverted for irrigation use in California and Arizona.

(Show slides of Colorado River Basin river works, water distribution, agricultural crops and saline salts.)

The only realistic solution to the major problems of the river is by augmentation—that is, the annual supply of fresh water must be increased. The high salinity flows should be diluted to a reasonable level of salinity, so that additional quantities may be made available for increased economic developments throughout the entire river basin. In stating this as being the only realistic solution, we recognize that any augmentation project should be economically justified and financially feasible under existing law. We in California believe that such an approach is reasonable.

As the states of the Pacific Southwest recognized the problems that arise from the inadequate flows of the Colorado River, many have turned to consideration of adjoining regions of the United States as potential sources of supplemental water. In so doing, I would like to emphasize that the Southwest is not interested in a "water grab". The Southwest is only interested in knowing if there are surplus quantities of waters which meet the needs of the adjoining states. Many proposals have been introduced but none of these have been made in sufficient depth or scope to warrant public support. I want to assure you now that no proposal will receive the support of the Colorado River Board of California that would take water from your area that is necessary for your economic well being.

In furtherance of this principle, we believe that a concept pioneered in California

to protect the water surplus regions of our State in the development of California's State Water Plan is fully applicable in trans-basin and interstate projects as well. This concept has achieved some publicity as the "area of origin" principle. This principle is that water diverted from an area of origin is subject to recapture by the area when it has an economic need for such waters. We believe this principle is reasonable and pledge ourselves to apply such a principle to all interstate water transfer projects.

At this time we do not know whether an importation project from another basin such as the Columbia Basin to the Colorado River Basin is feasible. We are not interested in obligating ourselves and our descendants to pay for projects that are more expensive than the most efficient and economical alternatives. To assure ourselves of this, we will be seeking the optimum project and will want to examine all possible alternatives, which include desalting ocean water and moving it to areas of need; modification of the weather, thereby increasing precipitation and streamflow, reuse of existing applied waters; and interbasin water transfers. One of our major problems is that the presently authorized federal studies either prohibit or place a ten-year moratorium on the study of interregional water transfers. These restrictions will result in delays which we do not believe are prudent. We feel a pressing need for comprehensive studies that will use a common yardstick to consider all possible means of meeting our deficits.

I believe that a properly planned export project from the Pacific Northwest to the Pacific Southwest could prove advantageous to the Northwest under the following conditions:

1. The water diverted to the Pacific Southwest would be truly surplus to the needs of the Pacific Northwest at the point of diversion.
2. Any economic impact on the Pacific Northwest from such diversion would be fully compensated, such as in lieu payments for power generation foregone.
3. As the Pacific Southwest continues to grow it will need more food, material and other supplies from the Pacific Northwest as shown by the report entitled "Economic Inter-Dependence of the Western States" by Wilbur McCann. Copies of this report are available today.
4. Such a project could enable the delivery of supplemental water to regions of the Northwest at water priced so that the arid regions of the Northwest (Idaho and Oregon) would be able to purchase supplemental water that otherwise could not be delivered economically to that region.
5. Through investments in diversion facilities, substantial funds would be expended in the Northwest on construction payrolls and purchases of material and supplies.
6. There would be a permanent operation and maintenance function in the region, with salaries and supply purchases permanently benefiting the local economy.

Suggestions have been made that by not building water supply and other public works facilities for the fast growing areas of the Pacific Southwest people may move to areas of water abundance. There are undoubtedly many citizens of the Pacific Southwest who would be perfectly willing to reduce the population pressures on our areas as they believe that many of the amenities of life in the Pacific Southwest are being eroded by the tremendous influx in population. However, as responsible citizens, we recognize that any attempts to tell people where to live are improper and contrary to the ideals under which our country was founded. Accordingly, we can either receive the increasing population with deteriorating supplies of our basic resources and public works, or we can attempt to keep abreast of the influx. We choose the latter course.

At various times it has been suggested that the Pacific Southwest can avoid the necessity of importing additional water by increasing its efficiency in using water.

Efficiency in water use generally relates to minimizing losses in distributing water and in making the maximum possible reuse of water. We believe that we are meeting the goal of maximizing efficiency in use. A few examples will illustrate this fact: (1) the Gila River system, comprising the area of most water use in Arizona, drains central Arizona and western New Mexico. The system's water supplies are used and reused to the extent that the only water to leave the central Arizona area for downstream discharge is in infrequent flood flows. Further, in the lower river the only water discharged from the system consists of saline drainage waters of about 5000 ppm total dissolved solids; (2) in the great Central Valley of California, the area of most water used in the state, all return flows from both urban and agricultural uses are used and reused, with the outflow from the valley regulated primarily to repel ocean tides in the Sacramento Delta; (3) all waste flows from communities and drainage water from irrigation projects in the Colorado Basin return to the Colorado River and are diverted again for reuse; (4) the agricultural users in California, who divert Colorado River water of high salt content at Imperial Dam, discharge the highly saline drainage waters into the Salton Sea which serves the useful purpose of recreation, fish and wildlife enhancement.

As we have noted, economy with water had a long tradition in the Southwest. Ladies and gentlemen, as a farmer in the Coachella Valley County Water District, let me point out that in this District we meter to the farmers 94 percent of the Colorado River water we receive. Let me also point out that the District obligated itself to repay the federal government more than 27 million dollars for the All-American Canal and distribution system which has led to development of the Coachella Valley to an assessed valuation in excess of \$200,000,000 with the attendant thousands of jobs and other income oriented factors.

The record of the Pacific Northwest in getting congressional action to prohibit or delay the effect of analyses of the Pacific Northwest as a potential source of surplus water for interbasin diversions has been remarkable, to say the least. We recognize that the Pacific Northwest is concerned with premature action on studies of potential interbasin transfers. However, we believe that properly planned studies to determine if there are surpluses and ways to make use of those surpluses will benefit the Northwest.

As my comments have indicated, we in the Pacific Southwest sincerely believe that we have an impending shortage of water coming upon us. It requires that we must know soon the most economical way to overcome this shortage. We further believe that studies should be made of the importation of possible surpluses from the Pacific Northwest. Such studies should not be made under the assumption that this would be the only feasible source of water but with the understanding that all feasible supplies must be analyzed in order to arrive at a rational decision as to the optimum approach.

We believe that the studies must be undertaken with full protection and full rights accorded to the Pacific Northwest. This protection would include the "area of origin" protection, including those rights of recapture, that are now afforded to areas of origin within the State of California, and the right to make use of the facilities for the benefit of arid regions within the Pacific Northwest itself. We recognize that your steps to delay interbasin studies were taken because you thought it was the best way to protect your area. Now that you have pro-

tected yourself so well, perhaps we have reached the point where we can sit down and discuss our mutual problems without some of the emotional roadblocks that have been so prevalent in the past. After consideration of all factors, you may well discover that it will be in your best interests to have a carefully developed program to investigate the possibility of interbasin water transfers.

I thank you for inviting me to address you, and I would like to close by inviting all of my friends in the Pacific Northwest to plan to visit us in the Pacific Southwest to see our great water transportation and delivery projects.

A BLOOD PROGRAM OF ACCOMPLISHMENT

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. SAYLOR. Mr. Speaker, Richard Watson Post 141 of the American Legion at Indiana, Pa., recently honored its members who have donated a total of 1,525 pints of blood to the Indiana County chapter of the American Red Cross.

I was privileged to speak at the dinner recently to pay tribute to the 78 donors who have given at least 1 gallon of blood. The large amount of blood donated by this group comprised over 76 percent of the 1,988 pints—248.5 gallons—donated by the post since the beginning of the program.

Ronald E. Fulton was cited at the dinner as the top blood donor with a total of 83 pints. Second was George E. Thompson with 63 pints. A list of other blood donors and the amounts they donated follow:

John E. Hoover and Joseph C. Lydic (49), David Mack Williams (48), E. Richard Lydic (46), William S. MacBlane (44), J. David Naylon (42), C. Ross Reed (39).

Bernard Q. Cunningham (37), Theodore S. Elias (35), Marlin D. Penrod (34), Salvatore Adornato (33), Phillip J. Recupero and Matthew J. Miconi (28), John G. Smith and Richard J. Kennedy (27).

Anthony Dellaflora (26), David J. Brown (25), Theodore W. Hurd and Alpert P. Mauro (24), Robert N. Sanford (23), Harold E. Little (21), Charles J. Lewis Jr. (20), Harry Young, Virgil G. Vaughn, Paul T. Allison and Nicholas M. Kopchick (19).

Burno J. Telk and John M. Hess (18), John Brain, William J. Peterson and James C. Hassinger (17), Craig Moore, Anthony F. Violi and Richard L. J. Burn (16).

Joseph Babco and Charles Gibbon Jr. (15), Peggy Good, Robert H. Little and Raymond J. Simpson (14), Nicholas G. Bonnarrigo, William G. Ferguson and Morris A. Mistretta (13), Harold M. Buchheit, the late James A. Vogel, Roy Vinton Jr., Alex Tait, Donald B. Shank, James W. Mack, Rudolph H. Haldin and Hubert W. Hamacher (12).

Robert V. Sell, James L. Boucher, John D. Buterbaugh and Gladys Good (11), Edwin F. Leone, Cameron Davis Jr., Charles E. Ruffner and James Shirley (10).

Francis M. Pallone, Maynard Decker, Ronald A. Johnston and Michael J. Busija (9), Joseph J. Mancuso, John Bracken, William F. Lambert, John E. Lambert, James A. Buggey, Arthur G. Carnahan, John T. Heverly, Jack White, John Lezanic, Richard M. Beatlie, Walter L. Cikowski, Anthony J. Clement, James D. Dickie and Robert Thayer (8).

Mr. Speaker, as you can well imagine, I am extremely proud to be representing people like those cited, who, without remuneration or thought of recognition, have given so extensively of themselves to help their fellow man.

REMARKS OF THE HONORABLE JACK WILLIAMS

HON. SAM STEIGER

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. STEIGER of Arizona. Mr. Speaker, the following remarks by the Honorable Jack Williams, Governor of the State of Arizona, are so timely and appropriate I want to share them with all of you:

Thank you and hello again . . . It is not my practice to pontificate on international politics. I've frequently described myself as a parochial Governor . . . interested in the State I've lived in all of my early years and adult life. But when I read something such as a report released by the House Armed Services Subcommittee on Seapower that reports the U.S. Navy has deteriorated into an aging collection of worn out ships . . . that the ships inherited today are rotting so badly that some crewmen work as much as 80 hours a week to fight rust and corrosion, I feel impelled to comment. In 1934 Churchill deplored the fact that the defenses of England were being allowed to deteriorate. His remarks then in the House of Commons could be paraphrased by any United States Senator or Congressman today. Said Churchill then:

"I am not to be understood to mean that the possibilities of a gigantic war are nearer, but the actual position of Great Britain is much less satisfactory than it was this time twenty years ago, for then at least we had a supreme fleet; nobody could get at us in this island; and we had powerful friends on the Continent of Europe, who were likely to be involved in any quarrel before we were; but today, with our aviation in its present condition, we are in a far worse position."

Then Churchill continued: "There is no greater danger than equal forces. If you wish to bring about war, you bring about such an equipolse that both sides think they have a chance of winning. If you want to stop war, you gather such an aggregation of force on the side of peace that the aggressor, whoever he may be, will not dare to challenge."

Three years later Churchill said: "When the situation was manageable it was neglected, and now that it is thoroughly out of hand, we apply too late the remedies which then might have effected a cure. There is nothing new in the story. It falls into that long, dismal catalogue of the fruitlessness of experience and the confirmed unteachability of mankind."

Two months later Churchill warned: "It would be folly for us to act as if we were swimming in a halcyon sea, as if nothing but balmy breezes and calm weather were to be expected and everything working in the most agreeable fashion. By all means follow your lines of hope and your paths of peace, but do not close your eyes to the fact that we are entering a corridor of deepening and darkening danger, and that we shall have to move along it for many months and possibly for years to come."

These were words spoken only shortly before Hitler began to move. But much earlier in 1931 Churchill warned: "The great liner is sinking in a calm sea. One bulkhead after another gives way; one compartment after another is bilged, the list increases; she is sinking, but the captains and the officers and

the crew are all in the saloon dancing to the jazz band. But wait until the passengers find out what is their position!"

Then in 1937 on April 14th Churchill warned: "We seem to be moving, drifting steadily, against our will, against the will of every race and every people and every class towards some hideous catastrophe. Everybody wishes to stop, but they do not know how!"

Again and again, his voice cried out in Commons. "Historians a thousand years hence will still be baffled by the mystery of our affairs. They will never understand how it was that a victorious nation with everything at hand suffered themselves to be brought low and to cast away all that they had gained by measureless sacrifice and absolute victory—gone with the wind."

All of this was inspired by a friend, Holmes Alexander, who opened his column recently with: "The awful truth about America's sickening plunge into military inferiority is politically untellable." So, I thought you might be interested that the story is not new, Churchill told it 30 years or so ago, and Cassandra long before that.

STATEMENT OF CARL D. PERKINS

HON. JOHN C. WATTS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. WATTS. Mr. Speaker, on May 14, my distinguished colleague from Kentucky, the Honorable CARL D. PERKINS, chairman of the House Education and Labor Committee, testified before the House Labor-HEW Appropriations Subcommittee, chaired by the Honorable DANIEL FLOOD.

I am pleased to submit for the RECORD the text of Mr. PERKINS' statement for the information of all Members.

STATEMENT OF CHAIRMAN CARL D. PERKINS, HOUSE COMMITTEE ON EDUCATION AND LABOR, BEFORE THE LABOR AND HEALTH, EDUCATION AND WELFARE SUBCOMMITTEE OF THE HOUSE APPROPRIATIONS COMMITTEE, WEDNESDAY, MAY 14, 1969

Mr. Chairman, thank you for this opportunity to appear before this distinguished Subcommittee. A number of concerns prompt me to come before you.

Under the budget submission of the present Administration—

There is no appropriation request to fund Title V of the National Defense Education Act; yet there is \$40 million authorized.

There is no appropriation request to fund Title III of the National Defense Education Act; yet there is \$290 million authorized.

There is no appropriation request to fund Title II of the Elementary and Secondary Education Act; yet there is \$206 million authorized.

Only 14% of what is authorized for the pre-school and special education programs for handicapped children is being requested.

Less than 40% of what is authorized is being requested to fund programs for educationally deprived children.

Mr. Chairman, it is because of these statistics and others which I will discuss in my statement that I come before you.

In testimony before the Committee on Education and Labor early this year, the Superintendent of Schools for Fort Worth, Texas, said:

"I wish there were some way I could adequately tell you what ESEA funds mean to the public schools, and more than that, to the future of countless children, their opportunities, their ability to compete, their

responsible citizenship, and their success or failure in the American way of life. The ultimate value of ESEA funds in the lives of children is really beyond calculation.

"For these extra funds, we in the public schools are eternally grateful. I submit that reductions or cutbacks simply cannot even be considered. The question is not, 'Should these funds be increased?', but, 'How much should these funds be increased?'"

"Education is not expensive, it's priceless. 'Money isn't everything in education these days; but, gentlemen, it's way ahead of whatever is in second place.'"

William H. Moore of the Arkansas Department of Education, said:

"When Title I funds are cut back in Arkansas, it means children who are hungry must be cut off from Title I breakfasts and lunches, it means that some children must go without medical treatment and clothing, it means that other children will not have textbooks."

Mr. Chairman, it is because of statements like this which were repeated time and time again during our Committee hearings that I come before you today. I have prepared for your consideration and review a compilation of statements from our hearing record which relate to the financing of Federal aid programs. This is Attachment A of my statement.

In connection with our Committee survey of 20,000 school superintendents, the Superintendent of Schools for Louisville, Kentucky responded to the question, "Is the Elementary and Secondary Education Act underfunded?" as follows:

"For example, to provide the minimum recommended number of teacher aides alone in Louisville's Title I eligible elementary schools would require expenditure of approximately \$500,000 or five times the \$100,000 we are now able to spend . . . We would translate this underfunding into a figure of approximately ten million dollars."

Mr. Chairman, it is because of responses like this that I come before you today. In Attachment B of my statement, you will find abstracts from over 70 of the responses that we received. In Attachment C you will find the results of our tabulation of questions which relate to the financing of Federal education programs.

As I have studied our survey and listened to the testimony before our Committee, I have become convinced that virtually every education program with which we deal is related significantly to the major domestic issues confronting the American people. Recognizing this it is difficult to understand the unwillingness of the Executive Branch, and I speak of the previous Administration and the present Administration, to finance these programs at a level sufficient to meet the challenge.

We talk about and are rightfully alarmed about the increasing incidences of juvenile delinquency and youth crime, yet there is no pending appropriation request for Guidance and Counseling programs.

We know that we are reaching less than 40% of our young handicapped boys and girls who need and deserve special education programs, yet we are asked to fund the Title VI ESEA program of grants for special education at only 14% of what is authorized.

We know from repeated studies that one of the most urgent problems facing education today is the shortage of qualified teachers, yet it is proposed that we fund the Education Professions Development Act at the 25% level.

In the face of the "Youngstown phenomena" and the financial crises in both large and small school systems, we are told—

Do not fund the program to assist local school districts in the acquisition of needed instructional equipment;

Do not fund the program which provides boys and girls with library and textbooks; and

Do not fund work-study programs for vocational students and vocational education programs for students with special needs.

Though we know it is increasingly difficult to meet college expenses which are spiraling upward at a fantastic rate, we are urged to reduce the appropriation for the student loan program to the 1965 level—to provide a 1970 appropriation which is 18% below the level of last year's program and 44% below what is authorized. How does this relate to the determined and approved needs of institutions of higher education?

Mr. Chairman, colleges in South Dakota will receive 34.5% of their panel-approved requests; colleges in Illinois will receive 57% of their approved request; colleges in Alabama will receive 49% of their approved request; and colleges in Kansas will receive 55% of their approved request. The figures are presented in terms of colleges, but what we are really saying is that only 34% of the students in South Dakota, and 57% of the students in Illinois who need loans will receive them.

And, Mr. Chairman, we talk about youth unemployment and underemployment—and there is an authorization of \$822 million for Vocational Education Programs—yet we are asked to provide only 33.7% of that amount—\$277.5 million.

Finally, Mr. Chairman, we talk about violence and riots in our cities—

Let me share with you the comments of the Superintendent of the St. Louis School System. He told our committee, "I think the difference in my community between riot and disruption has been Title I of the Elementary and Secondary Education Act money. I think it has saved us from this."

In a similar vein, a member of a school board for Seattle, Washington, indicated, "I can tell you this: the crises in our city is much less than it would have been if you had not given us Title I funds. I don't know what we would have done without them."

At this time, Mr. Chairman, I would like to discuss on a program-by-program basis, some of my concerns and the concerns of educators and administrators across the country about the proposed levels of funding. I should like to begin with programs carried on under the Elementary and Secondary Education Act—the Act that was described by a school superintendent from Mississippi as "the most exciting thing that ever happened in education."

ELEMENTARY AND SECONDARY EDUCATION ACT

My review of the budget submissions for FY 1970 indicates (1) that the total authorization for all programs carried on under the 1965 Act is \$4,288,500,000; (2) that pursuant to this authorization, the former Administration requests \$1,538,376,000, or 36% of the authorization; and (3) that the present Administration requests a total of \$1,410,000,000—that is 32% of the amount authorized.

Mr. Chairman, viewed in any way, Title I of the Elementary and Secondary Education Act is the major program of assistance to education. For FY 1970, we could and we should appropriate the full authorization of approximately \$3,142,000,000. I have already mentioned the Committee school superintendents survey which was sent to over 20,000 school superintendents around the country. In answer to all of the seven questions asked in the questionnaire, the hardships imposed by low funding levels—particularly for Title I—was consistently mentioned.

The first question, the most pertinent to our discussion of Federal financial assistance, asked if the Federal Government was doing its share in providing funds for elementary and secondary education. 65% of those responding indicated that the Federal Government was not doing its share. In very large school districts, over 80% felt the Federal Government was not doing its share. A great majority of those who responded that the Federal Government is doing its

share, conditioned their response to a full funding situation. Many of the superintendents offered suggestions, over 40% of which recommended that support be increased. In districts with enrollments of over 100,000 two-thirds of the responses asked for increased support.

Another question, which specifically dealt with the financial aspects of Federal education programs, asked to what extent the Elementary and Secondary Education Act was underfunded. Nearly 70% of the superintendents indicated that this legislation was underfunded and frequently commented that the programs financed by the ESEA are ones on which they rely heavily. In large school districts over 90% of the superintendents indicated that the program was underfunded.

Let me share with you just a few of the responses from local school superintendents which I believe illustrate clearly the adverse effects of curtailments and reduced levels of funding.

Argyle, Iowa: "ESEA is extremely underfunded. Our area has been cut from \$45,000 three years ago to \$19,000 next year. We have approximately 40% of our students identified as educationally deprived (see enclosed list), yet we have had to eliminate teacher aides, TVR equipment and instruction, summer school, and other items from our educational program, and cut or nurse to ½ time due to Title I budget cuts. I believe that someone in Washington should take a look at the small rural areas of our nation and see the problems we have here."

Cherryvale, Kans.: "In our particular school districts, we will be underfunded in the ESEA by approximately \$4,000. Due to the reductions in our entitlement we will have to cut off part of our summer program. In our summer program we work with our remedial students."

West Grove, Pa.: "Our school is located in a rural area with many low income families—therefore we have many children who are educationally deprived, some of whom we are unable to reach because of lack of funds. Each year of the ESEA program, the Title I funds have been reduced, thereby making it necessary to curtail our program."

Norfolk, Va.: "Although it is difficult to know just what the Federal Government's 'share' is in assisting to improve the quality of elementary and secondary schools, the Federal Government has failed to support fully its own appraisal and estimate of its obligation. The Congress has passed a volume of highly significant legislation authorizing financial support for schools in recent years, but the actual appropriation of funds seldom matches the authorization. Our first recommendation to strengthen the Federal Government's role in improving elementary and secondary education is to fully fund the authorizing legislation already in existence."

"The total allocation to the Norfolk School System for ESEA Titles I, II, III, and Central City Project, after reductions for the current year, amounts to approximately \$2.6 million. We estimate that there are in excess of 20,000 children enrolled in this school system in need of the educational services for which ESEA was created. It is clearly evident that the funds available are insufficient to achieve any substantial impact for more than a relatively small number of children. The full funding of ESEA would approximately double the funds available, and approximately double the potential impact of the Act."

Double Springs, Ala.: "Recent enactments of Congress furnishing support for elementary and secondary education has been great!! It has made a tremendous impact on our educational program. ESEA is at least 50% underfunded. Our need is great—even desperate."

As I have indicated previously, Mr. Chairman, Attachment B of my statement contains abstracts like these from over 70 of the

thousands of responses the Committee received.

The accomplishments of Title II of the ESEA have been impressive. Reports brought to my attention indicate that in 1966, 1967 and 1968, the program was touching an estimated 44 million students and 1.8 million teachers. Even under the reduced appropriation in 1969, it was estimated that 9 million books and film strips were acquired with Title II.

Mr. Chairman, to appropriate only \$42 million as was requested by the former Administration would work a severe hardship. To totally deny funds for this program as is recommended by the present Administration would be catastrophic.

I must point out to you that termination of funds for this program and for Title III and V of NDEA as is suggested poses serious administrative problems for state and local educational agencies. For state departments of education, it will mean a net loss of an estimated \$11.3 million in administrative funds and a loss of more than 900 state department personnel and the leadership and supervisory services provided by them to local school districts.

Supervision or termination of the three programs would cause particular hardships for local educational agencies. Commitments have been made by local school districts for the employment of personnel for their administration. Since district school boards have not made provisions from local funds for these salaries for fiscal year 1970, the following are examples of emergencies which local school districts would face:

A. Under NDEA Title V-A, one counselor out of ten is paid from Title V-A funds. These salaries would no longer be available.

B. Under ESEA Title II, particularly in large urban areas, school districts have received administrative funds from State departments to provide staff and services for the complex administrative tasks involved in the purchase and loan of materials to public and private school pupils and teachers. This staff would be required to liquidate approved projects and dispose of materials during the ensuing fiscal year.

In the face of increasing costs, increasing enrollments, and demands for higher salaries, it is proposed that we decrease our efforts under Title III of the Act. The previous Administration asked that it be funded at 30% of the authorization, the present Administration reducing it still further so that it would be funded at the 20% level. If this Administration's request is approved—we would have a level of appropriations that is 30% less than the appropriation last year. I should point out that next year for the first time the program will be an entirely State administered program, a change which we mandated by the 1967 Elementary and Secondary Education Amendments.

As was the case last year, only \$29.7 million is being requested for state departments of education. This is in contrast with an \$80 million authorization.

SPECIAL EDUCATION

Mr. Chairman, there are just under 6,000,000 handicapped children in the school population. Only 35%—that is 2.1 million—are receiving appropriate special education services. The remaining 3.8 million handicapped young boys and girls are not.

The full funding of programs we have authorized, all of the programs in the education for the improvement of the handicapped budget item, would amount to only a little more than \$300,000,000. If we were to fully fund these programs with 6,000,000 handicapped children, we would be talking about \$50 per child. It is hard for me to believe that \$50 per child, as compared with \$14 per child we are currently spending, is too much to expect us to pay for helping handicapped children. This is particularly so when we know of the extreme costs for the institu-

tionalization of these children, or for keeping them on welfare.

Even later vocational rehabilitation services are more costly. We are providing the states, through the Vocational Rehabilitation Program, about \$400,000,000 a year to work with handicapped adults, but only \$29.25 million dollars to work with children in the schools, at a time when rehabilitation is more likely to occur.

Don't mistake my purpose—the vocational rehabilitation money is well spent—it is a profitable investment. But what logic is there in waiting for the child to be fullgrown for the Federal Government to respond to his handicap in a meaningful fashion?

Let us ask ourselves what might be possible if the \$206,000,000 authorization of Part A of Title VI were appropriated.

There are 1.5 million mentally retarded children in the school population. Of these, only 700,000, or 46%, are receiving special education services. The remaining 800,000 are either at home or sitting in regular education classes without particular attention or response to their condition of retardation. If Title VI were fully funded, 425,000 more retarded children could be receiving services and we could cut in half the number of unserved children.

The average cost of educating a retarded child in a state residential school is almost \$3,000 per child—more than seven times as great as if the child were educated in a public school.

Each day that we delay in developing pre-school programs and special education programs in the public school makes it more likely that a retarded child ultimately becomes a ward of a state and will have to be institutionalized at a tremendously increased cost to the taxpayer.

In the 1967-68 school year, approximately 224,000 deaf and hard of hearing children do not receive needed service in the public school. If Part A of Title VI were fully funded, an additional 148,000 deaf children would be provided service. Again, we should know that the education of the deaf child in a state residential school is three times as much as the expenditure necessary in the public day school. Thus the lack of sufficient programs in our public schools will cause taxpayers to spend three dollars for every one, if we are to educate these children in state residential schools.

There are approximately 1,100,000 children with speech handicaps who are not now receiving services in the public schools. The cost for serving these children is modest, approximately \$100 dollars per child for the year because speech therapists supplement the regular teaching situation rather than having full-time responsibility for each child. If Title VI were fully funded, every child with a speech problem in the United States could be receiving supplementary services that would allow him to participate more fully in the regular school program.

NATIONAL DEFENSE EDUCATION ACT

Programs carried on under the National Defense Education Act under the most recent budget submissions will be funded at the 26.7% level.

No request is made for the programs of grants to acquire equipment carried on under Parts A and B of Title III of the Act. Based on my review of the responses to our Committee questionnaire, I am convinced of two things with respect to this program—(1) Title III has been one of the most effective Federal aids for local school systems. Time and time again it was cited in our superintendent's survey as a model federal program—one which through the years has made a substantial contribution in the national effort to expand and improve educational opportunities; and

(2) The need for assistance to acquire instructional equipment continues and is today cited frequently as one of the most

pressing needs in the educational community. In responding to our question which asked "What are your greatest needs?", over a thousand superintendents identified instructional equipment and supplies.

As with the facilities program, a failure to purchase equipment now or to construct facilities now will in the long run prove to be the most expensive alternative because of inflationary trends. This is to say nothing of the impact reductions will have on the quality of educational offerings next year in individual school systems across the country.

The recommendation that we not fund the Title V program of guidance and counseling must be viewed in a similar vein. To not fund this program will be disastrous. One counselor out of every ten is paid from Title V funds. Over 4,000 school counselors will be affected by the action we take with respect to the funding of Title V, not to mention the many hundreds of thousands of students who would be adversely affected if we do not provide money for these necessary services.

Turning to Title IV of the NDEA and the college teacher fellowship program, we again must contend with an appropriation request which is below—\$8,500,000 below, or 12% below—the level of funding last year. During the current year, 15,270 fellows are being supported. Under the pending appropriation request, only 10,900—that is 4,200 less—will receive support next year. And in order to support even this small number—stipends and education allowances must be held at current levels—totally unrealistic levels, both in terms of the increased cost of living fellowship holders must contend with and the increased cost of education which universities must face. These trends in and of themselves suggest a greater appropriation than that which is being requested. When viewed with the projections which indicated that to meet the staffing needs which will be required in 1974 to serve college enrollments of 8.7 million students, it seems to me that we have no alternative but to increase the appropriation. Information brought to my attention indicates that to meet the enrollment increase by 1974, over 600,000 new fulltime professional staff members will be needed on college and university campuses. Projections also indicate, however, that only slightly over 300,000 doctorates will be produced by that time and that half, or perhaps less than half of these, will go into college teaching.

STUDENT ASSISTANCE

Mr. Chairman, under the budget submissions, funds for three major institutionally based Federal student aid programs in the coming 1969-70 academic year amount to only 67% of the approved requests from colleges and universities. During the current academic year, available funds met 80% of approved requests, and for the preceding year, met 85%.

An estimated total \$461 million will be available in the coming academic year for the three programs—the National Defense Student Loan (NDSL), College Work-Study (CWS), and Educational Opportunity Grants (EOG) programs. This compares with \$682 million in approved requests from higher education institutions. Colleges and universities originally asked for \$814 million.

I have already mentioned Title II of NDEA and the unbelievable suggestion that only \$155 million be appropriated for a program which was supported at a level last year of \$190 million—and that did not meet the need. The estimated funds for the NDSL program will provide loans for about 398,000 students compared with 442,000 in the current academic year. I understand it is the feeling of some that the Guaranteed Student Loan Program will be available for those students who are unable to obtain NDSL loans because of the decreased appropriation. I wish this were the case, Mr. Chairman. However, increasing interest rates will, I am

afraid, curtail the effectiveness of the Guaranteed Student Loan Program.

We are just now beginning to get back information on the borrowing pattern for the next academic year. Sufficient evidence has not been obtained as yet to justify the revision of the basic Act, but in all candor, I must say to you, that I am not optimistic, and that I am convinced we will be doing a real injustice if we do not, at a bare minimum, fund the NDEA Student Loan Program at the \$190 million level.

Let me share with you a letter I received recently from the President of one of the colleges in my Congressional District. It will illustrate dramatically the severe impact inadequately funded student assistance programs have on some of our institutions and the necessity for full funding of all student aid programs.

President Hayes, of Alice Lloyd College, wrote:

"There may be some colleges in America, without commitment to needy students, that can absorb the major cuts in federal student aids of the past 2 years without disastrous results. These would be institutions with a small percentage of students requiring these aids.

"But for Alice Lloyd College and other colleges of Appalachia, these cuts are ruinous. Alice Lloyd College cannot sustain an Educational Opportunity Grants allocation for fiscal 1970 which is only 42% of its fiscal 1968 application. Our commitments to needy students are to great.

"For many years, Alice Lloyd College has had to produce \$90 from developed sources, private and public, for each \$10 that students can pay. Average family income is \$3,100 for our total enrollments. Many have large families. Inadequate financial assistance can be found at best for this large percentage of financially needy students. Over the past three years Alice Lloyd College has enrolled 92 of Kentucky's 700 Higher Education Project students from welfare families. ALC's Upward Bound graduates will number 70 in the college program by Fall 1969. Educational costs have sky-rocketed for the quality teaching program that is provided. . . .

"There is something wrong in the priorities of our nation's administration when the great provisions of education opportunity are undercut and ruined as they are when fiscal 1970 allocations are cut back below the level of Alice Lloyd College survival. . . ."

Turning to the Educational Opportunity Grant Program, I cannot come before you today without registering my deep concern about the appropriation for this program in FY 1969. Two simple figures will illustrate the basis of my concern. With the FY 1968 appropriation, funds were available to make 144,600 initial year EOG Grants. The reduced appropriation in FY 1969 has the potential of reducing the new student input in one year from the 144,000 level to 31,700. I am pleased to see that both the former Administration and the present Administration have proposed to substantially increase the level of funding for the EOG Program. But at the same time, let me say that even with an appropriation of \$175 million, there will be less available for initial year EOG Grants than was available under the FY 1968 appropriation and that the request is still substantially below, by approximately \$35 million, the FY 1970 authorization for initial year grants.

VOCATIONAL EDUCATION

Mr. Chairman, may I share with you some of the statistics from the most recent Manpower Report of the President that relates to the employment of young adults:

The unemployment rates for teenagers have remained at an unsatisfactory high level throughout the current period of sustained economic growth.

The unemployment rate for teenagers in 1968 was still in excess of 12% as compared with the overall unemployment rate of less than 4%.

In 1968, an average of 1.4 million 16-24 year olds were unemployed, including almost 850,000 teenagers.

While the unemployment rate for Negro workers has decreased markedly, Negro teenagers failed to share in this improvement. Their unemployment rate remains disturbingly high—about 25%.

We must, and we can, end this severe waste of manpower and remove this source of actual and potential social unrest.

Last year, by unanimous vote, and I repeat unanimously, we expanded and improved Federal programs which support vocational education. We authorized a greatly improved vocational education program for 1970 which totals \$822,650,000—yet we are urged this year to provide only \$277 million pursuant to that authorization.

Mr. Chairman, if we are really concerned about social unrest, if we are really concerned about the problems of the cities, if we are really concerned about documented manpower shortages of qualified personnel—it seems to me that we must make more than the token effort in vocational education suggested by the appropriation request.

There is a great deal of talk about mini centers and residential training centers, yet—

There is no appropriation request for Part E of the Vocational Education Act which provides support for residential vocational schools.

There is no request to fund the special vocational program for disadvantaged young men and women.

Only 22% of what is authorized is being requested for development of exemplary vocational programs which could serve as models for occupational education courses.

And, less than 50% of what is authorized for the basic vocational education program is being requested.

EDUCATION PROFESSIONS DEVELOPMENT ACT

A February release of the U.S. Office of Education reads: "The Nation's most critical education problem is the recruitment, preparation, retraining and retention of quality personnel to staff its schools and colleges. This is the chief finding of the first federal assessment of education manpower needs."

In response to this finding, we are urged to fund the Education Professions Development Act at 25% of what is authorized.

Though there is a \$5,000,000 authorization for programs to attract and encourage qualified individuals to the field of education, we are advised by one Administration not to implement the program and by the other to fund it at 10% of what is authorized.

Though we need preservice and inservice training programs for well over 100,000 persons, we are urged to fund that program at a level which will only provide training for slightly over 35,000 educational personnel.

Though we are in desperate need of additional college teachers and administrative personnel because of the rapidly growing numbers of junior colleges and ever increasing college enrollments, we are urged to fund institutes and training programs for higher education personnel at only 27% of what is authorized.

HIGHER EDUCATION FACILITIES ACT

Mr. Chairman, the shortage of adequate academic facilities continues to be a major problem confronting colleges and universities.

According to studies of the U.S. Office of Education, institutions face a facilities gap of 135.9 million square feet at the beginning of this Fall's academic semester. In terms of student space, it is expected that the short-

age will be 23 gross square feet per fulltime student.

Even with an appropriation at the meager level suggested by the previous Administration, there will exist in 1973-74, a total shortage of academic space of 106,075,000 square feet.

An appropriation at the level suggested by the present Administration—an amount which is substantially below the request of the former Administration—will result in still a greater shortage of needed space.

Mr. Chairman, we cannot afford to fund a facilities program at 4% of what is authorized as is suggested by the present Administration, or at 11% of what is authorized, as suggested by the former Administration.

The 1968 Higher Education Amendments contain a number of provisions making improvements in the Facilities Act, one of which provides for a maximum federal share of up to 50% on Title I and Title II Facilities Grants, as contrasted to the previous ceiling of 33 1/3%.

The increase in the ceiling on the federal share was based on the unanimous view of higher education representatives that such an increase was necessary.

I hope that you will take this recent improvement in the law into consideration in providing an appropriation for the Facilities Act, as the higher Federal share may result in a reduction in the number of colleges to be assisted if the appropriation is not adequate.

HIGHER EDUCATION ACT

During the last Congress, by a vote of 389 to 15, the House passed the Higher Education Amendments of 1968, as a result of which we proposed significant refinements and additions to the basic Act of 1965. With the Congressional intent so overwhelmingly stated, it is impossible for me to reconcile the budget submissions with the authorizations we established.

For Public Service Education we authorized \$5 million—the former administration requests \$3 million—the present Administration requests that the program not be funded.

For grants to improve graduate education we authorized \$5 million, the former Administration requests \$750,000—the present Administration requests that the program not be funded.

For Law School Clinical Experience Programs, we authorized \$7.5 million—both Administrations request that the program not be funded.

For Networks for Knowledge we authorized \$4 million—the former Administration requests \$750,000—the present Administration requests that the program not be funded.

For Cooperative Education we authorized \$8,750,000—the former Administration requests \$1 million—the present Administration requests that the program not be funded.

When one views the request for programs established in 1965 the picture is just as distressing.

\$70 million is authorized for the College Equipment Program, yet both Administrations request that the program not be funded.

It is proposed that we fund the program to strengthen developing colleges at only 50% of its authorization and that we fund the program of grants to assist college libraries at 16% of its authorization.

REGIONAL EDUCATIONAL LABORATORIES

Mr. Chairman, I view with great alarm the recent Office of Education announcement that five regional educational laboratories established and supported under Title IV of the Elementary and Secondary Education Act will be closed. It is my understanding that this decision was based on budgetary considerations. The labs to be closed are: Central Atlantic Regional Educational Lab-

oratory, Washington, D.C.; Cooperative Education Research Laboratory, Northfield, Illinois; Michigan-Ohio Regional Educational Laboratory, Detroit, Michigan; Rocky Mountain Educational Laboratory, Greeley, Colorado; South Central Regional Educational Laboratory, Little Rock, Arkansas.

At a time when research and development work in education is more necessary than ever before, we are urged to terminate facilities and resources which the Congress just four years ago established. In so doing, we will literally be throwing away the more than eight million dollars which has been invested in these five labs.

I understand that the pending budget submissions provide for a small increase over the FY 1969 appropriation for educational laboratories. The level suggested is not sufficient, however, to continue support of the five labs I have mentioned. This Congress made a firm commitment four years ago, and it is incumbent upon us to fulfill our obligation.

CONCLUSION

Mr. Chairman, it is obvious from my remarks that I am convinced we must make a much greater effort with respect to the financing of Federal education programs. Even if we were to fully fund all education programs, I feel that we would be making a minimal effort when viewed against the well-documented needs. I am also convinced that the Congress will support recommendations from this Subcommittee which provide funds over and above the amounts requested. The basis for this feeling is the overwhelming votes of the Congress in the last few years in establishing and expanding Federal aid to education programs.

I have said already that the Vocational Education Act of 1968, providing authorizations for vocational programs next year of over \$800 million, passed without a dissenting vote.

The Higher Education Amendments of 1968 were approved in the House by a vote of 389 to 15.

Just a few weeks ago the Elementary and Secondary Education Act was extended in the House by a vote of 400 to 17.

These are indications, I feel, that the Congress is willing at this time to have the Federal Government play a substantial role in financing American education. A commitment has been made, and I am sure that Congress will fully support an appropriation which will give life to the commitment rather than make it a token or virtually empty commitment which the budget submissions represent.

FORTAS OFTEN STOOD LONELY FOR RIGHT

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. ANDERSON of California. Mr. Speaker, I would like to call to the attention of my colleagues a recent column by Drew Pearson on Abe Fortas. With so much emotionalism and sensationalism surrounding Mr. Fortas recently, I think Drew Pearson should be commended for speaking out in a dispassionate, objective way on this case. He clearly puts the issue in its true perspective.

Without condoning or pardoning Mr. Fortas for his actions, I believe he has made a great record during his career which somehow seems to have been forgotten. Drew Pearson's column in the May 17, 1969 issue of the Washington

Post reminds us of Mr. Fortas' outstanding record of defending the underdog and the unpopular cause. This is truly a mark of a dedicated and compassionate lawyer.

Finally, Mr. Speaker, this column points out the hypocrisy of others in Government or public service who may also have committed indiscretions or improprieties; too often they are the first to leap upon the other fellow when he is down. This is one of the reasons why our young people are so upset at the "system" or "establishment" because of this double standard; it is all right for the legislative branch or the executive branch but not the judicial branch. This is hypocrisy at its worst.

This is one reason why I favor a full disclosure of all sources of income for all public officials. Senator TYDINGS, for example, has recently proposed a bill which would require financial disclosure by all Federal judges. I believe this is a good bill, but should be extended to include all Federal officials.

Mr. Speaker, I insert this column in the RECORD today not because Mr. Fortas was right, because I do not think he was, but only to present the other side of this distinguished man's career, one that the public has not been told by the press or the politicians:

[From the Washington Post, May 17, 1969]

FORTAS OFTEN STOOD LONELY FOR RIGHT

(By Drew Pearson)

When a man is down, everyone rushes in to kick him. It is the popular and cowardly thing to do.

So, in the case of Justice Abe Fortas, there has been a bandwagon rush of vituperation, some of it by members of Congress who have taken fees from questionable sources and by an Attorney General who still has not given a clear explanation of why he blessed the dismissal of the El Paso Natural Gas case after the Nixon law firm, of which he and the President were senior partners, received \$771,129.83 from El Paso, a long-time client.

When a man's down, he's down. But I for one do not intend to be part of the Fortas-kicking brigade.

For a man's life should be judged not by one act alone. And mistaken as Fortas was in temporarily taking a fee from Lou Wolfson, I recall some other instances when Abe stood up to be counted at a time when few others stood with him.

There was the case of Dorothy Bailey, the lowly civil service worker in the Department of Commerce who was attacked by the Senator from Wisconsin, Joe McCarthy, as a Communist and was not given a chance to face her accusers. It was not a popular case. No one had ever heard of Dorothy Bailey. No one cared very much about her. But an important issue was involved—namely, the right to face those who accuse you.

And Abe Fortas, with his partners, engaged in a long, expensive, time-consuming battle to defend this obscure civil servant. They took no fee and paid for all expenses out of their pockets. In the end, they won.

It was a vitally important landmark case involving the rights of all Americans. But those who now rush in to kick the prostrate figure of Abe Fortas did not lift a finger to help in those days. In fact, the present President of the United States was one of the enthusiastic applauders of the late Senator from Wisconsin and even went to his defense when the Eisenhower Administration promoted the Army McCarthy investigation and when the Senate moved toward censure.

There was another instance when Abe Fortas stood up to be counted, when Dr.

Owen Lattimore, a Johns Hopkins professor, was singled out by Joe McCarthy as a Communist. Lattimore was an expert on Mongolian and Chinese relations, had been a history teacher of oriental affairs. However, McCarthy, in his desperate determination to find someone connected with the State Department who was a Communist, jumped on Lattimore as hard as the critics are jumping on Fortas today.

Once again Fortas and his law firm defended a man unjustly accused, did it with their own money, their own time, and won. It took five years to fight the Lattimore battle. He had been indicted for allegedly perjuring himself about using Laughlin Currie's office ten years before. No other law firm in Washington had the guts to stand up and defend Owen Lattimore against the savagery of the all-powerful Joe McCarthy at that time.

There have been other contributions to mankind in Abe Fortas's life. He did not rise to fame and eminence overnight. There were many years of unnoticed drudgery in the Interior Department under Harold Ickes, defending Indians, reclaiming Western land, developing parks, constructing some of the great power projects of the Nation.

All this cannot be washed down the drain of man's fickle memory overnight, thanks to one ill-considered fee.

True, Abe lived high on the hog. In his latter years, he bought a big house on R Street from Betsy Burden and had to meet payments on a sizable mortgage. He redecorated the house and built a swimming pool—all of which cost money. And he got involved in a real estate deal which went sour. Interest rates escalated. He had a hard time meeting payments.

This is no excuse. I offer it as no alibi. But the score should be balanced. The past should not be forgotten.

Justice Fortas has not appeared on television and told of his little dog and his wife's cloth coat and the drain on his finances, as did another public figure to explain why he took—and kept—\$18,000, which was highly unethical and probably illegal.

Nor did Fortas let his brother secure a \$205,000 loan from a defense contractor, as in the case of Don Nixon—a loan, incidentally, which Howard Hughes has now wiped off as a bad debt.

Nor did Fortas operate a famous farm at Gettysburg where three oil men paid the salaries of the farm hands, the farm manager, the cost of feeding the prize Black Angus, all to the tune of around \$2000 a month.

Fortas was wrong. But in tabulating the score of life and politics it should be noted that he did some great things for humanity and that others who are now throwing stones have been wrong on occasion.

PARENTS VISIT WOUNDED GI SON IN JAPAN

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. HAMILTON. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

[From the Cincinnati (Ohio) Post-Times Star, Apr. 30, 1969]

LOCAL PARENTS VISIT WOUNDED GI SON IN JAPAN

Mr. and Mrs. Clarence Zugelter of 901 Ohio Pike, Withamsville, know what a military casualty is. They visited their wounded son, Sp. 4C Eugene Zugelter, 21, at an Army hospital at Kishine, Japan.

A jeep in which Gene was riding hit a land mine in Vietnam March 26. Through the Red Cross, Mr. and Mrs. Zugelter obtained permission to visit their son in the hospital. They flew to Japan Easter Sunday.

In a letter to her brother, Jack Whitehead, operator of the Window Garden Tea Room, 3077 Harrison avenue, Mrs. Zugelter describes what she found at the hospital:

"There are 12 beds in his room all amputees. It is unbelievable. All the men in this ward are ones who have been hit by mines or booby traps.

"In fact, all four floors of this building are such cases.

"Next to Gene—two legs, one eye gone; next bed, two legs, one arm, hearing gone; next bed, two legs and one huge gaping stomach. Next bed—one leg, one whole buttocks and so on and on.

"All day long the trucks and helicopters keep bringing in the wounded and take out the one who can be moved. As I write this, not two feet from me lie a row of stretchers—one after the other, being checked in.

"Average age—19-23. Average talk—the horrors of what they've been through. It is truly a living hell."

Mrs. Zugelter described Gene's wounds, writing, "He is going to live and looking at him, I feel that is a real miracle. He will be paralyzed in the right leg. How he even has a right leg is a miracle.

"There is not much left that has not been shot away.

"The bottom part is in a cast with a steel pin through the leg. This leg will necessitate many skin grafts, but the doctors feel it can be done."

Mrs. Zugelter describes other body wounds, including a jaw fracture:

"His jaws are wired with steel—then bamboo over that. But he talks through a tube in his throat.

"His face, thank God, has only fragment cuts, with only one that will require skin graft. His whole right arm is fragmented and broken with a steel rod running through. It is very bad, but they hope to save that.

"Most of the tips of his fingers are gone, but they talk about skin grafts there. His concussion is healing well, and most of the time he talks sensibly."

Mrs. Zugelter says the doctor had hoped to move Gene soon, but since the letter was written, Whitehead telephoned his sister and learned Gene had developed pneumonia.

Mr. and Mrs. Zugelter, who have been helping at the hospital since they arrived will accompany their son, probably to Walter Reed Medical Center, Washington.

"He is, of course, immobile and they have him in one of those 'circle electric' beds.

"He cannot be lifted or moved, but three times a day they clamp a board over his face and body, then turn the motor on and the entire bed goes upside down, leaving Gene on his face and stomach while they dress his back and change his bed.

"His suffering is terrible, but he is a wonderful patient, doing everything he is told. 'Just pray for him and all these boys.'"

Whitehead says Mr. and Mrs. Zugelter had no difficulties arranging the trip to Japan to see their son. The only requirement was that they pay their own way.

Gene had been in Vietnam since December. He has been in the Army more than a year.

fice of Economic Opportunity, testified before the ad hoc task force on poverty of the Education and Labor Committee today. His testimony is outstanding. During the last Congress, I did not support the Green amendment; however, I strongly supported one part of it. In fact, since its inception, I have believed that the Office of Economic Opportunity should have administered community action through State economic opportunity offices. While the Green amendment may have permitted the Office of Economic Opportunity to find sufficient loopholes to deny the State the right to be a community action agency, I believe it was clearly the intention of Congress to permit any State that desired to be a community action agency. It was clearly in violation of this that certain States were denied that opportunity. The State of Arizona was one of these. I commend for the reading of my colleagues, Mr. Marin's explanation of the problems together with his recommendations:

TESTIMONY PRESENTED BY EUGENE A. MARIN, STATE DIRECTOR, ARIZONA OFFICE OF ECONOMIC OPPORTUNITY, CONGRESSIONAL HEARINGS, AD HOC TASK FORCE ON POVERTY, COMMITTEE ON EDUCATION AND LABOR, RAYBURN HOUSE OFFICE BUILDING, WASHINGTON, D.C., MONDAY, MAY 19, 1969

OEO was born when the cry of many voices, from urban and rural areas throughout the Country, became the goad which reached the conscience of America. It had long since been clear that where the term "land of contrast" could well depict a country like Mexico or India, sociologically and economically, that phrase does not fit the scheme of our system as we understand it from reading the great documents of our Republic, mainly the Declaration of Independence, the Constitution and its appended Bill of Rights. The cry was an insistence that we read again the intent of the 13th, 14th, 15th and 19th Amendments and come to terms with ourselves and the fact that the United States is made entirely of colored people: Red, Brown, White, Black, Yellow, and all the tones and shades in between.

OEO was born and on paper it is great. Few can quarrel with its intent or objectives. But in the reality and practicality of its implementation, there are countless examples which can easily make one forget Miguel Cervantes and Don Quixote. In my two and one-half years experience with OEO I have gathered enough material to write a commentary that, I think, would easily become a best seller. OEO, in those aspects which can be termed negative by anyone's system of evaluation, has all the trappings of a three ring circus. This makes it the tragedy-comedy of our time.

No one of average intelligence will dispute the need to train or re-train people whose former jobs have been rendered obsolete by modern technology. That was the purpose of the Manpower Development Training Act and the Migrant Opportunity Programs. Therefore, no one can strongly make an argument against Adult Basic Education. The adults in this group are the children who couldn't even start twenty-five or more years ago and who our educational system denied, or completely missed, in the intervening years. Now we are attempting to give them a lift, near the end of the road, after they have, for all practical purposes, lost the race. Yet, even though this start is late for them, hopefully we can make literates of this group and prepare them for something other than an out-right dole from welfare assistance programs.

Head Start, likewise, is no more than a common sense educational effort which our professorial brain trust could have suggested and implemented generations ago. Even so,

for all that is being done in this regard today, it is but a pittance when compared to the actual existing needs.

In the same instance we can think of the Upward Bound Programs, Tutorial Programs, NYC and Job Corps. These are the best examples, besides the already mentioned Adult Basic Education, which point up the failures of our educational system. The need of an OEO is evident, therefore, as an effort to attempt to repair the damage which has obviously been incurred and which continues on to this very day.

(I digress momentarily to remind you that within the last 12 months there came forth another great cry from our society asking that Congress look into the automotive industry on the question: Why does it take \$20 to \$25 billion a year to repair the cars we buy? The Congress diligently made its investigation. I suggest that that \$20 billion cost figure is but an insignificant sum when compared to the total damage done to those millions of individuals who are short-changed for life in their educational and corresponding economic opportunity, if that damage could be accurately assessed.

At this juncture, also, I wish to say that I am an American of Mexican descent, and underscore that I am not one who is concerned with the plight of my people in the Southwest because it is currently in vogue to appear concerned, as if it were a fad of the time. I am a student of their problems and have been an active participant in a variety of programs to help them since many years before the Economic Opportunity Act was a reality in our Congress or in the Executive Office of the President. I know, too, the problems faced by other minority groups, especially our Negro and Indian populations. Therefore, nothing which I say here (and intend as constructive criticism of OEO) must be construed as disparaging to the needs of the needy. On the contrary, I shall criticize precisely for the purpose of hoping to make available to all disadvantaged groups better and more effective services.)

It has been my purpose, thus far, to indicate the need of an OEO type effort as I see it. Now let us go to the *whys* of OEO's relative lack of success, and to the errors which this administration hopes to correct.

I shall start by paraphrasing some of the remarks made by Governor Jack Williams when he introduced me as the State Director of the Arizona Office of Economic Opportunity.

He said, "The United States is involved in the greatest human experiment which this nation has ever attempted. It is an experiment intended to help solve some of the many problems which plague our urban and rural areas—problems which increase and multiply from the effects of poverty."

"The Economic Opportunity Act is the mechanism created by our Congress to help alleviate the plight of this group, which unfortunately makes up a significant portion of our population."

"The obligation to help in this effort is as much the duty of the indigent as it is for us, the more fortunate, to help them raise themselves out of their situation."

"Twenty or twenty-five years from now society will look back on history to assess or evaluate the success or failure of the opportunity which has been given to us to help."

"The burden, then, is on us today. The responsibility rests with the elected officials, the professional poverty warriors, including the staffs and the Community Action Agency Boards. We must accept this responsibility and put every available resource to work on this very real 'War on Poverty'. We must coordinate every training facility, every related governmental agency, and the private sector because it is our war and not an indefinite 'their war.'"

I doubt that at that time (February 1967) Governor Williams was fully acquainted with the phrase "maximum feasible participa-

STATE OEO AGENCIES MUST BE GIVEN AUTHORITY

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. QUIE. Mr. Speaker, Mr. Eugene A. Marin, State director of the Arizona Of-

tion". Yet he had fairly well described its concept in those introductory remarks. I know that he did not realize that the title "State Director of the Office of Economic Opportunity" was a complete misnomer. I am also sure that, being a newly elected governor, and at that time having only a cursory knowledge of the provisions of the Economic Opportunity Act, for example, that our function was mainly to approve, veto, and coordinate programs and to provide technical assistance to the local CAAs, he thought that some powers went along with those responsibilities.

The high hopes and enthusiasm which Governor Williams showed were soon to be dashed, and our bewilderment has not ceased to grow as we repeatedly ask ourselves, can this truly be the intent of Congress?

"Confusion" does not adequately describe the problems of OEO. "Few know what is going on" may be an overstatement. We see what is going on, but I can confess to you publicly that we cannot really know all that is happening to your programs, even at the state level.

We are ready to admit that either the State be given the power to be fully involved in this effort or it should be completely removed from the War on Poverty. Our experience tells us that our participation as a state government is almost a total waste of time and tax dollars and that the Governors' powers of approval are little more than wasted words in the federal law.

The truth of this single observation destroys the whole intent of the "maximum feasible participation" theory and begins the sham and the tragedy to which I alluded above.

(1) When the Congress authorized its first OEO appropriation, effective at the beginning of 1965, do-gooders and self-proclaimed leaders immediately, if not prematurely, swarmed the land like harbingers of the Lord proclaiming that there was money for one and all. The Congress, they said, has appropriated money to start a (War on Poverty!) and by next year all poor people would be trained, working and out of the welfare rolls! All you have to do is form a non-profit corporation and "you're in". Thousands of non-profit corporations sprang up all over the country.

(2) If you were already a non-profit corporation, they said, you've got it made! All you have to do is write a proposal and apply for some of that money. You can train people to change from menial to skilled trades almost over night; change illiterates to read almost over night; migrant field workers, to become skilled craftsmen almost over night; etc., etc., *ad infinitum*.

(3) OEO is like "manna from heaven" the people were told. The sophisticated and the unsophisticated now become equals. The professional administrator became a CAA Director and the untrained also became a CAA Director. The former asked for five million and the latter asked for six million, just to catch up. One was an expert in all the facets of business management, the other may have never had the opportunity to know what a bank account or a check book looked like. Yet, the EOA now afforded almost anybody an opportunity to handle millions of tax dollars.

(4) VISTA, Job Corps, NYC, Mainstream, Project FIND, TLC (Tender Loving Care), CEP, SER, OIC, Operation Green Thumb, MOP, Self-help Housing, Legal Aid, Head Start, Adult Basic Education, Grass Roots . . . Conduct and Administration, Demonstration Projects, Summer Youth Programs, etc., etc., etc. These became the new jargon of the land among the disadvantaged. Relatively few knew what a program was, but all talked the lingo like experts with expertise. \$75,000 for this component and only \$875,000 for that one; \$195,000 for this one and only \$2.5 million for that one. Today one hears thousands

and millions slung back and forth like we used to think of quarters and six-bits in my time. The sophisticated CAP Director and the unsophisticated CAP Director became alike over night with this new jargonese and deftness in grantsmanship.

It is not unfair to say that many CAP Boards and Directors, who for the first time would deal in problems of administration, personnel management, evaluations, audits, research and planning, public affairs, and the gamut of important incidentals such as human relations, public relations, and social and political pressures, simply were not equipped with the wherewithal to do the job. And with all due respects to the sincerity of most poverty workers, the wonder is not in the chaotic results that evaluations and audits have uncovered, but that all of OEO has not turned out to be a total and absolute failure. Thanks to those programs whose success can be traced to truly responsible leadership.

"There is money for all", but today's riots, demonstrations, pickets, and boycotts do not indicate that we have resolved the problem or are reaching the target group too successfully.

The EOA provided for no tooling-up period or even for a look-before-you-jump period. It only provided for a crash program which said "let's get it done even if nobody fully understands what it is they want done".

It is our opinion that confusion will continue to reign in OEO programs until the State is recognized as a full partner in this effort. The Congress must impose whatever guidelines and requirements it deems necessary for the effective operation of federal programs at the local level, but it must take into consideration the four years experience which thus far have proved that neither national OEO nor the regional offices can adequately monitor or oversee the operation at the local level before costly mistakes are committed. Only the States, following the necessary revised national guidelines, are close enough to the problems of their people, to be able to more equitably distribute the funds where they are most needed.

Furthermore, we feel that Advisory Boards and Coordinating Committees now established for OEO purposes, are largely an ineffective effort, if there is no compelling legislation or provisions to force cooperation, communication and coordination by related agencies. The nature of our bureaucracy almost preempts this ideal. Therefore, we suggest that the State be made the arm to function in behalf of National OEO to assure real linkages between programs that dovetail into local, county, state, and federal agencies.

The theory of "maximum feasible participation" breaks down when the Congress and national OEO apparently overlook the fact that the funds coming to our individual states originally came from there in the form of taxes. So it is not logical when one hears the rationalization that state governors, especially Republican governors, will destroy the programs. Nonsense! Governors of whatever political suasion only want to see a reasonable return for every tax dollar spent especially when they have asked for more matching tax funds from their state legislatures. Perhaps a requirement along these lines should be carefully studied and made a part of the federal law.

It is not outside the realm of possibility that a governor, here and there, might not be in full sympathy with the spirit and intent of OEO legislation. You already have the necessary provisions in the law to adequately take care of such cases.

(Parenthetically, I might add, it is difficult for a state office to coordinate and solicit the cooperation of other state agencies when it is so evident that one is merely asking them to join us in our trouble. It is an old adage that "misery loves company" and state agencies understandably stand-off when they

know that our Governors do not have the power through OEO to veto even an illegal grant and make it stick. Thus, the education departments, employment services, health and welfare agencies and other related social agencies are willing to give little more than moral support, if they can even give that.)

Moreover, the current argument that some cities want to by-pass the State for political reasons is interesting. No city should forget that it is created by the authority of that State. Yet, as it is with the local CAAs which are non-profit corporations, the farther they are from the direct supervision and accountability which should be provided simply as a matter of good business practices, the freer they feel when such controls are so remote. It is true that, with a stronger political voice, cities have established a pattern of out-doing their rural counterparts. Therefore, the "holier than thou" attitude taken by some may be but too obvious a rationalization inspired by some advocates of a modern version of the Golden Rule: "Do unto others before they do unto you."

This is best illustrated by the treatment received by the EOA Amendments of 1967 and particularly the famous Green Amendment made infamous by the local CAPs, the OEO Regional Offices and National OEO itself through its Task Force which interpreted the changes. If in the judgment of the Congress, the approval of a grant which obviously violates both the federal and a state's law, is in keeping with the intent of Congress, then it has made permissible government of men instead of laws. We doubt that there is a case in any other state which more clearly points this out.

I have with me a sheaf of materials which prove that OEO, and the Congress by inference, have contributed to highly questionable, if not extra-legal, procedures in the matter of funding grants. Perhaps the real purpose was to prove that a governor's veto was worthless, or that the laws of a State are not to be respected by OEO employees at any level—federal, state, or local. Whatever the reason, however, it is clear that who ever was ultimately responsible, is also responsible thereby, for changing the concept of "maximum feasible participation" to "maximum feasible confusion" as was so aptly said by Professor Moynihan.

Thus the missing link to OEO's success is clear to us. Do whatever you must to remove the politics from OEO, which appears to be the main hang-up. But be assured that the results will not be more rewarding in the next four years unless authority is given to the State governments and other state governmental agencies to participate as full allies in behalf of their indigent constituencies.

COLLEGE AUTHORITIES HAVE DEFAULTED

HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. FISHER. Mr. Speaker, the long series of college disruptions on scores of campuses throughout the country have shocked the American people beyond description. It is simply incredible, in this civilized and enlightened Nation, that a minority of extremists who have infiltrated our schools have been permitted, with hardly a rap on the knuckles, to wreck campus buildings, imprison school officials, steal official files, disrupt classes, and engage in riots and anarchy.

People are asking: If these dissidents are not willing to conform with the rules of the schools and the laws of the land, why should their presence be tolerated?

Either through cowardice, timidity, or ignorance of elementary techniques which must be employed to maintain discipline, school officials have allowed these hooligans to run rampant, spewing defiance, engaging in blackmail, and hampering the efforts of others to gain a college education. The excuse often advanced by responsible authorities that the right of dissent must be protected is, of course, nothing short of unadulterated hokum.

Those few schools which have not tolerated have had little difficulty in maintaining discipline.

How do they do this? It is very simple. They dismiss or expel the culprits. They maintain law and order. They make appropriate use of the injunctive power of the courts. They call the police and have the hooligans taken to jail where they belong. They know, as all police know in dealing effectively with the criminal element, that pampering and coddling simply does not work.

Mr. Speaker, under leave to extend my remarks I include an article written by Max Lerner, which appeared in the April 23 issue of the New York Post. It reveals a remarkably clear insight into this problem.

The article follows:

RANSOMING THE COLLEGES
(By Max Lerner)

What happened at Cornell was the ghastliest of a series of ghastly recent incidents on American campuses. Students taking over a university guest building, driving out a number of parents who were in it; the same students with shotguns standing guard over the building, reinforced by a car full of weapons; two college officials compelled to sign a seven-point agreement, sitting on the steps of the building as the students stand over them. Whether this happens with black or white students—at Cornell it was blacks—it is intolerable in any University.

The other incidents fit into an almost equally intolerable violence pattern: At Atlanta, a group of college trustees held captive until they agreed to the rebel student demands; at Harvard, an administration building seized by the extreme leftist faction of the SDS; at Columbia, news picture of two professors climbing out of philosophy hall by a window because the building had been taken over for a time by a student faction.

There have been others, there will be still others. The nation has been patient and tolerant of these disruptions. The time has come to place limits around them, to isolate those who engineer them, to take prudent but effective action to end them. The agenda for making students part of a better system of college decision-making is still there, to be worked on and completed. But while that is happening the seizures and disruptions, the kidnaping, the gun-toting must all end. The overwhelming majority of Americans, including students and faculty, have had it—and don't want any more.

Part of the problem rests with faculty members so ridden by guilt or so ready for a vicarious violence thrill that they sit by while their university lies a helpless victim. Part of it rests with university officials who are so worried about their public image and about violence headlines that they buckle under blackmailing pressures and sign what is put before them. Whatever else these de-

mands include, they always include the demand for amnesty from either university or court sanctions. For the whole logic of risking violence is that you will be able, through the same violence, to get absolved from paying any penalties for it.

What is clearly happening is a process of paying off the terrorists, as in a kidnaping of a rich man's child, when the parent can't risk anything happening to his loved one. We are watching the dangerous, humiliating and self-defeating spectacle of the ransoming of American colleges.

The notion some professors have recently advanced—that we shall have to get used to college strikes and violence for many years to come, just as we have had to accept labor strikes and violence—has an element of nonsense in it. Students are not workers, colleges are not commercially run factories, college administrations are not corporate barons, students are not getting wages nor are college presidents making profits. The whole analogy is cockeyed. So is the notion of some black power far-out students that college campuses are black ghettos where riots, arson and shotguns must decide the issues.

Going to college is neither a way of making a living nor a way of overturning a society. It is a civil function, a privilege that the community gives its young people if they show promise and preparation and if they are ready to use it with civility. A college is a delicate organism, and everyone who is part of it must operate under the rules of the organism. If you are bent on ripping it to pieces, you don't belong as part of it and you had better take your intensities and violence elsewhere.

Students with shotguns, whether they are black or white, don't belong on any college campus. Any society that allows private armies to operate is doomed to end in the bloodshed of opposing private armies. If antiwhite Negro students take arms, it is inevitable that they will be followed by anti-Negro whites taking arms. Both are intolerable.

The burden rests on the university primarily to employ its power of suspension and expulsion. Beyond what the police may have to do to maintain order, on the campus as elsewhere, it is the university that must be responsible for its own membership. From this point on any university official who signs away the university's power of discipline by agreeing to "demands" of amnesty must be considered as having betrayed his university's survival.

CRIME STILL PLAGUING AMERICA

HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BURKE of Florida. Mr. Speaker, early this month the U.S. House of Representatives created a special committee, authorized to take an in-depth look into the problem of crime in our country, and shortly, hearings will be held around the Nation in an effort to determine possible solutions to halt the continued increase in crime.

The committee need not look far to find that crime rose 17 percent last year over 1967 and that the total number of serious crimes reported in 1968 will be about 4.6 million, a three-quarter increase over 1967.

At the present rate of increase, one out of every 50 citizens will be a victim of a

crime in 1969. Juvenile crime is increasing 300 percent faster than the increase in the juvenile population, and at this rate one out of every 20 juveniles will acquire a criminal record this year.

Estimates for the future are bleak.

The National Commission on Crime has predicted that in the next 10 years, crime will increase more rapidly than our population. In 1967, criminal activity amounted to \$27 billion and in 1968 increased to an astounding \$31 billion.

Yet these figures fail to reflect the pain and suffering inflicted on victims of crime or on the families.

Such patterns in crime certainly put a blight on our American way of life. The American housewives can no longer safely walk to a grocery store at night; no longer can certain businesses safely remain open after dark; no longer can some of our institutions, such as churches and museums remain open to the public without armed guards being in attendance.

To say it bluntly, Americans are not safe today either at home, at work, or at play.

I am sure that the committee will find what is also apparent is that the shameful narcotics traffic in this country, which is handled solely by the organized crime syndicate outlets is one of the major causes for the staggering increase of many of our vicious crimes today.

Statistics bear out that more and more young people, after once becoming addicted to dope, start a life of crime and become involved in first petty crimes and then crimes such as robbery, prostitution, and even murder in order to find money to buy dope and support their habit.

I am sure that the committee will find that some of the cause lies in our courts. A just and speedy trial is necessary so as to put the criminals behind bars and to allow those innocent to be returned to their rightful place in our society.

I am certain that the committee will find that it is going to take large expenditures of money to fight crime. Too often today, our criminals are set free because of the lack of prison space, crowded court dockets, or lack of court facilities to handle the trials, and because of the huge backlog of cases that are often on the judge's docket.

I am sure the committee will find that there will need to be a greater expenditure to hire more policemen in order to protect our citizens.

The Congress last year passed a bill intended to fight crime and I am happy to note that President Nixon has indicated in his program for action against crime that he will ask the Congress to provide additional funds to State government on a block grant basis as provided in the law to train and provide more police officers to bolster the local police forces.

The Congress must look into any legislation which will tighten court procedures and thereby prevent the release of hardened criminals because of some legal technicality, to prowl the streets once again to the detriment of our citizens. Congress must also pass legislation which will provide for stronger witness im-

munity for police informers who are acquainted with and have knowledge of criminal activities and to authorize the police full surveillance of criminals through sophisticated wiretapping procedures under the authority of a court order.

I am sure the committee will find that it is necessary that we take a hard, strong look at the criminal for what he is and the dangerous potential that he possesses against society, and the need to blind our eyes to the "sob sisters" and the "bleeding hearts" who presume that environmental and sociological factors are the sole causes of crime.

I am sure that the committee will find each individual must also share the responsibility in this war and recognize that tax money must be diverted from some projects to the upgrading of court procedures and strengthening those in our judiciary who are honestly dedicated to the principles of equal justice under the law, but who are aware also that equal justice means protection of the citizen as well as the criminal.

INDIANA DUNES NATIONAL LAKE-SHORE: TO DEFINE OR TO DESTROY?

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. MIKVA. Mr. Speaker, I am one of those supporters of the establishment of the Indiana Dunes National Lakeshore who was taken a little by surprise by the proposal on May 8 by my distinguished colleague from Indiana (Mr. LANDGREBE) to "define the boundaries of the Indiana Dunes National Lakeshore." Those who followed the course of the Dunes National Lakeshore through the Congress and who watched the heroic efforts of Senator Paul Douglas and others, were certainly under the impression that the boundaries of the Dunes National Lakeshore had been defined. I hope that what we are witnessing is not a belated challenge to the decision made by Congress in 1966 to establish the Dunes National Lakeshore. I hope, in short, that H.R. 11084 is an effort to define the Indiana Dunes National Lakeshore, and not to destroy it.

Several points should be made about H.R. 11084. First, such action is not really necessary. The legislation which established the lakeshore, Public Law 89-761, defined the boundaries of the lakeshore in the same fashion that the boundaries of countless other national parks, national seashores, and national recreation areas, have been defined—by reference to a public map or drawing in the possession of the Secretary of the Interior. The reference to a designated map or drawing in the possession of the Secretary of the Interior is a standard, permanent, legal means for defining a national park boundary. As evidence of this fact, I list the following areas under the administration of the National Park Service, which are now defined in law

only by reference to such a map or drawing. I emphasize that all of these areas were established before the Indiana Dunes National Lakeshore, yet none of them has had to be defined or redefined:

Guadalupe Mountains National Park, Pub. L. No. 89-667, Oct. 15, 1966, 16 U.S.C.A. § 283.
Assateague Island National Seashore, Pub. L. No. 86-195, Sept. 21, 1965, 16 U.S.C.A. § 459f.
Cape Lookout National Seashore, Pub. L. No. 89-336, March 10, 1966, 16 U.S.C.A. § 459g.
Ozark National Scenic Riverways, Pub. L. No. 88-492, August 27, 1966, 16 U.S.C.A. § 460m.

Lake Mead National Recreation Area, Pub. L. No. 88-639, October 8, 1964, 16 U.S.C.A. § 460n-1.

Delaware Water Gap National Recreation Area, Pub. L. No. 89-158, September 1, 1965, 16 U.S.C.A. § 460o-1.

Spruce Knob-Seneca Rocks National Recreation Area, Pub. L. No. 89-207, Sept. 28, 1965, 16 U.S.C.A. § 460p-1.

Whiskeytown-Shasta-Trinity National Recreation Area, Pub. L. No. 89-336, Nov. 8, 1965, 16 U.S.C.A. § 460q.

Mount Rogers National Recreation Area, Pub. L. No. 89-438, May 31, 1966, 16 U.S.C.A. § 460r-1.

Pictured Rocks National Lakeshore, Pub. L. No. 89-668, October 15, 1966, 16 U.S.C.A. § 460s.

Bighorn Canyon National Recreation Area, Pub. L. No. 89-664, October 15, 1966, 16 U.S.C.A. § 460t.

A second point which should be made with respect to H.R. 11084 is that it does not merely define more clearly the existing boundaries—it substantially reduces the size of the national lakeshore area which Congress authorized in 1966. H.R. 11084 would provide approximately 3 square miles of new Federal land to add to the existing Indiana Dunes State Park. But the amount of land originally authorized by Congress was over 13 square miles—8,721 acres to be exact according to figures from the National Park Service. Thus H.R. 11084 would not "define" the existing boundaries, it would reduce the size of the Indiana Dunes National Lakeshore by over three-fourths of its presently authorized size. I reiterate my fear that H.R. 11084 would not define the park, but would destroy it.

Third, Mr. Speaker, the point should be made that H.R. 11084 is supported by no argument which has not already been considered by Congress and rejected. If it is true that the present boundaries of the park include private homes—which I do not know of my own knowledge—then that fact was certainly considered by Congress when it established the Dunes National Lakeshore. That consideration was certainly balanced against the tremendous recreational benefit to millions—literally millions—of persons within a 2-hour drive of the dunes. Likewise the tax-exempt status of the dunes parkland was balanced against the benefit to all taxpayers of the dunes park. I do know that there are several commercial and industrial interests which would like to get their hands on land now designated for the future national lakeshore. I know, for example, that the Chicago, South Shore & South Bend Railroad at one point wanted to build a railroad marshaling yard on such land. I know that some interests would like to build a jetport on such land. I know that some people still think longingly of building a

harbor facility on dunes land. I suggest that railroad yards and jetports are not much of a heritage for our posterity.

Finally, I submit that the amount of land owned by the Federal Government is not really relevant to the desirability of having a national recreational site at the Indiana Dunes. The point is that the Indiana Dunes National Lakeshore is potentially the most popular national park in the country, located as it is only a short driving distance from several well-developed urban areas. We would be doing both ourselves and our children a grave injustice to try to undo the magnificent work which Paul Douglas and others labored so long and hard to accomplish. The Indiana Dunes should continue in its present form and the money requested for additional land acquisition should be appropriated this year. Only in this way can we assure that the Indiana Dunes will be what Congress intended they should be—an unspoiled recreation area for all the people to enjoy.

The concern about our national debt and our serious domestic problems and the war in Vietnam—all are legitimate concerns. Those concerns, however, cannot be alleviated by a landgrab assault on the Dunes National Lakeshore. Maybe the way to solve those other concerns is to cut down on the Federal funds available for the harbor in Indiana. I do not happen to think so, but it is no more illogical than H.R. 11084.

COLLEGE TURMOIL MUST CEASE

HON. ROBERT E. JONES

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. JONES of Alabama. Mr. Speaker, the continuing turmoil and disorder at many of the Nation's colleges and universities is a disgrace which educational authorities have too long endured. It is time for those who value the independence and traditions of freedom in the college community to move promptly and forcefully to restore reason and order to the campus scene.

In spite of the daily harassment of the reports of disorder, the fact remains that the vast majority of students are eager, dedicated, and disciplined scholars who are pursuing an education and change within the framework of reality. These serious students are to be commended for their devotion to studies and to the orderly change which can be achieved through reason and consideration of all interests. These students are often forgotten in face of the inflammatory acts of the minority.

The seizure of buildings, holding of hostages, theft of records, arson, and other destructions by small groups of students, nonstudents, or others can be regarded only as criminal acts and should be handled as such.

It makes no difference whether the perpetrator is a Ph.D. candidate or a fifth-grade dropout, violations of criminal law must be firmly and promptly dealt with through due process.

College administrators who fail to act forcefully with law violations invite immediate escalation of violence and destruction. In the long run, this weakens the foundations of our educational system through erosion of public confidence and support essential for widespread availability of education.

A false notion is growing that college administrators have a right to indulge people on campus in criminal violations. No university official has authority to suspend or excuse punishment for criminal acts of students or others.

If the law is to have any meaning, it must be exercised in the universities as elsewhere. Administrators owe a duty to society to manifest an obedience to the criminal statutes of the community.

Change, of course, is rather constant in our society. The most meaningful changes result from reasonable and orderly discussion with consideration of divergent points of view. Where relevant differences exist, open-mindedness and prompt discussion are required of all the principals.

The claim by student radicals that discussion is impossible seems to evolve from the fact that the radicals themselves term the demands nonnegotiable and refuse to explore the real or imaginary grievances. In many cases, the grievances themselves are irrelevant to the protest and beyond the control of the individual institution to which directed.

Notwithstanding these claims by the student radicals, the discussions are needed. The radicals themselves edit demands which are nonnegotiable and a constant review is needed to explore real or imaginary grievances.

Should students, or any other group, have legitimate complaints or grievances, ample means exist for redress through orderly and reasonable discussions if directed to the proper forum.

Our educational system and traditions are too valuable to allow destruction by a small number of radicals who seek to polarize the Nation into hostile camps for selfish motives and impose totalitarian restrictions on any who fail to accept their inflexible doctrine.

Each institution of higher learning has ample means to deal with those students who fracture the institutionally-ordained discipline necessary to the orderly and reasonable pursuit of education. To the serious students who honestly seek an education, the institution owes the expulsion of those who disrupt campus life.

Likewise, adequate laws exist for dealing with students, nonstudents, and others who violate the criminal laws of the community through trespass, seizure and destruction of property, intimidation, coercion, or illegal restraint of officials, students, and others, and more serious crimes.

The answer lies in the prompt and deliberate enforcement of the criminal laws through apprehension and prosecution of any person who breaks the law.

If the institutions of higher learning are to remain free for scholarly endeavors and advancement of education, the answers to the turmoil and violence must commence at the colleges and universities themselves.

ARTHUR BURNS—COUNCIL ON FOREIGN RELATIONS COUNSEL

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. RARICK. Mr. Speaker, many Americans are unable to comprehend our national policies because our goals and aims cannot be reconciled with America's own best interests.

Perhaps one of the reasons is that the President's two closest personal confidants: Dr. Arthur F. Burns, counselor to the President and Dr. Henry A. Kissinger, Assistant to the President for National Security Affairs are neither American-born. A unique form of discrimination against the native born American, especially in highly sensitive Government positions which affect the lives of our people and safety of our Nation.

For anyone thinking that Burns is influential, I recommend an article from the Washingtonian for May 1969, entitled, "When Arthur Burns Talks, President Nixon Listens," by Bruce Agnew, with a letter from Mr. Burns, praising his membership in the Council on Foreign Relations and the Pilgrim Society.

The material follows:

[From the Washingtonian magazine, May 19, 1969]

WHEN ARTHUR BURNS TALKS, PRESIDENT NIXON LISTENS

(By Bruce Agnew)

His shaggy grey head of hair is parted straight down the middle, over a pair of gold-rimmed spectacles. Puffing an old pipe, he makes ponderous pronouncements that sound like they are being read off tablets sent down from Mount Sinai. He admits he is "half-stunned" by what is going on across the country. Yet this curiously old-fashioned man has emerged as the most powerful domestic policy adviser in an Administration trying very hard to appear crisp and modern.

Richard M. Nixon learned the hard way to respect the advice of professor-economist Arthur F. Burns. In March 1960, as Nixon was gearing up his first Presidential campaign, Burns came to Washington to tell him a recession was developing. A political realist, Burns knew what steadily climbing summer and fall unemployment would do to Nixon's candidacy. Increase Government spending or cut taxes, Burns told Nixon.

Nixon couldn't get the message through to President Eisenhower, the recession came, and Nixon narrowly lost the election. "It seems entirely plausible to me," Burns says, that things would have turned out differently in 1960 had the advice been taken.

President Nixon now listens. The sixty-five-year-old Burns is Counsellor to the President, a specially-created post with Cabinet rank. His perfectionist temperament is being brought to bear on the full sweep of domestic policy. He is turning up everywhere in the White House—on the Cabinet, on the new Council on Urban Affairs, and on another Nixon innovation—the Cabinet Committee on Economic Policy, a mechanism first recommended by Burns when he was chairman of Eisenhower's Council of Economic Advisors from 1953 to 1956.

Before the inauguration, tucked away on the eighth floor of New York's Delmonico's Hotel, Burns sifted through twenty-one task force reports, analyzed Nixon's campaign rhetoric, looked at GOP platform and Congressional policy positions, stirred in ideas of his own, and handed Nixon an encyclo-

pedic report suggesting which ideas were worth adopting, what needed to be thought through again, and which would be best forgotten. So far, Nixon has been sticking closely to the Burns blueprint. And Burns, with virtually the same small staff that made up the "Delmonico Group," has been putting all new policy proposals through the same analytic fire.

His specific assignment is as broad as can be. As Nixon described it: "He will head up a small group whose prime responsibility will be the coordination of the development of my domestic programs and policies."

It seems an odd role for Burns, and it surprised many of his close associates. Burns has a towering reputation as an economist. His 1946 book, *Measuring Business Cycles*, is still the standard work in its field. But few thought his meticulous attention to detail would be applied to anything very far beyond classical economics.

Burns shakes his head at the typecasting. "What can I do about it?" he asks. "Since I was ten, I read everything I could put my fingers on. In college (at Columbia University), I started out as an architect and then became interested in law. Before I left the university, I got involved in economics and I have been with that specialty ever since. In the meantime, I have learned a little about government as well."

When he was ten, what Burns was reading wasn't written in English. He was born in Stanislaus, Austria in 1904, and his parents emigrated to this country in 1914, settling down not far from the Port of Entry in Bayonne, New Jersey. His father, a merchant in Austria, became a house painter in New Jersey.

"That's something he could not have done in Europe," Burns says, "because that would have been a disgrace. But here, in those days, manual labor was a position of honor. Now, everyone needs a college education."

Burns helped his father at painting, and went to school with other immigrant children. "In those days, we had something we need now. We had special classes for foreigners." Children from six to eighteen would go to Americanization classes during the day, and their parents would go at night. He remembers that the classes were light on standard school subjects, but the children were taught about dress, about government, about life in the city. They were, in short, taught about life in America, "and with remarkable speed and efficiency."

"Now we have all kinds of Federal programs, and we do not have a system of classes in urbanization" for today's immigrants—the poor, most of them black, who are moving into the cities from the rural south. He believes such classes would be successful because "kids want to be like other kids."

"My sons went to school in New York." Pipe in mouth, he begins to smile. "A private school. A progressive school. A very progressive school. An ultraprogressive school. By Jove, when I saw what was going on, I pulled them out."

"The students there were largely Jewish. But with the customary compassion of the Jewish people, they started bringing in others." One night at a PTA meeting, a Negro mother lamented that her little daughter had come home from school crying. "Why can't I be Jewish like the other children?"

"Kids," Burns says, "want to be like other kids."

Burns had more going for him than just a desire to be like other kids. He was very bright. He had a photographic memory; he read everything he could get his hands on, and remembered it all. By the time he was through high school, his grades easily won him a scholarship to a small college in Bayonne. But Burns wanted to see what Columbia University, across the river, had to offer. Not to see whether Columbia might take him; to see whether he might want Columbia.

He did want Columbia, but he was too late. Scholarship applications were already in. Even so, university officials agreed to talk with him, and they quickly decided to make an exception. In a day when scholarships were hard to come by, Burns got one that covered all but \$10 of his \$260 annual tuition.

It didn't cover everything; Burns still had to support himself. "I had a variety of jobs," and he recalls them as if savoring each one: "I worked as a waiter, as a theater usher, as a shoe salesman, as a real estate salesman, as a postal clerk, in a can factory, as a sailor, as an inventory clerk" and, finally, as a research assistant. By then he was deep in his specialty of economics.

In 1930, as a young graduate assistant, he joined the prestigious National Bureau of Economic Research, a nonpartisan analyzer of economic activity. At the request of Franklin D. Roosevelt, the bureau in the late nineteen-thirties began a study of that mysterious phenomenon called the business cycle; at that stage in economic history, upturns and downturns seemed as baffling as any other act of God such as a forest fire or hurricane.

The result was the book, *Measuring Business Cycles*, by Burns and the bureau's president, Wesley C. Mitchell. That same year, Burns produced a definitive attack on the growing tendency to rely too rigidly on Keynesian economic theory: *Economic Research and the Keynesian Thinking of Our Times*.

Both books demonstrated a tendency which still runs through Burns' thinking; he is not a man to let a facile theory, no matter how attractive, get in the way of facts. He believes in facts and figures. The first Nixon Administration action publicly acknowledged as his idea was an order that all Government agencies speed up release of the statistics they gather. A small thing, some might say. But to Burns these measurements of economic activity, many of which he devised, are the essential raw material of economic judgments.

Burns came to Washington to work for President Eisenhower in 1953. Once a Democrat, he switched parties, although he stresses, "I am not a Republican economist. I am a Republican and an economist."

As chairman of Eisenhower's Council of Economic Advisers, Burns was out of step with more conservative policymakers who had greater influence with the President. In 1956, he argued for a tax cut to offset the developing economic slump. He lost, just as four years later Vice President Nixon was to unsuccessfully advocate similar action.

When, later in 1956, Burns got the chance to return to the lecture hall at Columbia and to the National Bureau of Economic Research as its president, he took it.

In recent years, Burns' prominence in the pantheon of economists had seemed to decline. The mantle as preeminent critic of Keynesian thought passed from Burns to the University of Chicago's Milton Friedman, a close friend who has a summer home not far from Burns' two-hundred-year-old farmhouse in Vermont. And the pro-Keynesian "New Economists," most notably Kennedy economic adviser Walter W. Heller, seemed to be working miracles in the early nineteen-sixties with their "fine tuning" policies which stressed quick reactions against economic jolts.

But Burns, who was warning as early as 1965 that inflationary clouds were gathering, thinks the "fine tuning" theorists replied too rapidly to minor squiggles on the economic charts and paid too little attention to realities. "Fine tuning," Burns intones, "is self-destructive in fiscal policy, and that's something my good friend Walter Heller hasn't discovered. But he will. Everybody learns."

Economics is still a blend of science and art, and its practitioners sometimes display

the same jealousies that nag the other arts. Perhaps that is why, when Burns was named honorary chairman of the National Bureau of Economic Research early in 1968, many economists interpreted it as a sign he had been kicked upstairs. There was talk that Burns had fallen behind the times; that he was not successful in wooing grants out of foundations; that he was a hard man to work for. There is no doubt the last is true. He has given many subordinates the impression that he thinks he can do any job better than the man who is doing it. Probably he does think that, and probably he can.

"He's a tough boss," says a close admirer. "Perfect is okay. Anything less than perfect—no. If your work isn't up to his standards, it just comes back, comes back, comes back."

Burns does propound his views in very strong terms. "But," one friend adds, "he's one of those rare people who, when he's challenged, will say, 'Well, now, I hadn't thought of it that way. You may have something there. I'll have to think it over.'"

In Washington now, Burns and his wife live at the Sheraton Park annex. During the Eisenhower years, when their two sons were growing up, the family lived in Chevy Chase, a long way from the office through the confusing streets of Washington. The White House used to be the center of his "map"; when he wanted to get from one part of town to another, he had to go to the White House first to orient himself. One day back in 1953 he got so lost that he finally hired a taxi to show him the way home. He still despairs over the street patterns of Washington.

During the summer, he will try to get back to his Vermont farmhouse, which boasts "the most palatial garage in the United States." He designed it himself: Cape Cod style, he guesses, in keeping with the comfortable Colonial style of the main house. Burns says it is a combination garage-playroom-studio-living room. He adds, "My wife calls it 'Arthur's Folly.'"

Away in the woods, he has a cabin where he secludes himself for serious work. He designed that, too. More important, he selected the site for it. "When the kids were small," he explains, "I didn't want to tyrannize them and I didn't want them to tyrannize me. So I told Helen to stand on the lawn with them and they shouted as loud as they could. I started walking." When he could no longer hear them, there he built his cabin. The voices had driven him three-eighths of a mile.

There is no telephone in the cabin, and his wife has strict orders not to disturb him while he is there. Perhaps twice a summer, she has decided a phone call was important enough that the rule should be broken. There will be many more interruptions now—if, indeed, Burns gets away to Vermont at all.

Burns does not have quite the position of a domestic policy Sherman Adams, with the power to keep other officials' ideas from the President's desk. Nixon has made a deliberate point of not building any aide up to the "Assistant President" status that Adams enjoyed under Eisenhower, but Nixon is clearly asking Burns' advice on every major point of domestic policy. One prominent adviser during last year's campaign admits he knew full well Nixon wasn't stopping with him. "Nixon listens to what I have to say," the adviser said, "and he listens to what other people say. Then he calls up Arthur Burns and says, 'Arthur, what do you think?'"

Nixon expects Burns to question every recommendation, and question it deeply. Even now this is threatening to create rivalries and hard feelings in the new Administration. Burns dismisses the possibility. "If this is happening," he says, "I'm either too blind or too dumb to see it. I'm not interested in power and influence. I'm interested in doing a job."

His view of his job is that the Nixon Administration faces challenges that make economic problems seem "trivial."

Burns says: "I think that a great sickness has gripped our society. I think that a great many of our citizens have lost faith in our basic institutions. They have lost faith in our churches. They have lost faith in our schools. They have lost faith in family life. They have lost faith in the processes of government itself."

"The President keeps scratching his head—and I as his adviser keep scratching my head—trying to know how to build new institutions . . . to restore enough to know how to do this properly."

THE WHITE HOUSE,
Washington, April 19, 1969.

DEAR MRS. —: Thank you for your recent correspondence: your interest is appreciated. First of all, let me wish for your son a safe return.

The Council on Foreign Relations is comprised of persons with special knowledge and interest in international affairs. Its purpose is to study the international aspects of American political, economic, and strategic problems.

The Pilgrim Society was founded to promote fellowship between the United States and England. It is in no sense a secret society. I am a member of both organizations. They are serving our country well.

Sincerely yours,

ARTHUR F. BURNS,
Counsellor to the President.

DEATH FOR THE GOLDEN RULE?

HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 5, 1969

Mr. WYMAN. Mr. Speaker, what does the Golden Rule provide for situations like that described in the following newspaper accounts of the tragic death of a young man who stopped to help a stranger in distress? The deliberate premeditation with which the death of this innocent "good Samaritan" was planned should impel any jury considering the fate of the murderer to recommend capital punishment. In fact capital punishment should be required for such an awful, deliberately premeditated, slaying, yet there are always the shortsighted few who say the supreme penalty even in such circumstances is unwarranted. What if their wife, mother, father, girl or boy friend was to undertake the role of good Samaritan only to suffer such a planned killing? How would they feel then?

I hope citizens will reflect thoughtfully on the tragic indifference to the most basic social values reflected in this newspaper story:

GOOD SAMARITAN SLAIN BY MAN HE TRIED
TO AID

A 22-year-old Northwest man was shot to death Friday night in an apartment house in the 2200 block of N Street n.w. by a man he had found moaning on the sidewalk and helped to the N Street address, police said.

The victim, Donald C. Schreiber, of the 2200 block of Hall Place n.w. was killed by a single shot in the chest about 11:45 p.m. after the man he sought to aid tried to rob him, police said.

This is the account police gave:

Schreiber and a girl friend were walking in the 2500 block of M Street late Friday when they came upon a man lying on the sidewalk, moaning and asking for help.

The man said he was ill and asked Schreiber to take him to the N Street address. At this point, another man arrived, ostensibly in response to the calls for help. All four went to the N Street address.

On the stairway leading to the third floor of the apartment building, the man who had asked Schreiber's aid pulled out a pistol and tried to rob Schreiber.

A struggle followed. Schreiber was shot and the two men ran away. No money was taken from Schreiber, police said. He was pronounced dead on arrival at D.C. General Hospital.

MAN LURED INTO BUILDING AND SLAIN

A 22-year-old man who police said stopped with his date to help a man in apparent trouble was later slain by him.

He was the 56th homicide victim this year in the city.

According to police, Donald Schreiber, 22, of the 2200 block of Hall Place NW, was walking his date home from a movie around midnight when they encountered a man at 25th and M Streets NW. The man was bent over and appeared to be either intoxicated or sick. The man asked for help, police recounted.

When the couple said they would help, he mumbled and gestured in the direction he wanted to go, police said.

They accompanied him, and were joined on the way by a second man who appeared to know the first.

Arriving at a building in the 2200 block of N Street NW, they went to the second floor where the man "recovered" and produced a pistol in an apparent holdup attempt, police said.

Before any robbery could occur, police said, he fired the gun at Schreiber's chest and both men fled. The girl, who then notified police, was unharmed. Schreiber was pronounced dead at D.C. General Hospital.

Police described the man with the gun as a Negro, 25 to 30 years old, 5 feet 6 inches tall, of slight build and neatly dressed. His companion was also described as a Negro.

Schreiber was white, as is the girl.

BUCHWALD STRIKES AGAIN

HON. WILLIAM (BILL) CLAY OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. CLAY. Mr. Speaker, without unnecessary comment, I insert this Buchwald column for the attention of my colleagues in case they may have missed it elsewhere:

[From the New York Post, May 17, 1969]

THAT'S USING THE OLD WARHEAD

(By Art Buchwald)

WASHINGTON.—You can talk about the Anti-Ballistic Missile System from now until doomsday (I'm sorry I had to use that word), but you still go around in circles.

One of the strongest proponents of the ABM system is a friend of mine who has been assigned by the Pentagon to convince skeptics like myself that we really need an ABM system. Since they have no funds yet, I bought him a drink.

"I don't think I could make a stronger argument for the ABM," he said, "than the fact that Secretary Laird has revealed the Soviets will have a first strike nuclear capability by 1975."

"That's pretty strong," I admitted. "But how come Secretary Laird found out about

this first strike Soviet capability and Secretary McNamara and Clifford knew nothing about it?"

"Laird reads more."

"Look, a few months ago you told me that the reason we needed an ABM system was to protect our cities from Soviet missiles. Then you said it was to protect our cities from Red Chinese missiles. After that, you said it was impossible to protect the cities so we had to protect our missile launching sites. Now you say we need it because the Soviets are building new first strike missiles. Why don't you make up your mind?"

"Actually it's a little of this and a little of that," he said, unperturbed. "We know we need the system, but we're still not quite sure what we need it for. It has many uses."

"For example, the Soviets are building an ABM system around Moscow. Now we know it doesn't work, but we're not certain the Soviets know it doesn't work. So if we build an ABM system, they'll find out ours doesn't work, and then they'll have to assume their system doesn't work either."

"I get it," I said excitedly. "If we didn't have an ABM system the Soviets might put too much value on the one they have."

"Right. Now we also have to think in terms of disarmament. When we have a disarmament meeting with the Soviets we're going to have to give up something, right?"

"Of course. That is what disarmament is all about."

"We don't want to give up something that could endanger the security of the country, so, if we have the ABM system, we can give that up instead. Of course, if we didn't have an ABM system for disarmament purposes, we'd have to invent one."

He continued:

"I know there are many scientists and Nobel Prize winners who are attacking the system but what they don't realize is that if they say the system won't work, the Soviets will be encouraged to go ahead with their offensive missiles and the more missiles they stockpile the more they will be encouraged to try a first strike."

"But why?"

"Because Secretary Laird says so."

"What about the cost?"

"That's all anyone ever thinks about when you mention the ABM in this country—money," my friend said in disgust. "Instead of worrying what it's going to cost you you should get down on your knees and say 'thank God I can live in a country that can afford an Anti-Ballistic Missile system.'"

"Sometimes," I said ashamedly, "Americans don't know how lucky they really are."

SUBURBAN AIRLIFT

HON. HUGH L. CAREY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. CAREY. Mr. Speaker, our esteemed colleague from New York (Mr. MURPHY), brought to our attention the other day the fact that Pan American Airways has gone pioneering again.

For years we have been wrestling with the problem of rapid transportation. Today, we find ourselves in many cases spending more time on the ground than in the air. With the advent of supersonic air transports we are on the threshold of an 8-hour world. A world we will only be able to enjoy if first we can manage to solve our ground congestion problems in the major metropolitan areas.

Under the leadership of Najeeb Hal-

aby, a man who perhaps has more experience in this area than anyone in aviation today, Pan Am has come up with an inexpensive method of combating the airport congestion problem. By bringing the terminal to the passengers, Pan Am hopes to improve passenger handling in the New York area. Check-in facilities are already planned for Greenwich, White Plains, Westchester County Airport, Roosevelt Field, and locations in the Bronx and Brooklyn.

Once again Pan Am has challenged the airline industry to follow its leadership.

The New York Times in its editorial of April 16, "Suburban Airlift," brings home forcefully the possibilities of this innovation.

The editorial follows:

[From the New York Times, Apr. 16, 1969]

SUBURBAN AIRLIFT

Pan American's plan to pick up and check in passengers and their luggage at a half dozen airline bus subterminals around New York could become one of the most constructive programs to relieve congestion—both at the airports and on the jammed highways. More than smiling hostesses and sliding snacks, this is a step that could really help to make the going great.

The airlines and ground transportation carriers have been slow to realize that more than 50 per cent of the travelers start out for Kennedy and La Guardia from suburban locations. Air shuttles often climb into cars that clog highways and contribute to parking problems; many long-distance passengers leave the city and go home before heading for the airports. Once they get there, traffic, ticket and baggage lines contribute to flight delays.

Under Pan Am's plan, passengers for Kennedy will do everything at the suburban terminal—from checking in to selecting their seats. Then the buses will take them directly to their flights without all the counter rigamarole. The planned subterminals are in White Plains and the Westchester County Airport; near Roosevelt Field in Nassau County; in Greenwich, Conn., and within the city in the Hunts Point section of the Bronx and the Williamsburgh section of Brooklyn.

We see no reason why this should be a Pan Am exclusive. The airlines ought to get together and establish central check-in and bus facilities throughout the suburbs. And we hope that, during this planning stage, the operators of existing bus and limousine services throw up no roadblocks. Congestion on the ground and in the air must be relieved even before the missing fourth jetport is found.

HUNGARIAN FREEDOM FIGHTERS' FEDERATION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. DERWINSKI. Mr. Speaker, my attention has just been directed to a recent analysis published by the Hungarian Freedom Fighters' Federation regarding the development in Czechoslovakia in which the Russian oppressors of that nation manipulated government leadership.

The officials of the Hungarian Freedom Fighters' Federation are constant

and penetrating observers of the developments in Eastern Europe and their communication merits thoughtful review:

The replacement of Alexander Dubcek as the first secretary of the Czechoslovak Communist Party by Dr. Gustav Husak should not be considered as unexpected, sudden and surprising result of Soviet policies in Eastern and Central Europe.

In the recent past the peoples of the Heart of Europe have displayed continuing, stubborn and near unanimous resistance to Soviet aims. The Kremlin to atomize any massive resistance cropping up anywhere in the Soviet orbit, is reintroducing the centuries-old principle of divide and rule.

The distinguished Hungarian-born historian, Dr. Francis S. Wagner, with exceptional qualifications in Czech and Slovak contemporary history, observed as early as September 20, 1968 in an article titled "The Nationality Problem in Czechoslovakia After World War II" and published in "Studies for a New Central Europe": An indication that the time has become ripe for applying divide and impera tactics may be the assumption of a key role by Dr. Gustav Husak, an experienced Slovak opportunist known for his anti-Czech and anti-Semitic views. The divisive role designated for Dr. Husak is all the more likely because his loyalty to the Soviet Union is the only feature of his personality which has never changed and has never been questioned. . . . Undoubtedly, Dr. Husak is well equipped to execute the new, as of yet partly known dictates of the USSR. Already in the spring of 1945 he eloquently expressed his unchanging views of the Soviet Union: "Let no one be mistaken in one thing: no one and nothing can change the eastern orientation of the Slovak nation, and its Slavic and Sovietophilic conception."

Dr. Husak's past views and efforts concerning the establishment of a Slovak Soviet Socialist Republic as a member state of the Soviet Union are also well known. Mr. Dubcek's replacement with a man of such background may be indicative of a new Soviet policy towards the traditionally independent minded, freedom loving peoples of Central Europe. With China, representing a growing threat in the East, the total control over the rebellious satellites in the European buffer zone is considered essential by the Kremlin. Nothing can assure this total control more effectively than the inclusion of all or some of the countries in that area into the USSR as member states. Mr. Husak can be the tool to manufacture the atmosphere in Central Europe which will provide the reasons, justifications and means for such expansion.

We, the Hungarian Freedom Fighters Federation U.S.A. concerned over the fate of our people call the attention of policy-makers, legislators, columnists, scientists and common citizens to this possibility in order to create an awareness in the free world that is mandatory to prevent the fall of Hungary, Poland, Czechoslovakia, Rumania, Bulgaria, Yugoslavia by following the example of Latvia, Lithuania and Estonia.

I would like to include as a continuation of this insert, the Hungarian Freedom Fighters' statement condemning the Brezhnev doctrine, which follows:

CONDEMNATION OF THE DOCTRINE OF LIMITED SOVEREIGNTY

After the invasion of Czechoslovakia by troops of the Soviet Union and its puppet satellites, the Soviet Union found necessary to create a retroactive explanation for its action, which in itself was a blunt disregard for the established principles of international law. Mr. Brezhnev, by stating his justification of armed Soviet intervention in Czechoslovakia, established the sinister party doctrine of "limited sovereignty": Marxist-

Leninists believe that whenever there is a threat to the revolutionary gains of the people of any country, and hence a threat to the sovereignty of a Socialist country and a threat to the fraternal community, it is the international duty of Socialist states to do everything in their power to remove this threat and insure the progress of socialism and strengthen the sovereignty of all Socialist countries."

This stupefying ideological acrobatics, referred to as the Brezhnev Doctrine, has been reaffirmed many times by the leaders of the Kremlin, by Communist Parties completely under the control of Moscow and by the organs of the Soviet press.

The Hungarian Freedom Fighters Federation U.S.A. is compelled to express its concern over the proposed Brezhnev Doctrine for the following reasons:

1. The sovereignty of the Eastern European countries was guaranteed in Potsdam, in the peace treaties of Paris, and in the charter of the United Nations, to which organization all of the concerned countries belong.

2. This Doctrine is obviously motivated by political expediency in order that the colonial exploitation of the East-Central European countries may be maintained and promoted by the Soviet Union.

3. Acceptance of the Brezhnev Doctrine would be a "de jure" acknowledgement of the puppet status of the satellite countries and would provide the Soviet Union with the "legal" excuse for further armed intervention.

We, the Hungarian Freedom Fighters Federation U.S.A., on behalf of the Hungarian people who are silenced by their Communist-Russian oppressor, refute the Brezhnev Doctrine as illegal and cynical.

We call upon the Government of the United States and upon the Governments of all free nations to publicly repudiate the Brezhnev Doctrine as illegal and unacceptable.

This public repudiation is necessary to eliminate false impressions that the Governments of the Free World tacitly accept this latest anachronistic attempt of the Kremlin to prolong and extend its rule over Hungary, Czechoslovakia, Poland, East Germany, Bulgaria, Rumania, and Yugoslavia.

We call upon the communications media of the United States and of the Free World also, to face the well presented arguments on behalf of this "Doctrine" by illuminating the words, phrased by psychological warfare experts and used by ruthless party officials and naive follow travelers, with the lights of truth and facts.

RESOLUTION OF MASSACHUSETTS CIVIL DEFENSE DIRECTORS

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. CONTE. Mr. Speaker, region 1 of the Massachusetts Civil Defense Directors has recently written me concerning the commendable effort of the Federal Government in reducing or alleviating the threatened flood damage expected as a result of heavy snow accumulation this past winter.

We in Massachusetts are most appreciative of this assistance. Therefore, Mr. Speaker, I insert the following resolution by region No. 1 of the Massachusetts Civil Defense Directors be included in the RECORD at this time:

RESOLUTION OF THE STATE CIVIL DEFENSE DIRECTORS, FIRST REGION

Whereas President Nixon on March 1, 1969 instructed George A. Lincoln, Director of the Office of Emergency Preparedness to coordinate an extraordinary Federal Planning and Operational effort supplementing State and Local Resources to undertake all feasible preparations to reduce or alleviate the threatened flood damage expected as a result of heavy snow accumulation in the northern tier of States and

Whereas the United States Army Corps of Engineers moved promptly to alleviate this condition and

Whereas this prompt action resulted in prevention of untold personal suffering and in the saving of countless thousands of dollars in property damage: Now, therefore, be it

Resolved, That the State Civil Defense Directors, First Region, meeting in Maynard, Massachusetts on the fourteenth day of May 1969, express our deep appreciation for this assistance to President Nixon, the Director of the Office of Emergency Preparedness, the Chief, United States Army Corps of Engineers and to the Commanding Officer, New England Division, United States Army Corps of Engineers. And be it further

Resolved, a copy of this Resolution be sent to the President of the United States, the Director of the Office of Emergency Preparedness, the Chief, United States Army Corps of Engineers and the Commanding Officer, New England Division, United States Army Corps of Engineers.

TAX REFORM

HON. JACOB H. GILBERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. GILBERT. Mr. Speaker, wage and salary earners are particularly calling for tax reform. They believe that they are the ones who suffer the most from our inequitable tax system.

An example of the sharp cries for the changes in our tax structure is the policy statement voted by the executive board of the Amalgamated Meat Cutters and Butcher Workmen—AFL-CIO. This 500,000-member food industry labor union has its headquarters in Chicago.

The executive board is to be congratulated for its deep concern with tax reform and its effort to organize union activity to seek its enactment.

Mr. Speaker, having received permission, I insert the policy statement of the executive board of the Amalgamated Meat Cutters and Butcher Workmen—AFL-CIO—concerning tax reform in the RECORD:

POLICY STATEMENT OF THE INTERNATIONAL EXECUTIVE BOARD OF THE AMALGAMATED MEAT CUTTERS AND BUTCHER WORKMEN, AFL-CIO, CONCERNING TAX REFORM, APRIL 29, 1969

The Amalgamated Meat Cutters and Butcher Workmen (AFL-CIO) has long called for actions to correct the inequities and injustices of the existing federal, state and local tax systems. We have long urged (1) the closing of loopholes, which allow the rich to escape their fair share of payments, and (2) the reduction of low and middle income rates, which impose special hardships on wage earners.

At long last, the nation is aroused about tax inequities. A "taxpayer's revolt" is in

progress. Increasingly, a large number of Americans are seeking tax reform.

We are delighted with these developments. We fully support the hard-hitting letter which our Union's Executive Officers, President Thomas J. Lloyd and Secretary-Treasurer Patrick E. Gorman, sent to Chairman Wilbur D. Mills of the House Ways and Means Committee. It is an important and forthright statement of the views of our Union. We urge the Committee to heed the proposals of the letter.

The present tax system represents nothing short of robbery of wage and salary earners. It asks sacrifice of those Americans least able to provide it. It bestows tax benefits and credits upon those Americans who have the greatest means to meet their tax responsibilities.

It literally undermines other national policies established by the President and Congress concerning the economy, agriculture, poverty and urban reconstruction. It undermines the citizen's belief in justice and his adherence to law and order.

The time for change is now.

We urge Congress to overhaul completely the tax system by eliminating every single loophole which distorts the tax structure in favor of corporations and the upper income brackets. This includes the investment credit, oil and resource depletion, hobby farms, capital gains, real estate, and other gimmicks.

We urge Congress to reduce the tax burden shouldered by lower and middle income families.

We urge Congress not to renew the surtax unless tax reform legislation is previously enacted.

We urge state and local governments to reconsider their tax laws and to make them just and equitable. (In many cases, these tax structures are even worse than the federal one. Some states and communities, in fact, depend largely on the tremendously retrogressive sales tax.)

The Amalgamated recognizes that wishing changes will not make them come about. Action is necessary. Our Union has worked and will continue to work to make tax reform a reality.

RESULTS OF QUESTIONNAIRE

HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. QUILLEN. Mr. Speaker, I believe that my colleagues and the readers of the RECORD will find most interesting the results of my 1969 questionnaire, which I recently sent to all boxholders in my district in a special report from Washington.

I insert herewith a tabulation of the results:

CONGRESSMAN JAMES H. QUILLEN REPORTS
FROM WASHINGTON

MAY 1969.

DEAR FRIENDS: I am happy to send you this Report from Washington on the results of my 1969 Questionnaire.

29,850 returns were received out of 150,000—or 19.90%—of the Questionnaires mailed out.

This is the highest percentage of returns I have received of any Questionnaire sent out to the residents of the First District. Last year's percentage of returns was 15%.

The expulsion of students who violently disrupt the academic life of colleges and universities was strongly favored. The overwhelming majority (90.57%) expressed this desire, while a mere 7.43% did not favor such action, and 1.68% were undecided.

Those who answered were very much in favor of abolishing the Electoral College and electing the President solely by the direct vote of the people. 80.25% answered yes, while only 13.91% answered no, with 5.45% undecided.

The response to renewing the 10% income surtax was that three times as many individuals were against doing so as those who voted to renew it—67.74% against, 23.50% in favor, and 8.46% undecided. Hundreds of letters sent along with the Questionnaires urged that this not be done, as the American people are already overburdened with taxation.

It is not felt by the majority of the First District participants that the Paris peace talks will result in a conclusive settlement of the Vietnam War; only 14.68% felt that they would end the war, while 67.48% felt they would not. 17.33% of the people were undecided on this issue.

Accordingly, more people (45.35%) felt that the Paris peace talks are not the best

means of terminating the war—36.50% felt the peace talks are the best means, and 17.59% remained undecided.

56.04% of the people who responded feel that a voluntary army should be established to replace the draft system after Vietnam, and 33.40% feel it should not. However, 10.13% are undecided at the present time.

A vast majority (64.78%) of the people are in favor of curbing the President's power to commit American troops to combat without the specific approval of Congress—27.88% do not favor this move, while 7.01% are undecided.

The general consensus is that the Post Office should be converted into a government-owned corporation on a self-supporting basis. 63.45% are in favor, 22.48% against, and 13.70% undecided.

Finally, on the question regarding lowering the minimum voting age to 18, 55.84% were in favor of doing so, while 40.20% were not, 3.68% remained undecided.

OVERALL DISTRICT RESULTS

[In percent]

	Yes	No	Undecided
1. Viewing the economy as it stands today, would you favor renewing the 10-percent income surtax when it expires on June 30?	23.50	67.74	8.46
2. Do you feel that the Paris peace talks will result in a conclusive settlement of the Vietnam war?	14.68	67.48	17.33
3. Regardless of how you answered the previous question, do you consider the Paris peace talks to be the best means of terminating the Vietnam war?	36.50	45.35	17.59
4. Do you favor lowering the minimum voting age to 18?	55.84	40.20	3.68
5. Should the electoral college be abolished and the President elected solely by the direct vote of the people?	80.25	13.91	5.45
6. Do you favor expulsion of students who violently disrupt the academic life of colleges and universities?	90.57	7.43	1.68
7. Do you believe a voluntary Army should be established to replace the draft system after Vietnam?	56.04	33.40	10.13
8. Should the power of the President to commit American troops to combat without the specific approval of Congress be curbed?	64.78	27.88	7.01
9. Do you support the proposal to convert the Post Office into a Government-owned corporation to operate on a self-supporting basis?	63.45	22.48	13.70

I want to extend my sincere thanks to each and every one who responded to my Questionnaire. I am also grateful for the hundreds of letters that I received in which many clarified and expanded their views on the questions, as well as on many of the other vitally important issues facing the Nation today.

It is true that an informed public is the best safeguard of democracy, and it is my deep hope that our people will continue to take such a concerned interest in the affairs of our national government. Your opinion and the views of the other citizens in the First District are of great value to me in representing you.

Again, many thanks for your cooperation in participating in my 1969 Questionnaire.

Sincerely,

JAMES H. QUILLEN.

THE MILITARY ORDER OF THE WORLD WARS

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. SIKES. Mr. Speaker, the Military Order of the World Wars is, of course, well known to the Members of the Congress because of its principles of patriotism, dedication to country, and loyalty to the flag. However, I do not recall that I have seen in the CONGRESSIONAL RECORD a digest of its principles and its accomplishments. I have asked its chief of staff, Brig. Gen. Stephen O. Fuqua, Jr., to make such a document available,

and through his cooperation, I now submit a summary on the organization, "The Military Order of the World Wars," for reprinting in the RECORD:

THE MILITARY ORDER OF THE WORLD WARS

The Military Order of the World Wars is a prestige patriotic, nonpartisan organization of male commissioned officers, active, reserve, emergency and retired who have demonstrated, or who are demonstrating their love of country by full time active duty in the armed forces during a period of hostilities. It is also a hereditary society open to male descendants of members or deceased officers who were eligible for membership. The Order was founded originally in 1919 by dedicated men of arms who, the following year, formally adopted a Constitution whose Preamble sets forth the Order's ideals and principles:

THE PREAMBLE TO THE ORDER'S CONSTITUTION

To cherish the memories and associations of the World Wars waged for humanity;

To inculcate and stimulate love of our Country and the Flag;

To promote and further patriotic education in our Nation;

Ever to maintain law and order, and to defend the honor, integrity, and supremacy of our National Government and the Constitution of the United States;

To foster fraternal relations among all branches of the Armed Forces;

To promote the cultivation of Military, Naval and Air Science and the adoption of a consistent and suitable policy of National Security for the United States of America;

To acquire and preserve records of individual services;

To encourage and assist in the holding of commemorations and the establishment of Memorials of the World Wars;

And to transmit all these ideals to pos-

unity; under God and for our Country, we unite to establish "The Military Order of the World Wars."

The Order holds that it is nobler to serve than to be served; it has therefore been established for the welfare of our Nation as a whole rather than for individual benefits for its members.

The Order provides an opportunity for commissioned officers of all Services to unite in a strong and unanimous program for National Security and good citizenship. It calls for conscientious fulfillment of the responsibilities of being Americans by all who enjoy the benefits thereof.

The Order has been described as a bridge between the military and civilian community over which its members convey the thoughts and needs of the Armed Forces to the civilian population and the interpretation of civilian sentiments to the Congress and to the leaders of the Armed Forces.

ACCOMPLISHMENTS

Throughout its history, the Order has continuously and unselfishly served the Nation in observance of the principles enunciated in the Preamble to its Constitution. The Order's Chapters, its national officers, its nationally oriented committees and its individual members as well, have been the instrument of this long and dedicated service. It is an interesting fact that some of the Nation's greatest military and civic leaders have been attracted to membership.

That the Order has been worthy of its calling over the years, is attested to by statements of approbation by all U.S. Presidents since Harding as well as many of our senior military leaders. Prominent among the foregoing who hold or who have held membership in the Order are former Presidents Hoover, Truman, Eisenhower, Kennedy and Johnson; Adms. William H. Standley and Ernest J. King; Generals George C. Marshall and Douglas MacArthur; and the current Army Chief of Staff, Gen. W. C. Westmoreland. President Richard M. Nixon has been a member for the past fourteen years.

Notable among the Order's past and current achievements are the following:

Originated Army Day; it continues the tradition by observing Armed Forces Day with appropriate ceremonies and programs; it publishes the Armed Forces Day Review, an annual magazine which enjoys wide circulation among the Order's national officers as well as throughout the Department of Defense and industry.

Originated and continues to sponsor throughout the Nation, the Massing of the Colors, an annual ceremony of remembrance.

Was instrumental, through its past Commander-in-Chief, General of the Army Douglas MacArthur, in reviving the long dormant award of the Purple Heart Medal.

Supports, nationally and locally, regular military and ROTC units as well as the Service academies, and offers appropriate awards for exceptional accomplishments on the part of the personnel of such organizations.

Promotes strong patriotic educational programs in the Nation's schools and communities and furnishes guidance for the implementation of such programs.

Publishes The World Wars Officers Review, a bi-monthly national magazine which it circulates among the membership as well as certain selected agencies and individuals.

Each year as a highlight of its National Convention, the Order presents its Distinguished Service Award to an "American citizen who has made a notable contribution to national defense or the preservation of our constitutional liberties." Past recipients have been Senator Barry Goldwater (Phoenix Chapter, MOWW); Senator Strom Thurmond (D.C. Chapter, MOWW); Lt. Gen. Lewis B. Hershey (D.O. Chapter, MOWW); His Emi-

nence Francis Cardinal Spellman; and Senator John C. Stennis.

ORGANIZATION

The Order is composed of some 12,000 members belonging to 116 Chapters which are organized on a nationwide basis into sixteen geographical regions and with National Headquarters in Washington, D.C. The basic unit is the Chapter which, together with its important activities, is the lifeblood of the Order. Every October the Order conducts its annual business at a National Convention held in some prominent locality of the country. Between Conventions a General Staff composed of elected and emeritus members guides the functions of the Order on all matters of other than established policy. The current Commander-in-Chief of the Order is Major Thomas F. Faures, AUS (Ret), of Memphis, Tennessee.

MEMBERSHIP ELIGIBILITY

Active membership is open to male U.S. citizens of good repute who have served honorably on active duty as commissioned officers in World War I or since 16 September 1940. Male descendants of such officers are eligible for hereditary membership and enjoy the same rights and privileges.

FIND FORTAS AFFAIR IS ONLY THE OPENER

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. ASHBROOK. Mr. Speaker, the Daily Calumet of Chicago is one community newspaper which keeps its eye on national issues while reporting from day to day the latest developments on the local scene. On March 27, I inserted in the RECORD an article on the power of national political reporters which was first called to my attention by a William Rentschler column in the Calumet. The Saturday, May 17, issue of the Calumet again covered a subject of national importance; namely, the Albert Parvin Foundation and the possibility of more judicial involvement in conflict-of-interest manipulations such as are currently making headlines in the Justice Fortas case. The Parvin Foundation, it will be remembered, has had for a number of years Associate Supreme Court Justice William O. Douglas as its president, in which office he has been receiving a sum of \$12,000 annually.

According to Bob Seltzner in his regular Calumet column, the foundation's purpose, to provide scholarships to young people from underdeveloped countries to Princeton and UCLA, appears to have been somewhat broadened:

The United States Internal Revenue Service has indicated it no longer believes this to be the foundation's purpose; that in fact the Albert Parvin Foundation might possibly be a screen for vast money-manipulation and influence-peddling in the high places.

The Parvin Foundation case should be given the widest dissemination, and for this reason I include the column, "Find Fortas Affair Is Only the Opener," by Bob Seltzner, in the May 17, 1969, issue of the Daily Calumet in the RECORD at this point:

FIND FORTAS AFFAIR IS ONLY THE OPENER

(By Bob Seltzner)

Ever heard of the Albert Parvin Foundation? It's been in the news lately as a side-light to the Abe Fortas affair. Carolyn Agger, the wife of just-resigned Associate Justice Fortas, is an attorney for the foundation.

The Albert Parvin Foundation is the brain-child of millionaire Albert Parvin, the former Chicagoan who broadened his fortune in the hotel and night club furnishings business. The foundation was set up to provide scholarships to young people from underdeveloped countries to Princeton and UCLA.

The United States Internal Revenue Service has indicated it no longer believes this to be the foundation's purpose; that in fact the Albert Parvin Foundation might possibly be a screen for vast money-manipulation and influence-peddling in the high places.

The Albert Parvin Foundation, it has been learned, derives its primary income through a first mortgage in trust with the Bank of America, holding the Flamingo Hotel and gambling casino in Las Vegas. Another income source is the Fremont Hotel, also in Vegas.

Though Parvin now lives in Beverly Hills, California, and the Fortas family in the East, there are strong connections in Chicago. Chicago city treasurer Marshall Korshak (also Democratic Party committeeman of the 5th Ward), and his attorney brother, Sidney R. Korshak, own a total of 11,000 shares in Parvin-Dohrmann Company, one of the three Parvin hotel and night club furnishings firms. Chief Judge William J. Campbell, of the U.S. District Court for northern Illinois, has been a director of the Parvin Foundation since its formation in 1960—though he recently claimed that he has resigned. There has been no official announcement by the foundation of this resignation.

Also involved with the Parvin Foundation is Associate Supreme Court Justice William O. Douglas, who has served as the foundation's president, receiving \$12,000 annually.

Tied in with the Albert Parvin Foundation, are the following firms in addition to the Parvin Dohrmann Company: The Dohrmann Company, which supplies restaurants, hotels, motels, and institutions with commercial food-serving and preparation equipment, headquarters at Brisbane, Calif.; and Albert Parvin and Company (Illinois), of Chicago. The Parvin Dohrmann Company operates the Fremont Hotel and gambling casino, acquired June 30, 1966.

In a suit filed with the U.S. Supreme Court yesterday by a student of the law in Chicago, Sherman Skolnick, it is alleged that one man in particular—in addition to the Parvin family—ties all the Parvin operations together. He is alleged to be Harry A. Goldman of Los Angeles, described in the suit as a "gangster." Goldman is president of the Albert Parvin and Company (Illinois), was executive vice president of the Parvin Dohrmann Company and is now chairman, and is a director of the Dohrmann Company.

Skolnick, a paraplegic invalid who lives with his family on Chicago's southeast side, is Chicago and Illinois' layman petitioner of the courts, seeking to correct malapportioned political districts. They range from congressional and general assembly districts to city wards and county government. In recent years he has repeatedly confronted Judge Campbell in the federal court over these and other taxpayer suits. In January of 1967, long before Abe Fortas gained national prominence, Skolnick demanded Judge Campbell's removal from his cases because of the Judge's Parvin connections.

In his suit Skolnick declared, "It is unconscionable for respondent Campbell to proceed any further in (this) case. His connection with the Albert Parvin Foundation has

brought, and is bringing, the judicial proceedings in said case into suspicion and disrepute."

When Judge Campbell said he was no longer connected with the foundation, Skolnick retorted in his suit: "Campbell's published and circulated disclaimers and denials about himself and his relation to the Albert Parvin Foundation exceed the credibility gap. On the one hand, he says that he did not consider himself a director of the Parvin Foundation after the initial meeting. On the other hand, he says he resigned as a director purportedly in October, 1966. If he was not a director, why did he 'resign'?"

Skolnick continued: "... Campbell, as chief judge of the Northern District of Illinois, knows, or should know, that a director of a corporation remains liable for his wrongful acts, up to the statute of limitations..."

One must consider that the date of this particular suit is two and one half years ago. Skolnick received some local press for his efforts, but when it was over Judge Campbell was successful in quashing the matter, both in the press and in the courts. After all, he was both the chief judge and presiding judge in his own case. How far ahead of the national scene Skolnick was, is well illustrated in the following excerpt from the January 1967 suit: "According to the published figures, Campbell as a director (of Parvin) has allowed, permitted, and condoned that a fellow judge, Justice William O. Douglas, as president of the Parvin Foundation, be paid \$12,000 per year, which appears to be an exorbitant amount in comparison to the charitable disbursements of the Parvin Foundation. Approximately \$80,000 per year is disbursed for charitable purposes, leaving what appears to be overhead expenses, or an unexplained gap, of approximately \$57,000. Gross income of the foundation in 1963 (while Judge Campbell was still a director) was reported to total \$137,257 (See U.S. News & World Report, Oct. 31, 1966)."

Skolnick in the suit then spotlighted the current Fortas scandal, noting: "Whether federal judges can also be 'moonlighters' such as corporation officers or bank officers, is a grave national question."

While Judge Campbell was explaining through "press releases" to Chicago newspapers that he had attended only one meeting of the Parvin Foundation, and had never even seen a foundation statement through the seven years he was a director, Skolnick in his suit charged, "Campbell had a duty as a director to be informed, and his published and circulated statements that he has not seen a financial sheet or investment sheet for the Parvin Foundation, and did not know what they own exceeds credibility. Notices of directors' meetings and other data are sent out as a matter of course."

Skolnick in his suit demanded: "Did director-judge Campbell ever communicate with Foundation President Justice Douglas? It would appear logical to suppose that they would have been in touch with one another."

Skolnick in his suit described Albert Parvin as an "unsavory" character, who had what Skolnick described as a "criminal record" in Chicago. He documented four cases involving Parvin and members of the Parvin family ranging from 1925 through 1959, in which Albert, Jack and Bernard Parvin were charged with being receivers of stolen property—Albert Parvin on two occasions. They were never convicted.

Skolnick alleged and detailed that Judge Campbell in 1959, "rendered... a questionable judgement to the benefit of a relative of Albert Parvin."

Skolnick in his suit filed yesterday alleged of the Albert Parvin Foundation, that "it is further a matter of undisputed court record that the said Albert Parvin Foundation is a hoodlum front organization."

He listed "among the hoodlums connected with the... foundation":

(1) Marcus Lipsky, a "gangster and specialist in multiple murders. He masterminded the Capone mob's post-war invasion of the \$18 million dollar-a-year Dallas, Texas rackets."

(2) Edward Levinson, "who has a contract with Parvin Dohrmann Company, interlocked company connected with Parvin Foundation, and who is connected with (3) John (Jack) Pullman, crime syndicate 'banker.'"

And, (4) Harry A. Goldman, noted earlier.

The extent of Korshak's involvement with Parvin was revealed in the New York Times of May 9. The information was part of a Times report of the Securities and Exchange Commission permitting trading to resume in the shares of the Parvin Dohrmann Company on the American Stock Exchange. Trading had been halted for the second time within a few months because "of what they (the SEC) called inadequate information concerning a change in control of the company last October, the company's acquisition program and other factors."

The Times' story said, "Parvin Dohrmann operates three casinos in Las Vegas and is headed by Delbert W. Coleman, former president of the Seeburg Corporation. He purchased control of Parvin Dohrmann last October and now is the concern's chairman."

Then yesterday, in the midst of steadily increasing publicity concerning all aspects of the Parvin operations, the Times reported that National General Corporation was discussing "the feasibility" of acquiring Parvin Dohrmann.

The Times reported: "The company's stock (Parvin-Dohrmann) has been one of the most spectacular performers on the American Stock Exchange in that period, moving from a 1968 low of 14 and one-quarter to a close yesterday at 119, down a point."

Korshak, regarded as probably the second most powerful Democratic Party official in Chicago behind Mayor Daley, was a state senator from Hyde Park before appointed by then Governor Otto Kerner as state revenue director. In 1966 Korshak was slated by the Democrats to run for Cook County treasurer, a race in which he was opposed by Edmund Kucharski, the undersheriff under then sheriff Richard Ogilvie—now the governor, succeeding Kerner.

A week before the election in November, Kucharski, after two attempts to get Korshak on areawide television to debate, issued a statement in which he alleged that Korshak was the "fixer" in the New York liquor license bribery scandal involving a new Playboy Club there.

Not only did Korshak refuse to confront Kucharski on television in the closing days of the campaign, but following The (Chicago) Daily Calumet's exclusive reporting on the Kucharski charges on Nov. 4, 1966, Korshak (The Daily Calumet, Nov. 7, 1966) would reply only that the Kucharski charges were "mischievous, irresponsible libel." That brief statement was issued through Korshak's office.

Kucharski charged, "Is it not a fact that it was Marshall Korshak who was contacted initially by Playboy to arrange for taking care of the New York liquor license?"

He continued: "Did he (Korshak) or did he not list as an employee a top syndicate gangster when this hoodlum made application for rental of an exclusive Lake Shore Drive apartment?"

Kucharski based his charges on a May 6, 1966 by-lined story by reporter Charles Grutzner in the New York Times, which declared: "In testifying about his own dealings with the Playboy group, Berger (Ralph Berger, 66, of Chicago, sentenced to prison for conspiracy to bribe) said they first agreed to pay him \$5,000 for making the contact with (Martin) Epstein (New York state liquor au-

thority chairman). After they delayed giving him any money, he said, he went to see a friend, Marshall Korshak, who called someone in the Playboy organization, and he soon received \$5,000."

The Playboy club in New York finally opened, however, and it has since been learned that one of Parvin's hotel and night club furnishings companies received the lucrative contract to furnish the establishment!

In Chicago, Korshak's control of top city patronage jobs is regarded as absolute. The stories of his influence in a broad range of matters, from banking and investments, to land development and real estate, are legend.

The city-wide group of plain, every-day citizens which works with Skolnick in his seemingly never-ending drive to call attention to what he believes are the questionable activities of, particularly, federal-level judges, has given no indication it is running out of gas. Skolnick began his project a half dozen years ago, and has centered on his drive for apportionment of Illinois Congressional and General Assembly districts and Chicago ward boundaries, among others. It has become the man's life's work, and he seldom deviates from it through 80-hour weeks.

He has researched and opened up on the Parvin Foundation long before it and the Louis Wolfson Foundation became common household words. He said yesterday that he is "astounded" to think that judges in two of the three most powerful courts in the United States—U.S. Supreme Court, and the federal court for Northern Illinois, second only in importance to the federal court for southern New York—are deeply involved and linked together with outside interests through questionable operations such as the Parvin Foundation and the Wolfson Foundation.

And, Skolnick observed, "From what we have learned by our studies and investigations all these years, we have only scratched the surface of judicial influence-peddling and special interest decisions."

Skolnick has been one of many, including The Daily Calumet, which has continued to urge publication of the Johnson Administration-banned Blakey Report, the document which its author C. Robert Blakey, under hire of the government, has acknowledged, cites at least six high ranking judges in Chicago for extreme conflict of interest involvements, and in several cases crime syndicate ties.

To these people, the Fortas scandal is not shocking, but only the first public indication of a situation which they call a national tragedy of unmatched proportions.

RESOLUTION BY THE MASSACHUSETTS LEGISLATURE TO PROVIDE FOR THE DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES

HON. HAROLD D. DONOHUE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. DONOHUE. Mr. Speaker, I am pleased to include the resolution recently adopted by the Massachusetts Legislature urging the amendment of the Constitution of the United States by providing for the abolition of the electoral college system and establishing the direct popular election of the President and the Vice President of the United States. As

the Congress moves toward reform of the electoral college system, I most earnestly urge and hope that my colleagues and the administration will heed and act in the language and the spirit of this timely resolution which follows:

RESOLUTION BY THE COMMONWEALTH OF MASSACHUSETTS

Resolution memorializing the Congress of the United States to amend the Constitution of the United States by providing for the abolition of the electoral college system and establishing the direct popular election of the President and the Vice President of the United States

Whereas, The national election of nineteen hundred and sixty-eight has once again demonstrated the dangerous potentialities for deadlock inherent in the Electoral College system; and

Whereas, The Electoral College system is archaic, obsolete and undemocratic; and

Whereas, The Electoral College system does not offer full realization of the one-man, one-vote doctrine in national elections; and

Whereas, The abolition of the Electoral College system will result in bringing the voters, the ultimate source of all electoral power, directly into the process of electing a President and Vice President of the United States; now, therefore, be it

Resolved, That the General Court of the Commonwealth of Massachusetts respectfully urges the Congress of the United States to support an amendment to the Constitution of the United States which will provide for the abolition of the Electoral College system and its replacement by the direct popular election of the President and Vice President of the United States; and be it further

Resolved, That copies of these resolutions be transmitted forthwith by the State Secretary to the presiding officer of each branch of Congress and to each member thereof from the Commonwealth.

Senate, adopted, April 28, 1969.

NORMAN L. PIDGEON,

Clerk.

House of Representatives, adopted in concurrence, April 30, 1969.

WALLACE C. MILLS,

Clerk.

Attest:

JOHN F. X. DAVOREN,
Secretary of the Commonwealth.

MARTIN STONE: OUTSTANDING YOUNG BUSINESSMAN INVOLVED IN TODAY'S PROBLEMS

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BROWN of California. Mr. Speaker, most often when liberals rise to speak about American industry and businessmen, their tone gets demeaning and critical. The liberal tends to view the private sector as among his key opponents, and great rhetoric is expended attacking ethics of free enterprise and profit maximization.

Of course, at times such criticism is valid. The corporate ethic can stand in the way of overall solutions to pressing national problems, profit maximization may be opposed to overall public interest.

Yet, over the past few years, I have been encouraged by the increasing involvement of the private sector into heretofore untouched areas of national con-

cern. I am delighted to learn about—and to work with—groups of businessmen taking stands on such issues as Vietnam, and the military establishment, the ABM. And I do not praise here only those businessmen who agree with my views on these important questions; I believe involvement itself deserves encouragement because only from such involvement can we be assured of a continuing participatory democracy.

Certainly the business community has assumed a major role in attacking the problems of poverty and unrest in the Nation's pockets of poverty. A new creative relationship is being forged between Government and the private sector, a relationship based on a mutual belief that priority be given to these urgent problems.

Today I would like to single out and salute a young businessman from the Los Angeles area as a fine example of the new "involved" breed. Martin Stone, president and chairman of Monogram Industries, is involved; he heads the Los Angeles Urban Coalition, he has set up a job program for ghetto youth, last year he was cochairman of the California McCarthy campaign. And he runs a multimillion-dollar corporation at the same time.

Martin Stone does not hesitate in speaking out in matters which concern him not only as leader of a major business, but also as a citizen dealing with problems at a local and national scope. In the current issue of Social Service Outlook, a valuable publication put out monthly by the New York State Department of Social Services, Mr. Stone presents a perceptive analysis of employment opportunities for disadvantaged persons. I recommend this article to my colleagues as an excellent example of the type of "involvement" now being undertaken by dynamic young businessmen such as Martin Stone.

I now would like to insert Mr. Stone's article into the RECORD along with a story done last year by Business Week which highlights the work and philosophy of this talented man:

[From Social Service Outlook, May 1969]

How To FILL 1½ MILLION JOBS

(By Martin Stone)

Solely by virtue of the fact of permanent residence in the United States a man who is willing to work has a right to a decent job at a decent rate of pay and every person who is unable to work has a right to a minimum level of annual income which will enable that person to live in respect and decency and without the necessity of having to be subjected to the humiliation of begging a welfare system for the opportunity to live.

The major portion of the solution to the problem of unemployment is training. I would divide the training problem into two stages: the first stage being the development of entry level or prevocational skills and the second stage being the development of specific job skills. To pass through stage one, a man must be able to communicate satisfactorily and he must have a receptive attitude towards the disciplines and expectations of job performance.

The second stage of the job training problem is that which entails the development of specific job skills. Here is where private industry must play the decisive role. Actually, over the past two years, there has been a strongly increased awareness of the problem

by the business community. More and more firms are setting up programs for job trainees from the ranks of the unemployed and the so-called hard-core unemployables. These are being set up both under existing federal programs and independently of federal support.

Setting up and administering a successful job training program isn't easy. It is difficult. It requires considerable foresight, on-the-spot judgment, flexibility, patience and understanding. To build a successful training program requires the same kind of executive and middle management skills as are needed in achieving that most basic of corporate objectives: the earning of a satisfactory profit. And profit growth does not come easy. It takes skill and effort. Why expect less of a challenge from a pioneering effort in the field of job training?

The kinds of problems we have encountered in training programs at the various divisions of Monogram Industries start with the finding of prospective trainees and run all the way from the employment application itself through the potential for advancement that exists throughout an entire organization.

GET THEM FROM THE GHETTOS

In many instances it will be necessary to go directly to the ghettos to recruit trainees. It is not easy to reach people who have previously found it almost impossible to get a job with a convincing message that someone seriously intends to give them a job and train them.

A great many existing employment requirements exclude people who have been arrested for, or convicted of, criminal offenses. In a number of Negro ghettos over 50 percent of all adult males have criminal arrest records. Employers who have dropped the criminal arrest, and to some extent the criminal conviction, bars to employment have found no difference in the eventual results between employees with or without criminal records.

Another limiting factor in employment procedures is the psychological testing procedure a number of companies follow. Recent results have shown that most of these tests are programmed around a person who comes from a typical white, middle-class environment and are particularly difficult for people from strikingly different environmental backgrounds. In this consideration of trainee problems, I will focus primarily on the problems of Negro or Latin-American trainees who have the problems of cultural or environmental difference to overcome in addition to the lack of job skills.

Another problem relates to the filling out of the employment application. To avoid embarrassment and confusion, it is better to have the job interviewer fill out the application for the prospective employee.

HOW TO GET TO WORK

In many cities, particularly Los Angeles, lack of adequate sources of public transportation to the job sites is a difficult problem. At Monogram our primary answer has been a system of car-pooling.

Lack of fluency with the English language is a serious problem for people from Latin-American backgrounds. The best answer to this problem is to have some Spanish-speaking leadmen or supervisors.

Another major problem for trainees is the attitude of fellow workers and supervisors around them in the shop. There is often a problem of resistance to the trainees by co-workers. In our situation, we have an employee profit-sharing bonus plan in several of our shops that has become quite meaningful. Certain amounts of friction are created by any action which reduces the productivity of the shop. We have simply taken the position that fairly rapidly the trainees will become as productive as other workers, and in the meantime this is a social obligation that simply must be shouldered by all segments of our society.

The tendency on the part of supervisory personnel to use the trainees for menial work which does not contribute towards the training process must constantly be watched. This is a natural inclination in virtually any shop because, when occasional menial tasks arise, they are usually assigned to those worker lowest on the totem pole. A certain amount of this sort of thing is probably unavoidable, but if such assignments are too numerous, they cut into the valid training activities, slowing down trainee progress and creating a sense of discouragement on the part of the trainee.

Problems will arise relating to union discrimination against minority group employees. In addition, trainees will sometimes find it difficult to understand why, after they become reasonably skilled at a particular task, they will be working alongside older workers doing the same work who receive considerably more pay. People who have never worked in the framework of industry don't immediately understand the build-up of wage differentials as a result of long employment and the value of general employee shop versatility.

PERSONAL PROBLEMS

At times the company finds itself highly involved in the personal problems of the trainees. They have an extraordinary fear of failure based largely upon repeated failures to fit within the framework of our existing institutions and rejections by these institutions. A company becomes involved with getting the trainees into hospitals and out of jail. It must deal with the problem of getting gas and electricity turned back on, fighting off finance companies, getting cars towed off freeways and many other annoyances that it normally wouldn't put up with. But bear in mind the company is likely to be the only real link these people have with "the establishment" and the company may represent their only real way of coping with it until they have built up some kind of a "stake."

There are a great many other problems which come up in programs of this sort, not the least of which are the twin problems of tardiness and absenteeism. These two have been our most difficult problems at Monogram and I have come to the conclusion that a sense of employment discipline is therefore an important part of any prevocational training program and can be accomplished better at that stage than during the actual on-the-job training period.

One approach which will help make a success of training programs is the use of the "buddy system" where a trainee is linked with an older employee who can give him considerable individual attention, particularly in the discussion of specific problems. It also helps considerably if companies have qualified Negroes or other minority group people in supervisory or managerial jobs.

Last but not least, trainees must see the opportunity to advance within the organization and to achieve increasingly better levels of pay.

REAL PROBLEM IS TRAINING

The real unemployment problem consists of training approximately 1.5 million people to handle presently unfilled job openings.

To provide meaningful starting jobs at \$2.00 per hour for 1.5 million people would cost approximately \$4,400 per person per year or approximately \$6.6 billion per year. The problem with our present anti-poverty efforts is that they have created a vast federal overhead structure to administer the programs so that a small proportion of the funds allocated actually reaches the intended beneficiaries or is brought to bear on the real problems of poverty.

It is essential that we develop a program which permits a maximum amount of federal funds to be applied to the development of solutions to the problems of poverty, rather

than the creation of additional federal bureaucracy. To this end, I propose that the bulk of the job training portion of the anti-poverty effort be put into the hands of private industry. Business corporations in the United States in 1967 made a combined profit of over \$85 billion. Profits of unincorporated business organizations probably brought this total up close to \$100 billion. If the Federal Government, as an incentive to business, granted a credit of approximately 7½ percent against federal income taxes for amounts paid to certified "trainees" for the first 12 months of employment, it would create a pool of approximately \$7½ billion which businesses could, at their election, either pay in taxes to the Federal Government or to training the presently unemployed.

For example, if a business had a tax bill of \$1,000,000, it could elect to pay out \$75,000 as wages to certified trainees and \$925,000 in taxes to the Federal Government. As an incentive to business to train these people, I would recommend that they could apply the entire wage paid to these trainees during the first year plus an additional 10 percent profit. Thus, in the example given approximately 15 trainees could be hired at \$2.00 per hour or a total of \$66,000 in wages plus \$6,600 profit for the year. The total of \$72,600 could be shown as a reduction against a tax bill of \$1,000,000 and a total of \$927,400 paid in taxes. In this way, 1,500,000 additional people could be hired and trained by private business organizations at a total cost to the Federal Government of \$7,300,000,000 in the first year. Thereafter, annual training subsidies would be far less each year as original trainees were built into the permanent work force and the number of unemployed was drastically reduced.

It would, of course, be necessary to have the Federal Government set up procedures to prevent abuse of the economic incentive program and to see that the training being given was of real value. This could be carried out by a program of quarterly interviews with the trainee and a recertification of trainees every three months.

As a final overriding factor in the question of providing jobs for anyone able to work, the government should recognize its obligation as an employer of last resort to provide work for those unable to obtain work in the private sector of the economy. This point will take considerable further development but I include it here as part of the over-all problem.

The second part of the problem relates primarily to those people who are unable to work. It is in this area that our present multi-faceted welfare programs are highly inadequate and completely degrading. Our society is wealthy enough to see that these people need not live in poverty, humiliation, and despair.

If we assume that we want to eliminate poverty in this country, how do we spend the money without dramatically increasing the costs through inevitably expensive federal administrative programs? The best answer I have seen is the negative income tax. This is simply a means of implementing the idea of a guaranteed annual income with minimum administrative cost.

The programs I have advocated involve a partnership of participation between the government and the business community. Although they contemplate economic incentives to industry for the retaining of the unemployed, the business community will, along with all other taxpayers, bear the additional (perhaps temporary) burden of the higher tax rates necessary to support the training expense contributions and the payments under the guaranteed annual income plan to those unable to work.

For years, I have heard the old adage that the purpose of business is the earning of maximum profits for the stockholders. On

this basis, the argument has been made that it is somehow wasteful of the corporate assets to devote any portion of them to social or community activities. As operators of businesses, businessmen have a large stake in the existence of a healthy social environment in which to operate and in preserving and strengthening the free enterprise system of economics.

The Negroes and other minorities have realized the failure of the so-called liberals who have stolen their decency, self-respect, and manhood by clinging to old-fashioned ideas of patronizing charity. The black man wants decency, self-respect and the right to earn his way. He wants an equal shot at earning his share of the benefits of an affluent, color-blind society. Businessmen are a major component of "the Establishment." They have the most to protect in this system and society. Let them be the progressives of the future. It is high time that businessmen developed a clear-cut and forthrightly announced "business social conscience"—a social conscience which is in tune with the needs of the times and which can be applied first and foremost to the achievement of a major social revolution in America which will, for the first time in our history, give all Americans true equality of participation in every aspect of our economy and our society.

MR. AND MRS. AMERICA: WHO

(EDITOR'S NOTE.—When statistics go into a computer, all manner of facts and figures and generalizations come out of it. When the U.S. Census Bureau puts all it knows about Americans into its computer, a "Mr. and Mrs. Typical American" emerge. This dispatch, putting some breath of life into these American "types," is based on interviews United Press International reporters throughout the country had with men and women who fit the Census Bureau's "typical" description. By weight of numbers—more than 180 million whites to about 20 million Negroes—the typical American under examination becomes white.)

(By Harry Ferguson)

Meet Mr. A—the typical American.

He is 26 years and 10 months old, according to the U.S. Census Bureau. He has been married for a little more than four years and had one child.

There are some other things the U.S. Census Bureau can tell us about Mr. A. He went to school for 12.3 years. He owns a television set and an automobile and lives in a mortgaged house. He earns a bit more than \$7,000 a year.

But the Census Bureau provides us only with a sort of skeleton of Mr. A and what we are going to try to do now is to find out what kind of man he is—what he thinks about all sorts of subjects, what his hopes and ambitions are, what he fears, what he talks about, how he votes and what he does in his leisure time. To get this composite, UPI reporters interviewed scores of Mr. A's throughout the country.

First, his brain. Is Mr. A intelligent? If you mean can he reason from cause to effect, the answer is yes. If by intelligent you mean that he is a uniformly cultured, well-informed man, the answer is no.

NO EGGHEAD

For years eggheads, both foreign and domestic, have been clubbing our Mr. A on the head. They say he is stupid, uneducated, never reads books and never listens to good music. Some counts of the indictment are correct. Asked in the UPI survey to name the three best books he had read in the last year, he hadn't read any. He was asked if he could identify historian Will Durant, poet William Cullen Bryant, historian Samuel E. Morison, novelist James Branch Cabell and composer Richard Wagner. He said no to all of them.

He never finished college and that too is typical.

What does Mr. A read? In most cases he reads his local paper and if he's small town, the nearest metropolitan daily. Across the country the magazines most read by Mr. A are *Life*, *Time*, *Outdoor Life*, *Sports Afield*, *Playboy*, *American Rifleman*, *American Home* and *Mechanix Illustrated*.

But there is no use dwelling too long on the printed word for the fact is that Mr. A is not much of a reader. Nor can he be too easily lured to the movies by his wife. He sees an average of one movie a month and these were some of his recent favorites: "Bonnie and Clyde," "The Party," "The Graduate," "In a Family Way" and "Valley of the Dolls." If you are preparing to risk a surmise that what Mr. A goes to the movies to see is sex, you are dead right.

PRINCIPAL ENTERTAINMENT

Mr. A spends an average of two and one-half hours a day in front of the television set, almost twice as much time as his child does. This, of course, is his principal indoor entertainment and it is the source of much of his information. Walter Cronkite of CBS and NBC's "Today Show" won steady but not spectacular support in replies to questionnaires across the country. Rowan and Martin's "Laugh-In" got a good run from the listeners during the last season, but this is not basically Mr. A's cup of tea. What he likes is suspense and violence.

Favorite programs most mentioned: "I Spy," "The Avengers," "Mission Impossible," "Get Smart," "Garrison's Gorillas," "The FBI," "Combat," "Rat Patrol."

Commercials? Mr. A grumbles about them occasionally, but doesn't turn them off during his favorite programs. He would rather watch commercials than pay to have them taken off the air.

In the nationwide interviewing 82 prominent names of the living and the dead chosen at random were submitted to typical American men. They were asked to identify each person.

Some that every man could identify: President Andrew Jackson, Greta Garbo, David Brinkley, Lucille Ball, Douglas MacArthur, Drew Pearson, Gregory Peck, Sen. Everett M. Dirksen, Julius Caesar, Robert McNamara, Lawrence Welk, Gen. William C. Westmoreland.

Name that nobody could identify, among those questioned: Marvin Watson, postmaster general of the United States.

THE GIRL HE MARRIED

The average adult woman in this country is five feet, four and one-half inches tall and weighs 134 pounds.

[From Business Week, Mar. 16, 1968]

NAMES AND FACES: MONOGRAM'S STONE ROLLS SWIFTLY ALONG

(NOTE.—Martin Stone of Monogram Industries keeps things fast-paced in and out of the executive suite. In seven years he has built a conglomerate that moves with a sprint to match his own.)

Advice to the activist undergraduate who pictures the executive suite as a stronghold of stifling conformity: Spend a day with Martin Stone, the 39-year-old managerial whiz who heads an emergent conglomerate called Monogram Industries, Inc.

Cautionary note: Get in shape first.

Stone, who is both chairman and president, runs a breezily informal eight-man headquarters in the posh Westwood section of Los Angeles. He often walks the 2½ mi. to work, a course that takes him through the sprawling campus of his alma mater, the University of California at Los Angeles. It is more than 20 years since Stone's student days at UCLA, but time and success haven't changed his exuberant style.

FREE AND EASY

Wisecracks—and an occasional football—fly through Monogram's offices. Arrangements for lunch-time workouts and after-work handball games are carefully made and zealously guarded from workaday intrusions.

Stone is constantly in motion. He paces as he talks; when he does sit, he flings himself into the chair and his hands start a game of catch with a paperweight. As often as not, he munches an apple or cookie.

An associate says that Stone "does more business walking than sitting down." Stone just shrugs at the comment. "I like exercise," he says. "If I'm traveling and not getting much sleep, I'll work out instead of taking naps. I feel more alert."

When he is not traveling, Stone's business day usually begins at 8:15. Occasionally he skips lunch to work out at a nearby gym. He knocks off at 4:30 for three sets of tennis. And before the day is over, he jogs one or two miles around his neighborhood, accompanied by his golden retriever.

IN THERE PITCHING

His vacations have a physical slant, too. Two years ago, the Stones bicycled through Europe. This year, Stone spent a week working out as a pitcher with the Atlanta Braves at their West Palm Beach (Fla.) training camp. The arrangement, which was made possible by Stone's longtime friendship with one of the owners of the Braves, led one Monogram executive to quip: "What happens to us if they sign him up?"

Stone's youthful enthusiasm shows through in other ways: his dabbling in liberal Democratic politics and his tendency to mount a soapbox whenever civil rights, education, or Vietnam are mentioned. But Stone does more than pay lip service to the things he believes in. For instance, he has instituted a hiring program for hard-core unemployed ghetto youths, and recently he accepted the co-chairmanship of Senator Eugene McCarthy's California campaign for the Democratic Presidential nomination.

Behind the business day hi-jinks and extracurricular activities is a management and acquisition knowhow that has radically transformed Monogram. Seven years ago it was a money-losing company with annual sales of \$5-million; today it is a fast-moving merger-minded corporation with sales running at an annual rate of \$135-million.

Stone's penchant for physical activities is matched by right-hand man Harvey L. Karp, 40, who keeps up with the boss on the handball and tennis courts. Karp, who is Monogram's executive vice-president, secretary, and treasurer, also has a less strenuous hobby—collecting ancient glass. Henry Gluck, the company's 39-year-old vice-president for operations and No. 3 man, writes satirical essays in his spare time.

I. SUCCESS STORY

This unconventional trio presides over an empire that spreads from Culver City, Calif., to Tonawanda, N.Y., has 6,000 employees, and turns out a growing variety of products. Most of the growth came last year, when Monogram snapped up two far larger companies: Spaulding Fibre Co. and National Screw & Mfg. Co. Both had sales of nearly \$40-million, and the acquisitions put Monogram firmly in the big time.

Significant as this achievement was, Stone is even prouder of the way he steered Monogram into a position of strength from which to launch the merger drive. From 1961 to June, 1967, he points out, Monogram's average annual earnings growth was 91%, while sales were growing 65% per year. More than 80% of that growth was internal.

ROUGH START

Stone and Karp started almost from scratch when they took the helm at Monogram early in 1961. The company was losing

more than \$100,000 a month, most of it through one operation—manufacturing aircraft pulleys. But other divisions ran into trouble as their managers were moved in to plug the hole. It was, says Karp, "a classic case of what happens when the panic button is pushed."

Stone decided to divide the company into four divisions (of which three remain), and invited the managers to his home. "We put the name of every employee—about 800 at the time—on separate pieces of paper," Stone recalls. "Then we told the managers to choose the people they needed to operate their divisions. When all were satisfied, more than 300 names were still on the table."

Stone had already cut the managers' salaries and instituted a profit-based bonus system. Six months after the newly slimmed-down divisions went back to work, Monogram showed a profit.

SLIMMER LINE

Once the new setup was working smoothly, Stone nailed down Monogram's future by deciding to concentrate on two product lines—recirculating chemical aircraft toilets and specialty fasteners.

Stone figured that travel trailers and pleasure boats held out a limitless future for a low-cost toilet unit, and by 1965, he had developed the product he had been looking for in the "Monomatic." Gluck, a Wharton School graduate who had worked for Monogram years earlier, took a big pay cut to rejoin Stone and build up the consumer products division.

"Sanitation equipment seems to evoke disgust or hilarity," Gluck says, and getting the product across required careful selling. But the "Monomatic" became such a big seller that within two years Gluck's division had zoomed past the aircraft toilet division.

Judicious acquisitions of small companies helped the fastener and sanitation equipment lines grow, but until about a year ago Stone kept his merger program in low gear. From the beginning, Stone had decided to make Monogram an acquisition-oriented company. "But first we had to put it on a sound financial footing and establish its internal growth," he says.

The acquisition in 1964 of Magnasync Corp., a bankrupt manufacturer of motion picture sound recording devices, was a deviation from the plan. Monogram got 60% of Magnasync for only 5¢ a share—but much of its equipment had been destroyed by fire, and all but two employees had left. Subsequently, Moviola Mfg. Co., a maker of film editing equipment, was acquired to form Magnasync Moviola Corp. Operating as a subdivision, Magnasync Moviola has annual sales of \$5-million—and its stock now sells for around \$15.

BIG TIME

Stone moved tentatively toward bigger game in late 1966 when he bought 31,000 shares of Studebaker Corp. as part of a plan to acquire the company with a group of outsiders. But the plan collapsed and he sold the shares almost immediately. Last April, Stone paid \$15,350,000 for Spaulding, and a tender offer four months later bought National Screw into the fold for around \$21 million.

Stone is fascinated by the acquisition game. "I've never been able to resist a challenge," he says, "and the challenge now is to see if we can grow better and faster than anyone else." He considers acquisition techniques "a growth product—in the same sense as a line of computers."

"It's the most exciting aspect of the business," Stone declares. He gets a kick out of negotiating for a company. "Usually I can't wait to get there and begin," he says. His enthusiasm apparently rubs off on others. "It's hard to keep the operating people glued to internal growth while we're growing so fast through acquisitions," he adds.

II. A RUNNING START

Stone started running early. Growing up in Los Angeles, he held his first job at 12 and worked his way through high school and college. "I was always the organizer," he recalls. When his sandlot baseball team needed competition, Stone organized seven other teams. Then he persuaded local merchants to put up the money for bats and balls.

He played baseball for UCLA (B.A. 1948) and got \$75 a month "for taking care of the diamond." He kept himself in Loyola University law school (LL.B., 1951) by hoisting boxes for Houston Fearless Corp., then a privately owned maker of film processing equipment. "I just felt better with manual jobs," he explains.

LEARNING THE ROPES

After graduation from Loyola (Stone eventually went on to earn a master of laws degree at USC), he went to work full time at Houston Fearless. There he learned the ins and outs of management and acquisitions from Benjamin B. Smith, a co-owner of Houston Fearless and a self-styled doctor of sick companies. In the mid-1950s, he followed Smith to International Glass Corp., whose name, after several acquisitions, was eventually changed to Monogram.

As executive vice-president, secretary, and treasurer, Stone ran the company for Smith. But in 1959 the two men fell out over Stone's attempts to expand newly acquired Wickland Mfg. Co., a manufacturer of airplane toilets. "We had to expand the company tenfold just to meet commitments that had been made before the acquisition," Stone recalls. "And we had to replace and redesign every unit that had been shipped." Stone walked out when Smith balked at his plan to pour more money into Wickland.

QUICK RETURN

Stone thought he was through with the business world; he returned to UCLA to get a Ph.D. in economics. But the sabbatical was short-lived. A few months of graduate school convinced him that "there was more backbiting in the academic world than in business."

By this time, Harvey Karp, with whom Stone had worked at Houston Fearless, had also pulled up stakes, and the two looked for a way to team up in business. The vehicle they found was Electrovision Corp., which owned a string of movie theaters. Their plan was to sell the theaters and invest in industrial companies. Then Smith asked Stone to buy him out and run Monogram, and the stage was set for a classic American success story.

III. POLITICAL ACTIVIST

Stone has not allowed his success to interfere with a strongly developed social conscience.

He launched his training program in May, 1965—before the Watts riot—out of a conviction that "business has an obligation to try to do something about the major problems of our society." Stone sets only one requirement for the participants: Each has to be a high school dropout who has never held a steady job.

The trainees start as helpers and then spend 90-day periods in three of several job categories at Monogram's sheet metal plant in Culver City.

HAPPY RESULTS

Says Stone: "I really didn't think it would be good business. But it has turned out to be just that. After we started the program, we ran into a severe labor shortage. The training program gave us employees we wouldn't otherwise have had."

Of the 53 youths hired so far, 14 are still with the company. Most of the others have gone on to other jobs or joined the military.

Stone is critical of Washington's job training efforts. Nevertheless, he has encouraged some Monogram divisions to partic-

ipate in subsidized programs under the Manpower Development & Training Act. "I start with the assumption that I don't like the federal government," Stone says. "I have no confidence in its ability to do anything. But the problem is so important that we feel we have to try these programs."

Stone would prefer to see businessmen handle job training independently of the government. "The business community has a greater stake in social problems than any other group," he says. "And businessmen can be motivated to solve these problems, if they are approached in the proper way."

PARADOX

If these views run counter to Stone's espousal of liberal Democratic causes, he is aware of the paradox. "I'm a Democrat," he says, "but sometimes I wonder why." He thinks the poverty program is "all overhead structure." But in the next breath Stone defends the Head Start program, in which his wife Elaine has been active as a teacher for several years.

Stone's political activism began when he tried—and failed—to win a nomination as congressman in 1960. Subsequently, he organized grass roots campaigns in upper-crust Bel Air, first for Adlai E. Stevenson and then for John F. Kennedy.

His decision to work in behalf of Senator McCarthy ended months of soul-searching over Vietnam. Stone considers U.S. policies in Vietnam "immoral," but he opposes the war primarily because of the damage he thinks it is doing on the domestic front. "Our system may fall if we don't correct the evils of widespread poverty and racial inequality," he says. And he believes that "the economic drain of the Vietnamese war and the moral conflict it has raised" are blocking serious efforts to solve these problems.

FIRM STAND

Stone has heard some mutterings from Monogram stockholders who think he has no business in politics. But such complaints only touch another sore point.

"I didn't give up my civil rights by becoming president of a publicly held company," Stone says heatedly. "And I have no patience with people who complain about the problems of our time and refuse to take an active role in solving them. If the society around us goes to hell, the business community won't benefit. I think I have an obligation to participate."

I FEEL SORRY FOR YOU

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. SIKES. Mr. Speaker, an 18-year-old marine sent a letter to the editor of the Panama City, Fla., News-Herald which deserves a lot more than reading. It deserves some careful thought. Those who read his letter are not likely to pass it over lightly. So I submit it for reprinting in the CONGRESSIONAL RECORD:

DEAR EDITOR: Well, I've been thinking of this a long time and now I've decided to turn to you for help.

I'm not sure if it will help any but I would like you to read what I have written and put it in your paper. If there is any charge just send it to me.

What is Vietnam—Vietnam is a hell which I am forced to be in.

It is a country in Southeast Asia, it's not as big as the state of Texas. I think it is a cause of human suffering, not a war. Just a way of ridding the little country of population.

It is one of the filthiest places I have ever been. It has the most diseases of any country known today.

We try to help but who gives a damn, who really cares? No one. Everybody back in the United States protests what I might die for, plus those who have already died.

I guess the reason I feel this way is because I've seen life for what it is.

But what is life? Life is cheap, my life is worth \$10,000, but what do I get? So, I get to see the inside of a grave.

Sure my mom will get that measly \$10,000, but will that bring me back? Here I am, a U.S. Marine. I'm here because of you. But who really gives a damn.

I'm only 18 years old and I've faced death in the eye more times than you ever will.

Sure I know what you're thinking. I'm just feeling sorry for myself. Hell no, I'm not. I'm feeling sorry for you.

Yes, you. The guy in college dodging the draft and you the hippie, the bum, the tramp, the ones who are so sorry the service wouldn't have you.

Just think how you would feel if you were laying next to your buddy and the next thing you know he's only half there.

But who really gives a damn, me, the guy sitting in the hole next to me?

Here I'm getting short, but I might not be here to finish this little manuscript. Yes, I'm the real patsy. I'm over here wondering if I'll see tomorrow or not. But you get used to it.

Lately I've been getting pretty close to God. But I'm pretty dumb on that subject. So I say, God, you're pulling the strings now.

When is it my turn to die? Sometimes I even joke about it. I know it's wrong, then I ask myself who am I kidding.

Then I figure God put me here for something. I just hope I haven't done it yet.

Now getting back to life, what is life to you? To me life is a house, a wife, crib, security, a job and most of all there has to be love.

But that's why I wonder at times why am I still alive. I have none of this, but why do we have to fight? Why can't there be peace and love for thy neighbor?

I'm not claiming to be religious, because I'm not. I have broken every one of the Ten Commandments some time or other.

All I want is to know why the citizens of the United States of America don't have enough backbone to stand behind us.

Sure war is wrong but without war there wouldn't be any need for your support. But to whom that read this, may it be many, I ask you all to support your young Americans wherever they may fight.

Because I know you would rather have the war here instead of in the United States. So I thank you for your cooperation.

Pfc. ROBERT E. HALL,
Marine.

RIOTS: RESEARCH AND NO RESULTS

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. RARICK. Mr. Speaker, many taxpayers living in the "riot age" have not as yet reconciled themselves to the conclusion that riots have become profitable to some.

Many Americans would be aghast to learn that several million dollars have already been spent to investigate disorders and violence—especially that some of the millions are being spent on the elite intellectuals who cannot even control disorders at their own institutions.

The solution has been known to many throughout the years; that is, take the manacles off the police, let the local people through their own courts enforce their laws and maintain order.

Perhaps someday after violence and crime have been investigated fully, some report may conclude that the people themselves can make their own analyses and have the courage and initiative to protect their lives and property through the authority which they delegate to their local police and courts.

Mr. Speaker, I include at this point a newsclipping from the Daily News for May 19, and an article by Robert A. Nisbet from the magazine Public Interest:

[From the Washington (D.C.) Daily News, May 19, 1969]

RIOT STUDY FOUND COSTLY: BUT SO FAR RESULTS HAVE BEEN FEW

The Government has doled out more money for academic studies of riots than it spent on its own widely publicized Kerner Commission investigation. So far, it has had few results.

The Kerner Commission, formally known as the National Advisory Commission on Civil Disorders, spent \$1.6 million between August, 1967, and April, 1968. It produced a widely publicized and highly controversial 423-page report which condemned "white racism" as the main factor underlying Negro rioting.

Sixteen academic studies totaling \$1,644,000 have been underwritten since August, 1967, on various phases of the same subject. Only five have been completed. Ten others fall due this year and next. The most expensive study, costing \$451,000, is not due until May, 1973.

LAST WEEK

The list of academic studies was disclosed last week by Dr. Louis A. Wienckowski, director of extramural research programs for the National Institute of Mental Health (NIMH).

Dr. Wienckowski acknowledged his program was "just kind of getting off the ground" but said the academic reports eventually would complement the Kerner Commission study by disclosing more basic data on "normal and abnormal behavior, social stratification, aggression, violence and things of this nature."

"Truth comes slowly," Dr. Wienckowski said in an interview. "Rome wasn't built in a year."

COPIES SET

He said as the social scientists finished their studies, copies will be given to interested government agencies. "But one of the problems here is that they'd rather not read a 600-page book," he said.

Professors conducting the studies are bound by strict contract, Dr. Wienckowski said, under which they cannot make "supplementary income" from the government. They are paid at the same rate as their regular salary, he said, and their university deducts from their pay checks the amount NIMH pays them for the research.

"We don't allow overruns," he said. "There's no way for them to get rich." He said they are free to publish their report but "in many instances they are so esoteric there is no market for them."

COST \$17,512

One project, costing \$17,512, was a "workshop on research problems in community violence" designed to help social scientists learn how to conduct such studies. It was conducted by Brandeis University's Lemberg Center for the study of violence, which also was listed for a \$406,889 study titled "The Origin and Control of Community Violence." Several interim papers from this study have been published.

Studies completed so far have dealt with participation in riots, a psychological and social studies of the 1967 Detroit riot, a comparative history of major riots from 1900 thru 1965 and a paper on ways to reduce prejudice.

The most expensive study, costing \$451,000, is titled "Organizational Responses to Major Community Crises." It is being conducted by the Ohio State University research foundation. The work began last June and the investigators have until May, 1973, to finish.

WHEN AUTHORITY FALTERS, RAW POWER MOVES IN

(By Robert A. Nisbet)

The most striking fact in the present period of revolutionary change is the quickened erosion of the traditional institutional authorities that for nearly a millennium have been Western man's principal sources of order and liberty. I am referring to the manifest decline of influence of the legal system, the church, family, local community and, most recently and perhaps most ominously, of school and the university.

There are some who see in the accelerating erosion of these authorities the beginning of a new and higher freedom of the individual. The fetters of constraint, it is said, are being struck off, leaving creative imagination free to build a truly legitimate society. Far greater, however, is the number of those persons who see in this erosion the specters of social anarchy and moral chaos.

I would be happy if I could join either of these groups in their perceptions. But I cannot. Nothing in history suggests to me the likelihood of either creative liberty or destructive license for very long in a population witnessing the dissolution of the social and moral authorities it has been accustomed to.

I should say, rather, that what is inevitable in such circumstances is the rise of power; power that invades the vacuum left by receding social authority; power that tends to usurp even those areas of traditional authority that have been left inviolate; power that becomes indistinguishable in a short time from organized violent forces, whether of the police, the military or the paramilitary.

The human mind cannot support moral chaos for very long. As more and more of the traditional authorities seem to come crashing down, or to be sapped and subverted, it begins to seek the security of organized power. The ordinary dependence on order becomes transformed into a relentless demand for order. And it is power, however, ugly its occasional manifestations, that then takes over.

To see the eruption of organized power as the consequence of a diminishing desire for liberty is easy. What requires more knowledge or wisdom is to see such power as the consequence of loss of authority in a social order. Authority and power: are these not the same, or but variations of the same thing?

They are not, and no greater mistake could be made than to suppose they are. Throughout human history, when the traditional authorities have been in dissolution, or have seemed to be, it is power—in the sense of naked coercion—that has sprung up.

A TISSUE OF AUTHORITIES

Authority, unlike power, is not rooted in force alone, whether latent or actual. It is built into the very fabric of human association. Civil society is a tissue of authorities. Authority has no reality save in the allegiances of the members of an organization, be this the family, a political association, the church or the university.

Authority, function, membership: these form a seamless web in traditional society. The authority of the family follows from its indispensable function. So does that of the

church, the guild, the local community and the school. When the function has become displaced or weakened, when allegiances have been transferred to other entities, there can be no other consequence but a decline of authority.

Culture, too, as Matthew Arnold wrote memorably a century ago, is inseparable from authority. There is the authority of learning and taste; of syntax and grammar in language; of scholarship, of science and of the arts. In traditional culture, there is an authority attaching to the names of Shakespeare, Montaigne, Newton and Pasteur in just as sure a sense of the word as though we were speaking of the law. There is the authority of logic, reason and genius.

Above all, there is the residual authority of the core of values around which Western culture has been formed. This core of values—justice, reason, equity, liberty, charity—was brought into being through the union of the Greek and Judaic traditions 2000 years ago. Until the present age, it has managed to withstand all assaults upon it. In the 18th and 19th centuries, conservatives, liberals and radicals, however passionately they may have fought each other, nevertheless recognized the authority of such values.

The most dangerous intellectual aspect of the contemporary scene is the widespread refusal of thinking men to distinguish between authority and power. They see the one as being as much a threat to liberty as the other. But this way lies madness—and the ultimate sovereignty of power.

There can be no possible freedom in society apart from authority. "Men are qualified for civil liberty," wrote Burke, "in exact proportion to their disposition to put moral chains upon their own appetites." It is out of this disposition toward fruitful self-discipline that authority emerges and its legitimacy is recognized. Abolish the disposition and you equally abolish the capacity for liberty.

There are those, chiefly political romantics and sentimentalists, who think these "moral chains" are a part of man's own nature and that there is consequently no need to worry about their dissolution. But the horrors of our century should have taught us the precariousness of the virtue that romantics think to lie in man's germ plasm. In truth, man's virtue is inseparable from—is as precarious as—his culture.

THE DANGER IN BOREDOM

Boredom is one of the most dangerous accompaniments of the loss of authority in a social order. Between boredom and brute violence there is as close an affinity historically as there is between boredom and inanity, boredom and cruelty, boredom and nihilism. Yet boredom is one of the least understood, least appreciated forces in human history.

Nothing so engenders boredom as the sense of material fulfillment, of goals accomplished, of affluence possessed. It is such a boredom that goes furthest, I think, to explain the peculiar character of the New Left.

I do not deny that youth brings idealism in some degree to this movement; that disenchantment with the more corrupt manifestations of middle-class society plays its part. Youth is beyond question idealistic. But in our present society, youth is also bored. And it is from boredom that so much of the intellectual character of radical political action today is derived.

I should more accurately say nonintellectual character, for it is the consecration of the act, the cold contempt for philosophy and program and the increasingly ruthless behavior toward even the most intellectual parts of traditional culture that give to the New Left its most distinctive character.

It is boredom born of natural authority dissolved, of too long exposure to the void; boredom inherited from parents uneasy in

their middle-class affluence and who mistake failure of parental nerve for liberality of rearing; boredom acquired from university teachers grown intellectually impotent and contemptuous of calling that explains the mindless, purposeless depredations today by the young on that most precious and distinctive of Western institutions: the university.

We do well to take seriously the university and what happens to its authority in our culture. For among its prime functions traditionally has been that of serving as arbiter to that age group that has, at least temporarily, outgrown the authorities of family, church and neighborhood. Potentially, this age group is the most revolutionary of all groups in society, far more revolutionary than, say, the workers, the unemployed, the impoverished.

High in intelligence, emotionally buoyant, at full physical tide, this is the age group that is channeled by the university into the several areas of the professions, that provides the intellectual leaders of society. In the university is acquired lasting motivations toward learning, toward profession, toward high culture, toward membership in the social order. But, by the same token, it is this age group in the university that has largely furnished the West with its steady supply of revolutionaries.

Who is to say that our society does not require its occasional infusion of revolutionaries? But in the present age, the revolutionaries have turned on the university itself, and this is not only destructive but totally self-destructive.

The university is the institution that is, by its delicate balance of function, authority and liberty and its normal absence of power, the least able of all institutions to withstand the fury of revolutionary violence. Through some kind of perverted historical wisdom, the nihilism of the New Left has correctly understood the strategic position of the university in modern culture and also its constitutional fragility.

Normally, there are no walls, no locked gates and doors, no guards to repulse attacks on classroom, office and academic study. Who, before the present age, would have thought it necessary to protect precious manuscripts from the hands of revolutionary marauders?

The New Left is free to say all that it wishes, but it has nothing to say. Its program is the act of destruction; its philosophy is the obscene word or gesture; its objective, the academic rubble.

FEAR OF THE VOID

It would all be a transitory charade, a tale told by an idiot, were it not for one thing: the fears aroused in a middle-class society that has lost its anchoring in natural authority. Fear of the void is for human beings a terrible fear, one that will not long be contained. And in this state of mind, it is only power that can seem redemptive, however stained with blood it may be.

The entire country watched last summer's confrontation between New Left and police in Chicago. It was violent, ugly, and could only have aroused the chill of fear in those who had chanced to see the rise of Nazism in Germany, the burning of the Reichstag and the beginnings of a police system that was in time to enclose the German society like a straitjacket.

But I know of no national poll or study that has shown other than approval of police actions by a large majority. The size of this majority will grow. Human beings, I repeat, will tolerate almost anything but the threatened loss of authority in the social order: the authority of law, of custom, of convention. The void does not have to be great, or seem great, for the fears it arouses to become sweeping, for sanity in politics to disintegrate.

We are told by the polls that a large number of people watching their television

screens that night in Chicago found even the berserk actions of police and pseudopolice gratifying, reassuring, healing to the sense of security. Let us not forget that there is a strong upswell of boredom in affluent middle-class society, too. And power, as history tells us, is as often the antidote to boredom in society as to anxiety.

We need, as Max Lerner recently wrote in a thoughtful column, a new social contract in our society, one that will do for our violence-torn social order what the doctrine of the social contract in the 17th century sought to do in that age, fresh as it was from the horrors of the religious wars. But the task will be far more difficult.

The institutions of Western society are less solid and encompassing than they were then. Two centuries of convulsive social change and of remorseless increase in centralized political and economic power have seen to that. We are plagued even by our achievements, for material progress has inevitably taken toll of traditional culture.

Above all, at this moment, we need a liberalism that is able to distinguish between legitimate authority—the authority resident in university, church, local community, family, language and culture—and mere power. Failure to make this distinction between authority and power can only result in the ever-wider replacement of the former by the latter.

If our liberalism can see no profound difference between the authority of an academic dean, however fallible this may sometimes be, and the power of the police riot squad, we shall find ourselves getting ever greater dosages of the latter. The impulse to liberty can survive everything but the destruction of its contexts; and these are contexts of authority—a legitimate authority that is inseparable from institutions.

CHARLES A. VANIK ON CORPS OF ENGINEERS DIKING REPORT

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. VANIK. Mr. Speaker, recently, the Corps of Engineers held a briefing and meeting on their preliminary report on the diking of dredged materials in the city of Cleveland. The substance of the report was that the diking program was inconclusive since Lake Erie is so highly polluted it was impossible to determine any appreciable improvement as a result of the removal of dredged silt and polluted material into diked area adjoining Burke Lakefront Airport and other dikes throughout the Great Lakes harbors.

It was my hope to have the Assistant Secretary of the Interior Carl Klein comment upon the corps' report. My letter to Mr. Klein and his response which is contrary to the corps' position will be included at the conclusion of my remarks.

It has been my longstanding position, that removal of any and all polluted dredge from the lake's bottom can only be beneficial to the condition of Lake Erie which is so dreadfully polluted. It is inconceivable to me that any Federal agency should be allowed in any way to contribute to the repollution of the lake through open-lake dumping of highly polluted dredged spoil. It is indefensible to allow any dumping of dredged material which is acknowledged by everyone to be

polluted and which obviously adds to the pollution of Lake Erie.

It is sensible to advocate stopping pollution at its source. I have been among the strongest advocates for increased authorizations and appropriation toward that end. However, we have not succeeded in increasing these funds, even though our battle in this body continues year after year. This is no reason to terminate a program of diking dredged materials which are brought out of our lake's bottom every year without fail. The dredging program will not be stopped. The material with its highly polluted contents which is dredged will still be brought to the surface. Is it not just as sensible to dispose of this material on land as it is to transport it farther out into our already devastated lake and dump it? It seems incredible to me that anyone would argue that such funds for this continuing program should be discontinued on the theory that these funds then would be diverted toward pollution control at the source of the pollution. Such is not the case and will never be the case. We must spend such funds where pollution is known to occur and one such source is the Corps of Engineers dredging program in the Great Lakes, and particularly Lake Erie. The corps' diking program to contain this polluted spoil is one solution at hand now to control this problem and should be supported and extended to as many harbors as possible as soon as possible.

I wish to include at this point in the RECORD the exchange of correspondence with Assistant Secretary Klein and my office and a very fine editorial on this subject which appeared in the Cleveland Plain Dealer of Sunday, May 18, 1969.

The letters and editorial are as follows:

MARCH 19, 1969.

HON. CARL KLEIN,
Assistant Secretary,
Department of the Interior,
Washington, D.C.

DEAR MR. SECRETARY: Yesterday, the Corps of Engineers Report on the "Pilot Study" of Dredging Disposal in the Great Lakes contended that the "effect on water quality of polluted sediment deposited in the Great Lakes remains unknown . . ." The Corps of Engineers Report suggests that the uncertain effect of dumped polluted dredgings does not justify the cost of establishing diked areas to receive this material.

The history of the issue will indicate that the Corps of Engineers first of all denied that the dumping of dredged materials into the open waters of the Great Lakes contributed to the pollution problem. Public indignation brought about the tests and the subsequent diking program.

I do not believe that the decision on the continuation of the "diking" program to curb pollution should rest solely on the Corps of Engineers. Tests already conducted indicate the polluted nature of the dredgings. The preponderance of the evidence has identified the dredgings as a major contributing source of lake pollution. The cost-benefit ratio of diking is self-evident. The public's money is being used to prevent highly polluted material from being dumped into their source of fresh water.

I hope that you will establish a firm policy directing the dumping of polluted, dredged material only in diked and controlled areas.

Sincerely yours,

CHARLES A. VANIK,
Member of Congress.

DEPARTMENT OF THE INTERIOR,
Washington, May 8, 1969.

HON. CHARLES A. VANIK,
House of Representatives,
Washington, D.C.

DEAR MR. VANIK: This is in response to your letter of March 19, 1969, concerning the Corps of Engineers' report on the "Pilot Study" of Dredging Disposal in the Great Lakes.

The Corps of Engineers' report has only recently been made available to this agency. The full report is a rather massive document of some twelve volumes and our review is not yet fully completed.

Our preliminary review indicates that the Corps of Engineers had assembled an impressive quantity of factual information about the Great Lakes dredging operations. To a limited degree and in some areas of this endeavor, the Federal Water Pollution Control Administration has assisted the Corps by supplying scientific data and information.

On the basis of our preliminary review, we feel there are a number of important aspects of this problem in which we cannot wholly agree with the conclusions drawn by the Corps of Engineers. Some of these are:

(a) While the study as conducted did not conclusively demonstrate a massive deleterious effect on water quality from open water dredging, it did show that polluted sediments were toxic to small forms of animal life. We believe that this fact should be recognized in the conclusions of the report.

(b) The costs of a program to prevent pollution from dredging disposal cannot be justified on a cost-benefit basis in this study without attempting to engage in the debate of cost-benefit numbers of questionable meaning. We should point out that the values to be protected by this program and other programs intended to reduce pollution in the Great Lakes are the total worth of these lakes. The real worth of these lakes to present and future generations is almost incalculable.

It is generally conceded that the present level of pollutants discharged to the lakes is seriously degrading these waters and if not abated will hasten the essential destruction of the lakes. The elimination of any source of pollution in the Great Lakes will help enhance the water quality in those lakes which, in turn, will increase the long-range financial worth of the lakes and communities adjoining the lakes.

(c) This Department has taken and is maintaining a strong position opposing the continued dumping of polluted materials in the open waters of the Great Lakes. To this end, we have consistently recommended that permits not be issued by the U.S. Corps of Engineers when such permits would allow the open-lake disposal of polluted materials.

(d) To this end, too, we will continue to press for alternative diked or on-land disposal of the vast quantities of polluted spoil dredged by the Corps. We believe that the Pilot Study has shown such alternative disposal to be a realistic alternative and highly effective from the pollution control standpoint.

I do appreciate this opportunity to place my views on the record, and I trust that your interest in and support of water pollution control activities will continue.

Sincerely yours,

CARL L. KLEIN,
Assistant Secretary.

[From the Cleveland (Ohio) Plain Dealer,
May 18, 1969]

KEEP POLLUTION OUT OF LAKE

Polluted dredgings from Great Lakes harbors should be deposited in diked areas or on land to prevent further degradation of the lakes.

This will increase dredging costs, but if the nation is serious about protecting its water resources, it will have to pay the price.

A debate on what to do with polluted dredgings is shaping up in hearings being conducted by the U.S. Army Corps of Engineers. Ultimately, the debate will reach Congress, which will have to make a decision.

The Corps conducted a two-year study of the problem in cooperation with the Federal Water Pollution Control Administration and other agencies and research organizations.

It found that dumping in the open lake, the customary practice of the past, produced no measurable increase in pollution levels, yet nevertheless concluded that "in-lake disposal of heavily polluted dredgings must be considered presumptively undesirable."

The reasoning: Even though the added pollution load from dredgings may not have produced measurable deterioration of water quality, it is known that dredgings from some harbors, such as Cleveland's are heavily polluted with organic material, oil and phosphates. It would not be wise to add pollutants to a lake already badly polluted.

The Corps also found that depositing dredgings, behind dikes effectively prevented pollutants from reaching the lake.

It suggested further study of the problem and concluded that a 10-year program to deposit polluted material in diked areas may be desirable. It estimated the additional costs of such a program at \$120 million in 10 years if all polluted Great Lakes harbors were included.

Opponents argue that it would be better to spend the \$120 million in attacking pollution at the source by improving municipal treatment plants.

But Lake Erie can't wait until treatment plants are built or improved. In the words of Dr. Edward J. Martin, head of Cleveland's clean water task force, "Lake Erie has had it, and if we are serious about saving the lake, we just can't put another pound of stuff in it."

Opponents argue that diking will not make a frontal attack on the lake's algae problem. Federal pollution experts say otherwise. They have found that three-fourths of the phosphorus load to Lake Erie is deposited in the harbor sediments that are dredged in the harbor mouth. Keeping these sediments from the lake would be a major step in reducing the lake's major problem—overenrichment.

THE 25TH ANNIVERSARY OF THE BATTLE OF MONTE CASSINO

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. DERWINSKI. Mr. Speaker, Saturday, May 17, marked the 25th anniversary of the victorious Battle of Monte Cassino. This historical episode was achieved primarily through the efforts of the Polish Army fighting with the Allied forces in Italy.

The Polish soldiers were assigned to this task in the fierce battle along with other of our allies. With a great loss of men, the Polish flag was the first to appear on top of the abbey at Monte Cassino, thus opening the road to Rome. The best of Poland's sons sacrificed their

lives for freedom, justice, and democracy.

There is a Polish cemetery at Monte Cassino, where 1,051 soldiers slumber in peace. Somehow they have been forgotten. The cemetery is in a pathetic state and needs restoration and maintenance.

Mr. Speaker, I must add there are three other Polish cemeteries which all, unfortunately, lack proper maintenance since the brave Polish soldiers who fought so effectively in World War II have been forgotten by their compatriots among the Allies.

Thousands of miles separate us from Monte Cassino, but it is only proper to pay tribute and homage to those heroes who so courageously fought for our ideals.

We must note, Mr. Speaker, that people of Poland continue to suffer under the oppressive rule of the Russian-maintained Communist dictatorship since the Polish forces in the Allied effort were denied the opportunity to restore freedom to the homeland due to the concessions made to Stalin at Yalta by President Franklin Roosevelt.

We recognize that communism remains a threat to freedom of all mankind and Red aggression is a constant menace to peace and freedom. I am confident that the day will come that the heroic sacrifices at Monte Cassino and other battles of World War II will be rewarded with the restoration of freedom to the homeland. Freedom remains the proper goal of all the peoples held in bondage by communism and their governmental policies must have as their ultimate goal the restoration of legitimate governments and self-determination by all peoples. We will not have a world of peace and freedom until Communist tyrants lose their power.

As we mark the 25th anniversary of the Battle of Monte Cassino, we re-emphasize our belief in the ultimate triumph of freedom over communism.

CRIMES AGAINST THE UKRAINIAN PEOPLE

HON. JOEL T. BROYHILL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BROYHILL of Virginia. Mr. Speaker, on March 24, 1969, Mr. Volodymyr Y. Mayewsky, chairman of the Organization for the Defense of Four Freedoms for Ukraine, Inc., of Washington, wrote a most interesting letter to the editor of the Washington Post and several other newspapers in the Washington area.

Unfortunately, Mr. Mayewsky's letter did not receive the wide attention it deserved, particularly since he was discussing the increasing occurrence of crimes against the Ukrainian people by Communist Russia.

As I should like to make Mr. Mayewsky's comments known to all who read this RECORD, with permission I include

his letter in full at this point in the RECORD. I should also like to include the text of two articles, one from the American Ukrainian Catholic Daily of February 27, 1969, and one from the Washington Post of Sunday March 16, 1969, describing some of the crimes Mr. Mayewsky refers to in his letter.

The articles follow:

**ORGANIZATION FOR THE DEFENSE OF
FOUR FREEDOMS FOR UKRAINE,
INC.,**

Washington, D.C., March 24, 1969.

The WASHINGTON POST,
MR. PHILIP L. GEYELIN,
Editor,
Washington, D.C.

DEAR MR. GEYELIN: Last month the American press reported yet another crime perpetrated against the Ukrainian people by Communist Russia. The State Security Police (K.G.B.) on January 27, 1969, arrested in Lviv, Ukraine, the Most Rev. Wasył Welychkowsky, Ukrainian Catholic Archbishop of Lviv, and a number of Ukrainian Catholic priests.

The Ukrainian Catholic Church in Ukraine was brutally destroyed by Moscow in 1945-46, as well as the Ukrainian Autocephalous Orthodox Church, however, it continued to exist underground. Priests were ordained and bishops were consecrated secretly and religious obligations were fulfilled despite the danger of arrest by the K.G.B. It was while Archbishop Welychkowsky was on his way to hear the confession of a sick person that he was apprehended by the K.G.B.

Then on March 16, 1969 the Washington Post reported the tragic news of the Archbishop's death while under arrest. With his death Moscow added another martyr to the long list of Ukrainian Catholic and Orthodox hierarchy and clergy who perished during Stalin's regime.

The arrest and subsequent death of Archbishop Welychkowsky occurred during a wave of anti-Ukrainian Catholic acts committed by the Soviet authorities. House-to-house searches were conducted by the K.G.B. for prayer books and religious articles. The Moscow Orthodox patriarchate tightened its control over the Church in Ukraine. A number of the remaining churches in Ukraine were closed by official decree. All other religious institutions, seminaries and publications had already been abolished under Stalin's regime.

The intensification of the destruction of the Ukrainian Catholic Church in Ukraine indicates the bizarre commitment of Moscow's militant atheistic institutions to their proclamation that "by 1970, the 100th Anniversary of Lenin's birth, the Ukrainian Catholic Church will be completely crushed".

It is obvious that this renewed attack upon the Ukrainian Catholic Church, just as the K.G.B. mass arrests and incarceration of Ukrainian intellectuals and wanton destruction of Ukrainian ancient and historical buildings and archives (the latest of which was the razing of the Vydbetsky Monastery with the resultant loss of many thousand volumes of priceless Ukrainian and Jewish archives) is just another phase of the brutal design by the imperialist Russians to suppress once and for all the aspiration for independence by a dauntless Ukrainian people.

Although the Russian policy of cultural and religious genocide toward Ukrainians and other non-Russian people in the U.S.S.R. is a flagrant violation of the UN charter and the Universal Declaration of Human Rights, the UN and other proper authorities are curiously silent about this. It is hoped that our press media would voice its condemnation of the Russian genocide policy and resolutely expose this morbid political expedient.

Sincerely,

VOLODYMYR Y. MAYEWSKY,
Chairman.

[From the America, Ukrainian Catholic
Daily, Feb. 27, 1968]

**ARCHBISHOP WELYCHKOWSKY ARRESTED IN
LVIV—NEW WAVE OF PERSECUTION SWEEPS
OVER UKRAINIAN CATHOLIC CHURCH**

PHILADELPHIA.—According to reports received from reliable sources, the Soviet police (MVD) on January 27, 1969, arrested in Lviv Most Rev. Wasył Welychkowsky, Ukrainian Catholic Archbishop of Lviv. The Archbishop had gone to confess a woman in her home. Police agents followed him to the woman's home and arrested him. The Archbishop was then taken back to his apartment where a thorough search was made. When the Archbishop was being taken away, members of the sick woman's family heard one of the agents say: "You'll never see him again."

On the same day a host of other Ukrainian Catholic priests were arrested. Their names have not been disclosed as yet.

It is said that about a month and a half before the Archbishop's arrest he was visited by a man who called himself a tourist. The man spoke French and said he was a priest. He told Archbishop Welychkowsky that he had come with a tourist group and had instructions from the Vatican to find out about the activities of the underground Ukrainian Catholic Church in Ukraine. The man said that he would need to have the information recorded on paper.

It soon turned out that the man was no tourist, but an agent of the MVD. Following Archbishop Welychkowsky's arrest he was shown the written notes which he had made for the "tourist."

Following the arrest of the Archbishop, searches and arrests were made in the homes of other Ukrainian Catholic priests in Lviv and in other West Ukrainian cities.

In Stanislaw, members of the Communist Party, on instructions from the MVD, gave out lists of instructions to Ukrainian nuns. The instructions warned the nuns not to attend Masses, receive priests in their homes, baptize children, or persuade people to go to confession.

Failure to comply with the instructions would bring three years imprisonment and the loss of all civil rights.

[From the Washington Post, Mar. 16, 1969]

PRIEST'S DEATH IN RED JAIL REPORTED

ROME, March 15.—Reports circulated in church circles today that a Ukrainian Roman Catholic bishop has died in a Soviet prison where he had been confined since January 27.

He was identified as the Most Rev. Baull Welyczkowsky, about 65, who had been secretly consecrated a bishop several years ago and jailed for engaging in religious activities without government permission.

Informants said he died recently in a prison at Leopoli, in the Ukraine.

The Bishop was a member of the Redemptorist religious society. His work was said to be so secret that it did not appear in the Annuario Pontificio, the official Vatican yearbook listing all cardinals and bishops.

**THE COMING VIOLENT CON-
FRONTATION WITH SDS**

HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. WYMAN. Mr. Speaker, on the CBS television program "Face the Nation" on May 11, 1969, the national secretary of the infamous organization calling itself Students for a Democratic Society advo-

cated that student radicals arm themselves and spoke openly for revolutionary change in our society by force and violence. Asked if SDS were a part of the international Communist conspiracy this same national secretary answered:

There is a bit of truth to that—that we are part of an international movement. We all see ourselves fighting a common struggle . . . because the system we are up against is an international system, the system of exploitation of capitalism.

This is the same old line of violence supposedly justified by the oppressiveness of our social order—which, of course, is so much garbage, as well as excuse for the Communist line of violent overthrow of the existing order. But one thing is becoming reasonably clear: the simple truth that if organizations like SDS resort to guns and violence there will have to be a square confrontation with law enforcement whose obligation it is to protect society from violence wherever it comes from. In this event people are going to be hurt, perhaps even killed. Those in SDS who are contemplating arming themselves—for what?—ought to also contemplate that if they use those arms it may well turn out to be an invitation to suicide on their part.

Recently the Manchester, N.H., Union-Leader carried a reprint from the October 1968 Reader's Digest on the subject of SDS entitled "Engineers of Campus Chaos." Because of the current widespread interest in the nature, objectives, and tactics of this organization I am inserting it in the RECORD at this point:

**THE FACTS ON SDS: ENGINEERS OF CAMPUS
CHAOS**

(By Eugene H. Methvin)

During the past year, college campuses across the United States from Columbia to Stanford exploded with violence, bloodshed and arson. In the thick of this disruption was an organization of self-proclaimed radicals called the Students for a Democratic Society (SDS).

This fall, as classes resume, educators and police who once shrugged off SDS as just another band of youthful rebels are bracing for more trouble. To see why, look at a sampling of SDS's recent record. At the University of Wisconsin last fall, 70 persons were injured after an SDS-organized riot against Dow chemical Co. recruiters. At the University of Georgia, SDS-led demonstrators occupied the administration building, demanding that women students be allowed to drink and stay out all night.

At San Francisco State, they launched a rampage of looting, brawling and attempted arson of a campus bookstore, all in the name of defending four hoodlums who had beaten up the editor of the student newspaper. At the University of California in Berkeley, they deployed radio-directed students as shock troops, erected barricades and fought pitched battles with police in an assault on the Oakland Induction Center.

New York University philosophy professor Sidney Hook sums it up: "By their lawless actions, the members of SDS threaten to become the true grave diggers of academic freedom in the United States."

SALABLE LINE

SDS was activated in June 1962 by a gathering of 50 collegians at Port Huron, Mich. The organization's first manifesto was the "Port Huron Statement," a 30,000-word mildly Marxist economic critique of America. In it, the members were, in one SDSer's words, "naming the enemy and then saying how to get him."

This has proven a most salable line among the new collegiate generation. In just 14 years, America's college population has skyrocketed from 2,600,000 to seven million. Typically, at Cornell the biggest freshman and sophomore classes fell to green teaching assistants with an average age of 26; at Berkeley, 900 graduate assistants carried the instruction load in the first two years, and classes often bloated to 1500.

Thousands of students arrived on campus expecting close and intellectually enriching contact with wise professors, and instead crashed up against the increasing impersonality, the anonymity and regimented demands of today's mass universities.

Some among them began looking for a scapegoat. Yale psychologist Kenneth Keniston calls the activists a tiny minority with a "protest-prone personality." Prof. Lewis Feuer, who quit Berkeley in disgust after campus totalitarians took over, found them "possessed by a terrible, compulsive irrationality that corrupted their idealism." Another critic diagnosed this significant and talented minority as "super-idealists, unhappy because America fails to live up to its textbook image, upset because life is different from dreams."

Bored with the prospect of ordinary careers in the affluent "post-industrial" technocracy, many of these students began cranking SDS mimeographs, walking picket lines and attending SDS rallies. By mid-1968, SDS claimed to have 6300 dues-paying members with another 35,000 unregistered participants in 250 chapters, all under the direction of SDS headquarters in a shabby two-room flat on Chicago's West Madison Street.

MINISKIRTS AND MANUALS

The student who walks into an SDS meeting today hears Marxist rhetoric often virtually indistinguishable from Radio Moscow's worst Stalinist paranoia. SDS organizers denounce "oppressors," "exploiters," and the "Al Capones who run this country." The university is a "colony" of "the military-industrial complex." Members refer openly to themselves as "professional revolutionaries" whose careers are "committed to the destruction of imperialism and capitalism." SDS National Secretary Greg Calvert boasted to a New York Times reporter: "We're working to build a guerrilla force in an urban environment. We're actively organizing sedition."

Scores of those who have swallowed the SDS hook are attracted by big issues such as slum poverty, civil rights and the Vietnam war. But SDS strategy also calls for pouncing on any issue that will excite students. At Princeton it was letting girls in the dormitories, at the University of Texas the presence of a Confederate flag, at San Francisco State a food-price protest and demand to take over the cafeteria and bookstore, at the University of Chicago a controversy over draft-deferment exams and class rankings.

"Every attempt should be made to connect campus issues with off-campus questions," advises former SDS Vice President Carl Davidson. "In the high schools, raise demands to wear long hair and miniskirts, and then politicize them," prescribes a California SDSer. At Wisconsin, another reports, "We organized dormitory students around rules, and then it was easy to move them on such issues as the university's relation to Chase Manhattan Bank."

Specific suggestions for throwing monkey wrenches into the machinery of society include such tactics as: picking public fights with welfare workers; starting trash-can fires and pulling fire alarms in high schools as "forms of protest"; making appointments by the score with university deans and registrars—to "overuse the bureaucracy"; checking out an inordinate number of books to disrupt libraries and study programs; dis-

rupting draft boards by registering under a false name so "federal agents will spend much time attempting to track down people who do not exist." Such tactics are far more than youthful pranks. Their ultimate goal is nothing less than the destruction of society itself.

HOW PINK?

Though the SDS has an image of independent radicalism, mounting evidence indicates it is not as much a "New Left" as it would have press and public believe. For instance:

Communists have sat in on SDS meetings and coached organizers from the start. In turn, SDS leaders have been welcomed at secret Communist conventions.

The 1965 SDS convention repealed a constitutional stipulation barring communists from membership. Subsequently, Communist Party leaders quietly told members they "could work through SDS." Soon a Progressive Labor Party group sympathetic to the Red Chinese moved into SDS. Today the Maoist, Stalinist and Trotskyite Communist Parties abound at SDS conventions and control some SDS chapters.

SDSers maintain contacts with Communist nations through frequent foreign travels. Tom Hayden, an SDS founder and its tactical chieftain, visited Hanoi in 1965 with top U.S. Red strategist Herbert Aptheker. He has also sojourned in Moscow, Peking and Havana. In September 1967, 10 SDSers journeyed to Bratislava, Czechoslovakia, for a week-long ultra-secret powwow with Vietcong and North Vietnamese representatives. Other leaders went to Havana for Castro's International Cultural Congress last January.

A strong Communist flavor as vividly apparent at SDS's national convention in East Lansing, Mich., last June. Moved by the romantic image of Castro, delegates spouted the maxims of Che Guevara and paraded in khakis. Of the three national officers chosen, only one failed to proclaim himself a communist. Before her unanimous election as inter-organizational secretary, non-student Bernadine Dohrn, 26, was asked if she was a "socialist." Her reply: "I consider myself a revolutionary communist." At that, the audience of 500 rose in cheers.

The SDSers marched the red flags of Communist revolution and the black flag of anarchy to the dais of their convention hall. Without a ripple of dissent, speaker after speaker espoused the dogma that American society must be destroyed by constant disruption now and revolutionary "armed struggle" when the time is ripe. "The ability to manipulate people through violence and mass media has never been greater, the potential for us as radicals never more exciting, than now," one speaker proclaimed.

Behind the scenes, FBI intelligence has revealed, a secret workshop in "sabotage and explosives" dealt with what type of bomb best destroys communications and how to fire Molotov cocktails from shotguns.

Yet it would be a mistake simply to identify all SDS members as Moscow or Peking Kremlin and non-Communist. Their Common bond "is a passionate desire to destroy, to annihilate, to tear down," says FBI director J. Edgar Hoover. "To put it bluntly, they are a new type of subversive, and their danger is great."

To understand how dangerous, look at the SDS in action at the most explosive of the recent disorders—the upheaval at Columbia.

REVOLT AT COLUMBIA

Late last year, 300 delegates to the SDS National Council at Bloomington, Ind., decided to launch a national campaign they dubbed "Ten days to shake the empire." Secret caucuses picked Columbia for a "beacon" demonstration whose flare would spark a nationwide conflagration.

Field general for the insurrection was Jun-

ior Mark Rudd, who had been named SDS chapter chairman after returning from a January tour in Cuba. On March 27, he led a hundred followers into Low Library, Columbia's large-domed administrative center, and demanded that the university end its sponsorship of a defense research institute.

Ordered to appear for disciplinary action, Rudd announced that a new march would be made into Low Library on April 23. Blocked by 200 anti-SDS students on that date, he and his followers stormed into Hamilton Hall, Columbia's main undergraduate classroom center. There they imprisoned Dean Henry Coleman and two aides for 25 hours and unveiled a list of "demands" ranging from complete amnesty for Rudd and others to stopping construction on a nearby gym bordering Harlem. The next day, an SDS raiding party smashed into and occupied Low Library; later three other university buildings were seized.

Raiders broke into the university president's office, filched his files, handed out copies of his personal correspondence. They set up a "war room" in one building and coordinated activity through a network of 40 walkie-talkies, telephones and runners.

Shut out of their classes, other students were outraged. They formed a "Majority Coalition," swiftly marshaled 2,000 signatures demanding that the University president take "firm action." Said Coalition spokesman Paul Vilardi: "Students do have some reasonable complaints, but what SDS is doing to Columbia is like slitting your wife's throat because she eats crackers in bed."

But President Grayson Kirk vacillated. He suspended gym construction, and reportedly promised to end military research, even to tender his own resignation "for reasons of health." So 400 anti-protesters, wearing coats and ties as their own badge of protest, formed a human wall around Low Library offices to stop food and messengers. The radicals tried to storm through, swinging fists, but the blockaders held. Finally, with the radicals rumored to be arming themselves with pipes, staves, and bricks, Kirk sent the Majority Coalition home and asked police to clear the buildings.

At Low Library, 500 students and faculty blocked the way; at Fayerweather Hall, another 125. They screamed "Police brutality!" into grinding television cameras as police formed a standard riot wedge and charged, bloodying noses and heads. Police arrested 707—26 percent not on Columbia student rolls.

"This cop violence is good!" said Rudd. "We're going to get a lot of help." Grabbing the police-intervention issue, SDSers inveigled many former critics into joining a campus-wide strike. The Columbia faculty gave in and canceled formal classes for the rest of the school year.

But that was not the end of the Columbia tragedy. Four weeks later Rudd and his followers marched into Hamilton again. Campus gates were barricaded, and, following a peaceful arrest, fires were set in Fayerweather, and bricks were hurled at police. Someone even broke into the office of a professor who had condemned extremism, and there burned his manuscript and notes representing ten years of research.

TIME TO GET TOUGH

The sad lesson of Columbia was stated by New York Times education writer Fred M. Hechinger: "Any society, academic or otherwise, that lacks the will to defend itself against illegitimate disruption and takeover is crippled and, as a free society, may be doomed."

Indeed, the lessons must now be clear to all:

1—Students and faculty must support prompt action to maintain campus peace. At

Brooklyn College, when SDSers seized the registrar's office, other students condemned the disrupters as "today's version of Hitler's storm troopers," demanded "strict enforcement of the law"—and got it. College authorities summarily expelled the rebels, police carted them off, and peace returned to Brooklyn College.

2—College administrators must not appease or temporize with totalitarian minorities using coercion and anti-democratic tactics. Although the intervention of civil police was abhorrent to all, both students and administrators at Columbia admit that firm action taken against the first few hundred Hamilton Hall sit-ins would have avoided the escalation of protest to a university-wide strike. Before Columbia's troubles were over 5,000 students were involved, a serious clash with police had occurred, and the entire school had suffered an inestimable loss of prestige.

3—We must all support basic university reforms that are needed. Inevitably, a "knowledge factory" atmosphere has developed from the campus population explosion, with accompanying depersonalization and frustration. Educators must pay far more attention to the individual student and to legitimate, orderly expression of grievances.

Talking to educators and students around the country, I find a hopeful, growing determination that responsible, forceful action by the democratic can demolish the SDS "imperialist conspiracy" syndrome. "Students are usually idealists and in fact come to college to seek a better world by getting the best possible education," Columbia junior Jonathan Edelstein said to me. "But if we let a dictatorial extremist minority who think they have already found all the answers rob us of that opportunity, we will lose the future."

FALK OFFERS WAY OUT OF VIETNAM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. BROWN of California. Mr. Speaker, the No. 1 priority of the American Government right now should be to end our tragic military engagement in South Vietnam. All other problems facing this Nation—ranging from deployment of the Safeguard ABM to the need for tax reform and to the dismantling of the Job Corps—relate very directly to the disastrous adventurism we have been following in Southeast Asia over the past decade.

Last week's address by President Nixon was impressive only because it was his first real look at the problems of reducing our Vietnam commitment. But if the President intends to continue along a path of gradual give and take, it means only that we are in for an extremely drawn-out period of negotiation and counter negotiation. Meanwhile the fighting goes on, the killing and destruction mount.

Last month, Dr. Richard A. Falk, Milbank Professor of International Law at Princeton University, presented a logical and realistic program that will bring to a quicker close the tragedy of Vietnam. I believe Professor Falk's analysis and recommendations to be of great merit, and

I now submit his speech for inclusion in the RECORD at this point:

AN END FOR THE VIETNAM WAR: A PLAN AND A RATIONALE

(By Richard A. Falk, Milbank Professor of International Law at Princeton University, and fellow at the Center for Advanced Study in the Behavioral Sciences, 1968-69)

By now there is almost general assent to the assertion that the prospects for peace in Vietnam depend heavily on whether the United States Government can and will exert effective influence upon the Saigon regime. As matters now stand it seems evident that the government in Saigon headed by Nguyen Van Thieu will do what it can to prevent a negotiated end to the Vietnam War. It alone, of the four parties to the Paris talks, stands to gain from an indefinite continuation of the military stalemate and it alone stands to lose from changing this stalemate on the battlefield into a political compromise in the conference hall. In fact, the leadership of this Saigon regime cannot realistically expect to stay in power or possibly even to stay alive long after American troops are withdrawn, and it must and will act accordingly.

Vietnam is largely an agricultural country. As such, political control over the more than 12,000 villages of Vietnam is a basic ingredient of national power. Through the years the N.L.F. has created the kind of civil-military presence that gives it preponderant control in the countryside. So long as this control persists, and it is very difficult to dislodge, no hostile regime in Saigon can expect to exercise governmental authority in South Vietnam. Furthermore, the elections of 1967, although rigged by Saigon to a large extent, demonstrated that the Thieu-Ky group even lacked political support in the principal cities of South Vietnam. The Saigon regime is, in short, no political match for the N.L.F., and there is every reason to think that Thieu, Ky, and Huong understand their lack of popular support. The regime also knows that, without the Americans, it is no military match for the N.L.F. and so it opposes any effort to withdraw foreign troops and to remove from the scene the fantastic array of counterinsurgency weapons that the United States has brought to bear against the N.L.F. and the military units of North Vietnam.

But does the leadership of the United States understand that the Saigon regime cannot hope to survive a negotiated peace? The pursuit of peace at Paris needs to take full account of the vulnerability of the Thieu regime to peace in Vietnam. It is difficult to assess the official American attitude toward this critical issue at this stage. It seems clear that American pressure has been used to bring the Saigon regime to Paris and induced its offer of negotiations with the N.L.F. [William Shannon, of the New York Times, said that] it is President's Nixon's "guiding belief that to make peace in Vietnam with the cooperation of the Saigon regime is difficult, to make peace without it is impossible." [N.Y. Times, April 6, 1969, Sec. 4, p. 4.] My position arises from the opposite proposition—namely, that to make peace in Vietnam with the cooperation of the Saigon regime is impossible, to make peace without this cooperation is difficult. This difference in emphasis bears directly on the time needed to bring the fighting to an end in Vietnam and the stability of the political settlement reached through negotiations. On both counts President Nixon's "guiding belief" leads to bad results.

It seems important, first of all, to give some reasons for believing that the Saigon regime, as presently constituted, opposes a negotiated ending to the Vietnam War. The Thieu government opposed the original partial halt of bombing North Vietnam on March 31, 1968, and its extension to the whole of North Vietnam as of October 31, 1968; Saigon

leaders have repeatedly advocated the resumption of bombing in the North and have even threatened to do so on their own. The Saigon government effort made no secret of its obstructive attitudes at every stage of the long effort to get the Paris talks started. In South Vietnam the Saigon regime continues to promise a military victory and, most significantly, to treat as a political crime the advocacy of a negotiated compromise or a coalition government. The jails of South Vietnam are filled with non-Communist political prisoners, including prominent leaders of opposition groups, conservatively estimated at 20,000 [Fellowship of Reconciliation 'White Paper'], whose only crime is to promote in Saigon the sort of compromise settlement that Thieu and Ky say in Paris that they favor. A moderate student leader in South Vietnam, Tran Van Minh, has estimated that 95 percent of the people oppose the regime and its policies toward the war. Newspapers in South Vietnam are censored, censored, and even shut down by the Government if they urge a negotiated compromise or express support for a strategy of reconciliation. As recently as March 15, 1969, a leading Buddhist figure, Thich Thien Minh, was arrested with 50 of his followers; he has been sentenced to 10 years of hard labor. The leaders of the Buddhist Struggle Movement of 1966 remain in jail under conditions of hardship and cruelty.

Truong Dinh Dzu, the Saigon lawyer who ran a strong second to the Thieu group in the elections of September 1967, remains in jail on a five-year conviction, obviously a reprisal for his peace campaign, his strength in urban areas, and his charges of fraud with respect to the election returns. If the Saigon government has imprisoned and keeps imprisoned the principal Buddhist and student leaders and has alienated even the urban middle classes, what kind of treatment could the supporters of the N.L.F. expect to receive if they disarmed themselves? Where is Saigon's base of popular support outside a conscripted, and not notably loyal, mass army, and an exceptionally corrupt civil bureaucracy? The evidence seems overwhelming that the Saigon government does not want to run the risk of a negotiated peace and that it is prepared to do all that it can to prevent its occurrence. Otherwise, it would make no sense to prohibit and punish third force politics. If this assessment is correct, then the prospects for peace remain poor so long as Saigon's assent is a condition. The United States has, on occasion, displayed some capacity to create puppets, but almost none to manipulate them. In the Orient in particular, there is a long tradition by which weak governments allow a powerful foreigner to enter the country as an ally and then manipulate him mercilessly thereafter; the Trojan horse becomes a mouse, in effect. The United States has, for instance, been manipulated into burdensome policies against its own geo-political interests for two decades by tying its Asian policy so closely to the wishes of the helplessly dependent client regime of Chiang Kai Shek on Formosa. There is little reason, then, to suppose that we will have the tact and skill to induce the Saigon regime to act against its perceived interests. Whatever else, Thieu and his followers are Vietnamese, whose entire life-style, if not their life, is at stake. Let us, at least, not be so naive as to think that such leaders can be easily persuaded to act in the manner that we deem sensible for the service of our interests, which have at last apparently been crystallized around finding a way to turn a military stalemate into a political compromise.

There is one problem even with this more moderate United States war aim: the military stalemate has been possible only as the result of a massive U.S. effort during recent years. This effort has greatly exceeded the

support that has been given to the N.L.F. by D.R.V.; at each stage of the war, including the present one, the simultaneous withdrawal of all foreign forces on both sides would seem likely to lead to rapid political and military victory by the N.L.F., the military stalemate would be broken.

Melvin Laird, Secretary of Defense, has acknowledged as much in March of 1969 when he testified before the Senate Armed Forces Committee after recently returning from Vietnam.

Mr. Laird, while reporting to the Senate that South Vietnam now has 1,000,000 men under arms, being furnished with more and better U.S. equipment, nevertheless concluded that no U.S. troop reductions could be foreseen. In Mr. Laird's words: "The current operating assumption as stated to me is that even the currently funded modernization program for South Vietnamese forces will equip the South Vietnamese forces only to withstand the V.C. insurgents that would remain after all North Vietnamese forces had been withdrawn to North Vietnam." As a result Mr. Laird was advised by U.S. military planners in Saigon "that no reduction in U.S. personnel would be possible in the absence of total withdrawal of North Vietnamese troops." Mr. Laird conceives of "beginning" [the word alone staggers the imagination] "the development of indigenous forces which would be capable of suppressing the insurgency on their own if North Vietnamese and U.S. forces were withdrawn." This is what Mr. Laird has chosen to describe [in a *U.S. News and World Report* interview (April 7, 1969, p. 31)] as "Vietnamizing" the war, as unhappy a verbal choice as it is disastrous as a basis for U.S. policy. He explained that he preferred to describe this policy as "Vietnamizing" rather than "de-Americanizing" because in his words "[t]o many people, 'de-Americanizing' the war means that we would give up our objective, which is self-determination for the people of Vietnam. I would like to see that objective achieved by the Vietnamese people." [P. 31.]

Such a contention is so perversely absurd that it suggests ignorance rather than malice; even to mention the word self-determination in a situation in which the main progressive political forces have joined or sympathize with the N.L.F. and where the leaders of more conservative and traditional political forces are jailed as enemies of the state is to invoke an ideal whose realization has been frustrated, not advanced, by the policies we are following in Vietnam. Had the logic of self-determination ever been allowed to assert itself in Vietnam after 1954 there would never have been a war, had self-determination been our objective the war would have ended long ago and the country reunified under the modernizing leadership of the N.L.F. Let us not, after all these years, deceive ourselves at the expense of the Vietnamese. The indications are now that President Nixon's peacemaking strategy is a more moderate variant of what Mr. Laird has said. It seems based upon building up the fighting potential of the Saigon armed forces, token deescalation (say 50,000 Americans withdrawn by the end of 1969), and a long slow process of dual negotiations, public and secret. Such an approach to peace in Vietnam is inadequate. It will take much too long and it is not even likely to work. In addition, it is premised on the need to base peace on some arrangement that is acceptable to the Saigon regime. The effort to build the Saigon regime into something more than an isolated military apparatus has been the illusion that so many pre-Nixon Vietnam policies were fastened to. It has been neither a worthwhile or an attainable objective in the past. It is certainly not worthwhile now, and it is probably not attainable either, at least not without several more years of bloodshed and ravage. To

sacrifice more lives because so many have been lost already is to compound the error, not to vindicate the commitment. President Nixon seems, against his evident will, to be drifting into an approach to Vietnam resembling his predecessors, an approach that will bring neither a military victory nor a political settlement, but merely a cruel continuation of a military stalemate, that routinely entails 1600 B-52 bombing raids per month against utterly defenseless, and often heavily populated, target areas throughout South Vietnam.

But how can a political compromise be sustained in a setting where the adversary, the N.L.F., possesses the only national structure capable of both fighting and governing in South Vietnam? The Saigon regime has no actual and little potential political base; it might eventually be able, with its huge armies and payroll, to rule, if not to govern, the country in the absence of the N.L.F. But whatever else, the N.L.F. is not absent, and it will not, after years of struggle and sacrifice, allow Saigon to rule South Vietnam. It is barely possible that third force groups, especially the Buddhists in conjunction with the urban middle classes, if given a measure of political freedom, might be able to organize a political party that was capable of governing or sharing power with the N.L.F., but such third force groups would lack all capacity to rule or to offset N.L.F. military pressure. Only a coalition between the third force groups and the civil-military bureaucracy would have a reasonably secure counter-structure with some prospect of power-sharing with the N.L.F. But such a coalition is impossible so long as the generals in control of the Saigon regime keep moderate politicians in prison. And, in fact, it seems impossible unless the Saigon regime itself changes its character and outlook; even then any effort at this stage to coalesce a counter-structure to the N.L.F. is up against immense odds. The N.L.F. has existed for many years, has superb organization, and has established an apparent unity of purpose that has retained its sharp focus through all these years of fighting a war of great destructive magnitude. The N.L.F., although more diverse than most Americans realize, is itself presently trying to broaden its political base to preempt the third force option. This broadening has involved cooperation with the Alliance of National, Democratic, and Peace Forces, an urban coalition founded by eminent leaders of civic life in Saigon and Hue after Tet, 1968, and it has involved an indicated policy of reconciliation and cooperation with diverse, even antagonistic, forces. One would expect the N.L.F., even more than the Saigon regime, to oppose the formation of an effective counter-structure in the closing stages of the war; without the existence of such a counter-structure the prospects of a power-sharing compromise contribute a thin veneer to disguise the realities of political defeat for the anti-N.L.F. forces in South Vietnam. There is no way to overcome this underlying political imbalance in South Vietnam by military means.

The American military effort, despite its scale and savagery, cannot expect to do more than prevent victory by the N.L.F. By being able to destroy any concentration of people and dwellings identifiable as "enemy-held," the United States can successfully thwart, punish, and deter N.L.F. strategies of "liberation," especially if directed at cities and "liberation" is destruction and the N.L.F., however hard it is for the Americans to accept, are, unlike their Saigonese opponents Vietnamese patriots that do not act to invite unnecessary destruction of their country. The N.L.F. has often deliberately avoided visible liberation of government-occupied territories. Informal arrangements between A.R.V.N. and N.L.F. are common in the countryside where the former pays taxes

and, sometimes, give supplies in exchange for a pledge of no-attack. These arrangements, so bewildering to Americans, have been described in convincing detail by Katsuichi Honda in a series of articles for the middle-of-the-road Japanese newspaper *Asahi Shimbun*; these articles are available in English translation and should be read by as many Americans as possible.*

By any normal test, the N.L.F. has won the war in Vietnam. Henry Kissinger, the Presidential Adviser, writing about Vietnam shortly before his appointment to office, suggested as "one of the cardinal maxims of guerrilla war" the proposition that "the guerrilla wins if he does not lose. The conventional army loses if it does not win." [Kissinger, "The Viet Nam Negotiations," 47 *Foreign Affairs*, 211, 214 (1969).] The United States has acted only to prevent an N.L.F. victory, hence the guerrilla has not lost; hence it has won. It is essential to grasp these facts of underlying military and political imbalance that are critical for any sense of what constitutes a reasonable settlement for Vietnam.

The United States is clearly able to inflict fantastic losses on the N.L.F. and to devastate Vietnamese society in the process of denying victory to the N.L.F. To stop this process of destruction is clearly in the interest of the N.L.F. and D.R.V., as well as ourselves. In fact, the bargaining position of the U.S. rests on its ability to stop what it is doing and get out. It does not rest on the existence of a real counter-structure to the N.L.F. that might make a genuine political case for transferring a stalemate from the battlefield to the political process. Therefore, a political settlement will, at best, be fragile as its implementation would necessarily depend on the part of the N.L.F.-D.R.V. Once U.S. forces leave Vietnam the survival of a political compromise, because of the realities of power in the country, is probably at the sufferance of the N.L.F., for the reasons outlined above: namely, that no counter-structure to the N.L.F. will have emerged and no over-balanced military counterweight will remain. But the alternative to acknowledging this situation is to go on with this barbaric war to no effect. The incentives for N.L.F. restraint in such circumstances would relate to maintaining whatever settlement process was agreed upon. If there was no prospect of a seizure of control by anti-N.L.F. forces in the course of regroupment and internal disarmament, then I think there is reason to believe that the N.L.F. leadership would not disrupt the formal settlement procedures, although the possibility of struggles among various Vietnamese groups cannot be entirely excluded. Incentives to induce compliance by the Governments in North and South Vietnam could be woven into the settlement process, especially in relation to the receipt of economic assistance for reconstruction, trade and aid, and progress toward reunification. We should understand, however, that the N.L.F. is almost certain to hold the balance of power in the South and the N.L.F.-D.R.V. in the country as a whole after the war ends. Ho Chi Minh and his government remains the transcendent expression of national liberation and unity for all of Vietnam, his ideological identity being a matter of secondary importance. The patriotic struggle for national autonomy and freedom has been carried on for several decades under the leadership of Hanoi, and it is this struggle,

*It is possible to obtain copies of Mr. Honda's two pamphlets, "Vietnam—A Voice from the Villages" and "The National Liberation Front—the so-called Viet Cong" by sending to The Committee for the English Publication of "Vietnam—A Voice from the Villages," 13-7 Nishitaka 2 Chome, Bunkyo-ku, Tokyo, JAPAN. There is a small charge depending on the quantity ordered and whether copies are sent by air or sea mail.

not its Western perception as a conflict between Communists and anti-Communists, that remain dominant in Vietnam today.

The conflict going on in Vietnam (and elsewhere in the ex-Colonial world) is clarified by distinguishing three outlooks:

1. Colonialist and/or neo-colonialist
2. Anti-colonialist and traditionalist
3. Anti-colonialist and modernizer

In the first category are Vietnamese who benefitted or identified with the colonial system or its neo-colonial sequel in the South, people who have willingly fought for both the French and the Americans. Many members of the ruling group of generals in Saigon have had this background, as do most leaders of the Catholic Church in Vietnam, and some large landholders. Others, most prominently Ngo Dinh Diem, Premier from 1955 until his assassination in late 1963, belong in the second category; they were anti-French, but sought to maintain intact the traditional social order of Vietnamese society based on a feudal structure of social, economic, and political privilege. The social conservative and traditionalist is likely to have been anti-French, but pro-American. In the third category are those Vietnamese who seek radical social reform, a strong central state, and a major effort to build rapidly a modern industrial state in Vietnam. In the North this third position has, of course, prevailed, being facilitated by the strong anti-colonial leadership of Ho Chi Minh that succeeded in mobilizing a wide united front in opposition to the French and organizing an effective government thereafter. In the South as a consequence of the transitional arrangements agreed upon in 1954 at Geneva, a regime was installed that was nationalist in orientation, but far less concerned with nationalist goals than with the preservation of the traditional social order of Vietnam. As a consequence, when the struggle for control broke into the open this type of Vietnamese leader accepted a neo-colonial presence in the form of American support to avoid losing power to the more radical elements in the South that began to coalesce around the N.L.F. in the early 1960's after the Diem administration made it apparent that any reformist orientation would be subject to rigid repression. The perception of the conflict in Vietnam has been distorted by the fact of the Nationalist cause in the revolutionary war against the French and by the strong political significance of the ethnic minorities in the South. To the United States Government from 1950 onwards, that is, during the colonial war with the French, the radical ideology of the Vietminh and their presumed affiliation with the international communist movement has been the prime feature of the conflict, inducing our high level of economic support for the French colonial cause (the U.S. was paying 80 percent of the cost of the Indochina War in its closing years and in the spring of 1954 the United States tried to organize a cooperative Western military intervention on behalf of the French). Some conservative groups, including the leadership of the Catholic Church, tended to confirm this view of the first Indochina war, preferring colonial status to a communist orientation.

At best, Catholic leaders, like Diem himself, preferred exile to allegiance in the war of independence. On the other hand, many Vietnamese placed, and continue to do so, the struggle for national autonomy and unity far above other values, including the post-colonial orientation of the government, and for them Ho Chi Minh is a great revolutionary hero, and whether or not he is a Communist as well is of far lesser importance. For others, the importance of the anti-colonial movement does not end with the achievement of national independence, but must go on to destroy the traditional structures of domestic society and initiate the work of reconstruction and modernization. Again, the political ideology of the modern-

izing elite often seems less important than its commitment to these tasks. After 1954 the Diem regime in the South sought to build a strong national state without seeking to disturb the traditional structures of Vietnamese society. This brought that regime into sharp conflict with the religious sects and ethnic minorities who sought, above all else, to retain their autonomy over the affairs of their quite distinct groups; also Diem abolished elections at the village level and thereby undermined the most meaningful form of political participation for most Vietnamese in their society of villages, a form of political participation that had even existed during the colonial period. As a consequence, Diem's form of Catholic nationalism, while traditionalist in socio-economic policy, had the effect of alienating both the ethnic and religious minorities and the rural population, or, that is, most of South Vietnam. The Thieu regime has corrected some of these centralizing tendencies of Diem without threatening the traditional social and economic structure of the South, and has thereby gained some support, at least as expressed in the 1967 elections, from such ethnic minorities as the Montagnards and Chams and from such religious sects as the Cao Dai and Hoa Hoa.

The N.L.F. is both a centralizing and modernizing radical minority that threatens to break down the traditional structures of the South with a radical program of land reform, widespread public education, mass political movements, and a high degree of centralism and conformism. But the key point, so often lost on Americans, is that the Communist leadership of the N.L.F. is secondary to the struggle between traditionalism and modernism that is going on in the South. Because the traditionalists were either pro-French or aloof from the colonial war their side has been comparatively weak throughout Vietnamese society, progressively weakened in the years since 1954 because of their dependence on outside, foreign help—leading to the creation of an extreme neo-colonialist situation in which many more Western troops are in the South at far worse consequences for Vietnam than at any time during the French period.

The legitimacy of the nationalist element in the original Diem position was soon lost as a consequence of growing American prominence in South Vietnam; the issue of anti-Communism became virtually the sole rallying cry of those Vietnamese on our side (with the limited exception of certain ethnic minorities who fear a loss of their autonomy if traditional Vietnamese society is changed). For most third force groups concern about the threat of Communism is far less significant, especially at this stage in the conflict, the attainment of peace and national autonomy (the expulsion of the foreign invader is the recurrent theme and source of national glory throughout Vietnamese history); it is for this reason that even non-Communist political groups, including such socially and economically conservative groups as the Buddhists, are left-leaning in the sense of preferring to risk an N.L.F. victory rather than endure a continuation of the war under Thieu's leadership; hence, the regime's suppression of these groups and hence its inevitable political isolation. The Thieu government has by now alienated, if not worse, virtually all anti-colonial and anti-traditionalist elements in Vietnamese society. The explanation of this alienation is at the root of the weakness of the Saigon regime and helps to explain why it can never hope to survive peace or the departure of the Americans. De-Americanization is thus a cruel hoax, prolonging the agony without altering the political situation. No American effort, whether military or political, can overcome this fundamental loss of appeal and legitimacy by the Thieu government, and they know it. To suggest, then, that Vietnamese self-

determination can be promoted by "Vietnamizing" the war, that is, by increasing the military capability of the Saigon regime, as Mr. Laird suggested, is to reveal how deeply we misunderstand what we are doing in South Vietnam. By now, we should at least realize that the largest obstacle by far to Vietnamese self-determination is, and has been all along, American support for Saigon.

AN OUTLINE OF A PROPOSAL TO END THE WAR IN VIETNAM

We are left, then, with the overwhelming question: How, in light of this analysis, can the war in Vietnam be brought to an end? It is generally conceded that the United States Government is unwilling at this stage to admit its mistakes and withdraw honorably from the war in Vietnam. Too much blood, too much treasure has been wasted to say so. Too many American reputations, fortunes, and careers have been and are continuing to be built on advice to Saigon and Washington about how to defeat the N.L.F. Because the error has been so momentous the scandal must be disguised. This is the initial somewhat alarming critical fact that a proposed settlement must encompass if it is to have any prospect of being acceptable. The second critical fact is the acknowledgement that there is now no way to win the war for Saigon. More blood, more treasure will produce more devastation, but not victory for the American side. As it is, Vietnam is being devastated at a rate that no country has ever endured over such a long period. We use cruel and superior weapons to inflict heavy casualties on the Vietnamese and then complain bitterly about their tactics that produce our own far smaller, but still very considerable, losses. The military-political consensus in Washington now seems built around the proposition that, although we cannot defeat the N.L.F., we can and should indefinitely prevent its victory. This military stalemate is costly in many ways and, therefore, the incentive to find a political settlement that preserves the military standoff—no N.L.F. victory—is high. The United States Government has seemed increasingly ready since March 31, 1968, to find such a negotiated compromise, but not on realistic terms. To keep the government of Thieu-Ky-Huong in power is *not* to achieve compromise. A compromise entails a power-sharing setup that corresponds to the political and military realities of Vietnam. It is essential that policy-makers in Washington begin to define a compromise in these terms.

The third critical fact is that the assured prevention of an N.L.F. victory in peace is even harder than has been the prevention of an N.L.F. victory in war. Given the political imbalance—the strong anti-traditionalist, anti-neo-colonialist majority—it is hard to believe that a compromise would hold up after American troops left Vietnam. Therefore, Washington searches for some way by which the imbalance can be effectively denied expression, that the real dominance of the N.L.F. will be somehow kept from view in the postwar period in Vietnam. Such a search is in vain so long as third force politics are repressed by Saigon. And, of course, for the Saigon regime more than their reputations are at stake—their positions of power, and quite likely their lives would be placed in severe jeopardy, in such jeopardy that no amount of reassurance on our part or security on their part could produce confidence. And it is for this reason that the Saigon regime cannot risk peace, especially if peace entails disarming their forces and losing unilateral control over police and militia units. And unless peace implies this, the N.L.F. would have to be wildly self-destructive to participate in the arrangement.

A proposal for peace in Vietnam needs to take these considerations into account. The United States Government requires some bargaining leverage in relation to both the N.L.F.-D.R.V., but even more so, in relation

to the Saigon regime. This leverage cannot be acquired by escalation or by prolonging the present level of stalemate. Deescalation is the only way to acquire diplomatic leverage in relation to both sides in the Vietnamese struggle: for Hanoi and the N.L.F., the process of deescalation is itself a prime goal as it involves, above all else, the partial withdrawal of American forces from Vietnam; for Saigon, deescalation is a way of underlining the writing already on the wall, either the regime comes to support the search for a compromise settlement, tendering its good faith by releasing the non-Communist political prisoners from jail and providing an atmosphere for the practice of third force politics, or the Americans will indeed go home and leave the regime exposed to their N.L.F. and other adversaries. Deescalation is a process and an attitude, not a single event located in time. Hence, one side—the N.L.F.—D.R.V.—has an incentive to strengthen the process and reward the attitude and the other side—the Saigon regime—has the incentive to stop or slow the process and undermine the attitude.

Significant deescalation is critical to a rapid settlement of the war. To illustrate this position I have prepared an outline of a settlement plan designed to suggest a direction of approach. The plan is divided into three stages and has the following main elements.

Stage I. Incremental Withdrawals: In Stage I the United States would initiate the withdrawal of its troops at a rate of between 50,000 and 100,000 every two months. The rationale of this process of withdrawal should be allowed to remain publically ambiguous. By more quiet channels of diplomatic communication withdrawal should be loosely linked to some kind of reciprocal behavior by the North Vietnamese, at least to the extent of the expectation that the D.R.V. would refrain from major combat drives or from increasing markedly the rate of infiltration. The United States should make it clear that certain kinds of D.R.V. initiatives in the war would lead to the termination, possibly even the reversal, of the withdrawal process. In our relations with Saigon we should convey the intention to continue the process of withdrawal until the regime has been dramatically liberalized, political prisoners released, and third force political activity allowed. At this point, negotiations in Paris would be more likely to achieve agreement on a political settlement as Saigon would come to realize that a bargain, however risky, was preferable to defeat. It is true that such a withdrawal process might lead to the collapse of the Thieu regime, possibly even to its sudden abdication from power. But, in my judgment, this would be a positive achievement of the policy, not a sign of its failure. The Saigon regime is not fit to govern South Vietnam or even to share in this process. Incremental withdrawal is a stage-setting prelude to a negotiated compromise that might disguise the American defeat in Vietnam for a reasonable length of time.

Phase II. The Shape of Settlement: There are several central elements in a negotiated compromise of the sort that should be attainable in Paris:

(1) The completion of the process of withdrawal of foreign troops; perhaps on an informal basis, perhaps more formally; reconnaissance capabilities could monitor any agreed rate of withdrawal without the need for any more complicated apparatus of inspection;

(2) The establishment of a partial cease-fire by agreeing to stop offensive (or initiated) operations in certain areas and by stopping certain kinds of military operations; the gradual enlargement of the cease-fire until it becomes total at a fixed date;

(3) The regroupment and disarmament of N.L.F. and A.R.V.N. main-force units in various areas, separated from each other, but not in a form that would encourage the partition

of the country. This process might be observed and reported upon by an augmented International Control Commission.

(4) The formation of a South Vietnamese provisional government that includes strong representation on the part of three groups: the N.L.F., the army and civil service, and the third force constituencies, especially the Buddhists and the urban civilian classes. The Minister of the Interior in this provisional government should be a third force political figure of prominence who would be entrusted with control over police functions. The composition of the provisional government would be determined, if at all possible, by agreement among representatives of the three principal political groupings in South Vietnam and ratified through formal declarations issued on behalf of the United States and North Vietnam;

(5) A schedule and procedure for holding elections based on free political competition and certain common rules of campaigning. Elections should be held in stages: first, on a village level; second, on district and province levels; and third, on the national level. An International Election Observation Commission (IEOC) could be established to observe and report on the conduct of these elections; it would be staffed and funded on an agreed international basis and would include observers from each major Vietnamese political party. The national elections would be held within two years after the date of a formal cease-fire was declared, unless a majority of the IEOC postponed the date of the elections for reasons given in an accompanying public report. The growth of constitutional democracy should not be insisted upon at the cost of other elements of peace in Vietnam;

(6) The parties to a final settlement would make a pledge of amnesty, all prisoners would be released and exchanged, and guarantees against reprisals would be made. The United States, and possibly other countries, would agree to offer asylum for South Vietnamese applicants up to 10,000 in number. A second observation group—International Peace Observation Group (I.P.O.G.)—should be constituted to investigate and report upon allegations of reprisal. After a civil struggle of such cruelty, bitterness, and duration, there are almost certain to be, especially at local levels, some reprisals in the struggle to repay old debts or to eliminate economic or political rivals from the scene; the effort of the IPOG should try to keep reprisals at a minimum and to prevent claims and counter-claims about reprisal activity from disrupting the settlement process.

(7) The United States should pledge \$1-2 billion per year for a minimum of three years for the economic reconstruction of war-ravaged Vietnam, both North and South. The funds should be administered by a small agency staffed by international civil servants and allocated for peaceful purposes according to proposals and priorities determined by the two Vietnamese governments. The Soviet Union, and possibly France, West Germany, and Japan, might also be encouraged to contribute funds in this manner for Vietnamese economic reconstruction.

(8) The reunification of Vietnam shall proceed according to a schedule determined by voluntary negotiations between the two governments of Vietnam, but not commencing until after the elections of a national government in the South. In the event that elections are not held in the South, or that the elected government is overthrown in some way, then reunification can be negotiated, provided it does not take formal effect prior to five years from the formal declaration of a cease-fire in the South. In the meantime, South Vietnam will follow a neutral foreign policy, enter no military alliance, allow no foreign bases or troops on its territory, and receive no foreign military assistance except that needed for internal police security. Relations between the North and

South will be normalized within 3-6 months after the cease-fire goes into effect, allowing free travel, trade, and relations between both parts of Vietnam.

(9) The settlement of the Vietnam War will be agreed to by the N.L.F., D.R.V., U.S., and representatives of the provisional Saigon government. This settlement will, in turn, if possible, be guaranteed by an international conference of principal states, including China, Japan, India, the Soviet Union, and the United States. At this conference an effort would be made to agree on a code of principles for the maintenance of peace in Asia.

Phase III. Sustaining Peace:

(1) The two observer groups could be withdrawn, in whole or in part, at the discretion of the elected national government in the South or, in the event national elections are not held, at any point subsequent to three years after the cease-fire is proclaimed;

(2) An annual conference of the guaranteeing parties would be held to review progress toward implementing the Vietnam settlement and toward peace in Asia. Particular attention would be given to the possibilities of neutralization of countries that seem vulnerable to civil strife and to competing interventions. A status of neutralization would not be imposed on any country unless its constituted government sought such a status and retained the right to terminate its neutralized status after three months' notice;

(3) Efforts would be made to develop normal diplomatic, economic, and cultural relations between the United States and all Asian countries, including North Vietnam and China. Offers of genuine compromise and peaceful settlement should be made with respect to disputes about the future of Okinawa and Formosa. The United States and the Soviet Union should pledge action to sponsor application for membership in the United Nations for all states that are presently non-members, including divided countries.

A CONCLUDING COMMENT ON THE PLAN OF SETTLEMENT

The outlines of this plan have been given in a general form. More detailed provisions would obviously be needed to implement this proposal. The plan is conceived of as encouraging a process of settlement that would continue even if disrupted in certain particulars. Not too much attention should be given to the provision for national elections. Few Asian countries have truly elected governments, and the polarities of South Vietnamese society make it less susceptible than most countries, even in the absence of decades of civil struggle, to the procedures of popular democracy. Certain important related problems, such as the settlement of the Laotian War, are here left out of explicit account. It is hoped that progress toward peace in the wider combat area of Southeast Asia could be achieved at the Conference of Guaranty or in some other more suitable diplomatic forum. As in Vietnam, however, internal struggles of revolutionary intensity are bound to continue between the forces of tradition and the forces of radical change throughout the post-colonial world. These forces of radical change may or may not be identified with Communist ideology in one of its several forms. In any event, these struggles will be determined primarily by the national conditions of each particular country, and efforts to reverse a political outcome by military intervention are bound to be costly and unlikely to be successful in any permanent sense. In fact, to intervene on behalf of the traditionalist faction is to revive the colonial phase of the struggle and shift those elements of a society which are nationalistic into the opposition. In the post-colonial period, unless a radical elite took control during the course of decolonization, there is almost certain to be a radical challenge directed at the traditionalist structure of the national society once independence has been achieved. Without such a challenge, poverty,

disease, famine, and stagnancy are almost certain to dominate the national scene.

HAVE WE LEARNED ANYTHING IN VIETNAM?

If we are ever to understand the Vietnamese experience it is essential that War is to perceive clearly both phases of the revolutionary struggle; the first, to eliminate foreign influence and control and to restore the attributes of national independence; the second, to eliminate the traditional, feudalist power structure and to reconstitute the domestic political order so that modern economic and social policies can be pursued. No national revolution is complete until it passes through both phases, although the rate and form of passage will vary greatly depending on national circumstances, and especially depending on the domestic ratios of power. This kind of disruptive process is going on throughout Asia, Africa, and Latin America. Communist and other ideologies try to relate to these fundamental pressures for change, but the realities and equities of a particular national struggle depend not on the abstract rhetoric of the cold war, but on the capabilities and backing of contending national factions. As yet, there is little evidence that revolution in the third world is understood in these terms.

Two years ago McGeorge Bundy, one of the early architects of the escalated American involvement in Vietnam, including the extension of the war to the North, commenting on American foreign policy, said that "There are wild men in the wings, but on the main stage even the argument on Vietnam turns on tactics, not fundamentals." [Bundy, "The End of Either/Or," 45 *Foreign Affairs* 189-201, 191 (1971).] The argument is on fundamentals, and it is the wild men like Mr. Bundy, sadly enough, who continue to occupy the main stage. Mr. Bundy, in what was presented as a dramatic change of view, speaking at De Pauw University in October of 1968 urged that the United States deescalate its involvement in Vietnam and, in effect, de-Americanize the war. His emphasis was on the costs to American society of continuing the war: "Until the present burden of Vietnam is at least partly lifted from our society, it will not be easy—it may not even be possible—to move forward effectively with other great national tasks. This has not always been my view, but . . . it seems to me wholly clear now that at its current level of effort and cost the war cannot be allowed to continue for long. Its penalties upon us all are much too great." (De Pauw, p. 2.) Mr. Bundy says that he no longer thinks we can have both unlimited expenditures for butter and guns, and the time has come for more stress on butter. And lest he be understood as a sudden convert to matters of principle Mr. Bundy made plain that his change of position on Vietnam was a pure matter of expediency: "I remind you also, if you stand on the other side, that my argument against escalation and against an indefinite continuation of our present course has been based not on moral outrage or political hostility to the objectives, but rather on the simple and practical ground that escalation will not work and that continuation of our present course is unacceptable." There is not even a pretension of moral concern for the suffering of Vietnam brought on by the policies he advocated with such vigor a few years earlier, nor even any humility expressed with respect to the wrongheadedness of a policy that misjudged the basic character of conflict in Vietnam.

Even so ardent a liberal critic of Administration policy in Vietnam as Arthur M. Schlesinger, Jr., has written in March of 1969 that "The tragedy of Vietnam is the tragedy of the catastrophic overextension and misapplication of valid principles. The original insights of collective security and liberal evangelism were generous and wise." ["Vietnam and the End of the Age of Superpowers," *Harpers*, March 1969, pp. 41-49, 44.]

McGeorge Bundy and Arthur Schlesinger epitomize the liberal establishment in mid-century America. It is a pragmatic intelligence that does not allow its self-righteousness to fasten itself onto dogmas and rigid positions in the manner of Dean Rusk and Walt Rostow, but it is utterly numb when it comes to dealing with the senseless tragedy that we have inflicted on the Vietnamese and ourselves. It is numb to the suffering we have caused and it is blind to the realization that we are continuing to arm a government we imposed on South Vietnam for our purposes so that it can better fight against its own population in the name of self-determination.

We will learn nothing from the Vietnam war until we begin to listen directly to the Vietnamese victims of our policies. Eventually we may be able to listen to the leaders of the N.L.F. and discover that they are not demonic terrorists of a hardened Communist variety, but intelligent, dedicated Vietnamese patriots that want above all else to be given a chance, at last, to build a new and better Vietnamese society for their long-oppressed population and that they see some form of socialism as the best way to do this.

Perhaps Americans are ready to listen to those Vietnamese that have been caught in the middle during the war, have not joined up with the N.L.F., but have advocated some kind of peaceful settlement of the war. One of the most moving of these Vietnamese documents is a recently translated article of a student leader writing with the pen name Nguyen Van Minh, who supported the Buddhist Struggle Movement and has been in prison for several years. [*The Nation*, March 24, 1969, pp. 359-62.] Nguyen Van Minh estimates that as many as 95 percent of the people living in South Vietnam are enemies of the regime in the sense of favoring a negotiated compromise with the N.L.F. It is in this darkened light of overcrowded jails that we must hear the new Secretary of Defense, Melvin Laird, when he insists that our objective in South Vietnam is to secure self-determination for the people.

The future of America depends on coming to terms with who we are in light of what we have done and allowed to be done in our names in Vietnam. The argument about Vietnam does concern fundamentals, not tactics; if we are to rescue ourselves from militarism and racism, then it is the McGeorge Bundys and Arthur Schlesingers who must be driven from the main stage. We need principles, as well as tactics, to conduct our foreign policy in the nuclear age. It is time for America to stop fighting against the forces of revolutionary nationalism around the globe, it is time to abandon the cruel pretension that popular causes can be suppressed by the hardware and doctrines of counterinsurgency warfare, and it is time to redeem the future by acknowledging that what we have done in Vietnam has been not merely a mistake but a tragedy. It is a time for action, not mute acquiescence. We are further dishonored as individuals and as citizens of the United States each day that we allow the government to continue this war in Vietnam in our name.

COMMERCIAL CHURCH PROPERTIES VALUED AT \$102.4 BILLION ESCAPE \$2.2 BILLION IN TAXES ANNUALLY

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. EVINS of Tennessee. Mr. Speaker, the Reader's Digest in a current article discloses some interesting facts and sta-

tistics with respect to church-operated businesses which enjoy tax-exempt status although their activities have no relationship to the religious function of churches.

This article discloses that the value of tax-exempt church real estate property has been valued at \$102.4 billion and that this costs the American taxpayer \$2.2 billion annually.

This article reports that church-operated businesses include motels, hotels, business properties, restaurants, radio stations, manufacturing and food processing plants, and racetracks, among other businesses—all of which operate with tax-free profits.

Because of the interest of my colleagues and the American people in this most important matter, I place in the RECORD herewith the article from the Reader's Digest entitled "Should Churches Be Allowed To Do Business Tax Free?"

The article follows:

SHOULD CHURCHES BE ALLOWED TO DO BUSINESS TAX-FREE?

(By O. K. Armstrong)

In 1952, three churches of Bloomington, Ill.—the First Baptist, the First Christian and the Second Presbyterian—bought the Biltmore Hotel in Dayton, Ohio, for \$3,500,000, mostly on credit. They then leased back the hotel to a firm made up principally of the original owners. This firm operated it, paying the churches \$250,000 annual rent. For the churches, this was tax-exempt income, and they used part of it to pay off the purchase.

This type of transaction is often called a "bootstrap sale" because in effect the business buys itself. The advantages? As tax expert H. Vernon Scott has pointed out in testimony before the House Ways and Means Committee: 1) The seller is able to ask a higher price for his business than he could get elsewhere, and so realizes a big profit—taxed at the low capital-gains rate. 2) The leasing corporation gets a high return on a small investment. 3) The church gets a profitable business—and the income, tax-free—with no risk and little if any investment. Everyone benefits except the government, which loses a source of tax revenue, and all citizen-taxpayers, who must take up the slack.

The whole procedure is entirely legal. It is a tax-avoidance plan for the business enterprise, which the church covers with the blanket of its own tax exemption. The Internal Revenue Code specifically permits churches—unlike other tax-exempt organizations such as orphanages, charitable foundations and hospitals—to engage in competitive, money-making businesses, unrelated to their religious purposes, without paying one cent of income tax. Further, churches are excused from filing any disclosure of properties or income of any kind.

Taking advantage of these provisions, numerous churches and religious orders have plunged into the world of business—by lease-back arrangements, by use of "feeder" corporations (set up to run a business and give all profits to the church), by direct ownership and operation of commercial ventures. They now own business blocks in every major city. They own apartments, restaurants, radio stations, manufacturing and food-processing plants, racetracks, even liquor stores. They produce plastics, textiles, dairy products, tires, trucks, fishing lures. And the profits are all tax-free.

BEHIND THE FAVORABLE DISCRIMINATION

According to the 1968 *Yearbook of American Churches*, there are about 240 religious bodies in the United States. They have a total

membership of about 124 million—or 62 percent of all Americans. The members worship in some 330,000 sanctuaries, from cathedrals to small houses, and give an estimated \$9 billion a year to these headquarters.

The First Amendment to the U.S. Constitution prohibits the government from passing laws "respecting an establishment of religion." And since the power to tax implies some power of control, traditionally houses of worship have never been taxed in America. Moreover, all 50 states and the District of Columbia specifically exempt from property taxation all sanctuaries and other facilities used for religious purposes.

However, property—whether real or personal—used by churches for competitive business enterprises has no constitutional basis for exemption from taxation. The laws which permit this favorable discrimination can be changed, and many responsible religious leaders, as well as many overburdened taxpayers, now urge that it be done.

Church business ventures generally fall into one or more of these three categories:

1. *Real Estate.* By analyzing the tax rolls in 14 U.S. cities and extrapolating from those figures, Dr. Martin A. Larson, author of the authoritative *Church Wealth and Business Income*, has estimated the value of tax-exempt church property in 1968 at \$102.5 billion—up 26 percent in the last four years. Larson computes that this item alone, the tax exemption on real estate, cost U.S. taxpayers \$2.2 billion last year!

In some states, church-owned businesses do pay a property tax; in others, they are exempt even from this assessment. Many churches have acquired large tracts of real estate. In 1939, a church purchased a 121-acre tract near New Britain, Conn., and after one body was buried in the tract, the land was classified as a cemetery, which reduced its taxes. In 27 years, the land appreciated in value many times over. All but ten acres of it was then sold to the city, at a high profit to the church—completely exempt from capital-gains taxes.

In downtown Chicago stands the 22-story Chicago Temple, owned by the Methodist Church. Several lower floors are used for worship and church-related purposes; the other floors are rented for commercial use. The Methodist Church pays a property tax on the commercial portion of the building—but no federal income tax on the rent receipts of \$250,000 a year.

Many church-related colleges have state charters stipulating that their properties shall remain forever tax-free. William Jewell College, for example, a Baptist-related school at Liberty, Mo., owns business realty in many Missouri communities—all tax-exempt.

Hundreds of such investments are speeding the erosion of the tax base in communities across the country, at a time when the revenue need for schools and other essential public services has become acute. "If the trend is not checked, we may expect half or more of all property to be tax-exempt within 25 years—and more than half of that will belong to churches," says C. Stanley Lowell, associate director of Americans United for Separation of Church & State.

2. *Profit-Making Enterprises.* Each year, churches acquire millions of dollars' worth of property through gifts and bequests: securities, real estate, thriving businesses. Their tax-exemption advantage makes it tempting for the church to retain and operate the business enterprises. In addition, churches sometimes invest directly in secular businesses.

The Cathedral of Tomorrow, an independent church in Akron, Ohio, owns a shopping center, an electronics company, a plastics and wire plant, an apartment complex, and a girdle factory. A trappist monastery in Kentucky sells fruitcake, cheese, Canadian bacon and beef-sausage sticks by mail. A church organization owns two major

garbage dumps outside Chicago, and leases them to a refuse collector.

Christ's Church of the Golden Rule, near Willits, Calif., purchased a luxurious ranch—once the home of Seabiscuit and other famous race horses. The church members (some 125 in number) live there while operating it as a business. They also own and operate a \$500,000 motel and several other enterprises, all exempt from federal taxation.

Printing of publications for Evangelical United Brethren churches (recently merged into the United Methodist Church) used to require most of the space of a four-story building in Dayton, Ohio. When improved printing methods made much of that space redundant, the denominational officials obtained contracts to print a brand of trading stamps.

The money involved in these business operations can be considerable. In Washington, D.C., Watergate, a new \$70-million high-rise luxury apartment complex beside the Potomac River, was financed by an Italy-based real-estate company in which the Vatican is said to have controlling interest. Profits accruing to the church in this venture are exempt from federal taxes.

There are now some 2200 tax-exempt nursing and retirement homes in operation. Where these are operated for the welfare of needy patrons, on a non-profit basis, they are properly tax-exempt. But increasing numbers of churches are using their tax-exempt status to turn them into money-making enterprises. In some cases, entry fees may run as high as \$50,000, plus monthly charges of several hundred dollars, and the church may amortize the entire facility within five or six years.

For federal and state governments, church-owned and church-operated businesses represent a large loss of revenue—the taxes that would be collected if the enterprises were run by competitive private industry. It is impossible to calculate the loss exactly, but responsible estimates put it at \$6.5 billion a year.

3. *Lease-Back Operations.* The lease-back device, exemplified by the Dayton Biltmore Hotel deal, is one of the fastest-growing ways for churches and other tax-exempt institutions to make money. An item in the *Prentice-Hall Executive Tax Report* reads: "Have you put a price on your business? You may be able to double it—by selling to a charity." And an ad in *The Wall Street Journal*: "Highly respected charitable fund (non-profit) will purchase closely held companies with minimum pre-tax profit of \$250,000. Financial and other benefits very rewarding."

Any church organization, however small, can make use of this tax advantage. For example, an enterprising executive of White Plains, N.Y., together with two ministers, organized the "Stratford Retreat House," which assumed churchly functions. According to the literature of the Retreat House, its managers purchased, as a church, on lease-back arrangements, several businesses, principally electronics firms.

Yet, the U.S. Supreme Court has refused to close this loophole in the tax laws, and Congress has rejected legislation that would eliminate it.

VOICES FOR REFORM

Some churches justify their involvement in unrelated businesses on the ground that all profits are fed back into church work, religious programs and good causes. But most religious leaders now seem to take a different view. They would advocate keeping the tax exemption on passive income—as from stocks, bonds, interest and rents. But they would eliminate tax exemption where a church actively engages in business projects for profit.

"Our churches are morally bound to take the lead to eliminate operations that force unfair competition upon private, tax-paying

industry," says the Rev. Clyde W. Taylor, general director of the National Association of Evangelicals, comprising 40 denominations.

"Earnings from businesses that have no direct connection with the religious purpose of the church should pay income taxes, regardless of how that income is used," agreed a conference sponsored by the Baptist Joint Committee on Public Affairs.

A 1966 study document of the National Council of Churches, which represents about half of the Protestant church membership in the United States, concluded: "Existing tax exemptions for unrelated business income of a church or church-related service agency should be discontinued."

Similar recommendations have been made by the bishops of the Protestant Episcopal Church, by the United Presbyterian Church, the Methodist Church, and the Central Conference of American Rabbis. The *Washington Newsletter*, publication of the National Council of Catholic Men, in May 1967 declared: "To require churches to pay taxes on their corporate profits would remove the undemocratic advantage they now enjoy in competing with corporations and small business."

Thus, there is a clear mandate for reform. Congress, with the cooperation of church leaders of all creeds, should take action on this matter at the earliest possible moment.

U.S. DEPARTMENT OF AGRICULTURE STUDY DISCUSSION GROUPS

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1969

Mr. RARICK. Mr. Speaker, annually the U.S. Department of Agriculture provides a graduate school, open to qualified employees of the Federal Government, to provide needed educational opportunities for Federal employees.

According to the billing the six meetings, July 7 through August 15 of this year, are called study-discussion groups and include such subjects as Swahili, American protest literature, racial conflict in the United States, and changing human behavior.

Many of the taxpayers who wonder what is going on in their National Government may question this educational expenditure as irrelevant.

Mr. Speaker, so our colleagues may see the study discussion group schedule, I insert the statement of purpose of the graduate school and the schedule of classes in the RECORD:

[From the 1969 summer catalog of the Department of Agriculture Graduate School]

STUDY-DISCUSSION GROUPS FOR FEDERAL SUMMER EMPLOYEES AND OTHER YOUNG ADULTS

Purpose of the school: The objective of the Graduate School of the United States Department of Agriculture has always been to improve the federal service by providing needed educational opportunities for federal employees. The Graduate School has six main programs: Resident evening, special, correspondence, international, public lectures, and the press. Graduate study is a primary interest of the school, but it also offers a large number of undergraduate as well as non-credit courses. All courses are open to qualified employees of the federal government and to other qualified persons as facilities permit.

SCHEDULE OF CLASSES

Registration, June 30–July 3; classes begin July 7.

NUMBER, COURSE TITLE, CREDIT, INSTRUCTOR, DAY, TIME, AND FEE

1-5: Rocks and Fossils (non-credit), Russell C. McGregor, Bureau of the Budget, W 6:10-8, \$15. (Principal rock types and fossils of Central Atlantic Region. Three field trips.)

2-95: Improving Reading Ability (non-credit), Dee W. Henderson, Graduate School, USDA, Tu 6:10-8, \$15. (Skills to improve reading.)

2-26: American Protest Literature (non-credit), Eleanor W. Traylor, Montgomery Community College, Tu 6:10-8, \$15. (Study of selected essays, stories, and one novel.)

2-27: Significant Books of Twentieth Century (non-credit), M. Clare Ruppert, Trinity College, W 6:10-8, \$15. (Greek biography and drama.)

2-32: Swahili (non-credit), Milan G. P. de Lany, Voice of America, Tu 6:10-8, \$15. (Introduction to elementary Swahili.)

3-6: Preparatory Mathematics for Introductory Statistics (non-credit), William E. Kibler, Statistical Reporting Service, USDA, Tu 6:10-8, \$15. (Basic review of numeric operations and algebraic manipulation.)

4-9: Basic Concepts of Data Processing (non-credit), Robert E. Nicholson, National Security Agency, W 6:10-8, \$15. (Elements of data, components of machine system, and history of data processing.)

6-27: War Against Poverty USA (non-credit), Andrew S. Adams, Office of Economic Opportunity, W 6:10-8, \$15. (Federal anti-poverty programs.)

6-40: Urban Systems (noncredit), Peter W. House, Washington Center for Metropolitan Studies (Coordinator), W 6:10-8, \$15. (Operation of an urban gaming model—City I or City II—in which an urban area's physical development, economic base, fiscal policy, political life, public administration, and systems operation are examined.)

6-38: Civil Rights—Problems and Solutions (non-credit), Robert J. Coates, Department of Transportation, Tu 6:10-8, \$15. (To develop understanding of problems facing minority groups in our society.)

6-36: Governing Science and Technology, (non-credit), Warren H. Donnelly, Legislative Reference Service, M 6:10-8, \$15. (Review of substance and formation of science policy by Executive and Legislative branches.)

7-11: Public Policy and Environmental Pollution, (non-credit), Leon G. Billings, Subcommittee on Air and Water Pollution, Senate Committee on Public Works, Tu 6:10-8, \$15. (Examination of impact of air, water, and residue of human consumption on man and society.)

7-12: Conditions of Personality Growth, (non-credit), Eugene Stammeyer, St. Elizabeth's Hospital, Tu 6:10-8, \$15. (Aspects of society that contribute to emotional integration.)

SENATE—Tuesday, May 20, 1969

The Senate met at 12 o'clock noon, and was called to order by the Vice President.

President Hugh B. Brown, first counselor in the first presidency, the Church of Jesus Christ of Latter-day Saints, Salt Lake City, Utah, offered the following prayer:

O God, the Eternal Father, in all of the vicissitudes of life, we are aware of Thy mercy and Thy love, and we acknowledge Thy sovereignty and omnipotence. As we pause in prayer, we thank Thee for the blessings of the past. We implore Thy forgiveness for the weaknesses to which we are prone. We pray for Thy guidance and direction in the future.

We pray that Thou wilt bless the great flag of America and the Constitution of the United States, under whose wise provisions we have our freedom. We pray that Thou wilt bless the President of the United States with wisdom, with health, and with inspiration, as he carries the heavy responsibilities of his great office.

Bless, also, all those who are engaged in Thy work in the governmental affairs of our Nation, in the executive, the legislative, and the judicial arms, that all may work together for the good and welfare of the people of our great country.

Grant us peace, O Lord, both at home and abroad, and be with us with Thy

Holy Spirit as we separate and go about our various responsibilities this day and always.

In the name of Jesus Christ. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Friday, May 16, 1969, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

REPORT OF BOARD OF ACTUARIES FOR THE RETIRED SERVICEMAN'S FAMILY PROTECTION PLAN—MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT

The VICE PRESIDENT laid before the Senate the following message from the President of the United States received on May 19, 1969, under the authority of the order of the Senate of May 14, 1969, which was referred to the Committee on Armed Services:

To the Congress of the United States:

Pursuant to Section 1444(b), title 10, United States Code, transmitted herewith is the Fourteenth Annual Report of the Board of Actuaries for the Retired Serviceman's Family Protection Plan,

covering the administration of the Plan for Calendar Year 1967.

The Plan, inaugurated in November 1953, provides that members of the uniformed services may elect reduced retired pay during their lifetime in order to provide survivor annuities for their widows and children. The basic principle underlying the Plan is that reductions in retired pay shall be computed by the actuarially-equivalent method using actuarial tables selected by the Board. Thus, the Plan is to be self-supporting, imposing no added cost to the Federal Government, beyond administrative costs.

RICHARD NIXON.
THE WHITE HOUSE, May 19, 1969.

MESSAGES FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT

Under the authority of the order of the Senate of May 14, 1969, the Secretary of the Senate on May 19, 1969, received messages in writing from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations received on May 19, 1969, see the end of the proceedings of today, May 20, 1969.)

REPORT OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Under authority of the Senate of May 14, 1969, the following report of a committee was received on May 19, 1969.

By Mr. MCINTYRE, from the Committee on Armed Services, without amendment:

H.R. 9328. An act to amend title 37, United States Code, to provide special pay to naval officers qualified in submarines, who have the current technical qualification for duty in connection with supervision, operation, and maintenance of naval nuclear propulsion plants, who agreed to remain in active submarine service for 1 period of 4 years beyond any other obligated active service, and for other purposes (Rept. No. 91-182).

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries.

REPORT ON THE NATURAL GAS PIPELINE SAFETY ACT OF 1968—MESSAGE FROM THE PRESIDENT

The VICE PRESIDENT laid before the Senate a message from the President of the United States, which, without being read, will be referred to the appropriate committee, and will be printed in the RECORD.

The message from the President was referred to the Committee on Commerce, as follows:

To the Congress of the United States:

I am pleased to transmit the first Annual Report on the Natural Gas Pipeline Safety Act of 1968. This report covers the period from August 12, 1968, through December 31, 1968.

RICHARD NIXON.

THE WHITE HOUSE, May 20, 1969.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate sundry messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

LIMITATION ON STATEMENTS DURING THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar, beginning with "New Reports."

There being no objection, the Senate proceeded to the consideration of executive business.

The VICE PRESIDENT. The nominations on the Executive Calendar will be stated, as requested by the Senator from Montana.

DEPARTMENT OF DEFENSE

The bill clerk read the nomination of Daniel Z. Henkin, of Maryland, to be an Assistant Secretary of Defense.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

U.S. ARMY

The bill clerk proceeded to read sundry nominations in the U.S. Army.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The VICE PRESIDENT. Without objection, the nominations are considered and confirmed en bloc.

U.S. MINT AT PHILADELPHIA

The bill clerk read the nomination of Nicholas G. Theodore, of Pennsylvania, to be Superintendent of the Mint of the United States at Philadelphia.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

EXPORT-IMPORT BANK OF THE UNITED STATES

The bill clerk read the nomination of R. Alex McCullough, of South Carolina, to be a member of the Board of Directors of the Export-Import Bank of the United States.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

FEDERAL HOME LOAN BANK BOARD

The bill clerk read the nomination of Carl O. Kamp, Jr., of Missouri, to be a member of the Federal Home Loan Bank Board.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

UPPER GREAT LAKES REGIONAL COMMISSION

The bill clerk read the nomination of Alfred E. France, of Minnesota, to be Federal cochairman of the Upper Great Lakes Regional Commission.

The VICE PRESIDENT. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK, THE ARMY

The bill clerk proceeded to read sundry nominations in the Army which had been placed on the Secretary's desk.

The VICE PRESIDENT. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President

be immediately notified of the confirmation of these nominations.

The VICE PRESIDENT. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The VICE PRESIDENT. Without objection, it is so ordered.

THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of measures on the calendar, beginning with Calendar No. 161 and the succeeding measures in sequence.

The VICE PRESIDENT. Without objection, it is so ordered.

COMPOSITION OF THE COMMISSION FOR EXTENSION OF THE U.S. CAPITOL

The bill (S. 1888) to change the composition of the Commission for Extension of the U.S. Capitol was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the paragraph entitled "Extension of the Capitol" under the heading "Capitol Buildings and Grounds" in the Legislative Appropriation Act, 1956 (69 Stat. 515), is amended by inserting after the words "the Speaker of the House of Representatives," and before the words "the minority leader of the Senate," the following: "the majority leader of the Senate, the majority leader of the House of Representatives,"

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 173), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE BILL

S. 1888 would increase the membership of the Commission for Extension of the U.S. Capitol from five to seven members by adding thereto the majority leader of the Senate and the majority leader of the House of Representatives.

GENERAL STATEMENT

The Legislative Appropriation Act of 1959 (69 Stat. 515) created the Commission for Extension of the U.S. Capitol and designated that it be composed of the President of the Senate, the Speaker of the House of Representatives, the Minority Leader of the Senate, the Minority Leader of the House of

Representatives and the Architect of the Capitol. Under this composition, both parties in the U.S. Senate are represented on the Commission only when the President of the Senate is a member of the majority party. As the Commission stands today it has no member from the majority party of the Senate. By increasing the membership of the Commission from five to seven members and designating the two additional members as the Majority Leader of the Senate and the Majority Leader of the House of Representatives, the Commission for the Extension of the U.S. Capitol will always be composed of members from both the majority and minority parties of the Senate and the House of Representatives, regardless of which party elects the President of the Senate.

COMMITTEE VIEWS

The committee, in reporting S. 1888, recognizes the importance of having the Commission for Extension of the U.S. Capitol composed of members from both parties of the Senate and the House of Representatives and urges its enactment.

THE 100TH ANNIVERSARY OF WICHITA, KANS.

The bill (H.R. 8188) to provide for the striking of medals in commemoration of the 100th anniversary of the founding of the city of Wichita, Kans., was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 174), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

GENERAL STATEMENT

The bill authorizes the Secretary of the Treasury to strike and furnish to the Wichita Centennial, Inc., not more than 100,000 medals, in quantities of not less than 2,000, in commemoration of the 100th anniversary on July 21, 1970, of the founding of the city of Wichita, Kans. No medals shall be manufactured under the authority of this legislation after December 31, 1970.

The design of the medals, including emblems, devices, and inscriptions, shall be determined by the Wichita Centennial, Inc., subject to the approval of the Secretary of the Treasury. In addition, the bill provides that the Secretary shall make these medals available at not less than the estimated costs of manufacture, including labor, materials, dies, use of machinery, and overhead expenses. Security must be furnished satisfactory to the Secretary to indemnify the United States for full payment of all costs of the medals.

RICHARD VIGIL

The bill (S. 620) for the relief of Richard Vigil was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 620

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$10,000 to Richard Vigil, of Denver, Colorado, in full satisfaction of all claims of the said Richard Vigil against the United States for personal injuries suffered by him, including the loss of his right arm, when he accidentally exploded a projectile, property of the United States, found near the boundary

of Camp Hale, a United States Army base located in Leadville, Colorado, the said Richard Vigil having been eleven years of age at the time such accident occurred: *Provided,* That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding \$1,000.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 175), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill is to authorize and direct the Secretary of the Treasury to pay \$10,000 to Richard Vigil, in satisfaction of his claims against the United States for personal injuries suffered by him, including the loss of his right arm, when he accidentally exploded a projectile, property of the United States, found near the boundary of Camp Hale, a U.S. Army base located in Leadville, Colo., said Richard Vigil having been 11 years old at the time of the accident.

STATEMENT

The Department of the Army does not object to the enactment of this legislation. Bills were introduced in the 89th and 90th Congresses for the relief of this claimant. The Department of the Army in its report on S. 3387 of the 89th Congress relates the following:

Records of the Department of the Army reveal that on April 5, 1945, Anthony Vigil, a 13-year-old brother of Richard Vigil, while fishing in Turkey Creek at a point one-quarter of a mile outside the boundary of Camp Hale, Colo., found a live 37-millimeter high-explosive projectile on the stream bank. He did not know what it was but carried it home and his father concluded it was a surveyor's marker and directed Anthony to return it to the place where it had been found. Anthony said that he would do so, and placed the projectile on the outside sill of the kitchen window. The following morning, April 6, 1945, at about 8:30 a.m., Richard Vigil, the 11-year-old brother of Anthony, noticed the projectile in the window sill and took it with him as he left for school, intending to show it to his teacher. While walking to school, he noticed an object frozen in the ice on a bridge and attempted to break it away by striking the ice with the point of the projectile. On the third blow it exploded, mangling Richard's right hand and forearm and inflicting a compound fracture of the tibia and severe lacerations of his left leg. He was removed to a civilian hospital where his right arm was amputated 4 inches below the elbow and his other injuries were treated. He remained in the hospital until April 14, 1945, and was confined to bed at his home for an additional 2 weeks.

On October 1, 1945, Ginio Vigil, the father of Richard, filed a claim with the U.S. Army for medical, hospital expenses, and for property damage to Richard's clothing. The claim was approved in the amount of \$193.25 on the basis that the father's temporary custody of the projectile did not constitute wrongful or negligent intervention and that the damages arose out of injuries incident to noncombat activities of the Army and were cognizable within the meaning of the act of July 3, 1943 (57 Stat. 372). This act limited settlements to \$500 in time of peace

and \$1,000 in time of war, for property damage and reasonable medical and hospital expenses, and was the only remedy available for his personal injuries at the time of this accident. There is no direct evidence as to how the projectile reached the place where it was found on the bank of Turkey Creek which drains a part of Camp Hale. Fragments from the exploded projectile were identified by ordnance officer as being part of a 37-millimeter projectile. Such ammunition had been used in firing practice at Camp Hale during the period from September 1, 1943, to April 30, 1944. No contributory negligence can be attributed to the boys or to the father because of their inability to identify the ammunition. There is nothing in the record to suggest that they knew or should have known that the object was a projectile containing an explosive charge and dangerous.

The present bill had been introduced to grant relief in the amount of \$10,000 to Mr. Richard Vigil, now an adult, for his disabling injuries and the amount is not deemed excessive by this Department on the basis of a review of decisions involving personal injuries decided by the Supreme Court of Colorado, the State in which this incident arose. One of the decisions held a verdict of the district court not to be excessive which awarded damages of \$11,000 to the plaintiff for injuries to his arm of a permanent nature (*McCarthy v. Edgings*, 109 Colo., 526, 127 P.2d 883 (1942)).

The Department of the Army is without statutory authority to compensate Mr. Vigil for his permanent injuries but is not opposed to an ex gratia award in his case. This Department did not oppose similar bills which were enacted as Private Law 86-285 and Private Law 88-258. Under the facts and applicable law in this case, there is no liability on the part of the Government, but the Department of the Army is aware of the compassionate relief granted by Congress in similar cases and would not, therefore, oppose the bill.

The committee after a study of the foregoing, concurs in the recommendations of the Department of the Army and recommends that the bill S. 620, be considered favorably.

MARIA PRESCILLA CARAMANZANA

The bill (H.R. 2948) for the relief of Maria Prescilla Caramanzana was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 176), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to grant first preference status to the adopted daughter of a citizen of the United States, which is the status enjoyed by the natural-born alien sons and daughters of U.S. citizens.

MARIA BALLUARDO FRASCA

The bill (H.R. 3464) for the relief of Maria Balluardo Frasca was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 177), explaining the purposes of the bill.

There being no objection, the excerpt

was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to facilitate the admission into the United States in an immediate relative status of the alien child adopted by citizens of the United States.

MRS. IRENE G. QUEJA

The Senate proceeded to consider the bill (S. 564) for the relief of Mrs. Irene G. Queja, which had been reported from the Committee on the Judiciary, with an amendment to strike out all after the enacting clause and insert:

That, in the administration of the Immigration and Nationality Act, Mrs. Irene G. Queja shall be held and considered to be within the purview of section 203(a)(2) of that Act and the provisions of section 204 of the said Act shall not be applicable in this case.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 178), explaining the purposes of the bill.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to preserve second preference status in behalf of the widow of a lawful permanent resident of the United States. The bill as introduced would have granted the beneficiary permanent residence in the United States. However, the committee feels that the appropriate relief would be to preserve the status to which she would have been entitled were it not for the death of her husband.

Mr. MANSFIELD. Mr. President, that concludes the call of the calendar.

MILITARY OPERATIONS IN VIETNAM

Mr. KENNEDY. Mr. President, after the cessation of bombing last November, the President issued an order to the field that American military forces were to maintain a constant and steady pressure upon the enemy. As a result, the levels of combat and casualties did not remain the same, but actually increased. The number of U.S. offensive actions making contact with the enemy grew significantly; the total number of U.S. battalion-size operations was raised; the amount of bomb tonnage dropped in the South rose to a total greater than the amount of bomb tonnage previously dropped on the North and South. In effect, the President's order of last November to maintain steady and constant pressure not only has been carried out by our military commanders in the field, but also, it has been carried out to the letter and then some.

In his April 18 press conference, President Nixon reaffirmed President Johnson's earlier directive by stating that he has not ordered, nor did he intend to order, any reduction of our activity in Vietnam. He explained that this was in

the interest of maintaining the strength of our bargaining position in Paris.

I am compelled to speak on this question today, for I believe that the level of our military activity in Vietnam runs opposite to our stated intentions and goals in Paris. But, more important, I feel it is both senseless and irresponsible to continue to send our young men to their deaths to capture hills and positions that have no relation to ending this conflict.

President Nixon has told us, without question, that we seek no military victory, that we seek only peace. How then can we justify sending our boys against a hill a dozen times or more, until soldiers themselves question the madness of the action? The assault on "Hamburger Hill" is only symptomatic of a mentality and a policy that requires immediate attention. American boys are too valuable to be sacrificed for a false sense of military pride.

I was most disappointed that the President did not ask for a significant decrease in military operations and personnel in his speech of May 14. I would ask him now to issue new orders to the field—orders that would spare American lives and perhaps advance the cause of peace.

THE SAFEGUARD ANTI-BALLISTIC-MISSILE SYSTEM

Mr. SCOTT. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution recently prepared by Dr. George Fox Mott, commander of National Defense Post No. 46 of the District of Columbia American Legion, for presentation to all commanders of the Department of the District of Columbia. This resolution was unanimously approved by members of National Defense Post No. 46 at its luncheon meeting Thursday, March 15, 1969. It will be presented to the department commanders on Thursday evening, May 22, 1969.

I believe that this resolution fairly presents the arguments in favor of President Nixon's proposal for a Safeguard anti-ballistic-missile system.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION IN SUPPORT OF THE SAFEGUARD ANTI-BALLISTIC-MISSILE SYSTEM

Whereas the continuing consensus of The American Legion, frequently expressed at its national and department conventions, has been to maintain the essential security of the Nation against any internal or external segment of society seeking, under any pretext or for any reason, to compromise or adversely affect the Nation's defense readiness; and

Whereas The American Legion, now in its Fiftieth Anniversary Year, has always been democratically representative of every social, cultural, and occupational category of American life, without partisan, racial, religious or status prejudice of any kind; and

Whereas, all members have not only served their Nation in one or another of the military services in time of national need as determined by the elected leadership of the country, but also have rededicated themselves as Legionnaires to maintaining the clear welfare and security of the Nation; and

Whereas it has become increasingly evident that American lives and the very existence of the Nation will be continuously in jeopardy

if the Congress fails to concur with, and approve and fully implement by all necessary action and support, the exceedingly modest and minimum security recommendations of the President of the United States as to the Safeguard anti-ballistic missile system; and

Whereas, this position of the American Legion has been taken only after its leadership has given tempered consideration and appropriate weight to all the evidence, including, among other, that:

(1) The USSR now exceeds the United States in ICBM megatonnage capability for a first-strike possibility, with its continuing development of the SS-9 megaton warhead designed to knock out U.S. Minuteman ICBM retaliatory missiles; and that

(2) The USSR is known to have deployed a considerable number of ABM's for defense of its own ICBM's and other military installations, and thus has a strategic advantage which is a compelling danger to the security of the United States; and that

(3) The USSR is continuing to increase the size of their submarine-launched ballistic missile force; and that

(4) A re-evaluation of evidence reported in 1967 indicates that the Soviet Union is already well on its way toward its goal of strategic superiority designed to win a nuclear war rather than merely deter one; and that

(5) Parity between the United States and Soviet Russia has come and gone with the USSR's effort to achieve nuclear superiority: Now, therefore, be it

Resolved by the District of Columbia Department of the American Legion, on this 22nd day of May, 1969,

1. That, in furtherance of the American Legion's national position and as an extension thereof, the D.C. Department supports and commends, as being in the national interest, the decision of the President of the United States to deploy as rapidly as possible the Safeguard Anti-Ballistic Missile System, and urges immediate approval by the Congress of the necessary funds to implement this essential defense measure, and

2. That the position of the American Legion be broadly disseminated through its various Departments as well as its National Headquarters, in order to encourage individual citizen and Legionnaire action to make every member of Congress keenly aware of the American Legion's support of the President's decision to deploy the Safeguard Anti-Ballistic Missile System; and, be it further

Resolved, That a copy of this Resolution be sent to the President of the United States; the Executive Secretary of the National Security Council; the Secretary of Defense; each of the Service Secretaries; the Joint Chiefs of Staff; each member of the House and Senate Armed Services Committees; each member of the Senate Foreign Relations Committee; each member of the House Foreign Affairs Committee; and each member of the House and Senate Appropriations Committees; as well as to all members of both Houses of Congress not on those Committees, who are still in their first terms as members of the Congress.

THE PROPOSED MEETING OF PRESIDENT NIXON AND PRESIDENT THIEU

Mr. SCOTT. Mr. President, I welcome the news that President Nixon will meet with President Thieu of South Vietnam at Midway Island on June 8, at that time to continue the close cooperation between the Government of the United States and the Government of Vietnam, in order to pursue our common objective for a peaceful solution of this war. I am sure that close cooperation between the two Governments has never been as ef-

fective or as well effected as at present, and that this is itself a tremendous advance in making progress toward peace.

I believe that this meeting is desirable at this time. I believe there is real hope for the solution of our many problems. I believe that Hanoi is reflecting this in its own way and to a certain degree.

I shall not try to second-guess the President on the conduct of the war because I truly believe that no man is more dedicated to ending the war than he is.

I further am convinced that what we are doing both in the military and in the diplomatic spheres are designed to end the casualties as soon as possible. I recall, and we all do, the story of the Battle of Gettysburg, the fight for the capture of Little Roundtop—which was only a hill, only a little hill—and we all remember Cemetery Ridge, and other little hills in my Commonwealth of Pennsylvania. If those hills had not been fought for with the blood of American soldiers, then the entire outcome of that war might have been different.

Therefore, I do not know whether, when Americans are ordered to take a hill and hold it, it is a military judgment of the highest worth or not. I only know that unless we continue to have our confidence in the military and in the political and diplomatic spheres, we are not ourselves advancing in the best way the cause of peace.

Mr. President, in the words of one who recorded that struggle for a little hill at Gettysburg:

God lives!
He forged the iron will
That clutched, and held
That trembling hill.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. SCOTT. I am glad to yield to the Senator from Massachusetts.

Mr. KENNEDY. Does the Senator see any distinction between the battles for hills that our troops fought for at the time of the Revolution and during World War I and World II, and their importance in achieving our total national objective of military victory, and the objective as stated by the President in a recent speech in which he indicated that a military solution is not the objective of our national policy at the present time?

I am wondering if the Senator would distinguish between the significance and importance of achieving military victories and the capture of certain hills in connection therewith, and what now is the present administration's stated policy, which is to expedite peace.

Mr. SCOTT. Mr. President, my reaction is that it is not for me to judge the military decisions being made, but it is for me to conclude that unless we protect our forces in the field we might as well accept a total defeat and a complete withdrawal with the much greater casualties that that would entail, as any person in the military would agree. It would lead also to the massacre of hundreds of thousands of South Vietnamese. Therefore, I am not contending for a hill, but I say if our military are told to contend for a hill it is a part of the strategy which is essential to maintain-

ing the military posture while we talk for peace.

I will add that I do not accept the Communist "talk-fight" strategy and I believe there will come a time when we will have to react accordingly. We cannot afford to permit the war to continue and to talk while casualties grow. But until that time comes, in the judgment of the President, it would be better if all of us did not try to second guess whether taking a hill is essential or not, because we are not there.

Mr. KENNEDY. Mr. President, I wish to make a further observation. The frustration reflected in my previous remarks is felt because I thought we were looking for new kinds of initiatives, and new kinds of efforts. But with the explanation the Senator from Pennsylvania has given, it would appear that we are resorting to the old kinds of approaches, which I find most disheartening and disappointing.

Mr. SCOTT. Mr. President, I reject totally any conclusion that we are not using new kinds of initiatives. Wars continue to be fought by soldiers, and wars continue to be fought in the military pattern, but within the military and diplomatic pattern, the President—and I speak with some knowledge—is definitely pursuing certain new initiatives designed to end the war. Therefore, it would not be correct to say we are not taking new initiatives and seeking new imaginative procedures and not making progress, because I suggest we are.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks informed the Senate that pursuant to the provisions of section 1, Public Law 86-42, the Speaker had appointed as a member of the U.S. delegation of the Canada-United States Interparliamentary Group the gentleman from Maine, Mr. KYROS vice Mr. SLACK.

The message announced that the House insisted upon its amendment to the bill (S. 1011) to authorize appropriations for the saline water conversion program for fiscal year 1970, and for other purposes, disagreed to by the Senate, agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. ASPINALL, Mr. JOHNSON of California, Mr. HALEY, Mr. SAYLOR, and Mr. HOSMER were appointed managers on the part of the House at the conference.

The message also announced that the House had passed the bill (S. 278) to consent to the New Hampshire-Vermont Interstate School Compact, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 408) to modify eligibility requirements governing the grant of assistance in acquiring specially adapted housing to include loss or loss of use of a lower extremity and other service-connected neurological or orthopedic disability which impairs locomotion to the extent that a wheelchair is regularly required, with amendments,

in which it requested the concurrence of the Senate.

The message also announced that the House had passed, without amendment, the joint resolution (S.J. Res. 104) to authorize the President to reappoint as chairman of the Joint Chiefs of Staff, for an additional term of 1 year, the officer serving in that position on April 1, 1969.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 3667. An act to amend sections 312, 320(a), and 321(e) of the Immigration and Nationality Act;

H.R. 6790. An act to authorize an increase in the number of Marine Corps Reserve officers who may serve in an active status in the combined grades of brigadier and major general;

H.R. 6808. An act to amend section 1781 of title 38, United States Code, to eliminate the prohibition against receipt of certain Federal educational assistance benefits, and for other purposes;

H.R. 8018. An act to amend section 1072(2) of title 10, United States Code, to include a foster child within the definition of dependent;

H.R. 8020. An act to amend title 37, United States Code, to provide entitlement to round trip transportation to the home port for a member of the naval service on permanent duty aboard a ship overhauling away from home port whose dependents are residing at the home port; and

H.R. 9233. An act to amend title 5, United States Code, to promote the efficient and effective use of the revolving fund of the Civil Service Commission in connection with certain functions of the Commission, and for other purposes.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 207) honoring General of the Army Omar N. Bradley, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (H.R. 6269) to provide for the striking of medals in commemoration of the 300th anniversary of the founding of South Carolina, and it was signed by the Vice President.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred, as indicated:

H.R. 3667. An act to amend sections 312, 320(a), and 321(a) of the Immigration and Nationality Act; to the Committee on the Judiciary.

H.R. 6790. An act to authorize an increase in the number of Marine Corps Reserve officers who may serve in an active status in the combined grades of brigadier and major general;

H.R. 8018. An act to amend section 1072(2) of title 10, United States Code, to include a foster child within the definition of dependent; and

H.R. 8020. An act to amend title 37, United States Code, to provide entitlement to round trip transportation to the home port for a member of the naval service on permanent duty aboard a ship overhauling away from

home port whose dependents are residing at the home port; to the Committee on Armed Services.

H.R. 6808. An act to amend section 1781 of title 38, United States Code, to eliminate the prohibition against receipt of certain Federal educational assistance benefits, and for other purposes; to the Committee on Labor and Public Welfare.

H.R. 9233. An act to amend title 5, United States Code, to promote the efficient and effective use of the revolving fund of the Civil Service Commission in connection with certain functions of the Commission, and for other purposes; to the Committee on Post Office and Civil Service.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 207) honoring General of the Army Omar N. Bradley, was referred to the Committee on Armed Services.

STEWART O. H. JONES AS U.S. ATTORNEY FOR THE DISTRICT OF CONNECTICUT

Mr. DODD. Mr. President, on May 16, the Senate confirmed the nomination of Mr. Stewart O. H. Jones, of Connecticut, to be U.S. attorney for the District of Connecticut for the term of 4 years.

Stewart Jones was a classmate of mine at Yale Law School. He is a good lawyer and will be a good U.S. attorney. I was pleased when President Nixon nominated him for the post and I am very proud that the Senate has given its advice and consent to his nomination.

JOHN DAVIS LODGE—AMBASSADOR-DESIGNATE TO ARGENTINA

Mr. DODD. Mr. President, this morning, the Ambassador-designate to Argentina, John Davis Lodge of Westport, Conn., appeared before the members of the Committee on Foreign Relations.

I have known Ambassador Lodge for many years, both as a public official and as a personal friend. His qualifications for this very important assignment are topnotch. Ambassador Lodge is a highly competent and very capable and respected diplomat.

He is a former Governor, a former Member of Congress, and former Ambassador to Spain. In all three positions, he performed his duties and responsibilities with remarkable success.

I believe that his nomination as Ambassador to Argentina was the best that President Nixon has made to date. I commend the President for his judgment, and this morning, I urged the members of this Committee on Foreign Relations to give their unanimous approval to his nomination.

It is my sincere wish that this nomination will soon be brought to the floor and that the Senate will give its advice and consent to the appointment of John Davis Lodge as our Ambassador to Argentina.

J. WILLIAM MIDDENDORF II TO BE AMBASSADOR TO THE KINGDOM OF THE NETHERLANDS

Mr. DODD. Mr. President, Mr. J. William Middendorf II, of Connecticut, who has been nominated by President Nixon

to be the American Ambassador to the Kingdom of the Netherlands, appeared before the Committee on Foreign Relations this morning.

I have known Mr. Middendorf for some time and commend the President for choosing this very capable and dedicated man for this important post. Mr. Middendorf is a highly successful businessman who also devoted much of his time and his talents to civic affairs.

As our Ambassador to the Kingdom of the Netherlands, there is no doubt that he will perform his duties in a manner that will reflect great credit upon the United States.

Mr. President, I have no doubt that the Committee on Foreign Relations will render a favorable report on this nomination and that the Senate will give its advice and consent to Mr. Middendorf as the Ambassador to the Kingdom of the Netherlands.

ADDRESS BY SENATOR McCLELLAN BEFORE THE LAW ENFORCEMENT OFFICERS' RECOGNITION DINNER IN OMAHA, NEBR.

Mr. HOLLAND. Mr. President, on May 8, 1969, our distinguished colleague, the senior Senator from Arkansas, chairman of the Government Operations Committee and ranking member of the Judiciary Committee (Mr. McCLELLAN) made a thoughtful and constructive speech in Omaha, Nebr., at the law enforcement officers recognition dinner sponsored by the American Citizens Forum, Inc.

Mr. President, I know of no one who has pursued a more relentless war on crime than has the senior Senator from Arkansas, and I know of no one more appropriate to address the law officers of this Nation than our most able colleague from Arkansas, a distinguished lawyer in his own right and who was prosecuting attorney of the seventh judicial district of Arkansas from 1926 to 1930.

Since coming to the Congress first in the House of Representatives and subsequently here in the Senate where he has served continuously since January 3, 1943, a period of over 26 years, he has distinguished himself as one of our most able and knowledgeable members in the field of criminal jurisprudence.

Mr. President, the eminent qualifications of the senior Senator from Arkansas compel one who is interested in the field of crime prevention and punishment—a field I believe we all are deeply concerned about—to pay heed to his words. I, therefore, ask unanimous consent, Mr. President, to have the speech of the senior Senator from Arkansas placed in the RECORD to enable our colleagues to be enlightened as have I by his excellent remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR JOHN L. McCLELLAN, LAW ENFORCEMENT OFFICERS RECOGNITION DINNER, SPONSORED BY AMERICAN CITIZENS FORUM, INC., OMAHA, NEBR., MAY 8, 1969

INTRODUCTORY REMARKS

Mr. Chairman, the war in Vietnam, rising inflation, and rapidly increasing crime were three major issues in last year's Presidential campaign. The views and the positions taken

by the respective candidates on these vital issues—what they would do about them—as interpreted by the voters, were, no doubt, the decisive factors in the outcome of that election.

Therefore, ending the war, halting inflation, and controlling crime have become the chief goals of the Nixon Administration and the hope of the nation.

The President has given top priority to these three prime objectives—and, rightly so. For these paramount issues and their ramifications constitute the principal and growing burden of national concern. The compelling necessity and urgency for finding and applying correct solutions to these grave and pressing problems impose upon us a task of a scope and magnitude unparalleled in our generation.

Without minimizing in any way the tremendous costs in material resources and in human lives and suffering and without depreciating to any degree the potential consequences of the tragic war in Vietnam, I am convinced that the greatest threat—the more immediate danger—to our internal security and survival stems from the revolting lawlessness and revolutionary militancy that now afflict the social, political, and economic welfare of our nation.

More than 100 years ago, Abraham Lincoln said that if danger "ever reaches us, it must spring up among us. It cannot come from abroad. If destruction be our lot, we must ourselves be its author and finisher . . . as a nation of free men, we must live through all time or die by suicide." I think Lincoln's appraisal and prophecy were sound then and are quite applicable to conditions that prevail today.

Our country is in trouble. The preservation of the Republic and the perpetuation of our free society are endangered. Law and order and constituted authority are being persistently assaulted on many fronts by the insidious forces of crime and subversion.

Never since the Civil War have we experienced such dissension, turmoil, strife, and violence. During the past decade, an epidemic of crime has engulfed our nation and moved us far in the direction of chaos and anarchy. Crimes of violence are committed everywhere—in the streets and alleys, in our schools and churches, and in our marketplaces and homes. There is no longer any sanctuary or refuge to which one can retreat for safety or certainty of protection.

The number and frequency of murders, rapes, robberies, thefts, riots, arsons, and lootings have reached proportions which portend open rebellion against orderly society and the rule of law. Massive trespass, civil disobedience, and turbulent demonstrations and disorders are daringly advocated and resorted to for the redress of alleged grievances and for the imposition of inordinate and unlawful demands. Threats, intimidation, and blackmail are today instruments of common use to force the government, our public officials, and our free institutions to be subservient to the will and demands of the lawbreaker and the mob. The rash of campus disorders and violence that plagues our colleges and universities throughout the land today simply "accentuates the positive" and emphasizes a growing rebellion against traditional norms and constituted authority.

The lawbreaker—the habitual criminal—today enjoys greater privileges, immunities, and protections than ever before. The chances that he will be apprehended, convicted, and punished are less now than ever before. Only about one out of every 15 who commits a major crime is ultimately convicted and punished. And, too often, the punishment—the penalty imposed—is not at all commensurate with the gravity of the crime committed.

The scourge of lawlessness now being inflicted upon our nation is producing a crisis that cannot be endured. Projected at the present rate of increase, 16 percent annually, we find there will be more than 12 million

major crimes reported in the year 1975—just six years from now—and over 20 million by 1980—11 years from now. I do not believe that our society can withstand such a vicious assault upon its structure, nor can our nation survive such a devastating blow to its sovereignty. We must remedy this condition before it is too late.

Public alarm over this mounting crime menace is prodding the Congress and the Executive Branch of the Government into legislative and administrative action to remedy this deplorable crime condition. I wish I could report that a comparable effort is being made at the highest level of the Judicial Branch of our Government—but, I cannot. For, in my judgment, the United States Supreme Court is making serious default in this area of its responsibility. Its decisions are hurting—not helping—law enforcement.

As you know, the last session of Congress passed the Omnibus Crime Control and Safe Streets Act of 1968. This law, among other things, provides for the recruiting, training, and equipping of police forces and for a greatly expanded training program for state and local police officers at the National Academy of the Federal Bureau of Investigation.

It also creates a National Institute of Law Enforcement and Criminal Justice to begin a modern research and development venture which will put science and the laboratory to work in the detection of crime and the apprehension of criminals.

(\$63 million appropriated last year and another \$296 million is expected to be appropriated this year to finance these programs.)

Other features of the Safe Streets Act, Titles II and III, provide law enforcement agencies with some new weapons and strong reinforcements. If Title II of the Act—which deals with arraignment and confessions and which modifies the famous *Mallory* and *Miranda* Court decisions—is interpreted, administered, and used as Congress intended, it will surely make the pursuit of crime more risky and less profitable and the apprehension, conviction, and punishment of the criminal much more probable. If correctly interpreted and applied, the provisions of this law will bring the scales of justice into better balance as between the rights of society to protection and safety and any rights that the accused may have to liberty and immunity.

Title III of the bill, authorizing the use of electronic surveillance and wire tapping under strict regulations and court supervision, provides another important and useful tool to law enforcement agencies. This evidence-gathering procedure has been represented by the Honorable Frank Hogan, District Attorney of New York County, as providing: "the single most valuable weapon in law enforcement's fight against organized crime."

Notwithstanding these two Titles of the Act were adopted overwhelmingly in the Senate by Roll Call votes and that the bill was finally enacted by a vote of 72 to 4 in the Senate and 368 to 17 in the House of Representatives, the Attorney General of the last Administration flouted the will of Congress and refused to make use of these constructive weapons. Fortunately and properly, the present Administration has announced that it will use these tools as the law provides and as Congress intended.

Already this year some 27 bills have been introduced in the Senate and referred to the Judiciary Subcommittee on Criminal Laws and Procedures. Some of them are Administration bills. Two of these measures which I introduced and which are co-sponsored by Senator Hruska, are intended primarily to aid in combating organized crime.

One of them, S. 30, would:

- (1) Revamp the grand jury system;
- (2) Authorize the granting of immunity to obtain testimony over objections of self-incrimination;
- (3) Provide for civil contempt proceedings against recalcitrant witnesses;

(4) Eliminate outmoded evidentiary restrictions in false testimony prosecution;

(5) Authorize taking the depositions of witnesses who are in danger or threatened with reprisal, and extend physical protection to such witnesses; and

(6) Provide for increased punishment—up to 30 years—for habitual, professional, and organized crime offenders.

Today, before leaving Washington, I received a letter from Attorney General Mitchell commenting on this bill in which he says, among other things, that it is "vitaly needed legislation."

The second bill that I introduced, S. 1816, would strike at the take-over or operation of legitimate businesses and other enterprises by predatory criminal groups through such racketeering practices as threats of violence to life or property, or by the investment of "black money," so to speak, that is, money derived from the proceeds of trafficking in narcotics, illegal gambling, and other such syndicated crime activities. It would authorize fines, imprisonments, and forfeitures as well as civil remedies of divestiture, dissolution, and injunction. This will provide the government with additional tools that it needs, both criminal and civil, to eradicate criminal influence in legitimate businesses and organizations. It would help drive the racketeers and gangsters out.

There are a number of other bills now pending before the Judiciary Committee which also have merit. Some of them, no doubt, will be enacted into law during this session of the Congress.

I believe that the Executive and Legislative Branches of the Government are now working in harmony and as a "team"—in a concerted and determined effort to strengthen law enforcement and to improve criminal justice. This is, indeed, very gratifying to me; for too often in the recent past, we have had to reject or disregard the views of the Justice Department in order to enact constructive legislation in this field.

However, as I have already indicated, there is another branch of the government whose cooperation is sorely needed if law enforcement and the protection of society are to be achieved and sustained.

Unhappily and tragically, a majority of the Supreme Court has chosen this decade of turbulence and unrest to weaken, rather than to strengthen, the agencies of social control and the forces of law and order. Instead of helping to stem the tide of permissiveness, civil disobedience, and lawlessness by adhering to and honoring long-established precedents and traditional interpretations of the Constitution, the Court has abandoned and repudiated many historic legal landmarks. It has created, largely out of whole cloth and inverse logic, a host of new "individual" rights for the accused. Some years ago, Mr. Justice Jackson, in a dissenting opinion, said:

"This Court has gone far toward accepting the doctrine that civil liberty means the removal of all restraints . . . and that all local attempts to maintain order are impairments of the liberties of the citizen. The choice is not between order and liberty. It is between liberty and order and anarchy without either. There is danger that, if the Court does not temper its doctrinaire logic with a little practical wisdom it will convert the constitutional Bill of Rights into a suicidal pact."

That warning of Justice Jackson some 20 years ago was sound, and the danger to which he referred is now upon us.

A review and a fair assessment of the Supreme Court's record in criminal cases for the last few years leads to the inescapable conclusion that it has become addicted to strained and illogical constructions and to the invoking of specious technicalities which have produced a rash of decisions that dispense unequal justice favoring the criminal and adverse to the rights of society. Many of these decisions have trampled and disparaged the valid rights of society while magnifying

and exalting fictitious and exaggerated rights of the criminal.

Statistics dramatically portray the picture. Since 1960, the Supreme Court has reviewed 112 federal criminal cases and 144 state criminal cases in which it handed down written opinions. Out of these 112 federal convictions, 63—60 percent—were reversed; of the 144 state convictions, 113—80 percent—were reversed. Out of 21 habeas corpus petitions heard by the Court since 1960, 18—85 percent—were granted.

I cannot believe that our State Supreme Courts are so careless or incompetent or that our Federal and Circuit Judges are so incapable and prone to error as to warrant this overwhelming record of reversals by the Supreme Court.

Since 1960, the Supreme Court, in the criminal justice area alone, has specifically overruled its previous decisions or rejected the reasoning of 25 of its own precedents—often by 5-4 margins. Seventeen of these decisions involved a change in Constitutional doctrine, seven represented a new interpretation of statutory language, and one may be classified as modifying the common law. As you know, these decisions have caused great frustrations and disarray in law enforcement.

Many examples could be cited, but one of the most flagrant, of course, is the famous 5-4 *Miranda* decision. In order to reach a reversal in the *Miranda* case, five members of the Court repudiated prior and traditional interpretations of the Constitution and overruled precedents that had been the law of the land since the founding of the Republic.

In 1886, in the case of *United States vs. Wilson*; in 1912, in the case of *United States vs. Powers*; and, again, as late as 1958, in the case of *Cicenia vs. Lagay*, the Supreme Court held that warnings such as those required in the *Miranda* decision were not a prerequisite for the admissibility of a voluntary confession. So, since 1886, 28 Justices of the Supreme Court have affirmatively held that the so-called *Miranda* warnings are not required by the Constitution—included among those Justices are such able jurists as Associate Justice Oliver Wendell Holmes, the first Associate Justice, John Marshall Harlan, and Chief Justice Charles Evans Hughes.

We have, I think, not only the right but the duty to ask and consider who is right—the five Justices who decided the *Miranda* case or the 28 who decided the three previous cases. There were no new facts or circumstances present in the *Miranda* case. The issue was the same; our Constitution is the same; and nothing really changed except that five members of the Court arrogated unto themselves the power to amend the Constitution.

Mr. Justice Harlan, in the case of *Berger vs. New York* decided in 1967, having in mind a number of recent Court decisions, declared that:

"Newly contrived constitutional rights have been established without any apparent concern for the empirical process that goes with legislative reform."

He further said that:

"The Court has more and more taken to itself sole responsibility for setting the pattern for criminal law enforcement throughout the country."

Since 1960, the United States Supreme Court has virtually revolutionized the way in which criminal justice must, in its view, be administered on both the federal and state levels.

There are those who contend that these reversal decisions are having no adverse impact on law enforcement and on the rising incidence of crime. Their contention is certainly repudiated by facts and statistics.

Our population in this country has increased 10 percent since 1960. Serious crime reported increased 89 percent in that same period. Operating under the new standards and requirements imposed by recent Supreme Court decisions, police clearance of serious

crime has experienced a steady, across-the-board decline. The clearance for robbery, for example, has dropped 25.9 percent, and burglary has fallen 38.8 percent. Significantly, too, not guilty verdicts in robbery cases have increased 23 percent and in burglary 53 percent.

Our people are growing restless and becoming disillusioned. Public confidence in the Court is declining. It is now at an all-time low. A Gallup Poll last year reflected that 60 percent of the people disapprove of and are dissatisfied with the performance of the Supreme Court. A recent Harris Poll found that a majority of Americans attribute the breakdown in law and order to our courts.

Yes, the Congress, the Executive Branch of the Government, and law enforcement officials need the cooperation of the Supreme Court in this war on crime. It is quite obvious that President Nixon has—or will soon have—the opportunity to save not only the Supreme Court from the consequences of its own grievous errors but to save and preserve the nation as well by appointing new Justices to serve on the Court who will revere and construe the Federal Constitution as written and intended by our founding fathers. When this has been done, confidence and proper esteem for the highest Court in the land will be restored. The support, combined strength, and dedication of all law-abiding citizens are needed in this crucial fight against the internal forces of destruction. But, time is running out. We must use all the constitutional power and all legal weapons that can be made available to stem the tide of lawlessness that is sweeping our land. We must stop pampering agitators of violence and stop coddling criminals and condoning crime and strengthen our law enforcement machinery at all levels. We will never have safe streets and safe homes until we get the self confessed criminals and other felons off the streets and in the jails where they belong.

I am disturbed and deeply concerned, but I do not despair. For I cannot believe that a people who have attained greatness, who have built a mighty nation of unprecedented economic and military strength, and who have the genius to reach the moon and plumb the depths of the ocean have suddenly become impotent and powerless to defend and preserve their heritage and the greatness that they have achieved.

We have the ingenuity, the power, and the essential weapons with which to win the war against crime, but do we have the "will" to do it. Time, of course, will tell. But I have an abiding faith that will ultimately come through to a decisive victory.

COMMEMORATION OF THE 100TH ANNIVERSARY OF THE TERRITORY OF WYOMING AND THE 100TH ANNIVERSARY OF WOMEN'S SUFFRAGE

Mr. HANSEN. Mr. President, yesterday, May 19, 1969, marked the 100th anniversary of a memorable event in the history of the United States which was to have an unexpected impact on the history of this Nation and, indeed, of the world.

On May 19, 1869, the government of the newly-formed Territory of Wyoming was organized.

In 1867, the construction of the Union Pacific Railroad brought civilization to this part of the frontier of the Rocky Mountain west. A dozen new towns sprang up across what is now southern Wyoming as the railroad pressed toward the Pacific. Cities such as Cheyenne and Laramie appeared overnight.

Construction of the Union Pacific Rail-

road brought about the organization of the Territory of Wyoming. The new population centers along the railroad were not satisfied with being a part of the Dakota Territory, whose capital and centers of population were located far to the northeast. Pressure was building in Congress to form a new territory. In 1868, the time was right and the Congress carved the Territory of Wyoming out of a land area which had previously been included in the Dakota, Utah, and Idaho territories.

The centennial anniversary of the formal inauguration of the territorial government of Wyoming is occasion enough to rise in the Senate and pay tribute to the State of Wyoming. However, the government organized in Wyoming Territory 100 years ago undertook a daring experiment which has called the attention of the world to the State of Wyoming. In 1869, Wyoming Territory became the first government in the world to grant women equal voting rights.

Wyoming Territory led the way in adopting other equal rights for women. In addition to the Woman's Suffrage Act, the first territorial legislature adopted legislation establishing the right of married women to own and control property and to guarantee the enjoyment of the fruits of their labor, and to prohibit discrimination with regard to pay on account of sex in the employment of teachers. Susan B. Anthony, the great national advocate of woman's suffrage, said:

Wyoming is the first place on God's green earth which could consistently claim to be the Land of the Free.

Legend has it that on the evening following the enactment of woman's suffrage legislation in Wyoming, the men of the territory congregated in the saloons of Cheyenne and proposed the following toast:

To the lovely ladies of Wyoming—once our superiors—now our equals.

But the action taken by the young territory to give women equal rights was not an empty gesture. Two months after the woman's suffrage measure was adopted, Governor Campbell appointed Mrs. Esther Morris as the first woman justice of the peace in the Nation. Mrs. Morris, who had lobbied for woman's suffrage among the members of the territorial legislature, served in her post with distinction, and a statue of Esther Morris now represents Wyoming in Statuary Hall.

On July 10, 1890, Wyoming became the 44th State, and the first to grant women suffrage. The new State was promptly dubbed "the Equality State."

The election of 1924 resulted in another first for Wyoming in the field of women's rights. Nellie Tayloe Ross was elected the first woman Governor by a margin of more than 8,000 votes.

During Governor Ross' administration, the State of Wyoming adopted new coal mine safety regulations, a new banking code, and a child labor law. Governor Ross has been described by a Wyoming historian as "intelligent, tactful and gracious, a competent administrator, and an effective public speaker."

The administrative abilities of this

outstanding woman were recognized by President Franklin Roosevelt. Governor Ross was appointed Director of the U.S. Mint in 1933, and served in that capacity for 20 years, throughout the Roosevelt and Truman administrations.

Yesterday, I had the privilege of hosting a luncheon in Governor Ross' honor in the Senate Dining Room, to mark the occasion of the 100th anniversary of the Territory of Wyoming and the 100th anniversary of woman's suffrage. At 90 years of age, this lady whose competent administration advanced the cause of women's rights everywhere, is as alert and charming as ever.

Today, Wyoming still enjoys the active participation of its women in the government of the State. Two of Wyoming's five elected State officials are women. Secretary of State Thyra Thomson holds the highest elective executive position of any woman in the Nation, and serves as acting Governor when the Governor is absent from the State. State Treasurer Minnie A. Mitchell has served in elective State office for over 16 years. The speaker of the Wyoming State House of Representatives, Miss Verda James, is the only woman speaker of the house in the Nation. State Senator Edness Kimball Wilkins served as majority leader of the State house of representatives before being elected to the State senate. Mrs. Wilkins was secretary to Nellie Tayloe Ross for 14 of the 20 years Governor Ross served as Director of the Mint. Mrs. June Boyle has served four terms in the State house of representatives. Mrs. Nancy Wallace is a member of the State legislature, proudly continuing the contribution her family, the Brimmers, have made to our State.

Wyoming is proud of the leadership it has provided in women's suffrage. The trail blazed by the Territory and State of Wyoming has been followed by the remainder of the States of the Union, and by many of the nations of the world. In 1920, a full 50 years after Wyoming's pioneering legislation, the United States adopted the 19th amendment to the Constitution, granting all the women of our Nation the right to vote. Today, the nations of the world are following suit.

The Members of this body are daily reminded of the wisdom of the action taken by Wyoming in 1869, as we reflect upon the outstanding accomplishments of the senior Senator from the State of Maine. Senator SMITH's brilliant career testifies to the great contribution which the women of this Nation can make to its progress and success. Senator SMITH's dedication to her work as a U.S. Senator sets a high standard for us all.

The 100th anniversary of the organization of the territorial government of Wyoming and the 100th anniversary of the adoption of the first women's suffrage legislation are proud occasions in the history of our Nation. It is an honor to represent the State of Wyoming, and to be able to call the attention of the Senate to these accomplishments of Wyoming over the past 100 years. I look forward to the future accomplishments of the great State of Wyoming.

In closing, Mr. President, I ask unanimous consent that the message I

received from State Representative Nancy G. Wallace, in response to my invitation to join us for the luncheon yesterday honoring Mrs. Ross, be printed in the RECORD:

There being no objection, the message was ordered to be printed in the RECORD, as follows:

MESSAGE FROM STATE REPRESENTATIVE NANCY G. WALLACE

Very sorry that I cannot be with you on this propitious occasion marking the 100th Anniversary of Women's Suffrage. Having served in the 40th Legislature under the able leadership of Speaker Verda James made me once more cognizant of how fortunate I was to be born in the United States of America and in the great state of Wyoming, where women share with men equally the privileges of citizenship's rights and responsibilities. I trust Mrs. Nellie Tayloe Ross will be with you—as always, ably and graciously representing the women of Wyoming.

A CRITICAL SITUATION

Mr. HANSEN. Mr. President, the United States faces a critical domestic lamb marketing situation created by lamb meat imports from New Zealand and Australia.

This is a real emergency and one which must be dealt with in a meaningful way or else the whole industry stands in real jeopardy.

The exportations of lamb in the United States in recent months reveals that the American sheep producer is faced with a loss of \$20 million in 1969.

Lamb imports during November and December of 1968 amounted to 5,739,000 pounds. That compares with a little more than 3 million pounds during the same period of time—in 1967. This represents an increase of more than 87 percent. The live lamb price in December of 1968 in Denver was \$25.50 per hundred-weight. Without the significant increase of imports the estimated Denver price should have been \$27.50 per hundred-weight.

With the average lamb sold in December 1968, weighing 106 pounds, the loss to the lamb feeder and producer was an astonishing \$2.12 per head.

When we apply this per head loss to the total lamb slaughter of 853,000 in December, we find that the loss to the primary producer and feeder was more than \$1.8 million.

The problem has not resolved itself during the first quarter of 1969. Lamb imports for that period amounted to 6.1 million pounds. For the same period in 1968, imports totaled only 3.4 million pounds. This indicated an increase in imports of 80 percent. As a matter of fact, for 1 month—March—imported lamb amounted to 4.4 million pounds for an incredible increase of 192 percent over the previous March.

There are strong indications that this situation will worsen with an expected reporting of some 8 million pounds of imports of lamb for April of 1969. This compared to April 1968, lamb imports of only 947,000 pounds.

Experts in the field tell me that spring lambs will sell for \$2 under what they should be resulting in a loss to the American producer of some \$800,000 in April. The wholesale price of old crop lambs

has gone down \$1 per week since the middle of April reflecting losses back to the producer and feeder. As one can readily see, the real cost to the American producer—as a result of March and April lamb imports—is reflected at a lower price on spring lambs and the effect that that situation will have on lambs sold the balance of the year. It appears that the loss will amount to some \$20 million this year.

It is clearly apparent that some legislative action is necessary and I am pleased that Senator ROMAN HRUSKA, a member of the Senate Finance Committee which handles such legislation, is preparing a comprehensive import quota bill that will include not only beef and veal but lamb.

I am pleased to be a cosponsor of that legislation and hope that we may obtain action on it. The situation is critical for the lamb industry. I pledge my best efforts to see that they obtain the relief that is so important to them.

In this regard, Mr. Chairman, I ask unanimous consent that two recent press releases from the American Sheep Producers Council, Inc., 520 Railway Exchange Building, 909 17th Street, Denver, Colo., be included in the RECORD so that we can be aware of the significant impact lamb imports are having on the production and promotion of lamb in the United States in particular and on the entire U.S. sheep industry in general.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Press release from the National Wool Growers Association, National Lamb Feeders Association, Denver, Colo., May 2, 1969]
U.S. SHEEP INDUSTRY TO ACT ON DELUGE OF LAMB IMPORTS

In an emergency session in Denver today, the presidents of the two largest sheep organizations expressed alarm at the steady rise in imports of lamb in recent months into the United States.

James L. Powell of Fort McKavett, Texas, president of the National Wool Growers Association, and Reed C. Culp of Salt Lake City, Utah, president of the National Lamb Feeders Association, said in a joint statement that there is extreme concern about the imports of lamb which have grown out of all proportion in the first three months of 1969.

During the first quarter of 1969 lamb imports were 180 percent of the same period in 1968, while during March of 1969 they were 292 percent of March 1968. In addition, lamb producers in the U.S. expect an increased supply of imported frozen lamb during April.

Powell and Culp said the increased imports of lamb, which is not protected under any import quota law at present, have been reflected in weakening of domestic lamb prices at wholesale during the last three weeks.

Some of the important processors of lamb, as well as labor unions, have also expressed concern over the rising lamb imports.

Powell said the NWGA also objects strenuously to any attempt to cut tariffs on imported raw wool. "We are absolutely opposed to any cut in tariff because of the difference in cost of production between the United States and exporting wool countries."

Powell added that the sheep industry is making some giant strides toward improving its production and marketing practices under the Sheep Industry Development Program, but that the imports of lamb can

literally wreck this plan and with it the domestic sheep industry.

Culp supported the NWGA in this action and stated that the time has come for the domestic sheep industry to take appropriate action to save the industry. "We have just reached a point where we are turning around and progressing rapidly toward an improved and more successful industry. These imports could very well reverse this trend," Culp said.

[Press release from the American Sheep Producers Council, Denver, Colo., May 6, 1969]

LAMB IMPORTS UPSET U.S. PRODUCTION, PROMOTION

Lending full support for action to regulate imports of lamb, M. Joseph Burke of Casper, Wyo., president of the American Sheep Producers Council, said that lamb imports are undermining lamb production in the United States and raising havoc with the promotion program for lamb.

"The sheep industry has been making considerable progress in a self-help program to improve the technology of production and marketing, but the great increase in lamb imports has undercut the market," Burke said. "This means," he added, "that in the past three weeks the price of lamb has been forced downward by the heavy influx of imports by two to three dollars, or a total loss in the millions of dollars to producers, the labor force in this country, the packing industry and suppliers."

Burke also is chairman of the steering committee of the Sheep Industry Development Program, a plan to gather, evaluate and put into practice the latest techniques in production and marketing of lamb and wool. He said the program has reached the point where results will be published within the next eight months for use by sheep producers, but the imports, he added, may well short-circuit the benefits that could be realized from this program.

He pointed out that lamb feeders who bought lambs within the last six weeks have seen the margin dwindle as the pressure of imported frozen lamb reaches the retail market. "There is no other reason for it," he added.

Our promotion program for lamb, Burke said, has had to operate under a price difference that has been too much, despite the fact that the imported product is not fresh but frozen, and is shipped overseas to the United States. The quality of lamb produced in this country is the best in the world, Burke declared, and we know that some of the imported product is doing a disservice to lamb. When ASPC plans a lamb promotion it has no control over what imports might be dumped on the market.

As chairman of the steering committee of the Sheep Industry Development Program, Burke urged every sheep producer in the nation to rally behind the National Wool Growers Association, the National Lamb Feeders and the other sheep organizations in their efforts to get remedial legislation to curb lamb imports. The two largest sheep organizations last week cited the destructive force the wave of imports of frozen lamb was having on the domestic live lamb price.

It has been shown rather conclusively, Burke stated, that imports can and do seriously undermine the domestic sheep industry.

At present, there is no quota on imports of lamb. If these frozen imports are allowed to destroy the U.S. sheep industry it will certainly not be to the advantage of the consumer in the long run, Burke asserted.

The consumer also should be aware that some imported frozen mutton is coming in under the guise of lamb, which is a young tender meat, he said. In today's affluent society, most persons will gladly pay the difference for a fresh quality product, said Burke.

ORDER OF BUSINESS

Mr. CHURCH. Mr. President, I ask unanimous consent that I may be permitted to proceed for 6 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. DODD. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

ORDER FOR RECOGNITION OF SENATOR DODD

Mr. DODD. Mr. President, I understand the Senate will recess shortly, subject to the call of the Chair.

I ask unanimous consent that when the Senate reconvenes after the recess I may be permitted to speak for 20 minutes.

The VICE PRESIDENT. The Senator from Connecticut has asked unanimous consent that when the Senate reconvenes he be permitted to speak for 20 minutes. Is there objection? The Chair hears no objection, and it is so ordered.

PRESIDENT NIXON'S ADDRESS: A REASSESSMENT

Mr. CHURCH. Mr. President, in the Sunday edition of the Washington Post, Mr. Chalmers M. Roberts, one of the most knowledgeable journalists of this city, contends that the Nixon administration has made a major change in the American negotiating position on Vietnam.

Mr. Roberts writes:

The Nixon Administration is now prepared to accept an interim coalition government in South Vietnam provided it is the first step in a political process which denies either the present South Vietnamese Government or the National Liberation Front (Vietcong) a guarantee of victory.

Furthermore, if such a political process should, either by negotiation between the rivals or by an election, produce a coalition government on a permanent basis for South Vietnam, the United States will accept it.

According to Roberts, the new Nixon position is imbedded in the nuance and innuendo of the President's speech of last Wednesday evening, where, he alleges, it is hinted at "by deliberately obscure and ambiguous sentences and phrases and by careful omissions."

The interpretation Roberts gives to the Nixon address, if accurate, would indeed represent "a major scaling down of American policies from those of the Johnson administration."

In listening to the President's message, I did not detect what could well be a subtle but significant shift in our bargaining position. Frankly, so much of the rhetoric was so reminiscent of the last administration that I characterized the speech on the morning after as "the same old Johnson wine poured from a Nixon bottle."

However, after a careful, sentence-by-sentence reexamination of the Nixon text, I must concede that it is susceptible to the construction Mr. Roberts has given it; namely, that the door may have been discreetly opened, insofar as the President is concerned, to the possible formation of a coalition government in

South Vietnam. If so, I applaud the President's initiative.

Perhaps the long years of bitter, brutal warfare in Vietnam leave no ground for any pact whatever between Saigon and the Vietcong. But I have long felt that such hope as may exist for a settlement of this war rests upon the possibility of forming a provisional government for South Vietnam in which both sides would participate.

Just recently, I reiterated this belief, following the submission by the National Liberation Front of its 10-point offer in Paris; I repeated it again when first reacting, last Thursday, to President Nixon's eight-point counterproposal.

If the President, as Chalmers Roberts maintains, has informed Saigon and signaled Hanoi that he is "now prepared to accept an interim coalition government in South Vietnam," this, in my opinion, the most important development since the peace talks began over a year ago. Such a move might not break the deadlock in Paris, but it would constitute the most promising step yet taken in that direction. Moreover, it would represent, on our part, a major departure from past policy of the very kind I, myself, have urged, and would, of course, render baseless my initial criticism of the Nixon address.

With these considerations in mind, I ask unanimous consent that the two press releases to which I have referred, the first issued on May 10, in reference to the recent NLF offer; the second issued on May 15, the morning following President Nixon's address, be printed in the RECORD, together with the full text of the intriguing article by Mr. Chalmers M. Roberts.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REACTION TO NLF PROPOSAL FOR PEACE IN VIETNAM

WASHINGTON, May 10.—Senator Frank Church today issued the following statement on the latest Viet Cong proposal at the Paris peace talks:

"Winning a war is one thing; settling a war is another. If the Vietnamese War is to be settled by agreement between the warring factions, then a provisional coalition government is inescapable.

"The proposal by the NLF that such a government be formed is a recognition of the realities, although the formula for creating it may prove extremely difficult to agree upon.

"The Saigon Government, on the other hand, has yet to indicate any willingness whatever to even consider a coalition government. Thus the principal disputants are still out of reach of a settlement. And the chances are they will remain so, as long as the Generals in Saigon can rely upon American troops to keep them in power.

"American diplomacy must strike off the shackles of Saigon. Since young American soldiers bear the main burden of the fighting this new NLF proposal should be examined with their interests foremost in mind. It could be a sign that the NLF is now ready for serious negotiations.

"Other hopeful ingredients in the new package proposal are these: First, the suggestion that at some stage North Vietnam may be willing to withdraw its troops from the South; second, that international supervision of troop withdrawals might become

acceptable; and, third, that neither side should impose its political regime on the people of South Vietnam during the interim period, pending elections."

INITIAL REACTION TO PRESIDENT NIXON'S ADDRESS

WASHINGTON, May 15.—Senator Frank Church today issued the following statement in reaction to President Nixon's Vietnam address Wednesday night:

"Every week, another couple of hundred young Americans are killed in Vietnam; a thousand more are maimed or wounded. Most of these young men are conscripts, not volunteers or professional soldiers. Over a hundred thousand of them have already become casualties in this protracted war in distant Asia. Some thirty-five thousand are now dead.

"Under these somber circumstances, I cannot react to President Nixon's address of last evening in a politic, cautious, or circumspect way. I must speak my mind as my conscience directs.

"During the last election campaign, Mr. Nixon repeatedly assured the voters that he had a plan to end the war, which he would disclose at an appropriate time. Last night he revealed that the Nixon plan for ending the war is the same as the Johnson plan.

"All of the shop-worn propositions were reiterated; no departure was apparent from the static stance of the former Johnson-Rusk-Rostow triumvirate. It looked like the same old Johnson wine poured from a Nixon bottle.

"As the President himself indicated, our bargaining position still rests upon the same two legs: a mutual withdrawal of American and North Vietnamese troops from South Vietnam and free elections for the people of that country. But it remains as obscure as before how acceptable elections can be held in South Vietnam without some form of interim government to conduct them. If we intend for them to take place while the present regime in Saigon remains in control, how can we expect the Vietcong ever to agree? After all, men who dared to run against the Thieu-Ky regime during the last election there are now in prison. The recent proposal by the NLF that a coalition government be formed for the purpose of conducting such elections is a recognition of these realities.

"President Nixon, like President Johnson before him, has ruled out 'attempting to impose a purely military solution on the battlefield.' Our objective is still a political settlement of the war, meaning that agreement must be reached between the warring Vietnamese factions, which makes the formation of a transitional coalition government inescapable.

"Yet Richard Nixon, like Lyndon Johnson before him, chooses to ignore this crucial issue, while the Saigon government publicly refuses even to consider it. Nor is it likely that the Generals in Saigon will soon change their minds, as long as American troops remain in South Vietnam to do their fighting for them.

"Perhaps the President has secret information that by adopting the Johnson Administration's position on Vietnam he can somehow advance the stagnant peace talks in Paris. I fervently hope so. But, on the face of it, Nixon's address is a bitter disappointment to me. I must regard it as a refusal to acknowledge the only clear mandate to emerge from his election last November—the mandate from the American people to end this awful war."

[From the Washington (D.C.) Post, May 18, 1969]

THE UNITED STATES EASES STAND ON VIETNAM COALITION

(By Chalmers M. Roberts)

The Nixon administration is now prepared to accept an interim coalition government in

South Vietnam provided it is the first step in a political process which denies either the present South Vietnamese government or the National Liberation Front (Vietcong) a guarantee of victory.

Furthermore, if such a political process should, either by negotiation between the rivals or by an election, produce a coalition government on a permanent basis for South Vietnam, the United States will accept it. These points plus others described below, it can now be said authoritatively, are the substance in the Nixon peace plan of which only hints were surfaced in the President's televised speech last Wednesday evening.

As spelled out by persons in a position to know, the Nixon plan—and it is said to have the detailed concurrence of South Vietnamese President Thieu—is much closer to the Front's ten-point plan of May 8 than had been known previously.

Taken as a whole, the Nixon plan, as signaled to the Communists in the Wednesday speech by direct statements, by deliberately obscure and ambiguous sentences and phrases and by careful omissions, represents a major scaling down of American policies from those of the Johnson Administration.

The central question, in the Nixon Administration's view, now is this: will Hanoi be willing to take some risks now that officials here feel Saigon at long last is willing to take risks?

If that decision has been made in Hanoi, then serious bargaining can now begin in Paris once the Communists understand what is being proffered. If that decision has not been made—and no one here has any feeling of certainty one way or the other—then the Paris talks may have to go through yet another phase of stalemate, it is believed here, while Hanoi rethinks its position and judges the meaning of its latest military offensive.

To understand what the Nixon Administration is trying to do requires viewing it in a logical progression, as follows:

Military withdrawals by the United States and North Vietnam (aside from some unilateral American withdrawals as the South Vietnamese take over some of the fighting fronts) is now viewed here as manageable issue.

This means that the obscure clause No. 3 in the Front's ten-point plan offers an acceptable device to Washington, once the political issues have been settled, so that withdrawal can be phased into the political developments. All the ends are not tied up, of course, but how that would be done is thought to be a resolvable problem for both sides.

The core issue, then, is the political future of the South, which, of course, is what the fighting has been all about.

Here the Nixon Administration, and it is said the Thieu government, have backed far off from the Johnson Administration's way of looking at it.

President Nixon's speech sought to signal Hanoi on some of the essential points in the political tangle. Secretary of State William P. Rogers' views, as made public in Saigon last Friday, are the tip of the iceberg.

As the Administration views it, and as it has said, "self-determination" is the problem to be resolved. The Administration believes that "self-determination" ought to be negotiated between Saigon and the Communists.

The United States cannot accept settlement terms which would turn the South over to the Communists and make a mockery of the years of American and South Vietnamese bloodletting. That is beyond the Nixon bounds though Hanoi may still hope for such an outcome.

But on the other hand, it is said here, the United States is not going to impose the present Thieu-Ky regime on South Vietnam forever. It is that regime which the Communists have so long castigated as "represent-

ing no one" and being no more than American "puppets."

The Administration, then, wants to see negotiation of "self-determination" which would deny a guaranteed victory to either the Communists or the Thieu-Ky regime. In short, it wants both of them to take a gamble on the outcome of the political process. Mr. Nixon believes he is taking a risk in proposing this.

Although Mr. Nixon spoke of elections being held under some form of international supervision, the Administration is not wedded to the election process. Indeed, influential officials in several important posts agree with what Douglas Pike, an American expert on Vietnam, wrote over a year ago.

The "win-lose, all-or-nothing process" of elections has "something non-Vietnamese" about it. "Voting, to a Vietnamese," said Pike, "ignores the imperatives of group harmony."

Harmony doubtless is illusory in South Vietnam after all these bloody years of brother against brother. But the tendency to accommodation, when there is no other way out, remains strong and could come into play at this time, it is felt here.

So the Administration visualizes a political process about which it has developed detailed ideas that it has discussed with Thieu. But the contention is that the Administration is highly flexible about details.

The Communist ten-point program calls for creation, first, of a negotiated "provisional coalition government," and officials here say that is not unacceptable provided it is a part of a larger and longer process.

The Communist plan also calls for this interim regime, composed of both Communists and non-Communists (and here the Administration means the Thieu regime in the latter role, something the Communists have yet to accept categorically), to be succeeded, after elections of a new Constituent Assembly, by a permanent "coalition government of South Vietnam."

Rogers in Saigon, by indirection, hinted at what is now said categorically here: the United States will accept a coalition government if it is freely negotiated or is the result of elections.

It should be noted that the Administration, as an earnest of its view that elections are not essential, has assiduously avoided the "one-man, one-vote" formulation of the Johnson Administration. The phrase has never passed Mr. Nixon's lips.

In his now famous Foreign Affairs article on Vietnam before he became Mr. Nixon's White House foreign policy adviser, Henry A. Kissinger wrote that "it is beyond imagination that parties that have been murdering each other for 25 years could work together as a team giving joint instructions to the entire country."

The Communists, during some of the Paris conference sessions, have openly ridiculed the idea of elections by citing the obvious fact that they could hardly expect to have a fair shake if they were run by the Thieu-Ky government.

The Administration has taken all this into account. Mr. Nixon, it is pointed out—and Hanoi should note it—carefully did not say in his speech that the Communists would have to enter into a political process run by the current government of South Vietnam.

What Mr. Nixon did say, it is also noted, was that any settlement must include "a guarantee that this process" of self-determination "would be a fair one."

This was an obscure way of meeting the Communist objection to taking the risk of compromise. American officials thus can visualize either some form of joint Saigon-Front commission or an international group of outsiders to provide that guarantee. The presence of American and North Vietnamese troops could do the same.

The aim, it is said, is to avoid any chance that Saigon would seize upon the Front's

entry into such a political process to carry out what is described as an Indonesian-type massacre.

When all these components, some fairly clear, some still shadowy, are added together, they represent an immense change from past American policy.

They also represent a vast departure, or at least a vast potential departure, from the steps thus far publicly taken by President Thieu. Doubtless Thieu would have preferred some other type of Nixon speech on these points but, it is said, he has gone along nonetheless.

What the United States now hopes is that the Communists will decide to take the risk of compromise, without guarantee of ultimate victory for either side in the South, and then enter into negotiations at Paris on how to bring it about.

In sum, the Nixon Administration has reduced American demands to the simple one that there must be some real sense of choice for the South Vietnamese, a form of self-determination which the rivals work out themselves.

The United States is willing, as Mr. Nixon said, to join the Paris discussion with the Front as long as Saigon is there to do the main business. It is assumed that in such a case Hanoi would also be present.

When one looks back over the polemics from both sides in the past years since the massive American military intervention, one is struck by how far the Nixon Administration has moved. Because of the eye-catching line in the President's speech about withdrawal of most American troops within 12 months, the subtleties on the key political issues have been too much overlooked.

Indeed, it is said that some of the hard-sounding Nixon rhetoric in the speech, reminiscent of President Johnson, was adjudged necessary lest Hanoi and the Front still hope for total victory through either a collapse on the American home front or a collapse of the Saigon regime brought about by the Paris talks.

So it was necessary, it is added, to be sure that the Communists did not read into the flexibility that Mr. Nixon displayed or hinted at on political issues a signal that the United States is about to bug out of the war and hand the South over to them.

Coalition government long has been a perjorative term in Washington and Saigon. Dean Rusk said over and over that the United States would not "impose" a coalition on South Vietnam. More than three years and thousands of battle deaths ago, when the late Sen. Robert F. Kennedy called for admitting the Communists into "a share of power and responsibility" in Saigon, the then Vice President Humphrey compared the proposal to "letting a fox in the chicken coop."

And it now has been more than 14 months since presidential candidate Richard Nixon, declaring his opposition to a "coalition government" in Saigon, said in a campaign statement that "a coalition with the Communists is like putting a cobra and a mongoose together—they try to eat each other."

Finally, it is now nine months since the doves tore apart the Democratic Convention in Chicago with a platform plan proposing that "we will encourage our South Vietnamese allies to negotiate a political reconciliation" with the Front "looking toward a government which is broadly representative of these and all elements of South Vietnamese society."

Mutatis mutandis. Some necessary changes, indeed, have been made.

EIGHT-MILLION-DOLLAR UNNECESSARY EXPENDITURE BY DEPARTMENT OF THE AIR FORCE

MR. WILLIAMS of Delaware. Mr. President, today I call attention to an

unnecessary expenditure of \$8 million by the Department of the Air Force.

The Air Force solicited competitive bids for a certain type of flight instruments for the KC/C-135 aircraft. Three bids were received: The first from Collins Radio Co. for \$60.1 million; the second from Bendix for \$58 million; and the third from Sperry Flight Systems for \$52 million.

Notwithstanding the fact that there were two lower bids the Air Force awarded the contract to the highest bidder, Collins Radio Co., and their explanation was that "the Air Force had an urgent requirement for an integrated dual flight director/rotation go-around system" and the "total price would not be the governing factor in determining the successful offeror."

I ask unanimous consent that my letter of May 6, 1969, directed to the Secretary of Defense, asking for an explanation of this transaction, and the reply of May 13, signed by Col. John J. Shaughnessy, U.S. Air Force, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., May 6, 1969.

HON. MELVIN R. LAIRD,
Secretary of Defense,
Washington, D.C.

MY DEAR MR. SECRETARY: I have received a report alleging that the Department of Defense, through the Air Force, has awarded contract No. F34601-69-c-2462, which is on a KC135 aircraft.

It is alleged that this contract was awarded to the Collins Radio for \$60.1 million but that there were two lower bids submitted, one by Bendix in the amount of \$58 million and one by Sperry Flight Systems for \$52 million.

I would appreciate a report as to whether or not this allegation is true; and if so, why was this contract not awarded to the lowest responsible bidder?

Yours sincerely,

JOHN J. WILLIAMS.

DEPARTMENT OF THE AIR FORCE,
Washington, D.C., May 13, 1969.

HON. JOHN J. WILLIAMS,
U.S. Senate,
Office of the Secretary.

DEAR SENATOR WILLIAMS: This is in reply to your recent letter to Secretary Laird regarding a contract recently awarded to Collins Radio Company, Cedar Rapids, Iowa, for flight instruments for the KC/C-135 aircraft fleet.

The decision to award the contract to Collins Radio Company resulted from a source selection evaluation in which price and other factors were considered. The letter of request for proposal sent to interested sources highlighted that:

a. The Air Force had an urgent requirement for an integrated dual flight director/rotation go-around system to enhance safety of flight of the KC/C-135 fleet.

b. A technical evaluation would be conducted so as to select the system that best operates within the environment of the -135 series weapon system. The five major areas to be evaluated on an integrated basis were technical, supportability, operations, management/production, and cost.

c. Maximum emphasis would be placed on proven capability, reliability and performance, demonstrated mean-time-between-failure, timely kit availability, and safety.

d. Total price would not be the governing factor in determining the successful offeror.

The basis of evaluation of proposals and the weighing factors utilized in the source

selection processes were established before proposals from industry were received by the Air Force. Each proposal received was evaluated impartially and in consonance with existing Air Force Regulations and Manuals concerning source selection. This evaluation established that Collins Radio Company had demonstrated the best capability for fulfilling the requirement considering all factors.

We hope this information will be helpful. Sincerely,

JOHN J. SHAUGHNESSY,
Colonel, USAF, Chief, Plans Group,
Legislative Liaison.

Mr. WILLIAMS of Delaware. Mr. President, my questions are: If there was only one company qualified why did they solicit competitive bids in the first place, and once having solicited bids why was not the contract awarded to the lowest responsible bidder?

This contract was awarded at a cost of 15 percent above the lowest competitive bid and represents an unnecessary expenditure of \$8 million.

NEW TAX LOOPHOLES FOR OIL INDUSTRY

Mr. WILLIAMS of Delaware. Mr. President, in the April 25, 1969, issue of the Cleveland Plain Dealer, there appeared an article by Donald L. Barlett, entitled "Oil Firms 'Carve Out' New Tax Loopholes" followed by an article with a Washington dateline entitled "Oil Firms Lost Battle, Won War."

This first article furnishes an excellent record of the manner in which the oil industry escapes the payment of Federal income taxes, and at a time when we are considering the raising of the taxes of every taxpayer it should be read by every Member of Congress. Certainly this is one loophole which must be closed. This is one industry which is not paying its proportionate part of the cost of operating our Government.

I ask unanimous consent that the articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Cleveland (Ohio) Plain Dealer,
Apr. 25, 1969]

OIL FIRMS "CARVE OUT" NEW TAX LOOPHOLE (By Donald L. Barlett)

WASHINGTON.—The petroleum industry has zeroed in on a loophole in the nation's federal income tax laws that opens the door to a billion dollar tax dodge.

Once perfected, the loophole—virtually unknown outside the minerals industry—can enable an oil company to avoid payment of all federal income taxes.

The tax gimmick already is being used by some oil companies to escape the brunt of the 10% surcharge and income taxes running into the hundreds of millions, a Plain Dealer investigation disclosed.

The loophole involves a transaction known as a carved out production payment.

It is used in a complex bookkeeping system in which income is shifted from one year to another to create special tax advantages.

The accounting device gives a company an inflated income one year and a self-induced loss the following year.

Unlike the long controversial 27½% oil depletion allowance, a tax-saving benefit that was granted by Congress, the production payment is a tax-avoiding device.

When used in conjunction with the de-

pletion allowance, the production payment allows an oil company to:

Increase the value of the depletion allowance above the level intended by Congress when the depletion law was enacted.

Create self-induced paper losses through bookkeeping manipulations that reduce and eliminate federal income tax liability.

Lower the income tax payments of other businesses owned by the oil company, giving these firms a subsidized advantage over competitors.

Growing use of production payments was found in a continuing Plain Dealer inquiry into the federal income tax status of the oil industry.

Although aware of the tax-avoidance technique, federal agencies are just beginning to compile figures on the scope of production payment sales.

U.S. Treasury aides call the payments a "tax abuse" and Congressional tax reformers label them a "tax dodge."

A production payment is similar to a loan, with the oil in the ground serving as collateral. The oil company borrows money from a lending institution and repays the loan as oil is produced and sold.

It is a transaction that is unique to the petroleum and minerals industry in that the proceeds of the loan are treated as income for tax purposes by the oil company. This may sound like a disadvantage but it works to the company's benefit at a later time.

This special tax treatment stems from court decisions and private rulings issued by the Internal Revenue Service (IRS).

The Treasury Department, in its preliminary study, estimates the government lost a minimum of \$350 million in tax revenue in 1966 as a result of the production payment loophole.

A Capitol Hill tax expert places the potential loss to the government at more than a billion, noting that oil companies started using production payments to escape income taxes only in the last few years.

The practice is spreading—on a much smaller scale—to other mineral businesses such as coal and cement.

The only government statistics available on the subject are based on a limited Treasury survey.

These figures show that the sale of carved out production payments soared 150% from 1965 to 1966, rising from \$214 to \$540 million.

But the Treasury figures appear to be on the conservative side.

A Plain Dealer study showed that:

Ten large and small oil companies alone sold production payments totaling \$217.4 million in 1967—the last year for which complete statistics are available.

Of the 10 companies, four reported owing no federal income tax at all, while recording combined profits of nearly \$140 million.

A projection of production payment sales, based on these 10 companies, places the total for 1967 in excess of \$1 billion. There are dozens of major and large independent companies, thousands of smaller firms, partnerships and individuals—all eligible to sell production payments.

Preliminary figures for 1968—based on company reports still being issued—indicate a continuing rise in sales.

Use of production payments is widespread, with a sizable majority of the major and large independent oil companies reporting the transactions.

Some oil companies conceal the actual production payment figure, lumping it with other income in their financial statements.

A production payment may be compared with a home mortgage loan transaction in which an individual borrows money from a bank to purchase a house.

The bank, in return for the money it lends, receives a claim (mortgage) against the property.

In the case of the production payment, the oil company obtains a loan from the bank, which receives a claim against the company's untapped oil reserves.

The loan usually is for one year, at a fixed rate of interest, and repaid out of the income from oil or gas produced and sold in the following 12 months.

Unlike such dealings in any other business production payment is considered as income rather than a loan.

The courts have ruled the buyer is purchasing an economic interest in the mineral in the ground—making the income of the production payment subject to the 27½% depletion allowance.

This inflates an oil company's income for one year, causing a mismatching of income and expenses for two years—a bookkeeping practice frowned upon by many professional accountants.

The mismatching occurs when the company reports the income from the production payment one year and the expenses incurred in extracting the oil the following year.

Under the depletion allowance, a company pays no federal income tax on 27.5% of its income from wells.

But the tax-free sum—according to the depletion statute—may not exceed 50% of a company's net income.

By selling a carved out production payment, the oil company bypasses the 50% limit imposed by Congress.

Using a fictitious firm, here is how the percentage depletion allowance was intended to work:

Cuyahoga Oil Co.'s income from wells was \$10,000,000 for the year. Deductions for business expenses and costs totaled \$8,000,000, leaving a net taxable income of \$2,000,000.

Income from wells.....	\$10,000,000
Business expenses.....	-8,000,000
Net income.....	2,000,000

The depletion allowance is based on gross income from the wells—27½% of \$10,000,000. This represents \$2,750,000 in tax free income.

Income from wells.....	\$10,000,000
Depletion allowance.....	×.275
Tax free income.....	2,750,000

However, this deduction may not exceed 50% of the company's net taxable income, which in this case is \$2,000,000. Fifty percent of this figure is \$1,000,000.

Net income.....	\$2,000,000
Allowable depletion.....	×.50
Taxable income.....	1,000,000

The maximum allowable depletion deduction then is \$1,000,000, or \$1,750,000 less than full depletion allowance.

Net income.....	\$2,000,000
Allowable depletion.....	-1,000,000
Taxable income.....	\$1,000,000

This leaves \$1,000,000 on which Cuyahoga Oil Co. must pay federal income tax. At the corporate rate of 52.8%, the company pays \$528,000 in income tax.

Taxable income.....	\$1,000,000
Corporate tax rate.....	×.528
Federal income tax owed.....	528,000

Using the same figures over a two-year period, Cuyahoga Oil Co. would pay a total of \$1,056,000 in federal income taxes.

Through a carved-out production payment, the company avoids federal income taxes in the following manner:

The company sells a production payment to a bank, foundation, insurance company or some other lending institution.

In this case, the production payment amounts to \$8,000,000.

Added to Cuyahoga Oil Co.'s original \$10,000,000, this increases the firm's income from wells to \$18,000,000 in the first year.

Deductions for business expenses remain the same as before, \$8,000,000, but now the net taxable income is \$10,000,000.

Income from wells.....	\$18,000,000
Business expenses.....	-8,000,000
Net income.....	10,000,000

The depletion allowance is based on gross income from the wells—or 27½% of \$18,000,000. This represents \$4,950,000 in tax-free income.

Income from wells.....	\$18,000,000
Depletion allowance.....	×.275
Tax free income.....	4,950,000

Now Cuyahoga Oil Co. may deduct the full depletion allowance because it does not exceed 50% (\$5,000,000) of its net taxable income.

Net income.....	\$10,000,000
Tax free income.....	-4,950,000
Taxable income.....	5,050,000

Taxed at the corporate rate of 52.8%, the company pays \$2,666,400 in federal income tax in the first year.

Taxable income.....	\$5,050,000
Corporate tax rate.....	×.528
Federal income tax owed.....	\$2,666,400

The following year the company's income from wells remains the same—\$10,000,000. However, the company deducts as an expense, the funds used to satisfy the production payment (loan) of \$8,000,000 leaving a balance of \$2,000,000.

Income from wells.....	\$10,000,000
Production payment.....	-8,000,000
Balance.....	2,000,000

The company's business expenses for the year still total \$8,000,000, creating a self-induced paper loss of \$6,000,000 and eliminating any federal income tax liability for the year.

Balance.....	\$2,000,000
Business expenses.....	-8,000,000
Self induced loss.....	(6,000,000)

Cuyahoga Oil Co. then applies the \$6,000,000 loss in the second year as an operating loss carryback, collecting a refund from the government of the \$2,666,400 paid in federal income taxes in the first year.

The \$6,000,000 paper loss offsets the \$5,050,000 income the first year, leaving \$950,000 to be carried forward or back to other years.

Self induced loss.....	\$6,000,000
Prior taxable income.....	-5,050,000
Unused loss.....	950,000

Thus Cuyahoga Oil Co. eliminates payment of federal income taxes over the two years totaling \$1,056,000 (\$528,000 each year if no production payment), while showing a book profit of \$2,000,000.

The company may repeat this cycle every two years, perpetually avoiding payment of any federal income tax.

The unused loss of \$950,000 also may be used to reduce the tax liability of subsidiary businesses.

For example, Cuyahoga Oil Co. may own a publishing firm that reports net taxable income of \$3 million.

The \$950,000 paper loss is deducted from the \$3 million. Instead of paying income tax on \$3 million, the publishing company pays tax on \$2,050,000.

This procedure is followed when the oil

company files a consolidated tax return that includes all its subsidiaries.

One of the issues raised by production payment critics is the unorthodox accounting system that mismatches income and expenses over the two years.

The oil companies are so sensitive to the unique accounting procedure that it is never made public.

An oil company reports to mismatching of income and expenses only on its tax return—a secret document.

In its annual report to stockholders—a public record—the company lists the income from the production payment in the same year the oil is produced.

The dual income reporting system means two sets of financial books: one for the tax man and one for the public.

The use of production payments to elude payment of income taxes has received little publicity outside the petroleum and securities industries.

Even some members of Congress, who profess to be familiar with petroleum tax laws, seem to be unaware of the tax-avoiding potential.

Last February, Sen. William Proxmire, D-Wis., alluded to a tax loophole (production payments) which permits an oil company to use the depletion allowance to offset income from other sources.

His statement brought an immediate response from a colleague who observed that he was certain Proxmire was mistaken and added:

"It is (my) understanding . . . that the percentage depletion deduction is only available with respect to oil properties, or the income from oil properties . . . I would have to have powerful evidence to the contrary."

"Before I came to the Senate I prepared tax returns involving oil operating interests and never have I heard that percentage depletion could be offset against anything except oil production."

"Furthermore, as the Senator (Proxmire) has accurately pointed out, it cannot exceed 50% of net income, and that net income is from the oil property or the oil income and not from other income."

"This is a technical area of the tax law and I can understand how one could be confused over it."

As one tax reformer put it: "This is a very complex issue and most people don't understand it."

"It was only a few years ago, after some court and IRS rulings, that the tax lawyers found the loophole and said, 'Oh, boy, here we go.'"

A Treasury aide told the Plain Dealer that some farsighted oil companies sold production payments to reduce or eliminate the impact of the 10% surcharge.

The companies shifted income from 1968—the year the surcharge went into effect—back into 1967.

This was accomplished by selling a huge carved out production payment in December 1967.

The Plain Dealer study of production payments showed that oil companies from the smallest to the largest utilize the tax dodging technique.

The amounts of the production payments sold varied widely.

Aztec Oil & Gas Co. of Dallas, with a net income of \$2.5 million, sold a production payment for \$2.2 million—nearly the full amount of its profit in 1967.

In the same year, Atlantic Richfield Co. of New York had a net income of \$145.2 million and sold future production amounting to \$56.3 million.

Atlantic Richfield reported owing no federal income tax from 1962 to 1967—while registering total profits of nearly a half-billion dollars.

Complete financial statistics are available only for 1967. But incoming reports for 1968

indicate another increase in production payment sales.

General Crude Oil Co. of Houston—another firm that has owed no income tax in recent years—sold a production payment for \$609,000 in 1967. In 1968, the figure rose to \$6 million.

The Signal Companies, Inc., Los Angeles, sold a \$7.7 million production payment in 1967 and a \$19.8 million payment in 1968.

Observes a Congressional tax reformer:

HOW CARVE OUTS CUT TAXES

(Dollars in thousands)

	Production payments sold	Net income before taxes	Federal income taxes owed	Percent of profit owed in tax	Profit after taxes
Atlantic Richfield Co.	\$56,325	\$145,259	None	0.0	\$130,005
General Crude Oil Co.	609	5,500	None	.0	5,500
Aztec Oil and Gas Co.	2,200	2,516	None	.0	2,510
Wilshire Oil Co. of Texas	284	392	None	.0	392
Amerada Petroleum Corp.	8,407	103,979	\$887	.9	58,461
Pennzoil Co.	28,000	16,296	337	2.1	15,959
Union Oil Co. of California	26,626	163,820	10,400	6.3	144,963
Sinclair Oil Co.	18,500	130,017	10,585	8.1	95,372
Tenneco, Inc.	71,541	159,812	13,604	8.5	146,208
Continental Oil Co.	4,900	241,362	30,031	12.4	149,962
Total and tax average	217,932	968,953	65,844	6.8	748,332

Note: This table is based on financial information obtained from reports filed with the U.S. Securities and Exchange Commission in Washington, D.C. The table, for the year 1967, shows value of carved out production payments sold, net income before taxes, Federal income tax owed, the tax rate and profits of 10 large and small oil companies. In some cases, the above figures for production payments sold are lower than the actual amounts because the companies reported the sales net of deferred income tax.

OIL FIRMS LOST BATTLE, WON WAR
WASHINGTON.—The government tried to plug a petroleum industry income tax loophole back in 1958 and the big loser was the U.S. Treasury.

The reason:
In a successful legal battle to close one loophole, worth a few million dollars to oilmen, the government opened another loophole worth an estimated billion dollars or more to the same oilmen.

Looking back on the legal proceedings, a Capitol Hill tax expert says:

"It is the most expensive victory the government ever won."

The unusual victory came in a decision handed down April 14, 1958, by the U.S. Supreme Court in a case known as the P. G. Lake Case.

For the oil industry, it was a landmark decision that opened the door to a billion dollar tax dodge through the use of carved out production payments.

The issue then before the court was this: Should the proceeds of a production payment be taxed at the low capital gains rate of 25% or at the ordinary income tax rates that ranged up to 91%?

Until 1958, lower courts and the U.S. Tax Court had held that the sale of a carved out production payment constituted the transfer of a capital asset.

Using this interpretation of a production payment, the lower courts said the proceeds from the transaction should be taxed as a capital gain.

The Lake case was a consolidation of five separate cases, four involving oil production payments and one dealing with sulphur.

The lower courts had sustained the taxpayer's argument that the production payment represented the sale of a capital asset and thereby the lower tax rate.

In appealing the case to the Supreme Court, the government contended that the payments were merely an assignment of future income subject to taxation as ordinary income and not capital gains.

The Supreme Court upheld the government, moving The New York Times to report the following day:

"The Supreme Court held unanimously that payments for rights to future oil profits are taxable as ordinary income, not as capital gains."

"The ruling was a blow to what has become a widespread practice in the oil industry, so-called 'in-oil payments.'"

"Sales of production payments are increasing in geometrical proportions each year."

"As more people learn how to use production payments, they eventually will result in a greater tax loss than the depletion allowance."

"It's another example of the oil companies finding a crack in the tax laws and widening it until it reaches the proportions of a chasm."

years when tax experts found a way to reduce and often eliminate an oil or mineral company's federal income tax liability through the sale of a production payment.

SANE ENERGY POLICIES A DESPERATE NEED

Mr. METCALF. Mr. President, the Nation urgently needs coordinated energy policies that will assure the most efficient use of our resources and, at the same time, reverse the present trend toward severe environmental damage of a kind that is often irremediable. We must strike a balance between maintaining a growing and prosperous economy on the one hand and maintaining or restoring the quality of our air, water, and land, on the other hand.

Secretary of the Interior Walter Hickel gave his full assent to this kind of balanced approach to resource development during hearings on the confirmation of his nomination earlier this year. I voted to confirm his appointment because he convinced me that he meant what he said about this.

So far I have had little reason to regret my affirmative vote, and a letter the Assistant Secretary of the Interior for Water and Power, James R. Smith, wrote to me regarding energy policies in the Northwest gives me further encouragement.

The letter was in response to a request by the senior Senator from Montana (Mr. MANSFIELD) and me to Secretary Hickel for a fully coordinated study of the electric power needs of the Northwest and the means for meeting these needs. Our contention was that current plans to meet rapidly growing electric energy needs in the Pacific Northwest rely too much on nuclear generating plants; and that alternative approaches should be considered because of the many unresolved conservation problems in connection with nuclear generation—as well as sharply escalating costs of nuclear plant components and fuel.

The alternative we suggested was the use of coal reserves in the northern Rocky Mountain and Great Plains States as a source of energy, combined with a grid of extra-high-voltage transmission lines—"electrical superhighways"—to carry the energy to markets in the Pacific Northwest and perhaps to the Midwest as well. We pointed out that certain already completed Interior Department studies point to this alternative as more economical and less damaging to the environment than the nuclear power schemes now being proposed.

Assistant Secretary Smith's reply was most encouraging because it demonstrated awareness of the problems we face, both in terms of the economics of energy development and the environmental problems involved. The letter evidenced willingness to study these questions in detail and I trust the Interior Department will soon be getting underway with such a study, although the letter makes no absolute promises.

In our letter, Senator MANSFIELD and I also urged an all-out program to develop magnetohydrodynamics, a highly promising new technology for the conversion of coal and other fossil fuels to electric energy without air and water

"Forty-three cases are pending before the Internal Revenue Service and officials have said 'many millions' in tax revenue are at stake."

"In the government's view, the disputed practice was a way to anticipate future income and avoid paying full income tax on it."

As a result of the court's decision, the production payment device has been used by the oilmen not to "avoid paying full income tax"—but to avoid paying any income tax, as explained.

The decision paved the way for an oil company to create self-induced paper losses that may be used to reduce or eliminate the income tax payments of not only the oil company but its subsidiaries.

In the Lake case, the legal issues considered by the Supreme Court were quite narrow and did not involve the propriety of selling production payments to reduce taxes.

But the Tax Court, other lower courts and the Internal Revenue Service (IRS) all have issued similar opinions on techniques employed to lower income taxes.

Typical is a decision handed down by the U.S. Court of Appeals, Fourth Circuit, which states:

"The legal right of the taxpayer to decrease the amount of his taxes, or altogether to avoid them by means which the law permits, cannot be doubted."

"If, upon careful scrutiny, the transaction has real substance and is not a sham, it matters not whether the taxpayer's aim was 'to avoid taxes or to regenerate the world' . . ."

In private rulings, the IRS has expressed the same opinion on production payments, saying they are proper as long as there is a bona fide transaction.

There is nothing new about the sale of carved out production payments—only the purpose of the transaction has changed over the years.

The use of production payments in the petroleum industry dates back to the turn of the century—years before the United States had an income tax.

At that time, a wildcat oil operator would grant a production payment to a landowner in exchange for the right to drill on his property.

This concept later was expanded and the wildcaters gave the production payments to drilling companies—instead of cash—for their services.

The final refinement came in the last few

pollution and at about 50 percent more efficiency than in conventional plants and even greater efficiency than in the highly inefficient nuclear plants.

It strikes me that there is a tremendous imbalance in money allocated to various new technologies for energy production with the lion's share of Federal funds now going to atomic energy and only token amounts being spent on coal research and development. There have been almost no Federal funds appropriated for MHD, for example, and the entire Office of Coal Research budget has been in the neighborhood of only about \$12 million annually. This is in stark contrast to the hundreds of millions spent so far on civilian nuclear power programs by the Atomic Energy Commission.

Thus it seems quite apparent to me that the Nation is badly in need of overall coordination of its energy policies. In our letter, Senator MANSFIELD and I suggest studies only of energy policies in the Northwest, but I firmly believe that such studies increasingly need to be made on a national scale. I very much hope that this sort of effort will be forthcoming and I plan to work with others who wish to create the means for implementing such studies.

I ask unanimous consent to have printed in the RECORD the letter Senator MANSFIELD and I wrote to Secretary Hickel and Assistant Secretary Smith's reply.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MARCH 19, 1969.

HON. WALTER J. HICKEL,
Secretary of the Interior, Department of the Interior, Washington, D.C.

DEAR MR. SECRETARY: It has come to our attention that the Bonneville Power Administration and utilities in the Pacific Northwest, basing their plans partly on the results of a study by Battelle Institute, are contemplating a vast program to build thermoelectric generators in that region. Many, if not most, of these generators are to be nuclear.

We are concerned about the conservation aspects of this projected program, about the rapidly escalating cost of nuclear plants and about other unresolved problems in connection with nuclear generation. We would thus like to suggest study of an alternative course of action which might provide at least part of the energy needs of the Pacific Northwest region and therefore lessen the reliance on nuclear generation.

There is ample engineering evidence, we believe, to indicate that electric energy produced with coal at mine-mouth in Eastern Montana and Wyoming, then transmitted via extra-high-voltage facilities to the Pacific Northwest, would be highly competitive in cost with energy produced in the Pacific Northwest in nuclear plants. The extra-high-voltage lines could possibly be a part of a larger network of such lines which would produce a number of other benefits. Thus the cost could be brought down even further, and the coal-produced power might enjoy a clear competitive advantage over nuclear power.

It is ironic that right in the files of the Department of the Interior repose studies which appear to back up this contention. Interior's Study 190, a study of a plan to connect the entire western two-thirds of the nation with extra-high-voltage lines, outlines the benefits to be achieved through such interconnections. These benefits would be produced in the form of increased reliability and through massive interchanges between the eastern and western portions of the sys-

tem, taking advantage of hydrological, seasonal and time-zone diversity. Another report, produced by Robert Nathan and Associates for Interior's Office of Coal Research, suggests that coal-produced power from Montana and Wyoming would be competitive with nuclear power produced near Pacific Northwest load centers—even without the benefits of the Study 190 transmission system and before the recent escalation in nuclear costs.

Other recent information indicates that coal from the Lake DeSmet area of north-central Wyoming, and probably coal in certain nearby areas of Montana, can be produced at a cost of six to seven cents per million British Thermal Units—compared to an earlier Missouri Basin low coal cost of 12 cents per million BTUs. The six-to-seven-cent cost is one of the lowest anywhere in the world.

South-central Montana and north-central Wyoming have more than adequate water for cooling purposes (although in some cases it might have to be transported to point of use). We refer here to the industrial water available from the U.S. Bureau of Reclamation's Yellowstone Reservoir in Montana, from USBR reservoirs in Wyoming, from a proposed State of Montana reservoir on the Tongue River in Montana and from the proposed (by USBR) Moorhead Reservoir on the Powder River in Montana and Wyoming.

The Montana-Wyoming coal fields are also perfectly situated for being traversed by one of the main east-west links of the Study 190 extra-high-voltage system. The coal fields would thus lie approximately half-way between large load centers on the system—in the Midwest and in the Pacific Northwest—and thus perhaps could serve both.

The potential is greatly enhanced by the possibility of the development of magnetohydrodynamics, a new technique for generating power from fossil fuels developed by a AVCO-Everett Research Laboratories. MHD (as it is called) offers a possibility for using coal to generate power without air pollution, with little need for cooling water and at about 50 percent more efficiency than in conventional coal-fired plants (and yet greater efficiency than in the relatively inefficient nuclear plants). For some unexplained reason, a \$10,000,000 request for an MHD pilot plant was not included in President Johnson's 1970 budget, even though immensely greater sums are appropriated for nuclear energy.

We would like to add that the potential for large-scale extra-high-voltage interconnections appears, from experience so far, to be even greater than was anticipated during planning stages. For example, the Northwest-Southwest intertie enabled 800,000 kilowatts of capacity to be transmitted from California to the Pacific Northwest during a recent cold snap in the latter region. Originally it had been intended that only energy (as opposed to capacity) had been scheduled for northward transmission over this intertie, but the capacity was needed because of unusual weather conditions—and it was available because of the intertie. We would expect similar unforeseen benefits to accrue from massive interties between the Pacific Northwest and the Midwest.

We therefore propose that the Department of the Interior, and its agencies involved with water, energy, and power, launch as soon as possible a study to identify the combined economic benefits of the Study 190 transmission system and the use of power from Montana-Wyoming coal in the Pacific Northwest. If you could develop a price tag for the study, we would be happy to supply all possible support for appropriations at hearings this spring. We believe this to be of urgent importance in view of the present planning by BPA and Pacific Northwest utilities. It is essential that we take a careful look at alternative proposals so as to achieve a system which will provide the greatest

benefits to all concerned—including the taxpayer.

We also wish to ask that an appropriation request for MHD be restored to the Budget. We would like to note that the Interior Department energy policy staff last summer recommended a total expenditure of \$50,000,000 for MHD development and we think that this is a reasonable amount for a program of such important potential.

Very truly yours,

MIKE MANSFIELD,
U.S. Senator.
LEE METCALF,
U.S. Senator.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., May 8, 1968.

HON. LEE METCALF,
U.S. Senate,
Washington, D.C.

DEAR SENATOR METCALF: We deeply regret the delay in responding to your letter of March 19 and wish to acknowledge receipt of your May 5 letter on the same subject.

We were impressed with your excellent analysis of the electric power resource and related transmission economics as it pertains to the Pacific Northwest and generally to the western area of the United States. This Department agrees that all interested agencies, Federal, public and private, should continually investigate the electric power resource and transmission situation to foster the delivery of ample supply of low-cost power to the consumer. The report "A Ten-year Hydrothermal Power Program for the Pacific Northwest, January 1969" prepared by Bonneville Power Administration together with "Transmission Study 190, February 1968" prepared by the Bureau of Reclamation, Southwestern Power Administration, and Bonneville are examples of studies which lead to implementation of low-cost power development. The Public Power Council, a group of 106 publicly owned utilities in the Pacific Northwest, is considering the initiation of a study of potential electric power resources that will provide their future energy. Their studies will delve into the economics of all practical alternative energy sources. A prime portion of the PPC studies will include investigation of potential development of mine-mouth plants in low-cost coal areas in Montana, Wyoming and other Rocky Mountain and Missouri River Basin states. Other investigations involving possible import of Alaskan coal, potential Canadian coal resources, pressurized and boiling water reactors, development of prototype fast breeder reactors and prototype magnetohydrodynamic fossil fuel generation facilities may also be included in the Public Power Council programs.

We would like to respond to the particular points brought out in your letters. We agree that the report on the hydro-thermal program for the Pacific Northwest may have led you to the conclusion that nuclear generation was the major thermal power source considered. The "models" presented in the Appendix of the report do list a series of twenty nuclear plants. On the other hand, as stated elsewhere in the report, fossil fuel power resources or other thermal resources were considered to be alternatives to nuclear development. For instance, the map on page 23 of the report shows two transmission interconnections "to the East" which are designated as possible future interties which would transmit fossil fuel power into the Pacific Northwest. The first such fossil fuel (coal fired) powerplant is now being planned as a 1000-mw plant located in Southwestern Wyoming.

We are reaching the final stage in programming the first six thermal plants that follow the development of Centralia, Washington, units 1 and 2 which are now under construction. This group of seven plants will have a total capacity of about 7,500 mw. 2,400 mw

of this total will be coal-fired steam-electric powerplants. These latter plants are the Centra plant of 1,400 mw and a 1,000 mw coal-fired plant programmed for development near a coal mine in Southwestern Wyoming. The other five thermal plants will probably be nuclear steamplants located in Oregon and Washington, west of the Cascades. The first of these plants is now under construction by the Portland General Electric Company at a site along the Columbia River north of Portland, Oregon. We believe it is highly desirable to develop a diversity of types of electric power supply so that economic trends that affect individual types of power sources do not excessively increase power costs.

We agree that the development of extra-high or ultra-high voltage transmission facilities, together with large coal-fired plants in Eastern Montana and Wyoming, can be expected to become competitive with nuclear power facilities located more closely to the Pacific Coast load areas.

We have had discussions with representatives of both the Peabody Coal Company concerning development of its Eastern Montana coal resources and the Reynolds Metals Company regarding its coal holdings in Northern Wyoming. From these discussions it appears that mine-mouth coal-fired plants in these areas could furnish competitively priced power to load areas in the Pacific Northwest by the 1980's. The Pacific Northwest hydro-thermal program is based on the concept that the continuing need for thermal electric power shall be obtained from the resource that provides low-cost electricity to the Pacific Northwest consumer.

The hydro-thermal program did not disregard the findings of Transmission Study 190. In fact, as pointed out previously, the program included the possibility of transmission connections to the east and importation of coal-fired thermal power. High-voltage interconnections from the Pacific Northwest to the east and southeast would allow more extensive development of coal resources in areas east of the Rockies, since the burden of transmission cost could be shared to provide the several types of power transmission benefits including transmission of power from the plant to the load areas east or west. It should be pointed out that maximum benefit of combined use of transmission facilities will be achieved when large-scale coal-fired powerplants, some 3000 mw or more, are located about midway in an east-west tie.

The six to seven-cent/million BTU cost of Montana coal mentioned in your letter would, in all probability, make power generated by this fuel competitive with almost any other available power source even though as much as one mill/kwh may be associated with extra transmission costs. We believe that your suggestion for an extension of Transmission Study 190 to include the economics of power source development, together with the cost and benefits of interconnecting extra-high voltage transmission facilities, is entirely appropriate. We have been considering this type of study extension which could be a part of our overall energy resources development program.

Your observation that the Pacific Northwest-Southwest Intertie was used this winter to transmit 800,000 kw of capacity north from California to the Pacific Northwest serves to illustrate the fact that well planned interconnections will usually be utilized to achieve benefits that exceed the amounts forecast in the feasibility studies.

MHD technology has not yet been developed to the point of commercial application but preliminary experimentation indicates that if the numerous engineering problems can be overcome that electric generation may be accomplished with reduced air pollution and water requirements along with increased efficiency. In this connection there is increasing interest in the U.S. in evaluating the need for larger scale experimentation and

in coordinating U.S. efforts with those of other countries. At present, however, commercial application seems to be some years away.

The fiscal constraints under which the F.Y. 1970 budget was prepared were not conducive to the undertaking of a new MHD pilot plant of the magnitude mentioned in your letter. Basically, the 1970 budget only continues on-going pilot plant projects.

A study is presently being made by the Office of Science and Technology of the state of technology of MHD, its possible implications to the U.S. electric energy economy, and what the public policy should be toward this new development. We wish to have the benefit of the OST view to determine if funds should be requested for Federal expenditures in research. If the decision is reached to go ahead in this area, a \$50,000,000 MHD research program would appear reasonable to advance this technology.

Implementation of the hydro-thermal power program for the Pacific Northwest now involves consideration of the possibility of fast breeder nuclear prototype plants. Various types of such plants are now being sponsored by several manufacturing and utility groups throughout the country. It may now be appropriate to similarly accelerate the cooperative development of prototype plants involving MHD electric generation. We believe that public, private and Federal agencies should coordinate in the sponsorship of programs that have future economic promise.

We appreciate your interest in and expert interpretation of such programs and studies as the hydro-thermal program for the Pacific Northwest and Transmission Study 190. We believe that continued interchange of ideas regarding such programs will accelerate future economic developments with due consideration of environmental factors.

Sincerely yours,

JAMES R. SMITH,
Assistant Secretary of the Interior.

GOV. ALBERT P. BREWER, OF ALABAMA, COMPLETES FIRST YEAR IN OFFICE

Mr. SPARKMAN. Mr. President, a few days ago Alabama's Gov. Albert P. Brewer completed his first year in the State's highest office. Albert Brewer was Lieutenant Governor of the State of Alabama and succeeded to the office of Governor upon the death of Gov. Lurleen Wallace.

There has been great interest in his accomplishments during the first year in office. Editorial comment has been favorable. I believe that the people of the State feel that he has rendered distinguished service and has shown great leadership qualities.

The Sand Mountain Reporter, Albertville, Ala., of May 13, 1969, published an editorial entitled "Brewer's First Year"; also, the Birmingham News of May 12, 1969, published an editorial entitled "Brewer's Year."

I ask unanimous consent that the two editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Albertville (Ala.) Sand Mountain Reporter, May 13, 1969]

BREWER'S FIRST YEAR

Gov. Albert P. Brewer ended his first year in the state's highest office last week, and according to his own evaluation, the school program which just passed the special session of the legislature was by far the most important achievement.

Despite the wide divergence over particular parts of his program, the Alabama state legislature has a healthy measure of respect for the governor and is sympathetic toward his program of governmental reform.

Brewer somehow resists classification as a reformer. Perhaps that is because reformers are generally thought of as wild-eyed, outspoken and radical types who make all sorts of pronouncements and dire predictions about what will or will not happen if their viewpoints are not immediately impressed upon the public will.

And Brewer fills none of these requirements. Yet he is effecting governmental reform in a real and meaningful way.

For one thing, economy is not just a catchword to be used at election time. While the establishment of a car pool is the most dramatic single part of his economy move, it is by no means the only economy.

People who do business with the state have discovered that to win a state contract, or to receive purchase orders for what they're selling, they've got to come up with the lowest possible price and the best possible service.

In the matter of state insurance, for instance, agents long used to paying tribute to some minor state satrap for the privilege of doing business with the state, are finding it no longer necessary. Insurance is being bought at far lower premiums and state officials under bond are being bonded at much lower cost to the state.

The cost of road building equipment, like all other heavy machinery, has climbed steadily over the past four years. Yet in a recent purchase the State Highway Department paid far less for the same machines than when similar units were bought four years ago.

State officials who have spent with a fairly free hand in years past are finding their requisitions for supplies and equipment given a very critical scrutiny.

In short, Gov. Brewer is applying to state government the same economies that private business must practice if it is to show a profit.

But more than that—His most effective work has been in a field of governmental cooperation, of using the great resources of the federal government to help Alabama all it possibly can. To this end he organized the Alabama Programs Development Office, pulling together a group of loosely organized and ineffectual agencies into a single unit designed, geared and financed to see that the state and its cities and counties get the maximum allowable federal assistance.

And in the field of industrial growth, he has set in motion plans to reorganize the Department of Planning and Industrial Development. Planning will become a function of the Programs Development Office and the search for industry will be greatly enhanced by establishment of a "data bank" through which industries in search of a home can have, in an instant, all the information they need about a particular site.

His recent trip to New York, during which he appeared before many of the nation's leading businessmen, was a real "plus" for Alabama. Business magnates were quick to note his ability and his earnest desire to pull Alabama up from the bottom of so many economic indices.

The Governor is demonstrating his belief that the cure to Alabama's economic ills is to come in two ways—the education of its people and providing them with jobs—jobs that will sustain a far greater standard of living than at present.

He has passed an education program through the legislature that is revolutionary in its approach to the recurrent financial problems. And he is working hard on the problem of providing jobs.

An assessment of his first year in office must be to give a "A-plus" for his effort. Only time will tell if those efforts pay off in the way he hopes they will.

[From the Birmingham (Ala.) News,
May 12, 1969]

BREWER'S YEAR

The papers have been filled with assessments of President Nixon's first hundred days in the White House, a traditional time for measurement of performance.

Closer to home, the state's chief executive also has passed a significant milestone in office, and one affording a somewhat more comprehensive look at personal style, policy direction and general effectiveness than is possible in the little more than three months Mr. Nixon has served.

It was one year ago last week that Albert Brewer became governor of Alabama succeeding the late Gov. Lurleen Wallace.

His performance during that year rates high marks.

Gov. Brewer, operating essentially in a low-key way made essential by the manner in which he came to office and the delicate political situation he found himself in, has succeeded in establishing himself as his own man, governor in his own right.

Not the least important aspect of his service to date is the impression he has made nationally, where Alabama's image has been considerably enhanced by the demeanor of its governor.

Brewer has "come across" as an intelligent, level-headed, honest, poised young executive—and, important to him in view of his expressed interest in seeking a full term in office next year, this good impression has been absorbed not only outside the state but by Alabamians who previously knew of him only casually as a legislator and lieutenant governor.

The sternest political test he has faced to date came in the just-concluded special session of the Legislature. He did an enormous amount of homework on the educational situation in Alabama, and when he presented a program it was carefully thought out and thoroughly prepared. And, despite stiff opposition on some points, he won most of what he sought.

Another test looms now in the presently recessed regular session. There are many thorny issues to be defeated, and the governor inevitably will be drawn into controversy on some of them. The outcome could in a very real sense bolster or damage his chances for election to a full term in 1970.

Those chances are subject also to many other political imponderables, including the identity of possible challengers for the office and the course of events in areas beyond a governor's control.

But so far, so good—for Alabama as much as for Albert Brewer.

NIXON DRAFT REFORM MEASURE APPLAUDED

Mr. TOWER. Mr. President, 1 week ago today, President Nixon recommended new legislation to revise the military draft in order to increase its fairness and to limit to a single year the period of prime vulnerability for any young man.

The President's recommendation closely paralleled my bill, S. 760. I am therefore on record as strongly favoring a change in our Selective Service System similar to the one recommended by the Chief Executive. I am, of course, not alone in my support for this needed reform measure. I ask unanimous consent to have printed in the RECORD two editorials: one from the May 19 issue of the Washington Star, and the other from the May 15 issue of the Houston Chronicle. The editorials are indicative of the widespread national support for the President's proposal. I look forward to supporting the finalized proposed legis-

lation when it comes before us on the Senate floor.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Evening Star,
May 19, 1969]

A MUCH-IMPROVED SYSTEM

The President's proposed reform of the draft should satisfy most fair-minded critics of that much-criticized institution. True, he didn't come out for an all-volunteer army, but such a step is hardly possible until the Vietnam war abates considerably. If it is once conceded that we are stuck with selective service, at least for the immediate future, then Nixon's changes should largely eliminate the two glaring flaws in the present system.

The first is its unfairness. As things now stand, some young men can beat the draft entirely through deferments of one sort or another while others are caught. Under the Nixon approach every American male would stand about the same chance of being drafted. Each Selective Service year a national lottery would be held. All those who had previously turned 19 would be subject to call through an ingenious method of randomly selected birthdates. For example, if John Smith Jr. were born February 7th and that were the 340th of the 365 birthdates picked, then John would probably not be called. The system even extends to a randomized alphabet system for picking and choosing among those with the same birthdate.

Some would contend that student deferments add an element of unfairness to the random-selection procedure. We don't agree. A student, like everyone else, gets his sequence number for callup at 19 or 20. He then may be deferred until he completes his undergraduate education or a year of graduate training. But afterwards, his name goes back into the pool of potential draftees. And as he retains the same sequence number, he has precisely the same vulnerability to the draft as before.

The other flaw in the present system is the uncertainty it lends to what are, after all, the crucial years for making decisions about education, career, marriage and raising a family. These sorts of decisions are hard enough under the best of circumstances, let alone with the draft staring one in the face.

Under the revised ground rules, young men would still be eligible for the draft from the ages of 19 through 26. But there are two key differences. One is that draft boards would henceforth start drafting the 19-year-olds and work their way up rather than the other way around. Thus the draftees, on the average, would be much younger, have fewer outside responsibilities, and incidentally be in better physical shape. Second, everyone would have one—and only one—year of "maximum vulnerability" to the draft whether at 19 for those who don't go to college or afterwards for those who do.

It is to be expected that these proposed reforms of the draft will provoke considerable debate. But when all is said and done, they do represent a fair and orderly approach to the problem. In our view, they merit congressional approval this session.

[From the Houston (Tex.) Chronicle,
May 15, 1969]

MAKING THE DRAFT FAIRER

President Nixon's proposals for changing the draft system—subjecting 19-year-olds to first call and deciding by lottery who among the eligibles goes—makes a lot of sense.

Granted, no draft system is perfect so long as it has to call up young men who don't want to serve. Mr. Nixon prefers a volunteer army, as we do, and he still thinks that a volunteer army is feasible once the Vietnam war is over.

But so long as a draft is necessary, then it should be as fair and as painless to the men involved as the nation is capable of making it.

Mr. Nixon doesn't propose to change the deferment system which is far from perfect, inasmuch as it favors young men from upper and middle class homes who can afford to go to college.

But he does propose that, from those who are in the eligible pool, the choice be made by lottery with every man in the pool on an equal footing.

We approve of this plan of calling 19-year-olds first, then keeping them on the vulnerable list for only one year. If they haven't been called during that year, they then would move on into the noneligible pool and proceed with their private lives without fear of any future disruption by the military.

This is a better way, we think, than having the possibility of military service hang heavily over a young man until he is 26. When the call comes late, it may completely disturb the progress he has made in education or business or sorely disrupt his personal life since by that time most men are married and have children.

Much of the resentment against the draft stems from the fact that—unlike in World War II—the armed forces don't need all the men who are eligible or available. During the past 10 years, the number of men inducted has declined from 70 percent to 50 percent of those eligible. What Mr. Nixon proposes is an improved method of choosing the one out of two who must go.

THE IMPORTANCE OF AID TO FEDERALLY IMPACTED SCHOOLS

Mr. MONTROYA. Mr. President, the Public Law 874 financial situation is in a very critical state of affairs, due to the low priority which the Nixon administration is assigning to the education of the youth of America.

Congress in its wisdom passed this legislation in recognition of the necessity to compensate local school districts for additional burdens imposed upon them by increased Federal activity in their area. The essence of this burden is precisely that of an added requirement to serve large numbers of children of Government employees, military families, and so forth, many of whom do not contribute to local tax rolls.

Yet the Nixon administration's largest single cut in our crucially important education programs is that of a \$332 million cutback in Public Law 874 funds for school maintenance and operations in federally impacted or major disaster areas.

In richer States, this may not present such an overwhelming blow, but in States such as my own—with many heavily impacted school districts—it represents an intolerable situation.

Mr. President, children falling under the 3(a) provision of Public Law 874 are those whose parents live and work on Federal property. These children will receive 100 percent entitlement for a total of \$145.9 million nationwide, of which New Mexico has been allocated \$6.1 million.

But it is the fate of children falling under the 3(b) provision of the act—whose parents work but do not live on Federal property—that is at stake here. The Nixon administration has decided not to allocate 1 penny of their \$436.5 million entitlement approved by Congress for fiscal year 1970. In my State of

New Mexico, this will mean a loss of \$6.4 million in desperately needed dollars, although the school districts have relied upon and received these funds since enactment of the legislation 18 years ago.

I fail to understand the rationale or purpose behind this action, since it is the Federal Government itself which has placed the heavy financial burden upon the affected school districts. Because of their slender tax bases, these school districts are already seriously overburdened in insuring that their own youth receive the education they have a right to expect. Many of the districts have gone into debt in behalf of their educational obligations. Indeed, because of the seriousness of the overall school crisis in New Mexico, brought about by a lack of funds, it has been necessary for the New Mexico State Legislature to call upon the citizens for additional tax money, and a \$25 million State tax increase has recently been enacted, whose primary purpose is to keep the New Mexico schools open.

Clearly, then, in being deprived of Public Law 874 assistance for the operation and maintenance of their schools, the school districts of New Mexico will suffer a most serious hardship due to difficulties in replacing funds through local and State tax revenues. Time and time again educators in New Mexico have called my attention to the intolerable burden they must bear unless full entitlement under Public Law 874 is forthcoming.

In the past, both the House and Senate have affirmed a policy of fully funding 3(b) entitlements under Public Law 874, and the congressional mandate should not be ignored. We must, therefore, insure that the progress of education in impacted areas of our Nation is not seriously impaired. We must ride herd on the Federal Government's very basic obligation to these school districts and its duty to keep faith with millions of children and their right to a quality education.

Additionally, I am deeply concerned about and most strenuously urge increased funding of the Public Law 815 program for school construction in federally impacted areas.

I am informed that there is currently \$72.2 million in funds available, which I would hope the administration will see fit to release immediately for the many applications pending. But the needs of New Mexico alone are about \$7 million, and nationwide funding needs are estimated to be at least \$247 million through fiscal year 1969, so the requirement for additional appropriations is all too apparent.

Many children in federally impacted areas of my State attend classes in buildings which have been declared firetraps, and are overcrowded and substandard. I am sure this situation is multiplied manifold nationwide.

Since 1950, both Public Law 874 and Public Law 815 have provided important assistance to school districts that are suddenly and severely overburdened with a school-age population as the result of increased Federal activity. While I acknowledge the need to curtail expenditures where possible, let us not pull the rug out from under the poor school districts of this Nation by forcing them to

carry more than their fair share of added complications arising through no fault of their own. Let us act in good faith by providing them full entitlement under Public Law 874 and increased appropriations under Public Law 815, and thus help their vital educational programs receive the sustenance we in Congress clearly intended them to have.

JAPANESE-AMERICAN TRADE RELATIONS—ADDRESS BY SECRETARY OF COMMERCE STANS

Mr. STEVENS. Mr. President, the present Secretary of Commerce, Hon. Maurice H. Stans, has served this Government well in many capacities.

It was recently my privilege to discuss with him the development of Japanese-American trade relations on the myriad problems facing the United States with regard to world trade. Secretary Stans has, following the lead of President Nixon, firmly dedicated the United States to a concept of freer trade, but in doing so he has, through his European trip and through his recent trip to Japan, indicated the necessity for reciprocity and the removal of artificial trade barriers throughout the world.

I ask unanimous consent that Secretary Stans' address made before the American Chamber of Commerce in Japan and the American-Japan Society in Tokyo on May 13 be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AN INVITATION TO PROGRESS

(An address by Hon. Maurice H. Stans, Secretary of Commerce, before the American Chamber of Commerce in Japan and the American-Japan Society, Tokyo, May 13, 1969)

It is a pleasure to visit Japan once again, and especially to see the exciting city of Tokyo at this beautiful time of the year.

I am particularly pleased to have the opportunity to speak before two organizations that have done so much to build the friendship between our two nations. This friendship is something we in the United States value highly, and want to preserve for all time.

The American Chamber of Commerce in Japan has my congratulations on turning twenty-one years old this year. In that time the whole world has marveled at the economic miracle which you have seen first hand and to which you have contributed so much.

JAPANESE-AMERICAN RELATIONS

From a standing start Japan has risen to the position of the Free World's second largest economy and fifth largest trading nation. In the United States we see tremendous evidence of that success. Japanese automobiles and motorcycles are on the streets of every major city in America. In almost any household you find a Japanese transistor radio, or tape recorder, or camera.

The United States, in fact, is Japan's leading customer. And Japan is our largest market overseas. So we have a powerful commercial bond between us.

As I have already said, the American Chamber of Commerce in Japan deserves a great deal of the credit for the development of this commercial relationship. And the American-Japan Society deserves a good measure of praise for the friendship between our peoples that has been created in the same time.

But the basic credit for Japan's economic achievements, of course, rests with the Japanese

people themselves—with their determination, energy, and imagination. Starting with just those resources and not much else, they have quickly become one of the economic giants of history.

The United States is very proud to be a trading partner in that development. We have benefited from it, just as the Japanese have, and we want to bring about even greater tomorrows in the future for the good of all of us.

My presence here today signifies the great interest which the Nixon Administration has in the full development of the Far East, its countries and its people. From the President on down, we look forward to working with Japan and all the free nations of Asia as friends and equals in dealing with our broad scope of mutual interests.

THE FOUR FREEDOMS

In Asia, as it was in Europe, the immediate purpose of my travels is to reaffirm the commitment of the Nixon Administration to the principal of greater commercial freedom—greater economic interchange—among all nations and all peoples. I would like to suggest here the foundation of the policies we intend to follow to attain that goal.

We believe the future progress of the free world will most effectively be achieved through a common commitment to Four Economic Freedoms—roads across the borders of nations to mutual progress:

Freedom to Travel.

Freedom to Trade.

Freedom to Invest.

Freedom to Exchange Technology.

The rightness of these ideals has been demonstrated in the years since World War II—in the tremendous gains in living standards in the Free World.

REALITIES

But these are ideals, not yet achieved, and today we must deal with realities that stand in the way.

Take, for example, the matter of trade.

At one time in history, wars were fought over trade issues and trade routes. In the 20th century world, we have learned that solutions to trade problems can be found through frank and friendly discussions—and these solutions can change the course of history for the benefit of all.

I am now here in the pursuit of frank and friendly discussions!

When I began these travels a month ago in Europe I announced that I was doing so for several purposes:

To renew old American ties and to make new friends.

To discuss some of our problems and to acknowledge others.

To identify differences and to search for agreements.

And to establish direct communications with other nations in order to better manage our common interests.

In other words, we want to establish a new rapport, a new friendship, a new understanding, with our trading partners throughout the world. We want to lay a foundation of mutual trust and respect now which will make it possible for all of us, in the near future, to resolve the issues of today and to minimize frictions which might lie ahead.

For no country has a trade problem unto itself. What affects one must necessarily affect at least one other. And in today's age, the problem of any one most often is the problem of many.

Today there are such problems. The United States is interested in improving the climate for freer trade—so are many of the friends we trade with abroad—and yet each of us faces protectionist trends and the existence of many trade and investment restrictions.

THE OPEN TABLE

We believe it is time all of us begin to recognize the mutual gains that can be

made by eliminating these unnecessary restrictions. To this end I have proposed an "Open Table" principle under which all non-tariff barriers are brought fully into the open, are measured, probed and diagnosed, and are dealt with in the same reciprocal manner as was so effectively done with tariffs in the Kennedy Round. This proposal met with accord in almost all of my discussions in Europe. Almost all the countries expressed the hope that the United States would continue the initiative along this line.

So I think it is fair to say that we have begun to accomplish the aims which took us abroad. We have brought our difficulties out into the open. We have discussed them thoroughly. We are all better aware of our respective internal circumstances that bear on these differences. And I am confident that we have begun to walk down the right path toward a resolution of many of them.

INFLATION

But our problems today are not only the problems of trade. At home we face severe inflation, resulting from pressures which have been building for more than four years.

Inflation has had a very unfavorable effect on our balance of trade and our balance of payments, because the spiral of rising wages, costs and prices weakens our competitive position abroad.

We in America know that the chief antidote to inflation is government responsibility.

Our challenge is to administer the antidote so it will reduce the fever without killing the prosperity from which it stems.

ANTI-INFLATION MEASURES

President Nixon is walking that narrow path of responsibility and restraint. The problem has been given the highest priority of any domestic issue—and he has taken significant steps which already have begun to produce results.

He has reworked the Federal budget for 1970 into a surplus of nearly six billion dollars—after fifty billion dollars in government deficits piled up over the past five years. The age of chronic deficits has been brought to a halt.

He has asked for a limited extension of the surcharge on income taxes.

He has recommended repeal of the 7 percent investment tax credit.

He has called for a thorough overhaul of the Nation's tax system, to eliminate inequities that contribute to economic unrest.

Meanwhile, the Federal Reserve System is holding down the growth of the money supply.

Judged by several standards, these measures have begun to take hold. Interest rates show signs of leveling off. The advance in consumer spending appears to be slowing down. The shortage of credit is beginning to put the right degree of restraint on borrowing, spending and construction.

We will stop inflation in the United States!

TRADE SURPLUS

The United States economy does not live in splendid isolation. There is a close tie between domestic and international economic affairs, and we know we need a high level of exports to finance American imports from Japan and around the world. We need it, too, to finance American travel, direct investments in other countries, mutual security, and aid expenditures throughout the world.

Our trade surplus dropped sharply last year. But we are determined to restore it—we have set an export goal of \$50 billion by 1973—and we will not let inflation price us out of world markets.

DIRECT INVESTMENT IN UNITED STATES

As part of our efforts to improve our balance of payments, we want to emphasize the long-standing favorable climate for foreign direct investment in the United States. We believe the far-sighted foreign investor can secure unique opportunities by having

a plant or other operation located in our country.

The United States has always offered foreign investors several unusual advantages: political stability; an intelligent, inventive, hard-working labor force quick to learn, and to improve on, mechanized methods; full legal protection of property rights, including patents, whose protection is provided for in the Constitution itself; and equal treatment for foreign and domestic investors in the management of property, and the unlimited right to take out earnings or withdraw capital.

Today businessmen from every continent are attracted to invest in the United States by the world's largest and most lucrative market, by an abundance of natural resources, by a well-developed infrastructural base, by the great purchasing power of our people, by the inherent economies of large-scale production, and by access to advanced technology.

Businessmen are finding that in many cases manufacturing in the United States is a more effective and more economical means of serving this vast market than exporting to it.

Production in the United States eliminates many expenditures involved abroad in transportation, financing, warehousing, and tariffs. Although some costs of production may be higher, these often are offset by ready access to the latest in technology and managerial expertise.

And so we extend an invitation to our friends in Japan and around the world to Invest in America.

JAPANESE INVESTMENT CONTROLS

And this is where I want to stress the advantages of reciprocity. We urge the Japanese government to adopt the same open policy and withdraw its own rigid investment controls.

We hope the doors of investment opportunity which we hold open to Japan, and to businessmen from around the world, will be reciprocated in a meaningful way to us.

The United States has no restrictions on the withdrawal of capital or profits from foreign investments in our country.

We seek the freedom for Americans to do business in Japan.

It is the right time for the right action. Japan ran a balance of payments surplus last year of more than \$1 billion.

The Japanese Gross National Product has risen to the second largest in the Free World.

While our sales to Japan increased by about ten percent last year, Japanese sales to the United States increased 35 percent!

Yet with all of this great economic strength in Japan, the foreign investor faces unprecedented frustration.

Two years ago a study by a Committee of the Organization for Economic Cooperation and Development stated, "No other advanced industrialized country confronts the foreign investor with the sort of obstacles presented by Japan."

That observation, regrettably, still seems to be valid today, according to many reports I get from American businessmen:

In manufacturing, few American investors are able to establish wholly-owned manufacturing subsidiaries or to acquire a majority interest in joint ventures.

In the past five years, less than a half dozen foreign investments in the manufacturing field have been validated by the Japanese government where the foreign equity was more than 50 percent.

There is more American investment in many non-industrialized developing countries than there is in Japan, one of the world's leading industrial nations.

We think, with absolute honesty and candor, that Japan would serve its own best interests by prompt liberalization of foreign investments, including the unrestricted right

of majority foreign ownership. We think that Japan would have nothing to fear from American capital and technology within its borders, living under Japanese laws. And we think that the people of Japan would be major beneficiaries if this were permitted. There is no place in the world where liberal investment policy toward American capital has failed to produce a stronger economy.

OTHER RESTRICTIONS

In the trade area, we are disappointed that Japan has not made more meaningful progress toward eliminating its remaining import controls. We would like to see Japan make a determined effort now to eliminate these quantitative restrictions that are not in accord with its commitment under the General Agreement on Tariffs and Trade. Further delay will unnecessarily aggravate trade relations between us, because these restrictions are looked upon by many Americans as a symbol of unyielding Japanese attitudes on these matters.

We are heartened by the recent increase in overseas travel allowances for Japanese citizens but look forward to the day when all limitations will be removed, so that more of the people of Japan can Discover America.

And we would like to see the exchange of technology between American and Japanese industry freed from all controls except those imposed by market forces and patent laws.

We realize these many restrictive policies had their role in the days after World War II to help Japan rebuild its economy. But now Japan has taken its place as a major industrial power. It has grown in strength to the point where it no longer needs the protections and limitations appropriate to an insecure nation.

Protectionists in the United States seize on such restrictions in other countries as justification for legislating against imports. They have succeeded in having more than 300 bills introduced in the Congress this year to impose quotas on dozens of commodities ranging from textiles to strawberries.

We know the dangers of protectionism. If one country erects a barrier, others respond in kind. The result is an escalation of barriers and a contraction of trade.

To avoid that misfortune, each country must do its part to remove its own restrictions.

There are, of course, exceptional cases in which we must understand each other's special problems and be willing to take cooperative action to solve them.

TEXTILES

The United States has a current problem that requires this kind of attention. Our textile industry has been hit hard by dramatic increases in imports, and the pressures for legislative quotas are immense. We fear that unilateral quotas, once started, could snowball to countless other products, and our aims for freer trade would be seriously set back.

There are two points of logic on this textile matter that I want to mention for everyone to know:

(1) The United States is the only remaining free market for textiles among the major nations of the world. All the others have imposed restrictions of one kind or another on imports. The United States just cannot absorb the entire potential output that all the producing nations can deliver. Isn't this understandable?

(2) If this problem is worked out promptly, no jobs need be lost in Japan or anywhere. We are willing to allow all producers to share in the growth of our market. All we seek to do is to stop a growing wave of imports that will deluge our markets and bring catastrophe to our industry and its workers. Isn't this reasonable?

Therefore, we seek an international understanding on textiles. In view of the circumstances, we regard such an accommodation as necessary to preserve the overall thrust of

our policy toward freer trade. An exceptional circumstance does not deny the major premise in open markets.

FREER TRADE

For more than three decades the United States has sought freer trade, and we have made substantial progress. World production has almost doubled and world trade has trebled since 1950 alone.

The world has become too interdependent to return to the restrictive policies of a bygone age. In the new age of international business, all nations benefit from trade expansion and from investment freedoms.

No nation can expect to enjoy for long the fruits of a one-way policy.

The Nixon Administration firmly intends to keep the United States on the road toward freer trade, freer investment, freer travel and a freer exchange of technology. Reciprocity here in the Far East—in the removal of artificial trade barriers, in the creation of a new climate for freedom to invest, and in understanding of our one unusual problem—will help us all to move strongly in that direction.

CONCLUSION

As you know, President Nixon has made peace the first priority of his Administration, and he is directing the most diligent search for a way to end the war in Vietnam. I am confident he will find it and thus set the stage for a new surge of world-wide prosperity.

Next to the achievement of peace, his first priority is to restore trust and confidence to our relations with America's trading partners around the world.

Since World War II, the economic progress of the Free World has been built on a spirit of cooperation. Whenever a weak link developed, we banded together to repair it in the interest of maintaining an economic order capable of growth and expansion for the benefit of all.

Under President Nixon, the United States seeks full and frank consultation—an international open table—to further increase the traffic in people, in goods, money and technology between our country and the other nations of the Free World.

This is the way, we believe, to build people-to-people friendship; to produce more well-being at less cost for more people; and to improve the prospects for stability and peace in the world.

THE VISTA PROGRAM IN ARKANSAS

Mr. FULBRIGHT. Mr. President, the VISTA program in Arkansas, under the administration of James L. Ranchino, has proved to be an outstanding success. In these days when we hear so much of the shortcomings of so many activities with which our Government is concerned, it is encouraging to read the account of the VISTA program in Arkansas, published in the Arkansas Gazette of May 7, 1969.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Little Rock (Ark.) Arkansas Gazette, May 7, 1969]

STATE VISTA PROGRAM, CALLED BEST IN NATION, ALSO TO BE THE LARGEST

ARKADELPHIA.—Arkansas will have the largest VISTA Associate program in the nation this summer, according to James L. Ranchino, assistant professor of political science at Ouachita Baptist University here.

Ranchino, who headed the first VISTA Associate program in Arkansas last year, will serve as director again this year.

The summer program allows potential VISTA volunteers, many of whom are college

students, to work for the summer with poor people in their home states.

Later, they can sign up for the normal year of service with VISTA (Volunteers in Service to America). The project has been called a "domestic Peace Corps."

Last year's VISTA program in Arkansas had the lowest budget of all the VISTA programs and was rated the most effective in the nation. Of the \$50,000 allotted to the Arkansas program, only \$46,000 was used. This made Arkansas project the only one to end the summer with a surplus.

"When I tried to give VISTA back the rest [of the money] they were amazed," Ranchino said. "We still have money in the bank because they don't know how to take it back. We simply ran a good, inexpensive program, which produced results."

VISTA headquarters has expanded the program and allotted Ranchino \$75,000 to train and provide for the expenses of 75 student volunteers from the state's colleges and universities.

Commenting on last summer's success, Ranchino said that the effectiveness was much greater than he had hoped for.

"I didn't really think it would accomplish what it did," he said. "For one thing, in every place we went there are now regular, permanent VISTAS. It's a tribute to the kids, actually."

ATTRIBUTES SUCCESS TO RECRUITING JOB

He said none of the volunteers had dropped out of the program.

"This was phenomenal, and Washington just couldn't understand it. Primarily it was because of the excellent job of recruiting."

The 48 students were recruited from colleges by four field supervisors and recruiters—all of whom are Negroes.

"We sent the students out to 32 counties in the state from Benton County in the northwest to Mississippi County in the northeast and from Texarkana across to Bradley County," Ranchino said.

"Although many areas in the state have poverty problems, we can only go where we're invited. In every one of these areas we had sponsors and we assigned our students to these agency sponsors. In Texarkana, for instance, Model Cities sponsored a couple of our people, the CAP (Community Action Program) sponsored some, and up in Newton County, the School Board sponsored us," he said.

POINTS OUT FIGURES ON POVERTY LEVEL

Ranchino said Arkansas had 68,794 families with an income of less than \$1,000 a year. There are 233,410 families, or 47.5 percent of all the state's families, who make below \$3,000 a year. The federal government recognizes \$3,000 as the poverty level.

Forty-one per cent of Arkansas's population over 25 years of age has not finished the eighth grade, which means that there are 250,000 functional illiterates in Arkansas, he said.

"These are real needs," he said. "It's true also that in black counties such as Mississippi, poverty percentages are greater than other counties. Fifty-four per cent of the 83,000 population are poor."

"In terms of job opportunities, blacks are unemployed at the rate of two to one over whites * * * For every 15 whites who live in ramshackle houses in the state, there are 42 blacks who live in them."

FLEXIBLE PLAN HELPED IN SUCCESS

Ranchino began his plan with a budget he drew up himself. Flexibility in the program meant the difference between success and failure, such as in the Oklahoma VISTA program.

"We weren't trapped and we innovated a lot," he said. "In Hot Springs, for example, we created something called a 'Soul Exchange' where the black kids from the poverty areas could meet every night for movies, dances and so on."

"The Arkansas program was doubly tough

because there were only VISTAS serving * * * in Pulaski County, Garland County and an area around Russellville.

"Up until this time VISTA had a bad name in the state because there were Northeastern kids coming into the state telling Southerners how to live and generally there was bad public relations."

"We wanted to do two things. One, we wanted to get into areas of the state where there were no other VISTAS and open them up. Secondly, we wanted to show that these VISTAS were Southerners who were concerned."

CULTURAL SHOCK BIGGEST OBSTACLE

"The biggest obstacle for the volunteer is 'cultural shock,'" he said. "Most of them are so insulated that when they suddenly find that everything they have been taught * * * does not exist in the society of the poor, it scares the daylight out of them. They become frustrated and want to quit."

"It takes about five or six days for this to happen. The first day you come you're very frightened but eager to get going. The second day you talk to some people and then Thursday night you find that nobody shows up for the meeting that everyone said they were interested in and would attend. You spend Friday and Saturday doing some serious soul searching."

"The first week is critical and that's where you have the most dropouts. We didn't have any and that's incredible. We attribute this to the work of the supervisor who saw the volunteer every day."

LACK OF INTEREST IS SECOND SHOCK

The second shock for the volunteer, according to Ranchino, is the realization that the community to which he is assigned really isn't interested in change.

"In 10 weeks you're not really going to organize and break down a system which has built up over a hundred years. One of the purposes of the VISTA Associate program is, of course, to deliver some direct services to the poor, but it is also to effect change. In the end this change must take place in the middle class society because the poor simply don't have the resources."

"Of even more importance is that it gives middle class black and white college students a picture of what their society is really all about. Hopefully, when they move back into their society they're going to be very conscious of what's going on."

STUDENTS' GRADES SHOWED IMPROVEMENT

Ranchino said a study of the volunteers after they went back to college showed their grades had improved. He attributed this to the student's increased awareness and interest in society.

"Here is a chance to get at the bedrock level, he said. "You don't sit around bulling and talking and taking surveys. You're there where the action is. You're sleeping in a poor person's home and eating with him. You'll never be the same again."

"We took a little girl from Warren, for instance, a real quiet naive sort, sent her to Blytheville along with another girl from Rogers, who had maybe seen five black people in all her life. They moved into an all black neighborhood—the first time in the history of Blytheville. They were called the 'VISTA Blockbusters' and they did a tremendous job."

In another instance, a shy Negro girl from Arkansas AM and N College at Pine Bluff was sent out to Texarkana after a week of orientation.

"We sent her to Texarkana and she was immediately sent out to the area outside of Ashdown," Ranchino said. "She organized 2,000 people in all forms of recreation in community activity. This little girl was unbelievable. We had thought she would be one of our worst volunteers, but instead she turned out to be one of the best. They even put on an integrated talent show down

there which the community paid to come and see."

RANCHINO LOOKING FOR VOLUNTEERS

Ranchino is looking for volunteers, preferable college juniors and seniors. The only qualification is that the volunteer have a skill which he can teach.

"Any skill which a volunteer has is more than people in poverty have. Last year everyone who applied was accepted," he said.

A week prior to their assignments, the students will receive orientation at Oua-chita, for which consultants will be brought in from across the country. All expenses are paid and at the conclusion of the program the volunteers get \$116.

"We're recruiting right now," he said. "If you really want to have an exciting summer where you feel you're making a contribution, and for the first time really see our society and your role in it, then you ought to get involved."

THE ARMY STRATEGIC COMMUNICATIONS COMMAND

Mr. GOLDWATER. Mr. President, I am pleased to invite the attention of Senators to an organization that is most significant, not merely to my State of Arizona, but to the security of the Nation, as well.

I refer to the U.S. Army Strategic Communications Command, known as Stratcom. This is a worldwide communications-electronics organization having its global headquarters at Fort Huachuca, in Arizona. It is commanded by Maj. Gen. Walter E. Lotz, Jr.

This past weekend I enjoyed another visit to this historic fort which was the headquarters of the first unit I served in as a Reserve officer.

Stratcom, celebrating its fifth anniversary, was organized in order to provide centralized management and direction of the Army's long-haul communications by integrating all Army communications networks and the Army-operated portion of the Defense Communications System.

As we all know, the future peace of the world depends upon better communications among all countries. We also know that the free world's defense against aggression depends on instant communications in order to deploy military forces. This is the work of Stratcom—to develop and maintain global and instant communications.

Last July 27, 1968, the Arizona Daily Star, published an editorial which reflects the significance of Stratcom's worldwide communications and also tells why we in Arizona are especially gratified to have this vital organization located in our State. I am certain many Senators will find this editorial of interest. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Tucson (Ariz.) Arizona Daily Star, July 27, 1968]

SOME TALK IS NOT CHEAP

"Talk," it has long been said, "is cheap!"

But when that "talk" is vital military information, to be sent swiftly and effectively to any or all of the widely dispersed U.S. armed forces all over the world, it is far from cheap. Its costs are huge, but it is one of the prices the United States pays to protect its national security, and to guarantee that

there will be no "Pearl Harbors" in the future.

Where an almost inconceivable series of coincidences delayed a warning message from Washington to Pearl Harbor in 1941, making possible the debacle of that fateful Sunday morning, today, through the magic of STRATCOM, with headquarters at Ft. Huachuca, such a message would have been transmitted in minutes, rather than hours.

The U.S. Army Strategic Communications Command, to implement and maintain that ability, is spending \$600.7-million each fiscal year to insure the security and coordinate the effective action of the nation's armed forces, where ever they may be.

Old Ft. Huachuca, built as an operating base for action against the Apaches, now becomes the heart of the greatest system of communications known to man.

Tucson, which has a two-fold interest in this amazing operation should be interested in the manner in which this world-wide expenditure is made. It looks like this:

	(million)
Operation and maintenance.....	\$221.4
Military personnel costs.....	217.3
Housing-Management	1.6
Stock fund.....	18.6
Military construction.....	10.4
Procurement, equipment, missiles-Army	131.1

Here in Arizona, where the headquarters of this far-ranging command is located, Ft. Huachuca has become the state's ninth largest community, with a noon-time population of approximately 20,000 people, dropping to 16,000 at night, when portions of the personnel seek homes outside the station. Of the civilian personnel employed at the fort, 327 live in Tucson with their families. Others reside off base in other communities.

This increasing demand for goods and services on the part of STRATCOM people at the Fort has gained the small community of Sierra Vista, just outside the gates, an increase in business payrolls of \$352,000 since March, 1967 and an increase in city tax receipts of 27 per cent.

STRATCOM had spent \$19.1 million with Arizona firms, at the closing of the fiscal year; has budgeted \$363,000 for its share of the house-keeping for 1968 and is paying civilian wages so far this year amounting to \$8.2 million in Arizona.

The total annual military payroll for the year 1968 at Huachuca will be \$24,650,000, and it will be nearly matched by the civilian payroll for the entire year of \$23,608,000.

Talk, when it becomes worldwide communications for national security, is not cheap.

THE PRESIDENT'S SPEECH ON VIETNAM

Mr. MURPHY. Mr. President, last Wednesday evening, President Nixon's televised message to the American people on Vietnam met with enthusiastic, bipartisan support throughout our Nation. His reasoned and flexible approach to this conflict should hasten the peace we all seek so strongly. Even more, the President has spelled out in specific terms for all of us exactly what the situation is in Vietnam so that we may know where we stand, what we plan to do, and what we can expect in the future. Mr. President, I ask unanimous consent that an editorial commenting on the President's speech, printed in the San Francisco Examiner on May 15, 1969, be printed in the RECORD. I feel that the editorial fully sums up the reactions of the country as a whole to President Nixon's peace plan.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE PRESIDENT'S PLEA FOR PEACE

Last night the world witnessed the agony of power.

Last night the President of the strongest nation on earth humbled himself in a plea for peace.

President Nixon pushed beyond the boundaries of the past in a search for just solutions to the tortured tragedy of Vietnam.

He offered concessions of major magnitude. He offered friendship.

He offered face-saving salvation for the enemy.

He offered hope and dignity and self-determination for the South Vietnamese.

The words were Richard Nixon's. The heartbeats behind these words were those of thoughtful citizens everywhere.

None should make the mistake of excepting portions of the address and drawing conclusions from individual elements. Such conclusions could be false. And dangerous.

While it was a speech of many parts, the message was indivisible.

Each word and thought and promise was a part of the whole.

It was a speech delivered from strength. It was a speech without the arrogance of power. But the power was there.

Let the doves and hawks in our land read and heed his plea for their support.

For he has offered terms they can support. Let the despots of other lands who seek to dominate the world read and heed his plea for their understanding.

For he has offered terms they cannot afford not to accept.

President Nixon carried the olive branch—not an umbrella—to Hanoi.

He carried it in a mailed fist.

President Nixon sincerely seeks peace in our time.

But not at any price.

PESTICIDES: NEW PROBLEM OF POLLUTION

Mr. TYDINGS. Mr. President, this week the Commerce Subcommittee on Energy, Natural Resources, and the Environment, of which I am a member, began hearings on the effects of pesticides on commercial and sport fisheries. The hearings are a response to increased public concern over the widespread use today of persistent, toxic pesticides in our society.

An immediate cause for this concern was the seizure by the Food and Drug Administration of 28,150 pounds of Lake Michigan coho salmon that contained an excessive concentration of DDT. Preliminary reports indicated DDT levels of 19 parts per million. A dosage of above five parts per million is deemed hazardous to health.

As is well known, Sweden has banned the use of DDT for 2 years. How and why she came to this decision is related in a short piece by Robert C. Cowen in the May 16 issue of the Christian Science Monitor.

Yesterday, the distinguished junior Senator from Wisconsin, who has sought for some time to bring to the attention of this country the dangers of excessive pesticide use, testified before the subcommittee. His remarks constitute one of the best brief summaries of the pesticide problems I have come across and are well worth the attention of all those concerned with environmental quality.

I therefore ask unanimous consent that his statement and Mr. Cowen's article be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From Christian Science Monitor, May 16, 1969]

BENEFIT OR PERIL? NATIONS WIDEN BAN ON DDT USE TO CURTAIL POLLUTION HAZARDS

(By Robert C. Cowen)

LONDON.—DDT is becoming an outlaw on this planet.

Hungary banned it some time ago.

In the United States, Michigan has banned DDT and Arizona has suspended its use for a year.

And most recently, Sweden announced its widely publicized two-year ban on the poison.

Meanwhile, both Britain and the Soviet Union are considering whether to discontinue its use.

The trend seems clearly defined. With abundant evidence that DDT and related poisons are permeating the environment on the earth, countries that can afford to do so are beginning to back off from their use.

DDT is still the cheapest, most versatile weapon for fighting crop-eating bugs and other insects. Many countries whose needs are great and whose economies are shaky would suffer by giving it up. But countries that can bear the cost are increasingly shifting to alternative chemicals that do not persist after their job is done.

CONFERENCE HELD

Commenting on this in a recent interview, Dr. Norman W. Moore cited Sweden's action as an important indicator of this trend. As head of the Toxic Chemicals and Wildlife Division of Britain's Nature Conservancy, Dr. Moore has become a world authority on pesticide contamination. As such an authority, he took part in a conference of experts from many countries which advised the Swedish authorities before they imposed their pesticide ban.

In past years Swedish wildlife was poisoned by certain mercury compounds. The authorities, in dealing with this, were alerted to the danger of environmental poisoning. Noting a rising concern elsewhere about DDT, aldrin, dieldrin, and other organochlorides, as this class of persistent poisons is called, Swedish experts began looking for contamination.

They found poison residues in the Baltic and its wildlife, especially in fish and sea-birds. Moreover, the residues got bigger, the farther north they looked. This might be an effect of colder climate which could slow the processes that break down pesticides, for even organochlorides slowly break down in nature.

Concerned over these findings, Sweden decided to do something about the situation. First it called the meeting March 25-27 which Dr. Moore attended.

Scientists of many shades of opinion talked on all aspects of the pesticide problem. They underwent what Dr. Moore called "cross-examination by a high powered audience including some Cabinet ministers."

Dr. Moore said he was impressed by the breadth and fairness of the discussion. Some experts favored a ban, some didn't.

Every country has to make up its own mind on this issue, Dr. Moore explained. At the meeting, it was recognized that some countries could not afford to do without DDT. This means a ban by one, or by a few countries, will not halt global pollution. Indeed even countries banning the poison may find it infiltrating from outside. It can be argued that a ban would be futile. But Dr. Moore observed, "If we all take this view, nothing will be done."

So Sweden's National Poisons and Pesticides Board listened to the experts and then acted.

CHEMICALS BANNED

It banned every use of aldrin and dieldrin from next Jan. 1.

It forbade, from the same date, putting DDT and lindane in preparations for home gardening and household use.

And all other uses of DDT will be banned during 1970 and 1971. Hopefully, during that test period, research will show what a total ban on DDT might accomplish.

Meanwhile, in Europe as a whole the pesticide picture is in a state of flux.

To mention a few cases, Hungary, in a decision little known in the West, has banned all organochloride insecticides. The Soviet Union never allowed aldrin and dieldrin to be used. Now it is eyeing DDT.

In France, aldrin and dieldrin are banned as spring seed dressings. The Netherlands also bans such dressings.

Britain first banned aldrin and dieldrin as spring seed dressings in 1962. In 1965 and 1966 it greatly restricted other uses of aldrin, dieldrin, and heptachlor. Now a special commission is reviewing the use of all persistent pesticides, including DDT.

"Our national policy," Dr. Moore explained, "is to ban all of these ecologically damaging pesticides. We won't stop using them all at once. But we will phase them out."

THE EFFECTS OF PESTICIDES ON SPORT AND COMMERCIAL FISHING

(Statement by Senator GAYLORD NELSON, before Subcommittee on Energy, Natural Resources, and Environment, U.S. Senate Commerce Committee, May 19, 1969)

Mr. Chairman, I want to express my appreciation to this subcommittee for making it possible for me to testify here this morning on the effect of pesticides on sport and commercial fishing.

Although I have introduced legislation to prohibit the interstate sale and shipment of DDT during the past three Congresses, this hearing represents the first opportunity that I have had to comment on this important issue before a Committee of Congress.

I know of no other single environmental pollutant which is endangering the quality of life on earth more than DDT and other persistent pesticides of the chlorinated hydrocarbon family.

While pesticides were initially developed to combat many of man's enemies, including undesirable insects, plant growth and rodents, these poisons cannot distinguish between our friends and our enemies. They can be as lethal to beneficial insects and creatures as they are to destructive ones.

In addition to being unable to isolate their targets, chlorinated hydrocarbons are also especially persistent and fail to substantially break down or decompose into harmless by-products at the point of application. Instead, they travel through the soil, air and water to pollute plant and animal life far removed from the target area.

For example, DDT, although sold commercially less than 25 years, has polluted the environment on a worldwide basis. In only one generation it has contaminated the atmosphere, the sea, the lakes and streams, and infiltrated the fatty tissue of most of the world's creatures.

The National Wildlife Federation reports roughly 75 percent of specimens of fish, birds, and mammals collected from various parts of the world, including the Arctic and Antarctic regions, contained DDT, or what it becomes after metabolism.

California marine scientists collected several hundred samples of fish and shellfish from the Pacific, in both salt water bays and the open sea. They reported 396 of the 400 samples analyzed contained measurable DDT residues.

Interior Department scientists collected 15 samples of air from nine different locations throughout the country and analysis showed that all contained DDT residues.

The long-range biological effects of this global contamination, which is building up every day that use of DDT continues, are

not yet known but the potential is present for a national calamity. Indeed the damage already done is colossal.

DDT remains in toxic form in soil, water, air, and living plants and animals for many years after it is applied. It drifts with the air, flows with the rivers, falls with the rain.

This pesticide is one of the most persistent—remaining toxic for 10 years or more after application—of the more than 60,000 available chemical preparations now registered by the Federal Government.

In connection with this characteristic, its tendency to concentrate in the food chain and cause sublethal chronic effects on fish and wildlife is well established.

This is called biological magnification, which results in an increasing concentration of the pesticide progressively along the food chains until it reaches a serious and often lethal level.

A well-researched example of this dangerous phenomenon was documented in Clear Lake, California. In order to control a troublesome flying insect that hatches in the lake, the water was treated with the insecticide DDD—similar to DDT, yielding a concentration of .02 parts per million. Plankton, which include microscopic water-borne plants and animals, in the lake accumulated the DDD residues at five parts per million. Fish eating the plankton concentrated the pesticide in their fat to levels from several hundred to up to 2,000 parts per million. Grebes, diving birds similar to loons, fed on the fish and died. The highest concentration of DDD found in the tissues of the grebes was 1,600 parts per million.

After many years of general apathy by the public and governments alike, efforts are finally being mobilized at all levels to deal with the threat of pesticides to the environment, fish and wildlife and man.

Sweden has just banned the use of DDT for a period of at least 2 years. According to the London Observer, this is the first time any nation has instituted such a sanction on a pesticide.

During a recent conference on pesticides in Stockholm, evidence was presented that DDT, even in very small quantities, could affect human metabolism. One of the studies cited was Russian research that indicated that workers whose jobs bring them in contact with DDT and other organochlorine pesticides were found to suffer from changes in the liver which slowed down the elimination of wastes from the body.

Here in the United States, the establishment of firm sanctions on the use of persistent pesticides would be entirely consistent with the recent recommendations of two highly regarded presidential panels.

In my judgment, the most important recommendation of the Wiesner Committee in 1963 was the one urging cutbacks in the use of such persistent pesticides as DDT. The panel recommended:

"The accretion of residues in the environment (should) be controlled by orderly reduction in the use of persistent pesticides. As a first step, the various agencies of the Federal government might restrict wide-scale use of persistent insecticides, except for necessary control of disease vectors. The Federal agencies should exert their leadership to induce the States to take similar actions. Elimination of the use of persistent toxic insecticides should be the goal." (Italic added for emphasis.)

The report of the Environmental Pollution Panel of the President's Science Advisory Committee in 1965 also dealt with this subject. It recommended:

"Research should be encouraged toward the development of pesticides with greater specificity, additional modes of action, and more rapid degradability than many of those in current use.

"Pesticide effectiveness should be increased and total environmental contamination decreased by further research leading to the

more efficient application of pesticides to the target organisms."

The State of Arizona, growing concerned about increasing residues of DDT in milk and other food products, has banned the use of DDT within its borders for a year. A Pennsylvania State Senate committee has concluded a 7-month study of pesticide use with the recommendation that DDT and other persistent pesticides be banned from use in fields and forests. In addition, the committee has proposed the creation of a Pennsylvania Board of Ecological Review to advise the public and Government officials on the interrelationships of natural vegetation and animal life with their environment.

Michigan, Illinois and Wisconsin have already issued recommendations against the use of DDT for the Dutch Elm disease, which is one of the primary targets of DDT use in the United States today.

Wisconsin is also the scene of the first major confrontation between the pesticide industry and concerned citizens and scientists. The Citizens Natural Resources Association of Wisconsin and the Izaak Walton League have filed a petition with the Wisconsin State Department of Natural Resources to ban the use of DDT in the State under any circumstances where the pesticide can enter world circulation patterns and further contaminate the biosphere.

Beginning last December, the citizens groups and the Environmental Defense Fund, a Long Island, N.Y.-based alliance of concerned lawyers and scientists, have presented extensive testimony outlining the growing pollution of the environment by persistent pesticides in the chlorinated hydrocarbon family.

Distinguished scientists, ranging from biochemists and biologists to ecologists and toxicologists, have presented volumes of testimony supporting the citizens' petition.

Dr. Robert W. Risebrough, an environmental scientist at the University of California at Berkeley, stated that the effect of pesticides on man may be very serious. He said that man accumulates 12 parts per million of DDT in his fatty tissues before the body discharges it. He said that this is enough to stimulate enzyme production, which acts as catalysts for bodily processes, such as digestion. Risebrough said that the extinction of some birds has been traced to enzyme induction by DDT, impairing their ability to reproduce.

Dr. Charles F. Wurster, Jr., an organic chemist at the State University of New York, Stony Brook, testified on the range of the pesticide residues through the world. He confirmed that DDT has been found in penguins in Antarctica and is causing the extinction of the rare Bermuda petrel, a sea bird which never has direct contact with areas where DDT is used.

Other witnesses have testified that DDT goes into the atmosphere along with evaporating water, builds up to extremely high levels in predator birds and animals, and has caused new insect problems by killing predators that once held those insects in check.

Dr. Joseph Hickey, a University of Wisconsin wildlife ecologist, said that DDT has been linked to reproduction failures of certain birds, including the eagle, the osprey and the peregrine falcon. Dr. Hickey and other researchers have traced the presence of pesticide residues to a decrease in the weight and thickness of the shells of eggs produced by these birds.

In related testimony, Lucille Stickel, the pesticide research coordinator of the Interior Department's Patuxent Wildlife Research Center, states that the presence of small quantities of DDT and its derivative DDE in the diets of mallard ducks decreased egg-shell thickness, increased egg breakage and decreased overall reproductive success.

This and other testimony has represented the strongest case that has yet been presented in any public forum for new sanc-

tions to be placed on the use of DDT, the most expendable of all the persistent pesticides.

The effect of pesticides on sport and commercial fishing became of immediate concern in the Great Lakes region earlier this year when it was learned that the Michigan Agriculture Department was withholding 146 cases of canned Lake Michigan Coho salmon due to concentrations of pesticide residues in the fish above the normally safe levels.

According to conservation officials in Wisconsin and Michigan, this was the first time that fish had been detained because they contained questionable levels of pesticide residues.

The Food and Drug Administration has the Federal responsibility for preventing foods contaminated by pesticides and other harmful substances from reaching the general public. It has a lengthy history of detaining foods that have accumulated a dangerous level of pesticide residues. But, in almost every case, the foods have been vegetables and fruits, which receive a direct application of pesticides, or milk, meat, and poultry, which are derived from animals which consumed commodities which are treated with pesticides. For the most part, this pesticide contamination has occurred because of the overuse or misuse of certain pesticides.

However, the Michigan action and the later seizure by the FDA of 28,000 pounds of Coho salmon that had been shipped in interstate commerce places an entirely different light on the whole subject of pesticides and food products.

This disclosure of high concentrations of residues in the Coho salmon proves the tremendously dangerous persistence of these pesticides. To ultimately reach the salmon, the DDT and Dieldrin probably traveled hundreds of miles through the air, water, and soil and was consumed through the normal food chain of up to a half dozen organisms.

According to the FDA, the concentration of DDT in the salmon was found to be up to 19 parts per million while the accumulation of Dieldrin was just short of 0.3 of a part per million, both levels considered hazardous by both the FDA and the World Health Organization.

At last year's Lake Michigan Water Pollution Conference, a spokesman for the U.S. Bureau of Commercial Fisheries testified that the concentration of pesticides in Lake Michigan could reach a level lethal to both man and aquatic life if the use of pesticides was continued at such a heavy rate in the Lake Michigan watershed.

W. F. Carbine, Great Lakes Regional Director for the Bureau of Commercial Fisheries, stated that "Lake Michigan has the highest concentration of pesticides of any of the Great Lakes, which now are only slightly below levels that are known to be injurious to man or aquatic life . . . A continuation at high levels or an upsurge in pesticide application anywhere in the Lake Michigan basin could increase the pesticide concentration prevailing in the open lake from the present non-lethal level to a lethal value."

Mr. Carbine expressed grave concern about the buildup of polluted sediment of the Lake Michigan bottom. Studies in Lake Erie indicate that the polluted bottom sediment tends to provide a never-ending source of pollution.

"Should this be true," he said, "man will be confronted with a self-perpetuating situation partly immune to active flushing action in Lake Erie, to say nothing of Lake Michigan which lacks flushing capability."

"Unless immediate measures are implemented to reduce enrichment of Lake Michigan, the deterioration will progress with increased rapidity and conditions will soon be comparable to Lake Erie. The biological, aesthetic and recreational value of Lake Michigan, the largest fresh water resource that lies entirely within the United States, is threatened with swift and early disaster."

The discovery of these pesticide-contaminated Coho salmon certainly substantiates that testimony. The future of all the Great Lakes will be imperiled unless action is taken soon to stop this poisoning of our waters by these pesticides.

Last spring pesticides were also blamed for the death of nearly 1 million Coho salmon fry. This finding has raised a serious question about the future of salmon reproduction in the waters of Lake Michigan.

Seven hundred thousand Coho salmon fry had died suddenly in hatcheries run by the Michigan Conservation Department.

According to Dr. Charles T. Black, a pesticide adviser to the Michigan department, the fatal dose of DDT was passed on to the coho fry by the adult female fish.

Black said the mature female fish picked up DDT during the time they were in Lake Michigan. These females were hatched on the West coast and stocked as fingerlings in Lake Michigan in 1966.

The adult females were in Lake Michigan for only 18 months before they were netted and used to supply eggs for hatchery operations. Eggs to be harvested in the fall of 1970 will be from first generation Michigan-bred salmon which will have been exposed an entire lifespan to the Lake's DDT level and experts fear the results may be disastrous.

According to Black, the eggs become concentrated with DDT because the coho is at the top of the lake food chain.

DDT is first absorbed by plankton, a one-celled animal. Tiny fish feed on the plankton, concentrating the poison. Small fish are eaten by larger ones and, finally, the coho eats these. By this time, the DDT concentration is much stronger than in the lake water solution.

DDT concentrates in fatty tissue, including that of the eggs. When the eggs hatch, the fry live for a short time on the fat deposits in the egg. It is the DDT in this fat that kills the young fish.

There is also growing concern among scientists that the reproduction capabilities of other fish may be harmed. This is especially the case with the Lake Trout, which spend six of seven years in the water before sexual maturity as compared with only about two years for the salmon.

Lake trout were also the subject of recent extensive research by the New York Health Commission, which reported that high concentrations of DDT are being found in Lake trout in the State's central and northern lakes.

The health commission has cited DDT concentrations in the lake trout up to 3,000 parts per million in the fatty tissues of the fish. The figure representing the concentration in the whole fish would be considerably lower since the pesticide tends to concentrate in the fat.

While some states, such as New York, Wisconsin and Michigan, have developed good pesticide monitoring and information programs, I have long believed that there is a very serious void in the amount of meaningful information regarding pesticide use in the United States available today.

Following the FDA's seizure of the Lake Michigan Coho salmon, my office began a national survey of state pesticide regulation programs. The preliminary results indicate that most states have woefully inadequate pesticide monitoring programs and lack any significant information on pesticide use in their states.

With mounting scientific evidence that persistent pesticides are infiltrating our environment and the tissues of living creatures everywhere on earth, governments at all levels are reacting much too slowly to this impending world pollution crisis.

We must bring pesticide use in the United States into better perspective and completely re-evaluate existing regulation in light of the growing documentation of their harmful effects.

I have proposed the establishment of a permanent National Commission on Pesticides to study and investigate problems arising from the use of pesticides and to establish improved programs and regulations for their use.

The Commission would examine current pesticide use and present labeling requirements, monitor the buildup of pesticide residues in the environment, wildlife and humans, conduct basic research on pesticide degradability and develop less persistent, less toxic pesticides.

The panel would be appointed by the President and would include representatives of government agencies, scientific and medical professions, conservation groups, farm organizations and private industry.

The Commission would make annual recommendations to the President and Congress concerning improved restrictions on pesticide use and present and potential hazards to wildlife and human health. It will be a permanent body to evaluate pesticides on a continuous basis and advise the President, the Congress and the country on its findings.

My state pesticide survey has also compiled data that shows that at least a dozen states have found pesticide residues in fish above the five parts per million level recently set by the FDA. High concentrations of DDT have been found in fish in almost every region of our nation, from Maine to California and Montana to Louisiana.

These findings confirm the fear that commercial fishing in the United States faces a grave threat from pesticide pollution.

We cannot stand idly by while our multimillion dollar fishing industry is ruined by pesticides that continue to be recommended for use by the U.S. Department of Agriculture.

Last year, commercial fishing in Wisconsin added more than \$1.5 million to our state's economy while Michigan received \$2.5 million in fishing revenues.

I am preparing legislation authorizing the U.S. Department of the Interior to reimburse commercial fishermen who have fish barred from markets due to pesticide residues.

The program would be similar to one presently administered by the U.S. Department of Agriculture for reimbursing dairy farmers who lose milk because of pesticide contamination. Since 1964, this dairy program has provided nearly a million dollars in indemnity payments to farmers in 29 states.

As additional assistance to the fishing industry, the Small Business Administration should reactivate one of that agency's special programs to grant loans to fishing concerns whose products are not marketable due to disease or toxicity.

This special SBA program for the fishing industry was initially authorized in 1964 when a botulism threat seriously damaged the economic status of Great Lakes fishing. It is vitally important that these loans now be readily available to fishing concerns as the danger of pesticide contamination increases.

Efforts must be continued to drastically restrict the use of DDT in this country and improve present controls on other persistent pesticides. But until such restrictions are adopted, we must provide some form of insurance against financial ruin for the American fishing industry.

THE FORTAS MATTER—THE ATTORNEY GENERAL'S ROLE

Mr. GRIFFIN. Mr. President, for reasons which are difficult to understand, there has been some criticism in the news media and on the Senate floor concerning the role of Attorney General John N. Mitchell in the Fortas matter.

An editorial which appeared in the

May 17, issue of the Washington Star addressed itself to that criticism.

Mr. President, I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE ATTORNEY GENERAL'S ROLE

Attorney General Mitchell has been the target of criticism for the part he played in the administration's handling of the Fortas case. And by extension the same thing applies to the President. In both instances, the critics make no sense to us.

From all indications, the Department of Justice did not get into the case until after an investigator for Life magazine had dug up information damaging to Fortas. Thereafter, FBI agents and perhaps other Justice Department people were assigned to investigate. Why not? There was at least a possibility that there had been a violation of federal law, and it was the department's duty to find out whether this was so.

Most of the criticism of Mitchell relates to his visit to Chief Justice Warren and his submission of "certain information" which he said he thought might be helpful to the court. Mitchell did not confirm the fact of this visit until after the story had appeared in Newsweek, and he has never said what information he turned over to the Chief Justice.

What do the critics think Mitchell should have done? He could have done nothing, of course, and let impeachment, already being threatened, take its course in Congress. This would have been irresponsible. For an impeachment, followed by a trial in the Senate, would have been harmful to Fortas and enormously damaging to the Supreme Court. So the Attorney General took the other course. He went to the Chief Justice without publicity and submitted his information. The end result was the Fortas resignation instead of an embittered impeachment proceeding.

This was the best way out of a very bad situation. In our view, the Attorney General, and also the President, if he had anything to do with the decisions that were taken, deserve commendation rather than shallow criticism.

SOVIET MIGHT AND THE U.S. LUXURY DEFENSE BUDGET

Mr. PROXMIER. Mr. President, the Wall Street Journal for Monday, May 19, carried a fascinating article in the Outlook section concerning the relative military strength of the Soviet Union and the United States.

The article was especially interesting to those of us who believe that this country could spend less on the military and be stronger than we now are.

The Defense Department has erected fantastically costly weapons systems which often do not work.

We have seen change orders, overruns, and buy-in bidding contracts which have resulted in a skyrocketing of costs.

We know that our major weapon systems routinely cost 100 to 200 percent more than their original estimates.

They are delivered 2 to 3 years later than their original deadline dates.

We spend huge amounts on commissary stores, post exchanges, and frills for officers clubs.

This country could, in my judgment, be much stronger for much less money. We should drastically change the ratio of 10 soldiers behind the lines or in

support, for each soldier in a combat unit.

What we have now, Mr. President, is a "luxury" budget. And this budget, instead of keeping us ahead of the Russians has weakened us relative to our immediate adversary.

The Wall Street Journal article says that according to the statistics of the London based Institute for Strategic Studies as well as our own analysis:

Russia has been getting considerably more for its defense outlays than the U.S.

The article states that while they spend the same proportion of their gross national production on defense as we do—roughly 8 to 9 percent—they spend only three quarters of the total amount that we spend.

But, and this is the key point, namely:

Despite the massive amounts that Uncle Sam has spent on defense in recent years, the Soviet Union, which has spent far less, has about pulled even in overall military strength.

There are, of course, some logical reasons why this is so.

Our troops do require a higher standard than those of the Soviet Union. Their pay and allowances cost more. They do not live off the land. All but a few—namely, those under fire—essentially are provided Stateside food and shelter. The wages of a worker in a Soviet defense plant is not as high as those for a U.S. industrial worker. Of course, the productivity of the American worker is higher so that the Russians may not be ahead in costs per unit of output. It also costs more for us to maintain overseas bases than it does for the Russians to defend their landlocked borders.

But, as the article says, this is not the whole story.

The Russians seem to manage to design new weapons more simply and cheaply than the U.S.

Furthermore, it states:

The Soviets also are allocating defense funds more wisely.

The article points out that the Russians have only three support soldiers for each combat soldier, instead of 10 men in support, as is the case with our Army.

Mr. President, after all the logical reasons for the differences are given, it still is true that the Russians are getting far more defense by spending about the same proportionate amount of their GNP and only three-quarters of the actual expenditures as we do.

Let me make this country strong and free. Let us cut the military fat and strengthen the muscle.

I ask unanimous consent that the article published in the Wall Street Journal be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, May 19, 1969]
APPRAISAL OF CURRENT TRENDS IN BUSINESS AND FINANCE

In all the heated discussions about this country's "military-industrial complex," surprisingly little attention has been focused on what is perhaps the most perplexing aspect of the whole matter. It is this: Despite the massive amounts that Uncle Sam has spent

on defense in recent years, the Soviet Union, which has spent far less, has about pulled even in overall military strength.

The Institute for Strategic Studies, the authoritative London research organization, recently gave this appraisal of Russia's military posture: "The Soviet Union must now be treated as a full equal in terms both of strategic power and of her ability to control conflict in the developing world." By the middle of this year, the report went on, the Soviet Union will probably have deployed more intercontinental ballistic missiles than the U.S. As recently as 1966, the Soviets had barely a third as many ICBMs deployed as the U.S., analysts estimate.

This catch-up has occurred even though Soviet military expenditures seem positively frugal by U.S. standards. As Mr. Soderlind noted in this column two weeks ago, Russian military spending in 1966 totaled about \$47 billion, according to a survey by the U.S. Arms Control and Disarmament Agency. This was less than three-quarters the comparable U.S. amount. The report further estimated that the Russian total came to 8% or 9% of Soviet gross national product, roughly the same percentage as in the U.S.

Such statistics on Soviet military spending, to be sure, represent highly uncertain estimates by U.S. analysts. Announced Soviet military outlays do not include many military expenses. Also, it is difficult to arrive at a realistic rate for expressing rubles in terms of dollars. The ACDA, however, has attempted to take such factors into account; this a major reason the figures are for no later than 1966. ACDA economists, however, believe the 1966 comparisons still approximately pertain, though all the totals have increased.

At any rate, such statistics leave little doubt that Russia has been getting considerably more for its defense outlays than the U.S. The overriding reason seems simply that living standards are very much higher in the U.S. than in Russia. According to one estimate, the average salary of a Russian soldier comes to about one-fifth of the average for a U.S. soldier. Similarly, a Soviet defense-plant worker whose income is, say, about \$2,000 annually is probably earning only one-fifth of what his U.S. counterpart earns.

An economist who studies such matters for the Defense Department says that a rough rule of thumb is that 10 U.S. soldiers are needed to support one U.S. soldier on the firing line. The comparable ratio for Russian soldiers, he says, is about three to one. One result, the economist added wryly, is that "the American soldier is a lot more comfortable than the Russian soldier."

On the matter of comfort, some observers point to this country's vast network of post exchanges and other services for U.S. military families. Many PXs are elaborate establishments, offering all sorts of luxury items, as well as comfortable eating and recreational facilities. Theoretically, these services are self-supporting, but actually they are subsidized by Uncle Sam to the tune of more than \$100 million yearly, a Pentagon source says.

The Russian soldier, in contrast, depends on what one U.S. analyst terms "primitive little stores," often run with the cooperation of local farmers. Frequently, he adds, Soviet troops are expected to lend farmers a hand with harvesting in return for a supply of food.

The gulf in living standards isn't the only reason Russia gets more out of its military expenditures, some analysts say. The Russians seem to manage to design new weapons more simply and cheaply than the U.S. One U.S. official cites the MIG-21, a Russian fighter plane, as a case in point. He estimates that each MIG-21 has cost Russia about \$1 million. In contrast, he estimates that each F-4, an American fighter plane, has cost several times that much. "We probably put as much money into the avionics of our plane as they put into the whole damn MIG-21," the

official says. "Our plane may perform better, but is it worth that much more?"

The Soviets also are allocating defense funds more wisely, the official claims. "Do we really need 15 attack carriers, with the new ones costing \$600 million per copy, for 'peace-keeping' operations?" he asks. "And if we don't, what good would they be in a big war? For what we put into one, we could buy a dozen destroyers." The Russians, he says, have "wisely" built no such carriers but have rapidly increased their submarine force. "Our Navy, I'm afraid, is a social institution that needs big capital ships to revolve around," he adds. "The carrier has replaced the battleship as the hub."

Vietnam, of course, represents a big U.S. military expense that Russia does not face; the war is costing the U.S. nearly \$30 billion a year, while analysts estimate it is costing Russia perhaps \$2 billion yearly. Even if U.S. spending for Vietnam were eliminated, however, America's military spending would remain far greater than Russia's, analysts guess.

Another consideration that some U.S. officials cite is the relatively high cost of maintaining overseas military establishments, a U.S. burden not faced by Russia. (On the other hand, the U.S. does not have to worry about a lengthy border with Red China.) Some observers even cite Russian use of "slave" labor as a factor in Soviet military progress. One source estimates that perhaps one million persons, mostly political prisoners, still work in Soviet labor camps, occasionally performing chores for the military. At one time under Stalin, of course, such camps held possibly 20 million persons.

In the end, there seems to be no easy solution to the problem posed by Russia's more effective military spending. Should the U.S. spend still greater sums to offset the Russian edge? Is it possible through reforms to get much more bang for the U.S. buck? Whatever the answer, it seems clear that military muscle is much harder to put on when the superpower is also superaffluent.

—ALFRED L. MALABRE, Jr.

GOLDEN ANNIVERSARY OF UNIVERSITY OF CALIFORNIA AT LOS ANGELES

MR. MURPHY. Mr. President, one of our Nation's finest institutions of higher learning, the University of California at Los Angeles, celebrates its golden anniversary this week. UCLA has come a long way since it was known as the Southern Branch of the University of California and opened its doors in 1919 to 1,250 students. Its alumni in many fields have gained worldwide recognition. Its athletes and athletic teams are always among the finest in the land. Its splendid facilities are world renowned.

More than 28,000 students come to the UCLA campus each day, and more than 80,000 take its extension courses throughout Los Angeles County each evening.

Mr. President, the well-known author, Irving Stone, has written an article which vividly portrays much of UCLA's past and present and looks at its future. I ask unanimous consent that the article, published in the Los Angeles Times' West Magazine of May 18, 1969, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UCLA, 1919-69

(By Irving Stone)

(A personal memoir by a world-famous author and non-alumnus who arrived in

Los Angeles the same year the University of California did, and found his life inexorably tied to it.)

Fifty years ago the University of California and the Stone family arrived in Los Angeles, if not arm in arm, at least simultaneously; not only my parents but aunts, uncles and cousins in a caravan of four Model T Fords. All had sold their homes and modest businesses in San Francisco to "start a new life in the land of golden opportunity," as my mother put it.

At that point in history Los Angeles was a comparatively small and slow-moving town, with brilliant sunlight and clear air to breathe. Except for the Red Cars that ran to Santa Monica, all streetcars ended at Western. Wilshire Boulevard ran out of civilization at La Brea. Sunset Boulevard was a wandering cowpath to the ocean. Westwood was a series of desolate rolling dunes, an area into which only the most courageous mortal dared venture. The University of California at Los Angeles, which was born at this moment, was given the name of "Southern Branch," an unfortunate appellation that created sibling rivalry and led to a psychological hang-up only recently dissipated.

My first contact with the Southern Branch occurred on a Friday afternoon, October 3, 1919, when, as a member of the Manual Arts High School Band, I watched my first game of American football between Manual and the Southern Branch; we had played 15-man Rugby at Lowell High in San Francisco. The game ended 73-0 in favor of Manual. Toward the end of the game I turned to my fellow clarinetist on the left and said, "You were right, it is an exciting sport, but why do the rules allow only one team to score?"

In midyear of 1922, after two years at Berkeley, I registered at the Southern Branch, which now extended two full blocks on Vermont, for a summer session. By a happy coincidence the *Cub Californian* needed a columnist. I was apparently the only applicant who was willing to spend the hours trudging from classroom to classroom to pick up scraps of stories. At the end of the six-week session, the regular staff returned to set up their expanded format for the next school year, and I offered to remain at the Southern Branch for my graduating year to continue the column. They took a full batch of my columns into the next room and locked the door behind them. They emerged about an hour later, not quite looking me in the eye. The editor handed me back my columns, murmuring *sotto voce*:

"Mr. Stone, we cannot find it in our hearts to let you make so heroic a sacrifice!"

Two years later, in the spring of 1924, I was a teaching fellow at the University of Southern California, sharing a large office with three other fellows. One day our shared secretary, a remarkably pretty girl whom the Dean kept in his office, phoned to say that two young men were outside and had urgent business with us. The two tall, handsome, expensively-garbed and groomed young men were ushered in. They said that they represented the Janss Investment Corp. and had a highly exciting and advantageous proposition to make us. Janss was prepared to give each of us a 30-by-100-foot lot in what would be the business district of a future village to be called Westwood *absolutely free*. All we had to do was guarantee that within three years we would build a \$10,000 store or office building on each site.

Aside from the fact that none of us could have commanded ten thousand jelly beans, it was clear that these smooth young men were engaged in a confidence game. They tried to persuade us, by laying out architectural renderings, that there was going to be a great university built on the sand dunes. There would be a large and prosperous business district; thousands of homes would spring up to house the professors and students. (I remembered these dunes all too vividly, for I had one inadvertently stumbled

across part of them and been chased out by the lizards and jackrabbits.)

Toward the end of the presentation, all four of us fledgling economists raised our eyelids to each other. Now we knew how the charming young men got their expensive clothing and haircuts: by taking advantage of naive academics. We dismissed the two salesmen, then, since I was the youngest of the group and hence entitled to be its spokesman, I commented:

"Why don't these city slickers confine themselves to selling nonexistent oil wells?"

UCLA at Westwood, which started half a century ago, has now in its own opinion reached the august age of twenty-one and become an adult. It is a long, hard pull to convert an idea in the back of somebody's mind into a college. Thousands of individuals have to contribute their energy, educational concepts, integrity—money!—and passionate desire to create a first-rate institution of learning. On its golden anniversary UCLA has reason indeed to look back and "point with pride." Along with USC on the opposite side of town, the Music Center complex downtown, and the County Museum of Art on Wilshire, it has become one of the four cultural centers of a rapidly expanding civilization.

Its splendid library serves as the research center for all of the southwestern United States, including Arizona, Nevada and New Mexico. Its expanding medical center, headed for many years by Dr. Stafford L. Warren, and now Dr. Sherman M. Mellinkoff, has become one of the ten best in the country, along with those at Harvard, Stanford, Columbia and Chicago. Computer machines, studying the human brain, have replaced the University of Vienna's Professor Meynert and his anatomical slides; but it has also been staffed from the very beginning by permanent researchers rather than part-time clinicians.

Since Sputnik, science has been the golden-haired boy in American universities. Tens of millions of dollars have been poured into the science departments by the federal government and private industry, for the purposes of research. Of these monies UCLA has received its fair share, in part thanks to the charisma of Assistant-Chancellor Carl York, who commutes to Washington. However, UCLA had early been able to attract some of the best scientific minds, including Nobel Laureate Willard F. Libby (discoverer of the Carbon 14 process), Joseph Kaplan, U.S. chairman of the International Geophysical Year; George Kennedy, reputed by his conferees to be a great geologist; Saul Winstein, whose work in physical organic chemistry has won him several of the coveted American Chemistry Society Awards. The many like them were attracted for a variety of reasons, the climate of challenge in the building of a new campus, as well as the weather.

I saw little of the growth of UCLA during the years of its youth, for I spent my time in Europe studying and writing, and in New York, where I thought I had to live until I could find a publisher for my books. When Mrs. Stone and I returned permanently to Southern California and made our home in the San Fernando Valley, I still did not renew my acquaintance with UCLA, except for one look at the prospering Westwood Village, which confirmed me in my belief that I did not have the makings of an economist.

In the next few years I researched at the Huntington Library, where Jack London's manuscripts were housed; and at the Los Angeles Public Library at Fifth and Hope, which had, and has, a comprehensive collection of Americana. It was not until we moved into Beverly Hills (so that, in Mrs. Stone's terms, "The two children can go out the back door on their skates, or out the front door on their bicycles to get to school") that I turned my eyes west to UCLA.

Here, amid the few Romanesque buildings, I found the greatest boon to a researcher:

Interlibrary Loans, presided over by an angelic librarian, Esther Euler. When I needed a rare book that was impossible to purchase, and of which no library in Southern California had a copy, Mrs. Euler would locate one at the Library of Congress in Washington or the University of Pennsylvania or the University of Georgia. Within a week the volume would be on my desk.

An accomplishment in UCLA's short span, I discovered, was that it has become an integral part of the community, aiding as well as influencing almost every sector of Southern California life.

I am not referring to the accomplishments of the Gary Behan football teams or the Lew Alcindor basketball teams, delightful as they both were to watch; but to its early cultural leadership in the theater, adult education, revolutionary modern music and contemporary art. Emphasis was placed on scientific and medical research, social welfare studies, the direct relationship between Neil Jacoby's School of Business Administration and the industrial complex of Southern California.

As with almost every campus in America today, UCLA has suffered its share of elephantiasis. There are now over 28,000 students on campus every day, and more in the libraries, laboratories, auditoriums at night. In the evenings some 80,000 people take extension courses throughout Los Angeles County, 30,000 of them on campus. More thousands attend the nightly concerts in Schoenberg and Royce halls, the plays of The Theatre Group, the art exhibits, the lectures by world famous authorities in every known discipline. At a rough guess, some 36,000 Southern Californians use UCLA's facilities every day of the week. What has now become one of the most populous automobile campuses in America requires three-story garages to house the input.

I have never been a regular student or teacher at UCLA, and so my knowledge of the University arises from my personal relationships with the faculty and administration over a long period of years. This does not hold true for Mrs. Stone; in fact, I am a charter member of the UCLA Widowers' Club. Every time I go looking for my wife she is either at a Board Meeting at the International Student Center, or putting on a performance for the Associates of the Institute of Ethnomusicology. She got to spending so much of her time on the UCLA campus that both Franklin Murphy and Charles Young decided they had better issue her a permanent parking pass. I feel lucky they did not also issue her a room in one of the girls' dormitories. UCLA has been outstanding for the tremendous number of community volunteers who have aided and abetted its growth.

However, in a deeper context I have been studying at UCLA for many years. As an example, when we were planning to go to Italy to research and write *The Agony and the Ecstasy*, Mrs. Stone started two years in advance to study Italian on the campus. Dean of Fine Arts Charles Spononi was then (1954) giving an extension course in conversational Italian, as well as teaching a course on Dante. Through this beginning, the Spononi and Stone families became close friends. When I needed a translation of Michelangelo's six hundred letters, which astonishingly had never been brought over into English, I of course turned to Spononi, who is a Tuscan by birth, and made a contract with him for the entire task, later published under the title *I, Michelangelo, Sculptor*.

At the same time we were taking a course in The Golden Renaissance under a dozen knowledgeable professors at UCLA. Both the language and the research base were of inestimable value when we went to live in Florence and Rome. Mrs. Stone and I also took a course in The Legacy of Greece and Rome. My next book, after I complete a biographical novel about Sigmund Freud, will be laid in Athens. I daresay I shan't see much

of my wife during the coming year; she will be at UCLA studying modern Greek.

From the slightly paternalistic vantage point of a Berkeley graduate, UCLA began to come of age with the advent of Franklin D. Murphy as its chancellor. There had been good chancellors before him, of course, but Murphy had the peculiar combination of qualities required to turn a good and growing university into a near-great one. Murphy is a Renaissance Man: an M.D. trained in science, widely read in the humanities, knowledgeable and enthusiastic about the arts. When he arrived in Los Angeles, proclaiming publicly that he was going to make UCLA a greater university than Berkeley, I had the temerity to suggest that this might take a bit of doing. What is known hereabouts as Murphy's Miracle is that in eight short but cyclonic years he managed to come within spitting distance of his objective.

Three stories will give you the measure of the man. The first concerns a magnificent collection of African and pre-Columbian art assembled by Sir Henry Wellcome, founder of a world-wide pharmaceutical company. When it was announced that the trustees were about to give away the invaluable collection as a gift, it was assumed that it would stay in England or go to a prestigious New York institution. UCLA, with little background in the field, was not only an improbable but an impossible choice. (They had lacked the desire and skill to absorb the great Arensberg Collection of Modern Art, which the Philadelphia Museum then gobbled up.) Franklin Murphy could not have disagreed more. Aided by Dr. Donald O'Malley, Professor of Medical History, and Ralph Altman, head of the Museum and Laboratories of Ethnic Art, Murphy began a series of phone calls and negotiations that not only brought this extraordinary and irreplaceable collection to Los Angeles, but overnight made UCLA one of the major repositories for the ethnic arts.

A UCLA scholar advised Chancellor Murphy that an enormously important collection of books and artifacts relating to Persian, Arabic and Armenian studies, located in one of the provincial cities of the Middle East, was about to be sold . . . but only for dollars deposited in a Swiss bank. UCLA had no dollars to deposit in a Swiss bank. Murphy made a single phone call to a distinguished American Armenian and persuaded him to make the major portion of that deposit.

By a coincidence, I happened to be present when Murphy's third moment of "excitement and creativity," as he describes these crises of opportunity, arrived. One morning he learned that a superb collection of Judaica and Hebraica, which had been founded by a famous book company in Frankfurt, Germany, had been moved to Vienna, and then finally settled in Israel, was about to be sold because the owner had died the day before. Other bidders had already appeared on the horizon. Murphy picked up his phone, called a friend and asked if he could join him for luncheon that day. Ted Cummings, upon learning of the rarity and value of the collection, promptly provided the money to acquire it. A cable was dispatched to Israel; and this priceless collection is now part of the UCLA Library.

How arduous is it to study at UCLA, remembering that the eight campuses of the University of California are permitted to take in only the top 12 percent of the high school graduates? Is it a rough go, or is it easy to "get by"? I have seen freshmen get by with a minimum of work, but it required such enormous expenditures of energy in fabricating excuses and conning the professors that they could have gotten straight B's with only half the concentration.

Nevertheless, UCLA strikes terror in the hearts of high school seniors such as Saul Winstein, now a world authority in the field of Physical Organic Chemistry. When Winstein was a senior at Jefferson High he had

several teachers who had graduated from UCLA. They told him how hard it would be for him to maintain a C average.

Winstein ran scared his entire first semester. When it was the time for the final examination he went to the student book shop to buy a mimeographed copy of examinations given in former years. When he got the booklet home he found that it was divided into eight parts. He spent the following week organizing his material so that he could get everything written into a Blue Book in the three hours that are allotted for a final.

Entering the classroom he was handed a set of questions which represented the equivalent of only one of the eight sections which he had studied from the earlier examinations. He quickly wrote the answers to this first section, and then sat for a solid hour waiting for the professor to come in and give him the next of the eight batch of questions. At that point he found out that the booklet he had bought had contained eight separate examinations. Winstein, remembering UCLA's reputation, had prepared himself to take the equivalent of all eight in three hours!

With 28,000 students, UCLA is admittedly crowded. But does this mean that it has become an impersonal plant, and that there is no contact between the student and the professor? Not to my knowledge. I remember the day when Willard Libby gathered together twenty freshmen whom he planned to take through four years as chemistry majors. It was not imperative that they go into chemistry as their life work, but merely that they be interested in science. During the four years I frequently saw this class at the Libby home, swimming and enjoying Sunday night buffet.

I remember Stanley Wolpert, chairman of the History Department, telephoning to cancel our plans to go for a long walk in the hills of a Saturday afternoon, because "some of my students asked to talk to me."

Each year many of the professors give a Christmas party for graduate and post-doctoral students and their wives. When a graduate student arrives, and is slightly broke, with a wife who is more than slightly pregnant, their instructors often lend them money to carry them through their first year until they can get a fellowship or scholarship.

Massiveness brings its own strengths and virtues. The extracurricular activities are frequently as valuable as the courses of study. The UCLA Group Theatre's productions were, by and large, better than anything I saw on Broadway during my years of residence there, and also unavailable elsewhere in Southern California. I remember back to the first fine productions of 1959: Dylan Thomas's *Under Milkwood*, Bertolt Brecht's *Mother Courage*; down through Eugene Ionesco's *The Bald Soprano* and *The Chairs* in 1964; and ending with the superb production of Harold Pinter's *The Birthday Party* in 1966.

There have been innumerable beautifully mounted art exhibitions. The Spanish Masters, in 1960, the Picasso Birthday Exhibition of 1961, the Lipchitz Retrospective, the works of Cezanne and Archipenko. Many of America's finest painters and sculptors have taught in the Art Department. What appeared to me to be a wasteland on the north end of the campus has been converted into a beautifully landscaped sculpture garden, with the works of Matisse, Henry Moore, Rodin, Archipenko, Jean Arp, Alexander Calder, David Smith, Noguchi, Bernard Rosenthal.

Since this is a personal memoir I should like to share some of my shining moments at UCLA. There was the night I debated Dr. Elmer Belt, who has given his magnificent collection of Vinciana to the University, on the subject: *Who Was the Universal Man, Michaelangelo or Leonardo da Vinci?* Dr.

Belt started the debate with a monumental tribute to Da Vinci's scientific accomplishments. Mrs. Stone whispered in my ear, "If he mentions that Da Vinci also painted the Mona Lisa, you're dead." (He didn't.)

In the midst of my own impassioned presentation of the case for Michaelangelo, the lights in the auditorium suddenly went out, plunging the audience into darkness. There were howls of laughter, as though my enthusiasm had somehow contrived to blow a fuse. In the darkness I told the story of an old friend, Thorne Smith, the novelist who had come west to write a motion picture script. Thorne rented a house near UCLA, with an upstairs workroom overlooking a garden. He warned his three rambunctious youngsters on the first morning that when they played in the garden they were to be very quiet so as not to disturb Daddy. He had been working less than an hour when a tremendous earthquake rattled Southern California. His three daughters rushed up from the garden crying, "Papa, Papa, we didn't do it!"

Feri Roth, founder of the Roth String Quartet, who taught at UCLA and gave concerts in Schoenberg Hall, asked if I would speak on the life of Beethoven during the intermission of one of his recitals. I protested that I knew only about Beethoven's music, but this did not dissuade Roth. At intermission I announced that since I knew nothing about Beethoven, but was completing a book about Michelangelo, I would talk about Michelangelo instead. When I had finished speaking a student asked, "Why is it that in the lives of both Beethoven and Michelangelo, they were never able to achieve love?" I replied that perhaps love was such a fulfilling experience that it got in the way of creativity. The young girl persisted, "Then you think that anyone who wishes to accomplish important results in the creative arts must go without love?" I replied, "If I have become convinced from this evening's discussion that your thesis is sound, I shall leave Mrs. Stone tomorrow morning . . . just after she serves me breakfast."

My wife had left the hall at intermission because she had heard my stories *ad nauseam*. At that moment she came back into the auditorium, whereupon the audience rose as a man, turned to her and cried:

"Never mind, Mrs. Stone, you can come and live with us."

UCLA is by and large a functioning democracy. Faculty wives put in a lifetime of service in prosaic and sometimes even menial tasks. Whether it is to head up a volunteer group, address envelopes for the Art Council, help staff the reception center of the Hospital or push a book cart through its halls, or hostess the innumerable UCLA receptions, no judgment is made on the nature of the work so long as it serves a valuable purpose.

Six months ago, as president of the Dante Alighieri Society, I introduced Louis and Annette Kaufman to an audience in the Schoenberg Opera Workshop. The Kaufmans were giving a concert-lecture on the origins of Italian music. We had promised our members a reception at which they might enjoy refreshments, and meet and chat with the Kaufmans. Halfway through the concert I went next door to the Green Room to make sure the food and drink were being put out on the tables. There I found my wife Jean, and Dean Speroni's wife, Carmela, on their hands and knees scrubbing the carpeted floor. I exclaimed, "What on earth are you girls doing?" They looked up with wide eyes and cried, "Whoever held a party in here last night failed to take care of their mess; we had to scrub the place before we could put up the coffee!"

What kind of man and woman does UCLA graduate? The alumni now number over 70,000 bachelor degrees, with another 22,000 of graduate degrees. Well, there is Dr. Ralph Bunche, a Nobel Peace Prize win-

ner in 1950; Dr. Glenn T. Seaborg, chairman of the U.S. Atomic Energy Commission and Nobel Laureate in Chemistry. There is Jackie Robinson, the first Negro to play in professional baseball, who ushered in a new era in athletics; Agnes DeMille, the famous choreographer; Jerome Hines, the Metropolitan Opera basso; Louis Banks, managing editor of *Fortune* magazine; Rafer Johnson, Olympic decathlon winner; Dr. Waldo Lyon, the scientist who charted the first voyage of USS *Nautilus* under the North Pole. There is almost no discipline in which UCLA is not represented by graduates of high talent and integrity.

Over the years there have been a series of chancellors: Ernest C. Moore, Earle R. Hedrick, Clarence A. Dykstra, Raymond B. Allen, Vern O. Knudsen and Franklin D. Murphy. As with the varying schools of architecture, each chancellor has been cast in a different mold, each has made his special contribution. The present chancellor is Charles E. Young tall, good-looking, whose youth is a great advantage in these days of campus upheaval.

A few years ago Chuck Young, then a vice-chancellor, sat in at a meeting with Franklin Murphy, discussing the seats to be installed in the new Pauley Pavilion. Murphy made the decision to put in inexpensive wooden seats, then left for New York. A few moments later Vern O. Knudsen, one of America's experts on acoustics, came in:

"What's this I hear about wooden seats? It will make the Pavilion sound like an echo chamber. Unless upholstered seats are installed to absorb the sound, I wash my hands of the affair."

Chuck Young replied quietly, "Okay Vern . . . upholstered seats it is."

When Knudsen left, Tom Davis, then president of the UCLA Alumni Association, who had been listening in on both conversations said, "I just heard Murphy decide in favor of wooden seats. You've not only reversed that decision but added \$25,000 to the cost."

"If Murphy had wanted wooden seats," replied Young, he should have stayed here." Murphy later agreed.

During its first half-century UCLA has suffered its share of growing pains and lacunae. Only recently has an architectural school been invested.

Good men have been lost to other universities. However, UCLA has done its share of abducting, bringing top talent not only from every corner of the United States but from the rest of the world. If it is true, as this author has written somewhere, that California is the new Valley of the Nile, then UCLA has grown into one of its shining monuments. Not an Egyptian pyramid, serving as a tomb for a dead Emperor, but a majestic beacon serving as a light and a voice for all of our residents.

During its second half-century its influence will be felt by increasingly wide circles in Southern California. It has riches to offer, the fruits of the mind, the nourishment of the arts and the humanities without which a society is barren indeed.

INCREASE IN DULLES TRAFFIC

Mr. BYRD of Virginia. Mr. President, I have received an encouraging report from the Federal Aviation Administration showing continuing gains in traffic at Dulles International Airport.

A gain of 27.3 percent in passenger traffic was recorded at Dulles for the month of March, as compared to March of last year, in spite of the fact that a 21-day strike by employees of American Airlines cut into the total volume of business.

For the first 3 months of this year, the passenger total at Dulles was nearly 470,-

000, or almost a third greater than the same period in 1968.

At the same time, there was a slight decline in the passenger traffic at overcrowded Washington National Airport. The total passenger volume at National for January through March was 2,282,740, down 2 percent from the first quarter of last year.

Dulles also showed a gain in cargo—smaller, but still significant. For the first 3 months of this year, the cargo volume was almost 16.3 million pounds. This represented a gain of 9.4 percent over the same period last year.

As in the passenger field, National showed a small decline in cargo. FAA figures indicated a drop of 2.7 percent in cargo volume at National for the first 3 months of 1969. Total volume for this period was 39.1 million pounds.

While the gain at Dulles represents a trend in the right direction, we have to bear in mind that despite the changes in percentages, National remains overcrowded and Dulles remains underutilized.

By way of illustration, I point out that, during the first 3 months of this year National's passenger volume exceeded that at Dulles by more than 1.8 million.

Overcrowding at National remains a serious problem. Even with the small decline in traffic which has appeared so far this year, National stands to handle a passenger volume well over twice the volume for which it was designed.

The only rational answer to the congestion at National is the development of the splendid facilities at Dulles, which cost the American taxpayers \$110 million and still are a long way from realization of their potential.

RURAL SLUM HOUSING

Mr. TYDINGS. Mr. President, events have forced Americans to recognize and confront the problems of poverty and deterioration that are transforming our central cities into concrete wastelands. Numerous programs have been proposed for rebuilding our urban slums, though the bulk of the task still lies before us.

However, too frequently, the slums that shelter the impoverished of rural America have been overlooked and forgotten. The relative silence of the rural poor must not be interpreted as a sign of contentment. Much of the slum housing in rural areas is even worse than the dilapidated and unhealthy structures that blight our cities.

Dr. Howard R. Grumpelt from the department of psychology and education of Washington College in Chestertown, Md., has circulated an excellent paper discussing the problem of rural slum housing and posing possible solutions. I commend this paper urging Government action in this area to all citizens concerned with the desperate plight of the rural poor.

Mr. President, I ask unanimous consent that Dr. Grumpelt's paper be printed in the Record.

There being no objection, the paper was ordered to be printed in the Record, as follows:

AN OPEN LETTER CONCERNING RURAL SLUM HOUSING

(By Howard R. Grumpelt, Ph.D., chairman of the Housing Committee, Kent-Queen Anne-Talbot Area Council, Centreville, Md.)

Slum housing in rural areas is probably far worse than it is in our cities. Some of the most impoverished slum housing in Maryland, and perhaps in the country, exists on the Eastern Shore of Maryland. The only governmental agency that currently has the authority and flexibility to have a significant effect on rural slum housing is the Farmers Home Administration. However, because of a very limited number of staff and meager funds for home mortgages, the impact of the Farmers Home Administration is at present almost nil. Something needs to be done.

On March 11, 1969, a meeting was held in Washington to explore this issue. The following named people and groups were represented: the boards and staff of the Kent-Queen Anne-Talbot Area Council, the Dorchester Community Development Corporation and Shore-Up, Inc., the Talbot Action Group, the Dorchester League of Women Voters, Mr. Philip Campbell, Undersecretary of Agriculture, Mr. James Smith, (National) Director of the Farmers Home Administration, and Congressman Rogers C. B. Morton, Senator Joseph Tydings and Senator Charles Mathias. Congressman Morton aided in making arrangements for the meeting.

I would like to try to summarize the presentation that was made by Mrs. William R. Hopkins, representing the poor, Mr. Samuel F. M. Adkins, representing local builders, Mrs. Edward E. Colledge, representing the Dorchester League of Women Voters, and myself, Dr. Howard R. Grumpelt, representing the Kent-Queen-Anne-Talbot Area Council. I have added a few facts in support of some of the statements which were made at the meeting.

1. Local banks are charging between 7½% and 8% interest rates on home mortgages and rates are rising ¼ of a percentage point a month. Poor people cannot afford to pay these rates and applications for home loans have decreased severely. The uninformed might think that the Federal Housing Authority would be of major value; however, this agency was developed primarily to aid cities. It is not able to have more than a minor effect in rural areas because it requires adhering to regulations which most rural areas would not be able to meet for several years (e.g., building, plumbing, electrical codes, plus a housing authority).

2. The Farmers Home Administration has both the authority and flexibility to have a very significant impact on rural slum housing. They can a) grant loans with interest rates as low as 1% depending on how poor a family is, b) check credit and job stability records of applicants and c) supervise construction to insure that a home is well built. The F.H.A. has had little success in stimulating rental housing because it is unable to make outright grants of funds. However, it can very significantly stimulate house construction for family ownership. Unfortunately, on the whole of the Eastern Shore the Farmers Home Administration has processed only 365 home mortgage loans since July of 1967, resulting in an average of 24.3 home loans in each county per year. This is hardly keeping up with the rate of home deterioration. The Farmers Home Administration does not have the staff (10, including secretaries, for the whole Shore) nor the loan funds to have an impact.

3. Currently many poor people must wait between nine months and a year in order to procure a loan from the Farmers Home Administration. Poor people generally require more aid than others in developing an application. In addition, a number of builders would like to construct large numbers of

low-cost homes at once and sell after construction. This would cut costs to buyers but builders cannot tie up huge sums for long periods of time. And F.H.A., the major rural creditor for the poor at present, cannot process loans rapidly enough to allow builders to work in this manner.

4. The Eastern Shore of Maryland needs help desperately. We have a rising population, a high percentage of poor people, and housing on the Shore is miserable. Consider the following facts:

a. Between 1950 and 1965 the population of the Shore increased 15.2% (from 177,267 to 208,970—Md. Dept. Health Publication).

b. Median Income of families in 1960 was \$3,992 compared to \$6,309 for Maryland and \$5,660 for the U.S. as a whole. The Shore is 36.7% below Maryland and 29.5% below the U.S. in median family income.

c. While family income has undoubtedly risen since 1960, one indicator suggests that we are falling further behind the rest of the state. According to a 1966 Sales Management Survey, between 1959 and 1965 there was a 24.8% increase in effective buying income per household for the Shore. However, for Maryland as a whole there was a 36.4% increase.

d. The Shore had a high percentage of people employed for less than 26 weeks per year (24.2%), a high rate of unemployment (7.6% vs. 4.8% and 5.2% for Maryland and the U.S.) and our non-white unemployment was especially large (average rate of 14.2% vs. 9.5% for Maryland and 8.7% for the U.S.) as of 1960.

e. 27.3% of homes on the Shore were considered dilapidated or deteriorating in 1960, whereas for Maryland and the U.S. as a whole the comparable figures were 13.9% and 18.8%. In addition, on the Shore 30.4% of homes had no toilets, whereas only 7.1% in Maryland and 10.2% for the U.S. lacked this facility.

In other words, we have an increasing population with a high proportion of poor families who live in wretched slum housing. The need for relief seems monumental.

5. Unless otherwise indicated, the above statistics were derived from the 1960 U.S. Census Report. Unfortunately, no more recent and reliable data is available; however, we believe that problems in housing have deepened, not diminished. One report analyzing the situation on a national level supports this view. A semi-annual survey of U.S. housing just published by Advance Mortgage Corporation concluded that the housing shortage is now the worst it has been in 20 years. For instance, an inventory of completed houses for sale at the end of 1968 showed 42,000 compared with 94,000 at year-end of 1965. Problems are compounded by a 30% increase in household formation and the fact that the home buyer today will "pay 25% more in monthly payments for the same house as a year ago," due to price, interest, tax and insurance increases. If these figures are accurate, it appears that the problem is getting worse all the time. We know of families that have temporarily broken up because only a single room could be found at reasonable rent. Some family members have to live elsewhere.

6. We understand that the Congress must establish priorities concerning how funds are spent. We feel that people on the Shore and in rural areas throughout the country consider housing to be one of the highest priorities. We have attended a number of open meetings at which angry people have come forth to complain about housing. At our local level there are few issues that people are more concerned about. And yet frustration mounts as few concrete gains are seen.

7. One grossly unfair aspect of current U.S. laws is that a middle or upper income person can pay high interest rates and then deduct this interest from the amount of his income for tax purposes. On \$30,000 of bor-

rowed money at 8% interest, a \$15,000 a year man with a wife and child will save, at a very minimum, \$487, on his federal tax of \$2,483 (assuming standard deduction), effectively reducing his interest rate to 6.7%. The poor person who has a more diminutive loan and who is paying a small income tax will save little, if anything at all, by paying interest. Richer people get a helping hand, the poor do not.

8. While the above analysis suggests that the Eastern Shore of Maryland desperately needs help, help which could be provided by an increase of staff and loan funds from the F.H.A., it does not indicate the positive influences which could accrue from this help. These influences can be briefly described.

a. Most F.H.A. home mortgages are used by individuals to purchase a home of their own. For the poor this leads to increased pride and greater investment in their communities.

b. City government officials relate that migration to cities, especially by the poor, compounds problems that exist in urban environs. If more adequate housing was available in rural areas, fewer rural people would move to cities.

c. State and local governments are strongly in need of additional revenues. By increasing home ownership, revenues to these groups will be enhanced.

d. The cost to the federal government of making a tremendous impact on rural slum housing is minimal because most of the funds used by F.H.A. are in the form of federally insured notes for loans which are purchased by banks and commercial credit houses. In addition, the poor have been excellent risks. Of 590 rural housing loans currently outstanding to the Farmers Home Administration from the Shore, all but 22 are up-to-date with their repayments.

e. Finally, although some areas of the country are economically overstimulated, the Eastern Shore is not. Median incomes are low on the Shore and jobs are continually being lost as farmers turn to the use of more mechanized equipment. We have estimated that an additional \$54,000,000 could come to the Shore over the next five years if the F.H.A. could substantially increase their ability to process home loans.

9. We believe that the problems in housing which we have outlined are not peculiar to the Eastern Shore. We believe that if appropriate studies were undertaken, it would be found that most of rural America is suffering from the same difficulties. Must rural areas be neglected?

10. Finally, we turn to some possible ways of resolving our difficulties. We believe that the Farmers Home Administration is at present having little influence on rural slum housing. This agency in 1962 took on vast new responsibilities by becoming involved with home mortgages for a large proportion of the rural population. However, it is one of the few federal agencies that has not increased its local staff in over 22 years. In 1946 we had 10 people employed in local F.H.A. offices on the Eastern Shore of Maryland. Today we have 10, exactly the same number. The following alternatives could each aid in resolving our problems:

a. Increase the allotment of funds for staff and for the processing of mortgages. At least three times the current staff at local levels is required for the F.H.A. to be capable of significantly reducing slum housing (one secretary, one bookkeeper, one loan writer, two inspector-appraisers and one supervisor per office). This would seem to be the simplest and most equitable solution to the problem.

b. Allow state agencies and volunteer groups to aid F.H.A. offices. The law presently prohibits such aid for most of the important work in processing loans. (Recently in New Jersey, the State paid staff to work on home loans in F.H.A. offices but it was ruled that

this was not allowed under present law.) In addition to changing the law, a program should be developed to train volunteer groups for some of the slightly complicated aspects of F.H.A. functioning. We currently have volunteer groups who are willing to provide some help, but they would need training to be able to perform much of the work that needs to be done.

11. We believe that it has been amply demonstrated that we have a huge number of miserable, wretched slum houses on the Eastern Shore of Maryland. We further believe that this problem is not endemic to the Shore but that housing in much of rural America has not been given noteworthy attention. One relevant, meaningful solution that could go far in ameliorating the problem has been approved by the Congress, through assigning to the Farmers Home Administration new objectives. However, while Congress granted the authority 7 years ago, it has never granted the funds for the increased staff or for the mortgage interest supplements that would allow this program to do the job it was designed to do. In the most wealthy country in the world, how much longer must rural America suffer?

COMMENDATION OF PRESIDENT NIXON'S SPEECH ON WAR IN VIETNAM

Mr. SAXBE. Mr. President, I commend President Nixon for his speech of May 14, dealing with the war in Vietnam. I thought it was a fine speech. The President demonstrated most convincingly that he realizes the war must be brought to a peaceful but honorable conclusion as rapidly as possible. I have said for many months that American troop withdrawals should begin as soon as possible, hopefully by this summer. From his statements, it is apparent that troop withdrawals are a key part of Mr. Nixon's thinking, as well.

I support the President's eight-point program for a solution of the war. The eight points should provide a meaningful basis for progress at the Paris peace talks. They show, too, that the administration is remaining flexible in its approach to the negotiations.

We have got to go a second mile in searching for peace. President Nixon's speech showed that the United States already has embarked on that second mile. The speech demonstrates, too, that the President recognizes the urgency of this matter.

U.N. REPRESENTATIVE INDICATES U.S. REVIEW OF POLICY ON HUMAN RIGHTS TREATIES

Mr. PROXMIER. Mr. President, in February of this year, President Nixon appointed a capable and dedicated woman, Mrs. Rita Hauser, to the post of U.S. representative on the Human Rights Commission of the United Nations Economic and Social Council. Mrs. Hauser indicated at that time a particular interest in the ratification by the U.S. Senate of the United Nations Human Rights Convention, and Conventions on Genocide, Forced Labor, and the Status of Women. Recently, Mrs. Hauser has reiterated here keen interest in these conventions and I am sure that through her continuing persuasiveness and able dedication that Mrs. Hauser will become a leading force for the ratification of these important treaties. In a speech last week

before the American Jewish Committee in New York, Mrs. Hauser indicated that the Nixon administration has begun a major review of policy on these human rights treaties. This is indeed most hopeful news and news that I hope the Senate will take note of. I ask unanimous consent that the article, entitled "U.S. Reviews Policy on U.N. Rights Pact," published in the New York Times, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE UNITED STATES REVIEWS POLICY ON U.N. RIGHTS PACT

UNITED NATIONS, N.Y., May 14.—The Nixon Administration has begun a major review of policy on a series of controversial treaties aimed at protecting human rights.

This was disclosed today by Mrs. Rita Hauser, who was appointed by the Administration to the United Nations Commission on Human Rights. She referred to the policy review in a speech bitterly assailing the United States' record of refusing to approve the treaties.

Mrs. Hauser spoke at the annual meeting of the American Jewish Committee at the Waldorf-Astoria.

The United States' failure to ratify treaties has prompted questions about the Government's sincerity, she protested, adding that the word "hypocritical" was frequently applied.

The treaties go back to the 1952 convention outlawing genocide and include the 1965 convention against racial discrimination, which also covers anti-Semitism.

THE CRIMINAL JUSTICE SYSTEM

Mr. TYDINGS. Mr. President, the criminal justice system in the United States has serious problems. FBI indexes show a steadily increasing rate of reported crimes. Presidential commissions voice an urgent need for fundamental changes in our approach. In many of our great urban centers, citizens are afraid to use their parks and dare not walk the streets past dusk. They eye their neighbors with suspicion, and shrink from giving aid to those beset by thugs.

It has become too fashionable to accuse the courts of responsibility for the spiraling crime rate. Court decisions delimiting the privileges guaranteed the accused by the Bill of Rights, we are told, have so shackled the police that criminals may pursue their activities without fear of hindrance. These decisions, according to their critics, have breathed new life into crime in the streets.

This is an issue which has been typified by emotional arguments rather than facts. It is most disturbing to see the courts, for their decisions, subjected to some of the broad accusations which they have suffered. If they contribute to our crime crisis, it is not through the cases they have decided so much as through the cases they have not decided. The failure in administration of the criminal justice system has given rise to intolerable backlog and delay, challenging the viability of our court system. To the extent that this may encourage criminal activity, undercutting the deterrent effect of sanctions that come remote in time from the act to which they are a social response, and limiting the ultimate

member of successful prosecutions, the courts may be faulted.

However, crime has its roots far beyond the criminal justice system. If we are to achieve a long-term solution to crime, we must deal with pervasive underlying social evils which generate it. We must focus on and relieve the evils of unemployment, family breakdown, inadequate education, substandard housing, frustration and despair.

For this reason I was most pleased to read the editorial entitled "Off Target," published in the Baltimore Evening Sun, which I believe sets some of the problems into better perspective. So that Senators may benefit from this viewpoint, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

OFF TARGET

The attack on the Supreme Court by Will R. Wilson, United States Assistant Attorney General, carries an obvious appeal to nostalgia, to what many people prefer to remember as the "good" old days. Those who suspect the crime problem is an invention of the justices, will, regrettably, give him their applause.

Mr. Wilson harks back to a supposedly happy time when the law and its interpretation were rooted in "Victorian certainties." Since then, Mr. Wilson calls the court too zealous in guarding the rights of defendants and too cavalier in disregarding evidence gathered by police, however illegally. Most policemen share this opinion, so do most prosecutors. People more concerned with individual freedom do not.

The Supreme Court under Earl Warren did not write the Bill of Rights. The protections built into it have been there a long time; they, too, had been considered "certainties"—and even before Queen Victoria was born. In fact, however, their application has never been universal and is not so today.

Equal protection under the law has been and still is denied blacks in the South. The North is better only by comparison. The constitutionality of juvenile court procedures was called into question in 1967, and there is more than a little truth in the old lament that the rich, including rich criminals, are more equal than the poor before the law. The court's intent in recent years has not been to the police hands. It has aimed to bring American judicial practices in line with constitutional principles, for the gap is nothing short of a national hypocrisy.

Critics of the high court, including Mr. Wilson, would be more convincing if they looked elsewhere for the cause of crime and turmoil in American society: to state legislatures too stingy to provide funds for rehabilitating convicted criminals, to lobbyists and politicians who work against vital social reform, to slum lords and other exploiters of the poor who, through their actions, encourage the perpetuation of urban ghettos. These are the real targets, and Mr. Wilson turns a blind eye.

A HUMANISTIC TECHNOLOGY

Mr. NELSON. Mr. President, one of the most pressing issues of our time is how to make technology work for, rather than against, the future of mankind. What is needed is a new perspective by which we can dispassionately judge both the benefits and the dangers from new technology, and act accordingly.

In a recent speech, Vice Adm. H. G. Rickover of the U.S. Navy has performed another great service to his country by

stating forcefully and well this issue and the need for a more rational approach. I ask unanimous consent that the text of the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

A HUMANISTIC TECHNOLOGY

(By Vice Adm. H. G. Rickover, U.S. Navy, at the convocation on ecology and the human environment of the St. Albans School in Washington, D.C., May 7, 1969)

The matter that concerns us tonight is of utmost importance and great urgency—nothing less than keeping our small crowded planet habitable. If I may use a legal expression, the "last clear chance" to avert catastrophe may soon be upon us. We have been brought to this critical situation by the scientific-technological revolution, and can extricate ourselves only by a change of direction in thought and action so drastic it would rate the term counterrevolutionary.

To the historian, this is a familiar sequence of events. During revolutions—social, political, technical—long established patterns of living are swiftly and radically altered by concentration on the attainment of a single objective without regard to cost. Eventually the cost is revealed and if it is too high there is a counterrevolution. But this takes time, perhaps more than is available to us. Few laymen as yet have any conception of the true price we pay for the marvels of technology although the mass media are now full of stories of poisoned water, air and soil, of depleted resources and of overcrowding—all clearly among its adverse effects, all crying out for remedial action.

What chiefly delays public recognition of the costs of the scientific-technological revolution is, I submit, the universal popularity of its objective: material abundance and an easing of man's earthly lot through mastery of nature, the "empire of man over nature" of which Francis Bacon dreamed three and a half centuries ago. Modern technology, solidly based on accurate scientific knowledge, comes remarkably close to this goal. Even the poorest in technically advanced countries are better fed, housed, and clothed, work in safer, more comfortable surroundings, enjoy greater leisure and more varied entertainments; live longer and healthier lives than they could ever hope for in the vast backward regions of the earth; this accounts for what W. H. Ferry calls the "stupid love affair" of the general public with technology. "Breaking up the love affair," he said, "does not mean abandoning technology, but replacing infatuation with an understanding of its toxic qualities, and finding ways to direct it to humane ends."

Fortunately we have a means to such an understanding in ecology—a science contemporary with modern technology.

Derived from the Greek *oikos*, meaning household or living place ecology deals with the interrelationships of plants and animals (including man) and their environment. Ecology, until recently a modest academic discipline chiefly serving agriculture and medicine, is destined to become the key science for correctly assessing the negative aspects of technology. St. Albans is therefore to be congratulated for including it in its curriculum. If I may, I should like to make two suggestions: First, limit the study to plant and animal ecology which is a fully developed branch of the exact sciences, omitting for the time being what goes under the name of social ecology. We tend in this country to try to do two or more things simultaneously; in consequence we do neither of them as well as we might. Second, consider the possibility of beginning the study at an earlier age. During a visit to Switzerland for the purpose of familiarizing myself with their educational system, I was much impressed by the way ecology was taught in a one-room vil-

lage schoolhouse. It was part of the curriculum throughout the primary grades, being presented at first very simply—but always graphically; later on, a more complex level; and always alongside the three R's and history and government, so that the children absorb it as part of their general education.

What needs to be developed at the earliest opportunity is a habit of thinking ecologically, of being thoroughly familiar with the balance of nature which Barry Commoner, the biologist, recently defined in simple words comprehensible to the nonscientist, old or young. All living things, he said, "are dependent on the great interwoven cyclical processes, followed by the four elements that make up the major portion of living things and the environment: carbon, oxygen, hydrogen, and nitrogen. All of these cycles are driven by the action of living things." Green plants convert carbon dioxide into food, fiber and fuel, and produce the oxygen in the atmosphere. Animals, living basically on plant-produced food, regenerate the inorganic materials: carbon dioxide, nitrates, and phosphates—all of which support plant life. This vast web of biological interactions "makes up a huge, enormously complex living machine—the ecosphere—and on the integrity and proper functioning of that machine depends every human activity, including technology. . . . If we destroy it, our most advanced technology will come to naught and any economic and political system which depends on it will founder."

I wonder, too, whether ecology, properly presented at the higher secondary school levels, might not help dissipate the tendency in contemporary thinking of regarding technology as an irresistible force with a momentum of its own that puts it beyond human direction and restraint. Mere awareness of all the adverse effects of technology may not suffice to mobilize public support for countervailing measures. What is additionally needed is a change of attitude on the part of the public and of its leaders, that is, of the prevailing concepts of what technology is and what purpose it should serve. Only when viewed humanistically—in other words, as a means to human ends—can technology be made to produce maximum benefit and do minimum harm to human beings and to the values that make for civilized living. It may even enable man to become more truly human than it has ever been possible for him to be. Of technology it can rightly be said that it is not "either good or bad, but thinking makes it so."

Technology has been defined as that which covers "the field of *how* things are commonly done or made" and "*what* things are done or made." It is tools, techniques, procedures: the artifacts and processes fashioned by modern industrial man to increase his powers of mind and body. Marvelous they are, but let us not be overawed by these man-made things. Certainly they themselves do not dictate how we should use them nor, by their mere existence, do they authorize actions that were not anteriorly lawful. We alone bear responsibility for our technology. In this, as in all our actions we are bound by the principles governing human behavior in our society. Ethics, I need hardly say, are not only personal; they are social as well.

This surely must be obvious to any reasonable man. Yet it cannot be overemphasized, for a considerable body of opinion propagates what comes close to being the opposite view. The notion is widespread that, having wrought vast changes in the material conditions of life, technology perforce renders obsolete traditional concepts of ethics and morals, as well as accustomed ways of arranging political and social relationships. Earnest debates are currently taking place as to whether it is possible to act morally in the new technological society, and proposals have been made—quite seriously—that science must now replace traditional ethics! We have here a confusion of means with ends that should be cleared up.

The laws disclosed by science must of course be heeded by those who wish to exploit scientific discoveries; in his technological activities man is bound by the laws of science. But it does not follow that he is bound by the laws of science in his purely human relations as well. "Science," wrote Vannevar Bush, "has come a long way, in delineating the probable nature of the universe that surrounds us, of the physical world in which we live, of our own structure, our physical and chemical nature. It even enters into the mechanism by which the brain itself operates. Then it comes to the question of consciousness and free will—and there it stops. No longer can science prove, or even bear evidence. Those who base their personal philosophies or their religion upon science are left, beyond that point, without support."

Through technology man has been relieved of much brutal, exhausting, physical labor as well as of boring routine work; he has been provided with numerous mechanical slaves who do certain kinds of work faster, cheaper and more efficiently than people. Why should the ease and affluence made possible by technology affect precepts that have guided Western man for centuries? This may brand me as old-fashioned but I have not yet found occasion to discard a single principle that was accepted in the America of my youth. Why should anyone feel in need of a new ethical code because he is healthier or has more possessions or more leisure? Does it make sense to abandon rules one has lived by because he has acquired better tools for doing his work?

Tools are for utilizing the *external* resources at our disposal; principles are for marshaling our *inner*, our human resources. With tools we alter our physical environment; with principles we order our personal life and our relations with others. The two have nothing to do with each other.

It disturbs me to be told that technology "demands" an action the speaker favors, that "you can't stop progress." It troubles me that we are so easily pressured by purveyors of technology into permitting so-called "progress" to alter our lives, without attempting to control it—as if technology were an irrepressible force of nature to which we must meekly submit. If we reflected, we might discover that not everything hailed as progress contributes to happiness; that the new is not always better nor the old always outdated.

Perhaps we are receptive to these arguments because we tend to confuse technology with science. Not only in popular thinking but even among the well-informed the two are not always clearly distinguished. In consequence, characteristics pertaining to science are attributed to technology. The etymology of the word may contribute to this confusion. Its suffix lends to technology a false aura—as if it signified a body of accumulated, systematized knowledge, when in fact the term refers to the apparatus through which knowledge is put to practical use. The difference is important.

Science has to do with discovering the true facts and relationships of observable phenomena in nature, and with establishing theories that serve to organize masses of verified data concerning these facts and relationships. Because of the care scientists take to verify the facts supporting their theories, because of their readiness to alter theories when new facts prove an established theory to be imperfect, science has great authority. What the scientific community accepts as proven is not questioned by the public. No one disputes that the earth attracts the moon, or that atomic fission produces energy.

But technology cannot claim the authority of science. It has proved anything but infallibly beneficial. Much harm has been done

to man and nature because technologies have been used with no thought for the possible consequences of their interaction with nature. A certain ruthlessness has been encouraged by the mistaken belief that to disregard human considerations is as necessary in technology as it is in science. The analogy is false.

The methods of science require rigorous exclusion of the human factor. They were developed to serve the needs of scientists, whose sole interest is to comprehend the universe; to know the truth; to know it accurately and with certainty. The searcher for truth cannot pay attention to his own or other people's likes and dislikes, or to popular ideas of the fitness of things. This is why science is the antithesis of "humanism," despite the fact that historically modern science developed out of and parallel to the humanism of the Renaissance.

What scientists discover may shock or anger people—as did Darwin's theory of evolution. But even an unpleasant truth is worth having; besides one can choose not to believe it! It is otherwise with technology. Science, being pure *thought*, harms no one; therefore it need not be humanistic. But technology is *action*, and often potentially dangerous action. Unless it is made to adapt itself to human interests, needs, values, and principles, more harm will be done than good. Never before, in all his long life on earth, has man possessed such enormous power to injure himself, his human fellows, and his society as has been put into his hands by modern technology.

This is why it is important to maintain a humanistic attitude toward technology; to recognize clearly that, since it is a product of human effort, technology can have no legitimate purpose but to serve man—man in general, not merely some men; future generations, not merely those who currently wish to gain advantage for themselves; man in the totality of his humanity, encompassing all his manifold interests and needs, not merely some one particular concern of his. When viewed humanistically, technology is seen not as an end in itself but as a means to an end, the end being determined by man himself in accordance with the laws prevailing in his society.

A word may be in order concerning the disparate meaning of the word *law*, depending on whether it is used in the ordinary sense—which is also the original sense of the word—or by scientists. Law, as commonly understood, refers to the rules of human conduct prescribed and enforced by society. The scientists have appropriated the term. They use it to describe regularities exhibited by the physical phenomena—the rules by which the cosmos governs itself. In the transition, the word has taken on a new meaning.

Law that governs human society is not the result of scientific method, but of wisdom and experience, of consensus as to what is just and fair. In autocracies, law is what the ruler decrees it to be and what he is able to enforce by naked power. The purpose of human law is to resolve conflicts by the application of definitive rules. These rules are always debatable and can be changed when there is public demand for a change or when the rule-maker desires them to be changed.

From the layman's point of view, what the scientist calls law is fact, rather than law—immutable fact. Or, if you prefer, it is law operating in a sphere where man exercises no influence. He cannot alter the laws of the cosmos; he can only discover them.

It has taken a long time to attain this rational attitude toward science, and we are conscious of the consequences of intolerance in the past. Perhaps this is why we have been exclusively tolerant toward those who claim the right to use technology as they see fit, and who are not to treat every attempt by society to regulate such use in

the public interest as if it were a modern repetition of the persecution of Galileo!

Assuredly, we have the right to use the instrumentality of law and of government to protect ourselves against technological injury. Yet this simple truth is obscured by the effective way in which opponents of protective measures play upon the laymen's respect for science—in a conscious or unconscious attempt to brainwash the public so it will accept their argument without debate. When attacking legislation that would restrain the user of technology, it is common practice to argue as if at issue were acceptance of a law of science. Yet what is being discussed is not science but the advisability or legality of the technological exploitation of science. The public would not be deceived by such arguments if it clearly understood the fundamental difference between science—which is *pure knowledge*—and technology—which is *action* based on knowledge.

Whether or not a particular technology has harmful potentialities should be decided by competent and disinterested professionals; it is not a proper subject for adversary proceedings and, above all, ought never be left to those who wish to use it. Destructive technologies are often highly profitable for those promoting them. They have a vested interest in the technology; it may give them money, reputation, power. They are an interested party to the conflict between private and public interest that every potentially harmful technology poses. Moreover, they are nearly always practical men more knowledgeable about *efficiency* in using a technology than about the *legal and social implications* of such use.

I think one can fairly say that the *practical* approach to a new scientific discovery and its utilization through technology is usually *short-range* and *private*, concerned only with ways to put the discovery to use in the most economical and efficient manner, little thought being given to its ultimate consequences. The *scholarly* approach—if I may use this term—is *long-range* and *public*; it looks to the effects which a new technology may have on people in general, on the nation, on the world; on present and future generations. And this, of course, brings us back to ecology and the vital part it could play in assigning to technology its proper place in human affairs.

How we use technology profoundly affects the shape of our society. In the brief span of time—a century or so—that we have had a science-based technology, what use have we made of it? We have multiplied inordinately wasted irreplaceable fuels and minerals, and perpetrated incalculable and irreversible ecological harm. I have thought much about this, and I can find no evidence that man contributes anything to the balance of nature—anything at all. On the strength of his knowledge of nature, he sets himself above nature; he presumes to change the natural environment for *all* the living creatures on this earth. Do we, who are transients and not overly wise, really believe we have the right to upset the order of nature, an order established by a power higher than man?

These are complicated matters for ordinary citizens to evaluate and decide. How to make wiser use of technology in future is perhaps the paramount public issue facing electorates in all industrial democracies. A free society centers on man. It gives paramount consideration to human rights, interests, and needs. But once ordinary citizens come to feel that public issues are beyond their comprehension, a pattern of life may develop where technology, not man would become central to the purpose of society. If we permit this to happen, the human liberties for which mankind has fought, at so great a cost of effort and sacrifice, will be extinguished.

JACK B. MACKAY, GREAT REPORTER AND GREAT MINNESOTAN

Mr. MONDALE. Mr. President, on Sunday, Jack B. Mackay, a close friend of mine and a remarkable American, died.

Few men have been privileged to serve their community, State, and Nation more than Jack. He began his distinguished career in journalism as an Associated Press reporter in St. Paul in 1918 and remained with AP until 1964. He became the senior reporter covering the State capitol at St. Paul, and was widely regarded as one of the ablest political reporters in the Nation.

In 1960, when I became attorney general of Minnesota, I quickly came to know Jack as one of the truly magnificent men of our State. He was able to be at the same time a good friend and a tough reporter. He not only wanted to report fairly; he wanted a better State, as well.

I shall never forget his warmth, his courage, and his decency. We shall all remember and miss him.

My condolences go to his widow, Ruth, and Harvey and Carol Ann Mackay, his son and daughter-in-law, and the rest of his family. As would be expected, Jack has left a wonderful family as an additional heritage to his friends and the State he loved so much.

I ask unanimous consent that the story published in the Minneapolis Star of May 19 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Minneapolis Star, May 19, 1969]
J. MACKAY, RETIRED AP WRITER, DIES AT AGE 69

Jack B. Mackay, retired Associated Press (AP) correspondent in St. Paul, died Sunday in Mt. Sinai Hospital of a heart attack shortly after being stricken on a suburban golf course. He was 69.

Mr. Mackay, 17 S. 1st St., became ill at Oak Ridge Country Club, Hopkins.

Services will be at 1 p.m. Tuesday at Temple Israel with burial in Temple Aaron Cemetery, St. Paul. Reviewal is at the Hodroff & Sons-Aaron mortuary.

Memorials to Mt. Sinai, of which Mr. Mackay was a member of the board of governors, are preferred.

Survivors include his widow, Ruth; two children by a previous marriage, Harvey B., Minneapolis, and Mrs. Arnold (Marjorie) Resnick, Hopkins; two brothers, Edward Macklesky, also a retired AP correspondent, Omaha; Raymond B., St. Paul; and two sisters, Mrs. Jack Gertrude Cohn, St. Paul, and Mrs. Dorothy Sontag, Chicago.

Born in St. Paul, Mr. Mackay joined the AP in St. Paul as a telephone news reader in 1918. He remained with AP or a then-subsidiary, Northwest News Bureau, until his retirement in 1964.

Mr. Mackay was St. Paul correspondent of AP from 1937 until his retirement.

Mr. Mackay helped cover many stories that made national headlines in the Twin Cities of the 1930s. The \$200,000 Bremer kidnapping, the \$100,000 Hamm kidnapping, escapades of the Dillinger gang, the bloody Minneapolis truck strike of 1934 were among them.

He won a Twin Cities Newspaper Guild award and a national television "Big Story" award for his long effort that finally won freedom for Leonard Hankins, convicted of a murder in connection with a Barker-Karpis gang bank robbery in Minneapolis.

Mr. Mackay was graduated from St. Paul Mechanic Arts High School and studied at the University of Minnesota in night school.

He was married June 26, 1928, to Myrtle Nathanson of St. Paul, who died in 1955. He married Mrs. Ruth Smith in 1961.

Mr. Mackay won many awards for his social work in the Twin Cities Jewish community, including the humanitarian award by Mount Zion Temple, St. Paul, in 1958.

THE MACHIASPORT SITUATION

Mr. MUSKIE. Mr. President, on May 8, 1969, the junior Senator from Wyoming (Mr. HANSEN) had printed in the RECORD a brochure entitled "The Machiasport Situation: 20 Questions for the People of Maine."

The brochure was published by the National Resources Council of Maine, a group of concerned citizens who are interested in the protection of the natural environment of Maine. The brochure was printed and sent to many of us involved in the Machiasport foreign-trade zone and refinery battle.

The Honorable Kenneth M. Curtis, Governor of the State of Maine, has prepared a statement that answers these questions posed by the council. His answers show the time, energy, and thought that is being given to every facet of the Machiasport project.

Mr. President, I ask unanimous consent that the Governor's statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF GOV. KENNETH M. CURTIS IN RESPONSE TO THE NATURAL RESOURCES COUNCIL OF MAINE CONCERNING THE MACHIASPORT PROJECT

Let me commend the Natural Resources Council for its sponsorship of the recent brochure, the Machiasport Situation—Twenty Questions for the People of Maine. By reemphasizing environmental protection as a policy which must underlie Maine's future economic development, the Council reaffirms and strengthens the position of those of us who believe that the era of unrestrained exploitation of our dwindling natural resources is ending. As Governor, I have been particularly pleased to note a rapidly growing public awareness for intelligent and sound use of our natural resources.

Furthermore, I would commend the Council for its commitment to explore the issue rather than assuming a stance of dogmatic opposition. The questions posed in the brochure reflect a reasonable and legitimate concern in several areas: Will Maine really benefit from the Machiasport proposal? Are measures being taken to anticipate the impact on the local communities? Are proper measures to protect the quality of the Maine environment being formulated? Taking these issues in the order in which your brochure presented them, the answer is in each case an unqualified yes.

I. THE ECONOMIC BENEFITS

The New England region has suffered from continually escalating fuel oil prices. The retail price of #2 heating oil in New England during the last four years has increased by 15%, or 2.2¢ per gallon which is 62% faster than the average increase outside the region. Additionally, for the past two winters threatened supply run-outs have forced New England dealers to obtain emergency quota allocations from the U.S. Department of the Interior. The proposed Machiasport project will aid New England by halting the rising price trend and by guaranteeing the region a more dependable supply of #2 heating oil. In its request for a quota allocation last June Occidental Petroleum Corp. clearly stated a commitment to reduce posted prices a mini-

mum of 10% over Boston Harbor prices. Additionally, this application committed the refinery's operator to supply the Department of Defense jet fuel at prices a minimum of 10% below present contract prices, to lead the way in price reduction in minimum 1% sulfur fuel, and to contribute 20¢ per barrel of quota allocation as a royalty to a Marine Resources Foundation for New England.

What are the specific benefits to Maine? Employment for the core refinery complex is estimated by the constructing engineers to total approximately 350 with an average annual payroll of \$2.6 million. In an effort to halt the outmigration of young people from Washington County (42.8% in age group 20-24 and 32.9% in age group 25-29) and to enhance employment opportunities for all residents, we have set a target of at least 85% employment from local sources. Training programs will be offered during the construction period to help qualify local citizens (Washington County—State of Maine). Additionally, Occidental has received inquiries from former Maine residents with the technical skills required to operate a refinery seeking consideration for employment should the project be approved.

But these immediate jobs, plus the numerous jobs available during the refinery construction phase, are only a portion of the proposal's potential impact. Basic to the economic importance of this project is the concept of a core industry, one that lends itself to spin-off development. And while an oil refinery is but one example of such a core facility, it is a particularly auspicious one because of the extremely favorable growth potential of the oil industry. Furthermore, the product mix of this particular refinery, with a daily production of 53,000 BBLs of naphtha, is tailored to stimulate petrochemical development.

The increased employment opportunities that will be generated by the satellite and related industrial facilities should dwarf in significance the economic impact of the refinery. Reliable estimates available to us project a total employment level of approximately 3,000 within a ten to fifteen year period. Conceivably, it could be higher. Beyond this one must consider the continued presence of the labor force that will be required for the construction of the secondary and tertiary facilities. And finally, we can expect increased employment demands in the service sector. Economists estimate 1.5-2.5 new jobs created for every new industrial position introduced into a community.

These potential benefits are certainly not hypothetical. They are instead the result of considerable study and research and are quite reasonable in light of past industry experience and of projected demands for petroleum products and by-products. Note that while all of this is possible, none of it is automatic. Should the initial project be approved many more man-hours of work will be required to ensure that this growth is properly accomplished.

Now to the issue of why a refinery in Machiasport. Without citing endless supporting economic data, it is sufficient to note that Washington County has been officially designated a redevelopment area by the Economic Development Administration. Development of meaningful employment opportunities there is, therefore, of prime importance. The economic benefits of this installation will be of great value to Washington County and to the balanced economic development of the State.

For several reasons, I do not support the proposition that the coastal area be zoned to prevent industrial development. For one, the protection of our natural environment is a problem for all areas of the State and should not be confined to a particular zone. Similarly, the recreational potential of our inland lakes and mountains is no less of a resource than our coast. And obviously, the entire State cannot be designated as a park. However, I do strongly support the notion of a

balanced plan for the multiple use of our coastal zone. At my encouragement, the State Planning Office has prepared a proposal for a study in this area to be submitted to the New England Regional Commission for possible funding.

Furthermore, the recreational potential and present use of our sea coast, particularly Washington County, is not by itself a satisfactory answer to the needs of that economically depressed area. The outmigration of youth and the static population of the county provides sufficient evidence that many of its residents must leave to find meaningful employment. Many Maine young people will not be satisfied with seasonal careers geared to serving tourists.

Since more stable and rewarding employment opportunities are demanded, I cannot agree that the proposed project is an encroachment on our sea coast resource. Rather it is an effort to capitalize on that resource, particularly the extreme inshore depths of Machias Bay. That resource, greatly enhanced by the introduction of the supertanker era and coupled with the fact that no overland oil pipeline serves New England, dictates that if a refinery is to be constructed in Maine it must be supplied through the coast.

This does not suggest that the refinery must necessarily be located immediately on the coast. The possibility of an inland location for the refinery is being considered, and I have asked Dr. Gardiner Means to present the economic and environmental implications of such a location before the Conservation and Planning Committee and the next meeting of the State Planning Council.

The staff of the Foreign Trade Zones Board has assured us that it would be a relatively simple matter to change the boundaries of the Zone. Such a change would require a public hearing to provide full opportunity for comment by those affected by the new location. On the basis of that hearing, the Board would decide on the merits of the application for an alteration in the Zone's definition. However, an inland location will, in itself, pose certain problems (more difficult hot water dispersal, added capital investment, etc.) that must be weighed against the aesthetic advantages of moving the refinery away from the coast.

II. THE LOCAL COMMUNITIES

While discussing the exact location of the refinery and its related facilities, it is perhaps timely to respond to your concern for the local communities, the problems which the refinery-associated growth will create for them, and the possible means and methods which they might employ to cope with these new strains.

I should first emphasize that all property within a Foreign Trade Zone is taxable and that during the construction phase the imported portion of the labor force will live in temporary quarters on the site, rarely accompanied by their families, and therefore not straining local services and facilities.

Last September I appointed a Conservation and Planning Committee specifically for this project with responsibility for coordinating its multifarious social, economic, and environmental aspects. Appointed to that Committee were the heads of appropriate State agencies, leaders of the affected local communities, and representatives of regional agencies that might be able to lend financial and advisory assistance. The purpose of this Committee is a simple one—to fully involve the local citizens and to make available to them State and regional talent in a coordinated effort to reduce and control the risks that are inherent in all growth and change.

Naturally, the real thrust of this Committee's effort hinges on an affirmative decision by the Foreign Trade Zones Board. At such a time, numerous subcommittees will be appointed to meld local, state, and regional programs designed to ease the transition that the project will unquestionably foster.

There are numerous potential avenues for cooperation among local communities to distribute the burden and the benefits from the location of new industry. The creation of sanitary districts, school administrative districts, and State or local housing authorities is possible and clearly desirable if growth is to be orderly and controlled. Already an informal subgroup of the Conservation and Planning Committee has prepared an application submitted by PRIDE Inc. for a Federal technical assistance grant to assist in the development of a Plan for the Orderly Growth of the Local Communities of East Machias, Machias, Machiasport, and Rogue Bluffs. This plan will provide guidance and suggestions for the local communities in directing development outside the Zone and thus not directly controlled by the State.

In the preparation of this particular application, and in all other planning and development efforts related to the project, local residents were, and will be, fully involved. That was the very reason for the creation of the Conservation and Planning Committee.

Furthermore, the interests of the land owners on the proposed site are fully protected by the laws of our State, which originally defined those rights. Clearly the State has no intention of violating its own statutes, nor does it have any reason to. I can assure you that the interests of local residents have in no way been violated, nor shall they be. Options have been obtained for the major part of the land included in the Foreign Trade Zone application. In exercising its eminent domain powers to obtain such additional land as is necessary, the Port Authority cannot, of course, exceed its powers or move without regard for the constitutional requirement of due process of law. Should you have evidence of specific instances where personal rights have been violated, I suggest you make these known immediately.

III. THE ENVIRONMENT

Initially, let me stress that the vehicle of a Foreign Trade Zone gives us a unique opportunity to directly control the industrial operations within the Zone. Therefore, I have charged the Conservation and Planning Committee with the responsibility for developing the most effective standards possible for the control and prevention of pollution. A subcommittee has been appointed under the chairmanship of Dr. Gardiner Means and composed of local, State, and regional representatives. This group has been working with Federal, State and regional agencies to draft environmental control provisions for inclusion in any lease ultimately negotiated between the State and the Zone's tenants and/or promulgated as rules and regulations governing Zone Operations. Included in those agencies consulted have been the Federal Water Pollution Control Agency, the National Air Pollution Control Administration, the New England River Basins Commission, the Department of State (re the International Maritime Consultative Organization), and within Maine, the Water and Air Environmental Improvement Commission and the Department of Sea and Shore Fisheries.

Following the initial drafting effort, the proposed provisions will be submitted to a wide review including that of a professional consultant, who will be retained by the State, and selected in cooperation with the WAEIC. Funding to support this input is being sought from Federal agencies and foundations. Later on, once the Zone is operating, there should be additional funds available through the Marine Resources Foundation for continued research and development in improved environmental control systems.

Naturally, these provisions have to be at least as stringent as existing Federal and State requirements. Fortunately, however, through the Zone mechanism they can be more stringent, filling voids when necessary,

and specifically tailored to the particular problems of the petroleum industry.

Again, through the unique structure of a Zone-type operation, the State can collect rental fees sufficient to support the employment of a professional staff for monitoring and overseeing the installation and operation of the pollution control systems.

While the initial focus of the pollution subcommittee has been on controlling the air and water effluent from the refinery and establishing procedures governing the on and off-loading facilities, it is also responsible for the development of appropriate formulas to govern losses occurring from accidental spills and potential disasters. Bonding requirements, insurance protection against demonstrated loss of livelihood, and the establishment of a claims review board will be necessary and have received a preliminary airing before the subcommittee.

Additionally, the Muskie bills presently before Congress will facilitate recovery of clean-up costs by the Federal government, and will lessen the problems of proof for private litigants.

Related to the pollution question is the ultimate location and forms of the tanker loading and off-loading facility. Preliminary surveys have been made by the Foster, Wheeler Company in order to satisfy Zone application requirements. Complete hydrographic and current surveys will be forthcoming once the project has been approved, and the final decision re the exact positioning of the marine facilities will be based upon these studies. Certainly neither the State, nor any of the proposed tenants has any intention of constructing facilities that are unsound from an engineering standpoint. Both the cost and the risk are too great to permit this to happen. Through its role as operator of the Zone, the State will have a full opportunity to review and evaluate the proposed structures, and to insist that they reflect the latest technological capabilities in soundness of design and in adequacy of environmental control systems.

A great opportunity exists for Maine, and Washington County in particular, to significantly upgrade its economy and to provide meaningful employment opportunities for all who would choose to live here. We would not move to secure this project without insisting that every possible effort be made to protect the quality of our environment. Indeed this is not a problem peculiar to Machiasport or Maine, but one which demands the serious attention of the entire nation. We must also recognize the problems and limitations imposed upon us by our existing economic base. The Machiasport proposal is an attempt to improve that base while concurrently insisting that proper environmental safeguards be incorporated into the construction and operation of the project.

In short, we are striving for a meaningful balance—one that provides increased economic opportunity without permitting the environmental decay which has unfortunately occurred in other areas. Advances in modern technology, plus the lessons learned from these past mistakes make such progress possible, provided that government exercises proper vigilance. I promise you that, as Governor, I will exercise and insist upon such vigilance.

A TRIBUTE TO "GREEN THUMB"

Mr. MUNDT. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial published in the Moody County Enterprise of Flandreau, S. Dak., regarding the success of the federally supported Green Thumb project in eastern South Dakota.

The success of this program is completing a number of worthwhile projects in the rural South Dakota communities

in Moody County is testimony to the fact that our Federal dollars are best spent when they can be utilized at the local level, employing local people to complete local projects. I join the Moody County Enterprise in saluting the outstanding work of those involved in the Green Thumb projects.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Moody County (S. Dak.) Enterprise, May 6, 1969]

GREEN THUMB WORKERS HELPFUL

This newspaper has never gone on record as supporting big governmental giveaway programs. As a matter of fact, we've been highly critical of programs that provide citizens with something for nothing. These kind of programs usually aren't appreciated by the recipient and they fulfill no useful purpose.

We can't say this about the federally supported Green Thumb program. This program is right down to the grassroots level. It employs an elderly group of men who work for what they earn. And they get the job done. We can actually see some results of their efforts.

This program, which is under the guidance of a Technical Action Panel composed of local authorities, started last spring. No sooner had it started than a terrible wind storm hit our community and played havoc with public and private property. The Green Thumb crew was thrown into the task of helping clean up the public areas. They did a neat job and they were needed. They have accomplished a number of other projects. They have helped with painting and fixing some of the county and 4-H structures. They have been used by the city to clean up some eyesores. They have been employed to do planting in park areas. Most recently they were employed to paint the halls of the courthouse and to put in acoustical ceiling tile in that building. Although the taxpayer pays the bill for the wages of these men, at the same time they save the taxpayer money on improvement projects that might not get done otherwise—or what would be too expensive to complete. And the money for the employment of these men stays home, plus the fact that it gives these elderly men a route of employment.

Last week they were hired to do the planting of trees and seeding of the lawn at the new Flandreau High School. If these men had not been available for this project—the school board would have had to hire a landscaping crew from outside the area at thrice the cost.

Green Thumb men are employed in the Colman area too, where they have carried out some valuable programs.

COST DATA ON MAJOR WEAPONS PROGRAMS

Mr. PROXMIER. Mr. President, I have just written Assistant Secretary of Defense Barry J. Shillito asking for detailed cost data on 21 different major weapons programs in an effort to determine the size of cost overruns on these programs.

I have repeatedly requested information from the Pentagon about overruns on a number of weapons programs. Specifically, I have asked for cost-overrun information on the SRAM, the Minuteman, and the total F-111 program.

The Pentagon's response has been totally inadequate. I am told that on some major programs, cost-overrun information "is not readily available."

On the SRAM, an air-to-ground mis-

sile, I asked the Air Force whether or not it was true that the cost for research and development increased from an original estimate of \$143 million to the current estimate of \$359 million. The Air Force response was that because of contract negotiations with the Boeing Co., "disclosure of any Air Force estimates is premature and could prejudice the Government's position in its efforts to obtain the best price in negotiations with the contractor."

That answer is ridiculous. The Air Force appears to be saying that although it knows how much the cost overruns are, and although Boeing knows the Air Force knows, it would in some way prejudice the Government to disclose this information.

Does the Air Force mean to say that it is concealing the cost overruns on SRAM from the contractor? Surely the contractor knows as much about its own overruns as the Air Force.

If the Air Force knows and the contractor knows, how would it prejudice the Government's case if Congress and the public knew. Unless the Air Force has something to hide.

Perhaps the Air Force is really afraid that disclosure of the SRAM cost overrun will so shock the public that a congressional inquiry would result.

Once again, I call on the Pentagon to disclose fully the facts about cost overruns on all major weapons systems. The Defense Department, in fact, recently promised full and accurate information on all procurement matters to the Congress and the public. In my letter to Assistant Secretary Shillito, I have urged prompt implementation of that promise.

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HON. BARRY J. SHILLITO,
Assistant Secretary of Defense for Installations and Logistics (I & L), Department of Defense, Washington, D.C.

DEAR MR. SHILLITO: As you know, the Joint Economic Committee has authority to make reports and recommendations on various aspects of the national economy. In several of its reports in recent years, reference has been made to the economic impact of military procurement.

Because of our continuing interest in this important area, I am writing to request information relating to a number of large weapons programs. The recent statement by Secretary Laird promising full and accurate information on all procurement matters to the Congress and the public is most gratifying. In the past, information about the costs of military programs has too often been concealed from the public, and I am hopeful that you will succeed in implementing a new policy of full disclosure of all non-classified information.

I am requesting that the cost and other data for the programs listed below be furnished to the Subcommittee on Economy in Government no later than May 29, 1969.

For each of the programs listed, by version, I would like to know:

- (A) The original estimate, and date of estimate for:
 - (1) Total research and development costs;
 - (2) Total production costs;
 - (3) Total production units.
- (B) The latest data, and date of data for:
 - (1) Total research and development expenditures and commitments to date;
 - (2) Estimate of funds requirements for

research and development from present to program completion;

(3) Total production expenditures and commitments to date;

(4) Estimate of funds requirements for production from present to program completion;

(5) Total present program production units;

(6) For any programs terminated, total expenditures prior to termination;

(7) Estimated cost of annual maintenance and operations.

(C) The names of the prime contractors.

(D) The description of each program.

(E) For each of the data supplied, I would like to have the data source shown.

A list of the programs follows:

1. Polaris (by version—such as AX, AIX, AIP, A2X, A2P, A3, etc.)
2. Poseidon (by version)
3. Atlas (by version)
4. Titan (by version)
5. Thor (by version)
6. Minuteman I
7. Minuteman II
8. Minuteman III
9. Corporal
10. Redstone
11. Sergeant
12. Jupiter
13. Lance
14. Mark II
15. Mark XVII
16. F-14
17. F-15
18. Main Battle Tank
19. Attack Carriers (CVA)
20. Cheyenne Helicopter
21. SRAM

Your cooperation is deeply appreciated.

Sincerely,
WILLIAM PROXMIER,
U.S. Senator, Chairman, Subcommittee
on Economy in Government.

MONDALE ANNOUNCES SUBCOMMITTEE ON SOCIAL PROGRAM PLANNING AND EVALUATION

Mr. MONDALE. Mr. President, I am extremely pleased to report the formation of a special Senate Subcommittee on Social Program Planning and Evaluation. The subcommittee was recently established by the distinguished chairman of the Committee on Labor and Public Welfare (Mr. YARBOROUGH). I wish to express my personal appreciation to Senator YARBOROUGH. He has demonstrated strong leadership and foresight in creating a special subcommittee to probe the adequacy of governmental efforts to plan and evaluate national social policies and programs.

I am also extremely grateful to each of the six Senators who will join me in the subcommittee's membership. They include the Senator from California (Mr. CRANSTON), the Senator from Missouri (Mr. EAGLETON), the Senator from Wisconsin (Mr. NELSON), the Senator from New York (Mr. JAVITS), the Senator from Vermont (Mr. PROUTY), and the Senator from Pennsylvania (Mr. SCHWEIKER).

The new Subcommittee on Social Program Planning and Evaluation is being created to provide a forum within Government for on-going critical study of the Government's attempts to fulfill the Nation's social goals. It will also study proposals for improving the planning and evaluation of social policies and programs and make recommendations on such proposals to the Committee on Labor and Public Welfare.

Two bills have already been referred to the subcommittee. One is S. 5, the proposed Full Opportunity Act, a bill declaring full social opportunity a new national goal and creating a council of social advisers to the President, an annual social report to Congress, and a joint congressional committee on the social report. S. 508, the proposal of the Senator from Oklahoma (Mr. HARRIS) to create a National Social Science Foundation, has also been referred to the new subcommittee.

I have long voiced concern over the very few firm facts we possess with respect to the success or failure of our social programs. We lack information upon which we may base reasonable and probably successful social policies and programs designed to cope with such problems as substandard housing, illiteracy, illness, and lack of social opportunity.

For example, we have only the most preliminary information about what our children are actually learning despite massive Federal spending for education in recent years. Similarly, while we have some reliable information about the strengths and weaknesses of the Job Corps program based on an unbiased sample of Job Corps' graduates and their employment records subsequent to training—a recent study by Louis Harris & Associates is a good example—we have no similar information on the other manpower programs that are offered as alternatives. Notwithstanding such information gaps, the Congress and the country are being called on to make immediate judgments about the future of Federal aid to education and the proper balance between the Job Corps and other manpower programs.

I have repeatedly said in the Senate that we cannot safely continue to legislate by hunch and intuition. Stumbling into the future is no longer acceptable. Survival from riot to riot is no longer a satisfactory measure of social progress. We are spending billions of Federal dollars each year, and many more at the State and local level, to eradicate a variety of social ills and we simply do not know which programs succeed best for the least cost or which show promise or which are counterproductive.

The new Special Subcommittee on Social Program Planning and Evaluation, which I am honored to chair, will strive to help the Senate, the Congress, and the Nation in its struggle to achieve full social opportunity for every American by minimizing the guesswork in social policymaking and program evaluation.

The subcommittee's first hearings on S. 5, the Full Opportunity Act, and the recent document entitled "Toward a Social Report," prepared by the HEW social indicators panel and issued by the Secretary, are tentatively scheduled for July. Hearings on the proposed National Social Science Foundation legislation will be scheduled at a later date.

BRUTAL FASCISTS TYRANNIZE GREECE

Mr. YOUNG of Ohio. Mr. President, since a small group of Fascist army officers seized power in Greece on April 21, 1967, the people of Greece have been living under a dictatorship reminiscent

of Nazi Germany. The ruling military junta has destroyed free institutions, abolished representative government, prevented free elections, established control over press and radio, put an end to all guarantees of individual liberty, throttled freedom of speech, imposed a handpicked administration on the Greek Orthodox Church, and conducted a reign of terror against political dissenters.

Even more revolting to the conscience of free men everywhere were recent disclosures of the torturing of political prisoners. Reports of the use of torture by the regime have been filtering out of Greece for 2 years. The reports were so grotesque they seemed unbelievable. However, in the May 27, 1969, issue of *Look*, Christopher S. Wren, a senior editor, reported firsthand and eyewitness details of extreme torture of political prisoners in Greece. Mr. Wren writes that in Athens he "studied nearly 200 cases in personal interviews and smuggled reports." While in Athens he spoke with businessmen, priests, army officers, lawyers, housewives, and students who verified these reports.

Wren begins his article as follows:

A succession of former political prisoners described every ordeal in detail and let me see, and touch, the scars. Now I am convinced. Torture has taken place in Greece on victims who number into the thousands. Under a frightened, unpopular military regime, torture goes on today. . . . The majority are still in prison. Those released have been forced to sign statements that they were not tortured.

Mr. President, the tortures suffered by thousands of political prisoners in Greece, both men and women, are almost beyond belief. While reading Mr. Wren's account I at times found it difficult to comprehend how men and women could undergo such brutality and survive. The torture described is every bit as savage and brutal as that applied by Hitler's Gestapo beasts. With the defeat of nazism we thought we had witnessed the end of such barbarity. It is clear from Mr. Wren's article that nazism is alive in Greece. The Fascist colonels have given free rein to the sadists and torture specialists to practice their specialties in the dungeons of Greek jails. The horrors of Buchenwald, Dachau, Auschwitz, and the Gestapo basements of Nazi Germany, and the brutality afflicted in the torture chambers of the Lubianka prison in Moscow during the Stalin regime, are being relived in the basement of Asphalia prison, the headquarters of the Greek security police.

The fact is that brutal colonels and other officers who now terrorize Greece were trained by American military missions, and the weapons they used in their coup d'etat were supplied by the United States.

Unfortunately, our State Department immediately recognized the military junta in Athens. Had a ragtag group of leftwingers, instead of Mussolini-like Fascists, taken over, it would be interesting to note whether our striped-pants boys at the State Department would have closed our Embassy and President Johnson and Secretary Rusk immediately sent in our planes and paratroopers to "protect American citizens."

Our almost total involvement in the

civil war in Vietnam has obscured the tragic events in Greece. However, the destruction of democratic government in that land by Fascist military officers more than 2 years ago can no longer be ignored. With every passing day the Greek dictatorship tightens its grasp on every aspect of Greek life. Purges take place mercilessly in the military, the church, and throughout Greek society.

Furthermore, since the brutal Fascists took power the United States has given almost \$100 million in military and economic assistance to help maintain them in power. More than \$37 million in additional military assistance is slated to be given in fiscal year 1969. How can the administration condone a policy of continuing to recognize, let alone assist, a brutal Fascist tyranny that in many respects is as heinous as that of Nazi Germany?

I ask how can Secretary of State Rogers, Assistant Secretary of State for Near Eastern Affairs Joseph J. Sisco, Director Daniel Brewster of the Greek Desk at the State Department, Roswell D. McCullough, chargé d'affaires of our Embassy in Athens, and other administration officials responsible for our policies toward Greece continue to turn their backs on the fact that the military junta is a brutal, inhuman gang of thugs and sadists?

The terror in Greece has become so oppressive that the Governments of Sweden, Norway, Denmark, and The Netherlands have filed charges against Greece in the 18-nation Council of Europe for violation of the human rights convention which forbids degrading treatment of prisoners. The Greek Government was formally put on notice that the Council will decide before the end of this year whether to expel Greece from its membership. This action was taken by a 13 to 2 vote of the Council of Ministers.

With the publication of Mr. Wren's article, officials of the State Department were prodded toward taking steps to end political repression and torture, and to restore civil liberties to the Greek people. With its usual timidity, the State Department, through Information Officer Carl E. Barch, issued a weak, half-hearted statement which reads in part:

We have repeatedly made clear our view—again recently to high-level Greek Government officials—that we hope for return to representative government and the full restoration of all civil liberties. We believe that this would be in the best interest of the Atlantic community of which Greece is an integral part.

Of course, nothing concrete was done by the State Department to implement this statement. It is clear that these are just meaningless words. Once again officials of the State Department have met the issue head on with drivel and gobbledegook designed to lull Americans until public outrage over conditions in Greece subsides.

Mr. President, an insight into the thinking of officials of the State Department can be derived from Secretary of State Rogers' reply to a question put to him by the distinguished junior Senator from Rhode Island (Mr. PELL), when on March 27 the Secretary testified before the Senate Foreign Relations Committee

on resumption of military aid to Greece. Senator PELL said:

But this is a regime built on the basis of torture and the denial of civil liberties. Can you not take a hard line in future aid negotiations, and ask for assurance that torture not be a normal way of governing?

Secretary Rogers replied:

Yes, Senator, we share your concern, not only for the torture phase but the other civil liberties. We are at present doing what we can through diplomatic circles to effect that, and we also will be conscious of the factors that you mention in subsequent negotiations.

More words—diplomatic niceties—while the torture of men and women continues in Athens. The truth is that the United States is not doing what it can to restore democracy to Greece. We continue to recognize the military junta. We continue to give military and economic assistance to help maintain the fascist regime in power. Administration officials remain silent regarding torture, oppression, and despotism in Athens, the cradle of democracy.

Despite the claims of State Department officials that the United States is without power to affect significantly the state of affairs in Greece today, it is obvious that there is much we could do.

The United States should sever diplomatic relations with the Greek dictatorship and thereby indicate our disapproval of the regime in such a way that the Greek people could not be mistaken about it.

We should suspend completely the delivery of all military and economic assistance to Greece.

Our Government has available a wide range of economic powers that it could exercise to apply pressure on the Greek Government to end the torturing of political prisoners and to restore civil liberties to the Greek people.

The United States should join forces with its friends in the Council of Europe to isolate the military junta politically and economically as various Western European governments are prepared to do.

Finally, we have the ultimate sanction of moving to expel Greece from NATO.

None of these steps has been taken, and the suffering in the torture chambers of the Asphalia continues. The freedom-loving people of Greece are looking for a sign from the United States—a genuine sign that will assist them in regaining their freedom. Mr. President, the 8-million liberty-loving Greek people regard our aid to their oppressors as the most powerful factor in keeping them in power.

Christopher Wren in his article in Look vividly described the feeling of the Greek people toward our relationship with their oppressors. He wrote as follows:

The people of Greece believe the tortures would end if the United States just spoke out. One woman challenged: "I can't understand why Americans want democracy in their country, but smile upon people who destroy democracy in my country. Democracy is not just for the Americans." The irony is that American aid has become identified with the tortures. American M1 rifles have been used in the falanga beatings. Some of the interrogators' desks at Boubourlinas St. bear the clasped-hands emblem of

the U.S. AID program. Unconscious victims have been lugged from the terrace there down to the basement ("A slaughterhouse of broken bodies" one prisoner called it) in grey American hospital blankets with "U.S." in prominent black letters. The torturers, who smoke American cigarettes while they work, like to give the impression they are only doing a job for the Americans. Most of the victims I talked to believed that Lambrou (the director of the Greek security police) and Mallos (an Asphalia torture specialist), among others, were trained in the United States, though there is no evidence of this. No wonder Pericles Korovessis, now a homeless, penniless exile, asks: "Is Lambrou your spokesman? What has happened to the American dream?" . . . Look for anti-Americanism to spread through a people who were once loyal friends.

It is clear that the political parties of the right, left, and center join in rejecting and despising the junta. Even within the armed forces its support is so limited that it still feels compelled to continue the purges of almost all the senior and experienced officers. The ablest citizens of Greece have, with few exceptions, left the service of the state as a result of purges or because they have been unwilling to serve under a government of usurpers and tyrants. The economic recession in Greece continues. The rate of economic growth, even according to the regime's doctored figures, is only half that of the years before the coup. The country's reserves of foreign exchange have disappeared. Its foreign debts have skyrocketed.

Twenty years ago, President Harry S. Truman made the decision to commit our military might and our economic resources to save Greece from the serious threat of a Communist takeover. He asked the Congress to aid Greece to preserve a "way of life based upon the will of the majority and distinguished by free institutions, representative government, free elections, guarantees of individual liberty, freedom of speech and religion, and freedom from political oppression." His historic action which came to be known as the Truman doctrine resulted in the defeat of the Communist-led insurrection and the establishment of a democratic government in Greece. Since that time, the United States has spent almost \$4 billion of American taxpayers' money for economic and military assistance to Greece, supposedly to help enable that nation to remain a bastion of freedom and democracy.

Today the Greek people are being crushed by a regime as tyrannical as any in the world. Our State Department does nothing more than pay lip service toward restoring freedom to Greece. We continually express our concern but take no real steps toward ousting the junta.

We would do well to consider the wise words of John Gunther in his book, "Inside Europe Today":

It is always dangerous for a democracy, like the United States, to become too closely involved with a dictator or semi-dictator, no matter how convenient this may seem to be. It is the people who count in the long run, and no regime is worth supporting if it keeps citizens down . . . if only for the simple reason that they will kick it out in time.

Mr. President, the honor of our country is at stake. Indeed, our very security

demands that we cease to follow a course of action which makes us in the eyes of the Greek people and of free people everywhere the accomplices of tyranny.

The revitalization of democracy in Greece is as much in our own interest as it is to the people of Greece. Officials of our State Department should stop mouthing words and issuing press releases and start taking action toward erasing this stigma on our honor and toward restoring democracy to Greece, the land which gave democracy its birth.

SMALL BUSINESS ADMINISTRATION IN MAINE

Mr. MUSKIE, Mr. President, the complaint is often heard that the Federal Government is so big, so bureaucratic, and so far removed from the people that it is largely insensitive to their needs.

It is always a pleasure to hear otherwise from constituents.

Recently Victor and Mary Nielsen, owners and operators of Tamarack Motel, Brewer, Maine, wrote a letter to the Augusta, Maine, office of the Small Business Administration. Their business was made possible because of a \$10,000 loan made by the Small Business Administration 10 years ago. It has now been repaid.

Because it expresses so well the valuable work that the Small Business Administration is doing, I ask unanimous consent that Mr. and Mrs. Nielsen's letter be printed in the Record:

There being no objection, the letter was ordered to be printed in the Record, as follows:

APRIL 28, 1969.

DEAR SMALL BUSINESS ADMINISTRATION: Enclosed is a check for the final payment toward our loan which we acquired 10 years ago.

Both my wife and I want to extend our deepest thanks to you for making it possible for us to get our little motel started. If it were not for you people, we may not have opened our business because at the time we were looking for a loan 10 years ago it was next to impossible to get money.

We have nothing but praise for your department who have treated us like human beings.

Thank you again from—
VICTOR AND MARY NIELSEN.

PRESIDENT NIXON SHOWS THE WAY

Mr. MUNDT, Mr. President, the President's address last week, in which he outlined the steps which could bring to an end the war in Vietnam, provides the opportunity for achieving the peace which has eluded that troubled part of the world for more than a quarter of a century.

In my opinion, the President's proposals puts the United States in the position of "walking that extra mile for peace."

Whether that opportunity will become reality rests in the hands of the North Vietnam Communist leadership.

In addition to presenting a method by which the outside forces—North Vietnam and the United States, in the main—can be withdrawn and thus reduce the scale of the conflict to a ques-

tion of settling the differences between the contending forces within South Vietnam, the people of that war-stricken country, the President has opened the way for the United Nations to make a vital contribution as the international body which could supervise withdrawals, ceasefires, and elections.

The question, of course, is whether North Vietnam is going to accept the hard fact of life that its aggression will not be rewarded by a decision to turn over to Hanoi the destiny of the South Vietnamese.

The President has made clear that this country has no intention of imposing any particular form of government upon the South Vietnamese.

By the same token, there is no intention to permit such imposition from elsewhere.

The primary objective of this country, as clearly outlined by President Nixon, is a free choice for South Vietnam.

In essence, he is asking Hanoi to join in permitting the South Vietnamese people to make such a choice, free of any threat from any outside force.

The question now, Mr. President, is whether Hanoi, and its chief backer, the Soviet Union, are willing to join President Nixon in that march toward peace.

The President of the United States, Mr. Nixon, has shown the way.

RECOMMENDATIONS OF ORGANIZATION FOR ECONOMIC COOPERATIVE DEVELOPMENT

Mr. PROXMIER. Mr. President, last week, members of the Joint Economic Committee met informally with Dr. Walter Heller, formerly Chairman of the Council of Economic Advisers.

A brilliant economist, Dr. Heller has always been most constructive and helpful to the Joint Economic Committee. No matter how busy, he has always been ready to share his information and insights with me and my colleagues on that committee.

We asked Dr. Heller to meet with us to explain the recommendations of the Organization for Economic Cooperative Development, set forth in a recent study on "Fiscal Policy for a Balanced Economy—Experience Problems and Prospects." Dr. Heller acted as chairman of a distinguished group of international economists representing the major European nations who devoted a considerable period of time studying this fundamental issue, an issue I might add that runs to the very heart of full employment policy. If our fiscal policies are not wise, then surely we shall have neither full employment nor stability for very long.

As Vice Chairman and former Chairman of the Joint Economic Committee, I was most pleased to see that the distinguished group of international economists that Dr. Heller headed gave praise to the U.S. Congress and to the Joint Economic Committee. In their report, it is pointed out that there is need for the national legislatures, when discussing economic questions, to look at issues and policies in their entirety. This need for an overall view was termed particularly important in countries where executive proposals could be substantially modified

in legislative debate. As their report puts it:

They (the Legislatures) have to take stock of the total impact of fiscal proposals and consider it in the context of the general economic situation.

The international report goes on to point up the advantages in the availability of committees like the Joint Economic Committee to the Legislatures in helping to foster a comprehensive view of issues.

The committee states, in part:

As we have already indicated, the range of relevant policies is wide, and may include public investment programmes and, on occasion, the pricing policies of public industries. In addition to formal discussions by legislatures as a whole, there may also be advantages in having smaller specialised committees, on the lines of the Joint Economic Committee in the United States, to foster the development of fully informed views. And efficiency might be increased if an expert staff were at the disposal of legislatures.

BASES LOADED

Mr. YOUNG of Ohio. Mr. President, why is it that our Armed Forces have so many overseas bases? Unfortunately, at this time 1,513,000 American servicemen—Army, Navy, Air Force, and Marines—are serving in foreign lands at 2,170 military and naval bases. Many of these overseas bases are of no importance whatever to our national defense. A majority are obsolete from a military standpoint. They are national liabilities from a military and diplomatic standpoint. Also, tremendously costly to American taxpayers. Ending forthwith our military presence overseas in a majority of these bases and then withdrawing 200,000 men this year from Vietnam should be done. Foreigners term many of our bases as "golden ghettos." We should show commonsense and prudence. These overseas bases are an affront to the people of those countries where they are located. Let us close them, then use some of that money to tackle real ghettos in the United States.

LET US STOP HANDOUTS TO THE RICH

Mr. NELSON. Mr. President, a timely article about the tax breaks and the subsidies which the Federal Government bestows upon the well to do of the Nation, in contrast to our careful scrutiny of every bit of assistance which is proposed for the poor, appears in the June issue of *True* magazine. The article is authorized by the distinguished Senator from South Dakota (Mr. McGOVERN).

The appearance of the article is another bit of evidence of a growing revolt in this country against our double standards: one for the rich and another for the poor and the middle class.

More and more attention is being given by all our media to tax loopholes and subsidies enjoyed by those who have no real need, and our simultaneous resistance to providing food for the hungry, or raising social security benefits a little for the indigent aged, or helping improve educational opportunities in low-income areas.

I ask unanimous consent that Senator McGOVERN's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LET'S STOP HANDOUTS TO THE RICH (By Senator GEORGE McGOVERN)

Early this year, many Americans affluent enough to have their names on a select mailing list received an expensively printed brochure from a respected New York financial counseling corporation. It was entitled *Tax Breaks That Lead to Executive Wealth* and listed on its cover 21 tax loopholes designed to help those in the upper-income brackets avoid paying the full amount of their taxes.

Among the more intriguing titles offered by the counseling firm were: "The family setup that pays college tuition with tax dollars," "Save taxes now with gifts effective at death," "Tax free life insurance for executives," and "One way to split income with your children for tax savings." Details were available at a price that many subscribers would find tax deductible.

All of the methods suggested by the firm are quite legal, and they represent just a few of the many tax devices that have been set up to benefit the rich. Not surprisingly, these benefits multiply as the tax bracket of the recipients goes up and the number of citizens eligible to revel in them decreases.

But tax loopholes are only one measure of the government's concern for people who are more than able to take care of themselves. The tax advantages are supplemented handsomely by direct payments both to these same privileged people and to the businesses they control. The total cost to the nation is a staggering sum. A compilation of all the subsidies and all the tax concessions would equal or exceed the total collected by the federal government in income taxes. It is, without question, a case of government dole for the well-to-do.

A national clamor has been raised over programs to help the hungry, and indignation rages every time a child in a rotting tenement is found to be getting more than his meager allotted share. The real scandal in this country, however, lies in the handouts to the rich, which amount to many times the \$3 or \$4 billion it would cost to see that hungry Americans get enough nourishing food to escape permanent mental and physical handicap in childhood, have the health and vigor to work and make a contribution to society in their adult years, and to be free from want and malnutrition when they grow old.

If the American people were aware of the full impact of giveaways to the rich, and if they were to receive the same publicity that is given the puny dole afforded fatherless children, the public outcry would compel speedy and drastic reform. Unlike programs for the poor, which are subjected (quite rightly) to never-ending scrutiny, the tax breaks and payoffs to the affluent are seldom discussed.

Critics of aid to the poor insist that federally funded programs weaken the moral fiber of the needy. Although few are willing to say that subsidies have weakened the moral fiber of the rich, one must wonder about the fiber of a nation whose priorities show such contempt for human values.

Once established, these handouts tend to perpetuate themselves and to expand, helping the rich get richer.

Take aid to farmers as an example. In the 1930's, when the Depression gripped the nation, there was genuine fear that poverty would destroy the family farms, which had been a strength of the nation since its founding. More and more small farmers were going bankrupt and trekking to the cities, where they tried to find jobs in industry.

Limitations on payments to an individual farm operator have been rejected in Congress repeatedly, although the large Treasury checks are now making it possible for large operators with huge power implements to buy and close out the family farmers originally intended to be helped. Advocates of putting a ceiling on these payments believe \$200 million to \$400 million could be saved by limitations which would not seriously effect any needed production control.

Government programs were started to limit production, avoid great oversupplies and maintain reasonable market prices. Over the years they have helped many small farmers survive in agriculture, but they have helped large factories-in-the-field even more. One out of 50 farmers is able to gross \$100,000 a year or more, but such farmers get one-fifth of the acreage diversion and price support payments. One big corporate farm in California drew more than \$4,000,000 in 1967. The top 25 farm giants that year drew \$22,766,943 from Uncle Sam.

It is virtually impossible to measure the real cost of such programs. It is known that the nation paid \$3.5 billion in direct farm subsidies in 1967. But no one can be sure how many small farmers were pushed off their land because of it, and what the eventual price to the taxpayers will be in terms of added welfare costs in the cities, and programs to train these former farmers for jobs in industry. Moreover, there can be no price tag on the human suffering and the destruction of hopes and spirit.

The similar amount of tax revenue is being drained away by wealthy urbanites who go into farming. They build up cattle herds, citrus groves, farm buildings or any other capital items they can on a current expense basis, deductible from high-bracket nonfarm income as expense. Later, they liquidate these improved and accumulated farm holdings and pay taxes on a capital gains basis at a maximum 25 percent rate. There is a potential \$450 net tax savings for every \$1,000 of ordinary nonfarm income taxable at 70 percent, which can be converted to a capital gain at the 25 percent tax rate.

The *Wall Street Journal* reports a growing number of urban investors who can appropriately sing a new parody of an old song:

"I'm a rich cowhand of the Wall Street brand
And I save on tax, to beat the band.
Oh, I take big deductions the law allows
And I never even have to see my cows
Yippie-I-o-ki-ay"

In 1966 there were 680,000 taxpayers who deducted \$1.036 billion of farm "losses" from their nonfarm income for tax purposes.

In the state of California where the Department of Agriculture estimated total net farm income at \$896 million in 1965, income tax returns filed by her residents reflected instead a total net loss of \$6 million from farming including \$42 million supposed loss by the "farmers" residing in metropolitan Los Angeles, the movie capital.

The oil capitals and financial centers all have their tax-loss farmers, too, including a large majority of all people with million-dollar incomes, whose apparent ineptitude at farming grows in proportion to their income.

Now consider what happens to the billions that the taxpayers pay out for research. Before World War II, firms doing research for the government normally turned the results of their investigations back to the government for federal use. Then it was decided—amid considerable business pressure—that allowing the companies to patent the products of their research would add to their incentive. This has now become the general rule on military research contracts.

As a result, the public often winds up paying twice for the same invention. In one classic case, it was discovered that Republic Aviation Corporation had paid \$82,500 to Lockheed in royalties for use of a wing tank on planes Republic was building for the

Air Force, although the Air Force had paid Lockheed to develop the tanks.

The defense budget, with its billions of dollars for new materials every year, has become a gold mine for industrialists. They have found that selling to the government is just the reverse of an oriental bazaar. There it is not uncommon for a seller to set a price, then come down to what the buyer will pay. But defense contractors frequently set a price and then go up to what the Defense Department is willing to pay.

One of the most controversial elements of the trouble-plagued F-111 airplane is its engine. The engine contractor, Pratt & Whitney, originally offered to build the engines for \$270,000 each. A series of increases brought the figure to \$700,000. A Pentagon survey showed that about \$200,000 of this cost went for wasted effort, and negotiated the price down to a "bargain" \$500,000. The only thing unusual about the contract with Pratt & Whitney was the government's cutback on the final price.

In nine of every 10 major weapons systems ordered by the Pentagon, manufacturers manage to double the cost by the time the system is completed. The price quoted in the contract is merely a starting point.

Sen. Stuart Symington, a former Secretary of the Air Force, was able to look at the cost figures projected for the Anti-Ballistic Missile system with a practiced eye. He noted that the ABM cost, first estimated at \$3.5 billion, rose to \$5 billion, and then to \$9.5 billion. With no exaggeration intended, he warned that it could reach \$400 billion before it was completed—more than the total national debt.

The government also has wisely invested millions in research to curb dreaded diseases, only to find that the cure is often inexplicably high. More than \$700,000 in federal funds went into research, headed by Dr. Robert Guthrie, to track down PKU—a chemical substance found in some newborns that can cause mental retardation. He devised a simple chemical test to detect the substance, and announced that kits with enough material to test 500 infants could be produced for \$6. To make the test available everywhere, Doctor Guthrie licensed the Ames Division of Miles Laboratories to mass-produce them. Astounded physicians in hospitals across the nation found that the price had gone up. The kits for 500 tests were suddenly selling for \$262. With imagination that matched the pricing, Miles' officials explained that the high price was needed to offset the cost of "their" research.

Experts report no major industry that does not receive some kind of government hand-out. Yet there is a great distaste for calling them subsidies. They are disguised in a thousand different ways, each calculated to make a subsidy look like anything but a subsidy. Indeed, the only federal statutes using the word "subsidy" are those dealing with ship construction and ship operations.

For instance, the government's generosity in giving away the air is not called a subsidy. Yet Federal Communications Commission licenses for radio and TV stations have made a number of millionaires. Lord Thomson of Fleet, the British press czar, has called the FCC television licenses "as good as a license to print money."

Those actually called subsidies—the payments to shipowners which began in 1789 while George Washington was President—are now so numerous that it is almost impossible to sort them all out. The taxpayers not only help pay for constructing and operating ships, but also for repairing and replacing them. All military cargoes, half of other government cargoes and all exports purchased with government loans—with a few special exceptions—must be carried in U.S. flag ships. The government also improves harbors, maintains navigational aids, protects the coastal trade and provides many other substantial benefits for the American maritime industry.

Without using the term subsidy, a generous Uncle Sam likewise builds airports for the airlines, makes grants and cash contributions for railroad construction, finances highways that will benefit the truckers, pays for carrying the mail, and publishes the maps and charts so essential to the transportation industry. The government offers a Heinz variety of guaranteed loans to help businesses, and many government purchasing programs are tailored to benefit special interests of one sort or another.

Tariffs form an important, but hidden, pay-off to American manufacturers. This is a form of taxation on the consumers, who must pay higher prices for imported goods. Among the industries that profit the most are automobile, steel and textiles. The tariff on cars, for instance, keeps Volkswagens from being an even greater threat to Detroit's products. The glass, electronics, optics and china industries also are helped mightily by the protective tariff.

The drug manufacturers, who recently agreed to pay \$120 million in an out-of-court settlement of anti-trust suits brought against them for overcharging state and city governments, more than make up their loss with handouts from the federal government. The cost of testing new drugs can be enormous, but the drug-makers have found a way to have the taxpayers carry most of it. One physician, who specializes in testing drugs, has received enormous contracts from the National Institutes of Health. Using the equipment and know-how paid for by the government, he has been able to work for the drug industry at a fraction of what his services would normally cost.

Bankers, dedicated individualists all, take a special interest in the taxpayers' money. Hundreds of millions of dollars, on deposit by the government in federally chartered banks, are used for loans by the bankers. Taxpayers, of course, must pay interest to borrow the money they have already paid into the government. Government-guaranteed loans have also boosted the banking business at no risk to the banks. The Federal Reserve System provides a number of other free services to banks such as clearing checks and handling currency.

Even the medical profession gets its piece of the action. Although many doctors are quick to oppose benefits for their patients—the American Medical Association was a leading opponent of Social Security in the '30's as well as Medicare in the '60's—they welcome federal help for themselves. More than half the cost of going to medical school is paid by the government, and once the doctor has his degree in hand, the benefits multiply. Many hospitals the doctors use are built with federal funds; even many of the stethoscopes and little black bags they carry are tax-deductible gifts from the subsidized drug companies.

And certainly few persons have been more pampered by the government than the oil millionaires. This industry enjoys a seemingly endless number of ways to avoid supporting the country that has made oilmen among the world's richest. Back in 1926, their lobbyists pushed a bill through Congress to allow them to deduct part of their taxes on the oil they pumped out of the ground and sold for profit. In theory, they are being compensated for the loss of the oil that nature took millions of years to make.

Over the years, the oil depletion allowance has taken on a mystical, pseudo-scientific quality. For many, the allowance, 27½ percent, seems to represent some exact compensation for the damage being done to nature's storage vaults. Actually, it is nothing more than a compromise reached by Congress 43 years ago. The Senate had voted a 30 percent allowance, and the House had agreed to 25 percent. The two Houses split the difference.

The depletion allowance is only one of a great many tax dodges set up for the oilmen. As former Sen. Paul Douglas once pointed out, "A charwoman earning \$55 a week paid

more in income taxes than an oil company whose income was \$26 million." Two of America's biggest oilmen pay less than \$5,000 a year in income tax. H. L. Hunt, the Texas oil magnate, spends considerably more each year to fight welfare programs than he pays in taxes.

These oil millionaires are by no means unique. While there are 2.2 million families officially listed as below the poverty line who must pay taxes, there are many with exceptionally high incomes who pay no taxes at all. Our tax system, which is badly in need of total reform, supposedly places the heaviest burdens on those best able to pay. Yet the computers of the Internal Revenue Service have disclosed a surprisingly high number of citizens with incomes in excess of \$1 million a year who pay at the same effective rate as men earning only \$20,000. Perhaps these people who have gone through the graduated tax system so remarkably could be called taxpayers *cum laude*.

Possibly a reason that most Americans are willing to blink at the abuses of the tax system by the rich may be that they themselves have found a small loophole that helps them cut down on their own tax bill, such as being able to deduct all the interest and all the property taxes they pay from their income before computing their tax.

The slightly more affluent have more tax breaks. They can lease their automobiles as "business expenses," and write off the entire cost, a far easier method than the depreciation deductions for owned autos. Successful businessmen have found that the cost of vacation houses and expensive cabin cruisers can be charged to business expenses, and thus become deductible. They, too, have been put in a position where it is difficult for them to complain about the really costly tax breaks.

One particularly insidious—though legal—business practice gnaws away at the public through the special tax rate set up for small businesses. A considerable number of multimillion-dollar corporations have set up each of their subsections as individual corporations. In this way, each corporation pays the lower small-business tax. Some of these business giants have split themselves into hundreds of smaller corporations, and gain an annual tax saving that runs into the millions.

Similarly, many wealthy persons and corporations have exploited the tax-free status given to charitable foundations. Under this mask, they are able to deduct funds "contributed" to the foundations from their taxes, and still use the money for business and personal purposes.

It is part of the creed of a capitalist society that business must succeed or fail on its merits; that businesses take risks and profit or lose on them. With increasing frequency, however, businessmen are eliminating the risk factor from their operations with government subsidies. Much of this is a result of military contracts, which guarantee corporations a profit on their product, even when they do not perform up to contractual standards. Some of these corporations have sustained enormous losses when they ventured into the private, competitive marketplace, and have quickly retreated back to the safety of defense contracting.

Now, industry is looking for federal handouts to underwrite its adventures in the private sector. The most notorious example, perhaps, is the supersonic transport. The federal government is already subsidizing the development of this plane at a cost of \$500 million. The total federal contribution that will have to be made before the SST is unleashing its sonic thunderbolts upon earthbound humans is estimated as high as \$4.5 billion. The government has always been exceedingly generous to the airlines and the aircraft manufacturers, but the SST seems to be something less than the wisest possible investment of our dollars.

The handouts, doles, bribes and giveaways go into almost every segment of American life. Almost everyone gets something, but it is the rich who get the most. The net effect tightens the noose of hunger and hopelessness around the necks of Americans at the bottom of the economic ladder. It is easy to see why so many of them feel so bitter and desperate that they take their grievances into the streets.

Many of my colleagues in Congress, who are aware that the nation must cut back on its spending, believe that the giveaway programs are the logical place to start the cutting. I agree with them. It is time for everyone to start carrying a fair share of the load. The cutting should begin where it would do the most good—with the programs that cost the taxpayers the most money. They include the subsidies, tax loopholes, gifts and payoffs that give more money to the rich at the expense of other Americans.

NEW HOSPITAL WING

Mr. RIBICOFF. Mr. President, the town of Bristol, Conn., dedicated a new eight-story wing of the Bristol Hospital May 9.

It was a historic occasion. The achievement of this modern medical facility was gained by the efforts of Bristol citizens from all walks of life over a period of many years.

The people of Bristol are proud of their new hospital building—and they have every right to be.

The structure houses the very latest in medical techniques and equipment.

Yet it was an old-fashioned notion—that concerned citizens can move mountains if that is what is needed—which enabled Bristol to build the new hospital wing.

A fundraising campaign raised more than \$2 million toward the cost of construction, but, equally important, is the fact that all segments of the community got behind the goal of better hospital facilities.

Here we find an example of community spirit and civic responsibility at their best.

As Carlyle F. Barnes, hospital president, said at the dedication ceremonies:

The important thing this illustrates is not so much a matter of dollars and cents as it is the tremendous and continuous commitment which a community must make if it wishes to keep pace with the explosive rate of change of the medical sciences.

I know many of you well—well enough to know that you have made a commitment rather than a "contribution." And that is the thing we really can be proud of. That is the thing that makes this a community in the truest sense of the word.

The remarks by Mr. Barnes are eloquent and truthful.

Financial resources will buy bricks and mortar. But all worthwhile civic goals are achieved when the citizens of a town work together to improve their community.

The people of Bristol are to be commended. They built themselves a new hospital building. And they worked together in the pursuit of the common good. In so doing, they have accomplished much. I salute them for it.

The Bristol Press, which played a key role in efforts to construct the hospital wing, printed a special edition May 8 commemorating the new facility. I ask

unanimous consent that an editorial of that day from the Press and other articles published in the Press be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Bristol (Conn.) Press, May 8, 1969]

BRISTOL HOSPITAL: A MONUMENT TO PEOPLE

On the eve of the dedication of Bristol Hospital's magnificent new eight-story wing, it is only natural and proper that we send our editorial thoughts back down the path of yesteryear to recollections of the many people responsible for the creation of the hospital's splendid image as the living embodiment of the best features of this community.

Of course, mortar, bricks and steel and engineers, architects and contractors were important factors in the great growth of the vast Bristol Hospital complex as we know it today. However, we like to remember that it was people, selfless people representing all segments of our local society, who furnished the inspiration, the leadership and the drive to shepherd the institution from its birth up through the half century of growing years to its eminent status of today. These remarkable men gave their time, their dedication and themselves and they gave without expectation of material reward or personal glory.

Tomorrow's dedication in a sense will not only be the formal opening of a new building but it will also be a salute to those leaders—past and present—who truly "made" Bristol Hospital.

There were many, many such individuals but as with any large, continuing movement a few stand out. For instance, Reverend Doctor L. H. Dorchester as the first president, then pastor of Prospect Methodist Church, was a motivating force in the formal launching of a hospital organization in 1920 after the community a couple of years before had learned of the need for such. That was when the Parish House of First Congregational Church had to be used as an emergency hospital at the time of the devastating Flu Epidemic as World War I ended.

Then came the three decades from 1921 to 1951 when Fuller Forbes Barnes served as the hospital president. This most unusual man more than any other was responsible for the transition of the hospital from location in a house at South and George Streets to the present huge facility at Newell and Brewster Roads. Not only was he generous in numerous financial gifts to the hospital but, and possibly more important, he was generous in the unstinting leadership he provided in fostering growth of the institution and lending encouragement to the small army of people needed to promote and nurture that growth.

Today that same leadership is being afforded by his son Carlyle F. Barnes, the incumbent president, as is attested by the new wing to be dedicated tomorrow. Carlyle Barnes' immediate predecessor, C. Terry Treadway, Jr. also made his mark in the hospital's history for it was during his tenure that the preliminary planning for the new building was undertaken.

Down through the nearly five decades of Bristol Hospital's burgeoning expansion, hundreds of people have aided in the drive to give the city the best possible in medical care. When the first major fund drive was held way back in 1923, it was a community effort. Typical was the event when the then Bristol Press Publisher Arthur S. Barnes recruited a battalion of civic leaders to act as newsboys for a day in order to raise campaign contributions. These men, whose uniform was a Press paper bag, covered the town on a house-to-house basis and brought back a tidy sum to give the hospital drive a valuable shot in the arm.

In 1940-41 Senator Anthony J. Rich spearheaded a highly successful drive to make possible further expansion at the hospital. Four years ago, Senator Wallace Barnes was chairman of a \$1,000,000 effort to pave the way for construction of today's new wing and in recent months Terry B. Fletcher presided over a satisfactory \$2,000,000 campaign for the new wing program.

There were many, many others who labored in less spectacular fashion for hospital objectives. As a representative of men who conducted themselves along these self-effacing lines, we remember the late William E. Tracy. This man was a key worker with the Hospital Building Committee and over a period of many years drove himself to keep hospital construction moving even to the point of neglecting his health and his business career. Obviously, he had lots of company or we would not have the hospital that is ours today.

Because of all these devoted people, Bristol has a hospital which ranks as one of the finest in our area. We are proud of it. We are grateful to all whose financial contributions over the past 50 years helped so very much. And we salute with humble respect those of today and yesterday who lighted the way.

[From the Bristol Press, May 8, 1969]

BARNES—FATHER AND SON—AT HELM OF BRISTOL HOSPITAL SOME 35 YEARS

Thirty years of unselfish endeavor on the part of one of Bristol's most renowned and respected men, the late Fuller F. Barnes, piloted Bristol Hospital's progress from a 21-bed facility to one of 156 beds during a tenure of president from 1921 until 1951. And now at the hospital's helm is his son, Carlyle F. Barnes, as the hospital's bed capacity becomes 275—regimes wherein first, the father, then his son, experienced periods that marked the medical center's major expansions.

Bristol Hospital's growth and the success enjoyed therewith can, in large measure, be attributed to the interest, labor and meaningful financial support provided by the Barnes family ever since the institution's beginning in the early twenties.

Fuller F. Barnes became second president of the hospital in July of 1921. Before the end of that year, a house which still stands at South and George Streets became Bristol Hospital's first location, the property having been made available by the Barnes family. Meanwhile, land was obtained for the hospital's permanent site as Mr. Barnes headed up a great amount of preliminary work of acquiring required space for the permanent site, acreage for which was obtained as gifts.

It was a busy first year for Fuller Barnes, aside from his responsibilities as an official of the world's major spring manufacturing company here. However, as later years revealed, that was only the beginning of a long and notable career of service to the hospital he wanted to be sure would adequately meet the needs of a growing population.

NEW HOSPITAL IN 1925

Under his capable direction as president, a successful fund-raising campaign was conducted in 1923. Close to a half-million dollars (a tidy sum for those times) was realized. Two years later the structure was completed, equipped and admitting patients.

Since the original of present buildings, off Newell and Brewster Roads, was opened in 1925, two of the three additions to the initial plant, as well as the nurses' home, came about during Fuller Barnes' years as the hospital's top officer. It was through his ingenuity, generosity and great guidance the hospital's service kept pace with the medical needs of a community's surging population from 1921 to 1951. As has often been said, Bristol points with pride to one of Connect-

icut's best hospitals because of the 30 years of unselfish endeavor of Fuller Barnes.

ANOTHER BARNES

Equipped with the same sense of civic pride and interest that was so profoundly manifested by his father, Carlyle F. Barnes is today deeply involved in hospital affairs, just as his Dad was years gone by. The hospital's usage has greatly expanded since the three decades of the elder Barnes fulfilled the presidency, a period which saw a total of 136,147 outpatients and inpatients combined.

Since becoming the hospital's fourth president in December of 1955, Carlyle Barnes' role has been an exceedingly active one. Throughout the past few years expansion of facilities mounting utilization of the hospital's various services, including all of the normal problems concerned therewith, have commanded endless hours of his time. For Carlyle Barnes, however, all has meant the building of a better Bristol, a better way of life.

The opening of Bristol Hospital's new addition is the sum result of thousands of dedicated civic-minded persons. Among them is the Barnes family, members of whom have made meeting hospital needs, and propelling hospital progress, a pleasant and satisfying service for a grateful community.

[From the Bristol Press, May 8, 1969]

PRESS PROMOTED HOSPITAL EFFORT IN 1923 DRIVE

Way back when the Bristol Press only cost 2 cents a special hospital edition appeared on May 12, 1923 to help promote the Bristol Hospital fund campaign then in progress. Two days later, a feature article was published and the headline read, "Fifty Official Newsboys Have Great Success In Selling Special Hospital Edition Of Press." This special sidebar campaign effort was arranged and directed by the late Arthur S. Barnes, the publisher of The Press.

This was the means of keeping in accord with the entire Hospital Fund Campaign then and the majority of funds collected were raised through this effort. The total proceeds (at the time of publication of the story—there were still some returns to come) of the selling of the special hospital edition resulted in a figure of \$1,289.18. Prior to that time only \$445 reached had been pledged to the drive citywide.

It was reported from the story in 1923 that "the unique and wholly novel corps of Official Newsboys—composed of 50 of the leading business, financial and manufacturing men and representative ladies of the city—was the biggest kind of success."

Participating as "Official Newsboys" were George F. Thomas, Arthur Fletcher, Stephen M. Wells, William S. Ingraham, John H. Sessions III, Albert L. Sessions, Frederick B. Scudder, Fuller F. Barnes, Alexander Harper, Frank S. Merrill, Edward Ingraham, Ray K. Linsley, Roger S. Newell, Elmer E. Stockton, Ray Linsley Jr., (who was then only a tot), Chas. T. Treadway, William J. Lloyd, Brown Joyce, Burton O. Barnard, Kay Finnemore, Chas. L. Wooding, Joseph F. Dutton, Dr. Arthur S. Brackett, Harry N. Law, Arthur S. Barnes, Rev. William B. West, Eugene Giammatteo, John H. Hayes, Frank B. Tibbitts, Roscoe L. Sessions, Dwight J. Minor, Robert J. Stack, Harry C. Barnes, Roy W. Bailey, Chas. N. Gordon, Townsend G. Treadway, George S. Beach, William H. Graham, Chas. C. Ball, Henry E. Cottle and Dominick Sinigalli.

Many interested incidents are reported from the demonstration of community interest in 1923. The highest price reported for a copy of the paper was \$20 and the lowest two cents, the price being whatever one wished to pay.

In one home a widow with six children was waiting for the paper and she gave a generous amount. At another residence a paper was left at the house of people who were away and on their return, a member of

the family hastened to send his money to the Press office. Those who were inadvertently overlooked did not like it and said so.

Everybody understood that all the proceeds without reduction of one cent for any expense went to the Hospital Fund and this enabled some who had not before contributed to do so and others who had given to increase their gifts.

Of this list the following Bristol residents are still living: Arthur Fletcher, John H. Sessions III, Edward Ingraham, Roscoe Sessions, Robert J. Stack, and Townsend G. Treadway. Ray Linsley, Jr., a professor at Stanford University, resides in Palo Alto, California, and the whereabouts of Kay Finnemore could not be ascertained by The Press.

PRESIDENT NIXON'S CONSUMER ADVISER SUPPORTS FAIR CREDIT REPORTING ACT

Mr. PROXIMIRE. Mr. President, on May 19 Mrs. Virginia H. Knauer, the Special Assistant to the President for Consumer Affairs testified in support of S. 823, the Fair Credit Reporting Act. This act would provide consumers with protection against arbitrary, erroneous or malicious credit reports. As her first appearance on Capitol Hill, Mrs. Knauer delivered a forthright and vigorous statement in support of consumer legislation.

In testifying in support of the bill, Mrs. Knauer offered several suggested changes which, in my opinion, would strengthen the bill and would provide the consumer with even more safeguards. In response to committee questions, Mrs. Knauer indicated that she was speaking not only for her office, but for the Nixon administration.

Mr. President, I think it is highly significant that on the first major piece of consumer legislation, the Nixon administration has come out solidly for the consumer. To be perfectly frank, some of us had feared that the present administration might reverse the previous proconsumer policies of the Johnson administration and adopt a harder attitude toward consumer legislation.

I am glad to report to the Senate that apparently this is not the case and that the present administration will continue the proconsumer policies of the past administration.

Mr. President, I ask unanimous consent to have printed in the RECORD the excellent statement given by Mrs. Knauer before my Subcommittee on Financial Institutions of the Banking and Currency Committee on the Fair Credit Reporting Act.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BY VIRGINIA H. KNAUER, SPECIAL ASSISTANT TO THE PRESIDENT FOR CONSUMER AFFAIRS, ACCOMPANIED BY BETTY BAY, ACTING DIRECTOR FOR LEGISLATIVE AFFAIRS AND ELIZABETH HANFORD, ASSOCIATE DIRECTOR FOR LEGISLATIVE AFFAIRS BEFORE THE SUBCOMMITTEE ON FINANCIAL INSTITUTIONS, SENATE BANKING AND CURRENCY COMMITTEE HEARINGS ON THE FAIR CREDIT REPORTING ACT—S. 823—WASHINGTON, D.C., MAY 19, 1969

Mr. Chairman and Members of the Committee: I am pleased that my first official appearance on the Hill is before the Subcommittee on Financial Institutions, a Committee which has a long record of interest and action in consumer affairs.

I am happy to have the opportunity to comment on S. 823, The Fair Credit Reporting Act. The general purposes of this bill are to assure the consumer protection against invasion of his privacy and to meet the needs of commerce for credit and other information in a manner which is fair and equitable to the individual.

Reports regarding individuals whose credit worthiness, character and general reputation have been damaged by inaccurate credit reports offer increasing cause for concern. Problems include confidentiality; inaccurate, biased, or malicious reporting; incomplete, irrelevant or obsolete information; and machine error which can be expected to occur as reporting systems are computerized.

The conditions which have prompted consideration of this bill result from the changing pattern of American life. Since World War II, consumer credit has become virtually the lifeblood of the national economy. Twenty-five years ago, consumer credit outstanding was 5.7 billion dollars. Today it is 110 billion. The use of credit has enabled the average American consumer to enjoy some of the comforts of life as well as the necessities—a home of his own, an education for his children, a vacation, an extra car and provision for an emergency. For the poor, credit is crucial.

The credit reporting agency is a vital link in the operation of our rapidly growing consumer credit industry. Obviously, the creditor must have the potential customer's credit history so that he can properly assess any risk which might be involved in extending credit. The consumer also benefits when he can obtain credit promptly without undue red tape.

In response to the credit explosion, a vast private information network has evolved. For example, it is reported that members of the Associated Credit Bureaus, Inc. issued more than 97 million credit reports in 1967 and that over 110 million individuals are listed in their files. When dealing with such vast numbers, the dangers of unwarranted invasion of individual privacy or erroneous reports are obvious. The potential power which the credit reporting agency has over an individual's life is formidable.

The person seeking credit often feels that his whole life history is either at the mercy of merciless computers or in the hands of people who hear only one side. Unfortunately, the credit reporting agency has become associated in the consumer's mind with ultra secrecy, electronic eavesdropping, almost a privately run spy network.

Too many consumers feel that information fed to credit reporting agencies is not always full information, and sometimes not even correct information. And the consumer thinks he has no way of correcting errors.

What I would like to see is the reporting of credit without unfair discredit.

I do not view the principles contained in S. 823 as an attempt to unreasonably curtail growth of the credit reporting industry or to burden it with arbitrary rules. What we are weighing here is a procedure which will be fair to both the industry and the individual consumer. In light of the present importance of credit to the individual and the projected trend for the future, I believe a reasoned review of present practices to assure adequate safeguards for the individual is healthy. In the long run, it should build consumer confidence in the whole credit industry.

With the millions of credit reports issued annually, even a small margin of error can involve hundreds of thousands of individuals. Despite increased industry efforts to ensure confidentiality, there is evidence that such is not always the case. The problem has been compounded by the difficulty which individuals have confronted in correcting credit reports.

The recent self-policing efforts of the Associated Credit Bureaus are commendable. I am concerned, however, that the industry guidelines do not go far enough, and I feel that enforcement under a voluntary code is extremely difficult. I am further concerned about the fact that credit reporting agencies which do not belong to the industry association are not subject to its standards.

I support S. 823 in principle, but would recommend consideration of several additional points.

I assume that the use of the word "individual" throughout the bill means the "individual consumer. If this is the intent, it should be clarified by adding Section 163(e) defining the term to mean an individual and not a business establishment.

Section 164(b) provides an important protection for the individual by ensuring that upon request, he must be given a reasonable opportunity to correct information obtained by the agency which may bear adversely upon his credit rating. I believe the consumer's protection will be materially strengthened, if upon request, the contents of his report are made known to him. This helps to alleviate an atmosphere of secrecy and enables the individual to state his position on any adverse material.

It seems reasonable that Section 164(b) should also provide that the consumer may submit an explanatory statement for inclusion in his credit record if he believes the agency's record contains inaccurate or incomplete information. Such a provision should apply to the entire contents of his file, not just information of public record as in Section 164(e).

When corrections are made in a credit report, I feel, in fairness to the consumer, that consideration should be given to sending a corrected copy to each person who previously received the erroneous report.

I am concerned that the language in Section 164(d) providing for the destruction of information after it has become obsolete or after the expiration of a reasonable period of time will be subject to varying interpretation of the word "reasonable," which could weaken its intended protection for the consumer. I suggest the consideration of specific limitations providing that a credit reporting agency shall not report information concerning transactions which occurred more than seven years prior to the date on which a credit report is given except for bankruptcies of all types which should be dropped from the individual's file 14 years after the date of adjudication of his most recent bankruptcy.

Section 166(2) specifies that punitive damages shall be no less than \$100 nor greater than \$1,000. I do not feel that the award of punitive damages should be qualified in such a manner. Where a person's reputation can be ruined or his character permanently maligned, punitive damages serve an extremely valuable purpose. I propose that the qualifying phrase "which shall be not less than \$100 nor greater than \$1,000" be omitted. The amount of punitive damages should be left entirely to the discretion of the court which hears the facts and circumstances of the particular case.

In closing, I would reiterate that what we seek is a procedure which would be fair and equitable to both the individual consumer and the credit reporting industry.

Thank you.

PESTICIDE PERIL—IX

Mr. NELSON, Mr. President, last week I placed in the RECORD a report by the Conservation Foundation which in part outlined the Federal and State Government regulations and enforcement of those regulations of pesticide controls.

The report stated that "the Federal Government's regulation of pesticides is done on a piecemeal, or individual product-use basis," and that although most States have their own tolerance levels for commodities sold intrastate, "there is no telling how much abuse or misuse of pesticides takes place."

An article written by Morton Mintz and published in Sunday's Washington Post, reported on testimony before the House Intergovernmental Relations Subcommittee which established that thallium, a rat and ant poison which presumably was taken off the market by the Agricultural Research Service 2½ years ago, is still being sold and has poisoned many children as well as its intended victims.

The hearings were called by Chairman L. H. FOUNTAIN to investigate further the "serious deficiencies" disclosed by the General Accounting Office about the enforcement by ARS of the insecticide, fungicide, and rodenticide law.

The hearings revealed some other startling and very disturbing disclosures. Although the law has permitted recalls of unsafe products since 1947, no procedures for recalls were approved until last week. When the ARS actually seized an unsafe product from a retail store, it has never attempted to find out where else the product was being sold. The first criminal prosecution in 13 years was filed this year by the ARS against a company in violation of the use of a hospital disinfectant. Thirteen years after the Food and Drug Administration and the Public Health Service requested ARS to ban lindane vaporizers, a device used in restaurants which emits insecticides 24 hours a day, ARS finally this year performed tests which showed that "practically all foods packaged and unpackaged, contained illegal residues of lindane."

I ask unanimous consent that the article written by Mr. Mintz be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 18, 1969]
RAT POISON FATAL TO TOTS IS STILL SOLD
(By Morton Mintz)

House investigators have established that thallium—which has poisoned children as well as its intended victims, rats and ants—was still being sold 2½ years after the Agricultural Research Service presumably had taken it off the market.

In addition, Harry W. Hays, director of pesticides regulation in the ARS, admitted that there is no way to label thallium products so that they can be effective against rats and ants but safe in a home with children. The reason is that the poison must be placed on floors and in other places reached by children as well as insects and rodents.

Disclosures such as these distressed the House Intergovernmental Relations subcommittee, which held a hearing last week to follow up "serious deficiencies" first disclosed by the General Accounting Office about enforcement by the ARS of the insecticide, fungicide and rodenticide law.

"Frightening" and "incredible," said subcommittee chairman L. H. Fountain (D-N.C.), Rep. Clarence J. Brown Jr. (R-Ohio) wondered, "Maybe we ought to try something else to govern us besides government."

The gist of the thallium story was that in 1960 the ARS acted to limit the use of thallium products—but 400 children were poisoned in 1962 and 1963. In 1965, the agency canceled the registration of thallium products, preventing further manufacture. But there was a scanty effort to retrieve supplies in marketing channels.

In January, 1968, ARS inspectors checked 22 stores in Washington and suburban Maryland and found thallium products in six. There was no testimony about whether such products are on store shelves today.

Other disclosures in the hearing, which produced evidence of significant recent reforms:

The law has permitted recalls of unsafe products since 1947—but procedures for recalls were not approved until last Monday. The first recall was in September, 1967.

When the ARS made a seizure of an unsafe product from a retail store, it never once checked manufacturers' records to find out where else the product was being sold.

Early this year, ARS instituted its first criminal prosecution in 13 years against a violator, Hysan Products Co. of Chicago, in connection with a hospital disinfectant.

In 1953, the Food and Drug Administration and the Public Health Service, reversing previous positions on the basis of new studies, urged the ARS to ban lindane vaporizers. Used mainly in restaurants, these devices emit an insecticide 24 hours a day. Not until last February did the ARS do a test under simulated restaurant conditions. The results showed that after five days, "practically all foods, packaged and unpackaged, contained illegal residues of lindane."

GROWERS PRESENT FARMWORKERS WITH A HOBSON'S CHOICE: A COMPANY UNION OR A POWERLESS UNION

Mr. MONDALE. Mr. President, Webster's dictionary defines a Hobson's choice as being "an apparent free choice with no real alternative."

It is just such a choice that many growers wish to present their farmworkers—a choice between a company union and a powerless union.

The realities of this "Hobson's choice" were made unmistakably clear at the recent hearings by Senator HARRISON A. WILLIAMS' Labor Subcommittee on S. 8, the legislation which would extend the National Labor Relations Act to the agriculture industry.

On the opening day, representatives of the United Farm Workers Organizing Committee, AFL-CIO-UFWOC—joined by representatives of other farm labor organizing efforts across the country, presented testimony that clearly indicated the need for legislation that will shift the balance of labor-management power in rural areas. Farmworkers, they pointed out, must have an opportunity to develop the strong institutions that have so long served as a bulwark of industrial democracy in other sectors of our economy. The National Farmers Union, the National Farmers Organization, and the National Grange have favored coverage of the agriculture industry under the NLRA.

The American Farm Bureau Federation president presented testimony in opposition to the enactment of S. 8, although nominally affirming the right to organize and bargain collectively. The Farm Bureau proposed alternative legislation.

Two aspects of the testimony reveal that many growers, while appearing to advocate a free choice to farmworkers, had in effect presented a Hobson's choice.

First, Mr. President, the Labor Subcommittee was presented documents, signed and sworn, that tell of the grower-formed, grower-dominated Agriculture Workers Freedom to Work Association—AWFWA. The documents exposing and confirming this most horrendous activity were official reports filed by officers of AWFWA pursuant to the section 203(b) of the Labor Management Reporting and Disclosure Act of 1959. Because of their importance and significance to all of my colleagues, I would like to have them inserted in the CONGRESSIONAL RECORD, along with some newspaper articles, at the conclusion of my remarks.

This so-called union organization was secretly provided expense money, office space, telephones, cars, and gasoline by growers in California. Money was funneled through an organization called Mexican-American Democrats for Republican Action, and it was used to finance nationwide speaking tours during which the organization efforts of Cesar Chavez and UFWOC were viciously attacked.

The important point is that growers were not offering farmworkers an opportunity to choose through democratic election procedures a genuine representative of farmworker interests, but instead they insisted on a company union that growers themselves organized and financed.

The second disturbing aspect of the testimony was that the determination of the growers to establish a grower dominated union for the farmworker has now been transferred to insuring that any union chosen by the workers is left powerless, and must exist on the terms and conditions of the growers.

Growers' testimony seemed to confirm their interest in guaranteeing a powerless union, for the subcommittee heard various grower representatives oppose coverage of the agriculture industry under the NLRA, although lipservice was paid to elections and collective bargaining.

Careful study of their specific legislative proposals sheds light on their true feelings. First, many growers would deny farmworkers the same economic weapons that are guaranteed to every other American worker by severely limiting the employees right to strike, and restraining not only the farmworkers but the entire labor movement from engaging in a primary product boycott.

Second, many growers insist on legislation that would deny both the employer and the union an opportunity to bargain over union security agreements.

Third, many growers would have their labor management relations mediated and supervised by partisan agents of the growers. The Farm Bureau, for example, has proposed that farmer and farmworker relationships should be governed by a separate statute, and not within the purview of the NLRB, an agency with an expertise in labor relations for all industries, including highly perishable agriculture packing sheds, processing op-

erations, and the like. Instead, they would place administration of labor-management relations in the Agriculture Department, which has a more abiding interest in agriculture production than labor relations, and the Federal district courts, which are already overcrowded.

Fourth, growers are demanding limited statutory coverage of farmworkers, some suggesting that only those workers on farms that hired the equivalent of eight or more full-time, year-round employees could participate in elections of a representative, and bargain collectively with their employers.

At one point, Mr. President, I hoped that growers would simply recognize the worth and dignity of the farmworker, and urge passage of S. 8. That bill would guarantee, at least in part, some of the protections and procedures to the agriculture industry, through orderly recognition procedures and good-faith collective bargaining, encouraged by the NLRA.

Unfortunately, however, the effort and energy of growers, as evidenced by the various proposals to avoid coverage of agricultural employees under the National Labor Relations Act, particularly when read in the light of the formation of a company union, and proposals for a powerless union, dims the prospect for humane advancement in the industry.

It is regrettable that growers who must rely on their workers to reap the harvest, can give in return only a Hobson's choice. The burden is squarely on the shoulders of the growers to demand a free choice in the greatest of democratic traditions for their employees and, if the growers insist on company unions, or powerless unions, then Congress must act to bring democracy to the farm.

Mr. President, I ask unanimous consent that the documents concerning the growers' formation of a company union be printed in the RECORD.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

AGRICULTURE WORKERS FREEDOM
TO WORK ASSOCIATION,
Delano, Calif., February 22, 1969.

SECRETARY OF LABOR,
Office of Labor Management and Welfare
Pension Reports, U.S. Department of Labor,
San Francisco, Calif.

DEAR SIR: The undersigned officers of AWFWA herewith submit an Agreement and Activities Report (Form LM-20) and a Receipt and Disbursements Report (Form LM-21) as required by Section 203(b) of the Labor Management Reporting and Disclosure Act of 1959.

The reports may be incomplete but they reflect all the information currently available to us. We are instituting action to recover financial records of AWFWA, if they still exist, and the reports will be amended to reflect any further information as it becomes available.

AWFWA was an outgrowth of an untitled group led by the growers which hired Jose Mendoza and Gilbert Rubio to persuade the workers that there was two sides to the union story, don't be afraid of Chavez, be united and we will protect and support you. The employees and members of the group were to try to get information on plans of UFWOC. This group and others became AWFWA which was incorporated by Jose

Mendoza, Gilbert Rubio and Shirley Fetalvero in July 1968. The three incorporators became the directors of AFWFA. The first public actions of the new organizations were counter-picketing of the United Farm Workers Organizing Committee, AFL-CIO, pickets at the homes of Giumarra foremen, crew bosses at McFarland and Earlimart, California in May of 1968, also at public picnic attended by 1,500 people was held at Delano Park on June 16, 1968.

Until recently AFWFA never had a meeting of the Board of Directors or an election of officers. Jose Mendoza called himself General-Secretary and sometimes Gilbert Rubio was identified as chairman. Mendoza acted as the chief-executive of AFWFA. Mendoza was advised by Mr. Basoco of the Department of Labor that a consultant was required if AFWFA had an agreement with employers connected with the grape labor dispute and boycott. Mendoza denied any agreement existed or that AFWFA was being supported by the growers.

So far as we know all of AFWFA's records were maintained by first Fernando Marquez, then by Jose Mendoza and then turned over to Donald Garaniga. We are making efforts to recover these records.

In late 1968, Jose Mendoza left Bakersfield on several trips, on his return he contacted Shirley Fetalvero and Gilbert Rubio wanting them to agree to dissolve AFWFA so it would be legally out of existence. We, with advice from Cornelio Marcias, refused to sign to dissolve the corporation. Mendoza advised he was no longer associated with AFWFA and Cornelio Marcias could be a Director in his place. He threatened to send the Department of Labor after us. In October or November 1968, Shirley Fetalvero and Gilbert Rubio informally met as a Board of Directors and elected Cornelio Marcias as Director of AFWFA.

We have been interviewed by Robert H. Holland of the San Francisco office of the office of Labor Management and Welfare Pension Reports, US Department of Labor. Mr. Holland advised us that AFWFA was covered by the filing requirements of Section 203(b) of the Labor Management Reporting & Disclosure Act of 1959 and had been delinquent in filing an Agreement and Activities Report (LM-20) since July 3, 1968 or earlier. He also advised us that a Receipts and Disbursements Report covering the fiscal year ending December 31, 1968, was due by March 31, 1969.

On February 22, 1969 Shirley Fetalvero and Gilbert Rubio held an emergency meeting of the Board of Directors of AFWFA. Cornelio Marcias could not be contacted. Gilbert Rubio was elected president and Shirley Fetalvero was elected secretary-treasurer for the purpose of 1.) submitting the required reports to the Secretary of Labor, 2.) obtaining records of AFWFA to complete this filing and other filings which may be required and 3.) to make plans as appropriate to dissolve AFWFA or to decide on future activities.

In line with the preceding the attached reports are forwarded. This letter should be considered an integral part of the filing.

GILBERT RUBIO,
President.
SHIRLEY FETALVERO,
Secretary-Treasurer.

A.—PERSON FILING

1. Name and mailing address (include ZIP code): AFWFA, aka; Agricultural Workers Freedom to Work Association, % (see attached sheet).

2. Any other address where records necessary to verify this report are kept: Donald Gazzaniga, PRI, 6408 Sally Avenue, Bakersfield, Calif.

3. Date fiscal year ends: Dec. 31, 1968.

4. Type of person:

(a) ☐ INDIVIDUAL.

(b) ☐ PARTNERSHIP.

(c) ☒ CORPORATION.

(d) ☐ OTHER (Specify):

B.—NATURE OF AGREEMENT OR ARRANGEMENT

5. Full name and address of employer with whom made (include ZIP code): (See attached sheet).

6. Date entered into: On or about May, 1968.

7. Names of persons through whom made: Same as above.

8. Check the appropriate box to indicate whether an object of the activities undertaken, is directly or indirectly:

a. ☒ To persuade employees to exercise or not to exercise, or persuade employees as to the manner of exercising, the right to organize and bargain collectively through representatives of their own choosing.

b. ☒ To supply an employer with information concerning the activities of employees or a labor organization in connection with a labor dispute involving such employer, except information for use solely in conjunction with an administrative or arbitral proceeding or a criminal or civil judicial proceeding.

9. Terms and conditions (Explain in detail; see Part B-9 of instructions): (See attached sheet).

C.—SPECIFIC ACTIVITIES TO BE PERFORMED

10. For each activity, separately list in detail the information required (see Part C-10 of instructions):

a. Nature of activity: (see attached sheet).

b. Period during which performed: (see attached sheet).

c. Extent performed: (See attached sheet).

d. Names and addresses of persons through whom performed: (See attached sheet).

11. Identify (a) Subject employees, groups of employees, and (b) labor organizations. (See attached sheet).

D.—VERIFICATION AND SIGNATURE. The person in item 1 above and each of his undersigned authorized officers declares, under penalty of law, that all information in this report, including all attachments incorporated therein or referred in this report, has been examined by him and is, to the best of his knowledge and belief, true, correct, and complete.

Signed: Gilbert Rubio, President, at Delano, Calif., on February 22, 1969. (If other title, cross out and write in correct title above.)

Signed: Shirley Fetalvero, Treasurer, at Delano, Calif., on February 22, 1969. (If other title, cross out and write in correct title above.)

No. 8 (a) Jose Mendoza; a. unknown; b. unknown; c. unknown.

Gilbert Rubio; a. unknown; b. unknown; c. unknown.

Aurelio Rios; a. unknown; b. unknown; c. unknown.

No. 9-14: Unknown.

No. 15: These are disbursements currently available to us. Additional information will be furnished when available.

M.A.D.R.A. withdrawals, June 28, 1968—\$700.35 for Cashiers check to PRI endorsed Donald A. Gazzaniga for return to AFWFA. June 28, 1968, Wonderly Electronics \$84.08 for tape recorder.

June 28, 1968, Roundtree Camera \$103.00 for camera and supplies \$58.70, check No. 103.

Check No. 104, July 2, 1968, County of Kern—\$100.00—Reservation for Hart Park.

Check No. 108, Radio Station KWAC \$640, July 16, 1968 Radio advertising AFWFA.

Check No. 105, \$477.07 Davenport's July 2, 1968 Copying machine.

Check No. 106, July 10, 1968, Smith Radio Service \$50.00 Public Address Service.

Check No. 107, July 10, 1968, Jose Mendoza \$300.00 cash endorsed by Jose Mendoza.

Check No. 109, July 9, 1968, A. B. Dick Co., \$168.99 for mimeograph and supplies.

Check No. 110, July 19, 1968, Delano Ambulance—Service Ambulance for Gilbert Rubio for \$37.00.

Check No. 111, July 19, 1968, \$20, Mrs. Rubio, repair for Gilbert Rubio's car.

Check No. 112, July 19, 1968, Golden West Telephone Company, \$79.86 for payment of Jose Mendoza's telephone bill.

Check No. 113, \$300.50 to Bank of America.

A.W.F.W.A. CHECKS

Check No. 117, September 9, 1968, Gilbert Rubio, expenses, \$21.00.

Check No. 119, September 17, 1968, Pacific Telephone Co., \$119.00.

Check No. 116, September 10, 1968, Kern County Patrol, \$30.00, Bodyguard for Mendoza.

Check No. 120, October 14, 1968, Merchants Printers, \$78.59.

Check No. 121, October 14, 1968, Golden West Telephone Co., \$337.71.

Disbursements were made by PRI for AFWFA for salary and expenses of Mendoza, Rubio and Rios.

Telephone bills of Shirley Fetalvero and Gilbert Rubio of over \$500 were paid in cash by Wanda Hillary and Jose Mendoza.

1. Shirley Fetalvero, 117 W. 15th Avenue, Delano, Calif.

5. John Giumarra, Jr., John Giumarra, Sr., Joseph Giumarra operating in whole or in part as Giumarra Vineyards Corp., Giumarra Farms, Inc. and Giumarra Bros. Fruit Co., Edison Highway, Bakersfield, Calif.

Jack Pandol, Rt. 2, Box 388, Delano, Calif. Pandol & Sons, Rt. 2, Box 388, Delano, Calif.

Robert Sabovich, Melvin Sabovich, Sabovich Bros., P.O. Box 577, Lamont, Calif.

Eugene Nalbandian, Eugene Nalbandian Inc., P.O. Box 665, Lamont, Calif.

John J. Kovacevich, P.O. Bin 488, Arvin, Calif.

William Mosesian, Lamont, Calif.

9. During early 1968, the United Farm Workers Organizing Committee, AFL-CIO, UFWOC, was engaged in a labor dispute with several table grape growers in around Kern and Tulare Counties in California, including the Giumarra Vineyards Corporation, Highway #58, Edison, California, and Pandol & Sons, Rt. 2, Box 388, Delano, California. In May, 1968, a meeting was held at Sambo's Restaurant on Union Street in Bakersfield attended by John Giumarra, Sr., John Giumarra, Jr., Treasurer and General Counsel respectively of Giumarra Vineyards Corporation, Teresa Arrambide, a labor foreman for Giumarra, Paul Marrufo, head foreman for Sabovich Bros., grape growers, Vine & DiGiorgio Roads, Lamont, California, Louis Barazza, a former associate of Cesar Chavez, Robert Flores, personnel manager of Di Giorgio Fruit Corporation, Jess Marquez, who runs a camp for DiGiorgio, Fernando Marquez, brother of Jess, an accountant with an office in Lamont, Jack Pandol of Pandol & Sons, Gilbert Rubio, Jose Mendoza, and others.

This meeting was to outline activities of AFWFA. We were to tell workers not to be afraid of Chavez to be united and we as an organization would support and protect workers; we were to oppose UFWOC efforts to organize and boycott. This meeting and other meetings decided AFWFA would also try to enlist workers and obtain information on UFWOC's plans and activities. The meeting decided to get funds from the growers and hire Mendoza and Rubio at \$120.00 a week to start opposing Chavez. AFWFA started counter-picketing UFWOC pickets at the homes of Giumarra's foremen in McFarland and Earlimart. The Giumarras furnished office space for Mendoza and Rubio in the conference room at the Edison Highway headquarters with typewriter and other office supplies.

Arrangements were made to pay Mendoza and Rubio and then Aurelio Rios through Fernando Marquez first through MADRA then through an AFWFA bank account. Several meetings involving many persons were held but only John Giumarra, Jr., Rob-

ert Sabovich, and Jack Pandol gave orders to Mendoza and AFWFA.

10. (A) AFWFA WAS TO:

(a) Counter-picket and try to drown out UFWOC pickets wherever they picketed any grape grower or they picketed any grape grower or their employees, using sound trucks, jeers, etc.

(b) Hold picnics for mass of agricultural workers giving free food, beer, and music and raffles to get them to listen to speeches against Chavez and UFWOC.

(c) Enlist the aid of all growers and their foremen in enrolling workers into AFWFA without cost with the idea that we would represent them.

(d) Try to settle grievances or disputes between farm workers and the grape growers.

(e) Picket advertisers of Catholic Register which supported Chavez and UFWOC until John Guimarra, Jr. told us to stop.

(f) Appear on radio, TV and the news with propaganda against Chavez and UFWOC.

(g) Opposed Teamsters-UFWOC boycott of Coors beer by counterpicketing.

(h) Try to get information on all UFWOC planned activities to take action to halt or disrupt them (Sanger picnic, labor day parade).

(i) To keep track of all people associated with and helping UFWOC using friends, papers, and taking pictures of people in and around UFWOC headquarters.

(j) To put out mimeographed notices, flyers, message and reports on flyers to be widely distributed to the workers and the public in Spanish and English. Obtain bumper stickers attacking the boycott and UFWOC.

(k) Counter picket stores selling New York products after New York City boycotted the table grapes, including picketing of Sachs 5th Avenue in Los Angeles.

(l) Picket news media and TV stations in Los Angeles who were giving biased coverage for Chavez and UFWOC.

(m) To use all of the above methods to get headlines, newspaper and TV coverage with statement of farm workers are not on strike and boycott is just another trick to force the Union on the workers.

10. (B) These activities were performed between May and October 1968.

10. (C) All activities were performed to the extent possible.

10. (D) All activities were carried out under the name of AFWFA or MADRA (Mexican-American Democrats for Republican Action) by the following people:

(1) Jose Mendoza, 2421 I Street, Bakersfield.

(2) Gilbert Rubio, 217 Cliff Street, McFarland.

(3) Shirley Fetalvero, 177 W. 15th Avenue, Delano.

(4) Mary Matt, 371 Oleander Drive, Bakersfield.

(5) Wanda Hillary, Baker Street, Bakersfield.

(6) Donald Gazzaniga, Sally Drive, Bakersfield.

(7) Robert Flores, DiGiorgio Fruit Corporation, Lamont.

(8) Jess Marquez, DiGiorgio Fruit Corporation, Lamont.

(9) Fernando Marquez, 4212 Alexander, Bakersfield.

(10) Cornello Macias, Newark Rod., Sanger.

(11) Teresa Arramblide, Moffet St., Wasco.

(12) Louis Baraza.

(13) Aurelio Rios, Dover Street, Delano.

(14) Paul Maruffo.

(15) Helen Murillo, 7616 Delight Avenue, Lamont.

(16) Anna Mariano, 822 Kensington, Delano.

(17) John Guimarra, Jr., Edison Headquarters, Edison, Ca.

(18) Robert Sabovich, P.O. Box 577, Lamont.

(19) Melvin Sabovich, P.O. Box 577, Lamont.

(20) Eugene Nalbandian, P.O. Box 665, Lamont.

(21) William Mosesian, Lamont, California.

(22) John Kovacevich, P.O. Bin 488, Arvin.

(23) Sabovich Bros, P.O. Box 577, Lamont.

(24) Jack Pandol, Rt. 2, Box 388, Delano.

Many people were interested to picket and to come to picnics, etc.

11. Employees of all table grape growers in Kern, Tulare, and Fresno Counties of California, including field workers, both members and non-members of UFWOC, AFL-CIO and unorganized employees in the sheds. We were supposed to be active in the Coachella Valley but we never went.

A.—PERSON FILING

1. Name and address (include ZIP code): AFWFA, aka, Agriculture Workers Freedom To Work Association, c/o Shirley Fetalvero, 117 W. 15th Ave., Delano, Calif.

2. Any other address where records necessary to verify this report are kept: Donald Gazzaniga, Public Research Institute, 6408 Sally Ave., Bakersfield, Calif.

3. File No.

4. Period covered by this report. From: To: _____

B. Statement of receipts: Report all receipts from employers in connection with labor relations advice or services regardless of the purposes of the advice or services.

5. Name and address of employer (include ZIP code): This information is given to the best of our knowledge at this time. As more information becomes available we will submit it. See attached sheet for numbers 5, 6 and 7.

6. Termination date.

7. Amount.

C. Statement of disbursements. Report all

disbursements made by the reporting organization in connection with labor relations advice or services rendered to the employers listed in Part B.

8. Disbursements to officers and employees: See attached sheet.

9. Office and administrative expenses.

10. Publicity.

11. Fees for professional services, No. 9 through 14.

12. Loans made, see attached sheet.

13. Other disbursements.

14. Total disbursements (sum of items 8-13).

D. Schedule for statement of disbursements. Use this Schedule to report only disbursements made for the purposes described in part D of the instructions.

15. Employer: See attached sheet.

16. To whom paid.

17. Amount.

18. Purpose.

¹ Sept. 10, 1968.

Note: Account closed out Oct. 25, 1968.

1. Zellerbach Paper Company contributed a check for \$200.00 to Farm Workers' Rally which was not deposited in the above bank accounts.

2. Jack Pandol lent AFWFA his 1968 Chevy pick-up for two months for AFWFA use.

3. Bob Sabovich gave AFWFA a 1958 Chevy station wagon for AFWFA use.

4. DiGiorgio furnished mimeograph machines and supplies to print AFWFA flyers on DiGiorgio property.

5. The Giumarra Vineyards Corporation, Edison Highway No. 84, Bakersfield, California, through John Giumarra, Sr., and John Giumarra, Jr., paid the following:

(1) A salary in an unknown amount for Jose Mendoza.

(2) Two \$50 "loans" to Gilbert Rubio and one \$50 "loan" to Aurelio Rios totaling \$150.

The Giumarras also allowed use of conference room at Giumarra headquarters with telephone, typewriter, and office supplies.

6. They also allowed free access to the yard gas pump to obtain gas for vehicles for AFWFA business. They provided repair of automobiles in the corporate garage.

7. Fernando Marquez furnished expense money in cash and checks to Mendoza, Rubio, and Rios.

8. Don Gazzaniga paid salary to Mendoza, Rubio, and Rios through the Public Research Institute (PRI) with the cover that they were researchers for PRI. Information and pictures obtained by AFWFA were used for PRI.

[From the Los Angeles Times, Mar. 4, 1969]

RIVAL TO CHAVEZ: GROWERS HIT AS ORGANIZERS OF NEW UNION

(By Harry Bernstein)

A group of California growers, aided by members of the John Birch Society, helped create an organization of workers set up as a rival to Cesar Chavez AFL-CIO United Farm Workers Organizing Committee, it was charged Monday.

California state law prohibits employer sponsorship of unions or associations which are ostensibly formed to represent workers.

Monday's accusation followed disclosure of a bitter fight among leaders of the Agriculture Workers Freedom to Work Assn. (AWFWA).

Two officers of AWFWA reported to the Labor Department in Washington that the organization was founded by growers, not workers, as a counteraction to AFL-CIO efforts to unionize farm workers, and to boycott grape growers who have refused to hold union representation elections.

Jerry Cohen, attorney for Chavez' AFL-CIO union, said court action will be filed this week in Bakersfield against the John Birch Society, the Right to Work Committee and a group of growers on grounds that they all conspired to illegally help form the rival AFWFA.

AIDE DENOUNCED BOYCOTT

Jose Mendoza, general secretary of the AFWFA, recently made a nationwide tour to denounce Chavez and the grape boycott. He charged repeatedly that Chavez had no support among farm workers.

Mendoza, 37, was honored at a banquet of the National Right to Work Committee in

Washington, D.C., and was presented with an award by Sen. Everett Dirksen (R-Ill.) on behalf of the committee for his efforts to help farm workers.

Mendoza, of Bakersfield, officially was getting financial help from the National Right to Work Committee for his nationwide tour.

A week ago, however, Gilbert Rubio, listed as president of the AFWFA, and Shirley Fetalvero, secretary-treasurer of the organization, filed a report with the Labor Department's Office of Labor Management Reports to comply with the federal Landrum-Griffin Act of 1959.

LISTS ORGANIZATION DATE

That document contended AFWFA was first conceived in May, 1968, at a meeting in a Bakersfield restaurant attended by Mendoza, Rubio and a group of about 10 key grape growers.

Rubio and Miss Fetalvero said in a sworn statement to the Labor Department that those attending the session included John Giumarra Sr., and John Giumarra Jr., treasurer and general counsel respectively of Giumarra Vineyards, the prime target of the AFL-CIO strike-boycott.

Others at the meeting included Jack Pandol, another grower, and representatives of the Di Giorgio Corp., which is one of the few companies under contract to the Chavez farm workers' union.

The meeting was called to "outline activities of AFWFA," Rubio and Miss Fetalvero said, adding:

"We were to tell workers not to be afraid of Chavez, to be united, and we would support and protect workers and oppose (AFL-CIO) efforts to organize and boycott."

He and Mendoza were offered \$120 a week to start opposing Chavez, Rubio said, but that money, along with other sums, was paid to AFWFA through another organization to be called MADRA, the Mexican-American Democrats for Republican Action.

Records of the operation were kept by a "one-man public relations operation," said the union attorney, referring to Donald Gazzaniga, head of Public Research Institute, which is itself a part of a firm known as California Editors Publishing Co.

Gazzaniga recently published a booklet, "California's Number One Industry Under Attack," defending grape growers' opposition to unionization of their workers.

PAID SALARIES

It was distributed by the National Right to Work Committee.

Gazzaniga paid the salaries to Mendoza and Rubio under the cover that they were researchers for (his publication)," Rubio said.

The document filed with the Labor Department then listed dozens of checks ranging up to \$500 which were allegedly used by AFWFA after they came through the Mexican-American Democrats for Republican Action.

John Giumarra Jr., reached by phone in Rochester, N.Y. where he was making a speech, said "the allegations that we gave money to Mendoza are not true and we will fight it in court."

He said Rubio had once supported the union, then joined AFWFA to fight the union,

"and now seems to have switched again. None of their legal actions have been upheld in court, and this will not either."

[From the San Francisco Chronicle, Mar. 4, 1969]

FEDERAL REPORT: BIG GROWERS' SECRET ANTI-UNION ORGANIZATION

(By Dick Melster)

Government reports disclosed here yesterday that some of the State's largest growers secretly operated what they disguised as a workers' organization to try to undermine California's farm union organizers.

The organization—still in existence, but virtually inoperable since the Government demanded the reports that disclosed its true nature—is called the Agricultural Workers Freedom to Work Association (AWFWA).

Since last July, the association's general secretary, Jose Mendoza, has spoken at legislative hearings and elsewhere saying he represented a large group of farm workers who are opposed to unionization.

Mendoza, who recently left the association to carry on similar activities with the "Right to Work Committee," repeatedly denied the association had anything to do with growers.

But Gilbert Rubio, the president of the association, and Shirley Fetalvero, the secretary-treasurer, described it far differently in the Government reports.

The reports, required of labor and management groups under the Landrum-Griffin Act, finally were submitted at least eight months late—to the Office of Labor Management and Welfare Pension Reports here on February 22.

HIRED

They said the association "was an outgrowth of an untitled group led by the growers which hired Jose Mendoza and Gilbert Rubio" and made them the chief officers of the association.

It got started, they said, at a meeting in Bakersfield last May, attended by Rubio, Mendoza and the owners and managers of several of the area's larger vineyards.

Among those present, said the reports, were growers John Giumarra Jr., John Giumarra Sr. and Jack Pandol; Robert Flores, personnel manager of the DiGiorgio Fruit Corporation, and a foreman, Paul Marrufo, for the Sabovich Bros. vineyard.

AGAINST

The reports said the meeting was called to outline the association's activities against the United Farm Workers Organizing Committee (UFWOC) and its efforts, under Cesar Chavez, to organize vineyard workers.

"Several meetings involving many persons were held," said the reports, "but only John Giumarra Jr., Robert Sabovich and Jack Pandol gave orders to Mendoza and AFWFA."

Among other things, the orders told the association to carry out in the name of farm workers, such acts as:

"Halt counter-picket and try to drown out UFWOC pickets . . . get information on all UFWOC planned activities to take action to halt or disrupt them."

"To keep track of all people associated with the helping UFWOC, using friends, papers and taking pictures of people in and around UFWOC headquarters."

"Picket advertisers of Catholic Register, which supported Chavez and UFWOC until John Giumarra Jr. told us to stop."

"Hold picnics for mass of agricultural workers giving free food, beer and music and raffles to get them to listen to speeches against Chavez and UFWOC."

The reports said the aim was "to get headlines" and TV coverage for statements that the organizing committee's strike against the growers, and its related grape boycott, were designed to force unions on the workers.

[From the Fresno Bee, Mar. 3, 1969]
ANTI-UFWOC GROUP IS CALLED RIGHT-WING UNIT

LOS ANGELES.—The formation and subsequent activities of the Agricultural Workers Freedom To Work Association (AWFWA) today were linked to southern San Joaquin Valley growers and the "right wing."

The tie-up is reported in a letter from officers of AWFWA to the U.S. Department of Labor and verbally by a member of the association who declined to be identified.

United Farm Workers Organizing Committee attorney Jerry Cohen scheduled a press conference here today to release the AWFWA letter. Cohen claims AWFWA was established deliberately as a "company union" to further what he calls the growers' anti-labor aims.

Cohen said that later this week he will amend an UFWOC suit against the AWFWA which accuses the latter of being a company union. He said the amendment will contain a long list of names of growers who contributed financially to the AWFWA.

While the AWFWA report to the Labor Department, filed in compliance with Labor Department regulations, is the key to Cohen's presentation, his allegations are supported by an independent check with a member of the AWFWA. This AWFWA member said the organization was founded "on the labor issue, but within a month we found we were part of the red guard and the main issue was the right to work."

This member said the AWFWA was started to give farm workers a voice in the battle between the UFWOC and the growers. The member then said: "But we found that we were fair game for anybody. We thought AWFWA was our organization, then we found we were a front."

Cohen, in an interview before the press conference said he plans to show that some Giumarra Rahch officials helped form the AWFWA and provided office space, telephones and gasoline for cars.

Cohen said that an organization called Mexican-American Democrats for Republican Action was used to funnel money to AWFWA.

The money the lawyer asserted was used to finance AWFWA rallies, picket lines and to pay for AWFWA Director Jose Mendoza's speaking trips. Later, the continued Californians For Right To Work, an organization which has as one of its five directors Jack Pandol, a Delano grower, began to finance Mendoza's speaking tours.

It is Cohen's contention the AWFWA was formed by growers and that Mendoza was hired at \$120 a week to direct the operations.

Mendoza has since withdrawn from AWFWA and now is traveling widely and talking, as a grape worker, in the right-to-work cause.

Cohen said right-wingers, including the John Birch Society, have been involved in anti-UFWOC and anti-Chavez work. He said that in Cleveland a dial-a-number telephone provides a recorded voice that claims Sirhan was a member of the UFWOC.

The unidentified member of AWFWA also said right-winger influence has moved in and dominated the AWFWA's actions. By California Law, according to Cohen prohibits a company union that is formed by and financed by a company in opposition to union activity.

PESTICIDE CONCERN

Mr. NELSON, Mr. President, I ask unanimous consent that a letter I wrote recently to Secretary of Health, Education, and Welfare Robert Finch regarding pesticides, evidence, and investigations on pesticides and his response be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

APRIL 22, 1969.

HON. ROBERT H. FINCH,
 Secretary, Department of Health, Education,
 and Welfare, Washington, D.C.

DEAR MR. SECRETARY: I commend and support your action yesterday to appoint a Secretary's Commission on Pesticides and their Relationship to Environmental Health and your decision to establish an interim guideline for Food and Drug Administration action on fish with high concentrations of pesticide residues.

Although legislation which would take a similar commission approach with regard to pesticides is now pending before Congress, your administrative action using your authority to create a Secretary's commission is certainly appropriate, especially in view of the urgent need to set tolerance levels for pesticides in fish which will assure protection of human health and provide guidelines for industries and recreational programs which depend in large part on a healthy Great Lakes fishery.

Your commission also represents an important step forward in urgently needed efforts to expand our knowledge and understanding of the increasing pesticide concentrations in our national and worldwide environment and the dangers this presents to fish and wildlife and to humans.

The findings of the commission should be significant not only for possible actions that could be taken by the U.S. Department of Agriculture to improve regulation of pesticide use, but also for future actions which could be taken by the Food and Drug Administration with regard to health protection, and also by the U.S. Department of Interior to deal with the effects of persistent, toxic pesticides as a pollutant.

Let me also commend you on the broad-ranging representation of the commission membership. The resources of not only our health scientists, but of our ecologists, our fish and wildlife biologists, and others must be brought to bear on this problem.

I should point out that I sincerely hope that the commission will be able to proceed in an entirely objective manner in arriving at recommendations for action. Its chairman, Dr. Emil Mrak, testified in 1963 before a Senate subcommittee holding hearings on coordination of federal pesticide regulatory activities that he supported the position that "no evidence is presently available that there is danger of anyone being poisoned by pesticide residues in food." He added, "Now, if there is information in this field to support the use of short-lived chemicals in place of persistent ones, we do not have it."

Further, Dr. Mrak took issue with a President's Scientific Advisory Committee report of that year which stated that "... although they (pesticides) remain in small quantities, their variety, toxicity, and persistence are affecting biological systems in nature and may eventually affect human health." Dr. Mrak said, "This statement is contrary to the present body of scientific knowledge available to our people."

In view of these conclusive statements by Dr. Mrak in 1963 on pesticides and their effects, I believe it would be reassuring to hear from Dr. Mrak that he does in fact approach this very critical task now without having any prejudgment which could influence the outcome of the commission's recommendations.

Let me also suggest that if significant new information on the pesticide problem develops in or out of government during the six months interim before the commission makes its recommendations, such information be brought to the public attention as quickly as possible, and acted on.

As an instance, the National Cancer Institute contracted in 1963 with the Bionetics Research Laboratories of Falls Church, Va., and Bethesda, Md., for a study of the important question of whether there are cancer-causing effects in some widely used pesticides, herbicides, and related chemical compounds.

Apparently, this study has been on the verge of release for some time, as evidenced by the fact that a summary of its early data was prepared for presentation at the annual meeting of the Society of Toxicology in Williamsburg, Va., last month, then withdrawn.

A finding of cancer-causing effects in any compound which is present in our food products would be cause for grave concern and immediate action to limit as far as is reasonably possible the presence of such a compound in our food. I understand that such action has been taken with regard to one herbicide, aminotriazole, because it was found to cause cancer.

In view of the pressing questions now before us on the effects of persistent, toxic pesticides and other chemicals in everyday use, I believe the highest priority must be given to completing and publishing not only the Bionetics study, but to completion of any other studies which may now be under way in federal public health agencies to determine other possible pesticide effects.

Finally, in view of the recent FDA seizure of frozen Coho Salmon from Lake Michigan because of high pesticide residue concentrations in the fish, I believe the immediate establishment of an interim pesticide tolerance level for fish is necessary, and I support your action establishing such guidelines. Clearly, there is enough evidence to cause serious concern for the implications of high pesticide concentrations for human health, and for further FDA action if necessary.

Legal tolerance levels have long been established by the FDA for a wide range of food products, including meat, poultry, vegetables, milk, and fruit. In addition, the World Health Organization, after intensive health studies, has established an acceptable daily allowance for human intake of DDT. I understand that by itself, a one quarter pound serving of Coho Salmon with DDT residues throughout the edible portion of the fish of 19 parts per million concentration would exceed that acceptable daily intake by more than three times, in the average-sized man.

The recent DDT ban in Michigan, and the two year ban in Sweden, only add further to the rapidly building evidence that there is need to take swift action to adequately regulate and limit the use of persistent, toxic pesticides.

I appreciate and commend your concern in this important matter.

Sincerely yours,

GAYLORD NELSON,
 U.S. Senator.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
 Washington, D.C., May 13, 1969.

HON. GAYLORD NELSON,
 U.S. Senate,
 Washington, D.C.

DEAR SENATOR NELSON: Thank you very much for your letter of April 22 supporting my plans for a Commission on Pesticides and their Relationship to Environmental Health and the establishment of interim guidelines on the limits of pesticides allowable in fish.

In the course of discussions leading to establishment of the Commission, I have explored its role and mission extensively with Dr. Mrak. Let me speak for both of us and assure you that the chairman plans to conduct the business of the Commission scientifically and objectively. At the time of the hearings six years ago, Dr. Mrak's state-

ment reflected his personal evaluation of the scientific evidence then available. One of the primary concerns of the new commission will be to bring together a number of different scientific specialists to review and weigh all evidence collected to date before reaching their conclusions. I am sure that Dr. Mrak and his colleagues have not prejudged these critical issues.

It has long been the policy of this Department, as you know, to publish fully and freely the results of the research and studies we support. Before such publication, however, we have the responsibility to assure that the conclusions reached are scientifically valid and that the analysis is complete and will not mislead the scientific community or the public. The paper you noted, on the work done by Bionetics Research Laboratories, was withdrawn from presentation last fall because analysis of the preliminary report by scientists of the National Cancer Institute and other agencies led us to believe that further review and reduction of the complex data was necessary to verify the conclusions with any degree of certainty. This review is being given high priority so that the results can be examined by experts and published in full detail as soon as possible. This Department will continue to collaborate with the Department of Agriculture and other appropriate agencies to bring pertinent information to the public attention quickly and to initiate regulatory measures promptly whenever they may be indicated.

As noted in your letter an interim pesticide tolerance level for fish was established on April 23. I am enclosing our press release on this subject. I would note that, while the DDT residue in the Coho salmon of 19 parts per million could result in DDT intake exceeding the maximum acceptable daily intake, tolerance levels are prescribed assuming continuous intake over an entire life time. There is no evidence that occasional ingestion of this amount of DDT causes any damage to humans. These were factors involved in the seizure of Coho salmon and in promulgation of the interim tolerance level of DDT in fish.

I appreciate your continuing interest and support in this vital program.

Sincerely,

ROBERT H. FINCH,
Secretary.

PRESS RELEASE OF U.S. DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE, APRIL 22,
1969

Residues of DDT (including derivatives) in fish shipped in interstate commerce will be limited to 5 parts per million (ppm) under an interim guideline announced today by the Food and Drug Administration.

The interim limit has been established primarily because of high residues of DDT and its derivatives found in coho salmon from Lake Michigan.

"This guideline is intended to protect the public from excessive levels of DDT in fish while a full scientific review is completed," Food and Drug Commissioner Herbert L. Ley, Jr., M.D., explained. "It also gives the fishing industry a specific standard. Fish carrying residues higher than 5 ppm will be subject to seizure."

The FDA has asked the National Academy of Sciences-National Research Council to nominate a panel of experts to carry out the review of DDT residues in fish. The 5 ppm interim limit may be changed as the result of that study, Dr. Ley said.

There is now no formal tolerance for DDT in fish. Residues of the pesticide were not considered significant in fish until recently because the levels were generally low.

In the case of Lake Michigan coho salmon,

however, concentrations of DDT have increased markedly since the species was first stocked in the lake in 1966. Since March 28, 1969, the FDA has initiated the seizure of more than 34,000 pounds of frozen coho salmon shipped from Michigan to Wisconsin and Minnesota. Residues of DDT and its derivatives in these fish ranged from 13 to 19 ppm.

The interim limit of 5 ppm for DDT residues will apply to all fish marketed interstate. Pesticide monitoring by FDA, however, indicates that DDT residues are below 1 ppm in 90 percent of the fish marketed in this country.

Tolerances for DDT residues in other foods vary from product to product. The tolerance is .05 ppm for milk and 7 ppm for a wide variety of fruits and vegetables and in the fat of meat. FDA has taken steps to reduce a number of these where experience has shown that lower levels are practicable.

Continuing studies carried out by FDA to measure the amounts of pesticides in the American diet have shown that current levels of DDT are well below the Acceptable Daily Intake established by the World Health Organization and the Food and Agricultural Organization.

In this continuing survey, one pound of fresh or frozen fish is included in a two-week diet. If this amount of fish carried 5 ppm DDT, the overall intake of the pesticide during the two weeks would be approximately one-quarter of the maximum level suggested by WHO/FAO.

Some consumers, however, may use larger amounts of fish in their diets, Dr. Ley said. If coho salmon with 5 ppm DDT were to be a regular part of the diet, consumption should be limited to an average of one-quarter pound a day to stay within the WHO/FAO recommendation, he explained.

Sports fishermen taking coho salmon from Lake Michigan should be aware of the high DDT residues in the fish. Those who choose to eat the fish can get rid of a significant part of the DDT if they use only filets. DDT accumulates in the fat. Filleting, as ordinarily performed, disposes of concentrations of fat found under the spine and near the head and the tail of the coho salmon.

Coho salmon filets analyzed by FDA have shown residues of DDT and derivatives ranging from about 1 to 5 ppm. These filets were from fish taken from Lake Michigan at about the same time as the salmon later seized because of residues ranging from 13 to 19 ppm.

NIXON EDUCATION BUDGET CUTS

Mr. MOSS. Mr. President, on October 20, 1968, Richard M. Nixon, then a candidate for the Presidency of the United States, said, on a CBS radio program:

I pledge my administration to be second to none in its concern for education.

On May 5, 1969, some 7 months later, and less than 4 months after his inauguration, President Nixon sent to Congress a message cutting the 1970 Johnson administration Federal budget request for education by some \$402 million.

Mr. President, I respectfully suggest that instead of showing "concern for education"—instead of trying to "improve the quality of education," which was another Nixon campaign phrase, that the Nixon administration is now steadily undermining many of the Federal education programs which the Congress has already enacted.

The people of my State of Utah are

well aware of this about-face by the Nixon administration. And they neither understand it nor like it. There is nothing we hold more important in Utah than education. We believe very strongly that we must take it upon ourselves to give all of the children in our State an opportunity for a quality education, and we are willing to bear the expense of it. We will cut funds for almost any other endeavor in Utah—in fact we have—to fully finance our schools. We have long been well at the top of the list of States in our per capita expenditure for education.

Therefore, Utah people find it hard to believe that their new President has so quickly turned his back on his promises to our school administration and our teachers and our schoolchildren and to our citizens in general, and they are writing to me to tell me in no uncertain terms how they feel. They believe, as did George Washington, that—

In a country like this . . . if there cannot be money found to answer the common purposes of education, there is something amiss in the ruling political power . . .

The Nixon budget cuts \$233,483,000 out of elementary and secondary education programs, including programs which will carry out one of the exact pledges in the education plank of the National Republican Platform adopted at the Miami convention—the pledge supporting "the development and increased use of better teaching methods and modern instruction techniques." That pledge is not yet even a year old.

President Nixon's net decrease is \$233,483,000, but since \$32,330,000 must be added for other purposes—interest subsidies on construction loans \$1,080,000; civil rights education, \$6,250,000; and \$25 million for experimental schools, the true cut under Nixon's first budget revision for elementary and secondary education costs out at \$265,813,000 less than the very conservative Johnson budget requests for this area.

Included in the elementary and secondary education cuts is a reduction of about one-third of the funds for the impacted area programs. These are the funds which Congress has authorized and appropriated over many years to pay school districts whose school enrollment has been swollen by children whose parents are living on Federal installations or whose parents are working on Federal contracts or other Federal services. Actually the cut is more serious than even the percentage figure would indicate. The Nixon budget request for impacted areas is for only \$187,000,000—actually \$650,000,000 will be needed in the fiscal year 1970 to continue the program just as it now exists.

In Utah—based on 1968 entitlement and 1968 pupil count—we would have 3,117 "A" children, those whose parents live and work on Federal property and 46,731 "B" children whose parents live or work on Federal property. Under full funding based on the fiscal year 1968 entitlement in our First Congressional District, we would expect to receive \$595,712 for the "A" children and \$4,299,278

for our "B" children. In the Second Congressional District with 788 "A" and 13,114 "B" children, under full funding, again based on fiscal year 1968, we could expect to receive \$201,555 and \$1,677,149, respectively. It is immediately apparent that elimination of payments for the "B" category children would reduce the payment to 38 school districts in the State by \$5,976,428 leaving only \$797,266 for distribution. Actually the loss is greater because the figures I have cited were based on the 1968 situation. They are, therefore, understated by a considerable margin. This year's entitlement nationally is now estimated to be about \$650 million for Public Law 874. The figures I have cited are based on the 1968 \$462,848,135 entitlement.

Such a cut in operation and maintenance

funds to the schools involved would entail consequences to the taxpayers of those localities of the first magnitude. I shall do everything I can to demand full funding for all education programs and especially in this area.

Mr. President, one area of retrenchment—\$56,483,000 under the Johnson budget estimates—is for the innovative programs fostered under title III ESEA for supplementary educational centers and services.

It is ironic that this program is the one program returned to and operated at the State level by State educational agencies and State advisory committees largely at the insistence of the House with a strong minority support.

The authorization for this innovative program stands at \$566,500,000 for fiscal

year 1970; the Office of Education estimates to the Department of Health, Education, and Welfare which were conservative, justified \$214,000,000, yet only \$116,393,000 is contained in the Nixon estimate. Yet if we are to find better ways of doing things and gain support for improvements in instruction, this is a program we should support to the maximum.

But here, in item after item, we find a shortsighted approach to a basic problem.

I ask unanimous consent that an April 1969, "Summary of the Fiscal Year 1970 Budget Proposals" be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, OFFICE OF EDUCATION (BUDGET AND MANPOWER DIVISION)

¹ Includes supervision which is funded under title V, ESEA.

² Indefinite.

³ For new awards plus continuous cost.

⁴ \$25,000,000 authorized from fiscal year 1959 through duration of act.

⁵ Specific authorization represents amounts only for technical assistance to carry out functions of National Advisory Council.

⁶ Authorization included under "Grants to States," pt. B, Vocational Education Act of 1963.

⁷ Includes library research under "Research and training."

⁸ "General education" combines these prior-year activities: general education research, demonstration and development, library improvement research, and educational media research.

⁹ \$100,000,000 authorized over 2 5-year periods through fiscal year 1970.

Mr. MOSS. Mr. President, among the many programs for education which have high effectiveness and have shed enlightenment, are those broadly grouped under its "library programs." What I have to say about them and their operation in my State is succinctly and effectively stated in a fact sheet for Utah which was made available to me by the American Library Association's able Washington spokeswoman, Miss Germaine Krettek. I ask unanimous consent that this excellent summary be printed in the RECORD at this point in my remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

INFORMATION CONCERNING EFFECT OF PROPOSED FISCAL YEAR 1970 BUDGET CUTS IN FEDERAL LIBRARY PROGRAMS—UTAH*

ELEMENTARY AND SECONDARY EDUCATION ACT—TITLE II

According to the Utah State Board of Education, 303,000 pupils and 11,000 teachers in Utah will have fewer of the needed library books and other instructional materials next year if ESEA II funds are eliminated, or even cut as proposed in the January budget recommendation.

Sixty public elementary schools and 15 public secondary schools in the State are still without libraries, and will be forced to remain without them in the absence of substantial help under the ESEA II program.

The State Board of Education also estimates that \$100,000 would be needed to properly administer the ESEA II program at the State and local levels.

LIBRARY SERVICES AND CONSTRUCTION ACT

There is a backlog of eighteen needed new public library buildings, according to the Utah State Library Commission. These projected buildings would cost a total of \$5,000,000.

Some of the accomplishments and needs of the State under LSCA were listed recently by Mr. Russell L. Davis, State Librarian:

We have been able to establish library service in 10 counties which previously to LSA and LSCA had no library service; and in 1968, 1,000,000 volumes were circulated to 250,000 people.

We have been able to construct 5 new library buildings in new growth areas to replace old, totally inadequate, worn out Carnegie buildings.

*Information compiled from replies to questionnaires sent out by the ALA Washington Office following announcement of the January budget recommendations for FY 1970.

We now have library service in all five state institutions, where previously there was only partial library service in two of the institutions.

As a result of LSCA we now have a rapid communications network between all libraries in the state, which has been a great boon in providing truly adequate library service.

Utah still has 7 counties without library service. The state is unable to initiate this new service by itself, and because of reduced funds we have had to stop short of the goal of total library service for all residents of Utah.

"In the context of the total Federal program for education, special programs for books and equipment are considered low priority," said Under Secretary of HEW John Venneman at a budget briefing meeting April 15. This statement is clearly reflected in the Bureau of the Budget's recommendations for reducing the 1970 U.S. Budget for education by a total of \$369,569,000. The proposed revision cuts out 66% of the Johnson budget proposed for programs for library users.

The 1970 Johnson Budget request for major library programs—ESEA Title II, HEA Title II and LSCA—amounted to \$134,500,000. The Nixon Administration recommendations, if accepted by Congress, would provide only \$46,209,000, which is \$88,291,000 less than the January budget and \$433,891,000 less than the amounts authorized for these programs in fiscal year 1970 (beginning July 1, 1969).

Looking at it another way, almost 25% of

the recommended reductions in funding for activities under the Office of Education would come out of the principal library programs. Keep in mind, too, that this does not take into consideration the money already lopped off by the January budget proposal, which cut out NDEA Title III (equipment and instructional materials) and HEA Title VI (equipment and materials for higher education), both of which benefitted library users. The 1969 appropriations for Title III was \$78,740,000, and for Title VI it was \$14,500,000. As it now stands, these programs would be terminated.

If no effort is made to override these recommended cuts, the prospects for even minimal aid for library resources for school, public and academic library users will be dismal indeed. There will be no funds at all for the school library program under Title II of the Elementary and Secondary Education Act. Half of the Title I funds for public library services and all of the Title II construction money will be withdrawn from programs partially supported by the Library Services and Construction Act. And half of the college library resources funds will be cut out of the HEA Title II-A program, leaving only enough money to make basic grants of \$5,000; training opportunities for librarians will be reduced by more than 50% under Title II-B; and the Library of Congress acquisition and cataloging activities now assisted by the Title II Part C program will be reduced by \$2,856,000.

	Revised budget recommendation	January budget recommendation	Fiscal year 1970 authorization

Mr. MOSS. Next, the Nixon budget reduces funds for higher education by \$117,500,000. These cuts primarily affect construction grants for undergraduate academic facilities.

Mr. President, if anyone does not recognize there is a crisis in higher education in this country, they must have "dug a hole and pulled it in behind them," to use the old phrase. The crisis is partly financial. Many institutions have found it difficult to sustain current activities, let alone undertake new areas of instruction, or build new classrooms and other facilities, for ever-expanding school populations. Our young people are asking more of their universities and colleges every day—some of their demands are unreasonable, but some are unquestionably both reasonable and of prime importance, and many of them will require the renovation of obsolescent facilities and the construction of new ones if the problems are to be met.

In April of 1968, the American Association of Universities adopted a report which estimated that America must, somehow, finance new higher education construction at perhaps \$2 billion annually. I ask you, is this year of 1969, the one in which we should cut Federal construction funds by over a hundred million dollars?

Such a cut will jeopardize a number of higher education construction projects

in Utah. Seven new facilities have been authorized, and are under construction, or ready for construction. All would be seriously curtailed. The new facilities are the Snow College science facility, a Weber College classroom building, the Westminster fine arts project, the University of Utah physical education building, the Utah State University physical education facility, the Weber College maintenance building, and the College of Southern Utah administration building. The three projects which could be interminably delayed are the Weber College library addition, the technological building at the Utah Technical College, and the Dixie College science building.

I ask unanimous consent to place in the RECORD three letters from Utah which deal with these cuts—one from Governor Rampton, a second from Merle E. Allen, director of the coordinating council on higher education, and the third from Mr. Glen R. Swenson, director of the Utah State Building Board.

Governor Rampton's letter is particularly revealing in that he recalls that speeches by members of the Nixon Cabinet and Budget Director Robert P. Mayo at the Midwinter Governor's Conference the last of February all indicated that although there might be some cuts in the budget, the recommendations on grants in aid would be fairly close to those of President Johnson. Accepting

these statements in good faith, the Governor made his recommendations to the Utah State Legislature, only to find after that body had adjourned, and there was no possibility of amending his recommendations, that President Nixon had recommended almost a 50-percent cut in section 103 funds and no funds whatsoever under section 104 of the Higher Education Facilities Act.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

UTAH STATE BUILDING BOARD,
Salt Lake City, Utah, May 6, 1969.

HON. FRANK E. MOSS,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MOSS: The Utah State Building Board, which serves as the State Commission for programs mentioned below, is seeking your assistance and that of other members of Utah's Congressional Delegation in obtaining funding for fiscal year 1970 for Section 104 of Title I of the Higher Education Facilities Act of 1963 (P.L. 88-204) and for Title VI-A of the Higher Education Act of 1965 (P.L. 89-329).

Title VI-A of P.L. 89-329—The federal budget proposed no funds for these programs in 1970. We are not aware of any action now taken to provide for such funds in an amended budget.

In fiscal 1966, the appropriation was \$15,000,000 for Title VI-A and \$14,500,000 for the next three years. Utah's share of these four appropriations has been \$698,496.

Far greater results have been achieved than would normally be expected at the limited level of funding. The federal government is receiving full value for its investment in this program.

Section 104—Title I of P.L. 88-204—We have received \$10,322,846 since fiscal year 1965, or about an average of \$2,000,000 per year. The state budgets for construction have been geared to a continuation of these grants, or at least approximately \$1,500,000 per year.

Utah has some very urgently needed projects that will be deferred if these funds are not available or seriously reduced in size. Attached is a resume of some of these projects.

We will be happy to provide you with any additional information to assist you in obtaining funding next year, and we would welcome your suggestions about any action which the State Commission might take in this matter.

Yours truly,

GLEN R. SWENSON,
Director.

MEMORANDUM OF UTAH STATE BUILDING BOARD,
MAY 5, 1969

To Director of State Building Board.
From Programs & Liaison Officer.

Subject: reduction in proposed Federal appropriations budgets for title I of Public Law 88-204, the Higher Education Facilities Act of 1963 and title VI-A of Public Law 89-329, the Higher Education Act of 1963.

We have been informed that the President's new budget contains nothing ("0" dollars) for Section 104 of Title I this year and only \$43,000,000 for Section 103 of Title I. Title VI-A is recommended for "0" dollars also.

We suggest that all institutions make their congressmen and senators aware of this situation and of our concern for the outcome if such is realized in our State.

To bring things to the project level, we will present a few possibilities to consider. This means that Utah will receive an estimated \$313,000 for Section 103, nothing for Section 104 and, of course, nothing for Title VI-A. The effect on certain projects could be as

follows: (All figures are for the estimated Federal share.)

The Snow College Science Facility as proposed needs \$560,000. It is the only Section 103 project for the next fiscal year. They would be approximately \$247,000 short of having enough to proceed with construction until the next year—1970 calendar year (1971 fiscal year). The Remodeling of Noyes Building also needs \$12,000.

Weber Classroom No. 2 would be cut by \$428,750 this year and if the program is unchanged the same amount the following year or a total of \$857,500.

Westminster Fine Arts project needs \$500,000 and this reduction could cause them to delay construction for at least one year if not longer, or proceed without federal participation.

The University of Utah Physical Education Building could qualify for up to \$1,700,000 in additional funds but after this year would be unable to receive any regardless of the program appropriation.

The Utah State University Physical Education Facility could use \$150,000 or more under the existing contract and as much as \$350,000 with the addition of the swimming pools but conditions as shown would probably void them for any additional federal share.

The Weber Maintenance Building as a result would probably have to be withheld until fiscal year 1972 for construction assuming the resumption then of Title I appropriations.

The College of Southern Utah Administration Building would probably be affected by a \$200,000 cut back.

All of the preceding projects are now funded by State or private funding so the effects are almost immediate.

The following projects which have received State planning authorizations could be seriously delayed by not being able to receive the following stated federal shares when anticipated and of necessity having to be constructed some time in the far future or receiving additional State funds over the amounts requested in the 1969 Building Program and/or a reduction of project size:

Weber Library Addition—\$1,720,000.
Utah Tech. College at S. L.—Technology Building—\$1,900,000.
Dixie College Science Building—\$547,000.

TITLE VI-A (P.L. 89-329)

For effects of Title VI-A, Utah has always had more requests than funds available for instructional equipment. Some institutions have commented that this program, although limited in scope, has done more for them than programs of a much greater scope.

STATE OF UTAH,
OFFICE OF THE GOVERNOR,
Salt Lake City, April 29, 1969.

Senator FRANK E. MOSS,
Senate Office Building,
Washington, D.C.

DEAR TED: In preparing a budget to present to the Legislature this year, it was necessary for me to estimate the amounts that would be available from federal funding in a number of areas. Following the presentation of President Johnson's budget, which as I recall occurred early in January, I made minor modifications to conform to the recommendations therein contained. During the last two days of February at the Mid-Winter Governors' meeting in Washington, most members of the Cabinet and the Budget Director spoke to the Governors in Executive Session, and following their individual talks, submitted to questioning. Most of the questioning of the Governors had to do with federal funding of the grants-in-aid programs to the states. Most of the Cabinet members deferred the question to Mr. Mayo, who was the final speaker. Mayo stated that he did not yet have the information to give as to final figures, but suggested that the Govern-

nors—most of whose Legislatures were in the final days, as was ours—should assume that the final recommendations, while differing somewhat from the Johnson budget, would be fairly close thereto. Accordingly, I made no further modifications in my recommendations to the Legislature.

The Johnson budget recommended \$70 million under Sec. 103 of the Higher Education Facilities Act and \$84 million under Sec. 104 of that Act. This would have given the State of Utah a total under the two sections of approximately \$1,300,000. While we could have adjusted reasonably to modifications up to 10% of this amount, we are completely unprepared for the information we received today to the effect that the Bureau of the Budget was recommending \$43 million under Sec. 103 and nothing under Sec. 104. This means that we will receive under these two sections somewhere around \$400,000.

I wish to urge that you take whatever steps are necessary in the Congress to restore the appropriation under this Act to somewhere near the figures we were lead to believe we could rely on. I realize, of course, the need for reducing the budget in whatever areas can absorb reductions. However, it does not appear to me to be a responsible approach to the matter of state-federal relationships to make such a drastic reduction as this after the states had been lead to believe that the reductions would not be major in nature, and after the majority of the state Legislatures had adjourned.

Sincerely,

CALVIN L. RAMPTON,
Governor.

STATE OF UTAH, COORDINATING
COUNCIL OF HIGHER EDUCATION,
Salt Lake City, Utah, May 9, 1969.

HON. FRANK E. MOSS,
U.S. Senate,
Washington, D.C.

DEAR TED: One element in the budget for fiscal 1970 that concerns us very much is the reduction in support for higher education facilities.

This is a serious problem for all of higher education and certainly a difficult one for the State of Utah. We have programmed services at our institutions on the assumption that support that had been developed by the federal government in this area would be continuing.

Higher Education in the State of Utah has been able much better to do its job because of the Higher Education Facilities Act of 1963. Now we find that the federal budget proposes no funds for programs in 1970 either under Title VI-A or Section 104 of Title I of P.L. 89-329; also that only \$43,000,000 have been appropriated for Section 103 of Title I.

This means the State will face a serious shortage of funds for facilities development and our schedule will be thrown seriously out of phase for several institutions. We are facing a choice in several instances of either proceeding with inadequate building with parts chopped off to accommodate the reduction in funds, or simply postpone construction of much needed facilities until these federal funds are restored. We need dependability if we are to get maximum use out of federal dollars spent. I would urge most seriously your support for these programs and request that funds be provided for the continuance this next year.

We appreciate your efforts in our behalf.
Sincerely,

MERLE E. ALLEN, Ed.D.,
Director.

Mr. MOSS. Third, the Nixon budget would cut \$47,916,000 from libraries and community service funds. This would defer funds for the purchase of public and college library books, and for public

library construction, and would also reduce funds for cataloging services and acquisition of books for the Library of Congress. This latter activity, of course, saves money for every other library in the country.

Mr. President, the final cut recommended is for \$3 million in overseas research and training—this is the program which provides funds for students doing overseas research—research which is important and necessary and is financed by foreign currencies excess to other government needs. Why cut it now?

Probably no budget cuts proposed by the Nixon administration could strike more cruelly at the hopes and the future of America than the drastic reductions proposed for education. Education is our most important domestic business—no nation can ever expect to be ignorant and remain free.

I am confident that committees reviewing authorizations and appropriations in the field of education will examine very carefully any recommendations which will emasculate programs which the Congress has established and supported overwhelmingly, some of them for a number of years.

I recognize the need for a ceiling on Federal spending at this time when the drain of Vietnam is inexorable. But surely we can find areas in which we can cut with less impact upon the future and well-being of the Nation than to cut our schools. I have suggested in the past, and I suggest again, that we do not deploy the Safeguard antiballistic missile, and in one stroke, we will have many times more money than we need for all of our Federal aid to education programs combined. Our scientific community is bitterly divided as to whether the ABM would even work, and if it would, there is considerable evidence that it would represent pure and unnecessary "overkill."

I say, let us forget about deploying the ABM, and fund our education programs properly.

Or, to those who insist that we must deploy the ABM just in case it might be effective, and we might need it, let me suggest that the administration put a tighter control on military spending generally, and forestall future waste such as the \$2 billion extra cost of building the Lockheed C-5A. Or let us stop producing nerve gas—I understand we already have enough to kill every man, woman, child, and animal in the United States. Let us apply funds we are now wasting in the military-industrial complex on the education of our children, and our young men and women.

Mr. President, we in America are today preparing our young people to be citizens in a changing and intimate world society. The crises of this year and hour may be mild in comparison with those our children and our young people will have to meet. I am hopeful that this Congress will not succumb to the philosophy that we can rest comfortably on a set of minimum standards and maintain the status quo.

We must not settle for the Nixon administration budget cuts in the field of education.

MARY JOAN WHITE WRITES ON "A TIME OF TESTING"

Mr. BENNETT. Mr. President, an excellent, thought-provoking analysis of current unrest across the Nation has just been brought to my attention. It appears in the May 20 edition of the Wall Street Journal, and is written by Mary Joan White, a member of the Washington bureau of Salt Lake City's Deseret News.

Mrs. White, who is the wife of the Deseret News' fine Washington correspondent, Gordon Eliot White, comes close to striking at the roots of the violence and tension that has come to characterize our Nation's social landscape.

In the article, entitled "A Time of Testing," she traces the parallels between today and conditions of the pre-Civil War era. The similarities and attitudes extant during both periods are close enough, in my opinion, to warrant pause and reflection on how we can benefit from the lessons of history and thus avert repeating past mistakes.

Mrs. White states:

Society must not permit itself to be divided into factions, each seeing itself as the guide on the only road to light. Moderates must speak out in defense of justice, but also in defense of fair and legal roads to justice. Legitimate authority must act judiciously to curb excesses of those who would reject all authority but their own.

Because I believe the entire article is well worth reading, I ask that it be printed following my remarks:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A TIME OF TESTING—TODAY'S TENSIONS PARALLEL THOSE OF THE PRE-CIVIL-WAR PERIOD
(By Mary Joan White)

"... our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal."

"Now we are engaged in ... testing whether that nation, or any nation so conceived and so dedicated, can long endure ..."

With the omission of nine words, the opening paragraphs of Lincoln's Address at Gettysburg are forever relevant to the United States of America. Their validity in our own time is sobering.

This nation is undergoing a period of testing of a nature it has not faced since Lincoln spoke. The parallels are sufficient to recall Hegel: "Peoples and governments never have learned anything from history, or acted on principles deduced from it."

In the 1860s the question of the place of the Negro in American society was the tinder that ignited public discourse and left the rule of law ashes in the fires of unreason. Good men saw certain questions as matters of higher moral law to which even the principles embodied in the Constitution should bow. Radicals at both extremes used the race issue to stir public passion, obscuring fundamental principles of democracy and implying that, in the immediate crisis, they were of only secondary importance. The moderates allowed it to happen. Each side practiced rule-or-ruin politics. To gain its own legitimate or illegitimate ends, each was ready to sacrifice the ideal of a people governing themselves by majority rule, one side in order to prevent its application, the other to extend it.

Between the extremes, the center itself divided. James Buchanan was still President when South Carolina seceded. Believing no

minority had the right to override the majority or destroy the union, he nevertheless held that the majority could not coerce the minority as a matter of principle or of national survival.

The most frightening present-day parallel to the ante-bellum period is the tendency to permit modern radicals to divide society on the basis of "morality" instead of promoting debate on the nature of the problems confronting society and the most effective means of solving the problems.

As long as slavery was a political, economic and social problem (albeit with moral overtones), the states were able to deal with it; its extension was limited and the trade curtailed. There was hope for eventual solution as late as 1850. But when the problem was forced beyond the political arena and became a moral issue, compromise and patience were no longer possible. Where once an institution had been condemned, subsequently fellow citizens were castigated as immoral or evil. The government of the people ceased to exist on a national basis and only war restored it.

In that war more than 617,500 men died. Legal slavery also died. Whether slavery could have been abolished short of war is questionable, but it is certain that the methods employed by the radicals stirred public passions to the point that leaders who tried to work through to a peaceable, just solution were cut off. Nor did the fearful price buy true freedom for the Negro. The nation has not finished with the bitterness, political division and racial injustice that survived the war.

Instead of sectional lines, racial and generational lines are being drawn today. Militant blacks and radical youth are attacking the problems of an admittedly imperfect society in terms of moral issues and with any means at hand. Viewing problems primarily as moral issues, however, has major drawbacks: One self and one's own solutions are necessarily seen as right. Anyone who does not support one's programs is at least blind; those who oppose or offer alternatives are not only wrong but immoral. If one's opponents are immoral, why quibble about the tactics used against the ungodly?

WHERE RESPONSIBILITY RESTS

Society must not permit itself to be divided into factions, each seeing itself as the guide on the only road to light. Moderates must speak out in defense of justice, but also in defense of fair and legal roads to justice. Legitimate authority must act judiciously to curb excesses of those who would reject all authority but their own. Whether we be parents, teachers, university administrators or government officials—or simply law-abiding, tax-paying, caring voters—we are responsible.

If a diverse people are to rule themselves, the majority (or its delegates) must decide and the minority must submit, even if the decisions are repugnant or hurtful. The minority can only try by persuasion to alter the balance. If the minority refuses to submit, society fragments and chaos results: Either the majority enforces its will by any means necessary, including war, or a period of anarchy ensues, historically followed by a tyranny of those most willing and able to use extreme measures. Self-government is dead. The founders of this nation did temper the harsh requirements of majority rule in the cause of individual liberty. Perceiving the danger implicit in "the greatest good for the greatest number," a possible tyranny by the majority, they wrote into the Constitution certain safeguards.

In their attitudes and strategy, the young radicals and black militants are the direct descendants of both the abolitionists and the Southern radicals, an uneasy mix surely. Like the abolitionists, they have a rather arrogant assurance that they are so right, that

they are above the law in their choice of means to their ends. Like the Southern radicals, they are so committed to their own view of the issues that they insist on being allowed to rule or ruin the system. Their attitude and more extreme methods are absolutely totalitarian.

Latter-day Buchanans find it difficult to condemn illegal methods employed in the name of reform. Like Buchanan, they deplore the excesses but deny society's responsibility to curb them.

FINDING THE PROPER COURSE

What is the proper course for a minority that finds some aspect of national or institutional policy accepted by the majority to be morally and ethically repugnant? Must conscience be sacrificed to majority will? Or must punishment be accepted as the price of exercising one's conscience? That dilemma accounts for much of the current hesitance to act in cases of clear violation of the law.

No very agreeable solution has been found. The dissenter can stifle his objections, exile himself, accept punishment—or limit his protest to legal forms. Society, of course, can ignore the violation of its laws, but it does so at its peril. Particularly when the minority is a sizable one, to ignore disobedience of the law is to encourage wholesale disrespect for the rule of law. To excuse a violation committed in the name of conscience is to set each man's conscience above that of the majority.

The response must be to examine the issue of the individual's right to heed his conscience in relation to the importance of a people's right to self-rule. The collapse of free democratic government that safeguards basic liberties ends the individual's free exercise of conscience. The obverse does not hold. The doctrine of individual nullification is no more valid in the 1960s than was its states' rights ancestor in 1795.

Harsh as it is, the paramount importance of the right of a majority to govern must be defended—even at the cost of the use of force.

The contemporary protest movement was born in the Rev. Martin Luther King's Montgomery bus boycott. Its current form is a perversion of those unquestionably legal, peaceful and productive origins. Now, the movement embraces seizure or destruction of property; violence or threat of it against persons; the systematic harassment of law-enforcement personnel; the denial of the right of others to free speech and legitimate action; the impairment of academic freedom. Current tactics differ not only in degree but in nature from Dr. King's non-violent civil disobedience that constituted no threat to the persons or rights of others or the rule of law. He never demanded amnesty for violating the law: He broke only those laws whose legality he wished tested against Constitutional principles, thereby forcing the law to live up to its ideals.

Where authorities do not make the mistake of using undue force against illegal forms of protest (thereby casting the protesters in the role of innocents whose demands must be granted in recompense), legal protest will serve as well and gain more of significance: Concessions rationally evolved in a spirit of community and cooperation stand more chance of being effective, leave no residue of bitterness and division, establish no precedents of disrespect for the rights of others.

In the closing days of the Convention of 1787, many of the participants were less than perfectly satisfied with their efforts at creating a Constitution. It was understood that some of the leading political figures of the day would oppose its ratification. Nearly at the end of his public service, Benjamin Franklin rose. Addressing the dissidents, he called on each to "doubt a little of his own infallibility . . ."

As for the rest, Franklin recognized that all had some fault to find with the Constitution, yet he urged support for it because, he said, "I expect no better, and I am not sure it is not the best."

DIMENSIONS OF SECURITY

Mr. MANSFIELD. Mr. President, the chairman of the Committee on Foreign Relations, Senator FULBRIGHT, delivered a speech to the National War College on May 19, entitled "Dimensions of Security."

The student body at the National War College is one of the most distinguished and able in the United States. Speaking to that audience provided a good occasion for the chairman of the Foreign Relations Committee to convey to that group some of the deep concern some of us feel in the Senate about the direction of our foreign policy and its relation to our military posture.

There is little I can add to the remarks which Senator FULBRIGHT made, but I would like to emphasize that the speech as reported in the press may imply that the chairman of the committee has not been sympathetic and understanding and admiring of the conduct of American soldiers in the field. This simply is not true. Senator FULBRIGHT said:

The courage and endurance of our fighting men command the respect of all Americans; the fault in our war policy lies not with them but with the political decisions which committed them to an impossible task.

Mr. President, I ask unanimous consent that the remarks of Senator FULBRIGHT be inserted in the RECORD at this point.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

DIMENSIONS OF SECURITY

In the old Western movies there was a standard climax in which the villain emerged from his hideout shielded behind the captive heroine and snarling: "Shoot me and the girl dies!" I perceive in this old melodrama a kind of analogue to my own relations with the military. In these years of criticizing our war policy in Vietnam, I have thought a number of times that I had my fellow politicians in the executive branch concerned—intellectually, that is—only to have them burst out of their hideout shielded behind the military in the role of the heroine, and snarling: "Shoot me and the girl dies!"

I am tired—as I expect you may be—of seeing the military used as a hostage for policies made by civilian officials. I am tired of having my criticism of the war in Vietnam interpreted as an attack on our soldiers in the field. In fact it is no such thing. The courage and endurance of our fighting men command the respect of all Americans; the fault in our war policy lies not with them but with the political decisions which committed them to an impossible task. We have been trying to defeat a nationalist insurgency on behalf of a government which has shown itself incapable of inspiring either the support of its people or the fighting spirit of its army. For reasons having nothing to do with the fighting abilities of our GI's or the leadership qualities of their officers, that task has been found impossible—not in the sense that it is beyond our military means but because it is beyond any military means that we have been morally and politically willing to employ.

Some of us have perhaps not been as aware as we should of the anguish that Vietnam has involved for our professional soldiers. In the two world wars, and even the Korean War, our armed forces were bolstered by stalwart allies and strong public support at home. Both of these are lacking in Vietnam: our client is a weak reed and the American people are divided and demoralized. These, I am well aware, are heavy psychological burdens for an army facing a resourceful and tenacious enemy.

In addition, there is the specter of having to settle for something less than victory, perhaps even something less than a standoff. That would be a new experience for American soldiers, whose morale has been built not only on their unbroken history of success but on their "can-do" spirit in the face of any challenge. That spirit has served the American people well but it also contains a pitfall: it can lead an army to misjudge its prospects, by gauging them more on the basis of its own elan than a cold appreciation of the facts of the situation.

We politicians have a different standard. In our dealings with each other victories are rare; standoffs are routine; and sometimes we get beaten. Quite obviously soldiers cannot conduct wars by the pliant standards of parliamentarianism. But there is value in the experience of settling for less than you had hoped for, of trimming your sails, and carefully distinguishing between what you can do and what you cannot do. More than a few wars have been lost—I think of France in 1870 and Germany in 1914—in part because soldiers told their civilian chiefs that they could do more than it turned out they could do. And more than once in history a peace has been lost because politicians persuaded themselves that they could do more than it turned out they could do. In this connection, it occurs to me that few Presidential advisers, military or civilian ever served their country and President better than General Ridgeway did when he advised President Eisenhower in 1954, not that we could not intervene and win in Indochina, but that we could not do it at reasonable cost, or to any useful end. I think it is a great misfortune that there were no such persuasive "no-men" serving the Johnson Administration in 1964.

Mistakes are not liquidated with glory, and Vietnam, I believe, has been a mistake. At such time and by whatever means this war is ended, we are all likely to emerge somewhat sobered. There will be little for any of us to be proud of—except for the soldiers who fought so hard in so unpromising a cause. I stress this point to you as soldiers not only because I believe it to be true but, frankly, because I have had the fear that, out of an exaggerated feeling of our own responsibility for the stalemate in Vietnam, some of our military leaders have been professing an unwarranted optimism about the war, thereby encouraging its continuation.

I. THE DILEMMA OF ENDS AND MEANS

Having emphasized as clearly as I know how that I have no criticism to make of military men, or their performance in Vietnam, I turn now to the influence in our affairs that I do criticize: not the military but *militarism*, and its effects upon American life. I do not propose to belabor you with a discourse on the military-industrial-labor-university complex. I expect you have heard something about it already—more perhaps than you have cared to hear. Nor do I propose to recite the list of our foreign installations and the names of the countries to which we have committed ourselves militarily by one means or another. I propose instead to suggest some of the ways in which our far-flung military commitments are bringing about profound changes in the character of our society and government—changes which are slowly undermining democratic procedure and values,

and which, taken together, have set us on the path toward authoritarian government.

My theme is the relationship of ends to means, the connection between the objective of our foreign relations and the nature of the policies we pursue. The ultimate test of any foreign policy is not its short-term tactical success but its effectiveness in defending the basic values of the society. When a policy becomes incompatible with, or subversive of, those values, it is a bad policy, regardless of its technical or tactical effectiveness. I think we would all agree that the central, commanding goal of American foreign policy is the preservation of constitutional government in a free society. My apprehension is that we are subverting that goal by the very means chosen to defend it.

Confronted in the last generation with a series of challenges from dynamic totalitarian powers, we have felt ourselves compelled, gradually and inadvertently, to imitate some of the methods of our adversaries, seeking to fight fire with fire. I do not share the view that American fears of Soviet and Chinese aggressiveness have been uniformly paranoid, although I think there have been a fair number of instances of that. My point is that the very objective we pursue—the preservation of a free society—proscribes certain kinds of policies to us even though they might be the most tactically expedient. We cannot, without doing to ourselves the very injury that we seek to secure ourselves against from foreign adversaries, pursue policies which rely primarily on the threat or use of force, because policies of force are inevitably disruptive of democratic values. Alexis de Tocqueville, that wisest of observers of American democracy, put it this way:

"War does not always give democratic societies over to military government, but it must invariably and immeasurably increase the powers of civil government; it must almost automatically concentrate the direction of all men and the control of all things in the hands of the government. If that does not lead to despotism by sudden violence, it leads men gently in that direction by their habits."

"All those who seek to destroy the freedom of the democratic nations must know that war is the surest and shortest means to accomplish this. That is the very first axiom of their science."¹

For more than a decade out of the last three we have been engaged in large-scale warfare, and for the rest of that period we have been engaged in the cold war and in ever more costly preparations for war. In the wake of our disappointment with the United Nations in the forties, we have taken it upon ourselves to preserve order and stability in much of the world, purporting to do on our own the things that Wilson and Roosevelt hoped to accomplish through world organization but never dreamed of America doing on its own. As I have said, I am not one of those who believe that these vast commitments were taken on out of delusion or the conscious lust for power. The threat, though exaggerated and distorted in some instances, has been real enough in others, but in either case the effect has been the same for our internal life. War, and the chronic threat of war, have been carrying us, "gently" by our "habits," toward despotism.

The dilemma involved in all this for a soldier must be a particularly agonizing one. It must sound as though he is being asked to fight with one hand behind his back, accepting limits upon his own stock in trade of which his adversary is free. And that is exactly what you, as soldiers, are being asked to do. You are asked to conceive of security in a dimension broader than that of your own trade. You are asked to conceive of security in terms of ends as well as means, in

¹ Alexis de Tocqueville, *Democracy in America* (New York: Harper & Row, Publishers, 1966), Vol. II, ch. 22, p. 625.

terms of the procedures and values of a free society as well as the most efficient means of thwarting an adversary.

There are times, to be sure, when a threat may seem so great and imminent as to warrant the circumvention of democratic procedure. There are times when war is thrust upon you. But there are times when a threat turns out in retrospect to have been less ominous than it seemed; there are times when we have some choice in the matter of war and peace. Psychologists tell us that our perceptions are only partly reflections of the real world; the other part is determined by our own expectations. I think that we have perceived more menace in the world around us than is actually there. I believe that we have had more choice than we have known. Korea was perhaps forced upon us; Vietnam was not. Pearl Harbor left us with no choice; the incident in the Gulf of Tonkin left us with ample choice. The Cuban missile crisis may have warranted unusual procedures; the Bay of Pigs and the Dominican Republic patently did not.

Because of the kind of country we are, we cannot, except in the most exceptional circumstances, allow foreign policy to take priority over domestic and constitutional requirements. Given a choice between the use of force and less certain but peaceful methods, it is in our interests to take a chance on the latter. Given a choice between efficient emergency procedures and cumbersome democratic ones, it is in our interests to gamble on the latter—in full consciousness of the possibility that our democratic procedures may cost us embarrassment or worse in our foreign policy.

It is quite beside the point to contend, as some of the advocates of the anti-ballistic missile contend, that it is safer to "err on the side of security," because security is involved on both sides of the argument. One has to do with the security of means, the other with the security of ends.

For three decades we have been erring on the side of the security of means. The consequences of that error are only now coming clearly into view. I should like to suggest what some of these consequences have been—economic, political and moral—and how they have undermined our security in its broader dimension.

II. THE PRICE OF EMPIRE

Every nation has a double identity: it is both a *power* engaged in foreign relations and a *society* serving the interests of its citizens. As a *power* the nation draws upon but does not replenish its people's economic, political and moral resources. The replenishment of wealth—in this broader than economic sense—is a function of domestic life, of the nation as a society. In the last three decades the United States has been heavily preoccupied with its role as the world's greatest power, to the neglect of its societal responsibilities, and at incalculable cost to our national security. The economic cost is reflected in the disparity of almost ten to one between federal military expenditures since World War II and regular national budgetary expenditures for education, welfare, health and housing. The political cost is reflected in the steady concentration of power in the hands of the national executive, in a long-term trend toward authoritarian government. The moral cost is reflected in the unhappiness of the American people, most particularly in the angry alienation of our youth.

Speaking first of the economics of our global role: I have been told many times that in terms of our gross national product, we can well afford to do the things that need to be done at home without reducing our activities abroad. The answer to that assertion is that we are *not* in fact rebuilding our cities; we are not overcoming poverty and building schools and houses on anything approaching a scale commensurate with the

need; nor are we effectively combating crime, pollution, and urban and suburban ugliness.

Even if the economic resources were there, the psychological resources are not. The war in Vietnam has drained off not only money but political energy and leadership, and public receptiveness to reform. The war has totally altered the atmosphere of a few years ago, when hopes and confidence were high and the American people seemed willing to embark upon an era of social reform. An excellent start was made with the landmark legislation of 1964 and 1965, but Vietnam cut that short, dividing the country and the Congress, and inciting dissent and disorder. These in turn have given rise to a middle class reaction based on the fear of violence and anarchy. The result is an atmosphere uncongenial to reform, urgently needed though it is. Until the war in Vietnam is ended, there can be no prospect of the nation's more sober and generous instincts reasserting themselves, no prospect of a renewal of the nation's strength at its vital domestic source.

Having promised not to lecture you on the military-industrial-labor-academic complex, I confine myself to this one observation: With military expenditures providing the livelihood of some 10 percent of our work force; with 22 thousand major corporate defense contractors and another 100 thousand subcontractors; with defense plants or installations located in 363 of the 435 Congressional districts; with the Department of Defense spending \$7.5 billion on research and development this year, making it the largest consumer of research output in the nation—millions of Americans whose only interest is in making a decent living have acquired a vested interest in an economy geared to war. These benefits, once obtained, are not easily parted with. Every new weapons system or military installation soon acquires a constituency—a process which is aided and abetted by the perspicacity with which Pentagon officials award lucrative contracts and establish a new plants and installations in the districts of influential Members of Congress. I have not the slightest doubt that, if the anti-ballistic missile is deployed, it will soon acquire its own powerful constituency, and then we will be saddled with it—for reasons wholly independent of its ostensible military utility.

According to current intelligence calculations, made in terms of equivalent real purchasing power, the Russians are spending only three-fourths as much as we are on defense. Nonetheless, we are told, they threaten to pull ahead of us in strategic weapons and we must be prepared to counter that threat. I do not understand why they should be getting so much more for their money than we are. Perhaps the fault lies in inferior American efficiency—a disconcerting thought. Perhaps it lies in the lack of legislative oversight of the defense budget comparable in rigor and thoroughness to that exercised over the much smaller budgets of the other departments.

Be that as it may, by any standard the amounts spent on defense have become staggeringly disproportionate to the rest of the economy. It fills me with dismay when Department of Defense officials suggest that, as part of a "grand design" for strategic policy, we may be forced to "win" an arms race with the Russians by relying on our superior resources to spend them into bankruptcy. Such a strategy puts me in mind of the practice among the Indians of the Pacific northwest known as the "potlatch." Starting as a rivalry in gift-giving for the sake of prestige, the practice degenerated, as the tribes became wealthier, into competitive orgies of waste and destruction. An anthropologist describes it as follows:

"No longer did the potlatch serve its traditional functions of redistributing wealth, validating rank, and making valued alliances.

The wealth of these new rich seemed limitless, more than they could ever consume at a potlatch. So they instead destroyed vast amounts of wealth before the horrified eyes of the guests, as well as the other contenders, to dramatize the extent of their holdings. Fortunes were tossed into potlatch fires; canoes were destroyed; captives were killed. The competing claimants had no alternatives but to destroy even more property at their potlatches.

"A contender for rank ultimately found himself in a position whereby the only way he could humiliate a wealthy rival was to destroy one of the precious coppers"—a kind of bank note representing vast wealth. "The act was equivalent to wiping out all the debts owed to him. It was an incredible price to pay, but the man who made such a dramatic gesture no doubt rose meteorically in rank."²

Quite as inevitably as if it were deliberate, our imperial role in the world has generated a trend toward authoritarian government.

Vested by the Constitution *exclusively* in the Congress, the power to initiate war has now passed under the virtually exclusive control of the executive. The "dog of war," which Jefferson thought had been tightly leashed to the legislature, has now passed under the virtually exclusive control of the executive. The President's powers as commander-in-chief, which Hamilton defined as "nothing more than the supreme command and direction of the military and naval forces," are now interpreted as conferring upon the President full constitutional power to commit the armed forces to conflict without the consent of Congress. On the one hand it is asserted that the initiation of an all-out nuclear war could not possibly await Congressional authorization; on the other hand it is contended that limited wars are inappropriate for Congressional action. There being, to the best of my knowledge, no other kinds of war besides "limited" and "unlimited," it would seem that the Congressional war power has been effectively nullified.

The treaty power of the Senate has also been effectively usurped. Once regarded as the only constitutional means of making a significant foreign commitment, while executive agreements were confined to matters of routine or triviality, the treaty has now been reduced to only one of a number of methods of entering binding foreign engagements. In current usage the term "commitment" is used to refer to engagements deriving sometimes from treaties but more often from executive agreements and even simple, sometimes casual declarations.

Thailand provides an interesting illustration. Under the SEATO Treaty the United States has only two specific obligations to Thailand: to act "in accordance with its constitutional processes in the event that Thailand is overtly attacked, and to 'consult immediately' with the other SEATO allies should Thailand be threatened by subversion. But the presence of 50 thousand American troops in Thailand, assigned there by the executive acting entirely on its own authority, creates a *de facto* commitment going far beyond the SEATO Treaty. In addition, on March 6, 1962, former Secretary of State Dean Rusk and Thai Foreign Minister Thanat Khoman issued a joint declaration in which Secretary Rusk expressed "the firm intention of the United States to aid Thailand, its ally and historic friend, in resisting Communist aggression and subversion." This, obviously, goes far beyond the SEATO Treaty.
